Communities of Opportunity Update

- Communities of Opportunity = an initiative launched in March 2014 in partnership with The Seattle Foundation, and an early strategy of the King County Health and Human Services Transformation's Plan.
- Designed with the ambitious goal of creating greater health, social, economic, and racial equity in King County so that all people thrive and prosper.
- Coordinated use of data to identify census tracts with the greatest inequities in health, housing and
 economic opportunity measures. The resulting maps confirm that where you live in the County, how much
 you make, and the color of your skin are currently significant predictors of your chances of living well and
 thriving even though King County average measures of quality of life, social, and health factors are among
 the highest in the country. Examples of disparities include:
 - 1. The average life expectancy can be 10 years shorter in communities that are just a few miles apart.
 - 2. The average household income in one ZIP code can be \$100,000 less than one nearby.
 - 3. Poverty rates can range from 6% to 54% by neighborhood and smoking rates vary from 5% to 20%.
- Designed to maximize positive impact by working in co-design with community leaders to impact and drive public and private resources toward underinvested neighborhoods in a more coordinated manner.
- Funders and community collaboratives are analyzing current needs, assets and funding flows across health, housing and economic development systems and using Collective Impact principles to implement mutually reinforcing strategies that leverage multiple funding streams to achieve specific outcomes in the most impacted communities.
- COO is making both place-based investments in specific communities and policy/system change investments
 that will help to reduce policies and systems that perpetuate inequities; these two levels of investments will
 be iterative between them and may lead to additional investments in both areas in the coming years
- Milestones: Policy and systems grants awarded to date:
 - 1. African Americans Reach & Teach Health Ministry
 - 2. Futurewise and partners
 - 3. Global to Local
 - 4. Got Green
 - 5. The Mockingbird Society
 - 6. OneAmerica and partners

- 7. Open Doors for Multicultural Families
- 8. Public Defender Association
- 9. Puget Sound Sage and partners
- 10. Seattle Indian Health Board
- 11. Skyway Solutions
- 12. White Center Community Development Association
- In February 2015, place-based investments were announced in Rainier Valley in Southeast Seattle (HomeSight), in SeaTac and Tukwila (Global to Local), and in the White Center/North Highline unincorporated area through the White Center Community Development Association. During March to June, co-design meetings will address strategies, shared outcomes measurement systems with the sites.
- Coming next: A Learning Community workshop in fall 2015 for interested communities to share and learn best practices in community engagement.

Data, Demographics and Assets

Population Measures Life expectancy	Lowest ranked 74 years	Highest ranked 87 years
Health, broadly defined:		
Adverse childhood experiences	20%	9%
Frequent mental distress	14%	4%
Smoking	20%	5%
Obesity	33%	14%
Diabetes	13%	5%
Preventable hospitalizations Housing:	1.0%	0.4%
Poor housing condition	8%	0%
Economic opportunity:		
Income below 200% poverty	54%	6%
Unemployment	13%	3%

Community Assets

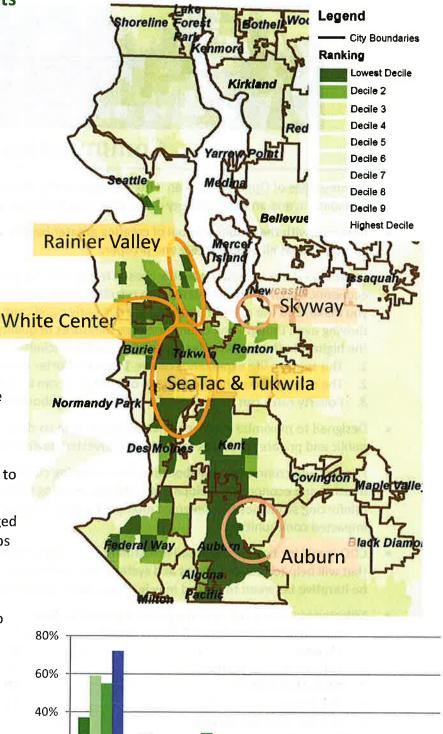

Rainier Valley, population 41,350: Active business association, a community with deep cultural roots and a mosaic of immigrant communities, 59 languages, ethnic community centers, residents aim to prosper in place, youth initiatives.

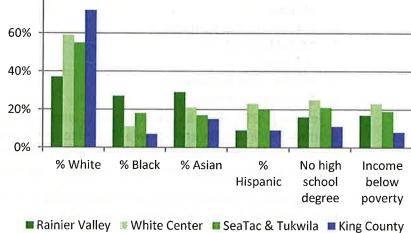

White Center, population 17,760: Engaged resident leaders, institutional partnerships in place, ethnically & culturally diverse community with a well-supported community development association, vibrant multi-ethnic business district, two Hope VI communities, three parks, affordable housing.

SeaTac & Tukwila, population 46,321:

Diverse community, 70 languages, Food Innovation Network in place to create entrepreneurial and employment opportunities, residents interested in catering, food processing, baking, food trucks and urban farming.

Auburn and Skyway: Planning grants awarded.

Data: Public Health-Seattle & King County, King County Health Profile, Health Reporting Areas, December 2014, http://www.kingcounty.gov/healthservices/health/data.aspx

Key Points of the SeaTac-Tukwila

Food Innovation Network

www.globaltolocal.org/fin

What is it?

The *Food Innovation Network* promotes increasing investment in food businesses. Network members work collaboratively to create a common agenda to create jobs and entrepreneurship opportunities and promote healthful eating. Network members include community organizations, businesses, education institutions and local governments.

Health and Economic Disparities

While the King County is one of the wealthiest regions in the country, the SeaTac-Tukwila area experiences great economic and health disparities.

40% of households live below 200% the federal poverty line

median income is 29% of the countywide median

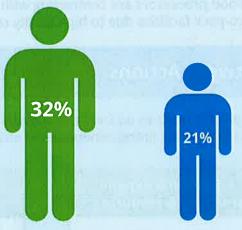

10% unemployment rate

Obesity Rates

SeaTac-Tukwila

VS

County

Demand for Locally Produced Products / Support Local Businesses

King County has a **\$6 billion** food market, ranking **2nd most recommended** U.S. market for food businesses interested in trying out new food products including organic and local products.

Demand and Interest for Food Sector Skills Training, Resources and Commercial Kitchen Access

to Global to Local's focused outreach into a variety of ethnic communities that produced specific and extensive indications of need for support in skill-building and entrepreneurial assistance (2014)

throughout south King County participated in **Healthy Foods Here** program that provided **training** and **technical assistance** to small businesses to increase their fresh food inventory (2010-2012)

20 people

participated in **Project Feast's** commercial Kitchen basics program tailored for immigrant and refugee communities and over **120 people** received their **food handler permit** through their assistance (2013-2014)

75 individuals

received training through **Urban Food Link's "Growing Your Food Business"** workshop
series (2013-2014)

Infrastructure Gaps and Challenges

- Costly to own and build out a commercial kitchen
- Competitive to lease commissary kitchen space
- Food processors are contracting with out-of-state co-pack facilities due to high facility cost locally
- Limited understanding of permitting and license requirements to start businesses
- Limited access to co-pack facilities

Network Actions

The project seeks to address these disparities in health and economic opportunity through a coordinated effort in creating entrepreneurial and employment opportunities in the local food sector.

1. Sustain & expand trainings & resources

Trainings specific to the food industry as well as soft-skill development. Improving coordination across existing trainings and other necessary resources as well as identifying and filling resource gaps will increase this Impact.

2. Create a food innovation district

Create a business cluster environment that spurs job and business formation opportunities for South King County residents. A district includes community health and educational uses, transit accessibility and affordable housing.

3. Develop a training / business incubator facility

Serving as an anchor to the district, a multi-purpose facility will include classroom and commercial kitchen space for trainings as well as community members interested in starting their own food-related businesses.

About The Conference Keynote Speaker

RADM Deborah Parham Hopson, Ph.D., R.N., FAAN U.S. Public Health Service, Senior Advisor for HIV/AIDS Policy Former Associate Administrator for HRSA's HIV/AIDS Bureau Health Resources and Services Administration

Deborah Parham Hopson is the Senior Advisor for HIV/AIDS Policy at the Health Resources and Services Administration (HRSA). As Senior Advisor, Dr. Parham Hopson provides expert guidance on initiatives involving national and international HIV/AIDS policies and issues.

Prior to assuming this position in February 2013, Dr. Parham Hopson served as the Associate Administrator of the HIV/AIDS Bureau (HAB) for 11 years. As HAB's Associate Administrator,

Dr. Parham Hopson was responsible for managing over \$2.4 billion for programs authorized under the Ryan White HIV/AIDS Program. The Ryan White HIV/AIDS program funds training for health care professionals and medical care, treatment, referrals and support services, for over 546,000 uninsured, underinsured, and underserved people living with HIV disease in the United States and the U.S. Territories.

In addition, as part of the President's Emergency Plan for AIDS Relief, she directed a multi-million dollar global HIV/AIDS program with training, care and treatment activities in Africa, Asia, and the Caribbean.

Parham Hopson holds the rank of assistant surgeon general and rear admiral in the Commissioned Corps of the United States Public Health Service (USPHS), entering the Corps in 1984 with HRSA's Bureau of Community Health Services. She completed a variety of assignments in the HIV/AIDS Bureau, served as deputy chief of staff in the Office of the Surgeon General, and worked as a public health and budget analyst and chief nurse for the National Health Service Corps and other Bureau of Primary Health Care programs.

Prior to her USPHS career, Parham Hopson was a White House Intern, a Presidential Management Intern, and a research associate at the National Academy of Sciences' Institute of Medicine. Her clinical practice was in neonatal intensive care nursing.

She is the recipient of numerous honors and awards, including the USPHS Meritorious Service Medal and Chief Nurse Officer Award, the Black Commissioned Officers' Hildrus A. Poindexter Award, the DHHS Secretary's Award for Distinguished Service, and the Uniformed Services University of the Health Sciences Exceptional Service Medal.

Dr. Parham Hopson received her undergraduate degree in nursing and health from the University of Cincinnati and her Master of Science and Doctor of Philosophy degrees in health policy and management from the University of North Carolina at Chapel Hill School of Public Health.
