**Subject:** Public comment opportunity on SEPA & climate change regulations - Sept. 12 deadline

**Department of Development and Environmental Services (DDES)**

*E-mail news service*

The King County Department of Development and Environmental Services, in consultation with a workgroup with representation from business, local governments, the state, and the public, is developing an ordinance to implement a proposed policy that would allow King County to exercise substantive authority under the State Environmental Policy Act (SEPA) to condition or deny proposals that would have a significant, adverse impact on the environment due to their greenhouse gas emissions.

DDES is seeking public comment on the proposal before it is transmitted to the King County Council. Please see DDES Legislative News at <http://your.kingcounty.gov/permits/codes/legnews.aspx> for information on how to submit comments and for more details about the proposal. Comments are due by Friday, September 12, 2008, 4:30 p.m.

Additional information on climate change topics is also available at <http://your.kingcounty.gov/permits/info/site/ClimateChange.aspx>.
