VII.	IMPACT FEES 17
VIII.	APPENDICES 21

## I. EXECUTIVE SUMMARY

This Six-Year Capital Facilities Plan (the "Plan") was prepared by Renton School District (the "District") in compliance with the requirements of the Washington State Growth Management Act (GMA, the Act), King County Code Title 21A.43, and applicable ordinances of the cities of Bellevue, Newcastle and Renton. It is the District's intent that the Plan be adopted by King County and the cities of Bellevue, Newcastle and Renton as a sub-element of their respective Capital Facilities Plans, and that that those jurisdictions assess and collect school impact fees on behalf of the District, as empowered by the GMA. However, this Plan is not intended to be the sole planning instrument developed by the District to determine its capital facility needs.

The GMA was adopted by the State legislature in 1990 in response to rapidly increasing development; most notably in King County and the surrounding central Puget Sound area. The Act requires state and local governments to manage Washington's growth by developing and implementing comprehensive land-use and transportation plans, by designating Urban Growth Areas, and by protecting natural resources and environmentally critical areas.

One element of the Comprehensive Plan required of county and city governments is the Capital Facilities Plan. It is this element that addresses existing public facility capacities, forecasts future public facility needs, presents a plan for expanding existing facilities or constructing new facilities to meet those needs, and indicates how those public facility improvements are to be financed. The GMA empowers jurisdictions to assess and collect impact fees as one means of financing new public facilities necessitated by private development.

This Capital Facilities Plan addresses the impact of growth on public school facilities by examining:

- 1. anticipated growth of the District's student population over the next six years;
- 2. the ability of existing and proposed classroom facilities to adequately house those students based on the District's current Standard of Service;
- 3. the need for additional enrollment driven capital facilities;
- 4. the method of financing those capital improvements; and
- 5. calculation of school impact fees based on, among other variables, the number of students generated by recent residential development (student generation factors).

This plan is updated annually and submitted to local governments for inclusion as a subelement in their Capital Facilities Plans. Past Plans have been adopted by King County and the Cities of Bellevue, Newcastle and Renton. The District is currently engaged in dialogue with the cities of Tukwila and SeaTac regarding implementation of impact fees within their jurisdictions.

### **Enrollment Projections:**

Enrollment projections provided by the Office of Superintendent of Public Instruction (OSPI), based on cohort survival, and as adjusted by Renton School District, indicate an overall 9.5% increase in K-12 student enrollment over the next six years, with the highest growth rate, 18.7%, occurring at the Middle School level. Projected K-12 enrollment for the 2021-2022 school year is 16,505, an increase of 1,427 over the actual October 1, 2015 headcount of 15,058.

An independent study of enrollment trends and projections prepared by Educational Data Solutions for Renton School District, reported less conservative outcomes. Taking into account King County birth rates, population growth and housing starts, K - 12 student enrollment over the next six years can be expected to increase by 12.2%, with the middle school population growing by 23.9 %, K - 5 by 9.9 % and grades 9 - 12 by 12.2%. Under this scenario, RSD student population could be expected to increase by 1,840 students by 2021.

For the purposes of this Capital Facilities Plan we will be using the more conservative projections based on the cohort survival method.

### **Current Capacity:**

Student capacity of existing, permanent K-12 facilities, excluding designated special education classrooms and facilities housing special programs, is 14,525. Based on current enrollment (October 1 headcount), the District is showing a deficit of permanent facilities at both the elementary and middle school levels, while high school facilities appear to be experiencing a small surplus. Elementary school facilities, with a current deficit capacity of 1,479, represents the District's greatest challenge and is the primary focus of the District's capital facilities plan.

Both elementary and middle schools rely heavily on the use of relocatable classrooms (portables) to accommodate the ever-increasing and fluctuating student population, with portables now accounting for over 17% of the District's total K – 5 facility capacity. Portables are, however, not considered permanent structures and are not included in the inventory of permanent facilities. They are viewed as a short-term solution for managing enrollment fluctuation and housing students on a temporary basis until permanent facilities can be constructed. They are not considered a long-term solution.

### **Enrollment Projections/Future Capacity:**

Based on OSPI's conservative enrollment projections, significant increases are anticipated at all grade levels over the next six years. While existing surplus capacity at high school facilities appears sufficient to cover projected student growth at that level, enrollment growth at the elementary and middle school levels, together with existing facility capacity deficits, will require construction of new permanent facilities, as well as the reallocation of existing, or acquisition of new, relocatable classrooms.

With the passage of the 2012 Bond Measure in April 2012, funding was secured for the design and construction of the new Vera Risdon Middle School, scheduled to open Fall 2017. With a student capacity of 850, the new facility should result in a surplus middle school capacity of approximately 189 in the fall of 2021. The same enrollment projections indicate that there will be a deficit in the capacity of elementary school facilities of 2,081 by the year 2021 if no new permanent elementary school facilities are provided.

While the 2012 bond measure did address the acquisition of property for future development, funding for design and construction of one or more new elementary schools was not included. However, with the passage of the 2016 Capital Levy in February, funds are now available to move forward with the design and construction of one new elementary school that will begin to diminish the current and projected facility capacity deficits.at the K - 5 level.

### **Capital Construction Plan:**

For the next six years, the District's highest priority will be the construction of new school facilities to accommodate past and projected growth, recognizing and acknowledging the major capacity deficit at the elementary school level. This includes:

- Completion of Risdon Middle School, funded by the 2012 Bond Measure, currently under construction, and scheduled to open Fall 2017.
- Design and construction of Sartori Elementary School, the District's first urban elementary school, funded by the 2016 Capital Levy and envisioned as a magnet school, drawing students from throughout the District.
- Acquisition of land for future development, also funded by the 2016 Capital Levy.
- Acquisition of additional relocatable classrooms (portables) and the redistribution of existing relocatables as necessary.

Other high priority capital improvements fall into four major categories; safety and security, energy conservation, site related improvements, and building upgrades. Improvements will occur district-wide, affecting nearly all District facilities, achieving and maintaining the level of service necessary to provide safe, healthy, and nurturing learning environments for all students. Not all of these projects are enrollment driven.

The District will also be exploring its options to expand its high school facilities. As an alternative to constructing a fourth high school, the feasibility of expanding existing facilities at the Lindbergh High School and Renton High School sites will be considered.

### Finance Plan:

The primary funding sources for capital facilities projects over the next six years include remaining funds from the 2012 bond measure and the recently passed 2016 Bond Levy,

school impact fees currently being collected by King County and the cities of Bellevue, Newcastle and Renton, state funding available through the Office of Superintendent of Public Instruction, and a future bond initiative.

Estimated expenditures are \$139,345,000, of which approximately 60% are secured by the 2012 Bond and 2016 Capital Levy, and 40% unsecured.

### **Impact Fees:**

Impact fees were calculated in conformance with King County Council Ordinance 11621, Attachment A. Both single and multi-family impact fees have increased over last year's, primarily as a result of the re-evaluation of the District's elementary and middle school cost models. Equally significant are factors beyond the District's control that determine the fee, such as interest rates, assessed values of housing, and the number of students generated by new residential development.

For the past several years the District has voluntarily limited fee increases to the previous year's rate of inflation as an acknowledgment of the economic recession and slow recovery period. Given the current state of the economy the District has made the decision to discontinue its voluntary fee adjustment component.

A comparison of current and previous year's fees is as follows:

	Previous Year	Current Year	Change
Single-Family	\$5,643	\$6,432	\$789
Multi-Family	\$1,385	\$1,448	\$63

## **II. CAPACITY METHODOLOGY**

### STANDARD OF SERVICE

The Renton School District Standard of Service is the standard adopted by the District that identifies the program year, school organizational structure, student/teacher ratios by grade level (taking into account the requirements of students with special needs), daily class schedule, types of facilities and other factors identified by the District to be beneficial in supporting its educational programs and objectives. The Standard of Service is the major determining factor, together with the number of classrooms (or teaching stations) in calculating facility capacity.

The District has adopted a traditional elementary/middle/high school organizational structure that houses kindergarten through Grade 5 in elementary schools, Grades 6 through 8 in middle schools and Grades 9 through 12 in high schools. The school-year calendar adopted by the District is also traditional, typically beginning in early September and ending in mid-June, as is the daily schedule, with classes beginning between 7:20 and 9:30 a.m. and ending between 2:03 and 3:10 p.m., dependent on grade level.

The District and the Renton Education Association recognize that reasonable class size is necessary for optimum learning, and have established the following student/teacher ratios:

Primary (K-3)	24:1
Intermediate (4-5)	29:1
Secondary (6-12)	29:1

The 29:1 ratio at the secondary level applies to all Language Arts, Social Studies, Science, Math, World Languages, World Language Exploratory and Health classes. Other ratios apply as follows:

Band/Orchestra	40:1
Choir	50:1
Middle School PE	35:1
High School PE	40:1
All other classes	31:1

Student /teacher ratios for special education classes held in self-contained classrooms within comprehensive elementary and secondary facilities are not addressed in this Plan. Similarly, educational facilities dedicated solely to special education or other specialized programs are excluded from capacity calculations, as are associated student headcounts.

Student/teacher ratios referenced above are applicable to both permanent and relocatable classrooms. However, inasmuch as relocatable facilities do not generally allow for the full range of educational activities promoted by the District, they are generally viewed as temporary or interim housing, necessary to accommodate enrollment fluctuations and development driven enrollment increases, but only until such time as permanent facilities can be financed and constructed. They are not viewed as a long-term solution to rising enrollment or deficit facility capacity. For those reasons, capacities of relocatable classrooms are calculated, but not used in the analysis of future facility needs.

### PRACTICAL CAPACITY MODEL

The Practical Capacity Model calculates building capacity based on limitations that existing facilities place on enrollment due to existing educational programs, operating policy and contractual restrictions.

The calculation is made by reviewing the use of each room in each facility. For every room housing students, a calculation is made, assigning a maximum number of students per room. Sometimes the capacity of core facilities, such as the cafeteria or gym, or the quantity of restroom fixtures, may limit facility capacity to a level below that calculated by collective classroom capacity levels.

Capacity at the secondary school level is further limited by scheduling limitations and student selection of elective classes. If rooms are utilized by staff for their planning period in a six period day, capacity is limited to 83% (5/6) of the theoretical capacity. Since secondary schools offer a number of elective courses, many courses will not attract a full classroom of students.

Another factor that has influenced facility capacity at the elementary school level is the change from half-day to full-day kindergarten. Beginning with the 2014-2015 school year, all kindergarten classes throughout the District were extended to full-day. This change alone resulted in a decreased elementary school capacity of 692, the equivalent capacity of more than one entire elementary school. This change was mitigated primarily by providing additional temporary, relocatable classrooms throughout the District, and by converting other specialized educational spaces, such as computer labs, into K–5 classrooms.

In addition to full-day kindergarten, reduced student/teacher ratios as prescribed by the McCleary Act will significantly impact building capacity for grades K-3. A recent survey conducted as part of the K-3 Classroom Reduction Grant Program, authorized by SSB 6080, indicated that an additional 42 classrooms will be required to meet the proposed K-3 student/teacher ratio of 17:1. This is equivalent to a capacity deficit of 644. The results of this survey were validated by WSU under the auspices of OPSI.

A complete inventory of District facilities, including capacities, is provided in Section III.

## **III. INVENTORY AND CAPACITY OF FACILITIES**

Renton School District's capital facilities include both permanent structures and relocatable (portable) classrooms. Permanent facilities are further categorized as either K-12 (traditional elementary, middle and high school configurations), Special Instructional Use or Non-instructional Support Facilities. The District maintains a total of 30 permanent and 49 relocatable facilities serving a total student population of 15,255 (October 2015 headcount)..

The District's K-12 facilities include 14 elementary schools, 3 middle schools, 3 high schools and a Secondary Learning Center. Four Special Instructional Use facilities house the District's early childhood, special education and alternative educational programs. Support facilities include Kohlwes Education Center (admin.), Transportation Center, Facilities Operations and Maintenance Center, Nutrition Services/Warehouse, Renton Memorial Stadium and the Lindbergh Swimming Pool. Total permanent facilities encompass 2,421,229 square feet, with 2,243,813 square feet (93%) devoted to K-12 and instructional special use. See Appendix A for District Maps.

Relocatable facilities are used primarily to address enrollment fluctuations and to house students on a temporary basis until permanent facilities can be constructed. For those reasons they are not considered a long-term solution for housing students and are not acknowledged in the calculation of the capacity of K-12 facilities. Of the 49 relocatable facilities in the District's inventory, 38 are "double portables" containing two classrooms, providing the district with a total of 87 relocatable classrooms encompassing 77,952 square feet of additional instructional space.

Table 1 below summarizes existing K-12 facility capacity. A complete inventory of District facilities, including undeveloped property, follows. Facility capacity worksheets may be found in Appendix B.

Туре	Elementary	Middle	High	Total

## **IV. ENROLLMENT PROJECTIONS**

Renton School District six-year enrollment projections through the 2021-22 school year are based on data published by the Office of the Superintendent of Public Instruction (OSPI). OSPI utilizes the cohort survival method to forecast student enrollment projections for a six-year period based on actual student headcounts documented for the previous six years. Enrollment reports prepared by the District are submitted to OSPI on an annual basis. The District's October 1, 2015 Enrollment Report and OSPI Report No. 1049, dated December 3, 2015, are included in Appendix C.

Renton School District six-year enrollment projections, found on the following page, reflect adjustments to OSPI's report based on the following:

- 1. Report structure has been modified to reflect middle school versus junior high school grade level configuration.
- 2. Headcount includes only K-12 students attending comprehensive instructional facilities and excludes students attending special education facilities or facilities dedicated to alternative learning experiences.

Current projections indicate significant increased enrollment over the next six years, most significantly at middle school grade levels, with a slower growth rate at elementary and high school grade levels (Table 2).

By the school year 2021-2022, the District can expect an overall student enrollment increase of 9.5%, with a 7.9% increase at the elementary school level, an 18.7% increase at the middle school level and a 5.4% increase at the high school level.

	2015 Headcount	2021-22 Projection	Student Increase	% Increase
Elementary	7,641	8,243	602	7.9
Middle	3,177	3,771	594	18.7
High	4,260	4,491	231	5.4
Total	15,078	16,505	1,427	9.5

\* Information adapted from OSPI Enrollment Projects Report No. 1049, December 3, 2015. Headcount and projections do not include enrollment at Special Use facilities.

## V. ENROLLMENT DRIVEN FACILITY NEEDS

Table 3 compares the current capacity of Renton School District facilities to current and projected enrollment. For the school year 2021-2022, the table indicates a significant deficit of 2,081 at the elementary level and a much less imposing deficit of 649 at the middle school level. Only at the high school level does the current capacity appear adequate to handle projected 2021 -2022 enrollment.

		CURRENT	PROJECTEĎ			
Facility Type	Enrollmen	Permanent	Surplus/(Defic	2021-22	2021-22	
	Linonnen	Capacity	Surprus/(Denc	Enrollment	Surplus/(Defic	
Elementary	7,641	6,162	(1,479)	8,243	(2,081)	
Middle Schoo	I 3,177	3,122	(55)	3,771	(649)	
High School	4,260	5,242	982	4,491	751	
Total	15,078	14,526	(552)	16,505	(1,979)	

### CURRENT AND PROJECTED CAPACITY NEEDS

Table 3

1. Projected surplus/deficit based on current permanent facilities and does not include faci planning, design or construction phases.

The 2012 Bond Measure, approved by District constituents in April 2012, included several provisions specifically targeting these deficits, including a new middle school (recently named Risdon Middle School) and the acquisition of land for future development. A summary of the 2012 Bond Measure can be found in Appendix D.

Risdon Middle School, currently under construction and scheduled to open in Fall 2017, will provide the necessary capacity to handle projected enrollment up to and beyond the sixyear period addressed by this Plan. The new middle school is located near the northern District boundary, in the City of Newcastle, on the site of the recently demolished Renton Academy (old Hazelwood Elementary), and adjacent to Hazelwood Elementary.

At the elementary school level, the 2012 Bond Measure provided for the acquisition of property for future development, but did not include necessary funding for construction. Without that funding, capacity deficits have been mitigated by providing additional temporary, relocatable facilities. However, the District has virtually maximized its use of portables at elementary sites.

With great public support, a Capital Levy initiative was approved in February 2016, allowing the District to move ahead with the planning and design of its 15<sup>th</sup> elementary school, Sartori Elementary. The new school, to be located on the site of the soon to be demolished Sartori Learning Center and scheduled to open in September 2018, will be the District's first urban elementary school and its first magnet school, drawing students from currently overcrowded facilities throughout the District. With its prime urban setting along

Renton's Park Avenue North, the District is looking at opportunities to partner with the City of Renton to make this development a true community resource.

While there appears to be no current deficit at the high school level, the District is aware that additional facilities will be needed in the not too distant future. As an alternative to building a fourth high school, the District is considering the expansion of its existing campuses. Lindbergh High School is a potential candidate, given that it was originally designed to accommodate an additional wing that was never constructed. Renton High School also offers some expansion capabilities, which could involve the relocation of several District support services located on that campus.

## VI. SIX-YEAR FINANCE PLAN

Capital facilities capacity improvements referenced in this Plan will be funded by a recently passed 2016 Capital Levy, remaining funds from the 2012 bond, impact fees assessed and collected by King County and the cities of Bellevue, Newcastle and Renton, and possible future bond initiatives or other unsecured funding. The District may also be eligible for OSPI school construction assistance.

Risdon Middle School (Middle School No. 4), scheduled to open Fall 2017, represents the final major project to be completed under the 2012 bond measure. Other capacity related projects financed by that bond measure included land acquisition and the construction of additional relocatable facilities at several elementary school sites.

The District's intent in structuring its capital improvement programs is to maintain a constant level of construction throughout the program period in order to optimize the utilization of its management capabilities. The District utilizes a combination of in-house project management (Capital Projects Office) and outside management consultants.

Estimated expenditures for capacity improvement projects over the duration of the Plan are indicated in Table 4 below.

		Es		Funding (\$1,000s)					
PROJECT	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22	Total	Secured <sup>2</sup>	Unsecured <sup>3</sup>
Risdon Middle School	18,200	7,900					26,100	26,100

#### SIX-YEAR FINANCE PLAN

Capacity Improvement Projects

Table 4

1. Estimated expenditures based on total project cost including hard and soft costs.

2. Secured funding includes 2012 bond monies, previously collected school impact fees, and proceeds from sale of surplus properties.

3. Unsecured funds include OSPI School Construction Assistance, future school impact fees and future bond initiatives.

## VII. IMPACT FEES

The GMA empowers jurisdictions to assess and collect impact fees as a means of supplementing the funding of additional public facilities necessitated by new development. In the case of public schools, impact fees are assessed only on residential development.

To determine an equitable school impact fee throughout unincorporated King County, King County Code 21A was adopted, establishing an impact fee formula that has in turn been adopted by the cities of Bellevue, Newcastle and Renton, in their respective enabling ordinances. The formula requires that school districts establish "Student Generation Factors" that estimates the number of students generated by each new single or multi-family residential unit constructed, and to establish district-specific construction costs that are unique to that district. Refer to Appendix G for substantiating documentation on Student Generation Factors.

Other factors influencing impact fees include:

Site Acquisition Costs - the estimated cost per acre to purchase property.

Building Acquisition Cost - the estimated cost to construct facilities unique to the district. New Facility Cost Models are provided in Appendix G.

Temporary Facility Cost - the estimated cost per classroom to purchase and install a relocatable classroom, including site work and utilities.

State Funding Assistance Credit - the amount of funding provided by the State, subject to District eligibility, based on a construction cost allocation and funding assistance percentage established by the State.

For the past several years, the District has included a Voluntary District Fee Adjustment component into the prescribed impact fee formula. This was initiated in response to declining economic conditions, and was continued through the slow recovery process. Given current economic conditions, especially within the construction industry, the District is discontinuing that fee reduction component.

Based on the Growth Management Act and King County Code 21A, impact fees for the plan year 2016 are:

Single-Family Units	\$ 6,432
Multi-Family Units	\$ 1,448

Single-Family and Multi-Family Fee Calculation spreadsheets follow.

## SINGLE-FAMILY RESIDENCE FEE CALCULATION

## STUDENT GENERATION FACTORS

The formula for determining school impact fees, as established by King County Council Ordinance 11621, Attachment A, requires that school districts provide "student factors based on district records of average actual student generation rates for new developments constructed over a period of not more than five years prior to the date of the fee calculation." The Ordinance also provides that, in the event this information is not available in the District, "data from adjacent districts, districts with similar demographics, or county-wide averages must be used."

King County currently assesses and collects impact fees on behalf of twelve school districts, including Renton School District. Of those twelve districts, seven districts conduct their own surveys to develop their unique student generation factors based on district records and actual development data. The remaining five districts, including Renton, rely on averages of student factors developed by other districts.

In accordance with King County Ordinance 11621, Attachment A, the District has chosen to use a county-wide average based on all districts that have performed their own student generation factor surveys as well as those that have similarly relied on county-wide data. The Student Generation Factors in the table below represent an average of the student rates calculated by the other eleven school districts.

• • • • = = • • •	• = • = • • • • •

APPENDIX G

## FACILITY COST MODELS

Facility cost models are a calculation of the cost to construct educational facilities unique to the District. This is accomplished by utilizing both District specific data as well as information available from OSPI.

OSPI constants are factors established by OSPI as part of its School Construction Assistance Program. State Funding Assistance Percentages are unique to individual school districts while the Construction Cost Allocation (per square foot of construction) is constant throughout the state. The State Area Allocation (per student) is used solely by OSPI to determine a District's eligibility for state funding. It is not meant to represent or reflect the unique spatial needs of a District necessary to provide its adopted programs and standard of service.

The District Area Allocation utilized in the cost models reflects historical data from previously constructed facilities, or facilities currently under construction, adjusted to reflect current programs, anticipated funding and other topical issues. The applied Cost per Square Foot is an average of recently bid school projects of similar grade levels in the Puget Sound Region, as reported by OSPI.

Elementary and Middle School Cost Models follow.
