

**Summary of 2018 Comprehensive Plan amendments for PRE**

**Proposed Ordinance 2018-0153**

**As of September 12, 2018**

#	Executive's Proposal	Chair's Striker	Line #	Amendment Description
1 to S1	The Executive's proposal would allow subarea plans to be updated or amended as part of a midpoint (at year 4) or 8-year update.	The chair's striker would allow subarea plans to be updated or amended as part of an annual update.	141	Removes allowance for subarea plans to be amended with an annual update
2 to S1	The Executive's proposal did not address workplan changes as part of an annual update. Absent any language, changes to the workplan would be substantive changes, limited to a midpoint or 8-year update.	The chair's striker would allow any change to the workplan with an annual update.	178	Limits allowance for substantive workplan changes with an annual update to the 2018 restructure.
4 to S1	The Executive's transmittal calls for a midpoint update at year 4 of the eight year cycle.	The chair's striker allows for a two-year update option, in place of the midpoint at year 4. The chair's striker also includes removing the "data requirement" so that these two-year updates only need a motion that specifies the scope of work.	189	Removes the two-year update option, and returns to the transmitted proposal of a midpoint update that occurs in year 4. Maintains removal of the "data requirement".
5 to S1	The Executive's transmittal did not include deadlines for the midpoint update.	The chair's striker does not include deadlines for the two-year update.	199	Establishes timelines for the midpoint update - including deadlines for a scoping motion, for transmittal, and for adoption.
6 to S1	The Executive's transmittal requires Executive staff to coordinate with Councilmember offices on subarea planning in their District.	The chair's striker requires DPER to coordinate with Councilmember offices on subarea planning in their District. It also explicitly requires a public review draft for each subarea plan.	A - 251	Requires Executive staff to coordinate on subarea planning with Council offices, rather than DPER staff. Removes language regarding issuance of a public review draft from lead-in text (but leaves it in the code requirements and the Workplan action language).
7 to S1	The Executive's transmittal did not include language regarding a performance audit	The chair's striker includes language to require a performance audit of the subarea planning program as part of the 2021-2022 biennium.	A - 269	Removes language in Att A that calls for a performance audit of the restructured subarea planning program.
