For information regarding the Highline School District's 2016-2021 Capital Facilities Plan, contact G. Scott Hodgins, Executive Director, Capital Planning and Construction, Highline School District No. 401, 17810 8th Avenue South, Building A, Burien, Washington 98148. Telephone: (206) 631-7500

SECTION ONE: INTRODUCTION

Purpose of the Capital Facilities Plan

This Six-Year Capital Facilities Plan has been prepared by the Highline School District (the "District") as the District's primary facility planning document, in compliance with the requirements of Washington's Growth Management Act (the "GMA") and King County Council Code Title 21A. The Plan was prepared using data available in May 2016. The GMA outlines 13 broad goals including adequate provision of necessary public facilities and services. Schools are among these necessary facilities and services. School districts have adopted capital facilities plans to satisfy the requirements of RCW 36.70A.070 and to identify additional school facilities necessary to meet the educational needs of the growing student populations anticipated in their districts.

The Highline School District (the "District") has prepared this Capital Facilities Plan (the "CFP") to provide King County (the "County") and the cities of Burien, Des Moines, Kent, Normandy Park, SeaTac, and Seattle with a schedule and financing program for capital improvements over the next six years (2016-2021).

This Plan will be updated annually with any changes to the impact fee schedule adjusted accordingly.

Executive Summary

After a period of low enrollment growth, the District has experienced steady and significant enrollment increases since 2010. The District currently serves an approximate student population of 19,058 (October 1, 2015 enrollment) with 18 elementary schools (grades K-6), five middle level schools (grades 7-8), and five high schools (grades 9-12). In addition, the District has alternative programs: Big Picture (MS and HS) at the Manhattan site; CHOICE Academy (MS and HS) at the Woodside site; New Start at the Salmon Creek Site; and Puget Sound Skills Center ("PSSC").

Over the last 14 years the District has embarked on a major capital improvement effort to enhance its facilities to meet current educational and life-safety standards. Since 2002 the District has passed two major capital bonds: one in 2002 for approximately \$189,000,000 and one in 2006 for approximately \$148,000,000. The schools which were built for replacement of existing facilities and not to accommodate increased enrollment.

With the approved capital bond funds and reimbursements from the Office of the Superintendent of Public Instruction, the State of Washington, the Port of Seattle, the Federal Aviation Administration and private donations for a new Raisbeck Aviation High School the District has designed, permitted and constructed 13 new elementary schools, 1 new high school, renovated 3 schools as interim facilities, and renovated portions of Memorial Field and Camp Waskowitz. All of this work has been done since March 2002.

The District proposed in November 2014 and February 2015, but did not receive the 60 percent voter approval required for passage, of a bond measure to fund capacity and infrastructure needs. In response to the District's failure to successfully pass a capital bond, the District formed a Capital Facilities Advisory Committee ("CFAC") to develop recommendations for long term capital facilities, including a scope for future bond measures.

As the District looks ahead it recognizes that anticipated enrollment growth, some of which will be caused by new development, and implementation of recent legislation will require the District to either add new facilities, add additions to existing facilities, renovate existing facilities, or add portables to existing facilities.

This CFP identifies the current enrollment, the current capacity of each educational facility, the projected enrollment over the six-year planning period and how the District plans to accommodate this growth. It also includes a schedule of impact fees that should be charged to new development.

Based on current projections, the District needs to add capacity at the elementary and middle school levels to accommodate projected enrollment and implementation of recent legislation. To address these needs, the District plans to replace Des Moines Elementary School to increase its student capacity, add classrooms at existing elementary schools, and build one new middle school. In addition, new modular or portables may need to be added at individual elementary schools and middle schools to accommodate future enrollment. At this time it has been assumed that additional land will not be needed to accommodate the new schools; however, land will be necessary in the future to support the District's long range facilities plan and its Educational Strategic Plan.

The District's current planning as stated in this Capital Facilities Plan is subject to the Board's adoption of the Capital Facilities Advisory Committee's final recommendations (scheduled for July 2016). Future updates to this Capital Facilities Plan will provide final adoption information and any other relevant information.

SECTION 2 – STANDARD OF SERVICE

King County Code 21A.06 refers to a “Standard of Service” that each school district must establish in order to ascertain its overall capacity. School facility and student capacity needs are dictated by the types and amounts of space required to accommodate the District’s adopted educational program. The educational program standards which typically drive facility space needs include grade configuration, optimum facility size, class size, educational program offerings, classroom utilization and scheduling requirements, and use of relocatable classrooms (portables).

District educational program standards may change in the future as a result of changes in the program year, special programs class sizes, grade span configurations, and use of new technology, as well as other physical aspects of the school facilities. In addition, the State Legislature’s implementation of requirements for reduced K-3 class size will also impact school capacity and educational program standards. (The District currently offers full-day kindergarten.) The school capacity inventory will be reviewed periodically and adjusted for any changes to the educational program standards. These changes will also be reflected in future updates of this CFP.

The Standard of Service outlined below reflects only those programs and educational opportunities provided to students that directly affect the capacity of school buildings. The special programs listed below require classroom space, thus the permanent capacity of some buildings housing these programs has been reduced.

*Table 1
Class Size – Standard of Service*

<i>Grade Level</i>	<i>Average Class Size Based on Standard of Service</i>
Kindergarten	24*
Grades 1 – 3	25*
Grades 4 – 6	27
Grades 7 – 8	30
Grades 9 – 12	32

*The District standard for K-3 will change to 17:1 in 2019 (see Table 7).

It is not possible to achieve 100% utilization of all regular teaching stations throughout the day. Therefore, classroom capacity is adjusted using a utilization factor of available teaching stations depending on the physical characteristics of the facility and educational program needs.

Elementary School Standard of Service Models

- Special education for students with disabilities may be provided in self-contained classrooms.
- All students are provided music instruction in a separate classroom.
- All students will have scheduled time in a special classroom.
- Identified students will also be provided other educational opportunities in classrooms designated as follows:
 - Resource Rooms
 - English Language Learners (ELL)
 - Education for Disadvantaged Students (Title I)
 - Gifted Education
 - Learning Assisted Programs
 - Severely Behavior Disorder
 - Transition Rooms
 - Mild, Moderate, and Severe Disabilities
 - Developmental Kindergarten
 - Extended Daycare Programs and Preschool Programs

Secondary School Standard of Service Models

- Identified students will also be provided other educational opportunities in classrooms designated as follows:
 - Resource Rooms
 - English Language Learners (ELL)
 - Computer Labs
 - Science Labs
 - Career and Vocational Rooms
 - Daycare Programs
 - Alternative Program Spaces

SECTION THREE: CAPITAL FACILITIES INVENTORY

This section provides an inventory of capital facilities owned and operated by the District including schools and relocatable classrooms (modulars or portables). School facility capacity was inventoried based on the space required to accommodate the District's adopted educational program standards. *See Section Two: Standard of Service.* A map showing locations of District facilities is provided in Appendix A.

Schools

See *Section One* for a description of the District's schools and programs.

School capacity was determined based on the number of teaching stations (or general classrooms) within each building and the space requirements of the District's currently adopted current educational program and internal targets as reported in ICOS with the Office of the Superintendent of Public Instruction. It is this capacity calculation that is used to establish the District's baseline capacity, and to determine future capacity needs based on projected student enrollment. The school capacity inventory is summarized in Tables 2, 3, and 4.

As the District implements reduced K-3 class size requirements and grade reconfiguration, the inventory will reflect adjustments in the Standard of Service (see Tables 7-B and 7-C).

Relocatable Classrooms (Portables)

Relocatable classrooms (portables) are used as interim classroom space to house students until funding can be secured to construct permanent classrooms. The District currently uses 27 relocatable classrooms at various school sites throughout the District to provide additional interim general classroom capacity. A typical relocatable classroom can provide capacity for a full-size class of students. Current use of relocatable classrooms throughout the District is summarized in Table 5.

TOTALS	3	3	96

**Used for regular classroom capacity.

***The relocatables referenced under "other relocatables" are used for special pull-out programs, storage, community use, etc.

SECTION FOUR: STUDENT ENROLLMENT TRENDS AND PROJECTIONS

Generally, enrollment projections using historical calculations are most accurate for the initial years of the forecast period. Moving further into the future, more assumptions about economic conditions, land use, and demographic trends in the area affect the projection. Monitoring birth rates in the County and population growth for the area are essential yearly activities in the ongoing management of the CFP. In the event that enrollment growth slows, plans for new facilities can be delayed. It is much more difficult, however, to initiate new projects or expedite projects in the event enrollment growth exceeds the projections.

With the assistance of a professional demographer, the District has developed its own methodology for forecasting future enrollments. This methodology, a modified cohort survival method, considers a variety of factors to evaluate the potential student population growth for the years 2016 through 2021. These factors include: projected births, projected growth in the K-12 population, and a model which considers growth in population and housing within the District's boundaries. The methodology also considers the potential impacts on enrollment due to the recent opening of a charter school within the District's boundaries. Certain assumptions are made regarding the continued enrolment at the charter school. Therefore, the methodology and the resulting projections should be considered conservative.

District enrollment has increased in recent years, including a 6.4% increase since 2009. Using the modified cohort survival projections, a total enrollment of 20,423 students is expected in 2021. In other words, the District projects an increase of 7.1% in student enrollment (or 1,365 students) between 2015 and 2021. *See Appendix B (Enrollment projections from Les Kendrick, December 2015.)*

**Table 6

*Actual October 2015 FTE enrollment.

SECTION FIVE: CAPITAL FACILITIES PROJECTIONS FOR FUTURE NEEDS

Projected future capacity needs, shown in Tables 7-A through 7-C, are derived by applying the projected number of students to the projected permanent capacity. It is not the District's policy to include relocatable classrooms when determining future capital facility needs; therefore, interim capacity provided by relocatable classrooms is not included in this analysis. The District will utilize relocatables as necessary to address interim capacity needs. Information on relocatable classrooms by grade level and interim capacity can be found in Table 5. Information on planned construction projects can be found in the Financing Plan, Table 8.

Recent state-level policy decisions impact the District's capacity analysis. Engrossed Senate House Bill 2261, adopted in 2009, requires school districts to implement full-day kindergarten by 2018. SHB 2776, passed in 2010, requires school districts to reduce K-3 class sizes to 17 students per teacher. Finally, in November 2015, the voters passed Initiative 1351, which requires reduced class sizes across all grades (K-12). The District has proactively implemented full day kindergarten, which reduced the number of available regular classrooms in elementary schools districtwide. The District anticipates that the Legislature will only partially fund implementation of K-3 class size reduction, and therefore the capacity projects needed to address implementation will require successful passage of a capital bond. Future updates to this Plan will incorporate any funded implementation of Initiative 1351.

Table 7 assumes that K-3 class size reduction is implemented by 2019 and that grade levels are reconfigured to K-5, 6-8, and 9-12 in 2020. All scenarios include the capacity related projects the District is planning during the six-year planning period.

*Actual October 2015 FTE enrollment

**Does not include portable capacity.

SECTION SIX: FINANCING PLAN

Planned Improvements

The Finance Plan focuses on capacity related projects needed to accommodate recent and projected growth in the District.

Based upon the scenario presented in Table 3, the District will need to add permanent classroom capacity at both the elementary school and middle school grade levels. Subject to Board approval of the Capital Facilities Advisory Committee's final recommendations, anticipated in July 2016, the District anticipates that the additional capacity will be accomplished by (1) adding space to the new Des Moines Elementary School (replacement school), (2) the construction of new elementary school classrooms at various sites, and (3) constructing a new middle school. All new schools will be located on land currently owned by the District.

In addition, new relocatable classrooms (portables) may need to be added at individual elementary schools and middle schools to accommodate future enrollment or to provide interim classrooms until permanent classroom capacity is built.

The District has identified "non-capacity" capital needs at existing schools. The non-capacity projects are identified in the District's 2016 Long Range Facility Plan (scheduled to be adopted in July 2016). Funding for the non-capacity related projects may be proposed as a part of a future capital bond measure. The School Board of Directors will continue annual review of its school and support facility needs, and any decisions will be reflected in future updates to this Capital Facilities Plan (CFP).

Financing for Planned Improvements

Funding for planned improvements is typically secured from a number of sources including voter-approved bonds, State match funds, and impact fees.

General Obligation Bonds: Bonds are typically used to fund construction of new schools and other capital improvement projects, and require a 60% voter approval. The District's voters will need to approve a school construction bond to fund the projects identified in this Plan.

State School Construction Assistance Funds: State School Construction Assistance Funds come from the Common School Construction Fund, which is composed of revenues accruing predominantly from the sale of renewable resources (i.e., timber) from State school lands set aside by the Enabling Act of 1889. If these sources are insufficient to meet needs, the Legislature can appropriate funds or the State Board of Education can establish a moratorium on certain projects. School districts may qualify for State School Construction Assistance Funds for specific capital projects based on a prioritization system.

The District anticipates receiving funding from Senate Bill 6080 to address a portion of the classrooms needed for implementation of reduced K-3 class sizes.

Impact Fees: Impact fees are a means of supplementing traditional funding sources for construction of public facilities needed to accommodate new development. See Section 7 School Impact Fees.

The Six-Year Financing Plan shown on Table 8 demonstrates how the District intends to fund new construction and improvements to school facilities for the years 2016-2021. The financing components include bonds, State match funds, and impact fees. The Financing Plan separates projects and portions of projects which add capacity from those which do not, since the latter are generally not appropriate for impact fee funding.

Table 8
Capital Facilities Financing Plan

Improvements Adding Permanent Capacity Costs (in Millions)**

Project	2016	2017	2018	2019	2020	2021	Total Cost	Bonds/ Local Funds	State Funding	Impact Fees
Elementary Schools

								X	X	X
Portables										
Portables at Various Sites		.200	.200	.200				X		X
High Schools										
Land Purchase (elementary site for future growth)						\$20.000	\$20.000	X		X

**All projects are growth-related.

SECTION SEVEN: SCHOOL IMPACT FEES

The GMA authorizes jurisdictions to collect impact fees to supplement funding of additional public facilities needed to accommodate new development. Impact fees cannot be used for the operation, maintenance, repair, alteration, or replacement of existing capital facilities used to meet existing service demands.

Impact fees in Appendix C have been calculated utilizing the formula in the King County Code. The resulting figures are based on the District's cost per dwelling unit to purchase land for school sites, make site improvements, construct schools, and purchase/install relocatable classrooms (portables). As required under the GMA, credits have also been applied in the formula to account for State Match Funds to be reimbursed to the District and projected future property taxes to be paid by the dwelling unit.

The District's cost per dwelling unit is derived by multiplying the cost per student by the applicable student generation rate per dwelling unit. The student generation rate is the average number of students generated by each housing type; in this case, single family dwellings and multi-family dwellings. Multi-family dwellings were broken out into one-bedroom and two-plus bedroom units. The District has developed its own student generation rate data based on actual permit data from local jurisdictions. *See Appendix D.*

Using the variables and formula described, and applying the 50% discount rate required by the King County School Impact Fee Ordinance, impact fees proposed as a part of this CFP, are summarized in Table 9 below. *See also Appendix C.*

King County and the City of Kent currently have adopted school impact fee ordinances and collect school impact fees on behalf of the District. The District is requesting that the other cities that it serves consider adoption of a school impact fee ordinance.

Table 9
School Impact Fees
2016

Housing Type	Impact Fee Per Dwelling Unit
Single Family	\$7,528
Multi-Family	\$6,691

Highline Public Schools boundary and neighboring school districts

SECONDARY SCHOOL SERVICE AREA BOUNDARIES

Avenues run north and south. If the last digit of the house number is even, a student will attend the school on the east side of the boundary; if odd, the school on the west side of the dividing line.

Streets run east and west. If the first digit of the house number is even, a student will attend the school on the north side of the boundary; if odd, the school on the south side of the dividing line.

All school boundaries except one are divided by the middle of the common street or the natural geographic terrain where there is no street. The one exception is South 175th Street from Military Road South to 51st Avenue South. Both sides of South 175th Street will attend Bow Lake Elementary School.
