The Honorable Claudia Balducci
Chair, King County Council
Room 1200
C O U R T H O U S E

Dear Councilmember Balducci:

This letter transmits a report documenting the efforts taken to continue protecting water quality in our region in response to the West Point Treatment Plant (West Point) flood event that occurred on February 9, 2017.

The report, required by Ordinance 18628, provides a second quarter 2021 update of the implementation plan for the recommendations provided by AECOM. Additionally, the six corrective actions required by the Washington State Department of Ecology (Ecology) noted in the Ordinance are considered complete as of the 2018 fourth quarter report transmitted in February 2019.

The report addresses two updates made since the first quarter 2021 report was submitted in May 2021. The West Point Operations and Maintenance staff successfully conducted the Bi-Annual Plant Float System Test. Also, the West Point Flood Risk Reduction Systems (FRRS) was commissioned in May 2021 and is now fully operational. As a result, five control system improvement recommendations from AECOM are now complete. These systems are the primary and secondary life safety systems that protect staff and plant equipment at West Point during flooding/emergency situations.

This report furthers the King County Strategic Plan goal of an efficient, accountable regional and local government by providing an open and transparent update on the implementation of AECOM's recommendations to enhance employee safety and protect the region's investments at West Point. The report also furthers the Strategic Climate Action Plan goal of preparing for climate change by providing information on preparing West Point to handle the effects of increasingly severe storms.

In developing the report, WTD provided updates on the implementation of the recommendations in the AECOM report to the Metropolitan Water Pollution Abatement Advisory Committee and the Regional Water Quality Committee.

The Honorable Claudia Balducci

It is estimated that the report required 10 staff hours to produce, costing \$1,500. The estimated printing cost for this report is nominal.

Thank you for your consideration of this report. This report will help policymakers and the public understand how King County is improving systems at West Point and preparing to withstand or mitigate the impact of future storms.

If your staff have any questions, please contact Kamuron Gurol, Division Director of the Wastewater Treatment Division of the Department of Natural Resources and Parks, at 206-263-5767.

Sincerely,

 for

Dow Constantine
King County Executive
