- Secure: Total confinement within a 24-hour detention facility in either the KCCF or RJC.
- Average Daily Population (ADP): Mean number of inmates in the custodial populations on a daily basis. Total number of inmate days divided by the number of days in the time-period.
- Number of Placements: The DAJD has traditionally reported the number of bookings as the measure of admission. A single booking covers all activity from the time of admission to the time of release from custody. For the purpose of data tracking, it was necessary to develop a new measure to track location movements within a booking. Placements are defined for only the custodial populations in Electronic Home Detention, Secure Detention and Work Education Release. A placement occurs the first time that a person enters a custodial population, but is only counted once in a booking for each of the three populations. One booking can therefore create no more than three placements. The placement is counted in the month the placement occurred, not necessarily in the month the booking occurred.
- Program Length of Stay: The total number of days during the total incarceration event that a person was placed in the various custodial locations (Secure, Work Release, Electronic Home Detention) or a specific status group with Secure Detention (Pre-Trial Felon, Pre-Trial Misdemeanant, Sentenced Felon, Sentenced Misdemeanant, State Holds, and Other). For DRC, it is the average imposed sentence length for participants who started during the month.

- **Sentence:** The portion of the Average Daily Population from the time the sentence date is entered to completion of the sentence.
- **Average Daily Population (ADP):** Mean number of inmates in the custodial populations on a daily basis. Total number of inmate days divided by the number of days in the time-period.
- **Number of Placements:** The DAJD has traditionally reported the number of bookings as the measure of admission. A single booking covers all activity from the time of admission to the time of release from custody. For the purpose of data tracking, it was necessary to develop a new measure to track location movements within a booking. Placements are defined for only the custodial populations in Electronic Home Detention, Secure Detention and Work Education Release. A placement occurs the first time that a person enters a custodial population, but is only counted once in a booking for each of the three populations. One booking can therefore create no more than three placements. The placement is counted in the month the placement occurred, not necessarily in the month the booking occurred.
- **Program Length of Stay:** The total number of days during the total incarceration event that a person was placed in the various custodial locations (Secure, Work Release, Electronic Home Detention) or a specific status group with Secure Detention (Pre-Trial Felon, Pre-Trial Misdemeanant, Sentenced Felon, Sentenced Misdemeanant, State Holds, and Other). For DRC, it is the average imposed sentence length for participants who started during the month.
