Regional Policy Committee

September 9, 2015

Handout Materials

Overview of How E-911 Communications Work in King County

State & King County 911 Offices

- **Citizen Dials 911**
 - State 911 office and King County contract with Century Link
 - Century Link also sub-contracts with Intrado
 - Develop & Maintain Infrastructure to route calls from caller to correct 911 center
 - Old Legacy
 - Next Generation 911

12 King County 911 Centers (PSAPs)

- **911 Call Answering**
 - 12 King County PSAPs answer, triage, prioritize calls
 - Receive, screen and dispatch Police, Fire and EMS calls routed to them
- **How PSAPs Funded?**
 - 75% from Assessments Charged to Police and Fire Agencies we serve
 - 10-15% from E-911 Taxes paid by Consumers / Collected by County
- **Purpose to pay for equip & personnel to answer 911**
 - Does not cover dispatch of calls
 - Each PSAP funds the dispatch portion
 - 87% of NORCOM funded by its agencies

Radio Dispatch System

- **Dispatch of Police/Fire/EMS**
 - 12 King County PSAPs use 2 systems to dispatch calls.
 - 800 MHz Radio – majority of agencies
 - VHF Radio – a few more remote Fire Districts
- **Not the subject of today**
- **PSERN Ballot Measure passed to Fund**

Nine King County PSAP Coalition

Who We Represent
Who We Serve

PSAP Name (911 Call Center)	Population Served	Total 911 Calls (Source: KC E-911 Office)	No. of Jurisdicti ons Served	Police/Fir e/Both	Square Miles	Agencies Served
Valley Communications	735,694	678,724	22	Both Fire and Police	380	9 Police Agencies: Renton, Tukwila, Kent, Auburn, Pacific, Federal Way, Black Diamond, Algona, Des Moines 13 Fire Departments/Districts: Kent, Valley Regional Fire Authority (Auburn, Algona, Pacific), Renton, Tukwila, South King Fire (Federal Way/Des Moines) Burien/Normandy Park, Skyway, Maple Valley, Mountain View Fire & Rescue, Palmer/Seleck, KC Medic One, North Highline, Sea Tac.
NORCOM	640,000	284,635	19	Both Fire and Police	1400	8 Police Agencies: Bellevue (Police and Fire), Kirkland (Police and Fire), Mercer Island (Police and Fire), Clyde Hill (Police), Medina (Police), Bothell (Fire), Redmond (Fire), Snoqualmie (Fire) 14 total Fire/EMS Agencies/Districts: Above cities plus Eastside Fire & Rescue, Duvall Fire, Fall City Fire, Shoreline Fire, Northshore Fire, Woodinville Fire, Snoqualmie Pass Fire & Rescue, and Skykomish Fire & Rescue.
Redmond	66,924	58,523	2	Police	19.43	Redmond, Duvall

Nine King County PSAP Coalition

How did we get here?

Why we are here?

How Did We Get Here?

- KC E-911 office funded consultant study (GeoComm) in 2010-11
 - KC proposed PSAP consolidation as a way to pay for future NG-911 technology
 - KC has invested/committed \$30 million in NG-911 since 2005
 - KC E-911 reported it was running out of money
 - GeoComm ultimately supported KC interest in consolidating PSAPs
- KC E-911 implemented process designed to consolidate PSAPs
 - Non-KC Electeds/Appointed determined problem was “Financial Management”
 - Identified “consolidation” as one of many options to explore
 - Pointed out that “consolidation” might save \$ for PSAPs on their 75%
 - But consolidation does not save KC E-911 significant \$ on their 25%
 - Voted to change title to “E-911 Financial Stability Discussions”
 - KC E-911 did not concur
 - Process was one-sided – not collaborative
- PSAPs engaged and partnered with King County Council
 - Council created 2015-16 budget provisos requiring:
 - Financial & Technical Audits of KC E-911 Office
 - Ordinance to assure transparency and inclusiveness
- Executive submitted proposed Ordinance on July 1
 - Executive revised proposal on September 4

Why are we here today?

- Nine PSAP Coalition does not concur with Executive Proposal
 - No collaboration in its development
 - Not consistent with Audits & National Stds. for Governance
 - Repeats key elements of prior unilateral process
 - Unilaterally establishes “work plan” without input or review
 - Unilaterally establishes “time line” without input or review
 - Retains control of Project Management Team & Facilitator – no independence
- Request the RPC approve and forward Substitute Ordinance:
 - Reflects recommendations of Audits, KC Council & PSAPs
 - Follows FCC 2014 Recommendations & National Emergency Number Assn. Stds.
 - Establishes open and transparent process
 - Collaboration starts at the beginning including work plan, timeline, facilitator
 - Implements Audit recommendations for oversight of E-911
 - Titled to reflect oversight of KC E-911 – not PSAPs
 - Focus is on 25% of money spent by KC E-911
 - Audits confirm KC E-911 running out of money under present tech spending
 - Focus not on 75% spent by PSAPs
 - Based on Audit recommended models from King County and U.S.
 - Oversight must be regional, representative, collaborative with all stakeholders

Nine King County PSAP Coalition

What is at stake?

FCC Chairman Wheeler describes multistate 911 outage report as 'terrifying,' vows to take action quickly

Donny Jackson | *Urgent Communications*

Oct 17, 2014

"We're pro- new technology, but we're even more pro- public safety," Wheeler said during the meeting, which was webcast."

Excerpts from Executive Summary of FCC Investigative Report:

"The April 2014 multistate outage was far more than a simple software error on an otherwise uneventful Spring evening in Englewood, Colorado. It was a vivid example of the vulnerabilities that IP-supported architectures may present, without sufficient network safeguards and clear lines of accountability."

"The outage was caused by a software coding error in the Colorado facility, and resulted in a loss of 911 service for more than 11 million people for up to six hours. Over 6,600 calls never reached a PSAP. Although, fortunately, it appears no one died as a result, the incident – and the flaws it revealed – is simply unacceptable."

"The introduction of NG911 and IP-based technologies will require industry as well as state, local, tribal and territorial governments and commissions to move aggressively to ensure that technology optimization does not introduce unacceptable risks that threaten imperiling 911 reliability and resiliency."

"The transition to NG911 creates a need for closer coordination of evolving practices and expectations regarding 911 among all governmental and commercial entities, as well as broad-based understanding among all stakeholders regarding the status of deployments of NG911 from all stakeholders involved."

What is at Stake?

- **Complex and Expensive New Technology**
 - Nationally: Technology a Major Focus
 - Next Generation 911 - Includes Text-to-911
 - Security Vulnerabilities
 - Need for Regional Vision/Planning/Collaboration
 - Locally: NG-911 efforts since 2005 - \$30 million
- **Technology Risks - April, 2014 911 Outage**
 - Nationally: April 911 outage – 6 hours
 - FCC & Wash. State Investigations
 - Affected 7 states – Washington the worst
 - Due to Faulty Intrado Router in Colorado
 - \$17 million FCC fine to Century Link/Intrado
 - \$3.4 million FCC fine to Verizon
 - \$2.9 million WA State fine to Century Link
 - New York under Investigation - \$700 million over budget
 - Locally:
 - KC E-911 Office responsible for 911 Phone System
 - Technical, Financial & Performance Audits of KC E-911
 - Issues: Smart 911, Wireless Call Routing, Ongoing Phone Upgrades, NG-911, Collaboration, Regional Approach

FCC fines CenturyLink \$16M over multistate 911 outage

CenturyLink fine up to \$2.9M suggested for big 911 failure

Updated December 2, 2014 12:27 pm | Updated December 2, 2014 12:27 pm

National Emergency Number Association (NENA) & National E9-1-1 Implementation Office

(Responsible for setting NG-911 standards)

Source: A National Plan for Migrating to IP-Enabled 9-1-1 System

- ***“The deployment of NG 9-1-1 will require increased coordination and partnerships among government and public safety stakeholders, 9-1-1 Authorities, service and equipment providers, and PSAP administrators planning and implementing NG 9-1-1.”***
- ***“Underlying this kind of implementation [NG-911] is the need for coordination among multiple 9-1-1 Authorities. The roles and responsibilities and intergovernmental arrangements for the IP-enabled 9-1-1 system will need to be defined across jurisdictional boundaries and within new partnerships. This is more complicated than the independent, unilateral style of deployment.”***

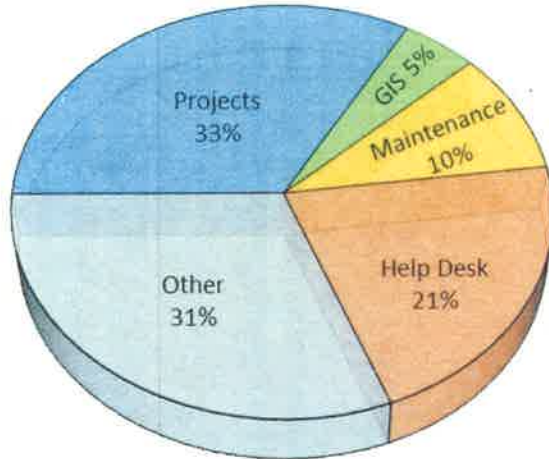

What is at stake?

- Next Generation 911 is long-term, complex, standards not fully set
 - FCC does not mandate NG-911 – Response to Redmond PD:
“Currently, there are no regulations that require local 911 authorities to adopt NG911 technologies or services, as the Commission can only impose regulations on wireless carriers.”
- NG-911 standards not fully developed
 - Beta-Max vs. VHS
 - HD vs. Blue Ray
 - \$30 million invested in King County before standards fully adopted
- Independent Audit calls for “All Stop” to NG-911 in King County until new regional governance and plan in place

Why is Regional Coordination So Necessary?

KC E-911 must coordinate with Technology & Resources at PSAPs
(NORCOM example)

- 1600+ users
- 254 Police and Fire mobile data computers
- 75+ NORCOM desktops/laptops
- 806 Registered users in NOTIS
- 2,995 Service tickets opened -- 10% decrease over 2013
- 3,113 service tickets closed – 3% increase in closures

NOTIS Tickets by Priority	%
1 - Critical	0.2%
2 - Major	1.9%
3 - Important	25.8%
4 - Desirable	68.8%
5 - Low Impact Low Urgency	1.4%
Non-SLA	1.9%
Total	100%

	IT Service	Service Description	Percentage of Support Hours
	Help Desk		
	Agency Support	End user support of NORCOM based software applications and related hardware.	21%
	Application Maintenance & Support	Upgrade, maintenance, and support of applications and interfaces for Communications, Police, Fire and NORCOM administration.	
	Mobile Computer Hardware	Support relating to mobile data computers (MDC) in Police and Fire vehicles.	
	Fire Alerting	Support relating to Location and Paging.	
	Police Alerting	Support for Paging.	
	Reporting	Agency special report requests.	
	Public Disclosure	Public disclosure data gathering.	
	Infrastructure and System Administration		
	Network/Server	Network & Server infrastructure support and maintenance.	10%
	Telephony	Phone Systems and related technologies.	
	Radio Infrastructure	Radio support for Fire, Police and Dispatch.	
	GIS Services		
	GIS Maintenance and Services	Support and maintenance of GIS data, layers and maps. GIS service requests.	5%
	Projects		
	Projects	Projects supporting NORCOM and its Police and Fire agencies.	33%
	Other		
	Other	Non-project meetings, training, vacation, general tasks, etc.	31%

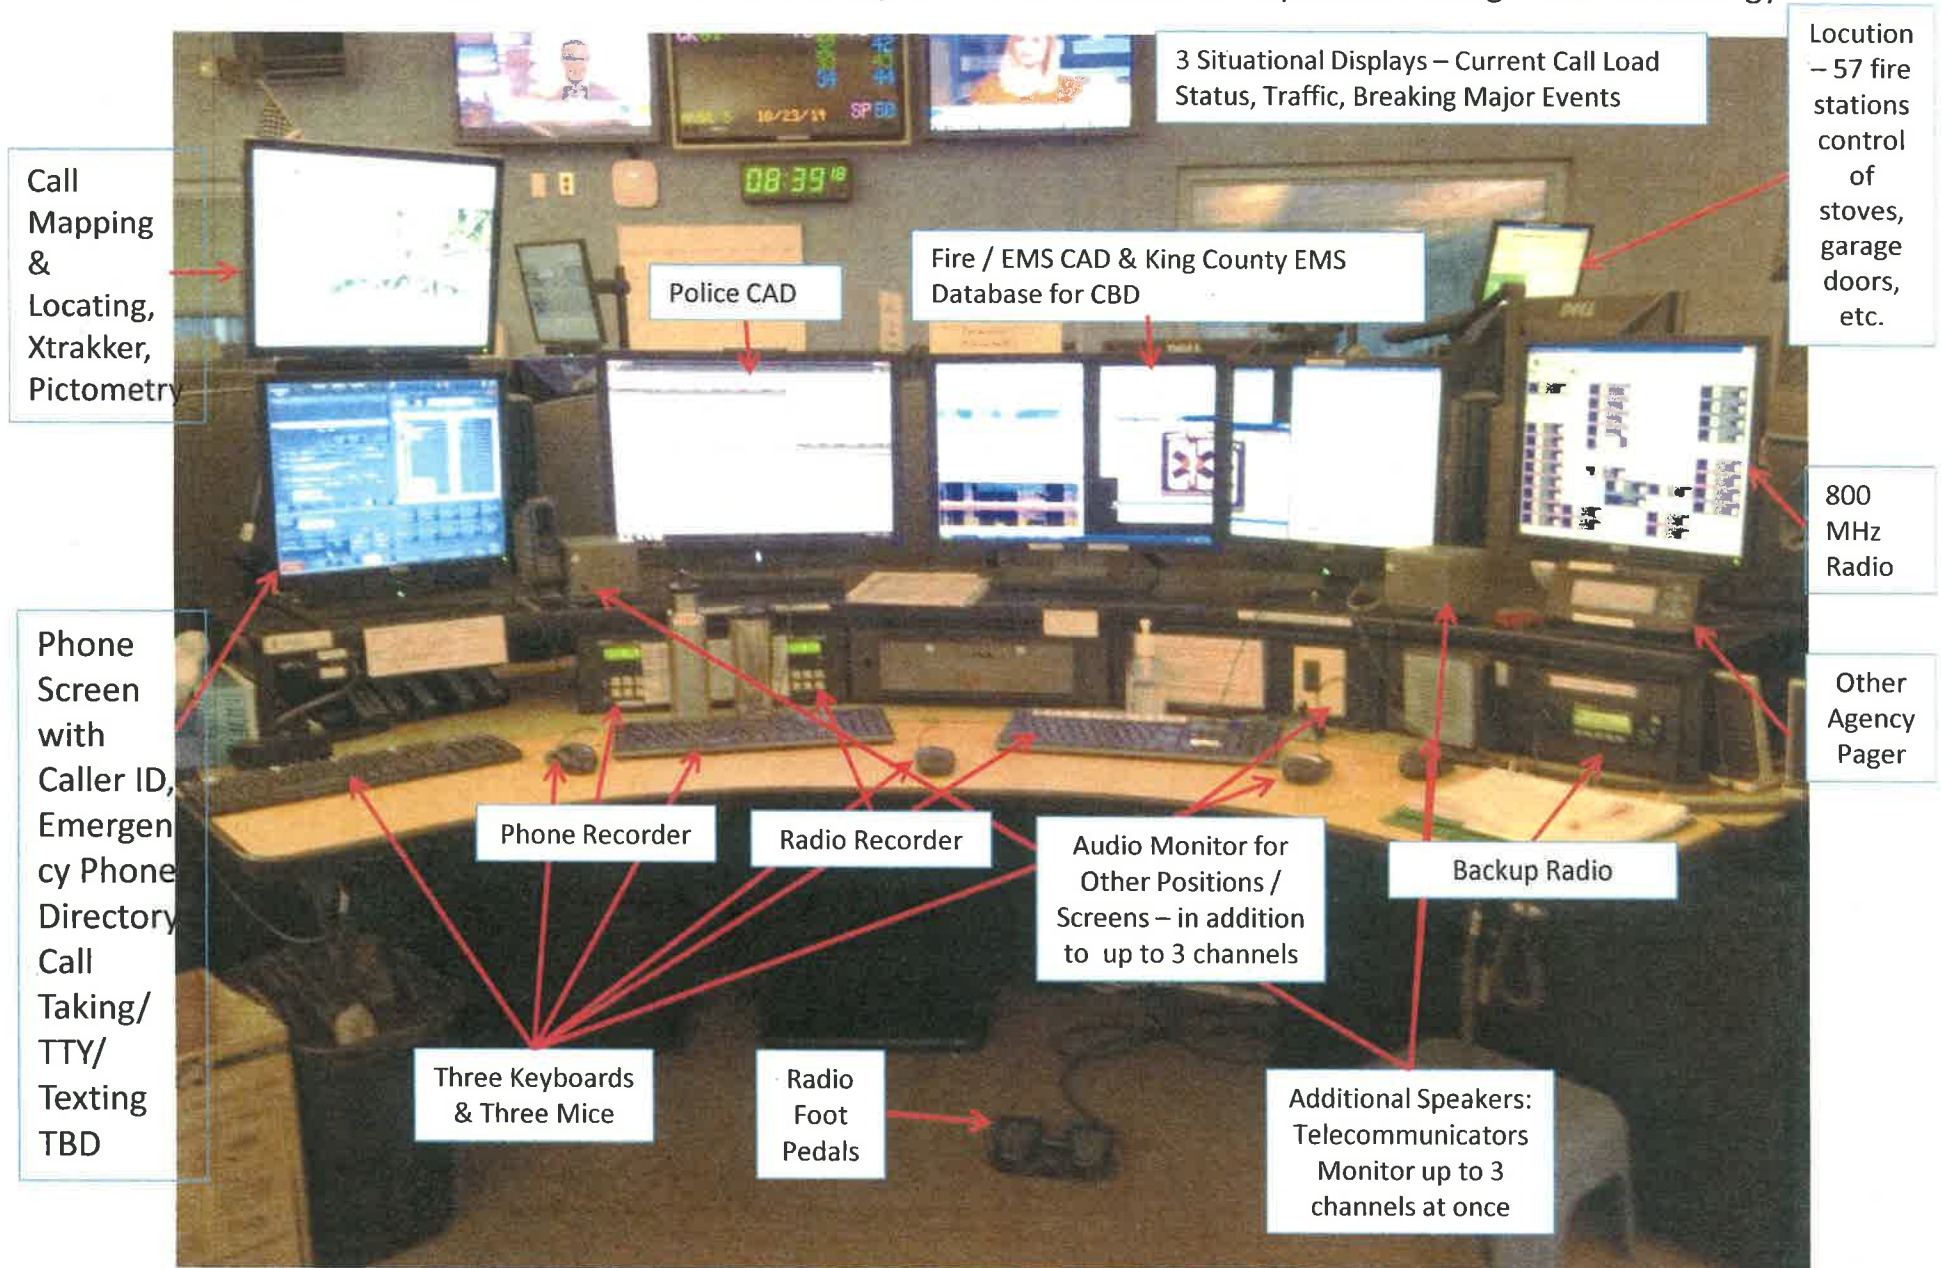

Example of 2-YEAR PSAP Technology Work Plan (NORCOM)

(All stakeholders must collaborate on plan, system standards, resources, timetable)

Start Date	End Date	Activity Catalog	Stakeholder Priority #	Title	Estimated Costs	Budgeted? Yes/No	Total Estimated Resource Days 59 days = 1 FTE	Status
2013 Q2	2015 Q1	A11	1	NWS 10.x Pre-GA to 10.x GA Migration	\$450,509	Yes	28	In Progress
