Remaining Deferred Expenses to be paid in December	38,004	228,028	288,199	156,935	711,166		

1 Data is based on the IBIS reports. The adjusted column includes allocation of deferred expenditures (see calculation below). There were recording delays in January and February due to the accounting system conversion. The problems were resolved in March.

2 The adjusted pass-through revenue is calculated by the incurred costs * 115%. The offset was from Printshop / Copy revenue. The adjustment is to recognize revenue from jobs that required combination of internal and outside vendor work.

3 Overhead cost was subtracted by the 15% admin cost charged to pass-thru customers. The net overhead cost was allocated to Printshop, Graphics, and SMT based on expenditure amount.

4 Photography and Videography were assumed at 100% recovery of its direct cost only.

5 Average utilization is calculated based on YTD Sept labor utilization.
