6 Six-Year Finance Plan	

I. Executive Summary

This Six-Year Capital Facilities Plan (the plan) has been prepared by the Lake Washington School District (the district). It is the organization's primary facility planning document in compliance with the requirements of the State of Washington's Growth Management Act and King County Code 21A.43. It is also used as a basis for requesting the collection of school impact fees. This plan was prepared using data available in the spring of 2023.

King County was the first jurisdiction in the State of Washington to adopt a Growth Management Act school impact fee ordinance in 1991 (with fee collection first becoming effective in 1992). The King County Council adopted the ordinance, including the school impact fee formula, following a stakeholder process that included representatives from school districts and the development community. The adopted formula requires that the calculated fee be reduced by fifty percent. This discount factor was negotiated as a part of the stakeholder process. Most cities in King County (and in other areas) adopted the King County school impact fee formula, including the discount factor, in whole as a part of their school impact fee ordinances.

In order for school impact fees to be collected in the unincorporated areas of King County, the King County Council must adopt this plan. The cities of Redmond, Kirkland and Sammamish have each adopted a school impact fee policy and ordinance similar to the King County model.

Pursuant to the requirements of the Growth Management Act and the local implementing ordinances, this plan will be updated on an annual basis with any changes in the fee schedule adjusted accordingly. See *Appendix B* for the current single-family calculation and *Appendix C* for the current multi-family calculation.

The district's plan establishes a standard of service in order to ascertain current and future capacity. This plan reflects the current student/teacher standard of service ratio and service model for other special programs. Future state funding decisions could have an additional impact on class sizes and facility needs.

I. Executive Summary (*continued*)

While the State Superintendent of Public Instruction establishes square foot guidelines for funding, those guidelines do not account for the local program needs in the district. The Growth Management Act and King County Code 21A.43 authorize the district to determine a standard of service based on the district's specific needs.

The district's current standard provides the following (see *Section III* for specific information):

Grade Level	Target Teacher-Student Ratio
K-1	20 Students
2-3	23 Students
4-5	27 Students
6-8	30 Students
9-12	32 Students

School capacity is based on the district standard of service and the existing inventory of available classrooms, including both permanent and relocatable (portable) classrooms. As shown in *Appendix A1* and *A2*, the district's overall total capacity is 39,243. The total net available capacity is 34,290 including net permanent capacity of 30,494 and 3,796 in relocatables. Student headcount enrollment as of October 1, 2022 was 29,714.

Pre-pandemic, the Lake Washington School District has been the fastest growing school district in King County and one of the fastest growing school district in the state. In the five years from 2014 to 2019, the district went from being the sixth largest school district to the secondary largest district in the state. Enrollment growth resulted in overcrowding in many district schools.

Since the pandemic, the district enrollment has declined by 677 students or 2.2% over 3 years. This includes a loss of 125 students in 2022. The majority of this loss is at our elementary level due to declining births and kindergarten enrollment. A six-year enrollment projection, as required for this plan, is shown in *Table 1*. During the six-year window from 2023 to

I. Executive Summary *(continued)*

2028 K-12 enrollment is projected to decrease by 992 students to a total of 29,431.

In December 2014, a Long-Term Facilities Planning Task Force, comprised of community members and representatives from each of the district's schools, was convened to develop recommendations on long-term facilities planning. From December 2014 to October 2015, this Task Force and a smaller Working Subcommittee met 20 times to learn about and have detailed discussions on topics ranging from construction costs to classroom space usage to facilities funding. In November 2015, the Board of Directors accepted the recommendations of the Task Force.

The recommendations provide a 15-year framework to address growing enrollment, provide needed space to reduce class size and reduce the reliance on relocatables. The recommendations prioritize building new schools and enlarging aging schools to address capacity needs. These recommendations resulted in passage of a bond measure in April 2016 which provided funding for eight construction projects.

In April 2019, voters approved a six-year Capital Project Levy measure which incorporated the following critical capacity projects:

- A 20-classroom addition to Lake Washington High School
- An eight-classroom addition to Franklin Elementary School
- An eight-classroom addition to Rose Hill Elementary School
- A four-classroom addition to Twain Elementary School
- A four-classroom addition to Carson Elementary School

Given that the Long-Term Facilities Planning Task Force recommendations were based on assumptions from 2014 and enrollment and growth patterns continue to change, the district formed a new Facilities Advisory Committee (FAC) in November 2019 to review and update the 2014 Task Force Recommendations. The FAC made recommendations for future facility planning informed by enrollment trends, community expectations and district programs. The facility strategy aligned with the district's strategic plan and made recommendations to accommodate our rapid enrollment growth and to continue providing quality learning environments. In January 2021, the FAC provided its recommendations to

I. Executive Summary *(continued)*

the board. These recommendations include the following projects to increase permanent capacity by approximately 4,600 through 2030:

- Rebuild or expand Kamiakin Middle School
- Rebuild and enlarge Alcott Elementary School
- A new Choice high school in Redmond/Eastlake Area
- A new Elementary school in the Lake Washington Area
- Build Elementary Capacity in the Redmond Area
- Refurbish Juanita High School Field House/Pool
- Rebuild or expand Evergreen Middle School
- Rebuild and enlarge Smith Elementary school
- Rebuild and enlarge Rockwell Elementary school
- A new Choice high school in Lake Washington Area
- An addition of 8 classrooms at Kirkland Middle School
- A potential addition of 14 classrooms at Redmond High School
- New Early Learning Centers in Juanita and Lake Washington Areas

The Superintendent and School Board considered these recommendations while planning for future ballot measures to fund construction and developed a Building Excellence Plan for construction needs through 2030.

In February 2022, voters approved step one in the Building Excellence Plan, a six-year-year Capital Projects Levy measure. This measure provides critical classroom capacity at the elementary, middle, and high school levels:

- An addition at Finn Hill Middle School
- An addition at Kirkland Middle School
- An addition at Redmond Middle School
- Rebuild and enlarge Rockwell Elementary School
- Additional high school capacity – eastside area
- Additional high school capacity – westside area
- Acquisition of property for future schools

Given changes in enrollment projections, the District repurposed 2022 Levy project funds in April 2023. Funds originally planned to build a new elementary school on the Redmond Elementary School campus were

I. Executive Summary *(continued)*

repurposed to remodel or rebuild and enlarge Rockwell Elementary School.

The finance plan shown on *Table 6* demonstrates how the Lake Washington School District plans to finance improvements for the years 2023 through 2028. The financing components include secured and unsecured funding.

II. Six-Year Enrollment Projection and Long-Term Planning

Six-Year Enrollment Projection

The district developed long-term enrollment projections to assess facility capacity needs. Based on these projections the district expects enrollment to decrease by 992 students from the 2023 school year through 2028.

The district experienced actual enrollment loss of 125 students in 2022. A six-year enrollment projection, as required for this plan, is shown in *Table 1*. During the six-year window from 2023 to 2028, K-12 enrollment is projected to decrease by 992 students resulting in a 3.3% decrease over the current student population.

Student enrollment projections have been developed using two methods: (1) *cohort survival* – which applies historical enrollment trends to the classes of existing students progressing through the system; and (2) *development tracking* – which projects students anticipated from new development. The cohort survival method was used to determine base enrollments. Development tracking uses information on known and anticipated housing development. This method allows the district to more accurately project student enrollment resulting of new development by school attendance area.

Cohort Survival

King County live birth data is used to predict future kindergarten enrollment. Actual King County live births through 2021 are used to project kindergarten enrollment through the 2026-2027 school year. After 2027, the number of live births is based on King County projections. Historical data is used to estimate the future number of kindergarten students that will generate from county births. For other grade levels, cohort survival trends compare students in a particular grade in one year to the same group of students in prior years. From this analysis a cohort survival trend is determined. This trend shows if the cohort of students is increasing or decreasing in size. This historical trend can then be applied to predict future enrollment.

II. Six-Year Enrollment Projection and Long-Term Planning *(continued)*

Development Tracking

In order to ensure the accuracy and validity of enrollment projections, a major emphasis has been placed on the collection and tracking of data of 79 known new housing developments within the district. This information is obtained from the cities and county and provides the foundation for a database of known future developments, as well as city and county housing growth targets. This assures the district's plan is consistent with the comprehensive plans of the local permitting jurisdictions. Contact is made with each developer annually to determine the number of homes to be built and the anticipated development schedule.

Student Generation Rates

Developments built within the district that are near completion, or have been completed, within the last five years are typically used to forecast the number of students generated by new development. The district updates these figures in each plan update. The 2023 district wide statistics show that each new single-family home currently generates a 0.317 elementary student, 0.140 middle school student, and 0.147 senior high student, for a total of 0.604 school-age child per single family home (see *Appendix B*). New multi-family housing units generate an average of 0.039 elementary student, 0.016 middle school student, and 0.022 senior high student for a total of 0.077 school age child per multi-family home (see *Appendix C*). These student generation factors (see *Appendix D*) are used to forecast the number of students expected from the new developments that are planned over the next six years.

Enrollment Projection Scenarios

The district works with Flo Analytics, an outside planning, GIS and data analytic consulting firm, to review enrollment trends and demographics, provide land use and development mapping and to prepare 10-year enrollment forecast. Flo Analytics 6-year enrollment projections along with a 10-year high, medium, and low projection are shown in *Table 1* and *Table 1A*. Given pre-pandemic trends there is still the potential for the district to have a large uptick in enrollment depending upon future land used decisions, housing, and labor market changes, etc. The district will monitor these matters and include updated information in future updates to the plan.

III. Current District “Standard of Service”

King County Code 21A.06 refers to a “standard of service” that each school district must establish in order to ascertain its overall capacity. The standard of service identifies the program year, the class size, the number of classrooms, students and programs of special need, and other factors determined by the district, which would best serve the student population. Relocatables (i.e. portable classroom units) may be included in the capacity calculation using the same standards of service as permanent facilities.

The standard of service outlined below reflects only those programs and educational opportunities provided to students that directly affect the capacity of the school buildings. The special programs listed below require classroom space and as a result reduce the total permanent capacity of the buildings that house them. Newer buildings have been constructed to accommodate some of these programs. Older buildings require additional reduction of capacity to accommodate these programs. At both the elementary and secondary levels, the district considers the ability of students to attend neighborhood schools to be a component of the standard of service.

The district’s standard of service, for capital planning purposes, and the projects identified in this plan, include space needed to serve students in All Day Kindergarten. Beginning in the 2016-2017 school year, the State funded All Day Kindergarten for all students.

Standard of Service for Elementary Students

School capacity at elementary schools is calculated on an average class size in grades K-5 of 23; based on the following student/teacher staffing ratios:

- Grades K - 1 @ 20:1
- Grades 2 - 3 @ 23:1
- Grades 4 - 5 @ 27:1

III. Current District “Standard of Service” (continued)

The elementary standard of service includes spaces to accommodate:

- Special Education for students with disabilities which may be served in a self-contained classroom
- Music instruction provided in a separate classroom
- Art/Science rooms in modernized schools
- Resource rooms to serve students in:
 - Safety Net / Remedial programs
 - Special Education programs
 - English Language Learners (ELL)
- Gifted education (pull-out Quest programs)
- Special Education, Head Start and Ready Start Preschool

Standard of Service for Secondary Students

School capacity at secondary school is based on the following class size provisions:

- Class size for grades 6-8 should not exceed 30 students
- Class size for grades 9-12 should not exceed 32 students

In the secondary standard of service model:

- Special Education for students with disabilities may be provided in a self-contained classroom

Identified students will also be provided other special educational opportunities in classrooms designated as follows:

- Resource rooms
- English Language Learners (ELL)

Room Utilization at Secondary Schools

It is not possible to achieve 100% utilization of regular teaching stations at secondary schools due to scheduling conflicts for student programs, the

III. Current District “Standard of Service” *(continued)*

need for specialized rooms for certain programs, and the need for teachers to have a workspace during their planning periods.

The district has determined a standard utilization rate of 70% for non-rebuilt secondary schools. For secondary schools that have been rebuilt, rebuilt and enlarged, or have been remodeled to accommodate teacher planning spaces, the standard utilization rate is 83%.

IV. Inventory and Evaluation of Current Facilities

As of April 2023, the district has total classrooms of 1,629, including 1,467 permanent classrooms and 162 relocatable classrooms (see *Appendix A-1*). These classrooms represent a theoretical capacity to serve 39,243 if all classrooms were only used as general classroom spaces. However, the district's standard of service provides for the use of classrooms for special programs, such as Special Education, Multilingual Learners and Safety Net programs. These programs serve students at much lower student to teacher ratios than general education classrooms or serve the same students for a portion of the day when they are pulled out of the regular classroom.

As a result, the net capacity of these school buildings is adjusted. A total of 233 classroom spaces are used for special programs as shown in Appendix A-2. The remaining classrooms establish the net available capacity for general education purposes and represent the district's ability to house projected student enrollment based on the Standard of Service defined in *Section III, Current District Standard of Service*.

After providing space for special programs the district has a net available classroom capacity to serve 34,290 students. This includes 3,796 in relocatable (portable) capacity and 30,494 in permanent capacity of which 516 is for self-contained program capacity.

Enrollment in 2022 was 30,423 and is expected to decrease to 29,431 in 2028 (see *Table 1*).

The physical condition of the district's facilities is documented in the 2021 State Study and Survey of School Facilities completed in accordance with WAC 392-341-025. As schools are modernized or replaced, the survey of school facilities is updated. That report is incorporated herein by reference.

The district also owns and operates the L.E. Scarr Resource Center (the "Resource Center") located at 16250 NE 74th Street in the Redmond Town Center. The Resource Center houses district administrative offices, board meeting facilities, teacher and staff training, community conference facilities, and direct support to families regarding programs, services and enrollment. Utilization of the Resource Center for the district's educational program purposes has increased in recent years and continues to grow. The

IV. Inventory and Evaluation of Current Facilities *(continued)*

Resource Center has limited dedicated parking on-site and secure and dedicated parking is insufficient to meet the educational program needs at that site. The district holds limited parking rights on an existing gravel lot located on an adjacent parcel (Lot 11) as well as additional non-exclusive rights for limited parking in other portions of the Redmond Town Center. District employees and Resource Center visitors regularly use Lot 11 (with parking at that location, even beyond district users, often close to or at capacity) and other easement locations for parking but those options are often insufficient. During the pandemic utilization of parking throughout the Redmond Town Center has been less than typical but the district expects this circumstance to be short-term. Dedicated and secure parking for access to the Resource Center is an ongoing issue and district priority.

The district operates the Support Services Center on district-owned property located at 15212 NE 95th Street in Redmond. The Support Services Center houses district operations for facilities, construction, maintenance, transportation, and related support services. The district's bus fleet is housed at the Support Services Center.

V. Six-Year Planning and Construction Plan

Enrollment projections are shown in *Table 5*, student enrollment is anticipated to reach 29,431 by 2028. The district current inventory of existing net permanent capacity is 30,494. While enrollment projections show overall enrollment is stable and slightly decreasing over the next six years, there is still a need to address recent growth at the high school level. The district will continue to monitor elementary and middle school enrollment and include updated information in future updates to the plan.

To address existing and future capacity needs as well as maintain and enhance educational program functioning, the district contemplates using the following strategies:

- Construction of new schools
- Additions for existing schools
- Rebuilding and enlarging existing schools
- Use of relocatables as needed
- Boundary adjustments
- Property acquisition

Construction of new capacity in one area of the district could indirectly create available capacity at existing schools in other areas of the district through area specific boundary adjustments.

As urban property continues to be scarce across the district and the district competes with private parties for developable land, it will be necessary to incorporate more urban school designs into future projects. The district is working with each of our jurisdictions with an intent to ensure flexibility in requirements such as zoning, height, setbacks parking, etc. This flexibility will allow innovative approaches to design and open space. Additionally, the district continues to explore public/private partnerships to provide space for student learning and educational programming needs.

V. Six-Year Planning and Construction Plan <i>(continued)</i>
--

Use of Relocatables

Relocatables were added at various locations to accommodate growth and help relieve capacity issues. The table below shows portables that were added since 2017:

School	Year Installed	Location	Number
Lakeview ES	2018	Kirkland	2
Muir ES	2018	Kirkland	2
Rose Hill ES	2018	Kirkland	2
Twain ES	2018	Kirkland	3
Rush ES	2018	Kirkland	1
Kirkland MS*	2020	Kirkland	2
Rose Hill MS*	2020	Redmond	6
Inglewood MS*	2020	Sammamish	2
Sandburg ES	2020	Kirkland	1
Bell ES	2020	Kirkland	3
Frost ES	2020	Kirkland	3
Thoreau ES	2020	Kirkland	3

* Portables moved from Lake Washington High School

Construction of New Schools/Additions/Rebuilding and Enlarging

The table below shows construction projects funded from the April 2019 Capital Construction Levy:

Facility	Completion Date	Location	Added Capacity
Lake Washington HS Addition (20 classrooms)	Fall 2020	Kirkland	500
Franklin ES Addition (8 classrooms)	Fall 2021	Kirkland	184
Rose Hill ES Addition (8 classrooms)	Fall 2021	Kirkland	184
Twain ES Addition (4 classrooms)	Fall 2021	Kirkland	92
Carson ES Addition (4 classrooms)	Fall 2022	Sammamish	92

V. Six-Year Planning and Construction Plan (continued)

In February 2022, voters approved step one in the **Building Excellence Plan**, a six-year-year Capital Projects Levy measure. This measure provides critical classroom capacity at the elementary, middle, and high school levels. The district has funding to construct the following projects within the period of this plan:

Project	Completion Date	Location	Added Capacity
Redmond Middle School Additions (8 classrooms)	Fall 2024	Redmond	200
Kirkland Middle School Addition (8 classrooms)	Fall 2024	Kirkland	200
Finn Hill Middle School Addition (8 classrooms)	Fall 2024	Kirkland	200
Rebuild and Enlarge Rockwell Elementary School	Fall 2026	Redmond	252
Additional high school capacity - East side	Fall 2025	Sammamish	600
Additional high school capacity - West side	2027	TBD	600
Acquisition of property for future schools	TBD	TBD	

The Facility Advisory Committee recommended construction projects to be built through 2030. The Superintendent and School Board considered these recommendations and developed a Building Excellence Plan for construction needs through 2030. The following are projects from step 2 of the plan to be built within the six-year planning timeline although funding still needs to be secured.

Project	Location	Added Capacity
Rebuild or expand Kamiakin MS	Kirkland	330
Rebuild and enlarge Alcott ES	King County	207
New High School	Redmond	1,800

V. Six-Year Planning and Construction Plan <i>(continued)</i>
--

In addition, the table below list the remaining projects in step 2 and 3 of the Building Excellence Plan however they are anticipated to be outside the six-year timeframe:

Project	Location	Added Capacity
New Lake Washington Area Elementary School	Kirkland	690
Rebuild and Enlarge Smith ES	Sammamish	253
New Early Learning Center	TBD	276
Expand High School Capacity	Kirkland	400
Rebuild and Enlarge Evergreen MS	King County	79
New Early Learning Center	TBD	276
New Elementary School (2)	TBD	1,380

The district may also need to purchase and use relocatables to address capacity needs at sites able to accommodate additional relocatables.

Property Acquisition and Planning

The district has ongoing needs related to property acquisition to address needs related to existing and new school facilities, support facilities, and educational programming needs. The district recently purchased Site 44, which is planned for a future comprehensive high school. The district will continue to evaluate additional site acquisition during the six-year planning period. The district also filed in King County Superior Court on April 20, 2022 a petition in eminent domain to secure dedicated and secure parking on King County tax parcel no. 720241-0200 ("Lot 11"), located immediately adjacent to the Resource Center. As noted previously herein, the district holds certain limited rights to park on the existing gravel parking lot located on Lot 11. If secured via the condemnation action, the district anticipates continued present parking use of Lot 11, with no contemplated improvements, and all use subject to the City of Redmond's existing Open Space Easement.

V. Six-Year Planning and Construction Plan (*continued*)

The *Finance Plan* in Table 6 notes potential land acquisition at an amount to be determined, which would include any future site acquisition and any just compensation agreed to or determined in the condemnation action. Future updates to this CFP will include any changes or additional information related to property acquisition and planning.

VI. Relocatable and Transitional Classrooms

The district facility inventory includes 162 relocatables (i.e. portable classroom units). Relocatables provide standard capacity and special program space as outlined in *Section III* (see *Appendix A-1*).

Relocatable classrooms have been used over the prior six-year planning timeline to address capacity needs throughout the district (details identified in *Section V: Use of Portables*).

The district's long-term plan anticipates providing new and expanded permanent facilities to serve student enrollment. When these permanent facilities are funded and completed, the district may be able to reduce the reliance on relocatables.

For a definition of relocatables and permanent facilities, see *Section 2* of *King County Code 21A.06*.

As enrollment fluctuates, relocatables provide flexibility to accommodate immediate needs and interim housing. Because of this, new school and rebuilt/enlarged school sites are planned for the potential of adding up to four relocatables to accommodate the changes in demographics. The use and need for relocatable classrooms will be balanced against program needs.

VII. Six-Year Classroom Capacities: Availability / Deficit Projection

As demonstrated in *Appendix A-2*, the district currently has permanent capacity (classroom and special education) to serve 14,009 students at the elementary level, 7,509 students at the middle school level, and 8,976 students at the high school level. Current enrollment at each grade level is identified in *Appendix A-2*. Completed projects, as shown in Table 5, would result in an increased permanent capacity for 4,389 students in 2028. Relocatable facilities are being used to address capacity needs that cannot be immediately served by permanent capacity.

Differing growth patterns throughout the district may cause some communities to experience overcrowding. This is especially true in portions of the district where significant housing development has taken place. A strong residential building market, growth, and the number of developments under construction continues to increase. The continued development of north and northwest Redmond, the Sammamish Plateau, the downtown and Totem Lake areas of Kirkland, and in-fill and short plats in multiple municipalities will put additional pressure on schools in those areas.

VIII. Impact Fees and the Finance Plan

The school impact fee formula calculates a proportionate share of the costs of system improvements that are reasonably related to new development. The formula multiplies the per student costs of site acquisition and construction costs for new capacity projects by a student generation rate to identify the per dwelling unit share of the facilities that are needed to serve new growth. (The student generation rate is the average number of students generated by dwelling unit type – new single family and multi-family dwelling units.) The formula then provides a credit against the calculated costs per dwelling unit for any School Construction Assistance Program funding that the district expects to receive for a new capacity project from the State of Washington and for the estimated taxes that a new homeowner will pay toward the debt service on school construction bonds. The calculated fee (see *Appendix B* and *Appendix C*) is then discounted, as required by ordinance, by fifty percent.

For the purposes of this plan and the impact fee calculations, the actual construction cost data from recently completed projects (Peter Kirk Elementary School, Timberline Middle School, and Juanita High School all opened in 2019) have been used (see *Appendix E*). The formula includes the costs for capacity projects at the high school level as there is still a need to address recent growth at this level. The district will continue to monitor elementary and middle school enrollment and include updated information in future updates to the plan. The district has also incorporated into the school site acquisition cost the cost of land previously purchased, Site 44, that is planned to be used to construct a future comprehensive high school within the six-year planning period.

The finance plan shown on *Table 6* demonstrates how the Lake Washington School District plans to finance improvements for the years 2023 through 2028. The financing components include secured and unsecured funding. This plan is based on current and future project approval, securing state construction assistance, and collection of impact fees under the state's Growth Management Act.

* Number of Individual Students (10/1/22 Headcount).

** County Live Births estimated. 2025 and prior year birth rates are actual births 5 years prior to enrollment year.

*** Kindergarten enrollment is calculated at 8.7% of County Live Births plus anticipated developments.

**** First Grade enrollment is based on District's past history of first grade enrollment to prior year kindergarten enrollment.

Sammamish	59	15.5	Main and 228 th NE	Sammamish	In Reserve

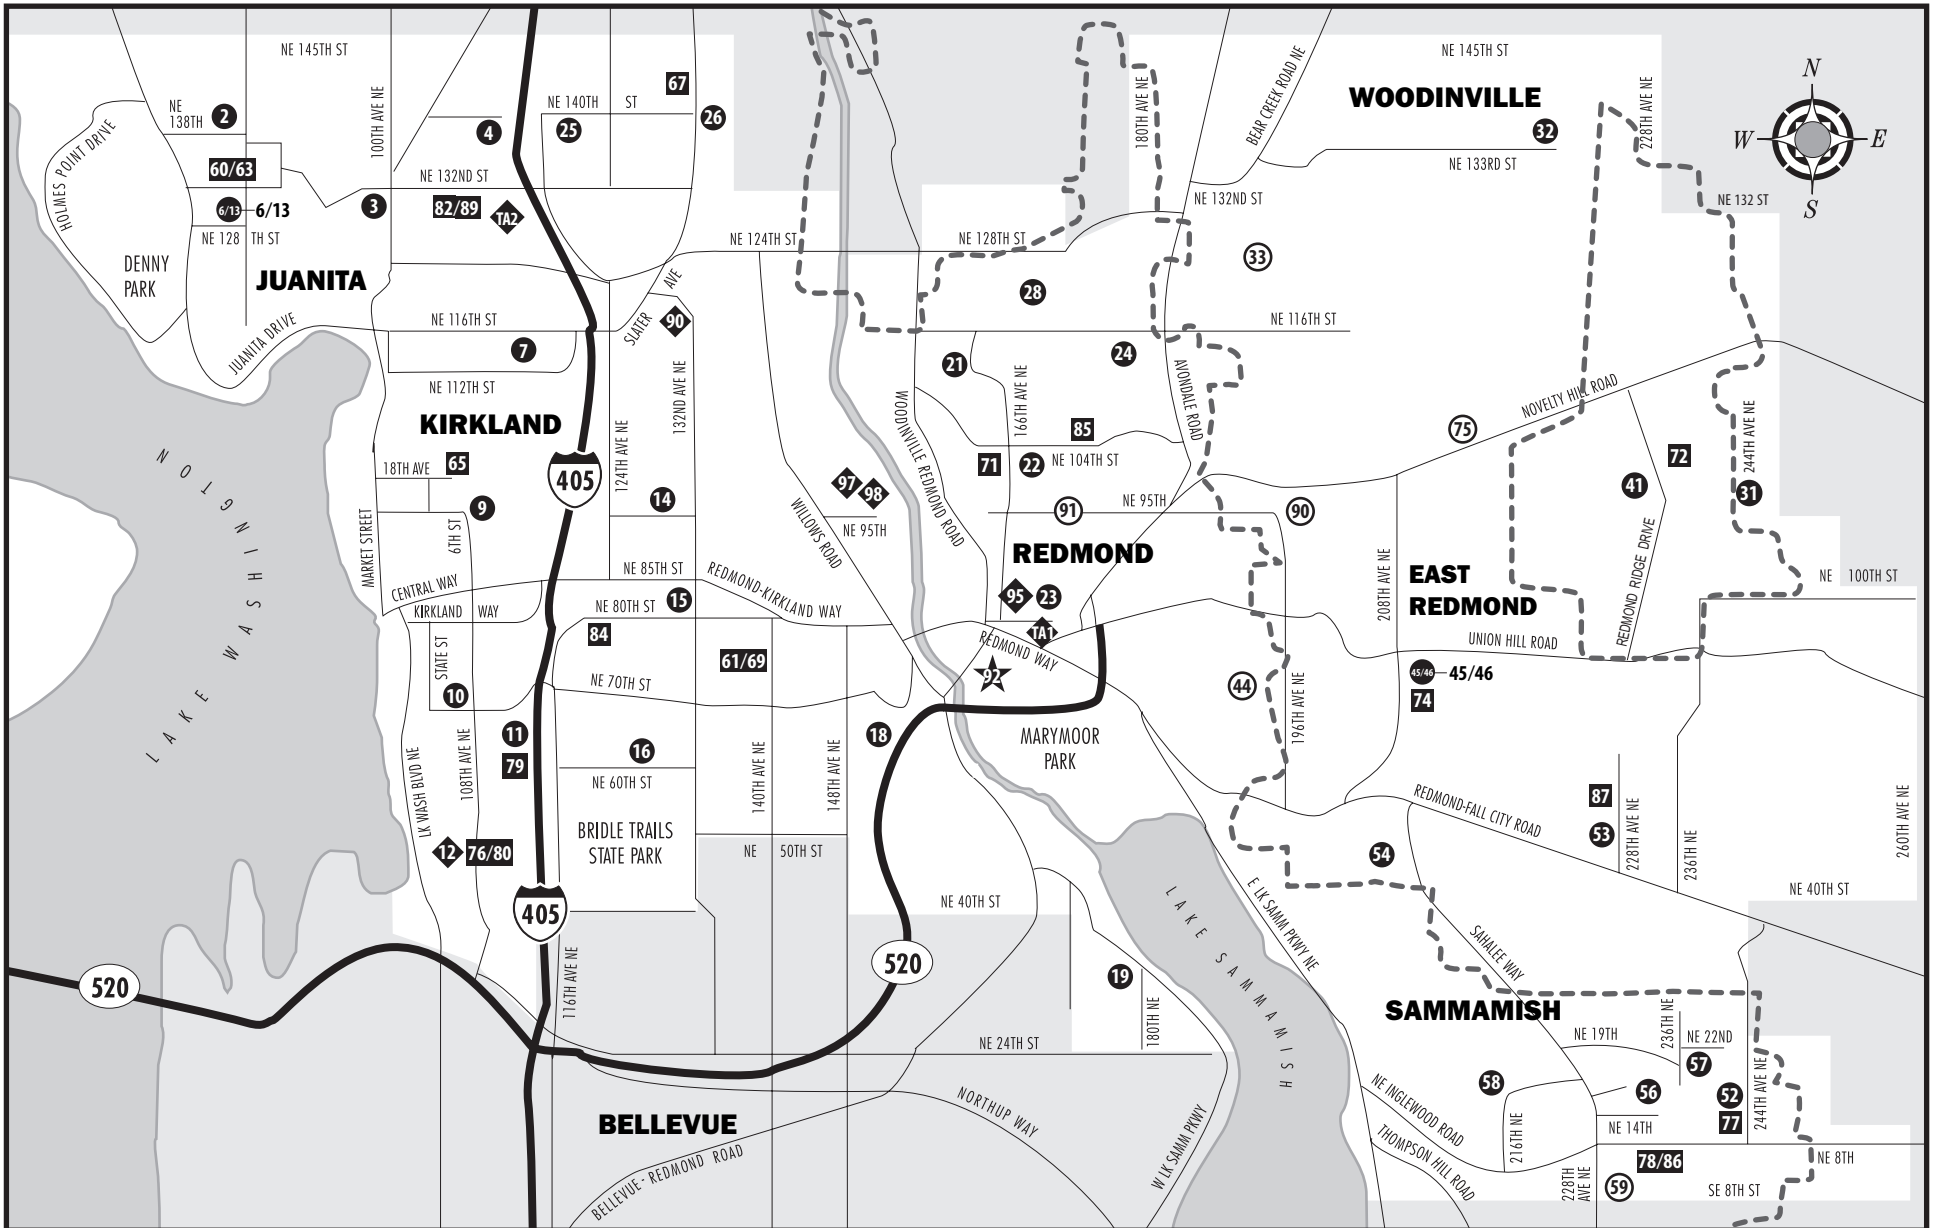

King County School Siting Task Force Findings:

Site 33	20.0 acres located 1/4 mile east of Avondale Road; no school use allowed; potential conservation value.
Site 75	37.8 acres located on the north side of Novelty Hill Road & adjacent to south boundary of Redmond Ridge. The district must work with King County to find an alternative site within the UGA. If an alternative site cannot be feasibly located, the district can use the site for a "small (5 acre) environmental school" while placing the remainder of the use into permanent conservation.
Site 90	26.9 acres located 1/4 mile south of Novelty Hill Road and 1/2 mile east of Redmond City Limits; no school use allowed.

¹ Property unable to be used for a school site due to the King County School Siting Task Force recommendations as adopted by the King County Council.

² Refers to district owned sites on which school construction is not anticipated within the six-year term of the current Capital Facilities Plan. The property is being held for the district's long term needs.

LAKE WASHINGTON SCHOOL DISTRICT

This map is intended to show general district boundaries. For more information call the **LWSD Transportation Department at (425) 936-1120**.
