

To whom it may concern:

Reference: Proposed NO. FCD2012-06.1

A Resolution authorizing the condemnation of certain property for the Reddington Levee Setback Project, CIP Number 1112035.

The undersigned parties are residents of homes being displaced or residents and/or owners of properties that are being sold to residents being displaced and residents that use the RV lot for storage of their RVs.

We have had several Meetings, open houses, and several residents attended the May 14, 2012 King County Flood Control District Hearing. At this time it is obvious that the Reddington Levee is needed to control the flooding in this area.

The King County Flood Control One District Board of Supervisors has spent considerable money in Fact Finding. Concluding that it is necessary and in the best interest of the citizens of King County that the construction of the Reddington Levee Setback Project be completed.

To date it appears that the project is going to happen.

Many of us now have made offers on homes in the community or other parks in King County. Some of our residents at the River are selling homes to the families being moved. A lengthy time period for closing of sales could jeopardize us being able to obtain the homes we would like to relocate to.

This being the case we would appreciate King County expediting the project, so that after having our lives disrupted by the levee setback project and resulting relocation we can begin the process of putting our lives back together.
