Bonding Authority

[J. Tracy]

Proposed No.: 2025-0172

On page 15, on line 304, after "S." insert: "The executive should explore the use of the county's existing bonding authority to issue one or more bonds to finance renewable energy or climate resilience projects that advance the goals of the Strategic Climate Action Plan. In structuring any such an issuance, the executive should ensure that the proceeds are directed toward projects that not only deliver measurable climate and environmental benefits, but that are also carried out under strong labor standards, including fair wages, safe working conditions, and the use of skilled local workers.
