INTRODUCTION

This Six-Year Capital Facilities Plan is Fife School District's planning document prepared in compliance with the requirements of the Growth Management Act (GMA), King County and Pierce County, and cities of Fife, Milton, and Edgewood. It is designed to support the collection of school impact fees and consists of:

- (a) An inventory of existing school facilities;
- (b) An enrollment base and projection;
- (c) A standard of service;
- (c) A summary of school facility capacity and projected need for space;
- (d) A forecast of future school facility needs, financing, and impact fee formula.

Fife School District serves a population of over 15,000, and is located off Interstate 5, east of Tacoma, north of the Puyallup River, about ten square miles in area, and falling in both Pierce and King Counties. It includes the cities of Fife, Milton, and Edgewood, unincorporated areas of Trout Lake, Jovita, Fife Heights, and a portion of the Port of Tacoma.

The Growth Management Act authorizes jurisdictions to collect impact fees to supplement funding of additional public facilities needed to accommodate new development. To collect impact fees, a local jurisdiction must have adopted a GMA school impact fee ordinance, and must approve the District's Capital Facilities Plan as a component of their comprehensive plan. The District will utilize the State Subdivision Act and the State Environmental Protection Act (SEPA) to collect mitigation fees in those jurisdictions where there is no GMA impact fee ordinance.

Existing District Facilities

Discovery Primary School	(grades K-1 and preschool)	Built new and opened in 1992.
Alice V. Hedden Elementary School	(grades 2-5)	Built new and opened in 2001.
Endeavour Intermediate School	(grades 2-5)	Originally constructed as Milton Elementary School in 1951 with additions in 1953, 1955, 1958, 1962, and 1968. Modernized in 1975. Closed one year for some demolition, total modernization and addition. Reopened in 1993 as Endeavour Intermediate School.
Surprise Lake Middle School	(grades 6-7)	Originally constructed in 1970. Extensive modernization and addition in 1992. Main offices and Counselors offices remodeled 1998.
Columbia Junior High School	(grades 8-9)	Built new and opened in September 2003. Performing arts auditorium, sports and athletic complex completed in 2004.
Fife High School	(grades 10-12)	Originally constructed in 1930 with additional buildings and space added in 1949, 1956, 1958, 1960, 1961, 1970 and modernization in 1975. Some demolition, extensive modernization and addition completed in 1995. Alternative High School modernized in 1997.
Transportation Center		Built new in 1996.
Educational Services Center		Located in a portion of the old Fife Elementary School. Modernized in 1997.

TOTAL CORE AND PORTABLE CAPACITY	3,929								

ENROLLMENT BASE AND PROJECTION

The District uses the enrollment projections provided by Washington State Office of Superintendent of Public Instruction (OSPI) as a base. The projections are based on the "Cohort Survival Method" which computes progressive ratios for each grade level and averages those ratios over the past five years. The average ratio is then multiplied by the actual current year's enrollment using October headcount for each grade to project the enrollment in the next grade for the next year. The Cohort Survival Method uses past enrollment indicators to predict future growth, however, it does not account for anticipated growth due to new residential and commercial construction in the Fife/Milton area. For example, there are over 180 planned single family housing starts and over 70 planned multifamily units within our school district's boundary, expected to generate approximately 80 new students. Despite a down-turn in the economy, resulting in slight decrease in fiscal year's 09-10 and 10-11 enrollment, we are anticipating continued growth as evidenced by the table below. Actual enrollment growth over the past ten years averaged approximately 1.17% per year, and .37% per year over the past five years. More importantly, for the next six years the Cohort Survival Method predicts an increased average growth rate of 2.18% as shown below.

Avg Growth/Year						0.37%						2.18%

* Headcount (rather than FTE) is used as a more appropriate indicator for enrollment and capacity needs. Part-time students (less than 1 full FTE) require seating space and program resources as though full-time. Many kindergarten students now attend full-time as well and thus require full-time seating space.

** Actual enrollment based on October student headcount through the 12-13 school year.

STANDARD OF SERVICE

Fife School District, as written in its mission statement, is committed to providing a safe and caring environment, which ensures that all students will learn. And, as a Standard Bearer District, Fife is a leader in school reform and committed to providing our students highly engaging, meaningful, challenging, and satisfying work. The District is committed to achieving a high standard of learning for our students, as detailed in each of the six school building's School Improvement Plans. Keeping class sizes at an optimal level is a critical component in reaching these goals. Due to incredible community support, the District is able to set this standard at approximately 20-22 students per class, with first priority at the primary grade levels (K – 4). Students are provided traditional basic education programs which include reading, writing, math, social studies, science, physical education, health, music and art. In addition there are scheduled times in computer labs and a number of special programs such as special education, English Language Learners (ELL), preschool, remediation and other programs designed to serve special populations. These special programs significantly affect school capacity by the need for separate space, scheduling accommodations, mandated program requirements, and population changes. Rooms designed for special use are not counted as classrooms.

CAPACITY AND SPACE NEEDS

Washington Administrative Code (WAC) sets factors determining a school's eligibility to receive state-matching funds for school construction. One factor is "square feet per student" set at 90 in grades K-6, 117 in grades 7 and 8, and 130 in grades 9-12. These space allocations are part of a funds allocation model and do not reflect the true space needed to carry out the instructional program. Fife's actual K – 12 average square feet per student is 132.83.

Fife School District has chosen to determine **actual program capacity** by surveying each school, reviewing with each school principal how the teaching spaces are being used, and the number of teaching staff assigned. Projections of space needs are based on the assumption of adding a teacher and classroom space for approximately each additional 19 to 23 students dependent upon grade level. *This does not account for additional space needed for special programs as discussed above, and support services such as library, gym, athletics, kitchen, bathrooms, storage, etc.* To reflect current programming needs and actual use of facility spaces, the District has finalized participation in a community-wide study and survey. The survey results are described on pages 12 and 13.

Previous and current survey information used to determine current and future capacity for each school is summarized on the following charts by buildings. The charts include:

1. Enrollment by grade level headcount from the 2008-09 school year through the 2018-19 year.
Preschool information is by sections rather than headcount.
2. Planned capacity when the building was designed.
3. Teachers currently assigned and projected to be assigned under the District's standard of service.
4. Permanent rooms, including special program areas.
5. Portable classrooms (including the number of additional classrooms needed).

Because space needs are driven, in part, by the number of teachers available, future projections can be significantly impacted by availability of state and local funds. A levy failure or other severe budget impact may temporarily reduce the number of teachers, thus increasing class sizes and reducing the need for additional classrooms. When funding levels are restored, teachers will be re-hired to return class sizes to District standards. However, in the absence of budget set-backs, the number of teachers needed (and the number of classrooms required) will increase as District enrollment continues to grow.

*Headcount

**Even though the Plan Capacity of Columbia Junior High is listed at 600, the actual regular capacity of the facility is less than 600 due to the programming needs at the school and the actual use of classroom spaces. As such, the District analyzes capacity needs at this school each year during the six year planning period.

**Even though the Plan Capacity of Alice V. Hedden Elementary is listed at 485, the actual regular capacity of the facility is less than 485 due to the programming needs at the school and the actual use of classroom spaces. As such, the District analyzes capacity needs at this school each year during the six year planning period

SCHOOL FACILITIES SUMMARY AND FUTURE NEEDS / FINANCING

A survey and study was completed in July 1997, and revised April 2000. Based on those projections, the District received voter authorization to build 2 new schools (elementary and junior high schools) to meet projected enrollment growth. The Alice V. Hedden Elementary School was built and occupied in September 2001, adding capacity for 485 students. However, there were still approximately 350 secondary students occupying portables on sites throughout the District. Existing core facilities and support space at the secondary grade levels (bathrooms, cafeteria, gym, special programs, etc) remained over capacity as a result. The Columbia Junior High School was opened in September 2003 as planned, adding additional capacity for 600 students. The balance of the project (entry road and parking lot) was completed during the fall of 2006. The grade configuration at the high school was changed to grade levels 10-12, eliminating the need to build a new high school. Primary grade levels remain as grades K-5. The middle and junior high schools now serve grades 6-9. As a result of these two new schools, and the use of portable classrooms, the District has been able to meet the current capacity needs, and enable the Fife School District to maintain a high Standard of Service and commitment to our students and community.

Both Pierce and King County showed a short-term birth rate decline which affected our 2009-2011 enrollments. County records indicated this decline ended in 2011, as evidenced by our enrollment increase in 2012. With birth rates on the rise again, our student population is expected to increase by approximately 400 students within the next six years. As core facilities become overcrowded, the District will continue to utilize portable classrooms and consider grade re-configuration to accommodate student growth on a temporary basis until enrollment is sufficient to occupy a new school. The need for space is based on the practical capacity of existing facilities and true space needed to carry out a full instructional program. This differs from the space allocation used in the State's funding formula to determine a school district's eligibility for state-matching funds. For example, at the elementary level, Fife School District provides 97.76 square feet per student compared to 90 in the state formula. The National average is 110.

Study and Survey 2009 - To reflect current building conditions as well as capacity needs, the District finalized participation in another community-wide study and survey. The results of this survey included addressing the capacity needs at Fife High School due to projected enrollment growth at the secondary level. The proposal recommended an addition to the high school to make room for 10 new classrooms.

Study and Survey Future - In the spring of 2014 the District plans to begin another Study and Survey to provide updated information on our building needs. This will consist of a committee made up of community members, staff, parents, and other interested parties. This survey should take approximately 6 months. Results of this updated Study and Survey will be reflected in the Capital Facilities Plan following its completion.

Future Classroom Needs

Although the projected enrollments shown on pages 6–11 indicate our schools are primarily over capacity at the elementary levels by 2018-19, the District will consider grade re-configuring and use of portable classrooms at our schools to help accommodate enrollment growth and to balance over-all enrollment among our six schools.

District-wide projected classrooms needed, (including those for preschool), are shown below. In addition to classrooms, there is additional space needed for support services such as special programs, gym, cafeteria, storage, bathrooms, etc. These projections for future classrooms are based simply on past enrollment statistics through the 2012-13 school year. Since this forecast is conservative, the plan will be revised as necessary to account for anticipated enrollment growth and residential development.

New Construction

Current Building Conditions

Since modernization began in 1992, all District facilities have been completely modernized and/or built new. This includes the new Columbia Junior High and Alice V. Hedden Elementary Schools, Discovery Primary, Fife Transportation Center as well as remodels/additions to Endeavour Intermediate, Surprise Lake Middle School, Fife High School, and the District Administration Office. Recently added modular classrooms at Columbia Junior High and Alice V. Hedden, as well as the proposed Fife Senior High addition are outlined below.

School Construction Plans

1996-1997	Study and Survey
1998-1999	Planned for schools
1999-2000	Planned and requested bond issue for schools (approved February 2000)
2000-2001	Built/occupied Hedden Elementary (completed 2001)
2001-2003	Built/occupied Columbia Junior High (occupied 2003)
2007-2008	Added modular classrooms at Hedden and Columbia
2007-2009	Study and Survey
2014	Study and Survey to begin again Spring 2014
2014-2015	Plan for senior high school addition and request bond issue
2016-2018	Build/occupy new addition

Project Costs

Alice V. Hedden Elementary & Modular Classrooms - Alice V. Hedden Elementary School was constructed on a 14.89 acre site located in Edgewood and opened in September 2001 with a capacity of 485 students. Final cost was \$11,100,000. Due to continued enrollment growth and special program needs, four new portable classrooms were added for use during the 2007-08 and 2011-12 school years. Final cost was \$671,918 or about \$167,980 per classroom.

Columbia Junior High & Modular Classrooms - Columbia Junior High School was constructed in Fife as part of a joint cooperative effort with the City of Fife. The total site encompasses 34.4 acres, with the City of Fife providing 27.1 acres and the District providing an additional 7.3 acres. In return for receiving the 27.1 acres valued at approximately \$1.85 million, the District built additional park and athletic facilities. Usage, operations, and maintenance expenses will be shared according to interlocal agreements signed by the two agencies. The school has a capacity for 600 students and opened in September 2003, with final project completion during the fall of 2006. Final construction costs were \$25,398,269. Due to continued enrollment growth four new modular classrooms were added for use during the 2007-08 school year. Final cost was \$638,184, or about \$159,546 per classroom.

Proposed Fife Senior High Addition - As a result of our study and survey completed in 2009, preliminary plans call for a \$25,581,973 expansion/remodel of the present high school within the next 6 years to accommodate growing secondary enrollments. The existing five portable classrooms will be removed to make way for the new 320 student addition.

Project Funding

Alice V. Hedden Elementary, Columbia Junior High, & Modular Classrooms - The District's last bond issue for \$35 million was approved by the voters on February 29, 2000 to construct the two new schools Alice V. Hedden Elementary, and Columbia Junior High. Impact fees were also collected and applied to these projects. The primary funding source for the modular classrooms for these two schools added during the 2007-08 and 2011-12 school years, were school impact fees.

Proposed Fife Senior High Addition - The primary funding source for the Fife Senior High School addition will need Voted General Obligation Bonds, with impact fees providing an additional funding source. Due to inadequate state funding levels, the discrepancy still exists between the "square feet per student" used in the state formula and the actual space needed to provide a full instructional program with support services. Therefore, the District does not expect to qualify for matching funds for the Fife Senior High addition.

Impact Fees

Impact fees are calculated on the basis of the facilities needed to house students from new residential development. Impact fees for Fife School District are shown on page 16. Student Generation Rates (SGR) were updated in 2013, and are based on an analysis of all single and multiple-family new residential development projects constructed in the five years from 2008 – 2012 within Fife School District boundaries. The results were updated with 2013 student address data. (See Appendix Table 9.) Based on this most recent study, the single-family rate is calculated at \$1,051. The multiple-family rate is calculated at \$0. Because the updated analysis shows there were no high school students generated in the last five years from multi-family housing, the calculated fee has dropped to zero.

New Capacity Needs and Financing Summary

As demonstrated in the tables on pages 6-11, the District currently has capacity to serve 1,500 students at the elementary (preschool – 5th grade) level, 1,130 students at the middle/junior high school level (grades 6-9), and 705 students at the high school (grades 10-12) level. Current enrollment at each grade level is identified in the tables on pages 6-11. The District is currently over capacity at the elementary level by 165 students, under capacity at the middle/junior high school level by 38 students, and over capacity at the high school level by 55 students.

To address existing and future capacity needs, the District's six-year construction plan includes the following capacity projects:

- Construction of new capacity and remodel of Fife High School.

Based upon the District's capacity and enrollment projections, the District determined that the majority of its capacity improvements are necessary to serve students generated by new development, with the remaining additional capacity required to address existing needs.

Based on the District's student generation rates, the District expects that .379 students will be generated from each new single family home in the District and that .134 students will be generated from each new multi-family dwelling unit.

The school impact fee formula ensures that new development only pays for the cost of the facilities necessitated by new development. The fee calculations examine the costs of housing the students generated by each new single family dwelling unit (or each new multi-family dwelling unit) and then reduces that amount by the anticipated state match and future tax payments. The resulting impact fee is then discounted by 50%. Thus, by applying the student generation factor to the school project costs, the fee formula only calculates the costs of providing capacity to serve each new dwelling unit. The formula does not require new development to contribute the costs of providing capacity to address existing needs.
