1 A RESOLUTION relating to the operations and finances of
2 the District, adopting the 2021 budget and authorizing
3 improvements.

4 WHEREAS, pursuant to RCW 86.15.140, the King County Flood Control Zone
5 District (District) held a public hearing on the proposed 2021 budget of the District on
6 November 4, 2020, and

7 WHEREAS, the board of supervisors (Board) desires to adopt the King County
8 Flood Control Zone District's (District) 2021 budget, and

9 WHEREAS, by Ordinance 15728, the King County council adopted the District's
10 initial comprehensive plan of development for flood and stormwater control, which is
11 titled "2006 King County Flood Hazard Management Plan," and by Resolution
12 FCD2011-05.1, the District Board amended the initial plan to include a project in the city
13 of Seattle (collectively, the District Comprehensive Plan), and

14 WHEREAS, pursuant to RCW 86.15.110, the Board must approve by resolution
15 all flood control and storm water control improvements, prior to the extension,
16 enlargement, acquisition or construction of such improvements, and

17 WHEREAS, RCW 85.15.110, further provides that such approval resolution must
18 state whether the improvements are to be extended, enlarged, acquired or constructed;
19 state that the comprehensive plan has been adopted; state that the improvements generally

FCD Resolution

20 contribute to the objectives of the comprehensive plan; state that the improvements will
21 benefit the county as a whole; state the estimated costs of the improvements; and identify
22 the data supporting the estimated costs,

23 WHEREAS, the Board desires to approve improvements in the District's 2021
24 budget that are not in the District Comprehensive Plan, or that have been modified by the
25 District's 2021 budget, in accordance with RCW 85.15.110;

26 WHEREAS, the District reaffirms its commitment to ensuring the transparency in
27 its practices and the effective and efficient implementation of capital projects by
28 contracting with King County, as its primary service provider, and other jurisdictions
29 when appropriate, and

30 WHEREAS, the District desires to protect, and where possible, enhance aquatic
31 and riparian habitat in a manner that conserves tribal and treaty-reserved natural
32 resources under treaty reserved rights and is consistent with adopted salmon habitat
33 recovery plans in King County, and

34 WHEREAS, the District acknowledges and affirms its commitment to the
35 interconnectedness of flood risk reduction, environmental stewardship, equity and social
36 justice, and environmental justice;

37 NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF
38 SUPERVISORS OF THE KING COUNTY FLOOD CONTROL ZONE DISTRICT:

39 SECTION 1. The Board hereby adopts the 2021 Budget for the District, as set
40 forth in Attachments A ("Work Program"), B ("2021 Annual Budget"), C ("2021 Annual
41 Operating Budget"), D ("2021 Annual Capital Budget"), E ("2021 - 2026 Six-Year CIP"),
42 F ("2021 Annual District Oversight Budget"), G ("2021 Subregional Opportunity Fund

FCD Resolution

43 Allocations") and H ("2021-2026 Six-Year CIP Project Allocations"); provided that King
44 County, or other jurisdictions contracted to implement projects, work shall submit
45 predesign reports for capital projects to the District executive director, and shall seek
46 approval from the executive director of project charters. Furthermore, King County, and
47 other service providers as appropriate, shall provide to the District executive director
48 thirty percent design project reports for authorization to proceed with sixty percent
49 design, sixty percent design project reports for authorization to proceed to ninety percent
50 design and ninety percent design project reports for authorization to proceed to one
51 hundred percent design.

52 SECTION 2. The Board approves the extension, enlargement, acquisition or
53 construction, as applicable, of the improvements that are included in the District
54 Comprehensive Plan, that are included in the District Comprehensive Plan but have been
55 modified by Attachments C, D and H to this resolution, or that are not included in the
56 District Comprehensive Plan but are identified in Attachments C, D and H to this
57 resolution (collectively, the "Improvements"). The District Comprehensive Plan includes
58 the streams or water courses upon which the Improvements will be enlarged, extended,
59 acquired or constructed. The Board determines that the Improvements generally
60 contribute to the objectives of the District Comprehensive Plan and will be of benefit to
61 the county as a whole.

62 SECTION 3. The estimated costs of the Improvements are stated in Attachments
63 C, D and H to this resolution and the supporting data for the estimated costs are on file
64 with the director of the King County water and land resources division.

65 SECTION 4. For Improvements that will be constructed, preliminary engineering

FCD Resolution

66 studies and plans either have been prepared or will be prepared, and have been filed or
67 will be filed, with the director of the King County water and land resources division.

68 SECTION 5. The Board authorizes the District executive committee to modify
69 project budgets and schedules identified in Attachment H.

70 SECTION 6. The Board reiterates its commitment to educating residents of King
71 County about the dangers of dam failure and directs the District executive director to
72 continue to work with the King County Office of Emergency Management on a dam
73 education and outreach program.

74 SECTION 7. The Board directs the executive director to develop and recommend
75 a bonding policy for the implementation of capital projects. The policy shall be
76 developed by August 31, 2021.

77 SECTION 8. The Board directs the executive director to undertake a study
78 examining how to increase efficiency and efficacy in flood control capital project
79 planning and delivery. The study shall include, an analysis of capital project planning
80 best practices; recommendations and options to increase efficiency and efficacy in capital
81 project delivery. The policy shall be developed by August 31, 2021.

82 SECTION 9. The Board directs the executive director to convene a working
83 group to develop recommendations updating its acquisition policy to accommodate an
84 integrated floodplain management approach while also addressing equity and social
85 justice issues and environmental justice concerns. The recommendations shall be
86 transmitted by August 31, 2021.

87 SECTION 10. The Board directs the executive director to develop and
88 recommend an equity and social justice policy that recognizes an integrated floodplain

FCD Resolution

89 management approach while also addressing equity and social justice issues and
90 environmental justice concerns. The policy shall be developed by December 31, 2021.

91 SECTION 11. The Board directs the executive director to develop and
92 recommend a recreation policy that recognizes an integrated floodplain management
93 approach while also addressing equity and social justice issues and environmental justice
94 concerns. The policy shall be developed by December 31, 2021.

95 SECTION 12. The Board directs the executive director to work collaboratively
96 with King County water and land resources division to develop an integrated approach to
97 identifying, planning, prioritizing and designing flood risk reduction Capital
98 Improvement Projects. This approach will consider risk reduction strategies and projects
99 in a reach and basin context and seek opportunities to collaborate with other partners to
100 achieve cobenefits and leverage public and community investments.

101 SECTION 13. The Board directs the executive director to work collaboratively
102 with King County water and land resources division to develop a process to reevaluate
103 and reprioritize within Capital Investment Strategies as necessary to prioritize
104 multibenefit projects; encourage an integrated floodplain management approach and
105 focus on equity and social justice and environmental justice. This reevaluation of Capital
106 Investment Strategies will begin with the Cedar River Capital Investment Strategy. New
107 Capital Investment Strategies, including the Sammamish River Capital Investment
108 Strategy planning process that is currently underway will utilize an integrated flood
109 management approach, prioritize multibenefit projects and focus on equity and social
110 justice.

111 SECTION 14. The District will convene a committee of governments and

FCD Resolution

112 stakeholders to advise the District as it considers implementation of flood risk reduction
113 projects in the Green River Valley. The District shall consult closely with the committee
114 as the District develops the Lower Green River Corridor Flood Hazard Management Plan
115 for the Middle and Lower Green River incorporating multiple benefits and values through
116 an integrated floodplain management approach. The committee shall also assist the
117 District with development of a programmatic environmental impact statement to support
118 the flood hazard management plan and on a Capital Investment Strategy for the Middle
119 and Lower Green River.

120 SECTION 15. The Board directs King County water and land resources division
121 to develop a report outlining potential options for comprehensive flood risk reduction
122 facilities and strategies on Issaquah Creek by April 30, 2021.

123 SECTION 16. The Board directs the executive director to work collaboratively
124 with the King County Green Jobs Strategy of the department of natural resources and
125 parks to submit a plan developing workforce pathways creating career opportunities and
126 living wage jobs for Black, Indigenous, and youth of color on District capital projects.

127 SECTION 17. The Board directs King County water and land resources division
128 to use compost from the county's stream of organic recycled material on all capital
129 projects where applicable and to provide a report evaluating the expanded use of organic
130 composted material on capital projects. This report shall be transmitted by April 30,
131 2021.

132 SECTION 18. The Board directs the District executive director to provide
133 members of the District Advisory Committee regular reports on capital project delivery
134 by District service providers, capital project milestones and completion, and data relating

FCD Resolution

135 to the county "Strike Team" and "Countywide Capital Project Team" accomplishments.

136 SECTION 19. The Board directs King County water and land resources division
137 to provide a monthly report to the District executive director of the status of acquisitions
138 of property necessary to implement capital projects identified in Attachment H.

139 SECTION 20. The Board directs King County water and land resources division
140 to provide a report on maintenance and operations of the weir on Lake Sawyer by July
141 30, 2021. This report shall include research into the legal status of the weir and the legal
142 responsibilities of the owners, an analysis of inspection reports of the weir and the current
143 condition of the weir, and options for continued operations and ownership of the weir.

144 SECTION 21. The Board directs King County water and land resources division
145 to provide a monthly report to the District executive director on the status of inspections
146 of all facilities monitored and maintained by King County as a service provider to the
147 District.

148 SECTION 22. The Board directs King County water and land resources division
149 to provide a monthly report to the executive director on the status of recruitment and
150 hiring of all vacant positions funded by the District. If any of the five capital project staff
151 positions created in the FCD Resolution 2019-13 remain unfilled by April 1, 2021, the
152 District may consider reallocating the Operating Budget to achieve project delivery goals
153 through alternative contracting methods.

154 SECTION 23. The Board directs King County water and land resources division
155 to provide a quarterly report to the District executive director on the status of progress on
156 items in the Work Program as set forth in Attachment A.

157 SECTION 24. Section 3.6 of the interlocal agreement between the District and

FCD Resolution

158 King County provides that King County shall notify the District executive director in
159 writing if the county needs to modify or reprioritize capital projects. King County's
160 notifications to the District executive director should include information regarding
161 variations within project budgets of more than twenty percent in the "acquisition,"

FCD Resolution

162 "design," "construction," "contingency" and "total" expenditure categories, shown on
163 Attachment D.

King County Flood Control District 2021 Work Program

The District work program is comprised of three categories: district oversight and policy development, operations, and capital improvements. The Flood Control District contracts with King County for operations and capital improvements.

- District Oversight and Policy Development
 - Policy direction to guide Advisory Committee and King County as service provider
 - Financial planning, budgeting, levy rate, bonding (if any)
 - Administration of contracts
 - Asset management
 - Capital improvement priorities
 - Capital improvement implementation evaluation
 - Public awareness priorities
 - Post flood event review and evaluation
 - Federal and state legislative agenda
 - Legal services, financial management, and Washington State audit

- Operations Work Program
 - Annual Maintenance
 - Flood Hazards Plan, Grants, Outreach
 - Flood Hazard Studies, Maps, Technical Services
 - Flood Preparation, Flood Warning Center, Post Flood Recovery
 - Program Management, Supervision, Finance, Budget
 - Program Implementation,
 - District Planning, Outreach, Policy and Technical Services

- Capital Improvement Program (CIP)
 - Capital Improvement Projects Acquisitions and Elevations
 - Programmatic capital funding (Subregional Opportunity Fund, Cooperative Watershed Management Grants, Flood Reduction Grants)

2021 Priorities:

Management & Budget

- Seek federal assistance with US Army Corps issues
- Align capital expenditure schedules
- Provide budget issue requests to Advisory Committee
- Examine how to increase efficiency and efficacy in flood control capital project planning and delivery

Policy Development

- Develop policy framework for monitoring and maintaining flood protection facilities
- Develop Equity and Social Justice Policy
- Convene workgroup to develop recommendations to Acquisition Policy
- Develop Recreation Policy

- Flood Hazard Management Plan Update
- Develop Green Jobs Policy

Capital Projects

- Align budgeted versus actual expenditures for service providers
- Reports from WLRD on capital project progress

Real Estate

- Update facility inventory and real estate records
- Address property title issues

Reports

- Monthly hiring report
- Monthly inventory maintenance/inspection report
- Quarterly work program milestone reports
- Lake Sawyer Weir analysis and report
- Issaquah Creek flood risk reduction facilities options
- Regular reports to Advisory Committee on capital project delivery, capital project milestones and completion, and data relating to county "Strike Team" and "Countywide Project Team" accomplishments

Planning and Studies

- Sammamish CIS
- Lower Green River Planning Process
- Flood Hazard Management Plan Update Process
- Levee Breach Study to evaluate and identify gaps in evacuation and shelter in place plans in areas impacted by a levee breach
- Issaquah Creek studies
- Evaluation of climate change scenarios in partnership with the University of Washington
- Small stream flood studies

Grants

- Monitor Opportunity Fund Project Implementation
- Monitor WRIA/CWM Grant progress and identify leveraging opportunities
- Develop prioritization framework for WRIA/CWM Grant Program

Communications

- Maintain District website
- Update and redesign Be Flood Ready brochure
- Continue education and outreach related to dam safety
- Review and approve communications plans by service providers for planning processes, advisory committees, large wood, flood awareness, and special initiatives
- Conduct media outreach and response on identified priorities
- Participate in public meetings on priorities including robust public process for small stream studies

King County ILA Service Provider Work Plan

Resource Management, Annual Maintenance, and Facility Monitoring

Program Summary: Coordinate facility and property maintenance for the District, which includes 500 flood protection facilities covering 119 linear miles and approximately 800 acres of land managed for flood mitigation purposes. Facility inspections and assessments may lead to proposed repairs in the capital program. Inspections and assessments also help to increase the potential for federal funding assistance for future flood damages.

Annual Maintenance Program:

- Manage work authorizations and coordinate with Department of Transportation (DOT) Road Services Division, Washington Conservation Corps, work crews from the Road Division, Earth Corps, the Department of Juvenile and Adult Detention's Community Work Program, or contractors on completion of maintenance activities:
 - Facility mowing
 - Access gate maintenance
 - Access road maintenance
 - Noxious and non-native plant removal
 - Irrigation and watering
 - Interpretive sign installation and maintenance.
- Coordinate design of facility and acquisition property re-vegetation projects.
- Coordinate design and implementation of volunteer planting and other land stewardship projects.
- Provide land and resource management including management of lands for appropriate levels of public access.
- Inspect, assess and, if necessary, remove hazardous trees.
- Collect and remove garbage from fee-simple owned property.

Flood Protection Facility Assessment and Monitoring Program

- Develop methods for facility inventory/assessment program.
- Conduct annual, spring and fall, facility assessments.
- Conduct, or assist with, post-flood damage assessments.
- Produce annual report on facility conditions.

Facility Maintenance and Repair Program

- Conduct or assist with facility assessments, consistent with the facility assessment and monitoring program.
- Coordinate with the U.S. Army Corps of Engineers (Corps) on PL 84-99 levee inspections including vegetation management, permitting, and mitigation (as necessary).
- Support or lead staff on the Green River Pump Station Operation and Maintenance Program.

Sediment Management, Large Woody Debris, In-stream Management Program

- Coordinate sediment management program/project actions to reduce flood risks.
- Coordinate large woody debris program/project actions to reduce flood risks.
- Monitor other in-stream hazards and coordinate associated flood risk reduction actions.

Flood Hazard Plan, Grants, Repetitive Loss Mitigation, and Public Outreach

Program Summary: Manage repetitive loss area mitigation coordination, public outreach, flood hazard management planning, and grant preparation. Repetitive loss mitigation is generally achieved by buying or elevating at-risk homes. While buyouts and elevations are funded via the capital program, the planning, prioritization, and the Federal Emergency Management Agency (FEMA) grant submittals are funded via the operating program. Most operating costs for grant development are reimbursable if the FEMA grant is awarded. Public outreach for specific capital projects is funded through the capital program; basin-wide outreach regarding on-going and planned capital projects is considered an operating expense.

Repetitive Loss Area Mitigation Planning

Program

- Track repetitive loss area and repetitive loss property information.
- Provide ongoing program database updates, including tracking property owner communications, interest, and staff recommendations for mitigation options.
- Manage and administer King County's Home Buyout and Elevation Program consistent with District acquisition policies.

Public Outreach and Communications Program

- Provide increased citizen preparedness for floods.
- Provide community outreach support for capital projects.
- Conduct annual basin-wide meetings and outreach regarding the full range of floodplain management activities, whether on-going or planned.
- Support media relation activities.
- Coordinate citizen involvement and prepare and facilitate public meetings.
- Coordinate updates to webpage and other outreach and educational materials.
- Coordinate outreach to landowners with facility easements regarding maintenance work.
- Coordinate with the District to implement communications protocols.

Community Rating System (CRS) and federal Disaster Mitigation Act Coordination

- Manage the CRS program consistent with the newly adopted federal CRS manual, including coordination with other CRS jurisdictions in King County through the CRS Users Group.
- Complete annual CRS recertification documentation.
- Coordinate/manage updates and process to the planning and regulatory processes for future flood plan updates, King County's Regional Hazard Mitigation Plan, King County Comprehensive Plan, Shoreline Master Plan, and Critical Areas Ordinance. This includes coordination with other jurisdictions.

Grants Program

If resources are available, the following types of grant activities may be included:

- Develop grant applications for FEMA hazard mitigation assistance grants as well as post-flood funding. Develop other grant applications to support capital project implementation.
- Administer the biennial Washington State Department of Ecology Flood Control Assistance Account Program (FCAAP) grant process and track successful grants to ensure timely reporting.
- Coordinate and assist with preparation of applications for all state and federal flood hazard mitigation grant processes.

Provide grant application technical assistance to cities and other stakeholders, as needed. Grant prioritization within WLRD shall be based on the following considerations, in order of significance:

- The impacts to public safety.
- The portion of the project directly related to flood reduction.
- The risks of potential damage to infrastructure, including but not limited to businesses, homes, farms, and roads.
- Efficiency of staffing hours.

In addition to grant alerts to the District, WLRD shall transmit a grant overview report to the District by June 30 of each year including information with a description of grants for which WLRD has applied and how the above priorities were taken into consideration.

Flood Hazard Studies, Maps, and Technical Studies

Program Summary: Generate technical information used to characterize, quantify, and delineate flood risks, as well as to develop and implement strategies and actions to reduce those risks. Flood hazard technical information types include hydrologic and hydraulic studies, floodplain and channel migration zone maps, geologic studies, geographic information system (GIS) land use data, dam operations studies, risk assessments and flood hazard management corridor working maps. These technical assessments are used to inform the capital project feasibility, prioritization, and design process funded by the capital program.

- Conduct independently or with consultant contracts, as needed, the following technical study and mapping projects:
 - Floodplain delineation and mapping
 - Channel migration zone delineation and mapping
 - Channel monitoring
 - Gravel removal studies and analysis
 - Risk assessments
 - Hydraulic modeling
 - Landslide hazard mapping in areas that may intersect major river floodplains.
- Coordinate with FEMA and other local, state and federal agencies on mapping studies and products.
- Maintain accessible flood study and flood hazard data in a floodplain mapping library.

Flood Preparation, Flood Warning Center and Post Flood Recovery Program

Program Summary: Implement a comprehensive approach to preparing and educating citizens for flood events, coordinating emergency response and regional flood warning center operations during flood events, and ensuring consistency across basins for post-flood recovery actions. Post-flood damage assessments may result in capital projects to repair damaged facilities. Flood and post-flood activities are tracked with a unique project number so that expenditures may be submitted for any federal assistance that becomes available following a federal disaster declaration.

Flood Preparedness

- Coordinate flood hazard education program, communication tools (brochures, web content, customer service bulletins, etc.) to increase the awareness of flood risks and prepare citizens for flood events. This includes base-level participation in the regional Take Winter by Storm campaign.
- Track and disseminate flood hazard technical information to other King County departments (Department of Transportation (DOT), Department of Permitting and Environmental Review (DPER), etc.) and other local, state, and federal agencies.
- Coordinate annual flood awareness month and associated public information program strategy (meetings, websites, other) designed to increase the public's awareness of locally available resources and information.

Regional Flood Warning Center

- Staff the Regional Flood Warning Center monitoring and emergency first responder flood patrols during flood events.
- Coordinate with the following agencies in support of the Regional Flood Warning Center operations:
 - Local governments
 - City of Seattle and Corps on dam operations
 - National Weather Service on weather forecasts and flood predictions
 - King County Office of Emergency Management for coordinated emergency response activities
 - United States Geological Survey (USGS) on river gauging contract and gauge upgrades
 - King County DOT on road closures and emergency flood damage and repair response activities.
- Coordinate flood emergency response activities.

Post-Flood Recovery Operations Program

- Complete preliminary damage assessments and develop and track FEMA public assistance Project Worksheet completion, expenditures and general documentation.
- Coordinate with FEMA and Corps on flood damage repairs and federal funding opportunities; determine eligibility.
- Identify projects and complete grant applications for post-disaster FEMA Hazard Mitigation Grant Program opportunities.

Program Management, Supervision; Finance, Budget and General Administration

Program Summary: Provide supervisory, budgeting, contract administration, and administrative services for the District.

Management and Supervision Tasks

- Manage the technical and business operations of the District work program and staff.
- Develop annual operating and capital budgets, work programs and staff allocations.
- Provide supervision, technical assistance and quality control/assurance to staff.
- Carry out responsibilities for hiring, management performance, developing training

expectations and recommending effective discipline and termination.

- Ensure programs and projects are completed to carry out the goals and objectives of the River and Floodplain Management Program.
- Work collaboratively with other government and regulatory agencies, departments within King County, and the public to address environmental policies and issues related to floodplain management principles, goals and objectives.

Finance and Budget Operations

- Develop annual capital and operating budget.
- Track and report annual capital and operating budget, revenue and expenditures.
- Process approved reimbursement requests for Subregional Opportunity Fund, Water Resource Inventory Area (WRIA) Cooperative Watershed Management grants, and Flood Reduction grants.
- Provide grant and cost-share reporting, billing and documentation.
- Provide contract and procurement management, support and strategy. (Note: contract administration for specific capital projects is charged to the capital project budget rather than the operating budget.)
- Support capital project managers/engineers with detailed project expenditures, revenues, scheduling, contract management and other finance needs in support of CIP implementation.
- Contract record-keeping consistent with county, state, and federal policies and requirements.

General Administration

- Records maintenance.
- Copying, filing, correspondence, and scheduling.
- Meeting preparation, coordination and support.
- Photo-documentation management.
- General program administrative support.

Compliance

- Provide access to records including but not limited to contracts, invoices, timesheets.
- Respond to annual District audits, King County Council audits, state audits, grant-related audits, and quarterly procurement audits.
- File semi-annual and Annual Report with the Board of Supervisors and Executive Director in printed and electronic form for posting to the District website.
- Notify Executive Director in writing when project scope, budget or schedule change from the adopted capital improvement plan.
- Notify Executive Director of grant requests 30 days prior to grant due date or submittal
- Notify Executive Director of grant award within 10 days of grant approval.
- Work with Executive Committee and Executive Director to support the District's work with Advisory Committee.

King County Flood Control District Program Implementation

Program Summary: Implement flood hazard management programs and coordinate capital improvement projects for the District. Teams of staff are organized by river basin, supported by countywide technical services and countywide planning services, and will be responsible for identifying, implementing, and tracking flood risk reduction program and project actions within a given basin. Staff also coordinate four basin technical committees with partner jurisdictions and

maintain relationships with communities and other agencies.

Basin Team and Basin Technical Committee Program

- Staff and coordinate regular Basin Technical Committees.
- Implement work program to guide private property owner and community outreach necessary to complete capital improvement projects.
- Develop ongoing relationships with cities, agencies, and stakeholders within the basin, and ensure consistency across basins.
- Coordinate on acquisition priorities with Acquisition Unit consistent with District acquisition policies.
- Coordinate and support logjam investigation and response/action.
- Respond to, investigate and provide technical assistance for enforcement on complaints and general inquiries. Conduct citizen and/or landowner contact, communication and outreach.
- Conduct annual public meetings about large wood.
- Coordinate with the DOT Road Services Division on construction crew scheduling.
- Provide quarterly project reporting to management.
- Address and seek resolution on basin-specific floodplain management issues.

King County Flood Control District Advisory Committee Coordination

- Provide staff support to the Flood Control District Advisory Committee and the Board of Supervisors, as requested by the Executive Director.
- Track basin technical committee meetings, issues, and cross-basin policy issues.
- Coordinate public process across the District to ensure consistent outreach across basins.
- Report District activities, accomplishments, revenues and expenditures through an annual report.
- Respond to Advisory Committee and Board of Supervisors requests for information regarding rate structure options, and other issues.

Flood Control District Committee Support

- Provide presentations and updates as requested by the Executive Director at meetings of the Executive Committee and Board of Supervisors.

Floodplain Management Planning

- Support Board discussions of policy issues, building on materials previously developed for the Citizens Committee.
- Support Board engagement in capital project planning efforts, including the development of goals and evaluating alternative flood risk reduction actions. Participate in basin planning and coordination efforts such as the Lower Snoqualmie Flood-Fish-Farm work group.

Agriculture Needs Assistance

- Provide technical and modeling assistance and permitting support for farm pad proposals.
- Manage compensatory storage bank.
- Provide assistance to identify and pursue mitigation opportunities for barn and other farm structure elevations.
- Implement recommendations of the Farm/Flood Task Force as directed by District Executive Committee.
- Coordinate outreach to farmers and the King County Agriculture Commission to gather input on the unique needs of agriculture lands within flood hazard areas.

Capital Improvement Program Implementation

Program Summary: The vast majority of the proposed District work program and budget is dedicated to the implementation of major maintenance and capital projects. This work includes managing and implementing major maintenance, repair and new flood protection facility design, permitting and construction; home buyouts and acquisitions; home and barn elevations; and farm pad cost-share assistance.

The capital projects include those projects to be completed by jurisdictions through the Subregional Opportunity Fund program with funding allocated proportional to assessed value of each jurisdiction, grants recommended through the WRIA cooperative watershed management program, and the flood reduction grant program.

Construction of flood protection infrastructure has paved the way for considerable residential, commercial and industrial economic development in flood hazard areas. The flood protection infrastructure has reduced the frequency of flooding and severity of erosion, and contained flood flows within levees that has allowed for significant economic growth by promoting development of historical floodplains, as exemplified by the industrial and commercial development lining the lower Green River. However, these areas will always face the potential risk that the flood protection facilities could be overwhelmed, resulting in serious flood damage, significant impacts to the regional economy, or personal injury and death. While the costs of flood protection facility construction and maintenance are borne by the public, the value to the economy is a regional benefit.

The CIP will complete high priority and regionally significant flood hazard management capital improvement projects to significantly protect public safety and reduce flood risks to the regional economy, transportation corridors, and public and private infrastructure and property. These capital improvement projects include retrofits and repairs to levees and revetments; levee setbacks to improve slope stability and increase flood conveyance and capacity; and targeted acquisition of repetitive loss properties and other at-risk developments.

The CIP will provide project design, construction and management on the following project implementation elements, consistent with WLR Division's Project Management Manual:

- Scope and Concept
 - Identify problem, alternatives, recommended solution and project goals.
- Feasibility
 - Identify and conduct studies, analysis, cost estimates, resource needs, landowner issues.
- Acquisition
 - Obtain the necessary property rights to perform the work.
- Design and Permitting
 - Address all elements of the project (e.g. geomorphic, constructability)
- Complete all federal, state and local permitting requirements (e.g. Corps, Endangered Species Act (ESA))
 - Survey
 - Conduct pre- and post-construction ("as-built") survey
 - AutoCAD

- Develop design plan set
- Hydraulic Modeling
 - Conduct pre- and post-project modeling
 - Complete Letter of Map Revision (LOMR) for constructed projects, when/if warranted
- Ecological
 - Conduct pre- and post-construction monitoring
 - Complete pre-project feasibility studies/analysis
 - Provide project design support
 - Complete biological assessments/evaluations
 - Individual
 - Programmatic
 - Complete Section 7 ESA consultation
 - Coordinate or support permitting and permit agency outreach
- State Environmental Policy Act (SEPA)
 - Complete individual project SEPA review
 - Complete programmatic SEPA review
- Geotechnical Engineering Support/Geologist/Geotechnical
 - Provide sediment management monitoring, analysis and modeling
 - Conduct pre- and post-construction monitoring
 - Conduct pre-project feasibility studies/analysis
 - Provide project design support
- Engineering (may include Project Management function as well)
 - Lead design engineer for projects
 - Manage construction of projects
 - Obtain resources for projects; make task assignments
 - Track and report project scope, schedule, and budget
 - Develop plan set for construction, or bid documentation support
 - Provide overall project quality assurance and quality control oversight
- Project Management
 - Obtain resources for projects; make task assignments
 - Track and report project scope, schedule, and budget
 - Provide overall project quality assurance and quality control oversight
 - Monitoring and Adaptive Management
 - Pre-project baseline information
 - Construction Monitoring
 - Conduct pre- and post-construction monitoring
 - Provide monitoring reports to DPER and other agencies as required.

Central Costs/Overhead and Reimbursement from Capital

- This category includes use-based and FTE-based overhead costs from the Water and Land Resources Division of the Department of Natural Resources and Parks and King County. Examples include use-based charges for the Prosecuting Attorney's Office, risk management, and the financial management system, as well as FTE-based charges for building rent and utilities. When staff loan out from the operating fund to the capital fund, the capital fund reimburses the operating fund for FTE-related overhead charges.

Kent	\$204,609	Lake Fenwick Aerator Upgrade	Amendment to add budget to project that will improve water quality of lake.
King County	\$483,843	1. Natural Drainage Flood Program; 2. Integrated Floodplain Management; 3. Alluvial Fan Mapping	1. Amendment adding budget that will be used to implement stormwater control improvements that address flooding problems. 2. Support the update to the King County Flood Hazard Management Plan, outlining multi-objective policy and programmatic approaches to floodplain management in King County, including capital investments that will contribute to flood risk reduction, and inform the next KC Comprehensive Plan Update in 2023. Facilitate stronger collaboration and integration with other county, Flood Control District, Tribe, city and partner projects and programs to reduce flood risks, restore habitat, center equity, and support community priorities. 3. Support implementation of recommendations in the "Alluvial Fan Report" recently transmitted to the County Council to map alluvial fans and associated hazards. This information will be used to develop assess risks to critical infrastructure like roads, homes, and agriculture, and to develop projects, programs, and regulatory reforms to reduce risks while protecting habitat.
Kirkland	\$297,745	Kirkland Surface Water Master Plan	Develop Surface Water Utility Master Plan to guide the next six years of utility operation.
Lake Forest Park	\$32,961	DEFERRING	
Maple Valley	\$40,978	SE 254TH Place & Witte Road Culvert Replacement	Replace an existing 24-inch corrugated metal culvert that conveys South Fork Jenkins Creek under SE 254th Place with an adequately sized box culvert to pass 100-year design flows and allow fish passage.

Replace two existing rusted out 48" corrugated metal pipes on Norman Creek under 428th Ave SE with a new precast concrete box culvert. The new culvert will reduce the time it takes to drain the flood waters off of private property by increasing the capacity of the crossing. Currently when the North Fork Snoqualmie River overflows water backs up against 428th and impedes use of the roadway as the Norman Creek crossing is the normal outflow for this flood water once the North Fork has overtopped the adjacent levees.

Repair downstream 200 lineal feet of facility which is missing face rock and toe rock. A significant scour hole has formed around a City of Snoqualmie stormwater outfall pipe at the downstream end of facility. Potential erosion impact to Park Ave SE in City of Snoqualmie, an area included in the City's planned "Riverwalk" park and trail project. Project implemented by City of Snoqualmie as part of Riverwalk project, construction is scheduled for 2020.

Conduct a feasibility study to determine ways of preventing the overtopping of the Reif Rd Levee. Potential solutions include: repair and/or raise levee in place / setback levee / gravel removal / home elevations.
19	WLFL1 REING RD ELEVATION	Upper Snoq	Agreement		\$0	\$0	\$0	\$0	\$0	\$0	\$50,000	\$100,000	\$150,000			\$150,000	Snoqualmie. Elevate low section of Reing Rd to alleviate flooding that blocks roadway.

Willowmoor Floodplain Restoration Project seeks to reduce the frequency and duration of high lake levels in Lake Sammamish while maintaining downstream Sammamish River flood control performance and enhancing habitat. The project will reconfigure the Sammamish transition zone to ensure ongoing flow conveyance, downstream flood control, potential extreme lake level reduction, habitat conditions improvement, and reduction of maintenance impacts and costs. Project is currently on hold pending completion of a 3rd party review scheduled to be completed in December 2020. The 2021 funding shown here is a placeholder only pending the outcome of the review.

New project to implement interim SWIF adopted by Board of Supervisors. This project will reconstruct the Horseshoe Bend Levee at the Breda reach (RM 24.46-24.72) to a more stable configuration in order to reduce flood risk to the surrounding areas. The project will also raise levee crest elevations to contain the 500-year (0.2% annual chance) flood. This segment of the levee has the lowest factor of safety rating of the Horseshoe Bend levee.

This USACE repair project replaces the SWIF capital project originally planned by the FCD. The repair project is anticipated to stabilize the failure of the levee slope, construct a ring levee around an isolated utility, and shift the alignment of the federal levee back to the City of Kent's secondary containment levee.
143	WLFL8 HSB NURSING HOME SETBACK	Green	FCD Const	\$0	\$0	\$0	\$0	\$0	\$0	\$0	\$0	\$0	\$0			\$0	Kent. New project to implement interim SWIF adopted by Board of Supervisors. The Nursing Home levee is over-steepened and does not meet current engineering standards. The economic consequence of levee failure or overtopping to the lower Green River valley is extensive and could cause tens of millions of dollars in damage. This capital project area contains a 'Minimally Acceptable' deficiency by the US Army Corps of Engineers at RM 25.5 (over steepened slopes from 1.25 to 1.7H:1V for 225 feet). The Horseshoe Bend Levee Certification Report calculated a Factor of Safety (FOS) value for rapid drawdown of 1.01 at RM 25.57 (Section F). This is barely above the minimum FOS (1.0) from the US Army Corps of Engineers manual.
