INTRODUCTION

This Six-Year Capital Facilities Plan is Fife School District's planning document prepared in compliance with the requirements of the Growth Management Act (GMA), King County and Pierce County, and cities of Fife, Milton, and Edgewood. It is designed to support the collection of school impact fees and consists of:

- (a) An inventory of existing school facilities;
- (b) An enrollment base and projection;
- (c) A standard of service;
- (c) A summary of school facility capacity and projected need for space;
- (d) A forecast of future school facility needs, financing, and impact fee formula.

Fife School District serves a population of over 15,000, and is located off Interstate 5, east of Tacoma, north of the Puyallup River, about ten square miles in area, and falling in both Pierce and King Counties. It includes the cities of Fife, Milton, and Edgewood, unincorporated areas of Trout Lake, Jovita, Fife Heights, and a portion of the Port of Tacoma.

The Growth Management Act authorizes jurisdictions to collect impact fees to supplement funding of additional public facilities needed to accommodate new development. To collect impact fees, a local jurisdiction must have adopted a GMA school impact fee ordinance, and must approve the District's Capital Facilities Plan as a component of their comprehensive plan. The District will utilize the State Subdivision Act and the State Environmental Protection Act (SEPA) to collect mitigation fees in those jurisdictions where there is no GMA impact fee ordinance.

Existing District Facilities

Discovery Primary School	(grades K-1 and preschool)	Built new and opened in 1992.
Alice V. Hedden Elementary School	(grades 2-5)	Built new and opened in 2001.
Endeavour Intermediate School	(grades 2-5)	Originally constructed as Milton Elementary School in 1951 with additions in 1953, 1955, 1958, 1962, and 1968. Modernized in 1975. Closed one year for some demolition, total modernization and addition. Reopened in 1993 as Endeavour Intermediate School.
Surprise Lake Middle School	(grades 6-7)	Originally constructed in 1970. Extensive modernization and addition in 1992. Main offices and Counselors offices remodeled 1998.
Columbia Junior High School	(grades 8-9)	Built new and opened in 2003. Performing arts auditorium, sports and athletic complex completed in 2004.
Fife High School	(grades 10-12)	Originally constructed in 1930 with additional buildings and space added in 1949, 1956, 1958, 1960, 1961, 1970 and modernization in 1975. Some demolition, extensive modernization and addition completed in 1995. Alternative High School modernized in 1997.
Transportation Center		Built new in 1996.
Educational Services Center		Modernized in 1997.
Located in a portion of the old Fife Elementary School.

TOTAL CORE AND PORTABLE CAPACITY	3,973								

ENROLLMENT BASE AND PROJECTION

The District uses the enrollment projections provided by Washington State Office of Superintendent of Public Instruction (OSPI) as a base. The projections are based on the "Cohort Survival Method" which computes progressive ratios for each grade level and averages those ratios over the past five years. The average ratio is then multiplied by the actual current year's enrollment using October headcount for each grade to project the enrollment in the next grade for the next year. The Cohort Survival Method uses past enrollment indicators to predict future growth, however, it does not account for anticipated growth due to new residential construction in the Fife/Milton area. For example, there are over 90 planned single family housing starts within our school district's boundary, expected to generate approximately 58 new students. After a downturn in the economy, resulting in a slight decrease in fiscal year's 09-10 and 10-11 enrollment, we are again anticipating continued steady growth as evidenced by the table below. Actual enrollment growth over the past ten years was approximately 8.52%, and 3.46% over the past five years. More importantly, over the next six years the Cohort Survival Method predicts an increase of 6.83% as shown below.

				5 Year Actual Growth	3.46%					6 Year Projected Growth	6.83%

* Headcount (rather than FTE) is used as a more appropriate indicator for enrollment and capacity needs. Part-time students (less than 1 full FTE) require seating space and program resources as though full-time. Beginning in the 14-15 school year, all kindergarten students attend full-time.

** Actual enrollment based on October student headcount through the 15-16 school year.

STANDARD OF SERVICE

Fife School District, as written in its mission statement, is committed to providing a safe and caring environment, which ensures that all students will learn. And, as a Standard Bearer District, Fife is a leader in school reform and committed to providing our students highly engaging, meaningful, challenging, and satisfying work. The District is also committed to achieving a high standard of learning for our students, as detailed in each of the six school building's School Improvement Plans. Keeping class sizes at an optimal level is a critical component in reaching these goals. Due to incredible community support, and increased basic education funding from the State, the District is able to set this standard at approximately 18-25 students per class, with first priority at the primary grade levels (K – 4). Students are provided traditional basic education programs which include reading, writing, math, social studies, science, physical education, health, music and art. In addition there are scheduled times in computer labs and a number of special programs such as special education, English Language Learners (ELL), preschool, remediation and other programs designed to serve special populations. These special programs significantly affect school capacity by the need for separate space, scheduling accommodations, mandated program requirements, and population changes. Rooms designed for special use are not counted as classrooms.

CAPACITY AND SPACE NEEDS

Washington Administrative Code (WAC) sets factors determining a school's eligibility to receive state-matching funds for school construction. One factor is "square feet per student" set at 90 in grades K-6, 117 in grades 7 and 8, and 130 in grades 9-12. These space allocations are part of a funds allocation model and do not reflect the true space needed to carry out the instructional program. Fife's actual K-12 average square feet per student is 130.13.

Fife School District has chosen to determine **actual program capacity** by surveying each school, reviewing with each school principal how the teaching spaces are being used, and the number of teaching staff assigned. Projections of space needs are based on the assumption of adding a teacher and classroom space for approximately each additional 18 to 25 students dependent upon grade level. *This does not account for additional space needed for special programs as discussed above, and support services such as library, gym, athletics, kitchen, bathrooms, storage, etc.*

Previous and current survey information used to determine current and future capacity for each school is summarized on the following charts by buildings. The charts include:

1. Enrollment by grade level headcount from the 2011-12 school year through the 2021-22 year.
Preschool information is by sections rather than headcount.
2. Planned capacity when the building was designed.
3. Teachers currently assigned and projected to be assigned under the District's standard of service.
4. Permanent rooms, including special program areas.
5. Portable classrooms (including the number of additional classrooms needed).

Because space needs are driven, in part, by the number of teachers available, future projections can be significantly impacted by availability of state and local funds. A levy failure or other severe budget impact may temporarily reduce the number of teachers, thus increasing class sizes and reducing the need for additional classrooms. When funding levels are restored, teachers will be re-hired to return class sizes to District standards. However, in the absence of budget set-backs, the number of teachers needed (and the number of classrooms required) will increase as District enrollment continues to grow.

*Headcount

**Even though the Plan Capacity of Columbia Junior High is listed at 600, the actual regular capacity of the facility is less than 600 due to the programming needs at the school and the actual use of classroom spaces. As such, the District analyzes capacity needs at this school each year during the six year planning period.

**Even though the Plan Capacity of Alice V. Hedden Elementary is listed at 485, the actual regular capacity of the facility is less due to the programming needs at the school and the actual use of classroom spaces. As such, the District analyzes capacity needs at this school each year during the six year planning period.

SCHOOL FACILITIES SUMMARY AND FUTURE NEEDS / FINANCING

A survey and study was completed in July 1997, and revised April 2000. Based on those projections, the District received voter authorization to build 2 new schools (elementary and junior high schools) to meet projected enrollment growth. The Alice V. Hedden Elementary School was built and occupied in September 2001, adding capacity for 485 students. However, there were still approximately 350 secondary students occupying portables on sites throughout the District. Existing core facilities and support space at the secondary grade levels (bathrooms, cafeteria, gym, special programs, etc) remained over capacity as a result. The Columbia Junior High School was opened in September 2003 as planned, adding additional capacity for 600 students. The balance of the project (entry road and parking lot) was completed during the fall of 2006. The grade configuration at the high school was changed to grade levels 10-12, eliminating the need to build a new high school. Primary grade levels remain as grades K-5. The middle and junior high schools now serve grades 6-9. As a result of these two new schools, and the use of portable classrooms, the District has been able to meet the current capacity needs, and enable the Fife School District to maintain a high Standard of Service and commitment to our students and community.

Both Pierce and King County showed a short-term birth rate decline which slightly affected our fiscal year 2011 and 2014 enrollments. County records now indicate birth rates on the rise again which aids in forecasting our student enrollment projections. Enrollment is expected to increase by approximately 303 students within the next six years. As core facilities become overcrowded, the District will continue to utilize portable classrooms and consider grade re-configuration to accommodate student growth on a temporary basis until enrollment is sufficient to occupy a new school. The need for space is based on the practical capacity of existing facilities and true space needed to carry out a full instructional program. This differs from the space allocation used in the State's funding formula to determine a school district's eligibility for state-matching funds. For example, at the elementary level, Fife School District provides 96.89 square feet per student compared to 90 in the state formula. The National average is 188.

Study and Survey/Needs Assessment – The District completed a study and survey in 2009. The results at that time included adding classroom capacity and addressing much needed facility repairs. Because of an unfavorable economy the past few years, the certainty of passing a capital bond issue was unlikely. With the turn-around in the economy, the district has decided to re-address the district-wide capacity and facility needs with an updated study and survey that has recently begun. Final results of this study and survey will be addressed in the next capital facilities plan update. However, preliminary results through a needs assessment of our schools to address building conditions and capacity needs district-wide include the following:

Discovery Primary School – To address enrollment growth, preliminary plans would add 5 additional classrooms to the existing school within the next six years. This would provide capacity for an additional 85-95 students. The estimated cost for these additional classrooms is \$3,305,690.

Surprise Lake Middle School – Preliminary plans would add 12 new classrooms to the school within the next six years. This would provide capacity for an additional 240 students. By expanding Surprise Lake Middle School, the district would then address grade level reconfiguration across the district to balance capacity at all of the schools. The estimated cost for these additional classrooms is \$8,027,735.

Additional Capacity Projects – Any additional capacity projects will be addressed through the results of the study and survey and detailed in the next update to the capital facilities plan document.

Future Classroom Needs

District-wide projected classrooms needed, (including those for preschool), are shown below. In addition to classrooms, there is additional space needed for support services such as special programs, gym, cafeteria, storage, bathrooms, etc. These projections for future classrooms are based on past enrollment statistics through the 2015-16 school year. Since this forecast is conservative, the plan will be revised as necessary to account for anticipated enrollment growth and residential development.

New Construction

Current Building Conditions

Since modernization began in 1992, all District facilities have been completely modernized and/or built new. This includes the new Columbia Junior High and Alice V. Hedden Elementary Schools, Discovery Primary, Fife Transportation Center as well as remodels/additions to Endeavour Intermediate, Surprise Lake Middle School, Fife High School, and the District Administration Office. Recently added modular classrooms are also outlined below.

School Construction Plans

1996-1997	Study and Survey
1998-1999	Planned for schools
1999-2000	Planned and requested bond issue for schools (approved February 2000)
2000-2001	Built/occupied Hedden Elementary (completed 2001)
2001-2003	Built/occupied Columbia Junior High (occupied 2003)
2007-2008	Added modular classrooms at Hedden and Columbia
2007-2009	Study and Survey
2015-2016	Study and Survey-updated
2016-2017	Plan for additions at Discovery Primary School & Surprise Lake Middle School. Request bond issue February 2017
2017-2018	Build new additions
2018-2019	Occupy new additions September 2018

Project Costs

Alice V. Hedden Elementary & Modular Classrooms - Alice V. Hedden Elementary School was constructed on a 14.89 acre site located in Edgewood and opened in September 2001 with a capacity of 485 students. Final cost was \$11,100,000. Due to continued enrollment growth and special program needs, new portable classrooms were added for use during the 2007-08 and 2011-12 school years. Final cost was \$671,918 or about \$167,980 per classroom.

Columbia Junior High & Modular Classrooms - Columbia Junior High School was constructed in Fife as part of a joint cooperative effort with the City of Fife. The total site encompasses 34.4 acres, with the City of Fife providing 27.1 acres and the District providing an additional 7.3 acres. In return for receiving the 27.1 acres valued at approximately \$1.85 million, the District built additional park and athletic facilities. Usage, operations, and maintenance expenses will be shared according to interlocal agreements signed by the two agencies. The school has a capacity for 600 students and opened in September 2003, with final project completion during the fall of 2006. Final construction costs were \$25,398,269. Due to continued enrollment growth four new modular classrooms were added for use during the 2007-08 school year. Final cost was \$638,184 or about \$159,546 per classroom.

Proposed Additions at Discovery Primary & Surprise Lake Middle Schools – As a result of enrollment growth and implementation of full-time kindergarten, additional capacity will be added to Discovery Primary School (5 classrooms) and Surprise Lake Middle School (12 classrooms). These new classrooms will provide space for approximately 335 students. Estimated costs for these two projects are \$11,333,425.

Project Funding

Alice V. Hedden Elementary, Columbia Junior High, & Modular Classrooms - The District's last bond issue for \$35 million was approved by the voters on February 29, 2000 to construct the two new schools Alice V. Hedden Elementary, and Columbia Junior High. Impact fees were also collected and applied to these projects. The primary funding source for the modular classrooms for these two schools added during the 2007-08 and 2011-12 school years, were school impact fees.

Proposed Additions at Discovery Primary & Surprise Lake Middle Schools - The primary funding source for the additions at these two schools will be Voted General Obligation Bonds, with impact fees providing an additional funding source. If either of these two projects are eligible for state funding assistance, it will be addressed and calculated through the study and survey that is currently taking place.

Impact Fees

Impact fees are calculated on the basis of the facilities needed to house students from new residential development. Impact fees for Fife School District are shown on page 16. Student Generation Rates (SGR) used in this plan are the averages from the following surrounding school district's current capital facilities plan: Federal Way, Steilacoom, Sumner, Puyallup, Auburn, and Bethel. The individual student generation rates and averages are shown on Table 9 of the Appendix. Based on current calculations, the single-family rate is calculated at \$6,670. The multiple-family rate is calculated at \$1,772.

New Capacity Needs and Financing Summary

As demonstrated in the tables on pages 6-11, the District currently has capacity to serve 1,500 students at the elementary (preschool – 5th grade) level, 1,130 students at the middle/junior high school level (grades 6-9), and 705 students at the high school (grades 10-12) level. Current and projected enrollments at each grade level are identified in the tables on pages 6-11. The District is currently over capacity at the elementary level by 180 students, over capacity at the middle/junior high school level by 6 students, and over capacity at the high school level by 69 students.

To address existing and future capacity needs, the District's six-year construction plan includes the following capacity projects:

- Construction of new capacity at Discovery Primary and Surprise Lake Middle Schools.

Based on the District's student generation rates, the District expects that .6355 students will be generated from each new single family home in the District and that .2292 students will be generated from each new multi-family dwelling unit.

The school impact fee formula ensures that new development only pays for the cost of the facilities necessitated by new development. The fee calculations examine the costs of housing the students generated by each new single family dwelling unit (or each new multi-family dwelling unit), and then reduces that amount by the anticipated state match and future tax payments. The resulting impact fee is then discounted by 50%. Thus, by applying the student generation factor to the school project costs, the fee formula only calculates the costs of providing capacity to serve each new dwelling unit. The formula does not require new development to contribute the costs of providing capacity to address existing needs.
