

SNOQUALMIE VALLEY SCHOOL DISTRICT 410

CAPITAL FACILITIES PLAN 2017

Snoqualmie Valley School District No. 410 hereby provides to the King County Council this Capital Facilities Plan documenting the present and future school facility requirements of the District. The Plan contains all elements required by the Growth Management Act and King County Code Title 21A.43, including a six (6) year financing plan component.

Adopted on June 8, 2017

SNOQUALMIE VALLEY SCHOOL DISTRICT NO. 410

Section 1. Executive Summary

This Six-Year Capital Facilities Plan (the "Plan") has been prepared by the Snoqualmie Valley School District (the "District") as the organization's primary facility planning document, in compliance with the requirements of the State of Washington's Growth Management Act and King County Code 21A.43. This plan was prepared using data available spring 2017 and is consistent with prior capital facilities plans adopted by the District. However, it is not intended to be the sole plan for all of the organization's needs.

In order for impact fees to be collected in the unincorporated areas of King County, the King County Council must adopt this plan as proposed by the District. The Snoqualmie Valley School District also includes the incorporated cities of Snoqualmie and North Bend, as well as a portion of the city of Sammamish. The cities of Snoqualmie, North Bend, and Sammamish have each adopted a school impact fee policy and ordinance similar to the King County model.

Pursuant to the requirements of the Growth Management Act and the local implementing ordinances, this plan will be updated on an annual basis with any changes in the fee schedule adjusted accordingly. See Appendix A for the current single family residence and multi-family residence calculations.

The District's Plan establishes a "standard of service" in order to ascertain current and future capacity. This standard of service is reflective of current student/teacher ratios that the District hopes to be able to maintain during the period reflected in this Capital Facilities Plan. The Standard of Service has been updated to incorporate anticipated class size reduction at the K-3 level, but **does not** incorporate additional class size reductions for all other grades, as outlined in Initiative 1351, which was approved by voters in November 2014. Future updates to this plan will consider incorporating those class sizes as more details surrounding the implementation of Initiative 1351 are known.

It should also be noted that although the State Superintendent of Public Instruction establishes square foot guidelines for capacity funding criteria, those guidelines do not account for the local program needs in the District. The Growth Management Act and King County Code 21A.43 authorize the District to make adjustments to the standard of service based on the District's specific needs.

In general, the District's current standard provides the following (see Section 2 for additional information):

School Level	Target Average Student/Teacher Ratio
Elementary	20 Students
Middle	27 Students
High	27 Students

School capacity is based on the District standard of service and use of existing inventory. Existing inventory includes both permanent and relocatable classrooms (i.e. portable classroom units). Using reduced class size at the K-3 level, the District's current overall permanent capacity is 5,265 students (with an additional 1,858 student capacity available in portable classrooms). October enrollment for the 2016-17 school year was 6,633 full time equivalents ("FTE"). FTE enrollment is projected to increase by 15% to 7,636 in 2022, based on the mid-range of enrollment projections provided by a third-party demographer. Washington State House Bill 2776, which was enacted in 2010, requires all kindergarten classes in the State to convert to full day kindergarten by 2018. The District converted to full day kindergarten in 2016. This transition doubled the number of classrooms needed for kindergarteners, including those which require additional special educational services. HB 2776 also stipulates K-3 class sizes to be reduced to 17 students per teacher by 2018 (down from the 21:1 average currently funded). This transition will require further increases in the number of classrooms needed to adequately serve our grades 1-3 population.

Though areas of growth are seen in various areas of the District, the most notable growth continues to be in the Snoqualmie Ridge and North Bend areas. United States Census data released a few years ago indicated the City of Snoqualmie as the fastest growing city in the State over the past decade, with 35% of the population under the age of 18. The cities of Snoqualmie and North Bend both anticipate future housing growth beyond 2022, while growth in unincorporated King County and the city of Sammamish should experience minimal housing growth in the District, unless annexations occur.

Such large and sustained growth continues to create needs for additional classroom inventory. Previously, those needs have been addressed via the construction of Cascade View Elementary in 2005, Twin Falls Middle School in 2008, a 12 portable classroom expansion at Mount Si High School in 2009 and the conversion of Snoqualmie Middle School into a Freshman Campus for Mount Si High School in 2013.

In the February 2015, a bond proposition was passed to construct a 6th elementary school and expand and modernize the main campus of Mount Si High School.

The expanded and modernized Mount Si High School facilitates the relocation of the freshman campus back onto the main high school campus, which in turn creates needed middle school capacity by converting the current Freshman Campus back to a middle school (Snoqualmie Middle School). The bond proposition did not address the need for expanded field capacity to adequately serve the anticipated larger student body. The District is working on land acquisition and/or alternative field solutions in order to address those known capacity needs. In addition, the District may need to acquire or gain rights to additional property for construction and overflow parking needs.

The 2015 voter-approved proposition also included funds to construct a new Elementary School #6. The construction of Timber Ridge Elementary, completed in 2016 provided initial capacity at all elementary schools to implement full day kindergarten, reduce K-3 class sizes and provide for enrollment growth, as all District elementary schools underwent a re-boundary process in preparation for the opening of Timber Ridge. Elementary capacity needs calculated in this plan incorporate the lower K-3 class sizes that should be fully implemented by 2018. At those capacity levels, and including the addition of Timber Ridge into district inventory, the District's elementary population is currently at capacity. Therefore, future enrollment growth, when combined with these

reduced class sizes, will require additional future elementary school capacity. Relocatable classrooms may provide some short-term relief, however, many of the District's current elementary schools have reached the capacity to add more portable classrooms due to a number of factors, including: land availability, building code restrictions, and capacity of corresponding common areas such as parking, bathrooms, specialist classrooms and building support services. As such, the District anticipates the need for a 7th Elementary School in 2022 in order to provide adequate capacity for future enrollment growth.

Middle school level capacity shortfalls are projected during the construction of Mount Si High School, and will likely be addressed first via conversion of computer labs into general education classrooms until the reinstatement of Snoqualmie Middle School as part of the high school expansion project noted above. If the classroom conversions do not provide sufficient capacity relief at the middle school level prior to the time that Snoqualmie Middle School is brought back online as a middle school facility, the district would need to purchase additional relocatable classrooms.

Section 2. Current District "Standard of Service"
(as defined by King County Code 21A.06)

King County Code 21A.06 refers to a “standard of service” that each school district must establish in order to ascertain its overall capacity. The standard of service identifies the program year, the class size, the number of classrooms, students and programs of special need, and other factors (determined by the district), which would best serve the student population. Relocatables (i.e. portable classroom units) may be included in the capacity calculation using the same standards of service as the permanent facilities.

The standard of service outlined below reflects only those programs and educational opportunities provided to students that directly affect the capacity of the school buildings. The special programs listed below require classroom space; thus, the permanent capacity of some of the buildings housing these programs has been reduced in order to account for those needs. Standard of Service has been updated to incorporate anticipated class size reduction at the K-3 level, but **does not** incorporate additional class size reductions for all other grades, as outlined in Initiative 1351, which was approved by voters in November 2014. Future updates to this plan will consider incorporating those class sizes as more details surrounding the implementation of Initiative 1351 are known.

Standard of Service for Elementary Students

- | | |
|--|-------------|
| • Average target class size for grades K – 2: | 17 students |
| • Average target class size for grade 3: | 17 students |
| • Average target class size for grades 4-5: | 27 students |
| • Special Education for students with disabilities may be provided in a self-contained classroom. Average target class size: | 12 students |

Identified students will also be provided other special educational opportunities in classrooms designated as follows:

- Resource rooms
- Computer rooms
- English Language Learners (ELL)
- Education for disadvantaged students (Title I)
- Gifted education (Hi-C)
- District remediation programs
- Learning assisted programs
- Severely behavior disordered
- Transition room
- Mild, moderate and severe disabilities
- Preschool programs

Standard of Service for Secondary Students

- Average target class size for grades 6-8: 27 students
- Average target class size for grades 9-12: 27 students
- Average target class size for Two Rivers School: 20 students
- Special Education for students with disabilities may be provided in a self-contained classroom. Average target class size: 12 students

Identified students will also be provided other special educational opportunities in classrooms designated as follows:

- English Language Learners (ELL)
- Resource rooms (for special remedial assistance)
- Computer rooms
- Daycare programs

The District's ultimate goal is to provide a standard of service of 17 students per classroom for kindergarten through grade 3, and 25 students per classroom in grades 4 through 5. However, as the District is dependent upon increased State funding for the requisite teaching positions and currently lacks sufficient classroom capacity, it will take a number of years before the District's goal is feasible.

Room Utilization at Secondary Schools

It is not possible to achieve 100% utilization of regular teaching stations because of scheduling conflicts for student programs, the need for specialized rooms for certain programs, and the need for teachers to have a work space during their planning periods. Based on actual utilization due to these considerations, the district uses a standard utilization rate of 83% (5 out of 6 periods) for determining middle school capacity.

The high school is currently researching new schedule options to better meet the CORE 24 graduation requirements (24 high school credits). All options under consideration increase the number of credits students can earn in a year. Seven and eight period days, as well as a 5 period trimester schedule have all been investigated and researched by the high school schedule committee. These schedule options would result in estimated room utilizations of 71% to 75%. As of the date of this document, the high school schedule committee is recommending a 7 period, alternating block schedule for implementation at the high school beginning in the 2018-19 school year.

While the final details of the schedule have yet to be determined, there is a strong likelihood that high school room utilization will be reduced to at least 75%. As a result, high school capacity has been adjusted using a 75% utilization rate. Adjustments to this rate may occur in future revisions to this plan, based on development and actual implementation of the new high school schedule.

Section 3. Inventory and Evaluation of Current Permanent Facilities

The District's current overall capacity after consideration for smaller class sizes in grades K-12 is 7,123 students (5,265 in permanent classrooms and 1,858 in relocatable classrooms). October student enrollment for the 2016-17 school year was 6,633 full time equivalents ("FTE"). FTE enrollment, based on the mid-range of recent third-party demographic projections, is expected to increase by 15% to 7,636 FTE students in 2022.

Calculations of elementary, middle, and high school capacities have been made in accordance with the current standards of service. Due to changes in instructional programs, student needs (including special education) and other current uses, some changes in building level capacity have occurred at some schools. An inventory of the District's schools arranged by level, name, and current permanent capacity are summarized in the following table. In addition, a summary of overall capacity and enrollment for the next six years is discussed further in Section 7.

The physical condition of the District's facilities was evaluated by the 2012 State Study and Survey of School Facilities completed in accordance with WAC 180-25-025. As schools are modernized, the State Study and Survey of School Facilities report is updated. That report is incorporated herein by reference.

- * Does not include capacity for special programs as identified in Standards of Service section.
 ** Difference between enrollment (pg.13) is due to rounding, Parent Partner Program, and out-of-district placements.

Section 4. Relocatable Classrooms

For a definition of relocatables and permanent facilities, see Section 2 of King County Code 21A.06.

The District inventory includes 88 relocatable classrooms that provide standard capacity and special program space as outlined in Section 2. The District inventory of portables provides approximately 26% of capacity District-wide. Based on projected enrollment growth and timing of anticipated permanent facilities, the district anticipates the need to acquire additional relocatables at the elementary and potentially the middle school level during the next six-year period.

As enrollment fluctuates, relocatables provide flexibility to accommodate immediate needs and interim housing. Because of this, new and modernized school sites are all planned to accommodate the potential of adding relocatables in order to address temporary fluctuations in enrollment. In addition, the use and need for relocatables will be balanced against program needs. Relocatables are not a solution for housing students on a permanent basis, and the District would like to reduce the percentage of students that are housed in relocatable classrooms.

The cost of relocatables also varies widely based on the location and intended use of the classrooms.

The District has an additional 15 relocatable classrooms in its inventory that are used for special program purposes or districtwide support services and are not available for regular classroom needs.

Section 5. Six Year Enrollment Projections

The District contracts with Educational Data Solutions, LLC (“EDS”) to project student enrollment over the next six years. EDS provides the District a low, middle and high-range projections that are based on historic growth trends, future building plans and availability, birth rates, as well as economic and various other factors that contribute to overall population growth. Based on the mid-range projection provided in November 2015 by EDS, enrollment is expected to increase by 1,004 students (15%) over the next six years.

The enrollment projections shown below have been adjusted beginning in 2016 to account for the conversion of half-day kindergarten students to full-day kindergarten students, as required by Washington State House Bill 2776, which was enacted in 2010. While this change does not increase the number of students (headcount) projected to attend our District over the next six years, it does increase the need for additional classroom capacity as these students will now be attending our buildings for the full day and will require twice the amount of space as their half-day counterparts. This adjustment results in an increase of approximately 260 FTE kindergarteners beginning in 2016.

* Enrollment Projections above reflect mid-range enrollment projections provided by Educational Data Solutions, LLC (EDS) in November 2015

** Kindergarteners are counted as 1/2 FTE until 2016, when kindergarten classes transitioned to full day programming.

*** The district experienced large increases in Running Start enrollment for grades 11-12 recently. It is still too early to determine if this is a trend or an anomaly based on current circumstances (construction, high school schedule, etc.) Future enrollment will continue to be monitored and projections may be adjusted in subsequent updates to the Capital Facilities Plan.

Section 6. Six-Year Planning and Construction Plan

The District plans to use the following strategies in order to address future needs districtwide:

- Construction of new schools: full reconstruction and expansion of MSHS, and planning and construction of a new elementary school;
- Reinstatement of Snoqualmie Middle School upon partial completion of high school expansion and relocation of current Freshman Campus onto existing main campus location;
- Use of additional relocatables to provide housing of students not provided for under other strategies;
- Field improvements needed to serve the expanded capacity at MSHS; and
- Acquisition of land needed for expansion of transportation facility needs related to growth.

In the fall of 2014, the Board concluded that it would pursue an expanded Mount Si High School and proceeded to adopt a 2015 bond proposition to construct a newly expanded Mount Si High School with modernization of certain existing components. The bond proposition was passed by the voters in February, 2015.

The expanded and modernized Mount Si High School will facilitate the relocation of the freshman campus onto the main high school campus, which in turn creates needed middle school capacity by converting the current Freshman Campus back to a middle school (Snoqualmie Middle School). The bond proposition also did not address the need for expanded field capacity to adequately serve the anticipated larger student body. The District is currently working on land acquisition and/or alternative field solutions in order to address those known capacity needs.

The 2015 voter-approved proposition also included funds to construct a new Elementary School #6 (Timber Ridge Elementary). The construction and opening of Timber Ridge in 2016 provides initial capacity at all elementary schools to implement full day kindergarten, reduce K-3 class sizes and provide for enrollment growth, as all District elementary schools underwent a re-boundary process in preparation for the opening of Timber Ridge. Elementary capacity calculated in this plan incorporates the lower K-3 class sizes that should be fully implemented by 2018. At those capacity levels, the District's elementary population is currently at capacity, with additional portable classrooms being added in the fall of 2017 to address population growth and make progress towards further class size reductions. Future enrollment growth, when combined with these reduced class sizes, will require additional future elementary school capacity. Relocatable classrooms may provide some short-term relief, however many of the District's current elementary schools have reached the capacity to add more portable classrooms due to a number of factors, including: land availability, building code restrictions, and capacity of corresponding common areas such as parking, bathrooms, specialist classrooms and building support services. As such, the District anticipates the need for a 7th Elementary School in 2022 in order to provide adequate capacity for future enrollment growth.

Additionally, the 2015 bond proposition included consideration for the construction of a separate preschool facility that will serve the growing special education needs of our District. This facility would increase the capacity at the elementary school which currently houses the preschool program, and will allow for expansion of our preschool capacity in response to overall population growth.

Middle school level capacity shortfalls are projected during the construction of Mount Si High School, and will likely be addressed first via conversion of computer labs into general education classrooms until the reinstatement of Snoqualmie Middle School as part of the high school expansion project noted above. If the classroom conversions do not provide sufficient capacity relief at the middle school level prior to the time that Snoqualmie Middle School is brought back online as a middle school facility, the district would need to purchase additional relocatable classrooms.

The District also needs to identify additional land to adequately serve enrollment growth. The District's current transportation facility is inadequate for meeting the District's needs. The District has no space at the current facility to park additional busses which are needed to meet the growing student population. In planning for the most recent bond measure, the Board considered adding a new transportation facility to the project list. In an attempt to control the overall cost of the bond proposition, this facility was the first capital improvement left off of the prioritized list of needed improvements recommended by administration. However, at a minimum, additional land must be identified in the near future to meet short term needs, even prior to securing funding for a full-scale transportation facility that will support the future enrollment growth of the district.

Section 7. Six-Year Classroom Capacities: Availability/Deficit Projections

After considering K-3 class size reductions to quantify current capacity, future enrollment projections, and added capacity from construction plans discussed in previous sections above, the following table summarizes permanent and relocatable projected capacity to serve our students during the periods of this Plan.

As demonstrated in the table, the District has continuing permanent capacity needs at ALL levels. Many of those needs will be addressed with the opening of Elementary #6 (Timber Ridge Elementary School) and expansion of Mount Si High School. However, given the conversion to full day kindergarten and reduced elementary class sizes required by 2018, combined with current enrollment growth from new development, even after opening Timber Ridge, the District will face a need to plan for additional capacity at the K-5 level. Some of those additional capacity needs will need to be addressed in the short-term with relocatable classrooms. The construction of Elementary #7 will address the longer-term capacity needs.

As summarized in the table, the District currently has 27% of its classroom capacity in relocatable classrooms. With the addition of relocatable classrooms and the construction of two new facilities over the period of this Plan, the District would have 20% of its classroom capacity in relocatable classrooms in 2022, assuming older relocatable classrooms are not removed from service.

The District will continue to work towards reducing the percentage of students housed in relocatable classrooms, as well as monitoring the future elementary school needs in the district.

PROJECTED CAPACITY TO HOUSE STUDENTS

Elementary School K-5

PLAN YEARS: *	2017	2018	2019	2020	2021	2022

* Plan Years are calendar years; projected enrollment listed above represents fall enrollment of that year.

** Beginning in school year 2018-19, high school capacity has been adjusted to reflect anticipated daily schedule changes. Refer to pg.9 for more information.

Section 8. Impact Fees and the Finance Plan

The school impact fee formula ensures that new development only pays for the cost of the facilities necessitated by new development. The following impact fee calculations examine the costs of housing the students generated by each new single family dwelling unit and each new multi-family dwelling unit. These are determined using student generation factors, which indicate the number of students that each dwelling produces based on recent historical data. The student generation factor is applied to the anticipated school construction costs (construction cost only, **not** total project cost), which is intended to calculate the construction cost of providing capacity to serve each new dwelling unit during the six year period of this Plan. The formula does not require new development to contribute the costs of providing capacity to address needs created by existing housing units.

The construction cost, as described above, is reduced by any State matching dollars anticipated to be awarded to the District, and the present value of future tax payments related to the debt service on school construction bonds. This adjusted construction cost quantifies the cost of additional capacity per new residence during the six year period of this Plan.

However, in accordance with the regulations of King County and the cities of Sammamish, Snoqualmie and North Bend, the local community must share 50% of each cost per new residence. As such, the final impact fee proposed by the District to its respective municipalities for collection reflects this additional required reduction to the cost per new residence.

The finance plan below demonstrates how the Snoqualmie Valley School District plans to finance improvements for the years 2017 through 2022. The financing components are primarily composed of secured funding (via the recently approved bond proposition). The District currently owns land in Snoqualmie or North Bend for the new elementary school #7. The District must also plan for additional land and facilities to meet identified transportation facility needs. Future updates to this Plan will include updated information regarding these capacity-related projects and their associated construction costs.

For the purposes of this Plan's construction costs, the District is using actual and construction bid amounts for the Mount Si High School project and actual costs of recent relocatable acquisitions and the construction of Timber Ridge. These costs include an adjustment for expected cost escalation through the anticipated bid year of each anticipated project.

The District has also updated State match availability estimates from OSPI. A district can be eligible for potential State matching funds for 1) new construction, and 2) modernization/new-in-lieu construction. The calculation for matching funds are grouped and calculated as K-8 and 9-12 capacity.

For purposes of the Impact Fee calculation, only new construction matching funds are applicable. Timber Ridge Elementary qualified for new construction state matching funds. Mount Si High School expansion and rebuild project is anticipated to qualify for modernization matching funds for most of the existing square footage of the building.

Based on the most recent OSPI estimates using the 2022 enrollment projections, the District would not qualify for State matching funds for the new construction of Elementary #7. The OSPI calculation is based on K-8 capacity. When the current Freshman Campus is converted back to a middle school, that building is added to the overall K-8 capacity and currently would prevent the District from qualifying for K-8 state matching funds for new construction.

2017 FINANCING PLAN

Facility:	Estimated Cost	Unsecured Source of Funds:			Secured Source of Funds:		
		Bonds/Local	State Match*	Impact Fees	Bonds	State Match	Impact Fees
<i>MSHS New/Modernization, Land Acquisition and Field Improvements</i>	\$219,800,000	\$0	\$26,421,727	\$500,000	\$192,378,273	\$0	\$500,000
<i>Preschool</i>	\$4,300,000	\$0	\$0	\$200,000	\$4,000,000	\$0	\$100,000
<i>Elementary School #7</i>	\$40,700,000	\$39,700,000	\$0	\$1,000,000		\$0	\$0
<i>Portable Classrooms - ES-MS</i>	\$1,280,000	\$0	\$0	\$380,000	\$0	\$0	\$900,000
<i>Land Acquisition/Development - Transportation Facility Expansion</i>	\$4,500,000	TBD	\$0	TBD	\$0	\$0	\$0

* Note that State Match funds will be held and used to offset costs of unforeseen conditions, unanticipated cost escalation, and/or project change orders, etc. At the completion of construction of all projects in the 2015 Bond Proposition, any unused State Match funds will be used to pay down principal outstanding on remaining debt. Such funds may also be used to make other capital improvements to the facilities of the District, but only after holding a public hearing thereon pursuant to RCW 28A.530.020.

¹ Listed here are estimated total project costs as adjusted for cost escalation through anticipated bid year.

Please note that only construction cost (not total anticipated project cost) is used in the calculation of school impact fees. Those are estimated as follows:

Added Elementary School Capacity:	Estimated total project cost = \$40,700,000	Estimated cost of construction = \$30,500,000.
Added High School Capacity:	Estimated total project cost = \$219,800,000	Estimated cost of construction = \$178,900,000

Appendix A: Single Family Residence Impact Fee Calculation

Site Acquisition Cost Per Residence

Formula: ((Acres x Cost per Acre) / Facility Size) x Student Factor

	Site Size	Cost / Acre	Facility Size	Student Factor	
Elementary	15	\$0	n/a	0.3890	\$0.00
Middle	25	\$0	n/a	0.1620	\$0.00
High	40	\$0	n/a	0.1340	\$0.00
A----->					\$0.00

Permanent Facility Construction Cost Per Residence

Formula: ((Facility Cost / Facility Capacity) x Student Factor) x (Permanent/Total Footage Ratio)

	Facility Cost	Facility Capacity	Student Factor	Footage Ratio	
Elementary	\$30,500,000	584	0.3890	0.8907	\$18,095.39
Middle	\$0	0	0.1620	0.9397	\$0.00
High	\$178,900,000	2,078	0.1340	0.9703	\$11,192.06
B----->					\$29,287.45

Temporary Facilities Cost Per Residence

Formula: ((Facility Cost / Facility Capacity) x Student Factor) x (Temporary/Total Footage Ratio)

	Facility Cost	Facility Capacity	Student Factor	Footage Ratio	
Elementary	\$160,000	20	0.3890	0.1093	\$340.14
Middle	\$160,000	27	0.1620	0.0603	\$57.89
High	\$0	0	0.1340	0.0297	\$0.00
C----->					\$398.03

State Match Credit Per Residence (if applicable)

Formula: Current Construction Cost Allocation x SPI Footage x District Match x Student Factor

	CCCA	SPI Footage	District Match	Student Factor	
Elementary	\$213.23	90	n/a	0.3890	n/a
Middle	\$213.23	117	n/a	0.1620	n/a
High	\$213.23	130	n/a	0.1340	n/a
D----->					\$0.00

Tax Credit Per Residence

Average Residential Assessed Value	\$507,601
