Office of Performance Strategy and Budget))

2024 King County

Comprehensive Plan

Ordinance XXXXX, Attachment A

Adopted TBD

1	
2 3	KingCounty
4 5 6 7	December 2016
8 9	Dear King County Resident:
10 11	After more than two years of outreach, research and engagement with community members and stakeholders, the King County Council and King County Executive are pleased to present the adopted 2016 King County
12 13	Comprehensive Plan.
14 15 16 17 18	The 2016 update is a major review of the Comprehensive Plan. It builds on King County's 25 years of success in implementing the Growth Management Act. Since adoption of the first Comprehensive Plan in 1994, the vast majority of housing growth countywide 96 percent has occurred in urban areas. Building on this success, the 2016 plan now also responds to new critical challenges:
19 20	Equity and Social Justice. The 2016 Comprehensive Plan includes strong, specific language about how consideration of Equity and Social Justice will shape County actions, how we will move forward with affordable
21	housing and human services goals, how we will work to ensure that undesirable land uses do not overburden
22	historically underserved communities, and how all residents of King County will benefit from careful application of
23 24	Equity and Social Justice principles when the County sites facilities, operates programs, or launches new initiatives.
25	Climate Change and Environmental Protection. The 2016 Comprehensive Plan incorporates key goals and policies
26	from the County's 2015 Strategic Climate Action Plan. It demonstrates the County's commitment to climate action,
27	with new policies on environmental and climate justice; more specific references to our efforts to reduce County
28	greenhouse gas emissions through new technologies, such as all-electric battery buses; commitments to ongoing
29 30	preservation of valuable open spaces; and development of a Green Building handbook and building codes.
31	Local Government Responsibilities. At its core, the Comprehensive Plan is a description of King County's role in
32	the unincorporated areas. The 2016 Comprehensive Plan highlights this role and provides additional clarity about
33	the County's responsibility as a local service provider to unincorporated residents through enhancements to policies
34	and text throughout all chapters. At the same time, the adopted Comprehensive Plan describes the County's role as
35 36	a regional service provider and a leader and convener on regional issues of concern.
37	Housing and Human Services. The 2016 Comprehensive Plan reflects the importance of serving those most in need
38	by organizing policies related to affordable housing and human services into a new chapter. Language in the
39	adopted Plan strengthens and clarifies these policies to reflect the County's commitment to help people who are
40	experiencing homelessness, those at risk of displacement, and those in need of mental health and behavioral health
41	services. The Plan also adds a new policy that calls for a regional approach to increasing the availability of
42	affordable housing.
43	
44 45	Local and Regional Planning. The adopted 2016 Comprehensive Plan complies with the State Growth
45 46	Management Act and illustrates the County's continued commitment to protect rural lands from expansion of the
46	urban growth area. The Comprehensive Plan also launches a new subarea planning program that will create more
47	detailed, stakeholder informed local plans across the entire unincorporated area.

((2016 Comprehensive Plan – updated December 6, 2022 Ordinance 18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555))

48

49 Natural Resource Lands. The adopted 2016 Comprehensive Plan reaffirms King County's commitment to

- 50 protecting our valuable forest and agricultural lands in accordance with the State Growth Management Act. The
- 51 Comprehensive Plan links the production of local food and the proliferation of farmers markets to continued
- 52 protection for our Agriculture Production Districts, which have remained in place for more than forty years. New
- 53 policies in this update also encourage the use of Best Management Practices and sustainable farming activities to 54 help protect the environment.
- 55

56 2015 marked the 25th anniversary of the passage of the Growth Management Act. This landmark legislation created 57 a new planning approach in Washington State that sought to address the harmful impacts of uncoordinated and 58 unplanned growth. The Growth Management Act requires jurisdictions to designate an urban growth area within 59 which growth would be encouraged and outside of which growth could occur only if it was not urban in nature. It 60 also requires the adoption of regulations to assure the conservation of agricultural, forest, and mineral resource lands 61 of long term significance as well as regulations to protect environmentally critical areas including wetlands, aquifer 62 recharge areas, fish and wildlife habitat corridors, frequently flooded areas, and geologically hazardous areas. By 63 almost any measure, King County has been successful in realizing these broad goals. Since adoption of the first 64 Comprehensive Plan in 1994, the vast majority of housing growth countywide 96 percent has occurred in urban 65 areas. And, through incorporations and annexations, more than 60 percent of the unincorporated urban area that 66 existed in 1994 is now within cities, which continues to fulfill the goal of transitioning counties to serve as providers 67 of rural and regional services. In Rural Areas and Natural Resource Lands, the County has preserved working farms 68 and forests through a balanced strategy that includes regulations, incentives, and technical assistance, and this has 69 led to a sustainable rate of development. 70

- 71 Looking forward, the State, local jurisdictions, and regional partners will soon be reviewing the required timelines
- 72 for comprehensive plan updates and how that relates to timing of growth forecasts, Buildable Lands Reports,
- 73 updates to the multicounty planning policies and growth allocations, and updates to countywide planning policies
- 74 and growth targets. The County will be involved in this work and will determine how it affects our own 75
- Comprehensive Plan update schedule to ensure alignment with the broader growth management framework
- 76 timelines. Review of the King County Comprehensive Plan update process will also evaluate scheduling major
- 77 updates in odd calendar years, in consideration of the County's biennial budget cycle.⁴
- 78 79

The adoption of the 2016 Comprehensive Plan marks yet another step of King County's ongoing success at 80 balancing economic vitality and healthy neighborhoods with careful stewardship of our farms, forests, and open

- 81 spaces. Together, we can ensure that that our region continues to manage growth effectively while protecting
- 82 thriving rural and resource lands, and remain in compliance with the Growth Management Act.
- 83

84 Sincerely,

Dow Coute Lembourt

Rod Dembowski Chair, Transportation, Economy and Environment Committee King County Council

Dow Constantine King County Executive

¹ The work to review the Comprehensive Plan update schedule was completed in 2018 and 2020, through Ordinance 18810 and Ordinance 19146.))

((EXECUTIVE SUMMARY

3 4 In 2015, King County was the most populous 5 county in Washington State and the 13th most 6 populous county in the nation. Between 2015 and 7 2031, King County is targeted to grow by 252,000 8 residents. 9 10 The King County Comprehensive Plan is fundamental for directing and managing this anticipated growth. It 11 12 contains policies guiding development and land use in unincorporated areas of the County, as well as service 13 provision throughout the County and the region. Since the 1994 update, the Comprehensive Plan has worked in 14 accordance with the Washington State Growth Management Act to protect resources and enhance quality of life. 15 The Plan does this by emphasizing the protection of Critical Areas and Natural Resource Lands, protecting Rural 16 Areas and rural character, and designating an Urban Growth Area where density and services should be concentrated. In addition, the Plan guides the County's work with its cities through the Countywide and 17 Multicounty Planning Policies in central Puget Sound. 18 19

About King County

22

Demographics

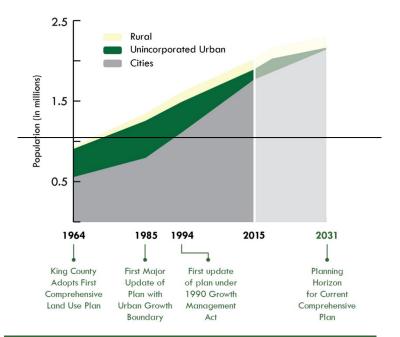

According to most recent available data (2015), King County has an estimated population of **2.05 million people**. Approximately **94%** of King County's residents live in urban areas and **6%** in unincorporated Rural Areas and Natural Resource Lands.

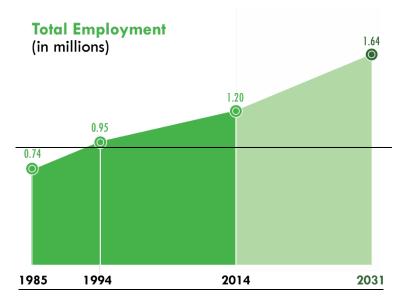

Over the past 20 years, King County has experienced a substantial 25% growth in its population. By 2031, King County is expected to grow to a population of 2.3 million, adding just over 250,000 residents to its overall population. Based on the Guiding Principles of the Comprehensive Plan, 95% of this growth is targeted to be absorbed by cities and 5% in unincorporated King County.

Economy

The substantial population growth that King County has experienced in recent years can largely be attributed to the area's thriving economy, which has fostered a massive influx of individuals adding to the County's overall workforce. King County comprises the majority of the Seattle Bellevue Tacoma metropolitan statistical area and consists of approximately 70,000 businesses providing nearly 1.2 million jobs.

The vast majority of King County's workforce is employed in the service sector, such as in the trade-transportation utilities, professional-businesses services, and education-health services industries. Overall, King County accounts for 50.3% of Washington's total payroll.

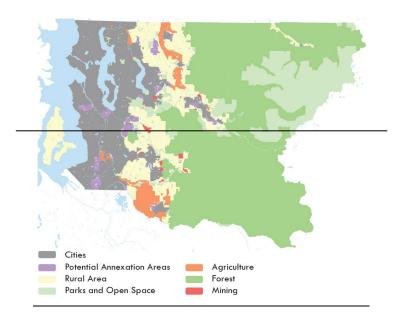

24

25

Geography

King County is characterized by beautiful scenery and geographic diversity, stretching from the Puget Sound in the west to the Cascade Crest in the east. There are 39 cities in the county, ranging in size from the 205-person town of Skykomish to the bustling metropolis of Seattle, with a population greater than 660,000. In addition, King County has a variety of working farm- and forestlands, as well as a vast open space network. Numerous water bodies, including rivers, lakes, and streams, provide a key resources and create valuable land assets and unique ecosystems along coastlines and river corridors.

Land Use

King County's total land area is 2,130 square miles, accounting for 3% of all land in Washington State. Through careful zoning and development regulations, King County manages its land use in a manner that ensures a high quality of life for its residents. Growth management in King County is largely implemented by directing development toward the Urban Growth Area, while protecting existing Rural Areas, open spaces, and Natural Resource Land. This map offers a general snapshot of land use across the county, which shows a higher concentration of urban land uses located towards the western Puget Sound area and more rural and resource uses located in the central and eastern parts of the county.

27 **Guiding Principles**

28

29 Moving Towards a Sustainable King County

- 30 King County's Comprehensive Plan has long been based on a vision of the county as a livable area with healthy,
- 31 thriving and dense urban communities; ample open space, forest and farm lands preserved for long term use; a
- 32 vibrant economy inclusive of numerous sectors; and a transportation system providing a variety of options. In
- 33 addition, the Plan reflects the 14 goals of the Growth Management Act and the goals of the King County Strategic
- 34 Plan. In 2015, King County adopted an update to its Strategic Plan, which aims to promote: mobility; health
- 35 and human services; economic vitality; safety and justice; accessible, affordable housing; a healthy
- 36 environment; and efficient, accountable regional and local government. The following principles, first adopted
- 37 in the 2012 Comprehensive Plan, are updated to reflect these long term goals and priorities.
- 38

1. Creating Sustainable Neighborhoods

Strive to promote sustainable neighborhoods and communities. Seek to ensure that the benefits and impacts of the county's activities are equitably distributed among all segments of the population.

2. Preserving & Maintaining Open Space and Natural Resource Lands

Pursue opportunities to preserve and maintain remaining high propriety forest, agriculture and other open space lands.

Directing Development Towards Existing Communities

Continue to support the reduction of sprawl by focusing growth and future development in the Urban Growth Area, consistent with adopted growth targets.

4. Providing a Variety of Transportation Choices

Continue to promote an efficient multimodal transportation system that provides residents with a range of transportation choices that respond to community needs and reduce impacts on the natural environment.

5. Addressing Health, Equity and Social and Environmental Justice

Seek to reduce health inequities and proactively address issues of equity, social and environmental justice when evaluating and implementing its land use policies, programs and practices.

6. Achieving Environmental Sustainability

Protect, restore and enhance the county's natural resources and environment, encourage sustainable agriculture and forestry, reduce climate pollution and prepare for the effects of climate change, including consideration of the inequities and disparities that may be caused by climate change.

New in the 2016 Plan

41 Major Update

42 The 2016 update is a major review of the Comprehensive Plan and, this year marks the 25th anniversary of the passage 43 of the Growth Management Act. This landmark legislation requires jurisdictions to designate an urban growth area, 44 within which growth would be encouraged, and adopt regulations to conserve resource land and environmentally 45 sensitive areas. By almost any measure, King County has been successful in realizing the broad goals of the Growth 46 Management Act. However, success has not been easy and, looking forward, the Comprehensive Plan needs to 47 respond to new challenges, such as equitable access to opportunity, reducing carbon pollution and responding to 48 climate impacts, addressing housing affordability and strengthening mobility. To address these, the following 49 updates are included in the 2016 Comprehensive Plan. 50

Land Use Policy Amendments

- Annexation policies revised to be more city-focused. Creates incentives for annexation by promoting joint planning, encouraging use of city regulations and negotiating on transferable development rights in Potential Annexation Areas (PAAs) where there is an Interlocal Agreement, and revisiting PAA map and Countywide Planning Policies with cities. Amendments in *Chapter. 2.*
- Rural Area policies strengthened to avoid incompatible uses. Avoiding placement of primarilyurban serving facilities in the Rural Area and Natural Resource Lands (consistent with the Growth Management Act), and removal of the mining site conversion demonstration program. Amendments in *Chapters 2, 3, 9* and *12.*
- Transfer of Development Rights policies enhanced for PAAs. TDRs can be negotiated in PAAs with annexing cities, and directing amenity funding into unincorporated urban areas receiving TDRs. Amendments in *Chapters 2 and 3*.

Equity and Health Policy Amendments

- Establishes a new chapter on Housing and Human Services. The new Chapter 4 consolidates and updates existing policies, and reflects new initiatives. It calls for new community development tools such as food innovation districts and residential local improvement districts, and commits to explore increasing housing density and affordable housing near businesses and transit.
- Increases emphasis on Equity and Social Justice. This includes further integration of Equity and Social Justice principles in policies throughout the plan.
- Reflects current Public Health-related programs topics include smoke free housing, healthy food retail, urban agriculture, the Local Food Initiative and farmsupportive programs. Amendments in Chapters 2 and 3.

Environmental Policy Amendments

- Increased focus on Climate Change in *multiple chapters*. Integration of relevant policies from the Strategic Climate Action Plan and the King County-Cities Climate Collaboration.
- Stormwater Management Program policies updated. Reflects the County's new municipal stormwater permit requirements, low impact development, sub-basin planning, infrastructure maintenance and retrofits and infrastructure mapping. Amendments in *Chapters 5* and *9*.
- New policies on Crude Oil Transport by Rail these define the County's role and interests in this emerging policy issue. Amendments in *Chapter 9*.
- Various environmental topics updated topics include noxious weeds, beaver exclusion and removal, enhanced landslide hazard policies, encouraging Green Building, and supporting a market-based price on carbon pollution. Amendments in *Chapters 3, 5, 7* and *9.*

Subarea Planning Program

 Initiation of a new Community Service Area Subarea Planning Program. Starting in 2016, this process will use the Community Service Areas as the planning geography. Amendments in *Chapter 11*.

General Amendments

- Changes to make the plan more user-friendly such as this Executive Summary, a more navigable Table of Contents, and a new Workplan section in *Chapter 12* that identifies major work items that start after adoption in 2016.
- Other updates throughout the plan including revised data, refined definitions, minor formatting enhancements, and updated references to partnerships and implementation plans.
- 51 These amendments, along with others included in the following chapters, are intended to help the
- 52 Comprehensive Plan remain responsive to the County's growth management challenges of today... and
- 53 tomorrow.

54 Plan Elements

55 Chapters of the Comprehensive Plan

Chapter 1

Regional Growth Management Planning

King County's growth management policies and regulations are consistent and work in coordination with the Growth Management Act, Multicounty and Countywide Planning Policies, and other technical plans.

Chapter 2 Urban Communities

With the majority of King County residents living and working in the urban area, this chapter includes policies that guide urban development with the goal of creating healthy, sustainable communities.

Chapter 3

Rural Areas and Natural Resource Lands

King County's Rural Area and Natural Resource Lands are crucial for sustaining quality of life for county residents into the future. This chapter focuses on protecting these assets from urban development, promoting sustainable economic development and supporting rural communities.

Chapter 4

Housing and Human Services

The availability of adequate and affordable housing has become one of the most pressing issues facing King County today. This chapter contains policies regarding the provision of housing and services for all residents.

Chapter 5 Environment

Environment

King County's natural environment comprises various unique and valuable assets. This chapter contains King County's approach to environmental protection, conservation, restoration and sustainability.

Chapter 6

Shorelines

Shorelines require particular focus and management given both their immense value and fragility. This chapter contains King County's Shoreline Master Program, which aims to protect and conserve this unique natural resource.

Chapter 7 Parks, Open Space & Cultural Resources

This chapter addresses King County's approach to conserving and maintaining its expansive open space system, which includes numerous local and regional parks, and trails, and its cultural resources and historic properties.

Chapter 8 Transportation

Recognizing that availability of safe, accessible and efficient transportation options has significant implications for the quality of life of all county residents, this chapter addresses how King County will distribute investments equitably.

Chapter 9

Services, Facilities & Utilities

The provision of services, facilities and utilities should be concentrated in areas of density and at levels that can support existing and future demand. This chapter addresses how such crucial infrastructure should be developed.

Chapter 10 Economic Development

In its commitment to foster a prosperous, diverse and sustainable economy, the County recognizes that it must support actions and programs promote the success of both businesses and the workforce.

Chapter 11

Community Service Area Subarea Planning

This chapter includes policies that recognize the unique land use characteristics of particular unincorporated communities, provides significant historical context and describes the new subarea planning program.

Chapter 12

Implementation, Amendments & Evaluation

This chapter describes how the policies should be implemented and monitored, major actions that will occur to implement the plan, the procedure for updating the plan and the role of zoning in the planning process.

Appendices

Integral to the vision and goals of the Comprehensive Plan are the detailed inventories, forecasts, financial plans and Urban Growth Area analysis required by the Growth Management Act. A set of technical appendices are adopted as part of the plan to meet Growth Management Act requirements.

Regulations

The King County Comprehensive Plan is implemented through adopted regulations, including the King County zoning Code and other Code titles. All development must meet the requirements of the Code.))

TRIBAL LAND ACKNOWLEDGEMENT

8	
9	King County is a part of a larger area that has been the traditional aboriginal
10	<u>territory of the Coast Salish peoples, who continue to live around the Salish</u>
11	Sea in what is now Washington State and the Canadian province of British
12	Columbia. These sovereign tribal nations enrich the region through
13	environmental stewardship, cultural heritage, and economic development.
14	In planning for growth over the coming decades, the King County
15	Comprehensive Plan seeks to respect and acknowledge the tribes' legacy
16	and present-day contributions through the creation of livable, equitable, and
17	sustainable communities for current and future generations.
18	

CHAPTER 1

REGIONAL GROWTH

MANAGEMENT

((2016)) 2024 King County Comprehensive Plan - ((updated December 6, 2022)) Adopted TBD Attachment A to Ordinance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555)) xxxxx (Proposed Ordinance 2023-0440)

1

King County has some of the most beautiful scenery in the country, some of the most productive farmlands, and one of the most vibrant economies. The 2016King County Comprehensive Plan establishes a vision that preserves this incredible diversity while continuing to acknowledge that residents want options as to where they live, work and play.

The Comprehensive Plan responds to requirements in state growth management planning laws that require jurisdictions to guide growth and development throughout the unincorporated areas of the county and establishes King County's position on major issues such as transportation, annexations, regional water supply and environmental protection.))

About King County 8

9 ((King County Geography))

10 King County, covering 2,130 square miles, ((is the size of the state of Delaware, but much more geographically diverse. It)) extends from Puget Sound in the west to 11 12 8,000-foot Mt. Daniel at the Cascade crest to the east. ((King County's various landforms 13 include saltwater coastline, river floodplains, plateaus, slopes and mountains, 14 punctuated with lakes and salmon streams. Lake Washington, covering 35 square miles, 15 and Lake Sammamish with 8 square miles are the two largest bodies of fresh water. 16 Vashon-Maury Island in Puget Sound and Mercer Island in Lake Washington provide 17 different island environments.

18

19 King County Jurisdictions

20 In 1994, when King County's first Comprehensive Plan under the Growth Management 21 Act was adopted, the county had 34 cities with 1,116,000 people. More than a third of 22 annual new residential development was occurring in unincorporated areas. Since 23 December 1994, five new cities have incorporated and numerous annexations have 24 occurred, shifting more than 220,000 people into city limits. As of 2015 , there are)) 25 With more than 2,320,000 people, it is the largest county in Washington State and the 12th largest in the nation. Within King County, 39 cities cover 418 square miles, or 20 26 percent of the county's total land area. The cities range in population ((ranging in)) size 27 from Seattle, with more than ((660,000)) <u>762,500</u> people, to Skykomish and Beaux Arts, 28 29 with fewer than 350 each. ((King County's 39 cities now cover 418 square miles, or 20% 30 of the county's total land area.)) Unincorporated King County((, the territory outside any 31 city, now)) has ((about 253,000)) <u>a population of 248,160</u> ((people)), or ((13%)) <u>11</u> 32 percent of the ((county's population)) total population of King County.

33

34 ((King County Demographics

35 In 2015, with more than 2,050,000 people, King County is the largest county in Washington State and the 13th largest in the nation. King County exhibits growing 36 diversity: more than one-third of the population is now persons-of-color. As of 2010, 37 38 65% of the population is non-Hispanic white, 15% Asian or Pacific Islander, 7.7% 39 African-American, 1% Native American and 8.9% Latino (2010 census data).)) Most of 40 King County's residents are of working age, with the largest share of residents (17 percent) being 30 to 39 years old. Approximately 20 percent (449,242) of King County's 41 42 population is 17 years old or younger. Unincorporated King County residents are older on average than King County residents. As of 2020, 54 percent of King County's 43 44 population is non-Hispanic White, 20 percent Asian, seven percent Black or African 45 American, one percent Native American, one percent Native Hawaiian or Pacific 46 Islander, and nine percent Hispanic or Latino/a/x. Unincorporated King County has 47 proportionately more White residents and American Indian/ Alaska Native residents 48 than King County as a whole.

- 49
- 50 The Washington State Office of Financial Management projects King County's population to grow 24.6 percent from 2,317,700 residents in 2022 to 2,887,137 in 2044. 51 52 Unincorporated King County's population is projected to grow more slowly at a rate of 53 7.3 percent, from 248,160 residents in 2022 to 266,301 in 2044. To meet the housing 54 needs of current and future residents, King County is required by the Growth 55 Management Act and the Countywide Planning Policies to plan for and accommodate 56 housing that meets the needs of moderate-, low-, very low-, and extremely low-income households, as well as emergency housing, emergency shelters, and permanent 57

supportive housing. The total number of new housing units needed in urban
 unincorporated King County by 2044 is 5,412. Additionally, 1,034 new emergency
 housing beds are needed by 2044 to meet temporary housing needs.

61 ((King County Housing Needs

62 The number of housing units in King County is growing faster than its population. The 63 2010 Census counted more than 851.000 houses, apartment and condominium units, 64 and mobile homes. The number of housing units has increased by 159,000 units (23%) since 1994. Household size has stabilized after declining in the 1970s and 1980s and is 65 66 now estimated at 2.39 persons per household - the same as in 2000. A slight decline 67 in household size is anticipated in coming years to about 2.26 in 2031.))The County 68 adopted development regulation changes with the 2024 Comprehensive Plan to create 69 sufficient zoning capacity to accommodate these housing needs and types. 70

71 ((King County Economy

72 King County is truly the economic engine of Washington State with more than 1.2 73 million workers employed at nearly 80,000 business firms, excluding sole 74 proprietorships. King County's \$87 billion payroll is 52% of Washington State's \$167 75 billion payroll and three-fourths of the four-county region's payroll. 76 77 King County has a cyclical economy, with booms and recessions. Since 2000, the region 78 has had two major recessions, a boom, and recovery. The result is that as of 2010 the 79 number of jobs was the same as it was in 2000: about 1.1 million. Since 2010, job 80 growth has been substantial. Manufacturing employment remains important, but, since 81 2006, growth has been in the trade, business services and information sectors. The 82 economy has diversified from its traditional aerospace and resource bases to high tech, 83 services and trade, both local and international. Given the county's complement of

- 84 healthy, innovative businesses and its industrial diversification, its future unemployment
- 85 rates should be lower than in the state and the nation.))

⁸⁶ II. King County Planning Framework

Prompted by residents concerned about sprawl, King County adopted its first comprehensive land use plan in 1964. Two decades later, the 1985 comprehensive land use plan was the first to identify an urban growth boundary line to limit urban growth to areas with the infrastructure needed for facilities and services. It also established policies to protect the Rural Area, conserve the natural environment, and designate resource lands for long-term agriculture and forest production.

- King County's first Comprehensive Plan under the <u>Washington</u> State Growth
 Management Act was adopted in 1994. The Growth Management Act directs the state's
 most populous and fastest_growing counties and their cities to prepare comprehensive
 land use plans that anticipate growth over a 20((-))-year horizon and provide for it in a
 managed manner.
- 99

100 There is a hierarchy of growth management planning in the county with consistency 101 between the levels. Some issues, such as the establishment of the Urban Growth Area, 102 are best decided at the countywide level, while others, such as the amount of 103 commercial space needed in a neighborhood, are best determined at the subarea plan 104 level. At a broader scale, the Growth Management Act requires the development of 105 Multicounty Planning Policies by ((the counties of)) King, Kitsap, Pierce, and Snohomish 106 <u>Counties</u>, as well as the development of Countywide Planning Policies by King County 107 and ((its)) the 39 cities and towns in King County. These ((documents are to be used

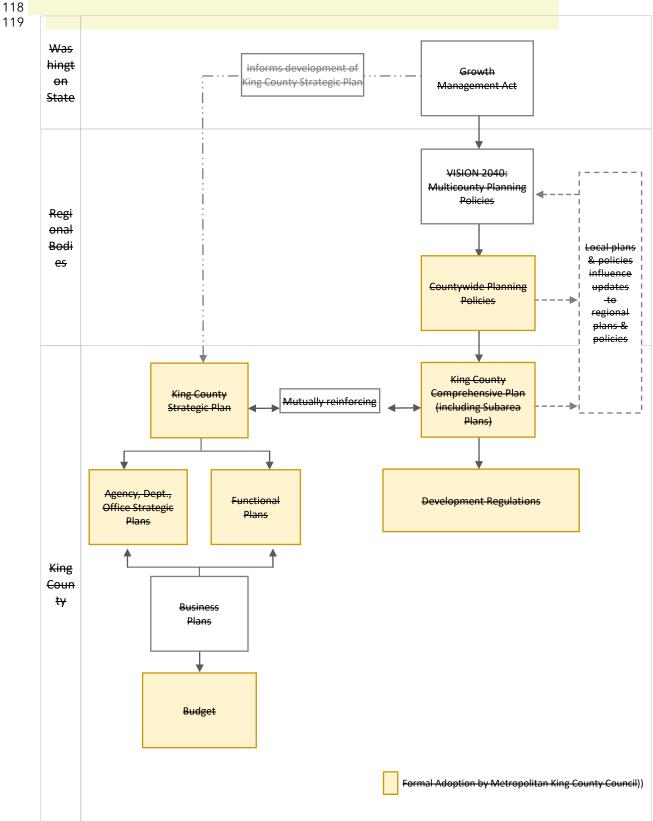

- 108 solely)) policies are used for establishing a countywide framework from which county
- 109 and city comprehensive plans are developed and adopted.

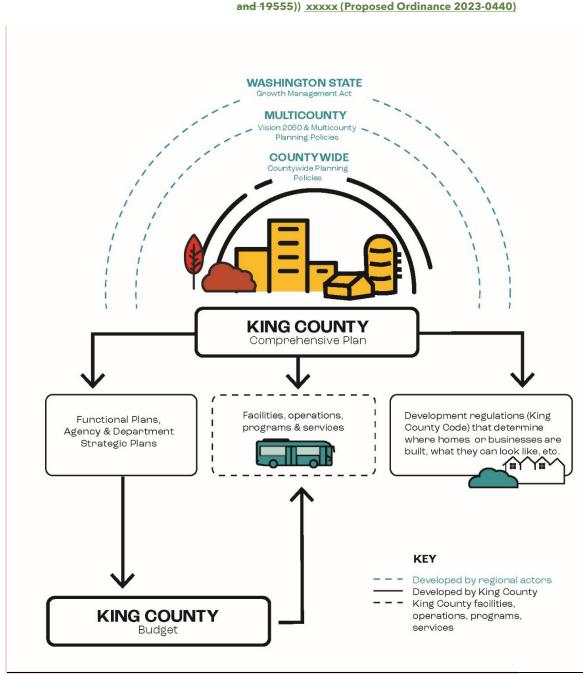

110 A. Planning Framework Hierarchy

111 ((These)) The planning processes and structures discussed in this section respond to

- 112 Growth Management Act, Multicounty Planning Policy, and Countywide Planning Policy 113 requirements and goals and reflect local circumstances and priorities. This complex
- 114 framework is illustrated in the following graphic.
- 115
- 116

117 ((Figure: Planning Hierarchy Relationship to Growth Management Planning

((2016)) <u>2024 King County</u> Comprehensive Plan - ((updated December 6, 2022)) <u>Adopted TBD</u> <u>Attachment A to</u> Ordinance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146,

120 121

122

123

<u>RP-101</u>

King County's planning should implement the County's equity and racial and social justice principles to improve residents' access to the determinants of equity.

124 ((A:))<u>B.</u> Public Participation in Planning

At the core of King County's planning is the goal of ((providing)) <u>advancing equitable</u> <u>outcomes that support</u> a high quality of life <u>for all residents</u>. This can only be achieved by actively ((soliciting public participation)) <u>and equitably engaging the public</u> to help shape ((its)) <u>County</u> plans, including strategic, comprehensive, functional, and subarea

- plans, and ((use)) by using these planning processes to strengthen communities and
 improve access to the Determinants of Equity.¹
- 131

Previous planning processes have excluded and harmed those who are Black, Indigenous, and other People of Color; immigrants; refugees; and households at or below 80 percent of area median income. King County is working to ensure that the perspectives of these historically underrepresented groups and those who have been disproportionally harmed by previous planning efforts are engaged by the County and centered throughout planning processes.

138

148

139 Additionally, while the Growth Management Act requires the coordination of local 140 plans, Indian tribes have historically not been included because of their independent sovereign status and unique rights to self-governance. However, King County also 141 142 recognizes that the lands addressed by the Comprehensive Plan are those that are the traditional territory of the Coast Salish peoples that have lived here since time 143 immemorial. Recognizing this, King County will coordinate with Indian tribes as part of 144 145 the County's planning processes and will seek opportunities to work together to 146 advance key issues, such as environmental stewardship, treaty fishing rights, and 147 protecting cultural heritage.

- 149 ((RP-101)) RP-102 King County shall strive to provide a high quality of life for 150 all of its residents by working with cities, special purpose districts, and residents to develop attractive, safe, and accessible communities at 151 152 appropriate urban and rural service levels; ((retain)) retaining rural 153 character and rural neighborhoods; planning for and accommodating 154 housing affordable to all income levels; ((support)) supporting 155 economic development; ((promote)) promoting equity and racial and 156 social justice; ((preserve and maintain)) preserving and maintaining 157 resource and open space lands; ((preserve)) preserving the natural 158 environment; and ((protect)) protecting significant cultural and historic 159 resources. 160
- 161 ((RP-102)) RP-103 In its planning processes, including the development, 162 update, and implementation of King County plans, ((King)) the County 163 shall use equitable engagement strategies to actively solicit public 164 participation from a wide variety of sources, particularly from 165 populations historically underrepresented or excluded from planning 166 processes ((in its planning processes, including the development, 167 update, and implementation of its plans)). 168
- ((RP-103)) <u>RP-104</u> King County shall ((seek comment from)) <u>coordinate with</u>
 Indian tribes during its planning processes <u>in a manner that respects</u>
 their sovereign status, promotes tribal self-determination and self governance, and honors past and present agreements.

¹ Defined in King County Code 2.10.210.

174((R-102)) <u>RP-105</u>King County ((will continue to support)) shall work with its175rural constituencies to sustain and enhance the diversity and richness of176((its rural communities and their distinct character by working with its177rural constituencies through its Community Service Areas program to178sustain and enhance the rural character of)) the179Resource Lands.

180 ((B.))<u>C.</u> Multicounty Planning

181 The Puget Sound Regional Council is a regional planning agency with specific 182 responsibilities under federal and state law for transportation planning, economic 183 development, and growth management. ((In April 2008, t)) The general assembly of the Puget Sound Regional Council ((adopted VISION 2040-containing)) adopts a 184 185 ((numeric)) Regional Growth Strategy and the Multicounty Planning Policies((as an 186 update to the earlier Vision 2020 regional plan)), which are most recently reflected in VISION 2050 ("VISION"). Multicounty Planning Policies address those issues that benefit 187 188 from greater consistency across jurisdictions and those that are of a ((countywide or)) 189 regional nature.

191 VISION ((2040)) is a regional strategy to accommodate the population and job growth 192 expected by ((2040)) 2050 in the four-county Puget Sound region. As an integrated, 193 long-range vision for maintaining a healthy region, promoting economic vitality, a 194 healthy environment, and well((-))being of people and communities, VISION ((2040)) 195 provides clear direction to regional, county, and local governments on topics such as 196 setting priorities for transportation investment, stimulating economic development, 197 planning for open space, making ((city and town)) local jurisdictions' centers more 198 suitable for transit and walking, and improving transportation safety and mobility. 199 ((VISION 2040 promotes a triple-bottom line approach to decision-making that seeks to 200 promote social, economic and environmental benefits in all projects, programs and 201 plans.))

202

190

203 As part of VISION ((2040)), the Regional Growth Strategy looks at how the region can 204 distribute ((forecast)) forecasted growth, primarily within the designated urban growth 205 area. The strategy is a description of a preferred pattern of urbanization that has been 206 designed to minimize environmental impacts, support economic prosperity, promote 207 adequate and affordable housing, improve mobility, and make efficient use of existing 208 infrastructure. The strategy provides regional guidance for counties(($_{7}$)) and cities (($_{and}$ 209 towns)) to use as they develop ((new)) local population and employment growth targets 210 and update local comprehensive plans.

211 212 ((RP-104)) <u>RP-106</u> King County's planning ((should)) shall include 213 multicounty, countywide, and subarea levels of planning. Working 214 with planning partners, such as Indian tribes, residents, special purpose 215 districts, and cities ((as planning partners)), the ((c))County shall strive 216 to balance the differing needs identified across or within plans at these 217 ((geographic)) levels.

218 ((C.)) <u>D.</u> Countywide Planning

State law requires that planning be coordinated on a countywide level, and that ((the)) King ((t))County itself adopt a comprehensive plan to regulate those areas for which it has direct responsibility. The Countywide Planning Policies are required by the state Growth Management Act and provide a countywide framework to coordinate local comprehensive plans and implement VISION ((2040)). King County and all cities ((and towns of)) in King County are responsible for ensuring that their respective

- 225 comprehensive plans are consistent with and implement the Countywide Planning226 Policies.
- 227

228 The ((Growth Management Planning Council is the)) formal body charged with 229 developing the Countywide Planning Policies ((and then sending a recommendation to 230 the King County Council for its review and approval. The Growth Management Planning 231 Council)) is the Growth Management Planning Council, which is a representative body 232 consisting of elected officials from King County, Seattle, Bellevue, the Sound Cities 233 Association, and ((the City of Bellevue)) special purpose districts.((²)) <u>Recommended</u> 234 Countywide Planning Policies are sent to King County for its review and approval and 235 then provided to the cities for ratification.

237 ((The Countywide Planning Policies were first adopted by King County and ratified by 238 the cities within the county in 1992. In response to VISION 2040, the county and the 239 cities within the county approved a major overhaul and update to the Countywide 240 Planning Policies in 2013. These revised)) The Countywide Planning Policies implement 241 ((the regional and countywide vision)) <u>VISION</u> by providing a countywide framework to 242 plan for job growth and new development, including housing, commercial, institutional, 243 and other non-residential uses. The Countywide Planning Policies provide broad 244 direction to individual jurisdictions' comprehensive plans, including the King County 245 Comprehensive Plan. The goals of the policies include: promoting a compact and 246 centers-focused growth pattern that uses land and infrastructure efficiently, protecting 247 the Rural Area and Natural Resource Lands, providing affordable housing throughout 248 the county, and coordinating the protection and restoration of the natural environment 249 in King County.((³)) 250

- ((RP-105)) <u>RP-107</u> King County ((should)) <u>shall</u> work with the Growth Management Planning Council to adopt Countywide Planning Policies that support ((annual ratifications to)) allocated housing and employment growth targets for cities and the county<u>, approve</u> <u>designations of countywide centers, and address other countywide</u> <u>planning topics</u>.
- 258((RP-106)) RP-108((Except for Four-to-One proposals,)) King County shall not259amend the Urban Growth Area prior to the Growth Management260Planning Council ((taking action)) making a recommendation on the261proposed amendment to the Urban Growth Area.
- 262263((RP-107)) RP-109King County shall not forward to the Growth Management264Planning Council for its recommendation any proposed amendment to265the Urban Growth Area unless the proposal ((was)) is:
 - a. Included in the scoping motion for a King County Comprehensive Plan update;
 - b ((An)) Subject to an area zoning and land use study ((of the proposal)) that was included in the public review draft of a proposed King County Comprehensive Plan update; or
 - Subjected to the hearing examiner process for site specific map amendments as ((contemplated)) <u>established</u> by the King County Code.

^{((&}lt;sup>2</sup> As amended by Ordinance 17687.

³ As amended by Ordinance 17687.))

275((RP-108)) RP-110King County shall implement the Countywide Planning276Policies through its Comprehensive Plan and ((through)) Potential277Annexation Area, pre-annexation, and other interlocal agreements with278((its)) cities.

279 ((D. Sub-Regional)) <u>E. Subregional</u> Planning and 280 Partnerships

King County engages with partners in subareas of the county in ((sub-regional)) subregional planning programs and partnerships that are related to the Comprehensive Plan. These activities are guided by the policies in the Comprehensive Plan as well as the other components of the overall King County ((P))<u>p</u>lanning ((F))<u>f</u>ramework noted in this chapter. ((Some key activities are noted below.))

287 ((RP-109)) RP-111 King County should establish and/or participate in regional 288 and subregional partnerships to advance the objectives of the 289 Comprehensive Plan((, such as: 290 a. The King County Cities Climate Collaboration (the "K4C") to 291 confront climate change, 292 b. The Puget Sound Regional Council's Regional Transit Oriented 293 **Development Program to advance transit-oriented development** 294 around transit stations and hubs, 295 The Eastside Rail Corridor Regional Advisory Council, or successor с. 296 groups, to support a vision that includes dual use (recreation trail 297 and public transportation) and multiple objectives, consistent with 298 its federal railbanked status, and 299 d. The Regional Code Collaboration to collaborate on development of 300 and updates to green building codes. 301 302 These programs are described in greater detail, and where appropriate additional 303 policies added, in the relevant subsequent chapters of the Comprehensive Plan.)) 304 305 When large, mixed-use developments with more than 50 dwelling RP-112 306 units are proposed in cities adjacent to the Rural Area or Natural 307 Resource Lands King County shall, upon notification from the city, 308 coordinate with the permitting city during the development review 309 process to avoid and mitigate impacts on county services and facilities, 310 water resources, and the surrounding Rural Area and Natural Resource 311 Lands. 312 313 ((The cities in King County's rural area)) Cities in the Rural Area are incorporated areas substantially surrounded by the Rural Area and whose local governments are involved in 314 315 the region's planning processes on ((an equal legal basis with the suburban cities, 316 Bellevue and Seattle)) the same basis as any other city in the County. Cities in the Rural 317 Area have established Potential Annexation Areas to accommodate growth. The 318 ((c))<u>C</u>ities in the Rural Area are Black Diamond, Carnation, Duvall, Enumclaw, North 319 Bend, Skykomish, and Snoqualmie. 320 321 ((The Growth Management Act stipulates that Cities in the Rural Area and their Potential 322 Annexation Areas are to be treated as part of the Urban Growth Area. The Countywide 323 Planning Policies also provide for urban land uses and densities and urban services in 324 those locations.)) Excessive growth in Cities in the Rural Area ((and in Rural Towns)), 325 however, may create pressure for extending urban services (for example, sewers) across 326 the Rural Area or Resource Lands, ((may)) increase conversion pressure on nearby 327 Resource Lands, and adversely affect rural character. ((Therefore, King County views

328 Cities in the Rural Area as qualitatively different from the Urban Growth Area as a whole,
 329 even though they may provide significant opportunities for residential or employment
 330 growth within their boundaries.

331

338

King County has worked with the Cities in the Rural Area to establish Potential
 Annexation Areas to accommodate growth. These areas are shown as part of the Urban
 Growth Area on the Comprehensive Plan Land Use Map at the end of Chapter 1,
 Regional Growth Management Planning. Additionally, the county is working with these
 cities on individual economic development strategies and options, as well as regional
 economic and tourism opportunities.

R-510)) <u>RP-113</u> ((The Cities in the Rural Area and their Potential Annexation Areas
are part of the overall Urban Growth Area for purposes of planning land
uses and facility needs.)) King County should work with Cities in the
Rural Area and coordinate through partnerships, such as the Growth
Management Planning Council, to:
a. ((e))Encourage the provision of affordable housing((, to));
b. ((m))Minimize the impacts of new development on the surrounding
Rural Area((s)) and Natural Resource Lands <u>:</u>
c. Avoid the conversion of rural lands into commercial uses and the
<u>creation of pressure to extend or expand urban services,</u>
infrastructure, and facilities, such as roads or sewer, across or into
the Rural Area and Natural Resource Lands; and
<u>d. ((to p))P</u> lan for growth consistent with long-term protection of
significant historic resources((,)) and the surrounding Rural Area
and Natural Resource Lands.

354 ((E.)) <u>F.</u> Comprehensive Planning

355 ((The 2016 update is the fifth major review of the King County Comprehensive Plan.)) In 356 accordance with the Growth Management Act, ((it)) the Comprehensive Plan is 357 designed to manage growth so that development is directed to ((designated)) urban areas and away from the Rural Area and Natural Resource Lands. The Growth 358 359 Management Act also requires King County to designate and protect critical areas and 360 commercially significant forestry, agriculture, and mining areas. The Growth Management Act requires a comprehensive plan to adhere to a set of ((fourteen)) goals 361 362 and to include ((the following)) mandatory plan elements((+)), such as land use, housing, capital facilities, utilities, rural, shorelines, and transportation elements. The ((King 363 364 County)) Comprehensive Plan provides a legal framework for managing growth and 365 making decisions about land use in unincorporated King County. ((Public and private 366 agencies, property owners, developers, community groups and King County staff use 367 the Comprehensive Plan in several ways.))

368

369 The Comprehensive Plan ((provides guidance to)) <u>guides ((c))C</u>ounty officials ((for 370 decisions)) on proposals such as zoning changes and developments((. It also gives the 371 public direction on the county's position on)), proposed changes in ((land use or 372 zoning,)) environmental regulations, or broader policy issues. ((The Plan)) It also serves 373 as a framework for other plans and regulations such as subarea plans and the King 374 County Code that govern the location and density of land uses in unincorporated King 375 County. The <u>Comprehensive</u> Plan provides a basis for decisions about public spending on facilities and services. Finally, ((the Plan)) it presents other agencies, such as cities 376 377 and special purpose districts, with King County's position on large-scale matters such as 378 annexation, use of resource lands, environmental protection, service provision, and 379 others.

381((RP-110)) RP-114King County's planning should strengthen communities by382addressing all the elements, resources, and needs that make a383community whole, ((including:)) such as housing affordable to all384income levels, economic growth and the built environment,385environmental sustainability, regional and local mobility, health and386human potential, and justice and safety.

387

396

401

411

- 388 King County shall integrate mandated responses to the ((RP-111)) <u>RP-115</u> 389 listings under the Endangered Species Act into future planning, 390 economic development efforts, and resource management programs to 391 achieve, where consistent with the Endangered Species Act, a balance 392 between environmental, social, and economic goals and objectives. 393 King County shall collaborate with others to conserve species and their 394 habitats in order to prevent future listings under the Endangered 395 Species Act.
- 397((RP-112King County shall incorporate approaches to reduce greenhouse gas
emissions and prepare for the impacts of climate change into its land
use and transportation planning, economic development efforts, and
natural resource management.
- 402 RP-113)) RP-116 The ((Comprehensive Plan)) Land Use Map is adopted as 403 part of ((this)) the Comprehensive Plan. ((It)) The Land Use Map shall 404 depict((s)) the ((Urban Growth Area,)) Urban Growth Area 405 ((B))boundary((,)); land use designations for unincorporated urban 406 areas, the Rural Area, and Natural Resource Lands; and other ((land 407 uses)) appropriate information. The Land Use Map shall be maintained 408 in the King County Geographic Information System, and the Land Use 409 Map at the end of this chapter generally represents the official 410 ((Comprehensive Plan Land Use M))map.
- ((Property Rights: The Growth Management Act requires cities and counties to balance a variety of goals in the implementation of growth management. One of the goals of Growth Management Act is to provide for the protection of private property rights in relation to the comprehensive planning process of the county. In support of this goal, King County undertakes a review process designed to assess its regulatory and administrative actions to avoid unconstitutional takings of private property.
- 419
420RP-114)) RP-117
county regulatory and administrative actions so as to)) avoid
unconstitutional takings of private property in planning, programming,
and operations.421
422and operations.
- 423 ((H. Comprehensive Plan Review and Amendment))

424 The Growth Management Act allows updates to comprehensive plans once each year. 425 In King County, the annual update allows limited changes. The ((eight)) County's 10-426 year update, which aligns the timing with Growth Management Act periodic review and 427 update requirements, allows substantive changes to policies and amendments to the 428 Urban Growth Area boundary ((to be proposed and adopted)). A smaller((=)) range of 429 substantive changes to policies and amendments to the Urban Growth Area boundary 430 may also be considered at the midpoint of the ((eight)) <u>10</u>-year update schedule, ((but 431 only)) if authorized by motion. These provisions are detailed in Chapter 12, 432 Implementation, Amendments, and Evaluation, and King County Code ((Title)) Chapter 433 20.18. ((Additional information and policies are found in Chapter 12, Implementation, 434 Amendments and Evaluation. 435

As part of)) Prior to its review of the Comprehensive Plan, King County, together with 436 437 ((its)) cities, ((published)) adopts the ((2007)) King County Urban Growth Capacity Report (previously known as the Buildable Lands Report). ((and updated it in 2014. 438 439 Ratified in 2015, t))The report fulfills the requirements of the Growth Management Act 440 for the ((-)) county and ((its)) cities to evaluate <u>patterns of development</u> every ((eight)) 10 441 years to determine whether there is sufficient suitable land to accommodate the 442 projected countywide population. The ((Buildable Lands)) Urban Growth Capacity 443 Report ((represents a midcourse check on)) is one of the methods to evaluate the 444 achievement of Growth Management Act goals. The focus of the evaluation is on the 445 designated urban areas of King County and growth targets for those areas as 446 established in the Countywide Planning Policies.

447

 ((Based on data from 2006 through 2011, the 2014 Buildable Lands Report evaluated the actual housing constructed, densities of new residential development, and the amount of actual land developed for commercial and industrial uses within the Urban Growth Area. Based on that data, it projected that there is a sufficient amount of land within the Urban Growth Area to accommodate housing, commercial and industrial uses through 2031 and beyond. Additional discussion and policies can be found in Chapter 12, Implementation, Amendments and Evaluation.

456 **Docket Request Process:**)) Another key element of the Comprehensive Plan review 457 and update process is the Docket ((R))<u>r</u>equest ((P))<u>p</u>rocess. As required by the Growth 458 Management Act, King County maintains an annual docket for recording comments on 459 suggested changes to the King County Comprehensive Plan and associated 460 development regulations from any interested person, such as permit applicants, residents, and staff of other jurisdictions or agencies. The process and requirements are 461 462 detailed in ((the)) King County Code ((at)) Chapter 20.18((-140)). The County reviews all 463 requests, communicates with docket submitters, ((and)) makes County Executive 464 recommendations to the County Council ((by the first day of December. The docket 465 report includes an Executive recommendation for each item)), and provides information 466 on requests and recommendations to the public.

467 ((F.)) <u>G.</u> Subarea Planning

((Community Service Area)) Subarea plans, ((as well as other community plans and basin 468 469 plans)) such as but not limited to the Subarea Plans in Chapter 11, Subarea Planning, 470 focus the policy direction of the Comprehensive Plan to a smaller geographic area, 471 (({See Chapter 11 Community Service Area Subarea Planning, for information on large- 472 scale subarea land use plans for rural and urban unincorporated areas in King County). 473 Smaller-scale- studies, known as area zoning and land use studies, per King County 474 Code,⁺ are focused on adoption or amendment of land use and zoning maps on an area 475 wide basis rather than the broad range of topics that are addressed in a full subarea 476 plan. Examples of subarea plans and area zoning studies include the Duwamish Coalition Project, White Center Action Plan, Fall City Subarea Plan, the East Redmond 477 Subarea Plan, and planning efforts within a watershed or basin. Development of 478 479 subarea plans are guided by the following policy as well as other applicable policies of 480 the Comprehensive Plan and provisions in the King County Code.⁵

- 480 481
- The passage of Ordinance 17319 and 17415 in 2011 replaced the Unincorporated Area
 Councils with the Community Service Area geography. As described more fully in

^{((*} Per King County Code 20.08.030-Area Zoning))

^{((&}lt;sup>5</sup> Per King County Code 20.08.060-Subarea plan))

- 484 Chapter 11, Community Service Area Subarea Planning, this geography will be used as
 485 the guiding structure for subarea planning starting in 2015.
- 486

487 To the extent practicable, subarea plans in unincorporated King County should be 488 developed in close coordination between the community and county staff that may have 489 a lead or partial role in implementing the plans to ensure clearer expectations on how 490 and whether community recommendations in a subarea plan are feasible for 491 implementation and within what type of timeframe. This type of coordination, supported 492 by the financial analysis noted in the following policy, is critical to all subarea and 493 functional plans in order to evaluate the resources required and the time frame 494 necessary for full implementation. Plan alternatives and costs should be clearly 495 understood and plans should be financially achievable.

496

497 In addition to subarea plans and area zoning and land use studies, King County's land 498 use planning also includes other planning processes. These include Comprehensive 499 Plan policy directed subarea studies, such as the establishment of new community 500 business centers, adjusting Rural Town boundaries, or assessing the feasibility of zoning 501 reclassifications in urban unincorporated areas. Subarea studies are focused on specific 502 areas of the County, but do not look at the range of issues that a subarea plan would 503 include. In some cases, an area zoning and land use study may suffice to meet the 504 requirements of the policies. In addition, there are Site Specific Land Use Amendments⁶ 505 and Zone Reclassifications,⁷ which are site specific processes that involve County staff 506 review and recommendations, a public hearing and recommendation by a Hearing 507 Examiner and a decision by County Council. These must be consistent with the 508 Comprehensive Plan or be proposed with a Plan update.

509 G.)) <u>H.</u> Functional Planning

510 Functional plans are detailed plans for facilities and services ((and also include)), as well 511 as action plans and programs for other governmental activities. Some functional plans 512 are operational or programmatic and guide daily management decisions. Others 513 include specific details of facility design and location. <u>Functional</u> ((P))plans ((that guide 514 specific siting of facilities)) help implement and must be consistent with the 515 Comprehensive Plan. ((Functional plans are prepared by King County, independent 516 special purpose districts or other public and private agencies.)) Examples of functional 517 plans ((in King County)) include((: the Strategic Climate Action Plan, Juvenile Justice 518 Operational Master Plan, Open Space Plan, Regional Wastewater Services Plan, 519 Strategic Plan for Road Services, and Strategic Plan for Public Transportation)) the King 520 County Open Space Plan and King County Flood Hazard Management Plan. 521

522 ((Capital improvements are important components of functional plans. Capital facilities 523 and spending on improvements and new facilities are closely linked to availability of 524 funds. Functional plans must identify costs and services of needed facilities and 525 distinguish between improvements needed for new growth verses those needed to 526 support existing public health and welfare needs. 527

^{((&}lt;sup>6</sup> Per King County Code 20.08.170-Site Specific Land Use Amendments))

^{((&}lt;sup>7</sup> Per King County Code 20.08.160-Reclassification))

528	RP-117)) <u>RP-11</u>	8 Functional plans for facilities and services ((should)):
529	а.	Shall ((B))be consistent with the Comprehensive Plan and subarea
530		((and neighborhood)) plans;
531	b.	((Define required)) Shall be consistent with service levels that are
532		appropriate for the Urban Growth Area, Rural Area, and Natural
533		Resource Lands;
534	с.	<u>May</u> ((P))provide standards for location, design, and operation of
535		public facilities and services;
536	d.	Should ((S))specify adequate, stable, and equitable methods of pay
537		for public facilities and services;
538	е.	<u>May</u> ((B))be the basis for scheduling needed facilities and services
539		through capital improvement programs; and
540	f.	<u>Should</u> ((P))plan for maintenance of existing facilities.
541		
542	((RP-118 Exi	sting functional plans that have not been adopted as part of this
543	Con	mprehensive Plan shall remain in effect and continue as official
544	cou	inty policy until reviewed and revised to be consistent with the
545	Con	mprehensive Plan, or until repealed or replaced. In case of conflict
546		inconsistency between applicable policies in existing community
547	and	functional plans and the Comprehensive Plan, the Comprehensive
548	Pla	n shall govern.
549		
550	RP-119 Kin	g County shall prepare functional plans to identify countywide
551	faci	ility and service needs and define ways to fund these consistent with
552	the	King County Comprehensive Plan. Independent special purpose
553	dis	tricts and other public agencies also prepare functional plans that
554	sho	ould be considered by King County.))

555 <u>I. Other Planning</u>

There are also other plans not adopted as part of the Comprehensive Plan, such as 556 557 implementation plans and strategic plans, that King County relies on to help implement 558 and inform the Comprehensive Plan. These plans are typically focused on a specific 559 policy area, able to provide more detailed planning, and updated on a more frequent 560 basis than the Comprehensive Plan. Given this, sometimes those plans are updated to be consistent with Comprehensive Plan updates, and sometimes the Comprehensive 561 562 Plan is updated to help advance new initiatives and desired outcomes originating from those other planning efforts. Examples of these plans include the Strategic Climate 563 Action Plan, the Strategic Plan for Road Services, the King County Metro Strategic Plan 564 565 for Public Transportation, and the King County International Airport Strategic Plan. The 566 County also uses issue-specific studies and reports to inform and help implement 567 Comprehensive Plan updates, such as area zoning and land use studies, outcomes of 568 Comprehensive Plan Work Plan action items (see Chapter 12, Implementation, 569 Amendments, and Evaluation), and responses to King County budget provisos.

570 ((I. Managing Performance

As part of a growing national movement at all levels of government, King County is 571 572 embracing performance measurement and management. Performance measurement is 573 measuring and reporting performance data while performance management is using 574 performance information to inform management decisions. Successful organizations 575 rely on performance management to inform leadership about how well they are 576 reaching their goals and where improvements can be made. With adoption of the King 577 County Strategic Plan (discussed below), King County committed to the development of 578 a unified and meaningful measurement framework to manage performance at all levels 579 of government.

580 581 582 583	Countywic	es in the King County Strategic Plan ensure that appropriate monitoring of the le Planning Policies and Comprehensive Plan will contribute to this ent framework. King County is carrying out performance management to:
584	•— Er	isure county goals are being met;
585		prove county services, where necessary;
586		rve as both a local and a regional government;
587	• ln	crease transparency with the public;
588	• In	crease use of data for more informed public discussion and decision-making;
589	• In	crease accountability at all levels of government; and
590	• In	crease attention to effective performance measurement as called for in the
591	Ki	ng County Strategic Plan.
592		
593 594 595 596	RP-120	King County will measure and assess agency performance and the achievement of Countywide Planning Policies and Comprehensive Plan goals.
597	RP-121	Using best management practices, King County shall develop
598		assessment and review tools to ensure that health, equity, social and
599		environmental justice impacts are considered in the development,
600		implementation and funding of county projects and programs.
601	A '.'	
602		information and provisions related to monitoring can be found in Chapter
603	12, Implen	nentation, Amendments and Evaluation.

604 J. King County Strategic Plan

In 2010, the King County Council adopted the "King County Strategic Plan, 2010-2014:
 Working Together for One King County" through Ordinance 16897. The Strategic Plan
 was developed to serve as the framework for countywide priority setting, business
 planning, budget development, resource allocation, and leadership and managerial
 accountability. The Strategic Plan represented a significant countywide effort that
 obligated all departments and agencies to work together as a single county
 government.

In 2015, the King County Council passed Motion 14317, which adopted new goals and
 initiated an update of the Strategic Plan. Motion 14317 outlines goals and guiding
 principles that address topics in the Growth Management Act and other locally-defined
 priorities. These are as follows:

618 King County's Goals

- Mobility: Deliver a seamless network of transportation options to get people where
 they need to go, when they need to get there.
- Health and Human Services: Improve the health and well-being of all people in the community.
- Economic Vitality: Increase access to family wage job opportunities throughout the county.
- Safety and Justice: Provide for a safe and just community through proactive law
 enforcement and an accessible and fair justice system, while implementing
 alternatives to divert people from the criminal justice system.
- 628 Accessible, Affordable Housing: Increase access to quality housing that is

- 629 affordable to all.
- Healthy Environment: Preserve open space and rural character while addressing
 climate change.
- Efficient, Accountable Regional and Local Government: Ensure that County
 government operates efficiently and effectively and is accountable to the public.
- 635 *Guiding Principles that Direct our Efforts*
- Equitable and Fair: Address the root causes of inequities to provide for equal
 access to opportunities for all.
- Financially Sustainable: Align funding, policy and operational goals of King County
 government.
- Regionally Collaborative: Engage with partners, stakeholders, and public and private organizations to achieve goals.
- Ouality Local Government: Provide effective, efficient local governance and services to unincorporated areas.
- 645RP-122Planning in King County shall be consistent with the King County646Strategic Plan by:647a. Encouraging vibrant, economically thriving and sustainable648communities;649b. Enhancing the county's natural resources and the environment;650c. Supporting safe communities; and

d. Providing equitable opportunities for all individuals.))

651

652

634

J. Four-to-One Program

653 ((While urban separators complement the regional open space system by helping to 654 define urban communities, t))The King County Four-to-One Program provides an 655 opportunity to add land to the regional open space system through the dedication of 656 permanent ((open space)) <u>natural areas</u>. The Four-to-One Program has been 657 recognized as an innovative land use technique under the Growth Management $Act((^{\theta}))$ 658 and for King County, the purpose of the program is to create a contiguous band of 659 ((open space)) <u>natural areas</u>, running ((north and south)) along the ((main)) Urban 660 Growth Area ((B))boundary. Since its inception in 1994, just over ((1,300)) <u>360</u> acres 661 have been added to the Urban Growth Area while nearly ((4,500)) 1,300 acres of permanent ((open space)) natural areas have been conserved through the Four-to-One 662 663 Program. Changes to the Urban Growth Area through this program are processed as 664 $((\pm))$ and $((\oplus))$ use ((A)) amendments to the King County Comprehensive Plan((-, subject to665 the provisions in King County Code chapter 20.18)).

666 ((U-185)) RP-119 Through the Four-to-One Program, King County shall 667 668 ((actively pursue dedication of open space along)) dedicate natural 669 areas adjacent to the original Urban Growth Area ((line)) boundary, 670 which was adopted in the 1994 King County Comprehensive Plan. 671 Through this program, ((one acre of)) Rural Area zoned land may be 672 added to the Urban Growth Area in exchange for ((a)) dedication ((to 673 King County)) of at least four ((acres)) times the size of permanent 674 ((open space)) natural area. ((Land added to the Urban Growth Area 675 for drainage facilities that are designed as mitigation to have a natural

^{((&}lt;sup>a</sup> 36.70A.070 (5)(b) and .090 Revised Code of Washington))

	looking visual appearance in support of its development, does not
	require dedication of permanent open space.))
RP-120	The Four-to-One Program shall not result in more than a total of 4,000
	<u>acres being added to the Urban Growth Area.</u>
(U-189)) <u>F</u>	<u>RP-121</u> Land added to the Urban Growth Area under the Four-to-
	One Program shall:
	a. Be limited to residential development and have a minimum density
	of ((four)) <u>eight</u> dwellings per acre <u>;</u> ((and shall be physically
	contiguous to the original Urban Growth Area, unless there are
	limitations due to the presence of critical areas, and shall be able to
	be served by sewers and other efficient urban services and
	facilities; provided that such sewer and other urban services and
	facilities shall be provided directly from the urban area and shall
	not cross the open space or Rural Area or Natural Resource Lands.))
	b. Locate ((Đ))drainage facilities ((to support the urban development
	shall be located)) and roads within the urban portion of the
	development((.)) <u>; and</u>
	<u>c. ((In some cases, lands must m))M</u> eet affordable housing
	requirements <u>.</u> ((under this program. The total area added to the Urban Growth Area as a result of this policy
	shall not exceed 4,000 acres.
	shan not exceed 4,000 acres.
	100 King County shall evolute Four to One group code for both multi-
- 100)) <u>Kr</u>	2-122 King County shall evaluate Four-to-One proposals for both quality
	of ((open space)) <u>the natural area</u> and feasibility of urban development <u>and annexation</u> . The highest quality proposals shall be recommended
	for adoption as amendments to the Urban Growth Area. ((Lands
	preserved as open space shall retain their Rural Area designations and
	should generally be configured in such a way as to connect with open
	space on adjacent properties.
	space on adjacent properties.
J-187	King County shall use the following criteria for evaluating open space
-107	in Four-to-One proposals:
	a. Quality of fish and wildlife habitat areas;
	b. Connections to regional open space systems;
	c. Protection of wetlands, stream corridors, ground-water and water
	bodies;
	d. Unique natural, biological, cultural, historical, or archeological
	features;
	e. Size of proposed open space dedication and connection to other
	open space dedications along the Urban Growth Area line; and
	f. The land proposed as open space shall remain undeveloped,
	except for those uses allowed in U-188.))
RP-123	Lands preserved under the Four-to-One Program shall:
	a. Be reserved as natural areas, or for passive recreation, farming, or
	forestry. Trails or active recreation may be allowed if located on a
	small portion of the natural area and are compatible with the site's
	habitat values and functions:
	b. Retain their Rural Area designations; and
	c. Generally be configured in such a way as to connect with open
	space on adjacent properties.

700	//11.4.0.0	
730	((U-188	King County shall preserve the open space acquired through the Four-
731		to-One Program primarily as natural areas, passive recreation sites or
732		resource lands for farming or forestry. King County may allow the
733		following additional uses only if located on a small portion of the open
734		space, provided that these uses are found to be compatible with the
735		site's natural open space values and functions such as those listed in the
736		preceding policy:
737		a. Trails;
738		b. Compensatory mitigation of wetland losses on the urban
739		designated portion of the project, consistent with the King County
740		Comprehensive Plan and the Critical Area Ordinance; and
741		c. Active recreation uses not to exceed five percent of the total open
742		space area. Support services and facilities for the active recreation
743		uses may locate within the active recreation area only, and shall not
744		exceed five percent of the active recreation area. An active
745		recreation area shall not be used to satisfy the active recreation
745		requirements for the urban designated portion of the project as
740		required by King County Code Title 21A.
		required by King County Code Thie 2 TA .
748		
749	0-190)) <u>RP</u>	<u>-124</u> ((King County shall amend the Urban Growth Area)) <u>Amendments</u>
750		to add Rural Area lands to the Urban Growth Area ((consistent with
751		Policy U-185 during the)) through the Four-to-One Program may be
752		made as part of an annual, midpoint, or 10-year Comprehensive Plan
753		((amendment process)) <u>update</u> . ((Open space dedication shall occur at
754		final formal plat recording.)) If the applicant decides not to pursue
755		urban development or fails to record the final plat prior to expiration of
756		preliminary plat approval, the urban properties shall be restored to a
757		Rural Area land use designation and associated zoning during the next
758		((review of)) <u>update to</u> the King County Comprehensive Plan.
759		
760	<u>RP-125</u>	For Four-to-One proposals adjacent to an incorporated area,
761		development proposals and/or activities shall not be allowed until the
762		land added to the Urban Growth Area is annexed into a city. A tri-party
763		agreement with the property owner, city, and King County shall be
764		required, to be transmitted and adopted concurrent with the Four-to-
765		One proposal.
766		

⁷⁶⁷ III. King County Guiding Principles

768 The Comprehensive Plan is based on the principles of creating sustainable 769 neighborhoods, preserving open space, farmland, and rural communities, directing 770 development toward existing communities, <u>addressing climate change</u>, and providing a 771 variety of transportation choices. These guiding principles are consistent with the 772 ((Washington State)) Growth Management Act and guide funding decisions, creation 773 and operation of programs and projects, and how the County interacts with local, state, 774 and federal agencies. The impact of implementing these principles has been to:

775	 create higher urban densities by directing ((96%)) <u>99 percent</u> of the growth into
776	the urban core((s)) of the region (Urban Growth Area),
777	 preserve irreplaceable resource lands, parks, and critical areas,
778	 improve mobility by making transit service more accessible,
779	 sustain a vibrant economy,
780	 serve in the capacity of both a local and a regional government, <u>and</u>
781	 improve water quality and manage stormwater runoff((,
782	 improve air quality and particulate emissions, and

783 • reduce per-capita greenhouse gas emissions)).

784 Guiding Principles

785 A. Creating Sustainable Neighborhoods

786 Neighborhoods are the backbone of any community. Creating sustainable neighborhoods may mean using incentives, programs, or regulations to help create 787 788 new neighborhoods((-,)) and support existing neighborhoods. Encouraging mixed land 789 use and making access to jobs, shopping, and schools easier establishes the 790 cohesiveness of a neighborhood. Having opportunities for physical activity and 791 providing for people, if they choose, to age in place and remain in their neighborhood 792 as their lifestyle changes or they face changing physical capabilities establishes the 793 stability of a neighborhood. All of these factors contribute to creating a sustainable 794 neighborhood.

795

Sustainable neighborhoods are important areas where housing affordable to all income levels can and should be located. Sustainability of a neighborhood also relates to the impact the neighborhood has on the environment. Incorporation of sustainable development practices into the design, construction, and maintenance of the neighborhood can reduce greenhouse gas emissions, reduce pollution, reduce the use of natural resources, reduce energy and other maintenance costs, and enhance property values.

804RP-201((In its policies and regulations,)) King County shall ((strive to)) promote805sustainable, healthy, thriving, and equitableneighborhoods and806communities. ((King County shall seek to ensure that the benefits and807impacts of the county's activities are equitably distributed among all808segments of the population.))809benefits and impacts of County actions support this vision.

B. Preserving and Maintaining Open Space andNatural Resource Lands

The people of King County have long recognized that open space ((lands are)) is essential to what makes this county unique. ((Since the inception of the Countywide Planning Policies, p)) <u>P</u>reserving open space, including enhancing working resource lands such as farmlands and forests, ((has been)) <u>continues to be</u> a priority of the County and ((its 39)) <u>the</u> cities, as reflected in the Countywide Planning Policies. It is also a cornerstone of the Growth Management Act.

818

819 The Growth Management Act requires the County and ((its)) the cities in King County to 820 form linkages between and within population centers with lands useful for recreation, 821 trails, wildlife habitat, and connection of critical areas. To fulfill that mandate, King 822 County operates a regional and local open space system consisting of parks, trails, 823 natural areas, working resource lands, and flood hazard management lands. These 824 open spaces provide multiple benefits and functions, including visual variety and relief 825 from developed areas, protection of environmental and ecological processes, provision 826 of wildlife habitat, promotion of mental and physical health, and creation of 827 opportunities for outdoor recreation. However, preserving open space requires careful 828 planning and management to ensure compatibility and long-term viability of these 829 benefits and functions.

RP-202 831 King County shall pursue opportunities to preserve and maintain 832 remaining high-priority forest, agriculture, and other open space lands.

Directing Development Toward Existing C. 833 Communities 834

835 Beginning in the 1940s, a sprawling pattern of low-density development emerged in 836 King County. This sprawl resulted in the accelerated conversion of forests and farms to 837 subdivisions and made it increasingly expensive to provide water, schools, sewer 838 connections, streets, and other services. In addition, zoning codes tended to separate 839 the differing types of land uses, with jobs and stores in one location, homes in another, 840 and schools and parks in yet another.

841

842 The separate land uses were served by a roadway system of wide streets((-)) with 843 infrequent crosswalks, designed to accommodate cars, ((but)) not people. This pattern 844 did not support using transit, bicycling, or walking to meet daily transportation needs, 845 ((thus)) leading to an overburdening of the roadway system and a loss of regional and 846 personal mobility. Low-density patterns that emerged relied on driving alone for many 847 trips, contributing to persistent air pollution problems and increasing greenhouse gas 848 emissions. 849

850 Reducing sprawl by focusing development into existing urban areas is one of the statutory goals of the ((state's)) Growth Management Act. To achieve that goal, in the 851 852 1990s, King County and the cities worked to ((steering)) steer growth to already 853 developed communities (both within urban areas and, at much smaller scales, in the 854 Rural Area((s)) and Natural Resource Lands, in a system of central places) with existing 855 infrastructure and services can result in (1) protecting the Rural Area((s)), (2) conserving 856 natural resources, and (3) providing more economical and equitable services and 857 facilities. Work to maintain those growth patterns and limit new sprawl from happening 858 continues today, as it is critical to supporting efficient and sustainable communities and 859 protecting rural character, the environment, and natural resources.

860

861 ((This broader approach does not mean that all new urban development will be 862 high-density. In many cases, existing moderate-density locations, especially 863 single-family neighborhoods, will not significantly change. Rather, King County will work 864 to better integrate the locations where people work, shop, live, and play in a manner 865 that uses public and private resources more efficiently.))

866 867

RP-203 King County shall continue to ((support the reduction of)) limit sprawl 868 by focusing growth and future development in the Urban Growth Area, 869 consistent with adopted growth targets.

D. Providing a Variety of Transportation Choices 870

871 Transportation is critically important to King County and the surrounding region, 872 facilitating access to jobs, education, services, recreation, and housing. King County 873 plays a central role in the region's transportation sector, supporting a variety of 874 ((motorized and nonmotorized)) travel modes, involving ground, air, and marine 875 transportation. The ((c)) county has direct responsibility for (1) the unincorporated area 876 road network, (2) public transit services and facilities throughout the county, and (3) 877 operation of the King County International Airport ((and (4) operation of passenger-only 878 ferry service to Vashon Island and West Seattle. King County's services and facilities 879 affect not only the local bus passenger but the jumbo airliner loaded with cargo and 880 bound for destinations overseas.))

881

The ability to access various transportation modes has a profound effect on quality of life for ((this county's)) county residents and the vitality of ((its)) the economy. The ((c))County's transportation system must be designed, operated, and maintained in a manner that (1) provides access to mobility options for a wide range of users, including historically ((disadvantaged)) underinvested populations, (2) contributes to safe communities, (3) reduces impacts on the county's natural resources and environment, and (4) fosters a vibrant community.

890**RP-204**King County shall continue to promote an efficient multimodal
transportation system that provides residents with a range of
transportation choices that respond to community needs and reduce
impacts on the natural environment.

E. Addressing Health, Equity, <u>Displacement</u>, and <u>Racial</u>, Social, and Environmental Justice

896 Despite broad economic and social gains in society and ((in)) this country in recent 897 history, inequities exist and continue to persist for significant segments of the 898 population-particularly for ((communities of color)) Black, Indigenous, or other People 899 of Color and people living ((in poverty)) with low or no incomes-across the continuum 900 of measures of social and economic health and wellbeing. In some cases, inequities are 901 worsening over time. King County is not immune to ((national trends and statistics)) 902 these inequalities, despite its location in the relatively prosperous Puget Sound area. 903 ((In the United States and in King County, children and adults who live at the bottom of 904 the social and economic ladder face life threatening and debilitating conditions, and lack access to opportunities, far more often than those in the middle, who in turn are 905 906 more at risk than those at the top.))

907

908 On average, <u>Black, Indigenous, or other ((p))P</u>eople of ((c))<u>C</u>olor and ((people living in 909 poverty)) households at or below 80 percent of area median income have ((lower levels 910 of)) less access to quality education; are more likely to be unemployed or 911 underemployed; are more likely to pay too much of their income for housing costs and 912 other necessities; and are more likely to experience adverse health outcomes, such as 913 obesity, diabetes, or asthma, that can have the effect of reducing life expectancy. These 914 challenges affect specific communities and, in turn, the entire region, resulting in a 915 number of adverse socioeconomic consequences, including, for example, unfilled high-916 skilled jobs, higher levels of homelessness, and higher health care costs. 917

918 ((Promoting economic opportunity for areas with fewer assets is a key goal of the 919 Growth Management Act. In 2010, King County adopted Ordinance 16948, which 920 defined and established)) King County Code Chapter 2.10 establishes ((the "Fair and 921 Just" principle in the County's Strategic Plan. This transformed the work on equity and 922 social justice from an initiative to)) an integrated effort that intentionally applies ((this)) 923 the "Fair and Just" principle to all work ((in order)) to achieve equitable opportunities for 924 all people and communities. A key component of this ((ordinance was defining)) work is 925 the "Determinants of Equity," which are the social, economic, geographic, political, and 926 physical environment conditions in which people in the county are born, grow, live, 927 work, and age that lead to a just and thriving society. Access to these determinants of 928 equity is necessary to have equity for all people regardless of race, class, gender, or 929 language spoken. Inequities are created when structural barriers exist that prevent 930 individuals and communities from accessing these conditions and reaching their full 931 potential.

933 ((Figure: Determinants of Equity))

934

935 Credit: Office of Equity and Racial and Social Justice

936 937 There is a clear relationship between the majority of the Determinants of Equity and the 938 long-range planning role of the King County Comprehensive Plan. Land use patterns 939 and transportation investments play key roles in making communities healthier, more connected, and more equitable. Well-planned neighborhoods have features such as 940 941 connected street networks, nearby shopping, walking paths, and transit service. Access 942 to healthy and culturally relevant food and the protection of agricultural lands affect the 943 rate of obesity, food insecurity, and malnutrition. These amenities reduce dependence 944 on cars, increase opportunities to be physically active, decrease the likelihood ((to be)) 945 of being overweight, improve air quality, ((and)) create opportunities for residents to 946 access jobs(($_7$)) and services, and ((other key destinations that)) provide a path toward a 947 higher quality of life. 948

949 ((As noted previously, t))<u>The Comprehensive Plan plays multiple roles related to land</u>
 950 use planning - a countywide collaborative role in how growth is accommodated in the
 951 county and region, and a local land use regulatory role for how growth occurs in
 952 unincorporated areas. This dual role is important to recognize given the geographic

- distribution of communities that are the focus of the County's ((E))equity and racial and
 ((5))social ((3))justice work.
- 955

956 King County is committed to working to reduce inequities and address concerns of 957 social justice by incorporating the values of the $((\tau))$ county's ((E)) equity and racial and 958 ((5))social ((J))justice work into the daily practice of developing policies and programs, 959 ((making)) informing funding decisions and delivering services. Further, King County 960 ((will)) continues to identify and address the conditions at the root of disparities, engage 961 communities to have a strong voice in shaping their future, and raise and sustain the visibility of ((E)) equity and racial and ((F)) social ((F)) justice. The goal is to start by 962 963 focusing on prevention and addressing the fundamental causes of the inequities ((in 964 order)) to have a greater overall impact.

965

966 ((In order t))<u>T</u>o achieve this, the County uses ((the E))<u>e</u>quity ((1))<u>i</u>mpact ((R))<u>r</u>eviews</u> ((Tool)) as a process to identify, evaluate, and communicate the potential equity impact -967 968 both positive and negative - of a <u>proposed</u> policy, program, or service. The ((E)) equity 969 $((\dagger))$ impact $((\Re))$ review ((Tool)) process merges empirical (quantitative) data and 970 community engagement findings (gualitative data) to inform planning, decision-making, 971 and implementation of actions ((which)) that affect equity in King County. Quantitative 972 $((\overline{D}))$ data are developed and compiled through a number of efforts, ((and published in a 973 number of sources, including King County's January 2015 report, The Determinants of 974 Equity; the King County Performance Dashboard; the public-private Communities 975 Count initiative; and the Public Health Community Health Indicators Project. Data from 976 these sources and others should be)) disaggregated when possible, combined with 977 qualitative data from communities, and analyzed carefully to ensure that equity impacts 978 are rigorously and holistically considered and advanced in the design and 979 implementation of a proposed action (plan, policy, and program development; service 980 delivery; operations modification; capital programs and $projects((\frac{1}{r}))$; etc.). 981

- 982**RP-205**King County ((will)) shall, when implementing and evaluating its land
use policies, programs, investments, and practices, ((seek to reduce
health inequities)) identify and proactively address issues of equity((;));
racial, social, and environmental justice; disparate health outcomes;
and displacement ((when evaluating and implementing its land use
policies, programs, and practices)).
- F. ((Achieving Environmental Sustainability))
 Enhancing Natural Resources and the
 Environment

King County can influence environmental sustainability through its land use and transportation policies and plans, investments in capital projects and facilities, economic development initiatives, and day-to-day operations. To be effective, sustainability actions need to be taken at many scales: <u>in unincorporated land use regulations</u>, in coordination with neighboring local governments, <u>and across county departments</u>((, and through the day-to-day actions of individual employees)).

997

998 ((The county's approach to mitigation of and adaption to the effects of climate change
 999 have evolved over the last four years. Responding to climate change is an important
 1000 element of the broader concept of environmental sustainability. This means meeting the
 1001 needs of the current generation without compromising the capacity of the environment
 1002 to support future generations.))

1004**RP-206**King County ((will)) shall protect, restore, and enhance its natural1005resources and environment((;)) and encourage sustainable agriculture1006and forestry((, reduce climate pollution and prepare for the effects of1007climate change, including consideration of the inequities and1008disparities that may be caused by climate change)).

1009 <u>G. Preparing for and Responding to Climate</u> 1010 Change

1011 Climate change is a paramount challenge with fundamental and far-reaching
 1012 consequences, a "threat multiplier" that exacerbates inequities and intensifies
 1013 natural hazards - such as flooding, landslides, wildfires, and extreme heat - that put
 1014 the County's residents, economy, and environment at risk. The following principles

1015 for climate action formalize the County's commitment to lead on climate action,

- 1016 while also integrating and highlighting principles that guide County climate action:
- 1017 1018

1035

1041

1047

Act with urgency and intention;

- 1019 <u>Lead with racial justice and equity;</u>
- 1020 <u>• Respond to community needs and priorities:</u>
- 1021 <u>Use and develop a comprehensive and data- and science-driven approach;</u>
- 1022 <u>Seek systemic solutions;</u>
- 1023 <u>Build partnerships;</u>
- 1024 <u>Lead through local action;</u>
- 1025 Prioritize health and co-benefits; and
- 1026 <u>Be transparent and accountable.</u> 1027

1028**RP-207 King County shall reduce greenhouse gas emissions, advance climate**1029equity, and prepare for and respond to climate change impacts.

1030	((IV.Summary	of	the	King	County
1031	Comprehe	nsive	Plan		

The Comprehensive Plan contains twelve chapters that address all of the requirements
 of the Growth Management Act, Countywide Planning Policies and Multicounty
 Planning Policies. They are as follows:

1036 Chapter 1: Regional Growth Management Planning

1037 The vision and goals of this Plan are based on the 14 planning goals specified in the
 1038 Washington State Growth Management Act, the Countywide Planning Policies, the
 1039 region's VISION 2040 and the values voiced by the residents of King County. The official
 1040 King County Land Use Map is included in this chapter.

1042 Chapter 2: Urban Communities

The Urban Communities chapter focuses on the importance of creating and sustaining
 livable communities. A major tenet of the Growth Management Act is to focus growth in
 the urban areas. The policies in this chapter facilitate urban development where
 infrastructure and facilities exist or can be readily provided.

1048 Chapter 3: Rural Areas and Natural Resource Lands

Protecting Rural Areas, Natural Resource Lands and rural communities in King County is
 a major focus of the Comprehensive Plan in compliance with both the Growth
 Management Act and the King County Strategic Plan. This chapter delineates the

- 1052 county's approach to conserving Rural Areas and Natural Resource Lands, supporting
 1053 rural communities and their heritage, and supporting the agriculture, forestry, and
 1054 mining economies. Integral to these efforts are incentive tools such as the Transfer of
 1055 Development Rights program that ensure the protection of environmental quality and
- 1056 wildlife habitat, while respecting economic values and property rights.
- 1057

1058 Chapter 4: Housing and Human Services

1059 The availability of adequate and affordable housing has become one of the most 1060 pressing issues facing King County today. Similarly, partnering with other organizations 1061 and jurisdictions to deliver human services is a critical component for creating 1062 sustainable communities and supporting environmental justice. In the 2016 1063 Comprehensive Plan update, policies on these topics were consolidated into a new 1064 chapter.

1065

1066 Chapter 5: Environment

1067 King County includes a rich and valuable array of land and water resources ranging from 1068 lowland lakes, rivers, and wetlands in highly urbanized areas, to saltwater shorelines, to 1069 nearly pristine landscapes in the foothills of the Cascades. This chapter establishes 1070 policies to ensure future protection of the environment and its contribution to the 1071 quality of life in King County. King County's programs for protecting its environment 1072 include some of the most progressive in the country. The policies in this chapter will 1073 help to ensure that the environment is protected and sustained, and that the healthy 1074 environment goal of the Strategic Plan is achieved.

1075

1076 King County seeks to combat climate change through actions to reduce greenhouse 1077 gas emissions and make the natural and built environment more resilient in the face of a 1078 changing climate. King County policies and programs support habitats for native plant 1079 and animal species, including those listed as threatened under the Endangered Species 1080 Act. The Environment Chapter includes policies guiding King County's actions to 1081 protect critical areas, improve water quality, and manage invasive species. The county 1082 uses a combination of habitat restoration, incentives, education, technical assistance, 1083 and regulations to protect the natural environment. This chapter also reflects the role of 1084 the Puget Sound Partnership in coordinating environmental management, including 1085 providing leadership for a coordinated and comprehensive environmental monitoring 1086 program across Puget Sound.

1087

1088 Chapter 6: Shorelines

1089 King County adopted its first Shoreline Master Program in 1977. In November, 2010,
 1090 King County approved an update to the Shoreline Master Program. This update
 1091 incorporated the shoreline policies in the Comprehensive Plan for the first time and was
 1092 approved by the Department of Ecology in 2014.

1093

1094 Chapter 7: Parks, Open Space and Cultural Resources

Protecting and enhancing King County's environment and quality of life through the
 stewardship and enhancement of its open space system of parks, trails, natural areas
 and working resource lands along with its valued cultural resources continues to be the
 central focus of this chapter. Furthering the regional trail system will be guided by the
 Regional Trails Needs Report (Technical Appendix C2).

1100

1101 Chapter 8: Transportation

1102 This chapter sets the policy framework that guides efficient provision of vital 1103 transportation infrastructure and services that support a vibrant economy, thriving 1104 communities, and the county's participation in critical regional transportation issues. The 1105 chapter reflects the goals of the King County Strategic Plan and the priorities 1106 established in the strategic plans for public transportation, airport and road services. It 1107 also reflects the county's continuing transition to becoming a road service provider for a

1108 primarily rural road system, and speaks to the challenges of providing transportation services and infrastructure in a time of growing need and severely constrained financial 1109 1110 resources.

1111

1120

1112 The chapter promotes an integrated, multimodal transportation system that provides 1113 mobility options for a wide range of users, including historically disadvantaged 1114 populations. It also emphasizes safety, options for healthful transportation choices, and 1115 support for greenhouse gas emissions reduction goals. Additional policy focus is 1116 provided on maintaining and preserving existing services and infrastructure, 1117 implementing clear service priorities and guidelines, using transportation resources 1118 wisely and efficiently, and developing sustainable funding sources to support the level 1119 of services needed by communities.

1121 **Chapter 9: Services, Facilities and Utilities**

1122 This chapter guides service provision in King County, while recognizing the different 1123 service levels within the Urban Growth Area and the Rural Area and Natural Resource 1124 Lands. The Growth Management Act requires coordinated planning so that the services 1125 required by new residents and their homes and businesses are available as growth 1126 occurs. This chapter addresses a wide range of facilities and services provided by the 1127 county consistent with specific operational plans, such as the Flood Hazard 1128 Management Plan and the Strategic Climate Action Plan, and recognizes that the county 1129 is both a regional and a local service provider. The chapter also clarifies the County's 1130 intent regarding water supply planning.

1131

1132 **Chapter 10: Economic Development**

1133 This chapter supports the county's long-term commitment to a prosperous, diverse, and 1134 sustainable economy by promoting public programs and actions that create the 1135 foundation for a successful economy whether within the Urban Growth Area, the Rural 1136 Area or on Natural Resource Lands. A successful economy is one in which the private, 1137 nonprofit, and public sectors can thrive and create jobs compatible with the 1138 environment and community and land use expectations. King County understands that 1139 a successful and diverse economy contributes to a strong and stable tax base and a high 1140 quality of life for all residents. This chapter recognizes businesses and the workforce as 1141 customers of an economic development system and supports actions and programs 1142 that promote the strength and health of both groups.

1143

Chapter 11: Community Service Area Subarea Planning 1144

1145 This chapter uses King County's seven Community Service Areas as the framework for 1146 its renewed subarea planning program that offers long-range planning services to 1147 unincorporated communities. The majority of King County's community plans are no 1148 longer in effect as separately adopted plans. In many cases, however, the plans contain 1149 valuable historical information about King County's communities and often provide 1150 background for the land uses in effect today. Policies from the community plans were 1151 retained as part of the Comprehensive Plan to recognize the unique characteristics of 1152 each community and to provide historical context. This chapter will be updated, where 1153 appropriate, to reflect the new Community Service Area subarea plans as they are 1154 adopted.

1155

```
1156
```

Chapter 12: Implementation, Amendments and Evaluation

1157 The Comprehensive Plan policies, development regulations and Countywide Planning 1158 Policy framework have been adopted to achieve the growth management objectives of 1159 King County and the region. This chapter describes the County's process for updating 1160 the Comprehensive Plan and outlines and distinguishes the annual, midpoint, and the

1161 eight-year-cycle updates. The chapter identifies a series of major Workplan actions that

- 1162 will be undertaken between the eight-year updates to implement or refine provisions
- 1163 within the Plan. This chapter further explains the relationship between planning and
 1164 zoning.

1165 V. Technical Appendices

1166		goals of the Comprehensive Plan are the detailed inventories,				
1167	forecasts, finance plans and Urban Growth Area analysis required by the Growth					
1168	Management Act. Four technical appendices (Volume 1) are adopted as part of the plan					
1169	to implement these Growth Management Act requirements (RCW 36.70A.070,					
1170	36.70A.110, 36.70A130).	Fechnical Appendices A, B, C, and D were updated in 2008,

CHAPTER 2

STREET, STREET,

URBAN

COMMUNITIES

1 ((

The Urban Communities chapter brings together many of the major elements that combine to make a healthy and vibrant urban community whole: culture, recreation, business centers, jobs, and sustainability. By merging these elements of urban life into one chapter, King County emphasizes the importance each plays as part of a livable, sustainable and equitable-community.

The chapter first defines the Urban Growth Area, where most growth has, will, and should continue to occur, and major land uses within it. The chapter then provides the framework to guide the development of new urban communities and redevelopment of existing communities within the unincorporated portion of the Urban Growth Area.

- 5 Related components in the plan include Chapter 4, Housing and Human
- 6 Services, Chapter 7; Parks, Open Space and Cultural Resources, Chapter 8,
- 7 Transportation and others.
- 8
- 9

10 It is the goal of King County to work toward a model sustainable community to balance 11 growth with natural resource protection while addressing climate change. Sustainable 12 development creates a balance between people, economy, and environment, balancing 13 using resources to meet current needs while ensuring future generations can benefit 14 from equivalent resources. Sustainable development seeks to achieve this goal by 15 addressing the impacts of the built environment in which the residents of King County 16 live and work. To highlight the importance of sustainable development and to 17 consolidate policies applicable to both Rural Areas and Natural Resource Lands as well 18 as urban communities, text and policies regarding sustainable development for public 19 projects can be found in Chapter 9, Services, Facilities and Utilities, Section II (Facilities 20 and Services), subpart D (Capital Facility Planning). Text and policies regarding 21 sustainable development in the private sector can be found in Chapter 10, Economic 22 Development, Section V (Sustainable Development in the Private Sector). 23

24 A.)) <u>I.</u> The Urban Growth Area

The Growth Management Act requires the ((c))<u>C</u>ounty to designate an Urban Growth Area where most growth and development forecasted for King County will be accommodated. By designating an Urban Growth Area and focusing growth within it, King County ((and other counties in the state will)) can:

- Limit sprawl((ing development));
- 30
 <u>Improve efficiencies and ((R))reduce costs of service provision ((by encouraging concentrated development));</u>
- 32 ((• Improve the efficiency of transportation and utilities;
- 33 Improve equitable access to human services;))
- Protect the Rural Area and Natural Resource Lands;
- Enhance the preservation of open space; and
- 36 ((Mitigate the impacts of climate change and adapt to its effects)) <u>Reduce</u>
 37 <u>greenhouse gas emissions</u>.
 38

The Urban Growth Area for King County is designated on the official Land Use Map ((adopted with this Comprehensive Plan)), which is generally depicted at the end of Chapter 1, Regional Growth Management Planning. ((The original Countywide Planning Policies provided the framework that the Metropolitan King County Council used when adopting the Urban Growth Area as part of the 1994 Comprehensive Plan.[†]))

45 The Urban Growth Area includes all cities within the county, including the Urban Growth 46 Area((s)) for Cities in the Rural Area, the cities' <u>Potential</u> ((a))<u>Annexation</u> ((a))<u>A</u>reas, and 47 other land within the unincorporated part of the county characterized by urban-type 48 growth((. The Urban Growth Area also includes the Bear Creek Urban Planned 49 Developments)) such as the Redmond Ridge, Redmond Ridge East, and Trilogy 50 neighborhoods east of Redmond. ((See Chapter 3, Rural Areas and Natural Resource 51 Lands, for additional policy guidance on growth within the annexation areas of Cities in 52 the Rural Area.

53

54 King County's total Urban Growth Area covers 461 square miles, less than one-quarter
 55 of the county's total land area of 2,130 square miles. Cities comprise most of the land
 56 mass of the Urban Growth Area, at 418 square miles; the unincorporated portion of the

^{((*} As amended by Ordinance 17687.))

57 Urban Growth Area is now about 43 square miles. A general representation of the
 58 official Land Use Map is located at the end of Chapter 1, Regional Growth Management
 59 Planning.))

60

The Urban Growth Area is where King County plans for and accommodates housing
 needs for unincorporated King County, consistent with housing need allocations in the
 Countywide Planning Policies; policies in Comprehensive Plan Chapter 4, Housing and
 Human Services; and analysis in Appendix B, Housing Needs Assessment.

65

66

((I. Urban Communities))

67 A critical challenge for King County ((and its residents)) is to ((create)) encourage urban 68 communities that provide ((the sense of place and the range of choices people want for 69 a quality urban life and experience, as well as to respond to the cultural and economic needs of diverse urban communities. Urban areas need more than physical 70 71 infrastructure. They also need a broad range of amenities and human services that 72 make them attractive and safe places to work and live, while protecting the physical 73 environment and maintaining the region's quality of life. In short, they need to become 74 and be sustained as healthy and equitable communities. The design goals of healthy 75 communities include making it easier for people to live healthy lives by encouraging 76 mixed)) a healthy, safe built environment for people from all backgrounds at all stages 77 of life, as well as accommodate housing affordable to all income levels. Components of 78 creating such a community include: cultivating a sense of place; responding to cultural 79 and economic needs; supporting access to affordable and healthy food and housing; 80 providing a broad range of amenities; and planning for a mix of land uses and greater 81 land density to shorten distances between housing, workplaces, transit, schools, and 82 recreation so people can choose to ((walk or bicycle)) use active transportation to more 83 easily access ((to)) these destinations. The County can meet these goals through 84 periodic review and updates to its development regulations and functional and long-85 range plans.

86

87 People are more likely to walk to their destination if the distance is less than one-half 88 mile ("walking distance") or to bicycle if the distance is less than three miles ("bicycling 89 distance"). Incorporating high comfort pedestrian and bicycle infrastructure for all ages 90 and abilities, especially sidewalks and bicycle paths that are separated from 91 ((automobile)) vehicle traffic, can increase the safety and frequency of bicycle, 92 pedestrian, and transit trips. ((Healthy communities provide opportunities for people to 93 be physically active and socially engaged as part of their daily routine and include 94 access to open space and parks. People can, if they choose, age in place and remain in 95 their community as their lifestyle changes or as they face changing physical capabilities. 96 This contributes to a healthy community, as does ensuring access to affordable, healthy 97 food, especially fruits and vegetables, and limiting access to unhealthy substances. An 98 integral part of a healthy community is "healthy housing," which protects residents from 99 exposure to harmful substances and environments, and reduces the risk of injury. These 100 goals can be achieved, in part, through implementing building practices that promote 101 health.

102

103 104 104 105 105 105 106 107 108 109 109 100

 ((U-101)) U-102 Development within the Urban Growth Area should create and maintain safe, healthy, and diverse communities. These communities should contain a range of affordable, healthy housing and employment opportunities, as well as school and recreational facilities, and should be designed to protect the natural environment and significant cultural resources.

 - 6. Are not within the 100-year floodplain of any river or river segment that has a mean annual flow of 1,000 or more cubic feet per second, as determined by the Washington State Department of Ecology, unless otherwise exempted under Chapter 36.70A Revised Code of Washington; or
 - b. Are included within the Redmond Ridge, Redmond Ridge East, and <u>Trilogy neighborhoods</u>.
- 148((U-103)) U-105Parcels that are split by the Urban Growth Area boundary ((line))149should be reviewed for possible redesignation to either all urban area150or all Rural Area or Natural Resource Lands taking into consideration:151a. Whether the parcel is split to recognize ((environmentally sensitive))
 - a. Whether the parcel is split to recognize ((environmentally sensitive features)) <u>critical areas</u>;
 - b. The parcel's geographic features;
 - c. Whether the parcel will be added to an adjoining city's Potential Annexation Area; and
 - d. The requirements of interlocal agreements, or the requirements of King County plans.

((Some cities that border the Urban Growth Area operate parks in the Rural Area. These
 parks may have been acquired by the city through a direct purchase or through a
 transfer agreement with King County. Cities can continue to operate parks in the Rural
 Area consistent with rural development standards. In specific circumstances, cities can
 request that these parks be redesignated to urban to allow future annexation by the city.

165 U-10 166 167 168 169 170 171 172 173 174 175 176 177	 4)) <u>U-106</u> Rural <u>area</u> zoned properties that are <u>currently a park</u> immediately adjacent to a city ((and are planned or designated for park purposes by that city)) may be redesignated to urban when the city has committed to designate the property in perpetuity <u>for park purposes</u> ((in a form satisfactory to the King County Council for park purposes and: a. The property is no more than 30 acres in size and was acquired by the city prior to 1994; b. The property is no more than 30 acres in size and receives county support through a park or recreation facility transfer agreement between King County and a city; or c. The property is or was formerly a King County park and is being or has been transferred to a city)).
178 ((U-1 179 180 181 182 183 184 185 186 187 188 187 188 189 190 191	 5 Existing or proposed churches in the Rural Area may be included within the Urban Growth Area when all of the following criteria are met: a. The church property must have an interior lot line as defined by King County Code 21A.06.730 that is adjacent to the original Urban Growth Area boundary as established by the 1994 King County Comprehensive Plan, excluding the Urban Growth Areas of Cities in the Rural Area and excluding Urban Growth Areas boundaries established through the Four-to-One Program; b. The church property shall not be adjacent to an Agricultural Production District or the Forest Production District; c. Sewer service is required once the property is included in the Urban Growth Area; d. Direct vehicular access to a principal arterial road is required; and e. The church property shall be included in the Potential Annexation

194 2.)) <u>A.</u> Urban Growth Area Targets

195 The Growth Management Act requires the ((c))<u>C</u>ounty and ((its)) cities to plan for future 196 housing and employment growth target ranges for each jurisdiction. ((In 1994, the 197 Growth Management Planning Council adopted household and job targets for each 198 jurisdiction to distribute the expected growth in the Countywide Planning Policies. 199

200 Growth target ranges represent regional agreement on jurisdictions' policy choices 201 regarding the amount of growth they intend to accommodate. King County and its cities have also developed targets for employment to foster a local balance between 202 population and employment. The countywide and unincorporated King County's 203 204 housing growth target and employment targets are contained in the Countywide 205 Planning Policies. In 2008, VISION 2040 was adopted and established a Regional 206 Growth Strategy that provides guidance to countywide target setting. The Regional 207 Growth Strategy built upon King County's target setting process and now requires the 208 establishment of housing and employment targets.

209

210 In November 2009, consistent with the new guidance found in VISION 2040, a new set 211 of housing and job growth targets were established to guide growth for the period 212 2006-2031. Each urban jurisdiction including unincorporated King County was 213 assigned a growth target based on land capacity and other factors. The complete table 214 of city growth targets approved in December 2010, and updated for annexations 215 through 2016, is included in this chapter to provide the regional context for the 216 unincorporated area targets.)) Growth targets are adopted in the Countywide Planning 217 Policies for each city and unincorporated urban area in King County. The targets are 218 updated on timelines consistent with the state's 10-year comprehensive planning 219 periodic update schedule to incorporate current demographic data and to align with

- the current Regional Growth Strategy adopted in VISION. Jurisdictions must then reflect
 the adopted targets in their local comprehensive plans.
- 222

223 Table 2-1, King County Jurisdiction Growth Targets 2019-2044, portrays the housing 224 and job growth targets for each jurisdiction as adopted in the Countywide Planning 225 Policies. The table includes targets for Potential Annexation Areas with development 226 capacity. Portions of growth targets for Potential Annexation Areas will transfer into 227 cities at the time of annexation. Although they may be refined through future planning 228 with affected communities and adjacent cities, these urban unincorporated targets are 229 intended to be used as a quide for future planning of land uses and decisions on 230 services and infrastructure.

- ((U-106)) U-107 Most population and employment growth should locate in the contiguous Urban Growth Area in western King County((, especially in cities and their Potential Annexation Areas)). Cities in the Rural Area should accommodate growth in accordance with adopted growth targets.
- 241 ((U-114)) U-108 ((Land use policies and regulations)) King County shall 242 accommodate ((a)) assigned urban unincorporated area growth targets 243 of ((approximately 11,140)) 5,412 housing units and ((approximately 244 6,810)) 3,340 jobs by ((2031)) 2044, ((established in the Countywide 245 Planning Policies for the unincorporated portion of the Urban Growth 246 Area)) and provide for housing needs for all incomes. The growth 247 targets should be monitored and further refined over the planning 248 period.
- ((U-115)) U-109 King County shall provide adequate land capacity ((for residential))251to accommodate housing affordable to all incomes, commercial,252industrial, and other non-residential growth in the urban253unincorporated area consistent with ((- As required under)) the Growth254Management Act.((, this land capacity shall be calculated on a255countywide basis and shall include both redevelopment opportunities256as well as opportunities for development on vacant lands.²
- 258
259U-116King County shall use housing and employment targets to implement
the Comprehensive Plan in urban communities. The targets allocated
to subareas of unincorporated King County will be monitored and may
be refined through future planning that includes communities, affected
cities and service providers.

263 264 The following Figure: King County Growth Targets Update: Revised Table DP-1-265 adjusted 2015, portrays housing and job growth targets for each jurisdiction. It has been 266 updated to reflect annexations that occurred between 2010 and 2016 in the cities of 267 Burien, Kent, Kirkland, Bellevue, Bothell, Sammamish and Tukwila. These cities annexed 268 large areas of unincorporated King County, shifting those areas' Potential Annexation 269 Area (PAA) targets into the respective cities. That adjustment of Potential Annexation 270 Area targets into cities was acknowledged by the Growth Management Planning Council, adopted by the County Council, and ratified by the cities in 2012-2013 and 271 272 adjusted again in 2015. The time horizon remains 2006-2031, and the targets for all 273 other jurisdictions remain the same. 274

The table further provides guidance, in the Potential Annexation Area columns, for transfer of portions of growth targets into cities when annexation takes place in the future. Although they may be refined through future planning with affected communities and adjacent cities, these ranges are intended to be used as a guide for future planning of land uses and decisions on services and infrastructure.

* King County Growth Management Planning Council, adopted October 2009 and ratified by cities in 2010. These were re-adopted with the countywide planning policies in 2012 and ratified in 2013.

- Targets base year is 2006. PAA / city targets have been adjusted to reflect annexations through 2016.

** Target for Maple Valley PAA is contingent on approval of city-county joint plan for Summit Place:

282 H:)) <u>B.</u> Potential Annexation Areas

293

283 ((The annexation of urban unincorporated areas is good public policy. The State 284 Growth Management Act and the regionally adopted Countywide Planning Policies 285 stipulate that counties are the appropriate providers of regional services and of local 286 services to the Rural Area and Natural Resource Lands. For their part, cities are the 287 appropriate providers of local urban services to all areas within the designated Urban 288 Growth Area Boundary. This logical split of government services is in part a reflection of 289 the greater taxing authority afforded to cities by the state Legislature. Annexation is a 290 means to achieve the desired governmental service and land use vision set forth in 291 regional policy and state law so that residents of urban areas receive urban level 292 services.))

King County's annexation efforts are ((particularly)) important given the impacts of historical patterns of annexation. Over time, higher tax revenue-generating areas retail, industrial, and commercial centers and more affluent residential neighborhoods -

have incorporated or annexed first, while lower income, ethnically diverse communities
 remained unincorporated. Given the County's limited taxing authority, promoting
 annexation of these areas into cities, where a higher level of service can be provided, ((is
 the best way to advance equity)) will foster more equitable and socially just outcomes
 for residents in unincorporated urban areas.

303 Although it is the policy of the County to support and promote annexation, its formal 304 ability to do so is extremely limited. State laws provide the cities, county residents, and 305 property owners with the authority to initiate the annexation process. A successful 306 annexation initiative depends on establishing a collaborative and ongoing dialogue 307 between the three affected interest groups: residents, the County, and the affected city. 308 ((However, King County has a successful history of engaging in annexation discussions 309 with urban unincorporated area residents. Most recently, from 2008 to 2019, there have 310 been six major annexations:

- 312
 -Benson Hill into Renton;

302

317

331

337

338

339

340

341

342

343

344

- 313 •<u>North Highline Area X into Burien;</u>
- 314 Panther Lake into Kent;
- 316 Klahanie into Sammamish.

318 As a result of these and some smaller annexations, by 2016, King County's urban 319 unincorporated population dropped by more than 110,000 persons from its 2007 level, 320 to an estimated population of 119,900 (comparable to the population of Kent, the third 321 largest city in the county).)) 322

323 Much of the remaining urban unincorporated area is made up of geographically 324 isolated islands surrounded by cities or adjacent to the $((\pi))U$ rban $((\pi))G$ rowth Area 325 boundary. Because these areas are scattered across the county, the provision of local 326 services is costly. ((Covering the cost of serving these areas reduces the amount of 327 revenue available for regional services and for local services in the Rural Area and 328 Natural Resource Lands. Therefore, King County has a strong fiscal interest in seeing 329 the remaining urban unincorporated areas annexed to cities within the next several 330 years.))

The policies in this section are intended to guide the ((c))County's decision making on annexation-related issues to ensure the needs of residents in the urban unincorporated area are considered, the perspective of the future annexing city is considered, and that a smooth transition from ((c))County to city government occurs.

((U-201)) U-110 ((In order t))To meet the Growth Management Act and ((the regionally adopted)) Countywide Planning Policies goal of becoming a regional service provider for all county residents and a local service provider in the Rural Area and Natural Resource Lands, King County shall encourage annexation of the remaining urban unincorporated area. The ((c))County may also act as a contract service provider where mutually beneficial.

345 ((U-202)) <u>U-111</u> To help create an environment that is supportive of annexations, 346 King County shall work with cities and with neighborhood groups, local 347 business organizations, public service providers, and other 348 ((stakeholders)) affected parties on annexation-related activities to 349 move the remaining urban islands towards annexation by the city most 350 appropriate to serve it. King County ((will)) shall also seek changes at 351 the state level that would facilitate annexation of urban unincorporated 352 areas.

- ((U-202a)) <u>U-112</u> The County should seek state legislative authority to impose taxes in unincorporated urban areas consistent with the taxing authorities and rates of cities, and seek to impose rates consistent with ((the city)) <u>cities</u> to improve service delivery and infrastructure levels.
- ((U-203)) U-113 The Potential Annexation Areas Map adopted ((by the Growth Management Planning Council)) in the Countywide Planning Policies illustrates city-designated ((p))Potential ((a))Annexation ((a))Areas (((PAAs),)). This may include contested areas (where more than one city claims a ((PAA)) Potential Annexation Area), and those few areas that are unclaimed by any city. For contested areas, the ((c))County should attempt to help resolve the matter, or to enter into an interlocal agreement with each city for the purpose of bringing the question of annexation before voters. For unclaimed areas, King County should work with adjacent cities and service providers to develop a mutually agreeable strategy and timeframe for annexation. ((For areas affiliated with a city for annexation, King County should proactively support annexations.
- U-204)) U-114 King County shall support annexation proposals that are consistent with the Countywide Planning Policies and the Washington State Growth Management Act, when the area proposed for annexation is wholly within the annexing city's officially adopted ((PAA)) Potential Annexation Area, and when the area is not part of a contested area.
- ((U-205)) <u>U-115</u> King County shall not support annexation proposals that would:
 - a. Result in illogical service areas;
 - b. Create unincorporated islands, unless the annexation is preceded by an interlocal agreement in which the city agrees to pursue annexation of the remaining island area in a timely manner;
 - Focus solely on areas that would provide a distinct economic gain for the annexing city at the exclusion of other proximate areas that should logically be included;
 - d. Move designated Agricultural and/or Forest Production District lands into the Urban Growth Area, <u>except as allowed in Policies R-</u> <u>760, R-671, and R-762a</u>; or
 - e. Apply zoning to maintain or create permanent, low-density residential areas, unless such areas are part of an urban separator or are environmentally constrained, rendering higher densities inappropriate.
- ((U-206)) U-116 King County shall favor annexation over incorporation as the preferred method of governance transition. King County ((will)) shall not support incorporations when the proposed incorporation ((area)) is financially infeasible.

400 ((U-207)) U-117 King County shall work with cities to develop pre-annexation or 401 annexation interlocal agreements to address the transition of services 402 from the ((c))County to the annexing cities. The development of such 403 agreements should include a public outreach process to include but not 404 be limited to residents and property owners in the Potential 405 Annexation Areas, as well as residents and property owners in the 406 surrounding areas. Such agreements may address a range of 407 considerations, including but not limited to: 408 Establishing a financing partnership between the ((c))County, city, a. 409 and other service providers to address needed infrastructure; 410 b. Providing reciprocal notification of development proposals in 411 Potential Annexation Areas, and opportunities to identify and/or 412 provide mitigation associated with such development; 413 Supporting the city's desire, to the extent possible, to be the c. 414 designated sewer or water service provider within the Potential 415 Annexation Area, where this can be done without harm to the 416 integrity of existing systems and without significantly increasing 417 rates: 418 d. Assessing the feasibility and/or desirability of reverse contracting 419 in order for the city to provide local services on the ((c))County's 420 behalf prior to annexation, as well as the feasibility and/or 421 desirability of the ((c))County continuing to provide some local 422 services on a contract basis after annexation; 423 Exploring the feasibility of modifying development, concurrency, e. 424 and infrastructure design standards prior to annexation, when a 425 specific and aggressive annexation timeline is being pursued; 426 Assessing which ((c))County-owned properties and facilities should f. 427 be transferred to city control, and the conditions under which such 428 transfers should take place; 429 g. Transitioning ((c))County employees to city employment where 430 appropriate; 431 h. Ensuring that land use plans for the annexation area are consistent 432 with the Countywide Planning Policies with respect to: planning for 433 urban densities and efficient land use patterns; provision of urban 434 services, affordable housing, and transportation; the protection of 435 critical areas; and the long-term protection of urban separators; 436 Continuing equivalent protection of cultural resources, and county i. 437 landmarks and historic resources listed on the King County Historic 438 **Resource Inventory;** 439 Maintaining existing equestrian facilities and establishing j. 440 equestrian linkages; and 441 k. Establishing a timeline for service transitions and for the 442 annexation. 443 444 ((King County will explore new options to affiliate unincorporated urban areas with 445 cities, and to make the provision of services to such areas financially sustainable. 446 447 U-208)) U-118 King County should engage in joint planning processes for the 448 urban unincorporated areas with the area's designated annexation city. 449 Alternatively, upon a commitment from the city to annex through an 450 interlocal agreement, King County ((will)) <u>shall</u> engage in joint planning 451 processes for the urban unincorporated areas in tandem with the 452 annexing city. Such planning may consider land use tools such as: 453 ((traditional s))Subarea plans((, subarea studies)) or area a. 454 ((rezoning)) zoning and land use studies; 455 b. ((a))Allowing additional commercial and high-density residential 456 development through the application of new zoning; 457 c. Transfers of Development Rights that add units to new 458 development projects; and

459	d. ((a))Application of collaborative and innovative development
460	approaches, such as design standards.
461	
462	((King County will work through the Growth Management Planning
463	Council to develop a plan to move the remaining unincorporated urban
	Council to develop a plan to move the remaining unincorporated urban
464	Potential Annexation Areas towards annexation.
465	
466	R-511)) <u>U-119</u> Within Potential Annexation Areas of Cities in the Rural Area, ((the
467	following uses)) residential development at a density of one home per
468	five acres or less shall be ((permitted)) allowed until the area annexes
469	to the city((:
470	a. Residential development at a density of one home per five acres or
471	less with mandatory clustering; and
472	h Nonresidential development such as commercial and industrial as
4//	n nonresidential development slich as commercial and industrial as

472

 Nonresidential development such as commercial and industrial as determined through previous subarea plans)).

474 ((1.)) <u>II.</u> Growth in ((Urban)) Centers and 475 the Promotion of Public Health for All

476

477 ((The Multicounty and Countywide Planning Policies guide the development of urban 478 centers, which are principally located in cities, and should accommodate concentrations 479 of housing and employment.)) Focusing growth into centers helps achieve the goals of 480 a sustainable and equitable community. ((However, in its unincorporated urban area,)) 481 King County has a ((small)) number of smaller-scale ((urban)) centers, which includes 482 ((an)) unincorporated activity center<u>s</u>, community business centers, and neighborhood 483 business centers. These are represented on the ((Urban)) <u>Countywide and Local</u> 484 Centers map at the end of this chapter. 485

486 ((Focusing development in urban areas can have a positive effect on public health while 487 also addressing climate change. The percentage of King County residents who are 488 overweight or obese has risen rapidly since the late 1980s. With obesity comes 489 increased risk for diabetes, hypertension and heart disease. Evidence suggests one 490 major reason for rising obesity is the lack of physical activity. Growth patterns in 491 suburban areas, which discourage active transportation modes such as walking and 492 bicycling and promote a reliance on private auto use, have contributed to this public 493 health problem.)) 494

495 Communities that feature a variety of land uses; access to healthy, affordable foods; 496 higher housing density; sidewalks; bicycle infrastructure; and street connections to 497 nearby services promote health and quality of life. Urban areas that are interesting and 498 safe for pedestrians and bicyclists, and that provide many necessary services close to 499 residential developments, can promote public health by increasing opportunities for 500 physical activity during daily activities. ((Tobacco remains the leading cause of death for 501 King County residents. Zoning regulations can be used to reduce concentrated 502 exposure to alcohol, tobacco and marijuana by regulating the number of outlets that 503 can sell these products and advertising that is in view of the general public. Tobacco 504 use also creates environmental tobacco smoke, which contains more than 4,000 505 substances and has been classified by the Environmental Protection Agency as a Group 506 A carcinogen. Tobacco-free area policies reduce this hazard.)) 507

508 While creating communities that have a positive effect on public health, the ((c))<u>C</u>ounty 509 is also ((creating)) <u>supporting the creation of</u> communities that will have a positive effect 510 on climate change. When people replace their ((auto)) <u>vehicle</u> trips with transit, walking, 511 or biking, they are improving their health and reducing their carbon footprint at the 512 same time. Communities that have integrated street networks, a mix of uses, and 513 residential densities supportive of public transportation can reduce vehicle miles **Urban Communities - Page 2-14**

514	travelad because ((auto)) ushiala trica are baine realesed with reary welling biling
	traveled because ((auto)) <u>vehicle</u> trips are being replaced with more walking, biking,
515	and transit use.
516	
517	((U-107)) <u>U-201</u> King County should support ((land use and zoning)) actions that
518	promote public health ((by increasing opportunities for every resident
519	to be more physically active)); address racially and geographically
520	disparate health outcomes; support safe and convenient daily physical
521	activity and social connectivity; protect from exposure to harmful
522	
523	substances and environments; and increase access to opportunities((:
	Land use and zoning actions include)), through actions such as:
524	a. ((c))Concentrating growth <u>, infrastructure, and services</u> into the
525	Urban Growth Area;
526	b. ((p))Promoting <u>((urban)) the development of countywide and local</u>
527	centers;
528	<u>c. ((a))A</u> llowing mixed-use developments;
529	d. ((s)) <u>S</u> upporting access to healthy, affordable retail foods; ((and))
530	e. ((a)) <u>A</u> dding pedestrian and bicycle facilities and connections; and
531	f. Prioritizing affordable housing in high opportunity areas.
532	1. Frontizing anordable nousing in high opportunity areas.
533	
	((U-154)) <u>U-202</u> ((Design_features_of_unincorporated_activity_centers)) <u>New</u>
534	development in centers should include the following:
535	a. Safe and attractive walkways <u>, trails,</u> and bicycle facilities for all
536	ages and abilities with access to ((each)) major destination <u>s,</u>
537	including schools, community ((centers)) <u>facilities,</u> and commercial
538	areas;
539	b. Buildings close to sidewalks ((to promote walking and access to
540	transit));
541	c. Compact design with close grouping of compatible uses;
542	d. Off-street <u>structured</u> parking ((in multistory structures)) located to
542	
	the side or rear of buildings or underground;
544	e. Public art;
545	f. Public spaces, such as plazas and building atriums;
546	g. Retention of attractive natural features, historic buildings <u>,</u> and
547	established character;
548	h. Aesthetic design and compatibility with adjacent uses through
549	setbacks, building orientation, <u>and</u> landscaping ((and traffic
550	control));
551	i. Screening of unsightly views, such as heavy machinery, outdoor
552	storage areas, loading docks, and parking areas from ((the view
553	of)) adjacent uses and from arterials; ((and))
554	the second se
555	
	character of the center while minimizing glare and other adverse
556	visual impacts on nearby residences:((, without limiting their
557	potential contribution to the color and character of the center.))
558	k. Low-impact design features; and
559	I. Recreation space such as pocket parks.
560	
561	((U-108 King County should support the development of Urban Centers to meet
562	
563	the region's needs for housing, jobs, services, culture and recreation
	and to promote healthy communities; improving access to these
564	services helps address social and economic needs of all residents,
565	including disadvantaged communities. Strategies may include
566	exploring opportunities for joint development or transit-oriented
567	development, siting civic uses in mixed-use areas, and leveraging or
568	utilizing existing county assets in urban centers.
569	

570	U-109	King County should concentrate facilities and services within the Urban
571	• • • • •	Growth Area to make it a desirable place to live and work, to increase
572		the opportunities for walking and biking within the community, to
573		more efficiently use existing infrastructure capacity and to reduce the
574		long-term costs of infrastructure maintenance.
575		j
576	U-109a	King County should encourage development, facilities and policies that
577		lead to compact communities that transit can serve efficiently and
578		effectively. As funding permits, King County should partner with
579		jurisdictions and the private sector to spur development of compact
580		communities and infrastructure investments that enhance alternatives
581		t o single occupant vehicles such as transit, safe walking paths and
582		trails, bicycle facilities, car and van pools, and other modes.
583		
584	<mark>U-111</mark>)) <u>U-</u>	203 Development standards for urban areas should emphasize ways to
585		allow maximum ((permitted)) densities and uses of urban land while
586		not compromising the function of critical ((environmental)) areas.
587		((Mitigating measures should serve multiple purposes, such as drainage
588		control, groundwater recharge, stream protection, air quality
589		improvement, open space preservation, cultural and historic resource
590		protection and landscaping preservation. When technically feasible,
591		s)) <u>S</u> tandards should be simple and measurable, so they can be
592		implemented without lengthy review processes.
593	//// / / / / / / / / /	
594	((U-132a))	
595		((innovative)) community gardens and urban agriculture throughout
596		((the public realm of)) residential and commercial areas.
597		
598	<u>U-205</u>	King County should explore ways to encourage property owners to
599		develop vacant and abandoned property.
(00		

600

601 While there are many benefits of focusing growth into centers, one impact of climate 602 change is a greater likelihood ((that the frequency of hazardous)) of extreme heat in 603 urban heat islands ((in urban areas will increase)). The term "heat island" refers to 604 ((urban)) areas where air and surface temperatures ((that)) are higher than the nearby 605 Rural Area((s)) and Natural Resource Lands due to development. Heat islands form as 606 cities replace natural land cover with pavement, buildings, and other built infrastructure. 607 Heat islands exacerbate heat-related illnesses, such as heat exhaustion or heat stroke. 608 Dense urban areas with a lot of paved surfaces and limited shade can be up to 20°F 609 hotter during extreme heat events, when compared to areas with more trees and less 610 pavement. The higher the temperature, the higher the likelihood people will suffer from 611 heat-related illnesses and not be able to cool themselves sufficiently. Homes without air 612 conditioning in urban heat islands may also be more prone to overheating further 613 exacerbating residents' risk of heat-related illness. The heat island effect can be 614 reduced by requiring cool roofs, cool pavements, tree canopy, and other vegetation. 615 ((These tools are discussed in King County's Green Building Handbook. 616

625 ((King County is successfully promoting and supporting policies and programs that 626 focus on the health of students at school. However, the school environment is only one 627 aspect of the overall health of the student.)) The environment surrounding a school and 628 the routes a typical student travels to school or nearby school-related destinations ((also 629 must be considered, including)) can affect health outcomes of youths. Strategies to 630 improve these factors include managing density of retail uses that primarily sell alcohol, 631 tobacco ((and marijuana)), cannabis, and low-nutrition products; enhancing green space 632 sites; creating safe areas to walk and bicycle to school; providing for transit and related 633 facilities; and((-)) reducing exposure to environmental toxins and other types of unsafe 634 environments. 635

((U-113)) U-207 King County shall promote children's health by encouraging and supporting land uses in the environment surrounding a school and on travel routes to schools that complement and strengthen other formal programs, such as Safe Routes to School.

((1.)) A. **Unincorporated Activity Centers** 640

641 Unincorporated activity centers are the primary locations for commercial and industrial 642 development in urban unincorporated King County. White Center and Skyway are the 643 only designated unincorporated activity centers and meet the criteria for countywide 644 centers designation. King County intends to apply for this designation following 645 adoption of the 2024 Comprehensive Plan. ((The North Highline Community Service 646 Area Subarea Plan establishes the size of, and mix of uses allowed in, the White Center 647 Unincorporated Activity Center. The Skyway-West Hill Community Service Area Subarea 648 Plan establishes the size and mix of uses in the Skyway Unincorporated Activity Center. 649

- 650 U-151)) U-208 Within unincorporated activity centers, the following zoning is 651 appropriate: Urban Residential, with a density of ((twelve)) 12 to 652 ((forty-eight)) 48 dwelling units per acre; Community Business; 653 Neighborhood Business; Office; and Industrial. 654
- 655 ((U-150)) U-209 Unincorporated activity centers ((in urban areas)) should provide 656 employment, housing, shopping, services, and ((leisure-time)) other 657 amenities to meet the needs of the local economy. The mix of uses may 658 include: 659
 - a. Health, human service, and public safety facilities;
 - b. Retail stores and services;
 - c. Professional offices;
 - d. Business/office parks;
 - e. ((Multifamily)) Multiunit housing and mixed-use developments;
 - f. Heavy commercial and industrial uses, when there is direct freeway or rail access;
 - g. Light manufacturing;
 - h. Parks and open space; and
 - Farmers Markets. i.
- 670 ((U-152)) U-210 King County may designate new unincorporated activity centers or 671 expand existing unincorporated activity centers only through a subarea 672 planning process that should address: 673
 - a. The relationship and role of the ((entire)) center to its surrounding uses, including adjacent cities and other nearby centers;
 - b. Availability of supporting public services;
 - c. ((The function of the center to other centers in the sub-region;
 - d.)) The need for additional commercial and industrial development;
 - ((e.)) <u>d.</u> The size and boundaries of the center; and
- 679 ((f.)) <u>e.</u> Zoning. 680

681 682 683 684 685 686 687 688 687 688 689 690 691 692 693 694	((U-153)) <u>U</u>	 <u>1-211</u> The size, uses, and boundaries of unincorporated activity centers should ((be consistent with the following criteria)): a. <u>Be</u> ((M))more than ((forty)) <u>40</u> acres in size, excluding land needed for surface water management or protection of ((environmentally)) critical areas; b. <u>Include</u> ((R))retail space based on the amount of residential development planned for the surrounding area to provide for community and local shopping needs; and c. <u>Limit</u> ((R))retail space ((should not exceed)) to a maximum of 60 acres and 600,000 square feet unless ((it is served by direct freeway access by)) located on a principal or minor arterial that connects directly to a freeway and the retail space is well served by transit.
695 696 697 698 699 700 701	((U-158	New major residential, commercial, and mixed-use developments in unincorporated activity centers should include low impact design features and should promote public health by increasing opportunities for physical activity in daily life. The development should include: safe walkways and bicycle facilities for all ages and abilities with access to commercial areas, schools, and community facilities; trails; and pocket parks.

2.)) B. **Community Business Centers** 702

703 Community business centers are primarily retail developments designed to serve a 704 moderately-sized nearby market area ((of 15,000 to 40,000 people. Community 705 business centers should be sited so they do not adversely affect other centers and are 706 easily accessible by motor vehicles or public transportation, walking or bicycling. 707 Community business centers should be designed to be compatible with adjacent 708 residential uses, and should promote pedestrian and bicycle access)). As shown on the 709 ((Urban)) Countywide and Local Centers map at the end of this chapter, these centers 710 include Fairwood, Roxhill, Glendale, and Top Hat. 711

- 712 ((U-159)) U-212 Community business centers in the urban areas should provide 713 primarily shopping and personal services for nearby residents. Offices 714 and ((multifamily housing)) mixed-use development are also 715 encouraged. Industrial and heavy commercial uses should be 716 ((excluded)) limited. Community business centers should include the 717 following mix of uses: 718
 - a. Retail stores and services;
 - b. Professional offices;

719

720

721 722

723

724

725

726

- c. Community and human services;
- d. ((Multifamily)) Multiunit housing as part of a mixed-use development, with higher residential densities ((of at least 12 units per acre when well served by)) near transit; and
- e. Stands or small outlets that offer fresh, affordable fruit and produce and locally produced value-added food products.
- 727 ((U-160)) <u>U-213</u> ((Designated community business centers are shown on the 728 Comprehensive Plan Land Use Map.)) Expansion of existing or 729 designation of new community business centers shall be ((permitted)) 730 allowed only through a subarea plan or area zoning and land use study. 731 ((Redevelopment and infill development of existing community 732 business centers is encouraged.
- 734 U-161)) U-214 Within community business centers, the following zoning is 735 appropriate: Neighborhood Business, Community Business, and Office.

736		
737	((U-162)) <u>U</u>	-215 The specific size and boundaries of community business centers
738		should be ((consistent with the criteria listed below.)) <u>:</u>
739		a. ((More than)) <u>Between</u> 10 acres and ((up to)) 40 acres in size,
740		excluding land needed for surface water management or
741		protection of ((environmentally)) critical areas;
742		b. Designed to provide shopping and services for a market
743		population of 15,000 to 40,000 people;
744		c. Located one to three miles from an unincorporated activity center
745		or from another community business center. May be located less
746		than two miles from a neighborhood business center when it is
747		demonstrated the neighborhood business center will not be
748		adversely affected; and
749		d. ((Must be l)) <u>L</u> ocated at the intersection of two principal or minor
750		arterials.

Landscaping, which may include planters and street trees; g. Appropriate signage;

Neighborhood Business Centers 3.)) <u>C.</u> 767

768 Neighborhood business centers are shopping areas offering convenience goods and 769 services to local residents. Neighborhood business centers are intended to be small and compatible with adjacent residential areas and often are used on the way to 770 771 another destination (for example, a fuel stop before or after commuting). Sometimes 772 they consist of only one use or business. Neighborhood business centers should be 773 designed to promote pedestrian and bicycle access. 774

775 As shown on the ((Urban)) Countywide and Local Centers map at the end of this 776 chapter, King County has seven of these centers, including Avondale Corner, Beverly 777 Park, Jovita, Lake Geneva, Martin Luther King Jr. Way((+)) between 60th Ave((-)) S and 64th Ave((-)) S, Rainier Ave((-)) S((-/)) between S((-)) 114th St((-)) and S((-)) 117th St((-)), and 778 779 Spider Lake. 780

- ((U-164)) <u>U-216</u> Neighborhood business centers in urban areas should include primarily retail stores and offices designed to provide convenient 783 shopping and other services for nearby residents. Industrial and heavy 784 commercial uses should be ((excluded)) prohibited. Neighborhood 785 business centers should include the following mix of uses: 786
 - a. Retail stores and services:
 - b. Professional offices;

781

782

787

788 c. ((Multifamily)) Multiunit housing as part of a mixed-use 789 development ((with residential densities up to 12 units per acre 790 when convenient to a minor arterial. Higher densities are 791 appropriate when the center is a walkable community, convenient 792 to a principal arterial or well-served by transit)); and

793	d. Farmers Markets.
794 795 796 797 798 799 800 801	((U-165)) <u>U-217</u> ((Designated neighborhood business centers are shown on the Comprehensive Plan Land Use Map.)) Expansion of existing or the designation of new neighborhood business centers shall only be ((permitted)) <u>allowed</u> through a subarea <u>plan or area zoning and land</u> <u>use</u> study. ((Redevelopment and infill development of existing neighborhood business centers is encouraged.))
802 803 804	((U-166)) <u>U-218</u> Within neighborhood business centers, the following zoning is appropriate: Neighborhood Business and Office.
805 806 807 808 809 810 811 812 813 814 815 816	 ((U-167)) U-219 The specific size and boundaries of neighborhood business centers should be ((consistent with the criteria listed below.)): a. Ten acres or less in size, excluding land needed for surface water management or protection of ((environmentally sensitive features)) critical areas; b. Designed to provide convenience shopping for a market population of 8,000 to 15,000 people; c. Located within walking distance of transit corridors or transit activity centers; and d. Located one to three miles from another neighborhood business center.
817 818 819 820 821 822 823 824 825 826 827 828 827 828 829 830 831	 ((U-168 Design features of neighborhood business centers should include the following: a. Safe and attractive walkways and bicycle facilities for all ages and abilities; b. Close grouping of stores; c. Off-street parking behind or to the side of buildings, or enclosed within buildings; d. Public art; e. Retention of attractive natural features, historic buildings or established character; f. Landscaping, which may include planters and street trees; g. Appropriate signage; h. Public seating areas; and i. Architectural features that provide variation between buildings or contiguous storefronts.

832 4.))D. Commercial Development Outside of 833 Centers

834 The Commercial Outside of Center (((CO))) Land Use designation recognizes 835 commercial uses predating the adoption of the ((c))<u>C</u>ounty's first Growth Management 836 Act mandated Comprehensive Plan. These isolated unincorporated urban areas ((were 837 and remain)) are located outside a designated ((urban center ())unincorporated activity 838 center, community business center, or neighborhood business center((). The CO 839 designation is also appropriate)) and serve as a transitional designation within certain 840 potential annexation areas. ((In these areas, the county will utilize the memorandum of 841 understanding and applicable Comprehensive Plan policies to determine the 842 appropriate zoning to implement this transitional designation.

844U-169)) U-220Stand-alone commercial developments legally established outside845designated centers in the unincorporated urban area ((may)) should be846recognized with the ((CO)) Commercial Outside of Center designation847and appropriate commercial zoning, including any identified potential848zoning classification. An action to implement a potential zoning

classification shall not require ((a detailed subarea)) an area zoning and land use study, if the current ((CO)) Commercial Outside of Center designation is to remain unchanged. When ((more detailed)) subarea plans are prepared, these developments may be designated as centers and allowed to grow if appropriate, or may be encouraged to redevelop consistent with the residential density and design policies of the Comprehensive Plan.

- 857 ((U-170)) <u>U-221</u> The ((CO)) <u>Commercial Outside of Center</u> designation ((may)) 858 should be applied as a transitional designation in Potential Annexation 859 Areas identified in a signed memorandum of understanding between a 860 city and the ((c))County for areas with a mix of urban uses and zoning 861 ((in order)) to facilitate the joint planning effort directed by the 862 memorandum of understanding. Zoning to implement this transitional 863 designation should recognize the mix of existing and planned uses. No 864 zone changes to these properties to allow other nonresidential uses, or 865 zone changes to allow expansion of existing nonresidential uses onto 866 other properties, should occur unless or until a subarea plan or area 867 zoning and land use study ((with the city)) is completed in consultation 868 with the city.

((The Countywide Planning Policies call for a significant share of new jobs and housing
 to occur within cities and in urban centers, which are areas of concentrated employment
 and housing. The designated urban centers are to accommodate 15,000 jobs within a
 one-half-mile radius of a major transit stop, an average employment density of 50 jobs
 per gross acre and an average of 15 housing units per gross acre. All of the urban
 centers are designated by the Puget Sound Regional Council as Regional Growth
 Centers and all are located in cities.

878 In addition to the urban centers, cities and unincorporated urban King County have 879 existing intensive industrial, commercial and residential areas that will continue to grow 880 and provide employment, services, shopping and housing opportunities, but not at the 881 same level as urban centers. Three categories of centers are established for urban 882 unincorporated areas of King County. Higher density, more-concentrated developed 883 industrial and commercial areas are classified as unincorporated activity centers and are 884 intended to the primary location for this type of commercial development. Midrange 885 centers are called community business centers and smaller, local centers are called 886 neighborhood business centers. The locations of these centers are shown on the Urban 887 Centers map at the end of this chapter. This Comprehensive Plan also recognizes 888 existing commercial and industrial development that is outside of unincorporated 889 activity centers, community business centers and neighborhood business centers.)) 890

- ((U-148)) <u>U-222</u> New commercial and office development shall locate in designated unincorporated activity centers, community <u>business centers</u>, and neighborhood business centers, and in areas designated commercial outside of centers.
- ((U-147)) <u>U-223</u> Business((/)) <u>and</u> office park developments should be located in or adjacent to an unincorporated activity center. They may serve as a transition between office((/)) <u>and</u> retail areas and residential areas. They should be designed to take advantage of on-site or nearby structured parking and((/or bus)) <u>transit</u> service ((and passenger facilities should be compatible with the objective of higher employment densities)).

904 ((Warehouse-style retail businesses, large retail complexes, stadiums, large churches 905 and colleges are examples of land uses that serve as destinations from throughout the 906 region. Such uses require a full range of urban services including transit, substantial 907 parking, and access to arterials and freeways, and therefore should locate in the urban 908 area where these services are available. In addition, these land uses have traffic and 909 impervious surface impacts that are inappropriate for the Rural Area and Natural 910 Resource Lands.))

912 ((U-149)) U-224 New facilities and businesses that draw from throughout the
 913 region, such as large retail uses, large public assembly facilities, and
 914 ((institutions of)) higher education institutions should locate in the
 915 Urban Growth Area.

916 ((6.)) F. Industrial Development

917 Maintaining a strong industrial land supply is an important factor in maintaining the 918 county's economic base and providing family-wage jobs. The following policies assure 919 that industrial development is supported and is also compatible with adjacent land uses 920 while providing appropriate services for employees. In addition, King County is 921 committed to helping return contaminated sites to productive use. 922

- ((U-172)) U-225 Within the Urban Growth Area((, but outside unincorporated activity centers,)) properties with existing industrial uses shall be protected.
 926
- 927U-226The ((c))County ((may)) should use tools such as special district overlays928to identify ((them)) existing industrial uses and address impacts for
property owners and residents of surrounding neighborhoods.930
 - ((U-173)) <u>U-227</u> Industrial development should have direct access from arterials or freeways. Access points should be combined and limited in number to allow smooth traffic flow on arterials. Access through residential areas should be avoided.
 - ((U-174)) <u>U-228</u> Small amounts of retail and service uses in industrial areas may be allowed for convenience to employees and users.
- 939((U-175)) U-229 King County, in collaboration with cities and the development940community, should ((create and fund a process to)) support clean up941and reclaim polluted industrial areas ((in order)) to expand the land942available for industrial development.
- 943 ((4.)) <u>G. Mixed-Use Development</u>

931

932

933

934

935 936

937

938

944 Mixed-use development combines higher density residential units with retail or office 945 uses in the same building or within an integrated development on the same lot. Quality 946 mixed-use developments can provide convenient shopping and services to both 947 residents of the development and those who live nearby. They can help to build a 948 sense of community, as neighboring merchants and residents get to know each other. 949

950 ((Mixed-use is traditional in older downtowns and commercial areas, where offices and 951 retail typically occupy the first floor and residences are upstairs.)) Mixed-use 952 developments can help meet projected housing needs, promote public health, and 953 help provide mitigation for climate change by providing opportunities for people to 954 walk or bicycle to retail shopping <u>and services</u> ((, such as grocery stores with fresh fruits 955 and vegetables and locally produced value-added food products, such as cheese, 956 meats, and preserves)). It provides an opportunity to support ((disadvantaged))

historically underserved communities by clustering public services. If people can replace some of their driving trips with walking, biking, or transit, then vehicle miles traveled will decrease. Further, by placing shopping and services close to where people live, even if some of the trips are made by ((auto)) vehicle, they will be shorter than if the uses had been separated.

A food innovation district is an area of food-related activities supportive of healthy,
 affordable local food. Food innovation districts may encompass food retail, anchor food
 businesses, small food business incubation, food industry education and training,
 markets and food hubs, urban agriculture, food programs and partnerships with urban
 and rural food growers and cooperatives, and food aggregation and processing.

((U-129)) <u>U-230</u> King County ((supports)) <u>should allow</u> mixed<u>-</u>use developments in community and neighborhood business centers, unincorporated activity centers, and in areas designated commercial outside of centers.

((U-130)) <u>U-231</u> ((Design features of m))<u>M</u>ixed-use developments should ((include the following)) <u>be designed to</u>:

- a. Integrate((ion of the retail and/or office)) uses ((and residential units)) within the same building or ((on the same parcel)) property;
- b. ((Quality and appropriate ground level spaces built to accommodate)) Provide retail and office uses on the ground floor;
- c. ((Off-street)) <u>Place</u> parking <u>within</u>, behind, or to the side of the buildings((, or enclosed within buildings)); and
- d. ((Opportunities to have)) Provide safe, accessible pedestrian connections and bicycle facilities ((within the development and to adjacent residential developments)).

((U-131)) <u>U-232</u> In a mixed-use development where residential and nonresidential uses are proposed in separate structures and the residential uses are proposed to be constructed prior to the nonresidential uses, permitting and development reviews should be through a process that ensures an integrated design.

- ((U-132)) <u>U-233</u> In a mixed-use development, incentives such as increases in residential density or floor area ratio should be used to encourage the inclusion of well-designed and accessible public gathering spaces in the site design.
- ((U-132b)) <u>U-234</u> King County shall allow and support mixed-use food innovation districts supportive of affordable, healthy local food.
- 998 ((B.))<u>H.</u> Residential Land Use

990 991

992

993

994

995 996

997

999 ((Housing is the major use of urban land in King County, occupying well over half of the county's developed land area. This plan supports the creation of a full range of housing choices for county residents.)) The Comprehensive Plan proposes ways to develop housing densities so that urban land is used more efficiently, homes are more affordable, more housing choices are available, and densities are adequate to support effective and efficient transit services.

- 1006 ((U-118)) U-235 New residential development in the Urban Growth Area should 1007 occur where facilities and services can be provided at the lowest public 1008 cost and in a timely fashion. The Urban Growth Area ((should have)) 1009 shall include zoning that provides for a variety of housing types, sizes, 1010 and ((prices)) affordability levels, including ((mobile)) manufactured 1011 home parks, ((multifamily development)) apartments, middle housing, 1012 townhouses, and small-lot((;)) single((-family)) detached residential 1013 development. 1014 1015 ((U-181)) U-236 ((Except for existing Fully Contained Community designations, 1016 n))No new Urban Planned Developments or Fully Contained 1017 Communities shall be designated or approved in King County. 1. 1018 **Residential Densities** 1019 ((The density of eight homes per acre expressed below is a long-term goal and would 1020 be an average density of single-family and multifamily developments. Single-family 1021 homes will continue to account for most of the land area used for new development in 1022 the county. This plan proposes ways to develop single-family homes and densities so 1023 that urban land is used more efficiently, homes are more affordable, more housing 1024 choices are available and densities are adequate to support effective and efficient 1025 transit services. Housing at higher densities can promote public health by creating 1026 urban communities that support public transportation and nearby services and thereby 1027 increase opportunities for walking or biking. 1028 1029 U-119)) U-237 King County shall seek to achieve ((through future planning efforts, 1030 over the next 20 years, including collaborative efforts with cities,)) an 1031 average zoning density of at least eight ((homes)) dwelling units per 1032 acre in the ((Urban Growth Area)) urban unincorporated area. ((through 1033 a mix of densities and housing types. A lower density zone may be 1034 used to recognize existing subdivisions with little or no opportunity for 1035 infill or redevelopment. 1036 1037 U-123)) U-238 King County should apply minimum density requirements to all 1038 unincorporated urban residential zones of four or more ((homes)) 1039 dwelling units per acre, except under limited circumstances such as 1040 the: 1041 Presence of significant physical constraints such as those noted in a. 1042 policy U-((120))238, or 1043 b. Implementation of standards applied to a property through a 1044 property-specific development condition((7)) or special district 1045 overlay((, or subarea study)). 1046 1047 ((U-120)) U-239 King County should apply the urban residential, low land use 1048 designation in limited circumstances ((in unincorporated urban areas in 1049 order)) to protect((:)) floodplains, critical aquifer recharge areas, high 1050 function wetlands and unstable slopes from degradation, and the link 1051 these ((environmental features)) critical areas have to a network of 1052 open space, fish and wildlife habitat, and urban separators. The 1053 residential density for <u>this</u> land ((so designated)) should be maintained 1054 at one unit per acre, and lands that are sending sites under the Transfer 1055 of Development Rights Program may transfer density at a rate of at 1056 least four units per acre. 1057 1058 ((U-121)) U-240 ((New multifamily housing should be built to)) King County shall 1059 explore zoning regulations and provisions that increase housing 1060 density and affordability that is compatible with the character and scale 1061
 - ((and design)) of the existing communities((y or neighborhood)),

1062 1063 1064 1065		((while contributing to an area-wide density and)) with a focus on development patterns that support((s)) frequent transit and allow((s)) for a range of housing choices. ((Multifamily housing in unincorporated urban areas should be sited as follows:
1066 1067		 a. In or next to unincorporated activity centers or next to community or neighborhood business centers;
1068		b. In mixed-use developments in centers and activity areas; and
1069		c. On small, scattered parcels integrated into existing urban
1070		residential areas. Over time, zoning should encourage a larger
1071		proportion of multifamily housing to be located on small scattered
1072		sites rather than on larger sites.))
1073		
1074 1075	<u>U-241</u>	King County shall allow for the development of single detached residences
1075		<u>through the splitting of a single residential lot into two residential lots.</u>
1077	((U-122	Land zoned for multifamily uses should be allowed to be converted to
1078		nonresidential zone categories only after new multifamily sites are
1079		identified and rezoned to replace the multifamily housing capacity lost
1080		due to the conversion.
1081		
1082	U-122a	King County should explore zoning policies and provisions and tools
1083		that increase housing density and affordable housing opportunities
1084		within unincorporated urban growth areas, with a focus on areas near
1085		frequent transit and commercial areas.

1086 E:)) 2. Urban Separators ((and the Four-To-One Program))

1110 1111

1112

1113

1114

1115 1116

1117

1087 The Countywide Planning Policies call for the ((c)) county and cities to implement urban 1088 separators. Different from the Rural Area and Natural Resource Lands, these are 1089 low-density areas within the Urban Growth Area that create open space corridors, 1090 provide a visual contrast to continuous development, and reinforce the unique identities 1091 Urban separators can play a significant role in preserving of communities. 1092 ((environmentally)) critical areas and in providing habitat for fish and wildlife. They also 1093 provide recreational benefits, such as parks and trails, and meet the Growth 1094 Management Act's requirement for greenbelts and open space in the Urban Growth 1095 Area. Urban Separators are ((mapped on the Land Use 2008 map in)) designated in the 1096 Countywide Planning Policies and are shown in the Land Use Map at the end of Chapter 1097 1, Regional Growth Management Planning. 1098

((U-182)) U-242 Urban separators ((are corridors of land that define community or municipal identities and boundaries, provide visual breaks in the urban landscape, and link parks and open space within and outside the Urban Growth Area. These urban corridors)) should include and link parks and other lands that contain significant ((environmentally sensitive features)) critical areas, provide fish and wildlife habitat or critical resource protection, contain defining physical features, or contain historic resources. The residential density for ((land so designated)) urban separators should be maintained at one unit per acre, and lands that are sending sites under the Transfer of Development Rights Program may transfer density at a rate of at least four units per acre.

- ((U-183)) <u>U-243</u> King County should ((actively pursue designating urban separators in the unincorporated area and)) work with the cities to establish <u>and</u> <u>maintain</u> permanent urban separators within the incorporated area that link with and enhance King County's urban separator corridors.
- ((U-184)) <u>U-244</u> Designated urban separators should be preserved through park, trail<u>,</u> and open space acquisitions; incentive programs such as the

1118 Transfer of Development Rights Program; the Public Benefit Rating 1119 System Program; and ((regulatory measures)) regulations.

1172

1173

 1121 In accordance with the Countywide Planning Policies, King County has included a minimum density requirement in its zoning regulations for all new urban residential development with a zoned density of four or more homes per acre.

1124 3. Increases of Zoning Density

((While King County supports higher densities in unincorporated urban areas, increased densities that would be incompatible with existing neighborhoods or cause significant impacts on roads, services and the environment are discouraged.)) The following policies will guide decisions on application of densities and proposed rezones.

- ((U-124)) <u>U-245</u> Requests for increases in density of unincorporated urban residential property zoned for one dwelling unit per acre shall be considered unless the property meets the criteria <u>for</u> low land use designation ((in)) <u>as</u> set forth in Policy U-((120))<u>238</u>.
- ((U-125)) <u>U-246</u> King County should <u>only</u> support proposed zoning ((changes)) <u>reclassifications</u> to increase density within the <u>urban</u> unincorporated ((urban)) area when consistent with the ((King County Comprehensive Plan)) Land Use Map and when the following conditions are ((present)) met:
 - a. ((The development will be)) The proposed zoning reclassification is compatible with the character and scale of the surrounding neighborhood;
 - b. ((Urban p))<u>P</u>ublic facilities and services are adequate((,)) <u>and</u> consistent with adopted levels of service and meet ((Growth Management Act)) concurrency requirements((, including King County transportation concurrency standards));
 - c. The proposed ((density change will not increase unmitigated adverse impacts on environmentally)) <u>zoning reclassification will</u> <u>cause no net loss to</u> critical areas<u>;</u> ((or))
 - d. The proposed zoning classification will not increase unmitigated ((adverse)) displacement impacts ((on)) <u>to</u> residents or businesses, either on <u>or adjacent to the</u> site ((or in the vicinity of the proposed development));
 - ((d,)) <u>e.</u> The proposed ((density increase will be)) <u>zoning</u> <u>reclassification is</u> consistent with or contribute<u>s</u> to achieving the goals and policies of ((this)) <u>the</u> ((c))<u>C</u>omprehensive ((p))<u>P</u>lan((,and <u>subarea plan or subarea study, if applicable, or</u>));
 - <u>f.</u> ((t))<u>The ((development)) proposed zoning reclassification</u> is within ((walking distance)) <u>one-quarter mile</u> of transit corridors or transit activity centers((e)) <u>and</u> retail and commercial activities, and is accessible to parks and ((other)) recreation opportunities; and
 - ((e.)) g. An ((equity impact)) analysis has been completed that identifies all potential equity impacts and displacement risk to residents or businesses located on or adjacent to the site proposed for zoning reclassification:
 - For ((area zoning or)) zoning reclassifications initiated by the County, the analysis shall include, at a minimum, ((use of the County's Equity Impact Review tool)) an equity impact review.
 - For zoning reclassifications not initiated by the County, a community meeting shall be held that meets the requirements of ((K.C.C.)) <u>King County Code</u> 20.20.035 prior to submittal of the application. Notice of the community meeting should be provided, at a minimum, in the top six languages <u>other than</u>

1174 1175 1176 1177 1178 1179 1180	English ((identified by the tier map of limited-English-proficient persons maintained by the office of equity and social justice and the county demographer)) <u>spoken in that community</u> . As part of the zoning reclassification application, the applicant shall provide a summary of the feedback provided at the community meeting and a description of how that feedback was incorporated into the proposal.
1181 1182 1183 1184 1185 1186 1187 1188 1189	((U-126)) <u>U-247</u> King County, when evaluating rezone requests, shall consult with the city whose P <u>otential Annexation Area</u> includes the property under review; if a pre-annexation agreement exists, King County shall work with the city to ensure compatibility with the city's pre-annexation zoning for the area. King County shall also notify special purpose districts and local providers of urban utility services and should work with these service providers on issues raised by the proposal.
1190 1191 1192 1193 1194 1195 1196 1197 1198 1199	((As part of its voluntary program with the Federal Aviation Administration to reduce aircraft noise inside residences surrounding the King County International Airport, the County completed a Federal Aviation Administration Part 150 Noise and Land Use Compatibility Study. As part of the study, noise contours were developed and plotted as part of a Noise Mitigation Boundary. Over the past seven years and with available Federal Aviation Administration funding, the County completed a residential sound mitigation program within the Noise Mitigation Boundary. The program provided a variety of noise mitigation components, including insulation, windows, and ventilation to 609 homes surrounding the airport. The program was completed in 2015.
1200 1201 1202 1203 1204 1205 1206	U-127)) U-248 King County shall not support requests for residential density increases or conversion of non-residential property to residential uses on lands located within the outer boundaries of the Federal Aviation Administration approved Noise Mitigation Boundary as identified by Seattle-Tacoma International Airport and King County International Airport.
1207 1208 1209 1210 1211 1212 1213	((Development in the Unincorporated Urban Growth Area at a greater density than permitted by the minimum zoning density, but equal to or less than the maximum zoning density allowed under the Residential Density Incentive Program, will be allowed in exchange for public amenities such as low-income housing, preservation of designated historic features or extra energy conservation measures, or through the transfer of development rights from other parts of the county.
1214 1215 1216 1217 1218	U-128 Density incentives should encourage private developers to: provide affordable housing, significant open space, trails and parks; use the Transfer of Development Rights Program, Low Impact Development and Green Building; locate development close to transit; participate in historic preservation; and include energy conservation measures.
1219 1220	5.)) <u>4.</u> Urban Residential Neighborhood Design and Infill/Redevelopment
1221 1222 1223 1224 1225	((King County unincorporated u)) <u>U</u> rban <u>unincorporated</u> areas should be designed so that residents enjoy them both for their unique character and for the amenities they provide. These areas, through ((local)) subarea planning processes and permitting and design standards, should support development that is of the same quality as adjacent cities.

1227 The high level of amenities and development include outdoor spaces that are usable, 1228 attractive, comfortable, and enjoyable. The design of urban streets, including features 1229 such as parking strips, street trees, alleys, and off-street parking all contribute to the

1226

1230 character of urban neighborhoods. Careful site planning can incorporate 1231 neighborhood features, contribute to aesthetic value, minimize site disturbance, 1232 conserve energy, reduce urban heat, and, in some cases, reduce development costs. 1233 Neighborhood shopping, grocery stores with fresh fruits and vegetables, libraries, 1234 larger parks, and schools ((and public golf courses)) are examples of uses that provide 1235 amenities for nearby residents.

1237 Small retail establishments integrated into residential development (((e.g.,)) such as a 1238 laundromat $((\frac{1}{2}))$ can provide convenient services and help residents reduce 1239 ((automobile)) vehicle trips. ((Urban areas that are interesting and safe for pedestrians 1240 and bicyclists, and that provide many necessary services close to residential 1241 developments, can promote public health by increasing opportunities for physical 1242 activity during daily activities.

1315

1316

1317

1318

1319

1324

- ((U-139a)) <u>U-255</u> King County shall support ((policy and system changes that)) increase<u>d</u> access to affordable, healthy foods ((in neighborhoods)).
- ((U-139b)) <u>U-256</u> King County should allow the creation of local improvement districts, where required to carry out important public functions that are not otherwise able to be carried out by existing local governments.

((Multifamily residential development is important to King County's housing supply because it uses land and energy efficiently and provides opportunities for affordable rental and ownership housing. Multifamily development is defined as one building that contains two or more separate dwelling units. Multifamily developments can be apartments, duplexes, townhouses, or other innovative housing types.

U-140)) U-257 ((Multifamily residential)) Multiunit and mixed-use development should provide common and private open space; variation in facades and other building design features that may include varying window treatments, building colors, and materials; and light fixtures that will give a residential scale and identity to ((multifamily)) multiunit development.

 ((Generally, larger parcels of buildable vacant land in the Urban Growth Area have been preferred for development. Development of these large parcels, especially for attached units at higher densities, often provoked concerns about compatibility due to their scale and design.

As larger vacant lots become increasingly scarce, attention will turn more and more towards smaller vacant lots often located within built neighborhoods (i.e., infill) and to redevelopment. Residential development proposals on small lots and redevelopment often can be an unobtrusive and desirable means of increasing density and affordable housing within existing neighborhoods. Infill development and redevelopment are necessary to achieve growth management objectives such as maximizing the efficient use of land and increasing the variety of housing choices and prices.

1332
1333
1334
1335
1336U-141King County should support infill and redevelopment proposals in
unincorporated urban areas-that serve to improve the overall character
of existing communities or neighborhoods. New development should
consider the scale and character of existing buildings.

1337 5. Commercial)) <u>I.</u> Site Improvement Standards 1338 and Public Services

 1339 ((The following policy governs King County land use regulations and functional plans 1340 that contain improvement standards for the review of proposed rezones and 1341 commercial construction permits.
 1342

1343 1344 1345 1346 1347 1348 1349 1350 1351 1352 1353 1354 1355 1356 1357 1358 1359	 U-171)) U-258 The design and construction quality of development in unincorporated urban areas should meet or exceed the quality in the area's designated annexation city. Residential, ((C))commercial, retail, and industrial developments in the unincorporated urban area should foster community, create enjoyable outdoor areas, and balance needs of ((automobile)) vehicle movement with pedestrian and bicycle mobility and safety. ((Commercial and industrial d))Developments shall provide the following improvements: a. Paved streets and alleys; b. Sidewalks and internal walkways for all ages and abilities and bicycle facilities ((in commercial and retail areas)); c. Adequate parking for employees, business patrons, and ((business users)) residents; d. Safe and comfortable access to transit centers and frequent transit corridors; e. Landscaping along or within streets, sidewalks, and parking areas to provide an attractive appearance;

1424	U-146)) <u>U-261</u> Recreation spaces located in residential developments in the Urban
1425	Area should include amenities such as <u>children's play areas,</u> play
1426	equipment, open grassy areas, barbecues, benches, bicycle racks,
1427	trails, and picnic tables.
1428	
1429	((D. Urban Planned Developments and Fully

1430

1442

((D. Urban Planned Developments and Fully Contained Communities

1431 The Growth Management Act allows, within the designated Urban Growth Area, 1432 development of large land ownerships that may offer the public and the property owner 1433 opportunities to realize mutual benefits when such development is coordinated through 1434 the review process as an Urban Planned Development. Possible public benefits include 1435 greater preservation of public open space, proponent contributions to major capital 1436 improvement needs, diversity in housing types and affordability, and the establishment 1437 of the specific range and intensity of uses for the entire Urban Planned Development. A 1438 property owner and the public could benefit from the efficiency of combined hearings 1439 and land use decision making, as well as the establishment of comprehensive and 1440 consistently applied project-wide mitigations guiding the review of subsequent land use 1441 approvals.

1443 1444 U-176 Sites for potential new Urban Planned Developments may be 1445 designated within the established Urban Growth Area to realize mutual 1446 benefits for the public and the property owner. Two Urban Planned 1447 Developments areas have been designated by the county: the Bear 1448 Creek Urban Planned Development area, comprised of the Redmond 1449 Ridge (formerly known as Northridge) Urban Planned Development, 1450 the Trilogy at Redmond Ridge (formerly known as Blakely Ridge) Urban 1451 Planned Development, and the Redmond Ridge East Urban Planned 1452 Development; and Cougar Mountain Village Urban Planned 1453 Development. Future Urban Planned Development sites in the Urban 1454 Growth Area shall be designated through a subarea planning process, 1455 or through a Comprehensive Plan amendment initiated by the property 1456 owner.

1457	
1458	U-177 The creation of Urban Planned Developments is intended to serve as a
1459	model for achieving a mix of uses, appropriate development patterns,
1460	and high quality design, as well as providing for public benefits that
1461	shall include:
1462	a. Open space and critical areas protection;
1463	b. Diversity in housing types and affordability;
1464	
1465	c. Quality site design; and
	d. Transit and nonmotorized transportation opportunities.
1466	
1467	The Bear Creek Urban Planned Development area was first designated for urban
1468	development in 1989 in the Bear Creek Community Plan. The urban designation of this
1469	area under the Growth Management Act was established in the Countywide Planning
1470	Policies in 1992 and affirmed in 1994. The Bear Creek Urban Planned Development
1471	area was included in the Urban Growth Area designated in the 1994 King County
1472	Comprehensive Plan. Since the adoption of the 1994 Comprehensive Plan, both
1473	Redmond Ridge and Trilogy have been approved as Urban Planned Developments and
1474	King County has entered into development agreements governing the development of
1475	
	these sites. The legality of these development approvals was challenged and these
1476	legal challenges have been rejected. Therefore, these sites will be, and are being,
1477	developed at urban densities.
1478	
1479	Through the adoption of the 2000 King County Comprehensive Plan update, King
1480	County reaffirmed its urban designation of the Bear Creek Urban Planned Development
1481	area. In addition to the reasons that led the County (and the region) to originally
1482	include this area within the County's Urban Growth Area, when the County adopted the
1483	2000 update, it noted that: two sites within this area had been approved for urban
1484	development after the adoption of the original Growth Management Act
1485	
	Comprehensive Plan; significant infrastructure improvements had been made at these
1486	sites; and the ultimate development of these sites was proceeding in accordance with
1487	issued permit approvals. The existence of these urban improvements further supported
1488	a conclusion that this area is characterized by urban growth within the meaning of the
1489	Growth Management Act and was therefore appropriately included within the County's
1490	Urban Growth Area.
1491	
1492	Since the county considered and adopted the 2000 update, significant development
1493	within the Bear Creek Urban Planned Development area has taken place. The Urban
1494	Planned Development permits approved by the county required the construction of
1495	
1495	infrastructure needed to support urban development of the Bear Creek Urban Planned
	Development area. Those infrastructure improvements have now been completed or
1497	are under construction. This includes sanitary sewer trunk lines and pump stations;
1498	water trunk lines, pump stations, and storage facilities; stormwater collection, detention,
1499	treatment and discharge facilities; other utilities; a park and open space system linked
1500	by trails; and required road improvements. In addition, King County has granted final
1501	plat approval for lots for more than 2,100 of the dwelling units approved by the
1502	Redmond Ridge and Trilogy Urban Planned Development permits and more than 1,600
1503	of those dwelling units have been built, are under construction, or have been permitted.
1504	Furthermore, major community facilities and services such as the 18-hole golf course
1505	and clubhouse, the Redmond Ridge Community Center, and the retail center and
1506	grocery store have been completed or are under construction. All of these
1507	
	developments support the conclusion that the Redmond Ridge and Trilogy Urban
1508	Planned Development sites are now fully characterized by and irrevocably committed to
1509	urban growth, and the county therefore reaffirms its urban designation of the Bear
1510	Creek Urban Planned Development area.
1511	
1512	The urban designation of the Bear Creek, now referred to as Redmond Ridge East, has

The urban designation of the Bear Creek, now referred to as Redmond Ridge East, has
 an approved Urban Planned Development permit and a Fully Contained Community

1514 permit that authorized the urban development of Redmond Ridge East. Redmond
 1515 Ridge East is served by the urban infrastructure that has already been constructed to
 1516 serve the Redmond Ridge and Trilogy Urban Planned Development sites.

1517

1564

1565

1566

1567

1568

1569

1570

1571

1518 The county reaffirms its urban designation of the Redmond Ridge East for the following 1519 reasons: this site has always been treated by King County as part of the Bear Creek 1520 Urban Planned Development urban area; this site is adjacent to the urban development 1521 that has already occurred and that will continue to occur at Trilogy and Redmond Ridge; 1522 this site is located in relationship to the rest of the Bear Creek Urban Planned 1523 Development area so as to be appropriate for urban growth; and this site is an area that 1524 will be served by existing urban public facilities and services that have been provided in 1525 accordance with Trilogy and Redmond Ridge Urban Planned Development permit 1526 requirements. 1527

1528 The Growth Management Act allows counties to establish a process, as part of the 1529 Urban Growth Area designation, for reviewing proposals to authorize new Fully 1530 Contained Communities. Criteria for approval of Fully Contained Communities are 1531 contained in Revised Code of Washington (RCW) 36.70A.350. If a county establishes in 1532 its comprehensive plan a process for authorizing Fully Contained Communities, it must 1533 adopt procedures for approving Fully Contained Communities in its development 1534 regulations. King County has established a Fully Contained Community consisting of 1535 the Bear Creek Urban Planned Development area. 1536

- 1537 U-178 King County has established a Fully Contained Community. This one 1538 area is designated through this Comprehensive Plan and is shown on 1539 the Land Use Map as the urban planned community of the Bear Creek 1540 Urban Planned Development area comprised of Trilogy at Redmond 1541 Ridge, Redmond Ridge, and Redmond Ridge East Urban Planned 1542 Development sites. Nothing in these policies shall affect the continued 1543 validity of the approved Urban Planned Development permits for these 1544 sites. This Fully Contained Community designation may be 1545 implemented by separate or coordinated Fully Contained Community 1546 permits.
- 1548
1549U-179The population, household, and employment growth targets and
allocations for the county's Urban Growth Area in this plan include the
Bear Creek Urban Planned Development area. Accordingly, the
requirements in Revised Code of Washington 36.70A.350(2) that the
county reserve a portion of the 20-year population projection for
allocation to new Fully Contained Communities has been satisfied.
- 1555U-180The review and approval process for a Fully Contained Community1556permit shall be the same as that for an Urban Planned Development1557permit, except the following additional criteria shall be met, pursuant1558to the provisions of RCW 36.70A.350:1559a. New infrastructure (including transportation and utilities
 - a. New infrastructure (including transportation and utilities infrastructure) is provided for and impact fees are established and imposed on the Fully Contained Community consistent with the requirements of RCW 82.02.050;
 - b. Transit-oriented site planning and traffic demand management programs are implemented in the Fully Contained Community. Pedestrian, bicycle, and high occupancy vehicle facilities are given high priority in design and management of the Fully Contained Community;
 - c. Buffers are provided between the Fully Contained Community and adjacent non-Fully Contained Community areas. Perimeter buffers located within the perimeter boundaries of the Fully Contained Community delineated boundaries, consisting of either landscaped

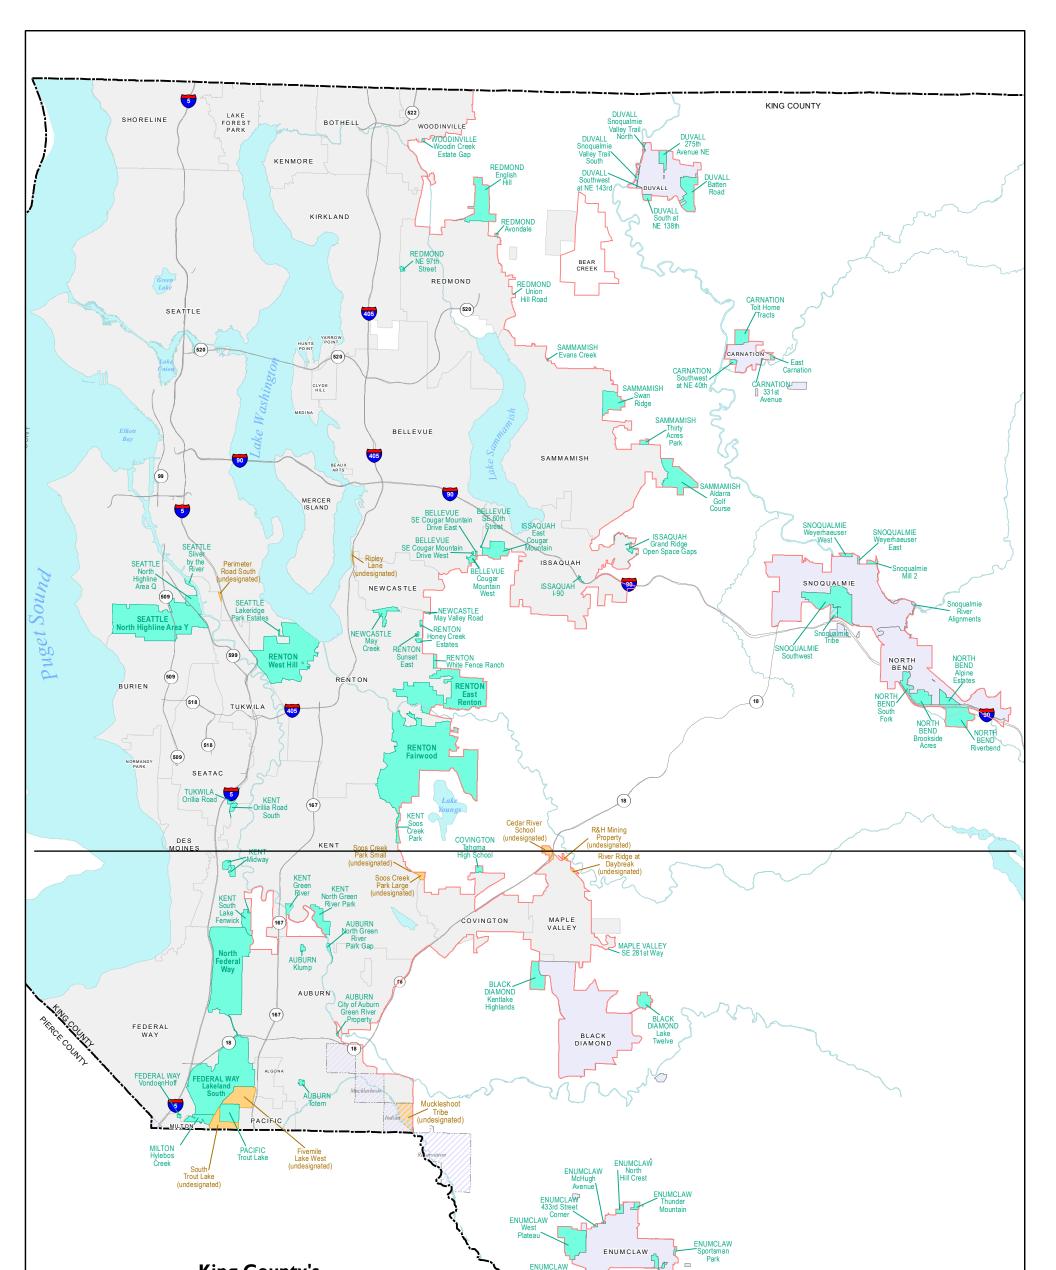

1572 areas with native vegetation or natural areas, shall be provided and 1573 maintained to reduce impacts on adjacent lands; 1574 d. A mix of uses is provided to offer jobs, housing, and services to the 1575 residents of the new Fully Contained Community. No particular 1576 percentage formula for the mix of uses should be required. 1577 Instead, the mix of uses for a Fully Contained Community should be 1578 evaluated on a case-by-case basis, in light of the geography, 1579 market demand area, demographics, transportation patterns, and 1580 other relevant factors affecting the proposed Fully Contained 1581 Community. Service uses in the Fully Contained Community may 1582 also serve residents outside the Fully Contained Community, where 1583 appropriate; 1584 e. Affordable housing is provided within the new Fully Contained 1585 Community for a broad range of income levels, including housing 1586 affordable by households with income levels below and near the 1587 median income for King County; 1588 f. Environmental protection has been addressed and provided for in 1589 the new Fully Contained Community, at levels at least equivalent to 1590 those imposed by adopted King County environmental regulations; 1591 a. Development regulations are established to ensure urban growth 1592 will not occur in adjacent nonurban areas. Such regulations shall 1593 include but are not limited to: rural zoning of adjacent Rural Areas; 1594 Fully Contained Community permit conditions requiring sizing of 1595 Fully Contained Community water and sewer systems so as to 1596 ensure urban growth will not occur in adjacent nonurban areas; 1597 and/or Fully Contained Community permit conditions prohibiting 1598 connection by property owners in the adjacent Rural Area (except 1599 public school sites) to the Fully Contained Community sewer and 1600 water mains or lines; 1601 h. Provision is made to mitigate impacts of the Fully Contained 1602 Community on designated agricultural lands, forest lands, and 1603 mineral resource lands; and 1604 The plan for the new Fully Contained Community is consistent with 1605 the development regulations established for the protection of 1606 critical areas by King County pursuant to RCW 36.70A.170. 1607 1608 For purposes of evaluating a Fully Contained Community permit the 1609 following direction is provided: The term "fully contained" is not 1610 intended to prohibit all interaction between a Fully Contained 1611 Community and adjacent lands but to limit impacts on adjacent lands 1612 and contain them within the development site as much as possible. 1613 "Fully contained" should be achieved through the imposition of 1614 development conditions that limit impacts on adjacent and nearby 1615 lands and do not increase pressures on adjacent lands for urban 1616 development. "Fully contained" is not intended to mandate that all 1617 utilities and public services needed by an urban population both start 1618 and end within the property (since sewer, water, power, and roads, are 1619 of such a nature that the origin and/or outfall cannot reasonably exist 1620 within the property boundaries), but that the costs and provisions for 1621 those utilities and public services that are generated primarily by the 1622 Fully Contained Community (schools, police, parks, employment, retail 1623 needs) be reasonably accommodated within its boundaries and not 1624 increase pressure for more urban development on adjacent properties.

1625 F. Eastside Rail Corridor

The Eastside Rail Corridor is a former freight-rail facility railbanked under the National
 Trails System Act, 16 USC 1247(d), extending approximately 19 miles on its mainline
 from Renton to Woodinville with an approximately seven mile "spur" extending from

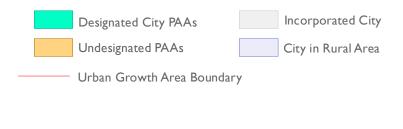

1629 Woodinville to Redmond. King County, the cities of Redmond and Kirkland, Sound 1630 Transit, and Puget Sound Energy have acquired Burlington Northern Santa Fe Railway's 1631 (BNSF) property interests in the Eastside Rail Corridor and have established a shared 1632 policy goal of dual use (recreational trail and public transportation), supporting mobility 1633 through transit, nonmotorized and active transportation, including access to transit 1634 outside the corridor, consistent with its federal railbanked status. The owners share 1635 other multiple objectives for the corridor, including accommodating utilities, parks, 1636 recreation and cultural amenities, and encouraging equitable access to these facilities, 1637 and to housing and jobs, in support of economic opportunity for all King County 1638 residents. 1639

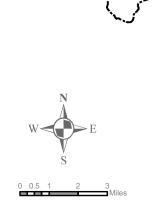

- 1640
1641U-191
adjacent and neighboring jurisdictions, and other interested and
affected parties in support of achieving a vision for the corridor that
includes dual use (recreational trail and public transportation) and
supports multiple objectives, consistent with federal railbanking.
- 1646 U-192 King County shall identify and implement actions that support 1647 development of the Eastside Rail Corridor to include dual use 1648 (recreational trail and public transportation), consistent with federal 1649 railbanking, and to achieve multiple objectives, such as actions to 1650 include property management and maintenance, service and capital 1651 planning and improvements, community and stakeholder engagement, 1652 securing funding to implement priority activities, and other actions. 1653
- 1654
1655U-193King County shall work within all appropriate planning venues and
processes to integrate the Eastside Rail Corridor into land use plans,
transportation system plans, trail system plans, utility plans, and other
plans, including significant capital projects or plans that affect and
relate to dual use (recreational trail and public transportation),
consistent with federal railbanking, and achieving multiple objectives
for the corridor.))

RURAL AREA((S)) AND

NATURAL RESOURCE

1

((

2 3

4

Rural King County is an essential part of the County's rich diversity of communities and lifestyle choices, encompassing landscapes of scenic and great natural beauty. This chapter sets forth the County's intent and policies to ensure the conservation and enhancement of rural communities and natural resource lands. In addressing these Rural Area needs, this chapter also comprises the rural land use designations, such as Rural Area, Rural Neighborhood Commercial Centers, and Rural Towns. It also addresses the designated Natural Resource Lands, which include lands designated Agriculture, Forest, or Mining on the Land Use Map.))

5

6

7 I. Introduction

8 ((1. Growth Management Act Goals, Elements, and 9 Requirements))

The "Rural Area History and Character," "Rural Area Geography," "Rural Densities and Development," and "Rural Commercial centers" ((5))sections ((1 through V)) of this 10 11 12 chapter satisfy the Growth Management Act's mandatory rural element by designating 13 Rural Area lands ((in order)) to limit development and prevent sprawl, by permitting 14 land uses that are supportive of and compatible with the rural character established in 15 the King County Countywide Planning Policies, and by providing for a variety of rural 16 densities. These sections also satisfy the mandatory land use element by indicating the 17 population densities that are appropriate for the Rural Area. The policies in these 18 sections also encourage natural resource-based industries and uses in the Rural Area as 19 required by the Growth Management Act.

20

21 <u>The "Natural Resource Lands"</u> ((5))<u>s</u>ection ((VI)) of this chapter satisfies ((Growth 22 <u>Management Act Goal 8 to maintain and enhance natural resource-based industries;</u>)) 23 the Revised Code of Washington 36.70A.170 requirement to designate Natural 24 Resource Lands; and the Revised Code of Washington 36.70A.080 optional 25 conservation element by conserving Natural Resource Lands.

26

27 Preserving rural King County plays a key role in ensuring a continuing variety of 28 landscapes, maintaining the diverse communities that often portray the <u>county's</u> rural 29 ((legacy)) history and character, and supporting the evolving rural economic 30 opportunities for the county and its residents. The rural landscape is characterized by 31 extensive forests and farm lands, free-flowing rivers and streams that provide 32 high-quality habitat for fish and wildlife, and a mixture of housing types along with small 33 commercial enterprises and business hubs. <u>The</u> Rural Area((s)) and rural-based 34 economies contribute to the range of choices and enhance the quality of life ((of)) for all 35 county residents. ((The Growth Management Act and the King County Strategic Plan 36 envision different landscapes, infrastructure, and level of services for urban and rural 37 communities.)) King County is committed to sustaining rural economic clusters and 38 rural character. 39

40 Traditional rural economic activities have evolved over the decades as residents have 41 responded to changing markets and the expansion of urban areas. Large-scale, 42 commercial forestry and mining have been and continue to be the traditional land uses 43 in the eastern half of King County. Farming continues in the prime soils found in the 44 river valleys and on the Enumclaw Plateau. Although certain historically prevalent types 45 of agriculture such as hops farming have disappeared, and the number of dairy farms 46 has declined, today's farmers are exploring new crops, value-added products, and 47 creative direct marketing. County residents raise livestock, such as poultry, cattle, 48 sheep, ((llamas, alpacas, and buffalo)), hogs, and goats. Equestrian activities, including breeding, training, boarding, and recreation, have become a more significant part of 49 50 the rural economy. The types of businesses now locating in the Rural Towns and Rural 51 Neighborhood Commercial Centers and those being developed as home-based 52 businesses have also responded to these changes in the county, and in the commercial 53 market((-))place.

54 55 ((The glacial soils and terrain that give King County its natural beauty also create 56 significant environmentally critical areas, such as steep, erodible slopes, wetlands and 57 groundwater recharge areas. Maintenance of tree cover, natural vegetation and 58 wetlands are critical to the continued functioning of the ecosystem and preservation of 59 rural character. The interplay of forest cover, soils and water are essential to watershed health, ensuring adequate unpolluted groundwater recharge, stormwater runoff flow
 control and pollution reduction, carbon sequestration and habitat functions.))

62

Conserving <u>the</u> Rural Area((s)) and Natural Resource Lands in King County is integral to
 providing diversity in lifestyle choices; sustaining farming((, livestock,)) and forestry
 economies; protecting environmental quality and wildlife habitat; providing recreation
 opportunities; and maintaining a link to the county's resource-based heritage.

67 ((2. Equity and Social Justice Initiative

68 It is the county's goal to consider Equity and Social Justice in its planning, project 69 development and local government service delivery throughout the Rural Area and 70 Natural Resource Lands. Policies consistent with the county's Environmental and Social 71 Justice Initiative in this chapter are related to local service delivery, natural resources, 72 food systems and economic development determinants, respectively. 73

- In its role as a local government in the unincorporated area, King County is committed
 to work to reduce inequities and provide opportunities by incorporating the values of
 the county's Equity and Social Justice work into the daily practice of developing policies
 and programs, making funding decisions and delivering services.
- 78

79 Policies in this chapter also support healthy built and natural environments by 80 protecting Natural Resource Lands from development and ensuring a mix of land uses 81 that support rural jobs, natural resource-based businesses and conserved open spaces 82 that provide environmental services such as clean air, clean water and wildlife habitat. 83 Agricultural policies support local food systems and provide access to affordable, 84 healthy, and culturally appropriate foods for county residents. Agricultural policies in 85 this chapter that implement the county's 2015 Local Food Initiative address the need to 86 bring additional land into food production, to improve access to technical and financial resources for farmers that need them, and make local food more accessible in 87 88 underserved communities. 89

- Additional policies related to economic development in the agriculture and forestry
 sectors are located in Chapter 10, Economic Development.
- 92

93 The King County Rural Forest Commission and Agriculture Commission advise the 94 county on the development and implementation of strategies, programs, policies and 95 regulations that affect rural communities and resource lands. The members of these 96 advisory boards are chosen to represent the diverse interests of affected rural residents

97 and business owners.

98 3. Rural Area and Communities))

Throughout this chapter and elsewhere the Comprehensive Plan, references are made
 to the "Rural Area" and to "Natural Resource Lands." This terminology aligns with two of
 the three geographies delineated in the Growth Management Act: the Urban Growth
 Area, the Rural Area, and Natural Resource Lands.

 The "Rural Area" (capitalized) is a geography that includes the Rural Area (ra) land use designation and Rural Area (RA) zoning classifications. The Rural Area geography also includes other zoning classifications and land use designations on properties that are also located outside of the Urban Growth Area and Natural Resource Lands, such as Rural Towns and Rural Neighborhood Commercial Centers.

 If only the Rural Area land use designation (ra) or Rural Area zoning (RA) are meant, the words "land use designation" or "zone" (or equivalent term) will be included, respectively.

- "Natural Resource Lands" (capitalized) are a separate geography from the Rural 112 • 113 Area and include lands of long-term commercial significance that are required to be 114 designated and protected under the Growth Management Act, such as Agricultural Production Districts, Forest Production Districts, and Mineral lands. 115 116 There are also other, non-designated resource lands (lower-case) that are not of • long-term commercial significance that occur in the Rural Area geography. 117 118 The term "rural" (lower-case), such as in "rural character" or "rural history," can apply
- <u>The term "rural" (lower-case), such as in "rural character" or "rural history," can apply</u>
 <u>to both the Rural Area and Natural Resource Lands geographies.</u>
- 121 <u>Refer to the Glossary for more information about how these terms are used in the</u>
 122 <u>Comprehensive Plan.</u>
 123

((Understanding and c))<u>C</u>onserving the unique characteristics of the Rural Area and
 ((each of the county's distinct rural communities)) <u>Natural Resource Lands</u> will help King
 County retain its rural character and ((it's)) its agricultural, forestry, and mining heritage.

127

128 King County's Rural Area, including communities such as the Hobart Plateau, Vashon-129 Maury Island, the Snoqualmie Valley, and the Enumclaw Plateau, ((are)) is characterized 130 by low density residential development, farms, ranches, forests, watersheds crucial for 131 both fisheries and flood hazard management, mining areas, ((small cities and towns,)) 132 historic sites and buildings, archaeological sites, and regionally important recreation 133 areas. These rural uses complement and support the more extensive resource uses in 134 the ((designated)) Natural Resource Lands. The location of the Rural Area between the 135 Urban Growth Area and the ((designated)) Natural Resource Lands helps to protect 136 commercial agriculture and timber from incompatible uses.

137

138 Designation and conservation of the Rural Area supports and sustains rural communities 139 and rural character as valued parts of King County's diversity. It also provides choices in 140 living environments; maintains a link to King County's heritage; allows farming((, 141 livestock uses,)) and forestry to continue; and helps protect environmental quality and 142 ((sensitive resources)) critical areas, such as groundwater recharge areas and 143 watersheds crucial for both fisheries and flood hazard management. Rural King County 144 also acts to enhance urban areas by providing ((a safe and reliable local food source,)) nearby open spaces and parks for a variety of recreation and tourism opportunities, 145 146 ((and)) as well as educational opportunities to explore current and ((historic)) historical 147 agricultural and forestry practices. 148

((The purpose of the zoning and land use designations in the Rural Area is to provide
 services and limited goods that satisfy rural residents' and local businesses' daily needs.

152 4. Resource Lands))

153 The growing, ((harvest)) harvesting, extraction, processing, and use of products from 154 ((the)) Natural Resource Lands play an important role in King County's economy by 155 providing jobs and products for local use and export. Agricultural and forest lands also 156 provide scenic views, links to King County's cultural heritage, and environmental 157 benefits such as wildlife habitat, improvements in air and water quality, food security, a 158 climate-resilient ecosystem, and carbon sequestration. In large measure, King County's 159 quality of life is dependent upon the thoughtful planning and sound management of 160 these lands to ensure their long-term conservation and productive use.

161

162 ((The population growth in the Puget Sound Region since 1945 has resulted in the
 163 conversion of agricultural and forest lands to other uses, and the reduction of mining
 164 opportunities. The natural resource land base has diminished for many reasons, among
 165 them the demand for more land for urban land uses, fragmentation of large acreages

into rural residential properties, loss of infrastructure such as local processing facilities
 for resource-based industries, and the high cost of land. Since 1994, when King County
 designated its Resource Lands of long term significance under Growth Management
 Act, it has been much more successful in retaining these areas.

Section VI contains King County's strategy for conservation of these valuable resource
 lands and for encouraging their productive and sustainable management. The strategy
 consists of policies to guide planning, incentives, education, and regulation. Although
 Section VI focuses on the designated Resource Lands of long term commercial
 significance, many of the policies are applicable to farm, forest and mineral lands in the
 Rural Area as well.))

((Rural Area)) <u>Rural History</u>

and

177

170

178

П.

Character

179

180 A. Rural ((Legacy)) <u>History</u> and Communities

King County's rural ((legacy)) history and character is found in ((the rich history of)) its 181 182 rural communities ((and continues today)), in the preservation of the county's historic, 183 cultural, ecological, and archaeological sites, and ((to)) in its rich and varied forestry, 184 agricultural, and mining heritage. ((The)) Development of railroads played a significant 185 role in the ((historic)) historical growth and development of the county((; its legacy)) that 186 is still seen in tourism opportunities in the Cities in the Rural Area such as Skykomish and 187 Snoqualmie. Historic barns and farmhouses are found throughout the agricultural areas 188 of the county. <u>A few commercial-scale ((Lumber)) saw-mills influenced the development</u> 189 of communities, such as ((the Rural Commercial Neighborhood Center of)) in Preston, 190 ((where the mill site is still in existence and historic photos adorn the walls of the community center. Chapter 7, Parks Open Space and Cultural Resources of this 191 192 Comprehensive Plan provides the direction and policies for preserving the county's 193 rural heritage. The policies that relate to conserving the farms and forests in King 194 County are discussed in sections II and VI of this chapter)) which was active from 1896 to 195 1990 and is now preserved as part of Preston Mill Park. 196

197 R-101 King County ((will)) shall continue to preserve and sustain its rural 198 ((legacy)) history, character, and communities through programs and 199 partnerships that support, preserve, and sustain its historic, cultural, 200 ecological, agricultural, forestry, and mining heritage through 201 collaboration with Indian tribes, local and regional preservation and 202 heritage programs, community groups, rural residents, and business 203 owners including forest and farm owners, ((rural communities, towns, 204 and c))Cities in the Rural Area, and other interested ((stakeholders)) 205 parties.

206 B. Rural Character

207 ((The Growth Management Act requires the protection of traditional rural activities and 208 rural character.)) King County is committed to protecting rural character and recognizes 209 that each of its rural communities has distinct and unique characteristics. These 210 communities vary depending on settlement and economic history, geography, and 211 distance from the urbanizing areas of the region. For example, residents of Vashon-212 Maury Island, accessible ((only)) mainly by ferry((, sea or air)), enjoy an island(('s leisurely 213 and scenic)) lifestyle with marine recreational activities. Residents of the hilly gorge 214 region around Black Diamond enjoy numerous recreational opportunities. There are 215 small communities throughout rural King County, such as Hobart and Cumberland, each

with its own unique history and lifestyle. Other communities with rich rural heritages, such as Old Maple Valley, are in transition as development of land in and adjacent to the areas is occurring. In the Snoqualmie Valley, farming is still the mainstay, while further east, the Town of Skykomish has a significant railroad and forestry history.

220

221 Population growth in Puget Sound communities affects rural character everywhere in 222 the region. ((King County was once firmly rooted in agriculture, forestry and mining. 223 However, w))With regional growth both the rural economy and the rural population are 224 changing, as are the expectations of some rural residents for $((\tau))$ county services. Some 225 residents are more accustomed to independent lifestyles focused around resource uses 226 such as farming((, dairying, keeping of livestock,)) or forestry. Other residents and 227 visitors can be surprised by the sights, sounds, and smells associated with rural living; 228 and can be accustomed to higher levels of service and facilities than are traditionally 229 provided in the Rural Area. One of the challenges facing the ((c))County is to provide 230 for a diversity of lifestyle choices while providing public services at rural levels. ((As the 231 county recognizes a profound difference between the nature and character of 232 unincorporated rural King County as compared to the urban areas, it is the intent of the 233 county to continue to provide services at established rural levels that support and help 234 maintain rural character.

235 C. Public Engagement

In order to implement its goals, objectives, and strategies for broader public
 engagement, King County has created several Community Service Areas that
 encompass all of unincorporated King County, including areas without representation
 by any Unincorporated Area Council. The Community Service Areas provide a conduit
 for greater participation by all residents in unincorporated King County and increase
 opportunities for residents to inform county decisions relating to programs and capital
 projects within each Community Service Area.))

²⁴³ III. Rural Area ((Designation)) <u>Geography</u>

A.((Rural Area Designation Criteria)) Designation of the Rural Area Geography

246 The Rural Area ((designation)) in King County represents the multi-use nature of rural 247 lands, including working farms and forests, livestock uses, home-based businesses and 248 housing. The sustainability and enhancement of these areas and their underlying 249 economic health is critical to the range of lifestyle choices available in King County. It is 250 a fundamental objective of the King County Comprehensive Plan to maintain the 251 character of its designated Rural Area. The Growth Management Act specifies that the 252 rural element of comprehensive plans include measures that apply to rural 253 development and protect the rural character of the area (Revised Code of Washington 254 36.70A.070. The Growth Management Act defines rural character as it relates to land 255 use and development patterns (Revised Code of Washington 36.70A.030). Rural 256 development can consist of a variety of uses that are consistent with the preservation of 257 rural character and the requirements of the rural element. In order to implement the 258 Growth Management Act, it is necessary to define the development patterns that are 259 considered rural, historical, or traditional and do not encourage urban growth or create pressure for urban facilities and service. 260

260

The criteria set forth in this section were used to draw the boundaries of the Rural Area designated by this plan.

264

265 266 267 268 269 270 271 272 273 274 275 276 277 278 277 278 279 280 281 282 283 284	R-201	((It is a fundamental objective of the King County Comprehensive Plan to maintain the character of its designated Rural Area. The Growth Management Act specifies the rural element of comprehensive plans include measures that apply to rural development and protect the rural character of the area (Revised Code of Washington 36.70A.070(5). The Growth Management Act defines rural character as it relates to land use and development patterns (Revised Code of Washington 36.70A.030(15). This definition can be found in the Glossary of this Plan.)) Rural development can consist of a variety of uses that are consistent with the preservation of rural character and the requirements of the rural element. In order to implement Growth Management Act, it is necessary to define the development patterns that are considered rural, historical or traditional and do not encourage urban growth or create pressure for urban facilities and service. Therefore;)) King County's land use regulations and development standards shall protect and enhance the following attributes associated with rural character and the Rural Area: a. The natural environment, particularly as evidenced by the health of wildlife and fisheries (especially salmon and trout), aquifers used
285 286 287 288 289 290 291 292 293 294 295 294 295 296 297 298 299 300 301 302 303 304 305 306 307		 for potable water, surface water bodies including Puget Sound and natural drainage systems and their riparian ((corridors)) areas; b. Commercial and noncommercial farming, forestry, fisheries, mining, home((-))_occupations, and home industries; c. Historic resources, historical character, and continuity important to local communities, as well as archaeological and cultural sites important to <u>Indian</u> tribes; d. Community small-town atmosphere, safety, and locally((-))-owned small businesses; e. Economically and fiscally healthy Rural Towns and Rural Neighborhood Commercial Centers with clearly defined identities compatible with adjacent rural, agricultural, forestry, and mining uses; f. Regionally significant parks, trails, and open space for all King <u>County residents;</u> g. A variety of low-density housing choices compatible with adjacent farming, forestry, and mining and not needing urban facilities and services; h. Traditional rural land uses of a size and scale that blend with ((historic)) <u>historical</u> rural development; and i. Rural uses that do not ((include)) primarily ((urban-serving facilities)) <u>serve the urban area</u>.
308 309 310 311 312 313 314 315 316 317 318 319 320 321 322	R-202	 The Rural Area geography shown on the ((King County Comprehensive Plan)) Land Use Map shall include areas that are rural in character and ((meet one or more of the following criteria)) that: a. <u>Have</u> ((Θ))opportunities ((exist)) for significant commercial or noncommercial farming and forestry (large-scale farms and forest lands are designated as Natural Resource Lands); b. ((The area will h))Help buffer nearby Natural Resource Lands from conflicting urban uses; c. ((The area is)) Are contiguous to other lands in the Rural Area, Natural Resource Lands, or large, predominantly ((environmentally)) critical areas; d. ((There are)) Have major physical barriers to providing urban services at reasonable cost, or ((such areas)) that will help foster more logical boundaries for urban public services and infrastructure;

323 324 325 326 327 328 329 330 331 332 333 334 335	 e. ((The area is)) <u>Are</u> not needed for the foreseeable future that is well beyond the 20-year forecast period to provide capacity for population or employment growth; f. ((The area has)) <u>Have</u> outstanding scenic, historic, environmental, resource, or aesthetic values that can best be protected by a rural designation; or g. <u>Have</u> ((5))significant ((environmental constraints)) <u>critical areas that</u> make the area generally unsuitable for intensive urban development.
336 337 338	 Rural Area (encompassing the Rural <u>Area-</u>2.5, Rural <u>Area-</u>5, Rural <u>Area-</u>10, and Rural <u>Area-</u>20 zones), allowing a range of low-density residential developments, forestry, farming, livestock uses, recreation, and a range of traditional rural uses;
339 340	 Rural Town, recognizing historical settlement patterns and allowing commercial uses to serve rural residents; and
341 342 343	 Rural Neighborhood Commercial Centers, allowing small-scale convenience services for nearby rural residents.
344 345 346 347 348 349 350 351 352 353	((While the Growth Management Act, the Countywide Planning Policies and King County's policies and regulations call for protecting the Rural Area by limiting housing densities, there are many other features in addition to density that characterize the Rural Area. Some of the most important features include integration of housing with traditional rural uses such as forestry, farming and keeping of livestock; protection of streams, wetlands and wildlife habitat; preservation of open vistas, wooded areas and scenic roadways; and availability of and reliance on minimal public services. King County is committed to maintaining these features as well, and the policies in this chapter call for continuing and expanding upon these efforts.))

354R-203((King County's)) The Rural Area geography is considered to be
permanent and shall not be redesignated to ((an)) be in the Urban356Growth Area ((until reviewed pursuant to)) except when consistent with
the Growth Management Act (Revised Code of Washington
36.70A.130(((3)))), ((and)) the Countywide Planning Policies, and the
Comprehensive Plan.

B. Forestry and Agriculture in <u>the</u> Rural ((King County)) Area Geography

362 ((The Rural Area includes working farms and forests. These contribute to rural 363 character; the diversity and self-sufficiency of local economies; and open space, wildlife 364 habitat, flood hazard management, and environmental quality. However, Rural Area 365 land in farm and forest use has diminished since 1985, mostly through the conversion of 366 these lands to residential uses. Pressures to convert from resource use include the high 367 land value for alternative uses and the encroachment of residential and other 368 development that conflicts with the resource use.))

369

Although most of King County's agriculture and timber lands are within designated Agricultural and Forest Production Districts, there is a significant land base for agriculture and forestry in the Rural Area. King County has ((studied this land base, has)) mapped agricultural use((;)) and ((has)) identified rural forest areas where forestry will be enhanced and protected. Efforts to conserve ((the)) forest((;)) and farm((; and livestock)) uses are important and include <u>training</u>, technical assistance, and incentive programs such as the Transfer of Development Rights Program (((as presented in Section III))).

- 377 378 R-204 Farming and forestry are vital to the preservation of rural King County 379 and should be encouraged throughout the Rural Area. King County 380 should encourage ((the retention of existing and establishment of 381 new)) rural resource-based uses, with appropriate site management 382 that protects habitat resources. King County's regulation of ((farming, 383 keeping of livestock,)) agriculture and forestry in the Rural Area should 384 be consistent with these guiding principles: 385
 - a. Homeowner covenants for new subdivisions and short subdivisions in the Rural Area should not restrict farming and forestry;
 - b. Development regulations for resource-based activities should be tailored to support the resource use and its level of impact;
 - c. Agricultural and silvicultural management practices should not be construed as public nuisances when carried on in compliance with applicable regulations, even though they may impact nearby residences; and
 - d. County environmental standards for forestry and agriculture should protect environmental quality, especially in relation to water and fisheries resources, while encouraging forestry and farming.
- 397R-205Uses related to and appropriate for the Rural Area include those398relating to agriculture, forestry, mineral extraction, and fisheries, such399as the raising of livestock, growing of crops, ((creating)) creation of400value-added products, and sale of agricultural products; small-scale401((cottage)) home occupations and home402and small-scale tourism uses that rely on a rural location.

404 ((Most of the policies related to agriculture and forestry are found in the Resource Lands 405 section (Section VI) of this chapter. Many of these policies are relevant to agriculture 406 and forestry in the Rural Area as well as in the designated Agricultural and Forest 407 Production Districts.

408

386

387

388

389

390

391

392

393

394

395

396

403

409 The importance of farming and forestry to the Rural Area and Natural Resource Lands was first emphasized in the 1994 Comprehensive Plan. Subsequently, the county took 410 steps to encourage the continuation of farm and forestry practices in the Rural Area and 411 412 Natural Resource Lands, including developing a Farm and Forest Report in 1996. The 413 report recommended a series of actions to protect the rural farm and forest land base as 414 well as the practices of farming and forestry, including the provision of technical 415 assistance to aid property owners in land management, outreach to owners of 416 properties vulnerable to development, creating opportunities for property owners to 417 sell their development rights, and seeking funding for public acquisition of rural 418 properties that had an existing resource-based use. The report also recommended the 419 continuation of the King County Agriculture Commission and the appointment of a Rural 420 Forest Commission to review the impact of proposed regulations on rural forestry and 421 recommend incentive programs.))

422 1. Forestry

423 ((Since 1996, King County has been actively implementing the recommendations of the
 424 *Farm and Forest Report* through the Forestry Program.)) Throughout the Rural Area,
 425 King County encourages small -scale forestry and land stewardship through a variety of
 426 ((land owner incentive)) landowner-focused and community -based programs. ((that))
 427 These programs provide technical assistance and information to promote forest
 428 stewardship that:

429 a. ((Promote forest stewardship through education and technical assistance programs,
 430 such as the Washington State University Extension Forest Stewardship Programs

- 431 b. Provide technical assistance and information to landowner groups and community
 432 associations seeking to implement land/water stewardship, management of
- 433 stormwater runoff, habitat restoration and management plans;
- 434 c. Create opportunities and incentives for voluntary, cooperative management of
 435 woodlots and open space currently in separate ownership;
- 436 d. Offer technical assistance and information to landowners who are interested in
 437 managing their forest for non-timber specialty forest products;
- 438 e. Explore opportunities for providing relief from special levies and assessments;
- 439 f. Conduct projects on King County park lands to demonstrate sustainable forestry
 440 practices,)) Improves forest health and climate resiliency, reduces wildfire risk,
 441 controls stormwater runoff, and improves wildlife habitat; and
- ((g-)) <u>b.</u> ((Provide education and assistance in the control of)) <u>Controls</u> noxious and
 invasive weeds, ((including information on)) <u>through methods such as</u> integrated
 pest management and protection of pollinators((-in accordance with the best
 management practices established by the Environmental Protection Agency and
 Washington State Noxious Weed Control Board, and as implemented by the King
 County Noxious Weeds Program)).
- The ((c))<u>C</u>ounty encourages forest stewardship planning and active forest management as a means of reducing conversion of forestland to other uses, improving forest health <u>and climate resiliency</u>, increasing rural economic prosperity<u>, increasing potential to</u> sequester and store carbon, and reducing risks from wildfire. Hundreds of landowners have written forest stewardship plans and have enrolled in current use taxation programs, ((demonstrating)) which demonstrates a commitment to <u>private</u> forest management.
- 456

457 ((The county has worked with the Rural Forest Commission to identify and propose 458 changes to the King County Code to remove impediments to the implementation of 459 forest stewardship plans. However, t))The small size of most rural forest properties 460 presents ((another)) an obstacle to implementation of private forest stewardship plans. Because the volume of timber harvested at any one time is usually small, it is difficult for 461 462 landowners to find forestry services or log buyers. Many contractors do not consider small sites to be forestland with potential management opportunities, and they have not 463 464 developed the tools and skills to work with small sites. There is untapped potential for work to be done by the private sector on small private forestlands. Outreach to forestry 465 466 consultants and labor contractors concerning the potential small lot forest market is 467 needed. Continuing forestry technical assistance and cost share to landowners, who 468 otherwise are unlikely to pursue management activities, will encourage active forest 469 stewardship and rural economic development. 470

- 471 King County continues to explore ways to facilitate the harvest, utilization, and
 472 marketing of wood products grown in the Rural Area.
 473
- 474 R-206 ((The)) King County shall prioritize conservation of forest land and 475 forestry throughout the Rural Area ((shall remain a priority for King 476 County)). Landowner property tax incentives, technical assistance, 477 permit assistance, regulatory actions, and community-based education 478 shall be used throughout the Rural Area to sustain the forest land base 479 and forestry activities. King County should ensure that its regulations, 480 permitting processes, and incentive programs facilitate and encourage 481 active forest management and implementation of forest stewardship 482 plans. 483
- 484 ((The Forestry Program will)) <u>King County</u> continue<u>s</u> to evaluate additional ways to 485 conserve rural forest lands and encourage forestry. <u>For example, King County's Land</u>

486 Conservation Initiative is a regional collaboration between King County, cities, 487 businesspeople, farmers, environmental partners, and others to conserve the last, most 488 important natural lands and urban green spaces in King County between 2016 and 489 2050. It calls for a series of accelerated actions to address rapidly shrinking open spaces 490 and climbing land prices, which is estimated to save \$15 billion over what it would take 491 under the previous land conservation trajectory and will protect many of these lands 492 before they are lost. The initiative has identified approximately 20,000 acres of 493 forestland that are high priorities for conservation, either through easement or fee title 494 acquisition, or through one of the Current Use Taxation programs. ((In addition, King 495 County has identified properties for acquisition, and has worked)) King County will work 496 in partnership with other jurisdictions and ((stakeholder groups)) community partners to 497 match high priority sites with funding sources for permanent conservation.

498

499 King County owns and manages approximately ((26,000)) <u>30,000</u> acres of forestland. Of 500 this, ((3,850)) <u>4,300</u> acres (<u>14 percent</u>) are designated as working forests((: Taylor Mountain Forest, Ring Hill, Sugarloaf, Island Center, Dockton, Mitchell Hill, Tokul Creek 501 502 and Preston Ridge forests. The county has extended its forest stewardship program to 503 implement active management for forest health on other forested open space 504 properties.)) In support of the goals outlined in the Strategic Climate Action Plan, the 505 County is accelerating development and implementation of forest stewardship plans for 506 County-owned forestland to improve forest health, enhance climate resilience, reduce 507 wildfire risk, and increase potential to sequester carbon. The ((c))<u>C</u>ounty has also 508 conserved more than 142,000 acres of forested properties by purchasing ((the)) 509 development rights and over 230,000 acres of privately-owned forestland through the 510 Current Use Taxation programs. ((These properties remain in either private ownership 511 or under Washington State Department of Natural Resources ownership.))

512

Although economic incentive programs and technical assistance are available to all property owners <u>of forestland</u> in the Rural Area ((interested in pursuing small-scale forestry)), special efforts to maintain forest cover and the practice of sustainable forestry are warranted where there are opportunities to sustain large, contiguous blocks of rural forest <u>adjacent to or in close proximity of the Forest Production District</u>. The Agricultural and Forest Lands map identifies such areas as Rural Forest Focus Areas and notes the locations and boundaries of each focus area.

- King County shall designate Rural Forest Focus Areas ((are identified 521 R-207 522 geographic areas)) where special efforts are necessary and feasible to 523 maintain forest cover and the practice of sustainable forestry. King 524 County shall continue to target funding, when available, ((new)) 525 economic incentive programs, regulatory actions, fee and easement 526 acquisition strategies, and ((additional)) technical assistance to the 527 Rural Forest Focus Areas. Strategies specific to each Rural Forest Focus 528 Area ((shall)) should be developed, employing the combination of 529 incentive and technical assistance programs best suited to each focus 530 area 531
- 532R-208King County should maintain ((The)) Rural Forest Focus Areas ((should
be maintained)) in parcels of 20 acres or more, ((in order)) to retain
large, contiguous blocks of rural forest. Regulations and/or incentives
should seek to achieve a maximum density of one home per 20 acres.

536 2. Farming

((The 1996 Farm and Forest Report provided a series of strategies for conserving
 farmland and sustaining farming both within the designated Agricultural Production
 District where some of the County's best agricultural soils are found and outside the
 Agricultural Production District, where there continues to be a significant amount of
 farming. A 2013 aerial photo survey identified about 12,000 acres of Rural Area land in

542 active agriculture, much of it in livestock production.)) The King County Local Food 543 Initiative is a strategy that aims to build a stronger farm-to-plate pipeline by setting 544 targets and connecting local farms to consumers, increase access to healthy and affordable foods in underinvested areas, support farmers and protect farmland, and 545 546 create a sustainable food system that is more resilient to the effects of climate change. 547 King County has a long history of conserving and sustaining farmland both within and 548 outside of Agricultural Production Districts and continues to adapt strategies in 549 expanding the County's local food economy to ensure job growth, economic viability, 550 and climate resiliency for King County food businesses and farms. Although most active farmland in King County is found within Agricultural Production Districts, approximately 551 552 40 percent of the County's farmland is located in the Rural Area. 553

554R-209King County should develop incentives to encourage agricultural555activities ((in the remaining)) on prime farmlands located outside the556Agricultural Production District. These incentives could include tax557credits, expedited permit review, reduced permit fees, permit558exemptions for activities complying with best management practices559such as regenerative agriculture, assistance with agricultural waste560management, or similar programs.

((The raising and management of livestock and the production of associated products
 are components of the county's agricultural economy. Livestock raised in the county
 includes, but is not limited to, cattle, buffalo, sheep, hogs,(Ilamas, alpacas, goats, and
 poultry.))

567R-210King County shall support((s)) the raising and management of livestock
and the production of related value-added products. The management
of livestock and the lands and structures supporting the raising of
livestock((;)) should be consistent with industry best management
practices ((and must comply with county, state, and federal regulations
related to the specific industry)).573

574 ((Additional policies related to farming can be found in Section VI. Resource Lands.))

575

561

566

576 IV. Rural Densities and Development

577 A. Rural Growth Forecast

((The Growth Management Act requires new growth to be substantially accommodated
 in Urban Growth Areas, yet growth may be permitted outside the Urban Growth Area
 provided it is not urban in character.))

581

The Rural Area and Natural Resource Lands are restricted from accommodating large amounts of growth, but low-density residential development and other traditional rural uses are allowed. ((The Growth Management Act requires that rural development be contained and controlled to ensure the protection of rural character, assure the visual compatibility of rural development with the surrounding Rural Area and Natural Resource Lands, protect environmentally critical areas and habitat, and protect against conflicts with natural resource uses, such as farming, forestry, and mining.

589

In 2009, the Growth Management Planning Council adopted urban area targets to
 accommodate the most recent countywide population projections supplied by the
 state. These urban targets assumed Rural Area and Natural Resource Lands forecast of
 fewer than 6,000 additional housing units during the period 2006 to 2031. No attempt
 has been made to allocate this rural forecast to subareas of rural King County. As

595 targets will not be updated until approximately 2019, these assumptions remain 596 unchanged.))

Rural growth is projected as a part of King County's countywide population projection
and growth target allocation process. While the Rural Area is not assigned a growth
target, the Puget Sound Regional Council's VISION 2050 Regional Growth Strategy
shares are used to project growth in the Rural Area and Natural Resource Lands.
Approximately 4,200 additional housing units during the period 2019 to 2044 are
assumed in the Rural Area and Natural Resource Lands.

604

597

605 ((Since adoption of King County's initial Comprehensive Plan under the Growth 606 Management Act in 1994, annual building permit activity in the Rural Area and on 607 Natural Resource Lands has continued to drop to an average of less than 200 new 608 building permits per year since 2007. Between 2000 and 2010)) Between 2010 and 609 2020, the Rural Area((s)) and Natural Resource Lands grew by about ((4,000)) 500 610 housing units to a total of approximately 49,000 and a population of about 128,000. ((However, the population of these areas actually declined slightly during the decade, 611 and stood at 124,000 in 2010. Since then, the population has grown slightly. 612 613 Application of new zoning measures and other regulatory tools have helped to reduce 614 subdivision activity. The current rate of 200 new homes per year could continue for 615 decades.)) At the current rate of growth, the Rural Area and Natural Resource Lands will continue to have undeveloped lots through the 20-year planning period. 616

617

624

631

632

633

634

635

((The application of lower-density zoning or more restrictive standards could reduce the
creation of new lots, but there are limited opportunities to address development of
existing legal lots. One measure that would slow the growth rate on existing lots would
be the establishment of an annual limit on the number of building permits to be issued
in the Rural Area and on Natural Resource Lands. This alternative would be more
palatable if it were linked to a development rights transfer or purchase program.))

- 625R-301King County shall use all appropriate tools at its disposal to limit
growth in the Rural Area and Natural Resource Lands, such as land use
designations, development regulations, level of service standards, and
incentives, to:
a. Retain ((A)) a low growth rate ((is desirable for the Rural Area ,
including Rural Towns and Rural Neighborhood Commercial
 - including Rural Towns and Rural Neighborhood Commercial Centers, to))<u>;</u> <u>b. ((c))C</u>omply with the State Growth Management Act((,))<u>;</u>
 - <u>c. ((continue preventing))</u> <u>Prevent</u> sprawl<u>, the conversion of rural</u> <u>land</u>, and the overburdening of rural services((;));
 - <u>d. ((r))Reduce the need for capital expenditures for rural roads((,));</u>
- 636 <u>e. ((m))Maintain rural character((,));</u>
- 637 <u>f. ((p))P</u>rotect the environment; and
- 638g. ((r))Reduce ((transportation-related)) greenhouse gas emissions.639((All possible tools may be used to limit growth in the Rural Area.640Appropriate tools include land use designations, development641regulations, level of service standards and incentives.))

642 B. Residential Densities

The low-density residential living choices available in the Rural Area provide an important part of the variety of housing options for King County residents. The residential land use policies in this section, together with their implementing regulations, strike a balance between making rural housing available to those who desire a rural way of life and keeping densities and the number of housing units low enough so they can be supported by a rural level of public facilities and services, be compatible with nearby ((commercial and noncommercial)) farming and forestry, and

650 prevent or significantly reduce adverse impacts of development on the natural 651 environment.

652

659

((These policies and implementing regulations could allow 14,000 to 24,000 more
 housing units at ultimate buildout in addition to the roughly 45,000 residences existing
 in the designated Rural Area in 2000. The Transfer of Development Rights Program will
 help reduce development capacity in the Rural Area, and King County should continue
 to seek other programs that provide economic incentives for property owners to
 voluntarily limit residential development of their land.))

- 660R-302Residential development in the Rural Area should only occur ((as661follows)):662a. In Rural Towns at a variety of densities and housing types as
- 662 663 664 665 666
- <u>services and infrastructure allow</u>, compatible with ((maintenance)) <u>protection</u> of historic resources and community character; ((and)) <u>b. In rural neighborhood commercial centers at low or middle</u>
- densities that support housing co-located with commercial development, compatible with rural character and service levels; and c. Outside Rural Towns and rural neighborhood commercial centers
- 669 670 671

667

668

672

Outside Rural Towns <u>and rural neighborhood commercial centers</u> at low densities compatible with traditional rural character and uses((<u>-</u>)); farming, forestry, <u>and mining</u>; and rural service levels.

673 ((The use of land and the density of development (measured as the number of homes or 674 other structures per acre or per square mile of land) are)) Residential densities are a key 675 determinant((s)) and contributor((s)) to the character of the Rural Area((-s) as described 676 above in Section A. Although human settlement of King County's)). Although the Rural 677 Area has a wide variety of uses and densities, ((both the historical and desirable)) the 678 range of uses and densities defined here are necessarily narrower and less intense than 679 that found in the Urban Growth Area. ((Residential development at very low densities 680 (including the land for accessory uses, on-site sewage disposal and local water supply) 681 consumes or will consume most of the land in the Rural Area.)) Residential density may 682 be the single((7)) most important factor in protecting or destroying rural character that 683 can be influenced by government policies and regulations.

684

Low overall densities in the Rural Area ((will be)) <u>are</u> achieved through very large
minimum lot sizes or limited clustering at the same average densities when facilities and
services permit ((for example, soil conditions allow on-site sewage disposal on smaller
lots))). The Rural Area cannot be a significant source of affordable housing for King
County residents, but it will contain diverse housing opportunities ((through a mix of
large lots, clustering, existing smaller lots)), and higher densities are offered in Cities in
the Rural Area and Rural Towns((;)) (as services <u>and infrastructure permit</u>).

692 693 R-303 Rural Area zoned properties ((should)) shall have low residential 694 densities that: 695 a. ((c))Can be sustained by minimal infrastructure improvements, such 696 as septic systems and rural roads((,)); <u>b.</u> ((should c))<u>C</u>ause minimal environmental degradation and impacts 697 698 to significant historic resources((,)); and 699 c. ((that w))Will not cumulatively create the future necessity or 700 expectation of urban levels of services. 701 702 R-304 ((Rural Area zoned residential densities shall be applied in accordance 703 with R-305 - R-309. Individual zone reclassifications are discouraged 704 and should not be allowed in the Rural Area. Property owners seeking 705 i))Individual zone reclassifications ((should)) are discouraged and 706 should not be allowed in the Rural Area unless the applicant

707 708 709	demonstrate <u>s</u> compliance with <u>the applicable criteria in Policies</u> R-305 - R-((309)) <u>308</u> .
710 711 712 713 714 715 716 717	((Although King County designated Resource Lands and zoned extensive portions of its territory as Agricultural Production Districts or Forest Production Districts, v)) <u>V</u> ery low residential densities adjacent to Natural Resource Lands are essential to minimize land use conflicts. In addition, a significant part of the Rural Area land base is still used for farming or forestry uses. Therefore, suitability of lands for continuing resource uses and proximity to ((designated)) ((n)) <u>N</u> atural Resource Lands ((will be)) <u>are</u> important considerations in applying the lower rural densities.
718 719 720 721 722 723	R-305 A residential density of one home per ((20)) <u>10</u> acres or ((10)) <u>20</u> acres shall be achieved through regulatory and incentive programs on lands in the Rural Area that are managed <u>, preserved, or prioritized</u> for forestry or farming respectively, and <u>lands that</u> are found to qualify for a Rural Forest Focus Area designation in accordance with R-207.
724 725 726 727 728 729 730 731 732 733 734 735 736 737 738 739 740	 R-306 A residential density of one home per 10 acres shall be applied in the Rural Area where: a. The lands are adjacent to or within one-quarter mile of ((designated Agricultural Production Districts, the Forest Production District or legally approved long-term mineral resource extraction sites)) Natural Resource Lands; ((or)) b. The lands contain moderate or significant ((environmentally constrained)) critical areas; ((as defined by county ordinance, policy or federal or state law, or regionally significant resource areas or substantial critical habitat as determined by legislatively approved basin plans or Watershed Resource Inventory Area Plans; and)) or c. ((The predominant lot size is greater than or equal to 10 acres in size)) A residential density of one home per five acres would harm or diminish the surrounding area, burden infrastructure, increase development pressure, or be inconsistent with the development patterns promoted by the Comprehensive Plan.
741 742 743 744 745 746 747 748 747 748 749 750 751 752 753 754 755 756 757	 ((R-308)) <u>R-307</u> A residential density of one home per five acres shall be applied in the Rural Area where: a. <u>The lands are more than one-quarter mile away from Natural Resource Lands;</u> b. The lands ((is)) <u>are physically suitable for development with minimal ((environmentally sensitive features)) critical areas ((or critical habitat as determined by legislatively adopted watershed based plans)); and</u> ((b. Development can be supported by rural services; c. The land does not meet the criteria in this plan for lower density designations; and d. The predominant lot size is less than 10 acres.)) c. This residential density would not harm or diminish the surrounding area, burden infrastructure, increase development pressure, or be inconsistent with the development patterns promoted by the Comprehensive Plan.
758 759 760 761 762 763 764 765	((Although King County intends to retain low residential densities in the Rural Area, residential development has occurred in the past on a wide variety of lot sizes. Both existing homes on small lots and rural infill on vacant, small lots contribute to the variety of housing choices in the Rural Area. In some cases, however, rural-level facilities and services (e.g. on-site sewage disposal, individual water supply systems) may not permit development of the smallest vacant lots. Policy R-309 recognizes that some of the Rural Area has already been subdivided at a density greater than one lot per five acres (for example, parts of the shoreline of Vashon-Maury Island) when the original 1994

766 Comprehensive Plan was adopted, and applied a zoning category to just those 767 properties in existence at that time. Zoning to implement policies R-306 through R-309 768 has been applied through subarea and local plans and area zoning maps.

770 R-309)) R-308 The RA-2.5 zone has generally been applied to properties in the 771 Rural Area((s)) with an existing pattern of lots below five acres in size 772 that were created prior to the adoption of the 1994 Comprehensive 773 Plan. These smaller lots may still be developed individually or 774 combined, provided that applicable standards for sewage disposal, 775 environmental protection, water supply, roads, and rural fire protection 776 can be met. A subdivision at a density of one home per 2.5 acres shall 777 only be ((permitted)) allowed through the Transfer of Development 778 Rights from property in the designated Rural Forest Focus Areas. The 779 site receiving the density must be approved as a Transfer of Development Rights receiving site in accordance with the King County 780 781 Code. Properties on Vashon-Maury Island shall not be eligible as 782 receiving sites.

784 ((Accessory dwelling units provide opportunities for affordable housing, on-site housing 785 for workers and caretakers, housing for extended family members, and rental income 786 for landowners. However, detached accessory dwelling units function similarly to 787 separate homes on separate lots and should be treated as such. When a subdivision is 788 proposed for a property that already has a house and a detached accessory dwelling 789 unit, the house and accessory dwelling unit shall count as two units. For example, on an 790 RA-5 zoned 20 acre parcel, which could be subdivided into four lots, the existing 791 primary dwelling and the accessory unit in a separate building shall count as two of the 792 four units allowed on the site.

793 794

783

769

795 796

797

798 799

800

801

810

811

812

R-310 Accessory dwelling units in structures detached from the primary dwelling shall be counted as a separate dwelling unit for the purpose of lot calculations under the zoning in place at the time of a proposed subdivision.

R-311)) R-309 ((The)) King County ((Residential Density Incentive)) density-based affordable housing ((P))programs shall not be available for development in the Rural Area zones.

Character and Development Standards С. 802

803 The aesthetic qualities and character of the Rural Area depend on a combination of 804 factors, including low densities; a high ratio of undeveloped or undisturbed soil and 805 natural or crop vegetation to development (impervious surfaces), such as roads and 806 structures; historic buildings and landscapes; and minimal development standards, 807 public facilities, and services beyond those needed for environmental protection and 808 basic public health and safety. 809

((R-330)) <u>R-310</u> New subdivisions in the Rural Area should strive to maintain the size and scale of traditional development patterns and rural character.

813 ((R-331)) R-311 New subdivisions in the Rural Area should be designed and 814 developed to maximize conservation of existing forest cover and native 815 vegetation, and to minimize impervious surfaces within individual lots 816 and in the subdivision as a whole. King County ((shall develop 817 additional site design standards for new subdivisions that further 818 reduce the impacts of new homes in the Rural Area)) should continue to 819 evaluate whether existing subdivision standards and new subdivisions 820 in the Rural Area minimize impacts on the natural environment, 821 resource uses, and other adjacent land uses. 822

823 ((R-332)) R-312 Site design standards for new subdivisions in the Rural Area should 824 include: minimization of impervious surfaces; maximizing retention of 825 native soil and vegetation; supporting green stormwater infrastructure; 826 site layout and landscaping that minimizes wildfire risk; limitations on 827 entrance signage; preservation of natural contours, existing meadows, 828 and opportunities for keeping of horses; and other standards to limit 829 features typical of urban or suburban development. 830 831 ((R-333)) <u>R-313</u> Rural residential development adjacent to Agricultural and Forest 832 Production Districts shall be sited to minimize interference with activities related to resource uses. Residences next to the Forest 833 834 Production District shall be built with greater setbacks from the Forest 835 Production District boundaries for safety and to reduce nuisance 836 complaints. 837 838 ((ED-502)) R-314 In the Rural Area and Natural Resource Lands, King County shall 839 provide assistance through development of customized stewardship 840 plans for individual properties, to help property owners understand 841 their properties' characteristics and the potential impacts of their 842 actions, and to make sustainable land management choices that protect 843 natural resources. 844 845 ((R-334)) <u>R-315</u> To maintain traditional rural development patterns and ((assure)) 846 ensure continued opportunities for resource activities in the Rural Area, 847 large lot development is preferred in the Rural Area. Clustering of lots 848 is only ((permitted)) allowed when: 849 a. The development provides equal or greater protection of the 850 natural environment, natural resource lands, historic resources, or 851 archaeological sites; 852 b. Clusters are limited in size to be compatible with surrounding large 853 lots or nearby agricultural and forestry uses; 854 c. The clustered development is offset with a permanent open space 855 or resource land tract preserved for forestry or agriculture, as 856 designated by the owner at time of subdivision or short 857 subdivision, or a permanent open space tract. Under no 858 circumstances shall the tract be reserved for future development; 859 and d. The development can be served by rural facilities and service levels 860 861 (such as on-site sewage disposal and fire protection). 862 863 ((Resource and open space tracts often require stewardship over time to control 864 stormwater runoff and associated pollutants, prevent or control invasive species 865 encroachment and to restore forest health, species diversity, and wildlife habitat 866 structure. 867 868 R-335)) R-316 When a resource or open space tract is created as part of a plat, the 869 ((c))County should require a stewardship plan to ensure appropriate 870 management of the tract. 871 872 ((Low-density development in the Rural Area will have different residential street needs from those in the Urban Growth Area. Travel demand is generally lower on rural roads 873 874 and road maintenance is a proportionately greater per capita cost than in the Urban 875 Growth Area. 876 877 Rural streets and roads outside Rural Towns generally will have no more than two travel 878 lanes, no curbs or sidewalks and feature unpaved shoulders and open drainage ditches. 879 Local access streets for residential subdivisions will constitute a significant proportion of 880 the site disturbance and impervious surface associated with new development in the

Rural Area and therefore must take the environment into consideration equally with
 traffic flow and vehicular access.

883

919

- 884 R-336)) R-317 King County shall continue to support the rural development standards that have been established to protect the natural 885 886 environment by addressing seasonal ((and maximum)) clearing limits, 887 impervious surface limits, and resource-based practices. Stormwater 888 management practices should be implemented that emphasize 889 preservation of natural drainage systems((, protect)) and protection of 890 water quality and natural hydrology of surface waters and 891 groundwater. Rural development standards should also, where 892 feasible, incorporate and encourage ((L))low ((H))impact ((Đ))design 893 principles for managing stormwater ((onsite)) on-site by minimizing 894 impervious surfaces, preserving ((onsite)) on-site hydrology, retaining 895 native vegetation and forest cover, capturing and reusing rainwater, 896 controlling pollution at the source, and protecting groundwater. King 897 County shall take care that requirements for ((onsite)) on-site 898 stormwater management complement requirements for ((onsite)) on-899 site wastewater management. 900
- 901((R-336a To help achieve the goal of reducing energy use and greenhouse gas902emissions associated with new construction, King County should adopt903and implement green building codes that are appropriate, ambitious904and achievable.

905 E. Promoting Public Health in the Rural Area for 906 All))

907 Planning for and features of the built environment are important in providing healthy, 908 safe places for people regardless of whether the setting is rural or urban. The built 909 environment refers to various physical features, such as buildings, parks, and roadways, 910 and their spatial arrangement in neighborhoods and communities. These features 911 influence public health through the range of choices provided for engaging in various 912 activities. For example, well((-))-designed roads can enhance the safety and walkability 913 of neighborhoods, while having a park or other gathering place to come together with 914 family, friends, or community members can strengthen social and mental health and 915 increase community cohesiveness. People with access to places to play are twice as 916 likely to reach recommended levels of physical activity than those who have little or no 917 access. (((See Chapter 2, Urban Communities, for additional information on the 918 linkages between the built environment and various aspects of health.)))

Many locations in King County's Cities in the Rural Area((;)) and Rural Towns((; and Rural Neighborhood Commercial Centers)) function as important hubs for their respective communities because they provide shops and services. Parks, schools, or other public services within walking distance of these community hubs cannot always be safely or conveniently reached without a car. Opportunities for daily physical activity can be increased by establishing safe walking and bicycling connections to and within these rural hubs.

928 In addition to physical activity, another major determinant of health is what people eat. 929 Everything from quality and location of food retail outlets and restaurants to food cost to 930 school food choices influence the food choices of rural residents. ((According to data 931 from national surveys, adults in the United States consume on average only 1.1 and 1.7 932 servings of fruits and vegetables daily.)) There are people in every community for whom 933 hunger is a daily issue. Land use planning can play a role in providing and improving 934 access to healthy foods. Garden plots located in neighborhoods, parks, vacant lots, 935 surplus public rights-of-way, and public utility lands in various communities can be used as places to grow fruits and vegetables, build community, and address hunger. Similar
locations in the Rural Area of King County should be explored for this purpose.

- ((R-516)) <u>R-318</u> ((Within Rural Towns and larger Rural Neighborhood Commercial Centers, non-motorized connectivity, where consistent with rural character,)) <u>Connectivity for active transportation uses</u> should be encouraged in Rural Towns and larger Rural Neighborhood Commercial <u>Centers, where consistent with rural character</u>, to promote ((walking and bicycling)) <u>physical activity</u> and to improve public health.
- 946 ((R-517)) <u>R-319</u> King County should explore ways of creating and supporting
 947 community gardens, ((F))<u>f</u>armers ((M))<u>m</u>arkets, produce stands, and
 948 other similar community((-))<u>-</u>based food growing projects to provide
 949 and improve access to healthy, affordable food for all rural residents.
- 951 ((R-517a)) <u>R-320</u> King County shall promote children's health by encouraging and
 952 supporting land uses in the environment surrounding a school and on
 953 travel routes to schools that complement and strengthen other formal
 954 programs, such as Safe Routes to School, at a size and scale appropriate to
 955 the Rural Area.

956 D. <u>Rural</u> Nonresidential Uses

938

950

966

Although low-density residential development, farming, and forestry are the primary 957 958 uses in the Rural Area, some compatible ((public and private)) nonresidential uses are 959 appropriate and contribute to rural character. Compatible uses might include small, 960 neighborhood ((churches)) religious facilities, feed and grain stores, produce stands, 961 value added products, forest product sales, and home occupations such as 962 woodcrafters, small day care facilities, or veterinary services. In addition, it may be 963 necessary to locate some public facilities in the Rural Area, such as utility installations 964 that serve rural homes. Any allowed nonresidential uses should be designed to blend 965 with rural residential development and resource uses.

967	((R-324)) <u>R-3</u>	21 Nonresidential uses in the Rural Area shall be consistent with the
968		other applicable policies in this chapter and limited to those that:
969		a. Provide convenient local products and services for nearby
970		residents;
971		b. Require location in a Rural Area;
972		c. Support the economic vitality of natural resource-based industries;
973		d. Provide adaptive reuse of significant historic resources; ((or))
974		e. Provide recreational ((and)) <u>or</u> tourism opportunities that are
975		compatible with the surrounding Rural Area;
976		f. Provide or support infrastructure for nearby residents; or
977		g. In Rural Towns and on industrial-zoned properties, involve
978		commercial or manufacturing-related development.
979		
980	<u>R-322</u>	((These)) <u>Nonresidential</u> uses <u>in the Rural Area</u> shall be sited, sized, and
981		landscaped to complement rural character((as defined in policy R-101
982		and R-201)), prevent impacts to the environment, and function with
983		rural services, including on-site wastewater disposal.
984		
985	((R-325)) <u>R-3</u>	<u>23</u> Golf facilities ((shall be permitted)) <u>may be allowed as a conditional</u>
986		use in the RA-2.5 and RA-5 zones and when located outside of Rural
987		Forest Focus Areas((, Regionally Significant Resource Areas and Locally
988		Significant Resource Areas, as a conditional use, in the RA-2.5 and RA-5
989		zones)).
990		
991	R-324	Daycare facilities in the rural area and natural resource lands should
992		serve residents of the rural area or natural resource lands.

993 994 In 2011, a School Siting Task Force was convened at the request of the Growth Management Planning Council to examine the issue of siting schools in the Rural 995 996 Area((s)), including whether they may be served by sewers. The Task Force examined 997 undeveloped rural properties owned by school districts and made recommendations as 998 to their use or disposition. In its final report, the Task Force recommended that all 999 future school siting be consistent with the policies in VISION 2040. Placing schools in 1000 cities in the Rural Area, or in Rural Towns, reduces transportation and environmental 1001 impacts, protects rural character, and allows schools to be served with urban-level 1002 utilities and fire protection and used efficiently for other community activities. Some of 1003 the properties listed in R-326 have already been developed or otherwise no longer apply; however, they are retained here for transparency and guidance for review of 1004 1005 future redevelopment proposals. 1006 1007 ((R-326)) <u>R-325</u> Except as provided in R-((327))<u>326</u>: 1008 a. New schools and institutions primarily serving rural residents shall 1009 be located in ((neighboring)) cities and ((r))Rural ((t))Towns; b. New schools, institutions, and other community facilities primarily 1010 1011 serving urban residents shall be located within the Urban Growth 1012 Area; and 1013 с. New community facilities and services that primarily serve rural 1014 residents shall be located in ((neighboring)) cities and ((r))Rural 1015 ((t))Towns, ((with limited exceptions)) except when ((their use is)) 1016 dependent on a rural location and ((their)) at a size and scale that 1017 supports rural character. 1018 1019 ((R-327)) R-326 Consistent with the recommendations of the School Siting Task 1020 Force, included as Appendix ((Q)) F, in the Rural Area: Except as otherwise provided in subsections d. and e. of this policy, 1021 a. 1022 an existing elementary, middle, or junior high school may be 1023 modified or expanded but shall not be converted to a high school; 1024 b. An existing high school may be modified or expanded or converted 1025 to an elementary, middle, or junior high school; Snoqualmie Valley 1: parcel number 1823099046, as shown on 1026 С. 1027 the King County Department of Assessments map as of March 31, 1028 2012, may develop as a new school; 1029 d. Lake Washington 4: parcel numbers 0825069008 and 0825069056, as shown on the King County Department of 1030 1031 Assessments map as of March 31, 2012, may develop as a new 1032 school and convert an existing school on the site to a high school 1033 use; 1034 e. Tahoma 1: parcel number 2622069047, as shown on the King 1035 County Department of Assessments map as of March 31, 2012, 1036 may develop as a new school and convert an existing school on the 1037 site to a high school use only if no feasible alternative site can be 1038 located within the Urban Growth Area; Lake Washington 2: parcel numbers 3326069010 and 1039 f. 3326069009, as shown on the King County Department of 1040 1041 Assessments map as of March 31, 2012, may develop as a new 1042 school only if no feasible alternative site can be located within the 1043 Urban Growth Area, in which case it may be incorporated into the 1044 Urban Growth Area; and 1045 g. Enumclaw A and D: the rural portions of parcel numbers 1046 2321069064, 2321069063, and 2321069062, as shown on the 1047 King County Department of Assessments map as of March 31, 1048 2012, may develop as ballfields or recreational playfields only, for 1049 a school located on the urban portions of the parcels. 1050

- 1051((R-328)) R-327Small airfields beyond those already established in the Rural Area1052should not be ((permitted)) allowed, due to their cumulative impacts on1053air traffic and nearby uses.
- 1055((R-329)) R-328Library services for the Rural Area should be provided by1056bookmobiles, or by libraries in Rural Towns or Cities in the Rural Area,1057or may be allowed as an accessory use to a park or in a historic building1058in the Rural Area.
- 1060R-329Master planned resorts as defined in Chapter 36.70A Revised Code of1061Washington shall not be allowed in unincorporated King County.
- 1063R-330((Adoption of such codes may result in an increased use of
r))Renewable energy technologies ((that)) may be sited in the Rural
Area((s)) and Natural Resource Lands, as appropriate. Development
standards ((will seek to)) should ensure that the siting, scale, and
design of these facilities respect and support rural character.

1069 ((IV.Rural Public Facilities and Services

1070 The policies below set forth King County's general approach to providing services and 1071 setting facility standards for the Rural Area and provide guidance for siting those 1072 facilities that require Rural Area locations. See Chapter 8, Transportation, and Chapter 1073 9, Services, Facilities and Utilities, for more detailed policies on specific facilities and 1074 services such as roads, on-site sewage treatment and disposal systems and water 1075 supply.

In order t))To focus growth within the Urban Growth Area, financial resources must be 1077 1078 prioritized to develop and maintain sufficient urban infrastructure and services in the 1079 Urban Growth Area to accommodate that growth. Further, the presence of a high level 1080 of public infrastructure and services has been demonstrated to create pressure for new growth. To use financial resources efficiently and reduce growth pressure in the Rural 1081 1082 Area and Natural Resource Lands, King County will not provide an urban level of 1083 infrastructure and services to the Rural Area and Natural Resource Lands. Chapter 8, 1084 Transportation, and Chapter 9, Services, Facilities, and Utilities, clarify King County's 1085 priorities for transportation and other facility improvements in the Rural Area and 1086 Natural Resource Lands. The policies below set forth King County's general approach 1087 to providing services and setting facility standards for the Rural Area and provide 1088 guidance for siting those facilities that require Rural Area locations.

- 1090((R-401)) R-331 King County shall work with cities and other agencies providing1091services to the Rural Area and Natural Resource Lands to adopt1092standards for those partners' facilities and services in the Rural Area1093and Natural Resource Lands. Those standards shall ((that)):1094a. ((p))Protect ((basic)) public health and safety and the
 - environment((, but));
 - b. ((a))<u>A</u>re financially supportable at appropriate densities;
 - c. Are appropriate size and scale; and
 - d. ((d))Do not encourage urban development.
- ((R-402)) <u>R-332</u> Public spending priorities for facilities and services within the Rural
 Area and Natural Resource Lands should be as follows:
 a. First, to maintain existing facilities and services that protect public
 - a. First, to maintain existing facilities and services that protect public health and safety;
 - Second, to upgrade facilities and services when needed to correct level of service deficiencies without unnecessarily creating additional capacity for new growth; and
 - Rural Area((s)) and Natural Resource Lands Page 3-21

1107 1108 1109

1110

1115

c. Third, to support sustainable economic development that is sized and scaled at levels appropriate for <u>the</u> Rural Area((s)) and Natural Resource Lands and does not ((foster)) <u>promote</u> urbanization.

 ((In 2014, King County adopted an update to the Rural Economic Strategies Plan, through Ordinance 17956; this ordinance provides guidance to economic development activities in the Rural Area, as well as on Natural Resource Lands, and is described in more detail in Chapter 10, Economic Development.))

1116 ((R-403)) R-333 In the Rural Area and Natural Resource Lands, standards and plans 1117 for utility service should be consistent with long-term, low-density 1118 development and resource industries. Utility facilities that serve the Urban Growth Area but must be located in the Rural Area or on Natural 1119 Resource Lands (for example, a pipeline from a municipal watershed) 1120 should be designed and scaled to serve primarily the Urban Growth 1121 1122 Area. Sewers needed to serve the previously established ((urban 1123 "islands,")) Redmond Ridge, Redmond Ridge East, and Trilogy 1124 neighborhoods, Cities in the Rural Area, Rural Towns, or new or existing schools pursuant to R-((327))<u>326</u> and ((F-264)) <u>F-452</u> shall be 1125 1126 tightlined and have access restrictions precluding service to other lands 1127 in the Rural Area and Natural Resource Lands.

1128 ((D. Non-Resource Industrial Uses and Development 1129 Standards in the Rural Area))

1130 There are ((three)) existing industrial zoned areas in the Rural Area containing multiple 1131 industrial uses on several sites((. One is located within the southwest portion of the 1132 Town of Vashon. The second is a designated industrial area adjacent to the Rural 1133 Neighborhood Commercial Center of Preston. The Preston Industrial Area recognizes 1134 an existing concentration of industrial uses that contributes to the economic diversity of 1135 the Rural Area, but expansion of this industrial area beyond the identified boundaries is 1136 not permitted (see Policy CP-547). The third industrial area is located along State Route 169 on lands that have been and continue to be used as for industrial purposes and 1137 1138 have a designation as a King County Historic Site.)) in the following locations:

- 1139 <u>Within the southwest portion of Vashon Rural Town;</u>
- 1140 <u>• The Preston Industrial Area;</u>
- 1141 <u>•</u> <u>Along State Route 169;</u>
- 1142 <u>Between Covington and Auburn; and</u>
- 1143 <u>• East of Enumclaw along State Route 410.</u> 1144
- 1145((R-512)) R-334The creation of new Industrial zoned lands in the Rural Area shall1146be limited to those that have long been used for industrial purposes,1147that do not have potential for conversion to residential use due to a1148historic designation, and that may be accessed directly from State1149Route 169.
- 1151((R-513)) R-335Rural Public Infrastructure Maintenance Facilities, and agriculture1152and forestry product processing should be allowed in the Rural Area.1153Other new industrial uses in the Rural Area shall be ((permitted))1154allowed only on existing Industrial zoned properties in Rural Towns1155and ((in the designated industrial area adjacent to the Rural1156Neighborhood Commercial Center of)) the Preston Industrial Area.1157

4450	
1158	((In order to preserve rural character and protect sensitive natural features, new rural
1159	industrial development in the Rural Area needs to be of a scale and nature that is
1160	distinct from urban industrial development. The scale and intensity and many of the
1161	uses allowed in urban industrial development are not appropriate for rural industrial
1162	areas. The following policy applies to all new industrial development in the Rural Area.
1163	
1164	R-514)) <u>R-336</u> Development regulations for new industrial development in the
1165	Rural Area shall require the following:
1166	a. Greater setbacks, and reduced building height, floor/lot ratios, and
1167	maximum impervious surface percentage standards in comparison
	to standards for urban industrial development;
1168	
1169	b. Maximum protection of ((sensitive natural features)) <u>critical areas</u> ,
1170	especially <u>with regards to</u> salmonid habitat and water quality;
1171	c. Building and landscape design that respects the aesthetic qualities
1172	and character of the Rural Area, and provides substantial buffering
1173	from the adjoining uses and scenic vistas;
1174	d. Building ((colors and materials that are muted,)) <u>design that is</u>
1175	<u>compatible with a rural setting,</u> signs that are not internally
1176	illuminated, and site and building lighting that is held to the
1177	minimum necessary for safety;
1178	e. <u>Prohibition of</u> ((H)) <u>h</u> eavier industrial uses, new industrial uses
1179	producing substantial waste byproducts or wastewater discharge,
1180	or new paper, chemical and allied products manufacturing uses
1181	<u>allowed</u> in the urban industrial zone ((shall be prohibited)); and
1182	f. Industrial uses ((requiring)) <u>be sized to avoid</u> substantial
1183	investments in infrastructure <u>,</u> such as water, sewers <u>,</u> or
1184	transportation facilities, or facilities that generate substantial
1185	volumes of heavy-gross weight truck trips((, shall be reduced in
1186	size to avoid the need for public funding of the infrastructure)).
1187	
1188	((The intent of this policy is to preclude expansion of the industrial area beyond the
1189	identified boundaries and to ensure that new development (not previously constructed
1190	or vested) in the industrial area meets rural character standards. Site design,
1191	landscaping, design and construction of internal and access roads and building scale
1192	should reinforce the set boundaries and rural nature of the industrial area to further
1193	discourage future industrial expansion beyond the industrial boundary.))
	discourage future moustrial expansion beyond the moustrial boundary.))
1194	The second se
1195	There are also existing, isolated industrial sites in the Rural Area that are recognized, but
1196	are not appropriate for new industrial uses. Further expansion of these isolated
1197	industrial uses is not encouraged, and therefore they are not zoned Industrial.
1198	
1199	((R-515)) <u>R-337</u> Existing industrial uses in the Rural Area outside of Rural Towns((,
1200	the industrial area on the King County-designated historic site along
1201	State Route 169 or the designated industrial area adjacent to the Rural
1202	Neighborhood Commercial Center of Preston)) <u>without Industrial</u>
1203	<u>zoning currently</u> shall be zoned rural ((residential)) <u>area</u> but may
1204	continue if they qualify as legal , <u>conforming and/or</u> nonconforming
1205	uses.
1206	
	V. Rural Commercial Centers
1207	
1207	

- 1208 ((This section addresses Rural Neighborhood Commercial Centers, Rural Towns, Cities
 1209 in the Rural Area, industrial uses in the Rural Area, and promoting public health in the
 1210 Rural Area.))
- 1211

1212 The Rural Neighborhood Commercial Centers((;)) and Rural Towns((; the Cities in the 1213 Rural Area, and non-resource industrial uses located in rural King County)) contribute to 1214 the vitality of the rural economy. ((Additionally, the Cities in the Rural Area and)) Rural 1215 Towns provide a variety in development patterns and housing choices and provide 1216 employment opportunities, retail shopping, and other services to nearby residents((-)) 1217 ((These cities and towns also)) and contain a significant portion of King County's historic 1218 architecture and are the primary locations for nonresidential uses in the Rural Area. The 1219 Rural Neighborhood Commercial Centers and Rural Towns provide limited, local 1220 convenience shopping, restaurants, and services to meet the daily needs of rural 1221 residents.

1222 A. Rural Neighborhood Commercial Center((s)) 1223 <u>Designation</u>

1224 The Rural Neighborhood Commercial Center((s are)) land use designation is used to 1225 recognize existing small pockets of commercial development((s)), or in some cases, 1226 historic ((towns)) communities or buildings, that are too small to provide more than convenience shopping and services to surrounding residents. They generally do not 1227 1228 have infrastructure or services such as water supply or sewage disposal systems any 1229 different from those serving the surrounding area. ((Examples of Rural Neighborhood 1230 Commercial Centers include the store at Stillwater on the Carnation-Duvall Road, the 1231 town of Cumberland on the Enumclaw Plateau, and Preston. The county is 1232 implementing projects and exploring new options to ensure the continuation of the 1233 character and businesses in these important rural centers.))

1234

1235 <u>The locations of existing nodes of lands designated as Rural Neighborhood Commercial</u>
 1236 <u>Centers are:</u>

Bear Creek/Sammamish:	Cottage Lake and Redmond-Fall City Road/236th NE			
<u>Four Creeks/Tiger</u> <u>Mountain:</u>	<u>Issaquah-Hobart Road/Cedar Grove Road SE, SE</u> <u>Renton-Issaquah Road and 164th Avenue SE, and SE</u> <u>128th Street/164th Avenue SE</u>			
<u>Greater Maple</u> <u>Valley/Cedar River:</u>	<u>Renton-Maple Valley Road SE/State Route 18,</u> Ravensdale, Hobart, Kangley, and Kanasket			
<u>Snoqualmie Valley/</u> Northeast King County:	Preston, Timberlane Village, and Baring			
Southeast King County:	Enumclaw-Black Diamond Road SE/SE Green Valley Road, Cumberland, Krain's Corner, Newaukem, and 228 th Ave SE/State Route 164			
<u>Vashon-Maury Island:</u>	<u>Burton, Dockton, Tahlequah, Portage, Heights Dock,</u> Jack's Corner, Valley Center, Vashon Service Center, Vashon Heights, and Maury Island Service Center			
((R-501)) <u>R-401</u> The <u>uses allowed on lands with the</u> Rural Neighborhood Commercial Center((s designated on the Comprehensive Plan Land Use Map are)) <u>land use designation shall be limited to:</u> <u>a.</u> ((s)) <u>S</u> mall-scale-((business areas)) <u>businesses</u> that ((should)) provide convenience shopping and services for ((the surrounding community)) <u>surrounding Rural Area and Natural Resource Land residents, such as retail, community and human services, and personal services; and <u>b.</u> Housing, when part of a mixed-use development that is appropriately sized and scaled to be compatible with rural character.</u>				
P_402 (/ No))Now	and expansion of existing Pural Neighborhood

 ((No n))<u>New and expansion of existing</u>
 Rural Neighborhood

 1249
 Commercial Centers ((are needed to serve the Rural Area and Natural Rural Area(s)) and Natural Resource Lands - Page 3-24

Resource Lands)) <u>shall only be designated through a subarea plan or</u>
area zoning and land use study. ((Expansion of the boundaries of the
existing Rural Neighborhood Commercial Centers shall not be
permitted except through a subarea study.

- The designated Rural Neighborhood Commercial Centers shown on the Land Use map
 are:
- 1257 Bear Creek: Cottage Lake and Redmond-Fall City Road/236th NE
- 1258 **East King County:** Greenwater, Baring and Timberlane Village 1259 Enumclaw: Cumberland, Krain's Corner and Newaukum 1260 Newcastle: Coalfield and East Renton Plateau Preston and Stillwater 1261 **Snogualmie:** 1262 Tahoma/Raven Heights: Maple Valley, Hobart, Ravensdale and North Cedar 1263 Grove Road 1264 Vashon: Burton, Dockton, Tahleguah, Portage, Heights Dock, 1265 Jack's Corner, Valley Center, Vashon Service Center,

1267
1268 The policies in this section are based on a recognition of the limited size of most Rural
1269 Neighborhood Commercial Centers, the limited utilities and other services available to
1270 them, and a desire to preserve their existing character and relationship to the
1271 surrounding rural community.

Vashon Heights and Maury Island Service Center

- 1273R-502Rural Neighborhood Commercial Centers should accommodate only
small-scale retail, community and human services, and personal service
uses that provide convenience shopping and services to nearby Rural
Area and Natural Resource Lands residents.1277
- 1278 R-503)) R-403 King County commercial development standards for Rural 1279 Neighborhood Commercial Center((s)) lands should facilitate economic 1280 reuse of existing structures, minimize increases in impervious surfaces, 1281 and encourage retention of historic character and scale. Urban-level 1282 parking, landscaping, and street improvement standards are not 1283 appropriate for Rural Neighborhood Commercial Centers except ((as 1284 demonstrated as being)) when needed to address the safety of the 1285 public.
- 1287((R-503a))R-404((Where appropriate,))King County should allow the use of1288existing structures((/)) and parcels to accommodate Farmers Markets1289((within)) on Rural Neighborhood Commercial Center((s)) lands.

1290 B. Rural Towns

1266

1286

Rural Towns are unincorporated towns governed directly by King County((, but may
 provide a focal point for community groups such as chambers of commerce or
 community councils to participate in public affairs)).

1294
1295 The purposes of the Rural Town designation are to recognize existing concentrations of
higher density and economic activity in the Rural Area((, whether by virtue of historical
rural settlements or redesignation of an urban commercial center)); provide a physical
focus for the historic identity of rural communities; and allow for modest growth of
residential and economic uses within these designations if supported by the community
and adequate utilities and other public services are available. ((At the present time,
t))The Rural Towns designated by the Comprehensive Plan are Fall City, Snoqualmie

1302 Pass, and ((the Town of)) Vashon. ((and are recognized as such within the 1303 Comprehensive Plan. The county supports the economic vitality of these communities 1304 and is offering programs and working with the businesses and residents in and near 1305 these communities to help ensure their continued economic health.)) 1306 1307 Each of these three Rural Towns has unique features and needs, and therefore different 1308 standards may be appropriate for each, while meeting the purposes described above. 1309 For instance, Snogualmie Pass is adjacent to a significant seasonal recreation area that 1310 draws thousands of visitors during the winter months. Fall City, on the other hand, is adjacent to prime agricultural land and can provide housing opportunities for seasonal 1311 1312 agricultural workers. Vashon, accessible mainly by ferry and limited in terms of water 1313 supply, has natural constraints upon the type and intensity of development that can 1314 occur. 1315 Although higher-density development in Rural Towns may require public sewers, 1316 applying the full range of urban development standards (e.g. for street improvements 1317 or landscaping) may not be necessary, and may not be consistent with the historic 1318 character of these communities.)) Although Rural Towns ((also)) may ((in some 1319 circumstances)) develop at densities similar to those in the Urban Growth Area ((or in 1320 Cities in the Rural Area)), ((they)) <u>Rural Towns</u> are considered part of the Rural Area for 1321 purposes of the Growth Management Act, do not provide significant growth capacity, 1322 and are not subject to the growth targets adopted for the Urban Growth Area. 1323 1324 ((R-507)) <u>R-405</u> Rural Towns shall serve as activity centers for the Rural Area and 1325 Natural Resource Lands, ((and)) may be served by a range of utilities 1326 and services, and may include several or all of the following land uses, 1327 if supported by necessary utilities and other services and if scaled and 1328 designed to protect rural character: 1329 Retail, commercial, and industrial uses to serve the surrounding a. Rural Area and Natural Resource Lands population; 1330 1331 Residential development, including single((-family)) detached b. 1332 ((housing)) residences on small lots, as well as ((multifamily)) 1333 multiunit housing and mixed-use developments; Other retail, commercial, and industrial uses, such as resource 1334 c. 1335 industries, tourism, commercial recreation, and light industry; and 1336 Public facilities and services such as community services, parks, d. 1337 ((churches)) religious facilities, schools, and fire stations. 1338 1339 ((R-504)) <u>R-406</u> King County designates ((the Rural Towns of)) Fall City, Snoqualmie 1340 Pass, and ((the Town of)) Vashon as unincorporated Rural Towns. These 1341 historical settlements in unincorporated King County should provide 1342 services and a range of housing choices for Rural Area residents. The 1343 boundaries of the designated Rural Towns are shown on the 1344 ((Comprehensive Plan)) Land Use Map. Adjustments to these 1345 boundaries shall only occur through a subarea plan or area zoning and 1346 land use study, and shall not allow significant increases in development 1347 potential or environmental impacts. No new Rural Towns are needed 1348 to serve the Rural Area. 1349 1350 provides ((R-505)) R-407 Commercial industrial development and that 1351 employment, shopping, and community and human services that 1352 strengthen the fiscal and economic health of rural communities should 1353 locate in Rural Towns if utilities and other services permit. 1354 ((Urban-level parking, landscaping, and street improvement standards 1355 are not appropriate for Rural Towns.)) Sidewalks and other pedestrian 1356 safety measures should be provided to serve ((the)) Rural Towns. 1357 1358 R-408 Roads in Rural Towns should, to the extent practical, allowed by law, 1359 and consistent with rural character, incorporate universal design and

1360	complete streets infrastructure, to accommodate multimodal
1361	transportation, including active transportation users.
1362	
1363	((R-506)) <u>R-409</u> Rural Towns may contain higher-density housing than ((permitted))
1364	allowed in the surrounding Rural Area, and should provide affordable
1365	and resource-worker housing ((if utilities and other services permit)).
1366	Development density in Rural Towns may approach that achieved in
1367	Cities in the Rural Area <u>, when appropriate infrastructure is available</u> .
1368	
1369	((The policies in this section apply only to the unincorporated Rural Towns. King County
1370	encourages Cities in the Rural Area to adopt land use policies and development
1371	standards that protect and enhance their historical character.
1372 1373	
1373	R-508)) <u>R-410</u> Sewers may be allowed in Rural Towns if necessary to solve
1374	existing water quality and public health problems ((which)) <u>that</u> cannot
1376	be addressed by other methods, provided that any extension of sewer
1377	mains from urban areas to serve a Rural Town shall be tightlined
1378	systems designed to not serve any intervening lands. All alternatives
1379	shall be exhausted before sewers may be allowed. Rural Towns shall
1380	not be enlarged to facilitate provision of sewers.
1381	
1382	((Rural and urban residents alike value the historic character of King County's Rural
1383	Towns. New development can enhance the character and valuable features of Rural
1384	Towns through careful design and location.
1385	
1386	R-509)) <u>R-411</u> Rural Towns should be compact, promoting ((pedestrian and
1387	nonmotorized travel)) <u>active transportation</u> while ((permitting
1388	automobile)) allowing vehicle access to most commercial and industrial
1389 1390	uses. New development should be designed to strengthen the
1390	desirable characteristics and the historic character of the town, be supported by necessary public facilities and services, and be
1391	compatible with historic resources and nearby Rural Area or Natural
1393	Resource Land uses. New industrial uses should locate where they do
1394	not disrupt pedestrian or bicycle traffic in established retail areas of
1395	town or conflict with residential uses.
1396	<u>VI. Transfer of Development Rights</u>
1397	<u>Program</u>
1398	The Growth Management Act encourages the use of innovative techniques for land use

1398 The Growth Management Act encourages the use of innovative techniques for land use management. King County has a long tradition of using such techniques, including 1399 programs promoting transfers of development rights, to achieve its land management 1400 goals. Rural Area and Natural Resource Lands face ongoing development pressure, yet 1401 1402 the County must simultaneously plan for and allow future residential growth. This 1403 tension makes it incumbent on the County to strengthen its transfer of development 1404 rights efforts. For this reason, King County seeks to increase the number of 1405 development rights transfers via its Transfer of Development Rights Program to reduce 1406 and redirect rural development potential into urban areas. 1407

1408 To that end, King County promotes the transfer of development rights from land 1409 ((valuable to the public as undeveloped)) with conservation values whose protection 1410 creates public benefit ("sending sites"), to land better able to accommodate growth 1411 ("receiving sites"). The Transfer of Development Rights Program is a voluntary program 1412 that allows sending site landowners to achieve an economic return on their property 1413 while maintaining it in forestry, farming, habitat, ((parks,)) or open space in perpetuity. It also increases housing opportunities in Urban Area receiving sites where urban services
 and infrastructure can accommodate additional growth.

1416

1425

1417 Sending site landowners choose to sever the right to develop their land from the land 1418 itself and sell their development rights to the King County Transfer of Development 1419 Rights Bank, or directly to receiving site landowners who are ((permitted)) allowed to 1420 build additional development capacity above the base density, but at or below the 1421 allowed maximum density under current zoning, with the purchase of Transferable 1422 Development Rights. ((When Transferable Development Rights are allocated to sending site property owners, the land is protected from future development in 1423 1424 perpetuity through a conservation easement.))

1426 In so doing, the Transfer of Development Rights Program: (1) benefits Rural Area and 1427 Natural Resource Land property owners by providing them financial compensation to 1428 not develop their land, (2) directs future Rural Area and Natural Resource Land 1429 development growth into urban areas, saving the County the cost of providing services 1430 to rural development, supporting County and regional growth management objectives, 1431 and yielding climate change benefits ((through reduced household 1432 transportation-related greenhouse gas emissions)), and (3) permanently ((preserves)) 1433 conserves land through private market transactions. Transfer of Development Rights 1434 can also be used to permanently protect open space and ((parks)) natural resources in urban portions of the County while still focusing growth into other urban areas. 1435 4 4 - 4

1436				
1437	((R-312)) <u>R-501</u> ((As an innovative means to)) <u>King County shall continue to operate</u>			
1438	an effective Transfer of Development Rights Program to:			
1439		<u>a. ((p))P</u> ermanently ((preserve)) <u>conserve</u> private lands with		
1440		countywide public benefit((,)) <u>;</u>		
1441		<u>b. ((to e))E</u> ncourage higher densities in urban areas <u>;</u> ((and))		
1442		<u>c. ((r))R</u> educe residential development ((capacity)) <u>potential and</u>		
1443		maintain low density in the Rural Area and Natural Resource Lands,		
1444		and on low-density urban lands along the Urban Growth Area		
1445		boundary;		
1446		d. Incentivize establishment of regional open space, as well as local		
1447		open space in urban areas((, King County shall continue to operate		
1448		an effective Transfer of Development Rights Program)):		
1449		e. Protect natural resources while preserving housing potential and		
1450		incentivizing development in locations best suited for growth		
1451		f. Steer development growth inside the Urban Growth Area in ways		
1452		that promote quality urban neighborhoods where residents want		
1453		to work and live; and		
1454		g. Contribute to climate change benefits.		
1455				
1456	((R-313	The purpose of the Transfer of Development Rights Program is to		
1457		reduce development potential in the Rural Area and designated Natural		
1458		Resource Lands, and its priority is to encourage the transfer of		
1459		development rights from private rural properties into the Urban		
1460		Growth Area.		
1461				
1462	R-314	King County supports and shall work actively to facilitate the transfer of		
1463		Rural Area and Natural Resource Lands development rights to:		
1464		a. Preserve the rural environment, encourage retention of		
1465		resource-based uses and reduce service demands;		
1466		b. Provide permanent protection to significant natural resources;		
1467		c. Increase the regional open space system;		
1468		d. Maintain low density development in the Rural Area and Natural		
1469		Resource Lands;		
1470		e. Steer development growth inside the Urban Growth Area in ways		
1471		that promote quality urban neighborhoods where residents want		
1472		to work and live; and

	development rights norm the rular Area and rutarian resource famos
((R-319a	King County should designate urban unincorporated areas a
	Transferrable Development Right receiving sites for short subdivisions
	Use of Transferrable Development Rights in formal subdivisions sha
	be allowed only through a subarea study.))
R-505	King County should prioritize Transferable Development Rights use
	for residential density in urban areas. King County may also allow Transferrable Development Rights:
	a. In limited instances for development in the Rural Area, except for
	Vashon-Maury Island; and
	b. To provide incentives to developers for uses other than addition
	residential density.
((R-320	King County should seek other public funding and private-public
	partnerships for incorporated and unincorporated urban area amenitie to strengthen the Transfer of Development Rights Program an
	facilitate the transfer of development rights from Rural Areas an
	Natural Resource Lands into the King County Urban Growth Area t
	preserve the rural environment, encourage retention of rural an
	resource-based uses, and avoid urban service demands in the Rura
	Area and Natural Resource Lands.
R-320a	King County shall provide amenities to urban unincorporate
	Transferrable Development Right receiving areas to improve th
	livability of the receiving area. Amenities should be provided at leve commensurate with the number of Transferrable Development Righ
	used in the receiving area. The type, timing and location of amenitie
	provided to urban unincorporated Transferrable Development Rig
	receiving areas should be informed by a public engagement proces
	including members of the affected receiving area and the city affiliate
	with annexation.
R-321	King County should pursue public funding and public-privat partnerships, and bond or levy proposals, for additional Transfer of
	Development Rights Bank funding to target threatened private Rura
	Areas or Natural Resource Lands. Development rights purchase
	through such a program should be sold into any appropriate urba
	location.
0 0	
	ural and Resource Land Preservation Transfer
Ð	evelopment Rights Program
Rural Area	and Natural Resource Lands face increasing development pressure, ye
	ust simultaneously plan for, and allow, future development prossure, ye
	akes it incumbent on the county to strengthen its Transfer of Develop
	orts. For this reason, King County seeks to increase the numbe
developm	ent right transfers and adopt an expanded Rural and Resource
Preservatio	on Transfer of Development Rights Program to reduce and redirect
developm	ent potential into the urban areas.
R-322	The goals of the Rural and Resource Land Preservation Transfer of
	Development Rights Program are to: (1) reduce the development
	potential in Rural Area and Natural Resource Lands by 25%; (2) increas

activity in the Transfer of Development Rights market; (3) bolster

demand for Transferrable Development Rights; (4) offer Rural Area and

1645

1646

1647 1648		Natural Resource Lands property owners access to incentive programs; (5) protect low-density Rural Areas from encroaching urban
1649		development; and (6) reduce greenhouse gas emissions by decreasing
1650		vehicle miles traveled from the Rural Area and Natural Resource Lands
1651		and by sequestering carbon.
1652		and by sequestering carbon.
1653	R-323	The Rural and Resource Land Preservation Transfer of Development
1654		Rights Program shall include, but is not limited to, the following:
1655		a. In addition to the density that is allowed on a receiving site in the
1656		urban growth area from the purchase of Transferrable
1657		Development Rights, the county shall evaluate the climate change
1658		benefits achieved by reducing transportation related greenhouse
1659		gas emissions that result from the transfer of development rights
1660		from the sending site, provided that such consideration is not
1661		precluded by administrative rules promulgated by the state;
1662		b. In order to satisfy transportation concurrency requirements in the
1663		Rural Area in a transportation concurrency travel shed that is
1664		non-concurrent, a development proposal for a short subdivision
1665		creating up to four lots may purchase Transferrable Development
1666		Rights from other Rural Area or Natural Resource Land properties in
1667		the same travel shed; allowing this is intended to reduce overall
1668		traffic impacts in rural travel sheds by permanently removing
1669		development potential. The transfer shall not result in an increase
1670		in allowable density on the receiving site. A short subdivision
1671		creating two lots where the property has been owned by the
1672		applicant for five or more years and where the property has not
1673		been subdivided in the last ten years shall satisfy the transportation
1674		concurrency requirements without having to purchase
1675		Transferrable Development Rights;
1676		c. King County shall provide an added density bonus of up to a 100%
1677		increase above the base density allowed in K.C. Code 21A.12.030,
1678		when Transferrable Development Rights are used for projects
1679		within any designated commercial center or activity center within
1680		the Urban Growth Area that provides enhanced walkability design
1681		and incorporates transit oriented development, and may provide
1682		an added density when Transferrable Development Rights are used
1683		for projects that provide affordable housing in the R-4 through R-
1684		48 zones;
1685		d. King County may allow accessory dwelling units in the Rural Area
1686		that are greater than one thousand square feet, but less than 1,500
1687		square feet, if the property owner purchases one Transferrable
1688		Development Right from the Rural Area, Agriculture or Forestry
1689 1690		designations; e. King County may allow a detached accessory dwelling unit on a
1690		RA-5 zoned lot that is two and one-half acres or greater and less
1691		than three and three-quarters acres if the property owner
1693		purchases one Transferrable Development Right from the Rural
1693		Area, Agriculture or Forestry designations.))

1075		

1696 VII. Equestrian Activities

1697 King County recognizes the contributions of equestrian livestock husbandry, training,
 1698 competition, and recreation activities to the overall rural quality of life and economic
 1699 base in King County. ((Equestrian activities provide a lifestyle value to numerous county
 1700 residents and visitors and a source of revenue for rural residents and business owners.
 1701 There are numerous organizations that support the equestrian industry by providing
 1702 education and promoting equine husbandry, including the King County Agriculture
 1703 Program, Washington State University Extension, Future Farmers of America, 4-11, the

1704 King County Executive Horse Council, Backcounty Horsemen, the Enumclaw Forested
 1705 Foothills Recreation Association, and numerous other special interest equestrian-related
 1706 groups.

1707

1716

1724

1725

1726

1727

1728

1737

1740

1750

1751

1752

1753

In recent years the diversity of equestrian uses has expanded throughout the rural 1708 1709 portions of the county, going well beyond the traditional uses of a child and his or her 1710 favorite horse, a 4-II horse show, or a trail ride through the woods.)) Today's equestrian 1711 uses include raising and training a variety of horse breeds((, an increase in the number 1712 of)) and riding arenas((, and the construction of a state-of-the-art horse rehabilitation 1713 facility)). ((This diversity of equestrian uses should be sustained and encouraged where 1714 compatible with the existing character of the area in which equestrian facilities are 1715 proposed to be built or expanded.

Several constraints may limit the development or expansion of equestrian activities.
 Even though the Growth Management Act limits growth in the Rural Area, some growth
 continues to occur throughout the Rural Areas of the county, reducing the availability of
 open land to sustain livestock, equestrian activities, and threatening existing or potential
 trail segments that may be lost to uncoordinated land developments.

R-211)) <u>R-601</u> King County should continue to support and sustain equestrian activities and ensure that regulations support those activities compatible with the area in which they are located. The ((c))<u>C</u>ounty should encourage subdivision layouts that preserve opportunities for livestock and equestrian activities.

((Trail riding throughout rural King County is a popular equestrian use enjoyed by both 1729 1730 urban and rural residents. Although Ilama and alpaca treks are becoming increasingly 1731 popular, most of the trail riding in King County is on horses and mules. Several 1732 constraints, including uncoordinated land development, may limit the continuation, development, or expansion of equestrian trails or trail segments. Additionally, as 1733 1734 ownership of private and/or public land with existing trails is transferred, these trails may 1735 be lost when easements are not in place to protect the trails at the time of the 1736 transaction or if the new owner is not aware that a trail runs across the parcel.

1738 The following policies address the need to continue to support trails for equestrian,
 1739 multi-use, and existing trail linkage purposes.

- 1741 R-212)) R-602 King County should support equestrian use trails throughout the 1742 Rural Area and in the Agricultural and Forest Production Districts, as 1743 appropriate, by: 1744 a. Working with local communities to identify and protect multiple-1745 use trails and key linkages that support equestrian travel; 1746 b. Maintaining equestrian links, including multiple-use trails, where 1747 appropriate; 1748 Ensuring parking areas serving multiple-use trails are designed and c. 1749
 - constructed, whenever possible to handle parking for horse trailers; and
 - d. Constructing and maintaining equestrian trails under County ownership or management consistent with King County Backcountry Trail or Regional Trail Standards whenever possible.

1754 1755 ((R-213)) R-603 Soft-surface multiple-use trails in corridors ((separate from road right-of-way)) not associated with a road are the preferred option for 1756 1757 equestrian travel for safety reasons and to avoid conflicts with 1758 residential activities associated with the ((street)) road. Existing off-1759 road trails should be preserved during site development, with 1760 relocation as appropriate to accommodate development while 1761 maintaining trail connections. Where appropriate, capital

1762	improvement programs for transportation or park facilities shall also
1763	enable the use of new facilities by equestrians. Construction standards
1764	for soft-surface multiple-use trails shall be consistent with current trail
1765	construction and maintenance practices as promulgated by the U.S.
1766	Forest Service.
1767	
1768	<u>R-604</u> The King County Road Design and Construction Standards ((will)) shall
1769	ensure adequate space to accommodate safe equestrian travel within
1770	road rights-of-way. ((Where appropriate, capital improvement
1771	programs for transportation and park facilities shall also enable the use
1772	of new facilities by equestrians. Construction standards for
1773	multiple-use nonmotorized trails to be established in road
1774	rights-of-way within the Rural Area and Natural Resource Lands should
1775	assure a minimum eight-foot-wide gravel shoulder on arterial roads
1776	and 4.0 foot gravel shoulder on local access roads, or provide a trail
1777	separated from the driving lanes by a ditch or other barrier.
1778	Construction standards for soft-surface multiple-use nonmotorized
1779	trails in corridors separate from road rights-of-way shall be consistent
1780	with current trail construction and maintenance practices as
1781	promulgated by the U.S. Forest Service.
1782	
1783	R-214)) R-605 King County's land use regulations should protect rural equestrian
1784	community trails by supporting preservation of equestrian trail links in
1785	the Rural Area and within the Agricultural and Forest Production
1786	District. Representatives of the equestrian community should be given
1787	
	the opportunity to review and monitor regulatory and policy actions by
1788	King County, such as Rural Area development regulations, that have
1789	the potential to affect equestrian trails.
1790	
1791	((R-215)) <u>R-606</u> <u>King County should encourage</u> ((P))property owners in the
1792	Agricultural and Forest Production Districts ((are encouraged)) to
1793	voluntarily allow continued equestrian access to existing trails or
1794	alternative access if the existing trail impedes future use of their
1795	property.
1796	
1797	((R-216)) <u>R-607</u> Equestrian trails should be a category in the (c)) <u>C</u> ounty's Public
1798	Benefit Rating System, so that a landowner who provides trail access
1799	may qualify for a tax reduction under the program.
1800	
1801	((R-217)) <u>R-608</u> County departments negotiating trades or sales of ((c)) <u>C</u> ounty <u>-</u>
1802	<u>owned</u> land shall determine whether any historically established trails
1803	exist on the property, and, when economically feasible, ensure that
1804	those trails are retained or replaced and are not lost as a condition of
1805	the trade or sale. Trails that provide key linkages, for either multi-use
1806	or equestrian trails, shall be considered to have strategic value to the
1808	county's trail network and shall be retained or replaced whenever
1808	
1808	possible.
1007	
1010	VIII. Natural Resource Lands
1810	VIII. <u>IVatural</u> Nesource Lanus
1811	A. ((Ensuring Conservation and Sustainable Use of
1011	
1812	Resource Lands)) <u>Resource Conservation</u>
1012	house Landon <u>house conservation</u>

1813 This section contains King County's strategy for conservation of valuable resource lands
 1814 and for encouraging their productive and sustainable management. The strategy
 1815 consists of policies to guide planning, incentives, education, and regulation. Although

1816 this section focuses on the Natural Resource Lands of long-term commercial

1817 <u>significance, many of the policies are applicable to farm, forest, and mineral lands in the</u>
 1818 Rural Area as well.

1819 King County's Natural Resource Lands ((contribute to the economic prosperity of the 1820 region. They)) are the lands with long-term commercial significance for farming, 1821 forestry, and mineral extraction. Businesses that rely on resource lands provide jobs 1822 and products, such as food, wood, and gravel. ((They also are an important part of the 1823 cultural heritage:)) Conservation and responsible stewardship of working farm and 1824 forest lands also produces multiple environmental benefits, such as:

- Stream and salmon protection;
- Clean air and water;
- Wildlife habitat;
 - Landslide hazard reduction;
 - Flood risk reduction;
 - Groundwater recharge and protection; and
 - Carbon sequestration and reduced greenhouse gas emissions.

For mineral extraction, responsible stormwater management, erosion and sediment
control, and site remediation can help to mitigate many of the impacts while providing
local sources of materials such as sand and gravel.

1836

1828

1829 1830

1831

1832

1837 King County has taken major steps to conserve ((and manage agricultural soils and 1838 activities,)) farmland and forestland to support commercial agriculture and forestry 1839 ((and)), while also allowing for regulated extraction of minerals ((extraction 1840 opportunities)). Natural Resource Lands and the industries they support are conserved 1841 by encouraging development to occur primarily in the Urban Growth Area as directed 1842 by the Growth Management Act. Under this Comprehensive Plan, Natural Resource Lands, including designated Agricultural Production Districts, the Forest Production 1843 1844 District, and sites of long-term commercial significance for mineral resource uses, will 1845 have minimal new residential and commercial development. New development that 1846 does occur will be designed to be compatible with active resource-based uses.

1847

1848 ((This chapter contains King County's strategy for conservation of these valuable
 1849 Resource Lands and for encouraging their productive and sustainable management.
 1850 The strategy consists of policies to guide planning, incentives, education, regulation and
 1851 purchase or transfer of development rights.))
 1852

- 1853 Forest, agriculture, and mineral resource lands are not King County's only natural 1854 resources. Many other resource -based industries, such as the <u>recreational and</u> 1855 <u>commercial</u> fisheries ((industry)) industries, are influenced by King County's land use 1856 and planning policies. Policies for the protection and enhancement of fisheries, as well 1857 as air, water, vegetation, wildlife, and other natural resources, can be found in Chapter 1858 5, Environment.
- 1859
- 1860 ((The Rural Forest Commission was established in 1997 to represent the diversity of 1861 forest interests in King County. The Commission reviews the development and 1862 implementation of strategies, programs, policies and regulations that benefit forestry 1863 and advises the county on ways to preserve rural forests and promote rural forestry.
- 1864

R-601)) R-701The Rural Forest Commission shall advise the King County1866Executive and Council on the development and implementation of1867((innovative)) strategies, programs, policies, and regulations that1868benefit forestry ((and)), that encourage the retention of the forest land1869base in King County, and that support rural forest landowners. King1870County shall continue to support the Rural Forest Commission with staff1871and other resources.

1873 ((In 1994, the Agriculture Commission was established as a forum for farmers to take an
 1874 active role in land use decisions, policies and regulations affecting commercial
 1875 agriculture. The commission solicits input from agricultural agency technical advisors
 1876 and others with land use and technical expertise, as well as other affected groups.))

- 1878 ((R-602)) <u>R-702</u> The Agriculture Commission shall advise the King County Executive and Council on ((agricultural issues and programs, including, but not limited to:
 1881 a. Existing and proposed legislation and regulations affecting
 - a. Existing and proposed legislation and regulations affecting commercial agriculture;
 - b. Land use issues that affect agriculture; and
- 1884c. Ways to maintain, enhance and promote agriculture and
agricultural products in the region.)) programs, policies,
regulations, and land use issues that affect commercial agriculture,
encourage retention of farmland, support farmland access for
traditionally underinvested communities, and contribute to a
strong local food system. King County shall continue to support
the Agriculture Commission with staff and other resources.

1891 ((B. Resource Conservation Strategy

1892 In 1985, the King County Comprehensive Plan designated the county's initial Forest 1893 Production District and five Agricultural Production Districts. Subsequent)) King County 1894 designates agricultural lands of long-term commercial significance as Agricultural Production Districts and forest lands of long-term commercial significance as the Forest 1895 1896 Production District, as shown on the Agricultural and Forest Lands Map in this chapter. 1897 These designations and accompanying planning efforts establish((ed)) minimum lot 1898 sizes and uses for these districts and their surrounding areas. These land use 1899 regulations are consistent with the requirements of the Growth Management Act to ((designate productive lands and to)) plan for adjacent and nearby land uses 1900 1901 compatible with long-term commercial farming and forestry. ((The Growth 1902 Management Act requires designation of agricultural and forest lands of long-term 1903 commercial significance. Agricultural lands of long-term commercial significance are 1904 designated as Agricultural Production Districts and forest lands of long-term 1905 commercial significance are designated as the Forest Production District as shown on 1906 the Agricultural and Forest Lands Map.))

1907

1877

1882

1883

1908 The Growth Management Act also requires designation of mineral resource lands that 1909 are primarily devoted to the extraction of minerals or that have known or potential long-term commercial significance for the extraction of minerals. Minerals include, but 1910 are not limited to, gravel, sand, and valuable metallic substances. Coal is not 1911 1912 considered a mineral resource in King County. Such lands are shown as ((D))designated Mineral Resource Sites on the Mineral Resources Map in this chapter. ((The 1913 1914 role of the Forest Production District in the conservation of mineral resources is also 1915 explained below.

- 1916

1948

1949

1950

1955

1966

1972

- 1925 ((R-604)) R-704 King County shall promote and support commercially viable and 1926 environmentally sustainable forestry, agriculture, and other 1927 resource-based industries as a part of a diverse and regional economy. 1928
- 1929 ((R-604a)) <u>R-705</u> King County shall support ((and designate)) mineral resource lands 1930 of long-term commercial significance and promote policies, environmental reviews, and management practices that minimize 1931 1932 conflicts with neighboring land uses and mitigate environmental 1933 impacts.
- 1935 ((R-605 Forestry and agriculture best management practices are encouraged 1936 because of their multiple benefits, including natural resource 1937 preservation and protection.)) 1938
- 1939 ((R-607)) R-706 Land uses, utilities, and transportation facilities within and adjacent 1940 to ((Đ))designated Agricultural and Forest Production Districts and 1941 ((Đ))designated Mineral Resource Sites((7)) shall be sited and designed 1942 to ensure compatibility with resource management. 1943
- 1944 ((R-608)) R-707 King County should encourage infrastructure and services that 1945 support ((resource lands)) Natural Resource Land management and 1946 resource-based businesses. These should be sited ((in close proximity)) close to designated Agricultural and Forest Production Districts and ((D))designated Mineral Resource Sites when <u>potential</u> adverse impacts and incompatibilities can effectively be mitigated.

1951 ((King County recognizes that maintaining viable resource-based businesses is 1952 challenging. Owners of resource lands make substantial investments in managing their 1953 Market uncertainties, labor costs, vandalism, taxes and fees can affect the land. 1954 profitability of resource-based industries.

Conflicts with surrounding land uses and environmental problems can arise even with 1956 1957 the best of precautions. Resource-based industries need reasonable certainty that 1958 policies are in place to help avoid such conflicts and operations can continue if activities 1959 are performed in an environmentally sound manner.

1960 1961 The Forest Lands Program (Revised Code of Washington 84.33), and the Open Space 1962 Taxation Program, which includes the Timberland and Public Benefit Rating System programs (Revised Code of Washington 84.34) are property tax incentives that 1963 1964 encourage continued farm and forest management both within and outside the Forest Production District and Agricultural Production Districts.)) 1965

1967 ((R-609)) <u>R-708</u> King County should expand access to property tax incentive 1968 programs to encourage landowners to continue ((practicing)) and 1969 expand farming and forestry and to help ensure retention of the 1970 resource land base. These programs should be publicized and 1971 marketed to ensure equitable access to program benefits.

1973 ((R-610 King County shall employ a variety of innovative programs and 1974 incentives to help maintain and enhance resource-based industries.

1975 1976 Examples of such programs include technical assistance and education for sustainable 1977 land management, education for urban and suburban residents, purchases of land or 1978 development rights, transfer of development rights, the purchase of scenic easements 1979 and other less-than-fee-ownership interests that conserve resource uses, establishment

and 19555)) xxxxx (Proposed Ordinance 2023-0440) 1980 of buffers and setbacks for adjacent properties, and relief from special levies and local 1981 improvement district fees. 1982 1983 When urban development occurs near Resource Lands, conflicts can result. Examples of such conflicts are greater risk of forest fires; vandalism to logging, farm and mining 1984 1985 equipment; destruction of young trees; and increased mixing of heavy truck and 1986 residential traffic, which presents safety problems. Increased development near 1987 resource lands also results in increased encroachment of noxious weeds into forests and 1988 farmland. It is important for neighboring property owners to understand the value of resource industries and what kinds of resource activities are likely to occur.)) 1989 1990 1991 ((R-611)) <u>R-709</u> King County should develop and employ effective means to inform 1992 affected property owners about nearby resource management 1993 activities. This may include, but not be limited to: 1994 a. Notice on title, and notification on recorded subdivisions, short 1995 subdivision maps, and issued development permits for properties 1996 within five hundred feet of designated agriculture, forestry, and 1997 mineral resource lands; 1998 b. Signage; and 1999 c. Community meetings and other public notification tools. 2000 2001 Successful Natural Resource Land conservation requires a regional perspective and 2002 intergovernmental cooperation. Although the ((designated)) Natural Resource Lands 2003 are located in unincorporated King County, they benefit nearby cities and can be 2004 affected by activities in those cities. Furthermore, some $((\frac{R}))$ resource $((\frac{L}))$ and s in King 2005 County are owned or managed by Indian tribes or city, county, state, and federal 2006 agencies ((and tribes. A regional perspective is also important because many resource 2007 activities are regulated or supported by state and federal programs)). As the population 2008 in the Puget Sound area continues to grow, the protection of Natural Resource Lands 2009 and the continued success of commercial agriculture and forestry is a regional 2010 challenge. 2011 2012 ((R-612)) R-710 King County shall work cooperatively with ((cities,)) Indian tribes, 2013 cities, other public agencies, private utilities, resource managers, land((2014))owners, and residents to conserve ((public and private)) Natural 2015 Resource Lands for long-term productivity and environmental 2016 protection in a consistent and predictable manner. 2017 2018 ((R-613)) R-711 Designated Forest and Agricultural Production District lands shall 2019 not be annexed by cities, except as allowed in Policies R-760, R-761. 2020 and R-762. 2021 2022 ((R-614)) <u>R-712</u> King County should establish written agreements with <u>Indian</u> 2023 tribes, agencies, ((tribes)) and other affected parties whose close 2024 coordination and collaboration are essential to effective 2025 implementation of resource management programs. Such agreements 2026 should serve to establish consensus and commitment to achieving 2027 specific resource management goals and to define the specific roles 2028 and responsibilities of each agency. 2029 ((R-615 2030 King County should avoid duplication of federal and state regulations 2031 that apply to resource-based industries. However, King County 2032 reserves the authority to address issues of local concern with regard to 2033 resource-based activities and operations. 2034 2035 Many of the issues facing King County's resource industries are also faced by 2036 neighboring counties. Furthermore, some of the infrastructure and support businesses necessary to sustain agriculture and forestry may serve more than a single county. 2037

2038 Therefore, King County's efforts to retain healthy resource economies will be more 2039 successful if the county collaborates with other agencies and agriculture and forestry interest groups in the region. These efforts may include policy development, training 2040 2041 for service providers and outreach that is supportive of commercial agriculture and 2042 timber production and encourages the purchase of local food and local wood.)) 2043 2044 ((R-615a)) R-713 King County should work with other jurisdictions, 2045 agencies, and agriculture and forestry interest groups to help maintain 2046 and enhance commercial agriculture and forestry production by 2047 addressing challenges common across the region. 2048 2049 ((Resource management strategies that protect the environment are necessary to 2050 maintain the long-term productivity of the resource. Chapter 5, Environment, describes 2051 the value of using an integrated, ecosystem-based approach to natural resource and 2052 environmental planning and management. This approach, along with sound 2053 operational practices by resource-based industries, may be able to prevent or minimize 2054 environmental impacts associated with common agricultural and forest practices and 2055 mineral extraction while maximizing co-benefits.)) 2056 2057 ((R-616)) R-714 King County should encourage ((R))resource-based industries 2058 ((should)) to use practices that: 2059 a. Protect the long-term integrity of the built environment, adjacent 2060 land uses, and cultural resources; 2061 b. Maintain the long-term productivity of the resource base; and 2062 c. Result in maintenance of ecosystem health and habitat. 2063 2064 ((R-617)) <u>R-715</u> Habitat protection requirements should not fall disproportionately 2065 on land maintained in agriculture or forestry, and the costs of such 2066 protection shall not be disproportionately placed on the owners of such 2067 land. 2068 2069 ((R-618)) R-716 King County shall be a leader in resource management by 2070 demonstrating environmentally sound agriculture and forestry on 2071 ((c))County-owned land. 2072 2073 ((R-619)) R-717 King County shall include resource education through its signs on 2074 trail systems that are linked with working farms, forests, and mines. 2075 ((Interpretation should: 2076 a. Provide historical perspective; 2077 b. Demonstrate current adaptive resource management practices 2078 (forestry, fisheries, wildlife, agriculture); and 2079 c. Explain economics of various resource uses.

2080 €.))<u>B.</u> Forestry

2081 ((King County forestlands provide local, regional and national benefits that are basic to 2082 quality of life. In addition to supplying a variety of wood and other products, forests emit oxygen, filter water, reduce risks from flooding and soil erosion, enhance 2083 2084 groundwater recharge, provide habitat for innumerable plant and animal species, 2085 capture carbon, and offer scenic vistas and recreational opportunities. Conservation of 2086 the extensive forests in the county saves the region millions of dollars by reducing the 2087 need for costly infrastructure for stormwater and flood control, water treatment, and air 2088 quality remediation. King County's forests provide employment in forestry, wood , 2089 paper, recreation, and tourism industries. In sum, properly managed forests are 2090 fundamental to a healthy, diverse economy and environment. 2091

2092The growth in human population has resulted in the loss of forestlands through2093conversion to non-forest uses. Increasing demands are being placed upon the

remaining forest land base to provide goods, recreational opportunities and ecological functions. Climate change has the potential to put additional stress on forestlands due to changes in seasonal temperature fluctuations, rainfall patterns, and distribution of insect populations. In the next 10 to 20 years, Pacific Northwest forests are expected to face increasing drought mortality, difficulty in getting seedlings established, and severity of forest fires.

2100

To address these challenges, forest managers are embracing more broad-based management methods and strategies that encompass ecosystems, landscapes and watersheds, while continually incorporating new scientific information to improve these approaches. Their efforts, together with the collective foresight and dedication of landowners, interest groups, tribes, residents and agencies, are needed to ensure that King County's forests continue to contribute to a sustainable way of life for present and future generations.

2108

2109 The first step to maintain and enhance commercial forestry is to protect the forest land 2110 base. The second step is to encourage an ecosystem approach to forest management 2111 that provides for long-term ecosystem health and productivity and addresses 2112 cumulative impacts on non-timber resources. The third step is to minimize land use 2113 conflicts and offer incentives for the retention of commercial forestry and the forest land 2114 base.)

2115 1. Protecting Forest Lands

The purpose of the Forest Production District is to conserve large blocks of 2116 2117 commercially valuable forestland for the long term. The designation and zoning ((is)) 2118 are designed to prevent intrusion of incompatible uses, manage adjacent land uses to 2119 minimize land use conflicts, and prevent or discourage conversion from forestry to other 2120 uses. ((A comparison of the area of forestland converted since 1987 inside the Forest 2121 Production District with the area converted outside the District indicates that 2122 designation and zoning of commercial forest lands help to discourage subdivision and 2123 conversion.)) Recent studies indicate that total forest cover within the Forest Production 2124 District has remained stable in recent decades, but has declined marginally in the Rural 2125 Area, and declined significantly in the Urban Growth Area and cities. Taken as a whole, forest cover in King County has declined slightly, with 98.9 percent of the area 2126 2127 supporting forest cover in 1992 still forested in 2016. 2128

2129 Sixty percent of the land area in King County is within the designated Forest Production 2130 District. The Forest Production District comprises 1,300 square miles (825,000 acres) of 2131 forestland in east King County. Most of this land is held in large blocks of contiguous 2132 ownership. ((At this larger scale, it is easier to manage for multiple purposes such as 2133 habitat and long-term forest health.)) About 70((%)) percent of the Forest Production 2134 District is in public ownership, including parts of the Mt. Baker-Snogualmie National 2135 Forest, wilderness areas, state and county parks, Washington State Department of 2136 Natural Resources lands, and watersheds for the cities of Seattle and Tacoma. The 2137 Forest Production District includes approximately ((220,000)) 186,000 acres in private 2138 ownership, most of which is commercial forestland.

2139

2146

((Although it has declined from its height in the late 1980s, c))Commercial timber harvest remains a significant economic activity in King County. At the same time, forest management strategies have become more diverse and may include objectives for forest health, biodiversity, and fish and wildlife habitat, instead of timber production alone. Likewise, economic activity related to recreation, traditional cultural practices, and aesthetics may be included in commercial forestry activities.

2147((R-620)) R-718The Forest Production District shall remain in large blocks of
contiguous forest lands where the primary land use is commercial

2149 2150 2151	forestry. Other resource ((industry)) uses, such as mineral extraction and agriculture, should be ((permitted)) <u>allowed</u> within the Forest Production District when managed to be compatible with forestry.
2151	Production District when managed to be compatible with forestry.
2153	((R-621)) <u>R-719</u> The Forest Production District is a long-term designation. Lands
2154	may be removed from the Forest Production District only through a
2155	subarea <u>plan or area zoning and land use</u> study, and only to recognize
2156	areas with historical retail commercial uses.
2157	
2158	((Public land management affects the region's economy, recreation, fish and wildlife
2159	habitat, forest health, stream flows, water supply, flood control and climate change
2160	mitigation capabilities. The county should take advantage of opportunities to
2161	collaborate with public land managers such as the U.S. Forest Service at Mt. Baker-
2162	Snoqualmie National Forest, and other stakeholders, to manage forests for multiple
2163	public values.
2164	
2165	For example, in the last two decades, there have been significant changes in how forest
2166	lands in the Mt. Baker-Snoqualmie National Forest are managed. In King County, more
2167	than 350,000 acres are within the National Forest. Management emphasis has shifted
2168	from commodity timber production (in the 1960s, 70s and 80s) to management with an
2169	emphasis on ecological values and public use. The U.S. Forest Service has struggled to
2170	keep pace with the increasing demand for recreation infrastructure and to maintain
2171	access roads.
2172	
2173	While timber harvest levels have declined significantly from those in the 1980s, t)) <u>T</u> he
2174	supply of forest products from ((the national forest remains)) <u>public and private</u>
2175	forestland is important to the regional viability of the forestry industry. ((Forest fire
2176	suppression since the early 1900s resulted in abnormally high fuel levels on the forest
2177	floor, which can increase the severity of wildfires. More r)) <u>R</u> ecent federal <u>, state, and</u>
2178	<u>county</u> policies have placed emphasis on projects ((to)) <u>that</u> enhance forest ecosystems,
2179	((restore and)) improve ((land health and)) water quality, ((address fuel levels, and
2180	improve the maintenance of existing facilities within national forests)) <u>recover</u>
2181	endangered species, improve opportunities for recreation, and enhance climate
2182	resiliency, all of which may alter the types and volumes of timber product.
2183	(Much of the 11/700 over of forestand menored by the Westington State
2184 2185	((Much of the 116,790 acres of forestland managed by the Washington State
2185	Department of Natural Resources in King County are trust lands that generate income from the sale of timber and other resources for the beneficiaries, such as schools,
2180	universities and counties. These lands also provide wildlife habitat and are heavily used
2187	for recreation. In January 1997 the Washington State Department of Natural Resources
2188	made a far-reaching commitment to protect native animal and fish species through a
2190	federally approved Habitat Conservation Plan that covers about 1.6 million acres of
2170	Washington State Department of Natural Resources -managed trust land forests-mostly
2192	in Western Washington. In 2007, the Washington State Department of Natural
2193	Resources initiated Forest Stewardship Council certification on state forest land located
2194	in the South Puget Sound Region, including part of Tiger Mountain near Issaquah and
2195	state-owned forestland near Enumclaw in King County.))
2196	
2197	((R-622)) <u>R-720</u> King County recognizes the many values provided by the public
2198	forestland in the county, and encourages continued responsible forest
2199	management on these lands. King County should collaborate with
2200	other public land managers in planning for the <u>restoration,</u>
2201	conservation, use, and management of forest resources on public lands
2202	for multiple public values <u>such as sustainable supply of timber, carbon</u>
2203	storage and sequestration, and other ecosystem benefits.
2204 2205	((County policies are intended to maintain and facilitate commercial forestry in the
/////	TOTOTIC DOUCLES ALE THEODED TO THATHAID AND IACHIMALE COMPLETION IN THE

2205 ((County policies are intended to maintain and facilitate commercial forestry in the
 2206 Forest Production District. The policies in this section allow for very limited residential
 Rural Area((s)) and Natural Resource Lands - Page 3-41

2207 uses in the designated Forest Production District, consistent with the objective of continuing forestry as the primary land use. For example, residences may be 2208 2209 appropriate to permit forest managers to live on their land. King County zoning and 2210 subdivision regulations establish a large parcel size to promote efficient forest operations and to reduce incompatible residential development. Although the zoning 2211 2212 calls for an 80-acre minimum lot size, many smaller lots were created prior to application 2213 of the zoning. Proliferation of residences in the Forest Production District makes 2214 commercial forestry less viable.))

2216((R-623)) R-721King County is committed to maintaining working forestland in the2217Forest Production District, and shall continue to ((work with
landowners and other stakeholders)) collaborate with public and
private forest managers and other partners to promote ((forestry)) and
encourage long-term forest productivity, reduce uses and activities that
conflict with resource uses, and recognize forestland values.

2215

2222

2228

2229 2230

2231

2232

2238

2246

2253

- 2223((R-624)) R-722To reduce conflicts with resource uses and wildfire risks, a forest2224management plan shall be required as a condition of development for2225any residential uses in the Forest Production District. Accessory2226dwelling units shall not be allowed in the Forest Production District.2227
 - ((R-625)) <u>R-723</u> Structures within the Forest Production District should be sited to maintain the productivity of the district. Site plan requirements should limit impervious surface, provide for fire control, protect domestic water supply, and prevent conflicts with forest management.

((In 2004, King County purchased the development rights on the 90,000 acre
 Snoqualmie Forest. This purchase conserves the forest land base for the long term
 while supporting the continuation of commercial forest production. It is important that
 the county consider its responsibility to protect the long-term commercial significance
 of the Forest Production District in its efforts to conserve land within the District.

2239
2240R-626)) R-724
encourage continued private forestry through the acquisition or
transfer of development rights in the Forest Production District. Land
acquisition proposals that would remove lands from forest
management should be evaluated to ensure that the long-term
commercial significance of the Forest Production District is not
compromised.

((Although there is considerable acreage in commercial forestry in King County, there
 are no major lumber mills still in operation in the county. There are a few small mills in
 the county, but they have limited capacity. As a result, small landowners have few
 options for marketing their logs, and usually have a long haul to the closest mill. The
 county should work with forest landowners and forestry business to better understand
 and address the barriers to local wood processing.

2254
2255R-627)) R-725
utilization, and marketing of wood products grown in the county's
Rural Area and forest areas. King County should ensure that
regulations applying to the Rural Area and ((forest areas)) Forest
Production District do not discourage the establishment of sawmills
and other wood product businesses and services.2250225122522253225422572258225922592260

((King County can further protect commercial forestlands and prevent conflicts by
 working with other public agencies and service providers to consolidate lands and to
 locate infrastructure facilities to prevent or minimize intrusions. Such actions can also

2264 improve the owner's capacity to protect fish and wildlife habitat and other natural 2265 resources.

2267R-628)) R-726In consultation with Indian tribes and other affected agencies and2268landowners, King County should support land trades that result in
consolidated forest ownership and work with forest managers to
identify and develop other incentives for continued forestry.2271

2266

2291

2292

2293

2294

2272((R-629)) R-727King County opposes the establishment or expansion of special2273purpose taxing districts and local improvement districts in the Forest2274Production District, and shall not grant new or expanded franchises for2275utilities in the Forest Production District, unless demonstrated that they2276directly benefit forestry or are necessary for transmission of power or2277water.

2279 Forest lands have tremendous recreational and aesthetic value. ((For example, Forest 2280 Production District lands are included within the Mountains-to-Sound Greenway along 2281 the I-90 corridor. Opportunities for hiking and other forms of outdoor recreation exist 2282 within the working forests that are part of the Greenway.)) Access to ((R)) resource 2283 $((\underline{+}))$ and s must be carefully managed, however, to prevent conflict with natural resource 2284 goals. For example, open gate policies allowing public access may be incompatible 2285 with fish and wildlife protection goals and sometimes may interfere with forestry 2286 operations by risking such activities as garbage dumping, vandalism, and timber theft. 2287 ((In the Mt. Baker-Snoqualmie National Forest, a variety of federal partnerships and 2288 volunteer programs help to better connect urban dwellers with the forest while 2289 providing ecological benefits. 2290

R-630)) <u>R-728</u> Public and private forest owners are encouraged to provide for recreational, educational<u>,</u> and cultural uses<u>,</u> when compatible with forest protection.

2295 $((\frac{\text{Recreational and institutional d}}))$ Developments((7)) such as conference centers, ski 2296 areas, and associated hotels((7)) allow more people to enjoy the aesthetic benefits of 2297 forest lands. Such facilities are acceptable if ((located in areas of existing development, 2298 such as Snoqualmie Pass, and if)) their operation and use are resource dependent and 2299 restricted adequately to minimize conflict with resource lands. Major ((recreational or 2300 institutional)) development ((sites)) of this type can adversely affect the Forest 2301 Production District because ((they)) it reduces the forest land base and conflicts with 2302 other resource management goals. 2303

2304((R-631)) R-729 ((No master planned resorts shall be permitted in the Forest2305Production District:)) New or expansion of existing ((recreational or2306institutional uses)) destination resorts and similar uses in the Forest2307Production District may be ((permitted)) allowed if compatible with2308long-term forestry, the interests of Indian tribes, and other resource2309management goals.

2310 2. Promoting Forest Management

The Washington State Department of Natural Resources regulates forestry through the 2311 2312 Forest Practices Act. If the forest practice is associated with a conversion from forestry 2313 to another use on the property, such as development, the ((-)) county has jurisdiction, 2314 and the ((c))County's development regulations must be followed. ((On rural properties, 2315 it is typical that a landowner will combine a long-term forest use on one part of the 2316 property with a residence on another part of the property. It is in the interest of the 2317 county to ensure that development regulations are followed for the permanent clearing 2318 for development, but also to regulate the long-term forest parts of the property with 2319 regulations appropriate for forest harvest.

2321 R-632)) R-730 King County should continue to work with all affected parties and 2322 the Washington State Department of Natural Resources to improve the 2323 clarity of jurisdictional responsibilities for proposed timber harvests 2324 and associated enforcement of forest practice regulations ((in the Rural 2325 Area)), and to ensure that landowners comply with county regulations 2326 when they are converting portions of a site to a non-forest use. 2327 ((Harvesting of forest lands for the purpose of converting to non-forest 2328 uses shall meet all applicable county standards for clearing and critical 2329 areas management, and the loss of carbon sequestration capacity 2330 resulting from such forest conversions should be fully mitigated. 2331 Landowners opting to conduct forest management activities under 2332 state approved forest practices permits should be restricted from 2333 developing those areas for non-resource purposes for six years from 2334 the date of forest practice approval. Recognizing that some 2335 landowners combine the development of a residence or an agricultural 2336 activity on a portion of the property with long-term forestry on the rest, 2337 the county should provide flexibility in its regulations to address the 2338 residential development and agricultural activity differently from the 2339 forest management. 2340

2320

2347

2350

2361

- 2341
2342R-633)R-731
R-731King County should ensure that regulations applying to forest
practices do not discourage forest management on properties in

management practices in)) use, consistent with
the Forest Practices Act.2343The ((c))County should work to simplify its regulatory processes related
to forest management.
- 2348
2349((R-634
Commercial timber production and encourage the use of local wood.

King County has worked with state, federal, and private landowners on multiparty
 resource plans, such as the Middle Fork Snoqualmie Plan, the plan for Rattlesnake
 Ridge, and numerous watershed planning efforts. There will continue to be
 opportunities for interagency cross-ownership cooperation, which will result in
 improved resource management and conservation.

- 2357R-635Working with public and private forest land managers, King County2358shall encourage long-term forest productivity and the protection of2359land and water resources by participating in collaborative, multi-2360ownership planning efforts.
- King County promotes forest management that achieves long-term 2362 R-636)) <u>R-732</u> 2363 forest health; protection of watersheds, critical areas and habitat to 2364 support fish and wildlife populations; protection of threatened and 2365 endangered species; management of stormwater runoff and associated 2366 pollutants; conservation and economic viability of working forests; 2367 wildfire risk reduction; recreation; carbon storage and sequestration 2368 ((and reduction in greenhouse gas emissions)); and adaptation to 2369 climate change. 2370

 ((In 2005, King County worked with the Tolt Triangle community near Carnation, assisting with the formation of Tolt Triangle Fire Council and the development of their comprehensive community wildfire protection plan. The 500 rural residences on 5,800 acres covered by the plan became the first area in King County to earn the status of "Firewise Community" from the national Firewise® Program. Since 2005, additional communities in forested areas have adopted wildfire protection plans. The county provides training and technical assistance regarding fire planning and 2378 best management practices for implementing wildfire protection throughout 2379 forested areas of King County with a focus in the foothill areas prone to east winds.

2380

2381 2382

2385

R-638)) R-733 King County shall encourage the development of private/public partnerships that provide incentives for landowners to practice 2383 innovative, fish-friendly forestry and that can help ensure retention of 2384 the forest resource land base in perpetuity.

2386 ((An example of such a partnership is the Mountains-to-Sound Greenway Biosolids 2387 Forestry Program, which includes King County, Washington State Department of Natural 2388 Resources, the Greenway Trust, the University of Washington and Hancock Forest 2389 Management. One of the elements of this program involves the acquisition of 2390 forestlands that are vulnerable to residential and commercial development. Lands are 2391 acquired by a combination of county funds and federal Forest Legacy funds and then transferred to the Washington State Department of Natural Resources for management. 2392 2393 By deed, these lands stay in forest resource use in perpetuity and are managed 2394 according to the state's Habitat Conservation Plan. Seventy-five percent of all revenues 2395 generated are returned to King County. The lands that have been acquired help to 2396 form the block of public ownership along I-90, providing wildlife corridors, 2397 opportunities for trails and recreation, and the water quality protection provided by 2398 forest cover. 2399

2400 In addition to landscape-level planning and analysis, resource managers should identify 2401 specific areas in their forest ownership that are degraded or negatively impacting aquatic resources. Examples of such areas are logging roads or gravel mines no longer 2402 needed and scheduled to be abandoned or riparian zones that are not sufficiently 2403 2404 vegetated. Organic soil amendments, when properly used, can greatly enhance 2405 vegetative growth and restore productivity to these sites, thus protecting fish and other 2406 aquatic resources. The use of recycled organic wastes generated in King County closes 2407 the recycling "loop" and helps sustain the productivity of resource lands.

2409 R-639)) R-734 King County encourages the use of recycled, organic-based soil 2410 amendments, such as biosolids, and fertilizers in forest ecosystems, 2411 which can help reduce erosion and sedimentation into streams, 2412 increase water-holding capacity of soils, stimulate the growth of trees 2413 and other vegetation, capture carbon, and enhance fish and wildlife 2414 habitat. King County shall work with the general public, ((and)) private 2415 and public forestland owners, and scientists to encourage the safe, 2416 selective, and appropriate use of these materials for ecosystem 2417 enhancement and restoration.

2419 ((One of the most successful efforts is the use of the county's biosolids to fertilize public and private forests. Annually, about 1,400 acres of forestland in east King County are 2420 2421 fertilized with Loop® biosolids.

2422

2418

2408

Maintaining land in long-term forest use offsets greenhouse gas emissions through 2423 2424 sequestration of carbon in growing trees and in forest soils. In addition to providing 2425 plant nutrients, organic soil amendments such as Loop can significantly increase carbon storage in forests and help soils retain moisture. Efforts to conserve forests and 2426 2427 encourage forest management for health and resilience are a major means of 2428 implementing King County's climate change policies. Even with these and other efforts 2429 to reduce greenhouse gas emissions, forests in the Pacific Northwest face potential 2430 impacts from climate change. In the coming decades, mortality of trees and plants is 2431 projected to increase due to insects and pathogens, increased temperature, and lack of 2432 groundwater in the summer. Climate change also is projected to affect the composition and density of plant and animal species and the severity and frequency of forest fires. 2433 2434 All of these potential impacts underscore the need for monitoring of climate-induced 2435 changes and active management of forest health.))

Rural Area((s)) and Natural Resource Lands - Page 3-45

2436 3. Wildfire Risk Reduction

King County's extensive forest lands provide a wide range of economic and ecological
 benefits. Under the right conditions, however, these same forests are also vulnerable to
 wildfire and post-wildfire debris flows and floods, creating potentially significant risks for
 communities in the wildland-urban interface.

2441

2442 Climate change is increasing the potential for wildfire in western Washington. Warmer 2443 seasonal temperatures and drier summers create conditions more favorable for wildfire 2444 for longer periods of time. Climate change may also lead to changes in insect and 2445 pathogens that can leave forests more vulnerable to drought and fire. The potential for 2446 large, fast-moving fires is greatest when these conditions coincide with strong east wind 2447 events. The potential for fast-moving debris flows and floods is high after a wildfire has 2448 occurred, reducing soil infiltration, and increasing risks for more overland surface water 2449 flow during a rainfall event. Population growth and development in areas within and in 2450 proximity to forested areas (the wildland-urban interface) are also important factors 2451 increasing the potential for wildfire in western Washington, as well as the human and 2452 economic costs of wildfire.

2453

2466

2467

2468

2469

2470

2471

2472

2477

2486

2454 Promoting Forest Resilience

2455 Forests with a diversity of tree species (conifer, deciduous, mixed-species) and 2456 development stages (young, mid-age, mature/old-growth) are more resilient to 2457 disturbances such as wildfire and have greater capacity to maintain and recover 2458 ecological functions following disturbance. Forests with species and structural diversity 2459 also provide important ecosystem and community benefits such as habitat for fish and 2460 wildlife, improved air and water quality, carbon sequestration, recreation opportunities, 2461 and cultural resources. Proactive steps that support forest diversity include retaining 2462 larger trees that are more fire resistant, managing forests to promote a broad range of native tree species, planting trees sourced from a wider range of seed zones, managing 2463 2464 density, and reducing invasive species. 2465

((R-641)) <u>R-735</u> King County ((should)) <u>shall</u> consider climate change impacts and take steps to improve forest health ((and resilience to climate change impacts through its technical assistance to forest land owners, management of county-owned forest lands, and support of neighborhood-based efforts to reduce risks from wildfires)) <u>and</u> wildfire resilience on County-owned forest lands.

2473 Reducing Risk in the Wildland-Urban Interface

Wildland-urban interface areas include Vashon-Maury Island and areas of east King
 County, such as in the Four Creeks/Tiger Mountain, Snoqualmie Valley/Northeast King
 County, and Greater Maple Valley/Cedar River Community Service Areas.

- 2478 Proactive steps that can benefit wildfire risk reduction in the wildland-urban interface 2479 include outreach and technical assistance to forest landowners and residents on best management practices for reducing wildfire risk; developing wildfire preparedness, 2480 2481 response, and recovery plans; controlling for invasive species that can act as an accelerant for fire; evacuation planning; and building strong partnerships that support 2482 2483 effective planning and response. Vegetation management around homes and critical 2484 infrastructure is also an important tool for reducing risk and should be pursued in ways 2485 that avoid impacts to critical areas.
- 2487R-736King County shall take steps to plan for and reduce wildfire risk in the2488wildland-urban interface in unincorporated King County including2489wildfire risk assessment and planning, amending codes to align with2490best practices for wildfire risk reduction, and public education.2491

2492 R-737 King County shall encourage wildfire preparedness, including wildfire 2493 risk assessment and planning, in cities and towns located in the 2494 wildland-urban interface in King County. 2495 2496 ((R-637)) R-738 King County ((should)) shall ((encourage community fire planning so 2497 that)) make residents ((are)) aware of the dangers of forest fires and 2498 encourage them to take steps to make their properties less vulnerable. 2499 ((King County should support neighborhood based efforts to manage 2500 forests to improve forest health and reduce the risk of wildfire.)) 2501 2502 King County wildfire risk reduction activities shall prioritize the needs <u>R-739</u> 2503 of residents whose ability to prepare for, respond to, and recover from 2504 wildfire impacts may be limited by income, health, mobility, or other 2505 disparities. 2506 2507 R-740 King County should adopt regulations that do not require permits for 2508 vegetation management in areas outside of critical areas and their 2509 buffers if implementing approved best management practices for 2510 wildfire risk reduction or as included within an approved forest 2511 stewardship plan that includes wildfire best management practices. 2512 2513 Regional Collaboration on Wildfire Risk Reduction 2514 Wildfire risk reduction benefits from ongoing opportunities to leverage resources and 2515 partnerships that support action around shared priorities and promote learning 2516 between organizations and subject matter experts. Partners includes local planners, 2517 first responders, natural resource managers, emergency management officials, and 2518 researchers. 2519 2520 Collaboration with small forest landowners and residents is also important. King County 2521 works in partnership with King Conservation District and Washington State University 2522 Extension Forestry to provide technical assistance to small forest landowners and residents related to wildfire mitigation. This includes providing education and technical 2523 2524 training about forest management, working with forest landowners to develop and 2525 implement forest stewardship plans that account for climate change and wildfire risk, 2526 increasing access to cost-share programs that incentivize forest management, and 2527 hosting neighborhood-based workshops focused on identifying and acting on wildfire 2528 risks and community wildfire planning. 2529 ((R-640)) R-741 King County ((should continue to)) shall collaborate with key 2530 2531 partners, such as Indian tribes, the University of Washington, 2532 Washington State University including Extension, state and federal 2533 agencies, cities, first responders, and ((forest)) landowners, ((to)) on 2534 activities that improve forest resilience and reduce wildfire risks, 2535 including the following: 2536 a. ((monitor)) Monitoring and ((evaluate)) evaluating impacts of 2537 climate change on forests and wildfire potential in King County; 2538 Promoting species and structural diversity within and across forest b. 2539 stands in King County; 2540 Providing educational and technical assistance for small forest С. 2541 landowners; 2542 d. Leveraging partnerships to increase funding for landowner 2543 incentive cost-share programs; 2544 e. Expanding and enhancing opportunities for building public 2545 awareness and promoting shared learning about wildfire 2546 preparedness and risk reduction in King County: 2547 f. Reducing landslide and flooding risks resulting from wildfire 2548 damage and associated impacts; 2549 g. Supporting the recovery of natural systems and communities 2550 affected by wildfire; and

Rural Area((s)) and Natural Resource Lands - Page 3-47

2551 2552 2553

h. Encouraging research on and development of fire suppression methods that have less negative impact on the environment.

((King County's 2015 Strategic Climate Action Plan calls for the county to manage and 2554 2555 restore its forested parks and natural lands in ways that maximize biological carbon storage and sequestration, and increase resilience to changing climate conditions. To 2556 2557 help guide forest management activities, in 2012 the Parks Division completed an initial 2558 assessment of the forest types on all of Parks' forested acreage. Additional assessment 2559 will continue to be conducted on newly acquired forested properties as well. Parks will 2560 develop and implement stewardship plans on all forested properties of 200 acres or 2561 more in size, which will result in healthier and forests that are more resilient to climate change. The Parks and Water and Land Resources Divisions will also continue to 2562 2563 develop opportunities for volunteers to plant native trees and shrubs and remove 2564 invasive species from County-owned lands and have established an ambitious goal for 2565 the planting of new trees in the county.

2566 D.)) <u>C.</u> Agriculture

2567 Land suitable for farming is an irreplaceable natural resource. Agricultural lands and 2568 farming provide many benefits to the residents of King County, including a connection 2569 to its cultural heritage, fresh local foods, and a diverse economy. In ((2012)) 2017, 2570 farmers in King County produced over $((\frac{120}{5}))$ $\frac{135}{5}$ million in agricultural sales. 2571 Farmlands are an intrinsic component of the varied open space landscape of the region. 2572 Farmland provides scenic vistas and low-density separation between rural communities. 2573 Many farms in the county include an educational experience through U-Pick operations, 2574 harvest tours, and demonstrations of agricultural practices. Agricultural lands also 2575 provide environmental benefits, including the temporary storage and conveyance of 2576 floodwaters, habitat for birds and other wildlife, large areas without impervious surfaces, 2577 and opportunities for providing riparian vegetation along rivers and streams. Farming 2578 and growing food is also an essential source of fresh food for communities across the 2579 county that supports resilience, healthy eating, and cultural identity.

2580

2588

((The concern about the loss of farmland in King County in the 1970s resulted in adoption of an agricultural lands policy framework through Ordinance 3064 in 1977 that called for the County to designate certain areas within King County as agricultural lands and then to develop an agricultural land protection program based upon both land use regulations and compensation to protect existing agricultural lands and private property. This led to the successful Farmland Preservation Program bond issue in 1979, which has funded the purchase of farmland development rights.

2589 In 1985, the county first designated its Agricultural Production Districts, which have 2590 remained stable since then at more than 41,000 acres. However, despite the land 2591 conservation accomplished through the Farmland Preservation Program and the 2592 designation of the Agricultural Production Districts, not all of this land is farmed. Based 2593 on surveys, approximately 27,000 acres of the Agricultural Production Districts are 2594 farmable, the rest being forested, farm building, water bodies or other non-farmable 2595 areas. About 25,000 areas are being actively farmed. In addition, there are 13,000 2596 acres in active agriculture outside the Agricultural Production Districts on Rural Area and in urban areas.)) 2597 2598

This section focuses on the ((c))<u>C</u>ounty's efforts to maintain and enhance commercial agriculture for the value of local produce, dairy products, specialty horticultural and energy crops, keeping livestock, and for scenic and historic values. To meet the Growth Management Act requirement to maintain and enhance agriculture, a variety of methods and programs continue to be necessary.

2604

2605 ((The policies call for King County to: 2606 Protect productive farmland by designation and zoning; 2607 Limit development to appropriately-scaled uses that are necessary to support 2608 commercial agriculture; 2609 Prevent or minimize land use conflicts between farming operations and 2610 adjacent land uses; 2611 -Encourage and allow necessary infrastructure and services (markets, water, 2612 affordable housing, supply stores, technical services, tax incentives) that 2613 support commercial agriculture and contribute to growing, storing, processing, 2614 and distributing a local food supply and other horticultural and livestock 2615 activities; 2616 Support the economic development of the local food economy and improve 2617 access to healthy, affordable food; 2618 Continue to preserve farmland and develop additional mechanisms to maintain 2619 the affordability of farmland; and 2620 Encourage farming practices that conserve soils and protect water quality, 2621 fisheries, and wildlife. 2622 2623 King County's Local Food Initiative includes targets and recommendations to expand 2624 the local food economy to ensure job growth and economic viability for King County 2625 food businesses and farms.)) 2626 2627 The Local Food Initiative(('s production targets are to add 400 net new acres in food production and 25 new food farmers per year over the next ten years)) includes 2628 2629 strategies and actions to increase land in food production and support the development 2630 of new farmers. Success ((in meeting the targets)) will require protection of existing 2631 farmland, keeping it farmed, addressing problems that impair farming, and enhancing 2632 programs that provide technical assistance to farmers and expand markets for local farm 2633 products. To ((meet this target)) support these goals, the County should also pursue 2634 feasible opportunities to return formerly farmed land into production((, such as the 2635 recent purchase of Tall Chief Golf Course in the Snoqualmie Valley which will be

2636 returned to agricultural use)). In advancing this initiative, King County ((will)) 2637 encourages ((\mathbb{B}))best ((\mathbb{M}))management ((\mathbb{P}))practices and sustainable farming activities 2638 and ((will)) prioritizes farming operations that have minimal adverse impacts on the 2639 environment.

2640 1. Protecting Agricultural Lands

2641 ((In 1979, voters approved a \$50 million ballot measure to protect farmland threatened 2642 by development. The Farmland Preservation Program became the first voter-approved 2643 measure in the nation to protect farmland in a metropolitan area. By purchasing the 2644 development rights, t))The Farmland Preservation Program purchases development 2645 rights to keep((s)) farmland open and available through covenants that restrict 2646 development and limit the uses of the property to agriculture and open space. The 2647 covenants remain with the land in perpetuity, so the land is protected regardless of ownership. Under the Farmland Preservation Program, the ((-))County holds the 2648 2649 development rights in trust while the land remains in private ownership. By law, the 2650 $((\mathbf{c}))$ County cannot sell or remove its interest in Farmland Preservation Program lands, 2651 with the exception of conveying public road or utility easements. ((

2652

In 1995, the county approved an additional \$3 million for the purchase of additional
 development rights under the Farmland Preservation Program, and continues to add to
 the program with a variety of grant funding and use of the Transfer of Development
 Rights Program.)) To date, the Farmland Preservation Program and Transfer of
 Development Rights Program ((has)) <u>have</u> succeeded in preserving more than ((14,000))
 <u>16,000</u> acres of farmland.

2660
2661((R-642)) R-742
Farmland Preservation Program. Protection of property purchased
under the Farmland Preservation Program shall be a high priority when
balancing conflicting interests such as locating transportation, active
recreation, utility facilities, or other uses that could have an adverse
impact on farm operations. ((King County shall use the Transfer of
Development Rights Program as another tool to preserve farmland.

Even farmland in the Farmland Preservation Program is challenged by pressures from
 adjacent development, the need to maintain drainage and irrigation systems,
 non-farmer ownership, and high real estate costs. To protect the farmland for the long
 term, investments in improving the farmability and managing the easements to ensure
 compliance are necessary.

2673 2674

2693

2701

2708

2667

2659

2675R-642a))R-743 King County should develop a long((-))-term strategy for financing
protection of sufficient farmland to significantly expand and retain food
production, including improving the farmability of protected farmland,
and ensuring that the easements are well((-))managed for the
long((-))term.2670long((-))term.

2681((R-642b)) R-744 ((Farmers conducting work on property)) Properties on which King2682County owns a Farmland Preservation Program easement, or ((farmers2683leasing properties owned by King)) that the County leases for2684agricultural purposes, should be limited to predominantly agricultural2685activities and agricultural((-supportive activities)) support services.2686

Agriculture is most productive in agricultural communities where neighbors support agriculture, where parcels are large enough for commercial agriculture and where labor, supplies, and markets for farm products are available. King County's farm soils and most profitable farms are usually found in contiguous blocks with few nonagricultural uses. ((In 1985, King County established Agricultural Production Districts with large lot zoning and agriculture as the preferred use.))

The Agricultural Production Districts, shown on the Agriculture and Forest Lands Map in this chapter, present the least number of land use conflicts for agriculture, contain agricultural support ((activities)) services, and provide the best environment for farming in King County. The five Agricultural Production Districts are Sammamish Valley, Snoqualmie Valley, Lower Green River Valley, Upper Green River Valley, and Enumclaw Plateau. Most of the farmlands preserved under the Farmland Preservation Program are found in these Agricultural Production Districts.

2702((R-643)) R-745AgriculturalProductionDistricts((are))shallbeblocksof2703contiguous farmlands where agriculture is supported through the
protection of agricultural soils and related support services and
activities. King County should use
((R))roads and natural features
((are)) as appropriate boundaries for Agricultural Production Districts to
reduce the possibility of conflicts with adjacent land uses.

((R-644)) <u>R-746</u> King County should continue to seek funding and purchase additional development rights to farmland in the Agricultural Production Districts.

2713 ((Livestock, dairy and large-scale commercial row-crop operations require large parcels
 2714 of land to allow for production that is profitable and sustainable. Generally, at least 35
 2715 acres is needed for full-time wholesale commercial production of such products.

- 2716 Specialty agricultural products, products that are direct-marketed, and part-time 2717 farming enterprises generally do not need as much acreage to be profitable.
- 2718

2729

- 2719 R-645)) R-747 All parcels within the boundaries of an Agricultural Production 2720 District ((should)) shall be zoned Agricultural, either A-10 or A-35. In 2721 order for ((R-646 Lands within Agricultural Production Districts 2722 should remain in)) parcels to remain large enough for commercial 2723 agriculture((. A)), a maximum residential density of one home per 35 2724 acres shall be applied where the predominant lot size of agricultural-2725 zoned parcels in the surrounding area is 35 acres or larger, and a 2726 maximum residential density of one home per 10 acres shall be applied 2727 where the predominant lot size of agricultural-zoned parcels in the 2728 surrounding area is smaller than 35 acres.
- 2730((R-647)) R-748Agriculture ((should be)) shall remain the ((principal)) predominant2731land use in ((the)) anyAgricultural Production District((s)). Permanent2732new construction within districts shall be sited to prevent conflicts with2733commercial farming or other agricultural uses, and nonagricultural uses2734shall be limited. New development shall not disrupt agriculture2735operations and shall have a scale compatible with an active farming2736district.
- 2738((R-648)) R-749On-site housing for farm employees shall be allowed where this2739can be accomplished without unnecessarily removing land from2740agricultural use or conflicting with other public interests. King County2741should address the regulatory constraints that make it difficult for2742farmers to offer housing for farm employees.
- 2743
- 2744
- 2745 Fish, Farm, Flood

2746 The river valleys in King County are ((critical locations)) important natural resource areas 2747 for agriculture, salmon habitat, and natural floodplain processes. In compliance with the 2748 ((g))Growth ((m))Management Act, portions of several of these valleys were designated 2749 as Agricultural Production Districts to protect ((the diminishing farmland)) land for 2750 long-term commercial ((agriculture)) agricultural uses, ((thereby preventing their 2751 conversion to other uses that are often incompatible with habitat protection or that 2752 would require expensive flood risk reduction projects)) including the highest quality 2753 soils for food production, and to limit conversion of the land uses to those that would be 2754 incompatible with viable, long-term, commercial agriculture. Many areas of farmland within Agricultural Production Districts are: located on a geologically active landscapes; 2755 2756 below upland creeks and streams; on or adjacent to an alluvial fan; and/or within 2757 floodplains, floodways, or other low-lying areas. Because of this, the ability to manage 2758 drainage and infrastructure to support farming is an important aspect of retaining 2759 farmable land and supporting continued agricultural uses within the Agricultural 2760 Production Districts. Management in these areas requires consideration of not only 2761 current, but future impacts to agricultural use, geological processes, and stream 2762 function and values essential to fish passage and spawning.

2763

The same geography covered by Agricultural Production Districts also provides salmon 2764 2765 habitat restoration opportunities of importance to King County, Indian tribes, and other 2766 regional partners. Some of both the highest-quality ((of)) and most-degraded salmon 2767 habitat in King County is ((found within)) in and adjacent to rivers and streams flowing 2768 through the Agricultural Production Districts. ((As a result of federal listing of Chinook 2769 salmon as a threatened species, King County is obligated to take actions for protection 2770 of Chinook habitat in the county's watersheds. Such actions include restoration of 2771 habitat in portions of each of the county's rivers and, because many sections of the 2772 county's river systems are in a highly altered state, those reaches within Agricultural Rural Area((s)) and Natural Resource Lands - Page 3-51

Production Districts offer some of the most promising opportunities for habitat 2773 restoration critical to salmon recovery. Each of the Water Resources Inventory Area 2774 2775 Salmon Recovery Plans has recommended additional protection or restoration of critical 2776 habitat within the Agricultural Production Districts. At the same time, King County is committed to the preservation of productive agricultural soils and local agricultural 2777 2778 production and protection of public safety in flood prone areas through the restoration 2779 of floodplain processes.)) King County continues to work diligently to restore habitat 2780 and advance recovery of depleted salmon stocks, and strives to protect and enhance 2781 fish stocks, ecological functions and aquatic habitat in all county waterbodies and 2782 floodplain areas, including in floodplains, rivers, streams, and wetlands in Agricultural 2783 Production Districts. Furthermore, King County continues to work toward recovery of all 2784 salmonid species given the nexus of salmonid populations and honoring and sustaining 2785 the rights held by Indian tribes as sovereign trustees for fish, wildlife, and other aquatic 2786 resources, and by the State of Washington.

2787

2788 ((The farmers in the county support fish protection and fish recovery through many 2789 regulated and voluntary actions. King County recognizes that fish, flood management, 2790 and farm interests must work together in a collaborative manner. It is essential that 2791 farmers and other property owners in each watershed be directly included in planning 2792 and in the review of integrated, watershed-wide strategies that support the needs of 2793 agriculture, fish recovery, and flood risk reduction and floodplain management. Specific 2794 habitat protection rules should not jeopardize the agricultural productivity within the 2795 Agricultural Production Districts.)) Some of King County's Agricultural Production 2796 Districts have vast areas of designated and mapped floodways and 100-year 2797 floodplains. King County is committed to restoring floodplain processes and mitigating 2798 flood risks to ensure human health and protect public safety, reducing the risk of property damage, maintaining critical infrastructure supporting residents and 2799 2800 businesses, restoring salmon habitat, and reducing public and private economic 2801 impacts of flood events. As climate change results in more-frequent and more-2802 damaging floods, agriculture businesses and homes will need increased support for 2803 home and agricultural building elevations. Maintaining land use rules that prevent 2804 conversions of agricultural land to other uses other than habitat restoration or flood 2805 protection will have a co-benefit of limiting new development that may be at increased 2806 risk of damage from floods and alluvial fan hazards. 2807

2808 King County supports ongoing viability of agriculture, restoration, and enhancement of 2809 salmon habitat, and actions to reduce flood risks and enhance ecological functions of 2810 floodplains, all of which combine to create a resilient landscape in the face of climate 2811 change and pressures of population growth. However, because current or proposed 2812 land uses supporting one goal may affect advancement of other goals, decision-making 2813 about the size and location of habitat and floodplain restoration and agricultural 2814 infrastructure projects can be challenging. The 2012 Comprehensive Plan update 2815 added policy R-((650))753 that directed the County to ((convene a collaborative 2816 watershed planning process)) develop an approach to improving and balancing the 2817 interests of agricultural production, ecological function and habitat quality for salmon, 2818 and flood risk reduction and floodplain restoration within each of the Agricultural 2819 Production Districts. In response, ((Ŧ))the County ((choose to start the process in)) and 2820 partners piloted a planning effort focused on the Snoqualmie Valley Agricultural 2821 Production District((, where the County has undertaken a number of habitat restoration 2822 projects, to develop an approach to improving and balancing the interests of 2823 agricultural production, ecological function and habitat guality for salmon, and flood 2824 risk reduction and floodplain restoration)) by convening the Snogualmie Valley Fish, 2825 Farm, and Flood Advisory Committee with the goal of understanding context and 2826 improving balance in King County's work to advance multiple objectives. As a result of 2827 the ongoing efforts of the Snogualmie farm, fish, flood process, the County has begun to operationalize recommendations, including recommendations for a revised 2828

administrative process for reviewing proposed County project and programmatic
 actions in locations where agriculture, fish habitat, and floodplains intersect.

2831

2832 ((In response to this, the Fish, Farm, and Flood Advisory Committee was formed in 2013, 2833 and the group of stakeholders representing agriculture, salmon recovery and flood 2834 management interests have been meeting regularly for the past three years. In 2016 2835 the Advisory Committee developed a final report and a set of recommendations that 2836 balances near term actions as well as program and policy recommendations for all three 2837 resource interests. The Advisory Committee also recommended the formation of three task forces to undertake more detailed analyses of specific policy areas. Together the 2838 2839 final recommendations and the work of the three task forces will form the foundation of 2840 a watershed planning approach in the Snogualmie Valley Agricultural Production 2841 District to sustain agriculture production, salmon recovery, and flood risk reduction.

2842

2843 The Fish, Farm and Flood advisory committee participants recognize the importance of 2844 salmon recovery efforts, a vibrant agricultural economy and protecting agricultural soils 2845 in the Snoqualmie Valley Agricultural Production District, and the importance of 2846 protecting the public in flood prone areas. To address inherent conflicts between these 2847 three overlapping interests, the Advisory Committee recommended a suite of near term 2848 actions to address critical needs for all three resource areas, and the creation of three 2849 task forces)) The revised administrative review process will occur in a watershed context 2850 by considering information from a variety of sources, including the following four task 2851 forces convened based on recommendations of the Snoqualmie fish, farm, flood effort:

- Buffers Task Force((, with the goal of developing a science-based riparian buffer planting implementation strategy for the Snoqualmie Valley Agricultural Production District that strikes a balance between increasing ecological function of waterways and maintaining the agricultural viability of the Snoqualmie Valley Agricultural Production District) and Buffers Implementation Task Force, created to evaluate use of King County funds to implement voluntary, science-based, variable-width riparian plantings.
- 2859 Snoqualmie Valley Agricultural Production District Strategic Plan Task Force((, with • 2860 the goal of)), created to consider strategies to ((improving)) improve the long-term 2861 productivity of farmland, bring more acres into production, especially food 2862 production, and ((increasing)) increase opportunities for farmers to develop the 2863 necessary infrastructure to support or increase their farm businesses in the 2864 Snoqualmie Valley Agricultural Production District. ((This task force will conduct an 2865 assessment of specific farmland resource property needs and assets in the 2866 Snoqualmie Valley Agricultural Production District and create an implementation plan for project improvements to land (e.g., drainage) and water access. It will 2867 complement other related efforts, such as King County's Local Food Initiative which 2868 2869 is an economic development and marketing plan for food and agriculture in the 2870 region.))
- 2871 Regulatory Task Force((, with the goal of evaluating regulations and recommending 2872 process improvements or possibly statutory changes, as appropriate, pertaining to key regulatory issues identified by the Fish, Farm and Flood agricultural 2873 2874 stakeholders. The goal of the task force is to identify changes that will reduce 2875 compliance costs and increase predictability without diminishing the overall level of 2876 environmental protection or the level of flood protection that regulations are intended to assure. Initial areas of focus for the task force include:)), created to 2877 2878 evaluate and recommend improvements to regulations to promote a viable 2879 agricultural economy and maintain and enhance habitat protection and healthy 2880 ecosystems.
- 2881
2882
2883↔((Drainage regulations that make maintenance expensive or time-
consuming or otherwise restrict the ability to improve drainage of farm
fields.

2884	o Flood regulations related to constructing farm pads, buildings and other
2885	farm improvements.
2886	 Mitigation required when farmers maintain drainage ditches or build a farm
2887	pad or other structure in a wetland or a buffer of a wetland or stream.
	pad of other structure in a wettand of a burler of a wettand of stream.
2888	
2889	Those recommendations are reflected in a new policy R-650a.))
2890	
2891	While these task forces were developed with a specific focus on the Snoqualmie
2892	Agricultural Production District, the lessons learned have helped to inform principles
2893	that guide how the County strives toward achieving multiple benefits through projects
2894	and programmatic action implemented in other Agricultural Production Districts and all
2895	<u>areas of unincorporated King County where agriculture, salmon habitat, and floodplains</u>
2896	<u>converge.</u>
2897	
2898	Using recommendations from the Snoqualmie Valley Fish, Farm, and Flood Advisory
2899	Committee, King County has revised the process for reviewing projects in a watershed
2900	context, which is described in revised policy R-753. This process will apply to habitat
2901	and flood projects sponsored by the Water and Land Resources Division in all
2902	Agricultural Production Districts. Revised policy R-753 outlines the minimum required
2903	elements of an administrative review process for habitat and floodplain restoration
2904	capital projects and programs sponsored by the King County water and land resources
2905	division where fish, farm, and flood interests intersect.
2906	
2907	Policies in this section also reflect the importance of facilitating County-sponsored
2908	infrastructure (such as home elevations, barn elevations, and farm pads) and drainage
2909	improvement projects (including Agricultural Drainage Improvement Program or
2910	<u>"ADAP" projects; Integrated Drainage Program projects, such as culverts, flap gates, and</u>
2911	<u>pumps; and projects on non-ADAP-eligible waterway projects) on privately owned</u>
2912	farmland to support continued long-term commercial agricultural uses within
2913	Agricultural Production Districts, and the review process may also be conducted for
2914	projects sponsored by entities other than the Water and Land Resources Division.
2915	
2916	The Snoqualmie Valley Fish, Farm, and Flood Advisory Committee process and
2917	associated planning work has been instrumental in King County and partners learning
2918	how to balance needs of agriculture, salmon recovery, and floodplain management in a
2919	collaborative manner considering watershed context in ways that are directly applicable
2920	to other Agricultural Production Districts. As a result, the original goal - of
2921	implementing targeted planning efforts in all Agricultural Production Districts - is no
2922	longer necessary. However, King County will continue to support the Snoqualmie Valley
2923	Fish, Farm, and Flood Advisory Committee until the level of progress envisioned at the
2924	formation of the committee is substantially complete, and King County will consider
2925	supporting similar collaborative efforts in other geographies when residents and
2926	partners request a localized planning effort, where appropriate.
2927	
2928	((R-649)) <u>R-750 King County, through implementation of projects and programs,</u>
2929	shall ensure sufficient land within Agricultural Production Districts
2930	remains available to support long-term viability of commercial
2931 2932	agriculture and that its programmatic and project actions support the
2932 2933	<u>maintenance or improvement of drainage and other agricultural</u> support infrastructure. To the maximum extent feasible, King County
2933 2934	should tailor measures to protect threatened or endangered species to
2935	support continued operation of working farms within the Agricultural
2936	Production Districts and should strive for outcomes consistent with
2937	goals King County may establish for optimal area of productive
2938	agricultural lands within the Agricultural Production Districts.
2939	

2940 R-751 King County shall complete a collaborative process to: 2941 a. Determine minimum acreage targets for agricultural lands and for 2942 floodplain and riparian habitat project area in the Snogualmie 2943 Valley Agricultural Production District, including consideration of 2944 climate change; and 2945 b. Develop a tracking system for the amount of agricultural land used. 2946 2947 R-752 ((Agriculture must remain the predominant use in any Agricultural 2948 Production District and)) ((a))Aquatic habitat projects, ((or)) floodplain restoration projects, ((as well as,)) and ((King County)) mitigation 2949 reserves program projects shall not reduce the ability to farm in the 2950 2951 Agricultural Production District. Therefore, ((until the county 2952 implements the watershed planning process described in R-650,)) such 2953 projects are allowed only when supported by owners of the land where 2954 the proposed project is to be sited. Criteria to be considered: 2955 a. For a project proposed to be sited on lands that are unsuitable for 2956 direct agricultural production purposes, such as portions of 2957 property that have not historically been farmed due to soil 2958 conditions or frequent flooding, and which cannot be returned to 2959 productivity by drainage maintenance, or 2960 b. For a project proposed to be sited on lands suitable for direct 2961 agricultural production: 2962 (1) there are no unsuitable lands available that meet the technical 2963 or locational needs of the proposed project, and 2964 (2) the project is included in, or consistent with, an approved 2965 Water Resources Inventory Area Salmon Recovery Plan, Farm 2966 Management Plan, Flood Hazard Management Plan or other 2967 similar watershed scale plan; or the project would not reduce the baseline agricultural productivity within the Agricultural 2968 **Production District.** 2969 2970 2971 ((R-650)) R-753 ((Aquatic habitat restoration projects, floodplain restoration 2972 projects and projects under King County's mitigation reserves program 2973 in an Agricultural Production District shall be evaluated through a 2974 collaborative watershed planning process with the goal of maintaining 2975 and improving agricultural viability, improving ecological function and 2976 habitat quality, and restoring floodplains through integrated, 2977 watershed-wide strategies. A watershed planning process shall be 2978 established for an agricultural production district because of the 2979 number of potential restoration projects and shall: 2980 ensure that agricultural viability in the Agricultural Production 2981 District is not reduced as the result of actions taken and that 2982 agriculture remains the predominant use in the agricultural 2983 production district; 2984 b. evaluate and recommend actions at all scales across the affected 2985 watershed to maintain and improve agricultural viability, restore 2986 ecological functions and aquatic habitat and restore floodplains, 2987 including voluntary actions taken by landowners; 2988 c. be a collaborative effort among affected land owners, interested 2989 stakeholders, and King County and shall be updated on a periodic 2990 basis; and 2991 d. identify and recommend actions that King County should take or 2992 ensure are taken to maintain and improve agricultural viability in 2993 the Agricultural Production District and address any impacts to 2994 agriculture from aquatic habitat restoration projects, floodplain 2995 restoration projects and projects under King County's mitigation 2996 reserves program constructed in the Agricultural Production 2997 District.)) 2998 King County shall administer a collaborative review process 2999 considering watershed context for County-sponsored habitat or

Rural Area((s)) and Natural Resource Lands - Page 3-55

((2016)) <u>2024 King County</u> Comprehensive Plan - ((updated December 6, 2022)) <u>Adopted TBD</u> <u>Attachment A to</u> Ordinance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555)) <u>xxxxx (Proposed Ordinance 2023-0440)</u>

3000	floodplain restoration projects that may result in reducing the amount
3001	of land available for farming, and for County-sponsored agricultural
3002	drainage improvement projects or other County-sponsored land-based
3003	agriculture infrastructure projects that may affect habitat or floodplain
3004	function, in Agricultural Production Districts. The review process shall
3005	be administered by the Water and Land Resources Division and strive
3006	for balance in outcomes that achieve co-equal goals of maintaining and
3007	improving suitability of land for agricultural productivity, increasing
3008	habitat quality, and restoring floodplains and ecological function. The
3009	review process should:
3010	a. Occur early in the planning process for projects, and at regular
3011	intervals for ongoing programs;
3012 3013	 b. Consider guidance from relevant plans relating to agriculture, salmon recovery, and floodplain management;
3013	<u>c. Consider efforts for advancing multiple resource interests;</u>
3015	d. Track on-the-ground changes in land cover relative to acreage
3016	targets for farmland and habitat restoration areas, focused on
3017	impacts to agricultural lands and fish populations;
3018	e. Consider input and recommendations resulting from engagement
3019	and input from external partners and subject matter experts; and
3020	f. Identify and address barriers to efficient implementation of the
3021	process.
3022	
3023	The review process may also be offered for projects and programs
3024 3025	sponsored by King County agencies aside from the Water and Land
3025	<u>Resources Division and/or for projects and programs sponsored by</u> external entities.
3020	external entities.
3028	((R-650a)) <u>R-754</u> ((The Snoqualmie Valley Agricultural Production District is the first
3029	Agricultural Production District to undergo a watershed planning effort
3030	called for in R-650. King County shall implement the recommendations
3031	of the Snoqualmie Fish, Farm and Flood Advisory Committee. The
3032	recommendations of the task forces and other actions identified in the
3033	final Advisory Committee Report and Recommendations will form the
3034	basis for a watershed planning approach to balance fish, farm and flood
3035 3036	interests across the Snoqualmie Valley Agricultural Production District
3038	and an agreement on protecting a defined number of acres of agricultural land. The Advisory Committee, or a successor committee,
3037	will monitor progress of the task forces and will reconvene to evaluate
3039	the watershed planning approach to balancing interests prior to the
3040	next Comprehensive Plan update. The policy issues and
3041	recommendations outlined in the Snoqualmie Fish, Farm, Flood
3042	Advisory Committee Report and Recommendations are largely specific
3043	to the Snoqualmie Valley and are not intended to be applied broadly in
3044	other Agricultural Production Districts. Future Fish, Farm, Flood efforts
3045	
3046	focused in other Agricultural Production Districts will need to go
	focused in other Agricultural Production Districts will need to go through their own processes to identify barriers to success for all

A policy reflecting the outcome of this effort shall be included in the next eight-year update.)) The County shall, to the maximum extent feasible, continue to support the Snoqualmie Valley Agricultural Production District fish, farm, flood effort. R-755 The County shall continue to document and consider the lessons

3060	in other geographies, with the co-equal goals of balancing farm, fish,
3061	and flood interests where farms, fish habitat, and floodplains overlap,
3062	<u>as well as strategies for avoiding, minimizing, and mitigating losses of</u>
3063	farmable land, floodplain functions, and habitat functions. The County
3064	should support planning efforts similar to the Snoqualmie Valley Fish,
3065	Farm, and Flood Advisory Committee in other geographies if and when
3066	the County and partners choose to pursue such efforts or if acute
3067	tensions among various interests arise in a particular Agricultural
3068	Production District or other area of the county.
3069	

3070((R-651Maintaining the viability of farmlands is a high priority for King County.3071Within the Agricultural Production Districts, measures to protect3072Within the Agricultural Production Districts, measures to protect3073threatened or endangered species shall be tailored to ensure working3073farms can continue to operate.

3074

3114

3075 Two Agricultural Production Districts in or near urban areas, the Lower Green River 3076 Valley and Sammamish Valley, were designated in the 1985 Comprehensive Plan, and those designations have been retained. The development rights from many, but not all, 3077 3078 of the parcels in these two districts have been purchased through the Farmland 3079 Preservation Program. The Lower Green River Agricultural Production District is 3080 completely surrounded by urban designated land and as such, functions as both prime 3081 agriculture land and urban separator.)) Each of the ((other)) Agricultural Production 3082 Districts and some Farmland Preservation Program lands outside of Agricultural 3083 Production Districts ((also)) share boundaries with cities. The challenges to agriculture 3084 from urban development include alterations to hydrology that result in flooded fields, 3085 increased traffic that interferes with farm vehicles on roads, increased lighting at night, 3086 complaints from urban neighbors about farm operations, and high land prices. The 3087 benefits of being located near urban areas include access to urban markets and 3088 consumers and increased recognition and appreciation of locally produced goods. 3089

- 3090 ((R-652)) <u>R-756</u> King County commits to preserve Agricultural Production District 3091 parcels in or near the Urban Growth Area because of their high 3092 production capabilities, their proximity to markets, and their value as 3093 open space. King County should work with cities adjacent to or near 3094 Agricultural Production Districts to minimize the operational and 3095 environmental impacts of urban development and public facilities and 3096 infrastructure on farming and farmland, and to promote activities, such 3097 as Farmers Markets and agriculture processing businesses, that benefit 3098 both the cities and the farms by improving access to locally grown 3099 agricultural products. 3100
- 3101
3102((R-653)) R-757
regionally designated resource that ((is to)) shall remain in
unincorporated King County except as allowed in Policies R-760, R-
761, and R-762. The Lower Green River Agricultural Production District
functions as an urban separator between the cities of Kent and Auburn.
King County may contract with other jurisdictions to provide some local
services to this area as appropriate.

3109 ((Pastoral vistas make agricultural land a popular destination for recreation. However,
 3110 creating parks with active recreational facilities in the Agricultural Production Districts is
 3111 not appropriate because the land should be prioritized for agriculture. In addition,
 3112 heavy recreational use in or near the Agricultural Production Districts could result in
 3113 trespass and damage to crops, animals and farm equipment.

3115R-654))R-758Active recreation((al))facilities should not be located within3116Agricultural Production Districts. When new parks, natural areas, or3117trails are planned for areas within or adjacent to Agricultural

3118	Production Districts, King County should work with farmers to minimize
3119	impacts to farmland and agricultural operations.
3120	
3121	((Public road and utility projects within and through Agricultural Production Districts
3122	must be designed to prevent disruption to agriculture. Therefore, road and utility
3123	district capital facilities and plans, including water, wastewater, recycled water, and
3124	drainage, need to ensure that services are consistent with preservation of long-term
3125	agriculture. (Chapter 9, Services, Facilities and Utilities, contains policies requiring
3126	special district plans to be consistent with land use plans.)
3127	
3128	R-655)) R-759 Public services and utilities provided by King County and other
3129	entities within and adjacent to Agricultural Production Districts shall be
3130	designed to support agriculture and minimize significant adverse
3131 3132	impacts on agriculture and to maintain total farmland acreage and the
3132	area's historic agricultural character: a. ((Whenever feasible, w)) <u>W</u> ater lines, sewer lines <u>,</u> and other public
3133	facilities should avoid crossing Agricultural Production Districts.
3135	Installation should be timed to minimize negative impacts on
3136	seasonal agricultural practices;
3137	b. Road projects planned for the Agricultural Production Districts,
3138	including additional roads or the widening of roads, should be
3139	limited to those that are needed for safety or infrastructure
3140	preservation and that benefit agricultural uses. ((Where possible,
3141	a)) <u>A</u> rterials should be routed around the Agricultural Production
3142	Districts. Roads that cross Agricultural Production Districts should
3143	be aligned, designed, signed, and maintained to minimize negative
3144	impacts on agriculture, and to support farm traffic; ((and))
3145	c. In cases when King County concludes that regional public
3146	infrastructure <u>projects</u> cannot be located outside of, and must
3147 3148	intrude into, Agricultural Production Districts, the County shall ensure that the infrastructure be built and located to minimize
3140 3149	disruption of agricultural activity, and shall establish agreements
3147	with the relevant jurisdictions or agencies((-)); and
3151	d. If ((public services and utilities)) <u>infrastructure projects</u> reduce total
3152	acreage in the Agricultural Production District, mitigation shall
3153	follow the criteria established in policy R-((656a)) <u>761</u> .
3154	• • • •
3155	((R-656)) <u>R-760</u> King County may allow lands to be removed from the Agricultural
3156	Production Districts only when it can be demonstrated that:
3157	a. <u>1.</u> Removal of the land will not diminish the productivity of prime
3158	agricultural soils or the effectiveness of farming within the local
3159	Agricultural Production District boundaries; and
3160	((b.)) <u>2.</u> The land is determined to be no longer suitable for
3161 3162	agricultural purposes; or ((د.)) <u>b.</u> The land is needed for public services or utilities as described in
3163	policy R-((655)) <u>759</u> .
3164	poncy k-{(000 <i>)<u>//07</u>.</i>
3165	((R-656a)) <u>R-761</u> King County may only approve the removal of land from the
3166	Agricultural Production District if it is, concurrently with <u>or in advance</u>
3167	of removal of the land from the Agricultural Production District,
3168	mitigated through the replacement of agricultural land abutting the
3169	same Agricultural Production District that is, at a minimum, comparable
3170	in size, soil quality, and agricultural value. As alternative mitigation,
3171	the County may approve a combination <u>of</u> acquisition and restoration
3172	totaling three acres for every one acre removed as follows:
3173	a. A minimum of one acre ((must)) <u>shall</u> be added into another
3174 3175	Agricultural Production District for every acre removed; and
3175	b. Up to two acres of unfarmed land in the same Agricultural Production District from which land is removed shall be restored
3177	for every acre removed.
5177	Pural Area/(s)) and Natural Pecource Lands - Page 3-58

Rural Area((s)) and Natural Resource Lands - Page 3-58

3178		
3179	R-762 Replacement land	<u>required under R-761 may be acquired and added to</u>
3180	the Agricultural Pro	oduction District in advance of removal as follows:
3181	a. The mitigation	is for a public agency or utility project consistent
3182	<u>with R-759;</u>	
3183	<u>b. Property prop</u>	osed to be added to the Agricultural Production
3184	District is app	roved by the Department of Natural Resources and
3185	Parks to ensure	e compliance with 761;
3186	<u>c. The subseque</u>	nt map amendment to remove the Agricultural
3187	Production Dis	trict land identifies the previously added land being
3188	<u>used for mitiga</u>	ution; and
3189	d. The Departme	nt of Natural Resources and Parks tracks the acreage
3190	of advance a	additions of replacement land and subsequent
3191	<u>removals to en</u>	sure that the requirements of R-761 are met.
3192	2. Sustaining Agricul	ture and Farming
3193	((King County has made a sign	ificant investment in preserving farmland for agriculture
3194		ved the open space benefits of these lands. The county
3195		tinues to be farmed into the future by helping farmers
3196		ns and by promoting local agricultural products through
3197		improve access to locally grown agricultural products.))
• • • •	initiastructure and activities that	improve access to locally grown agricultural products.))
3198		

3199 Farmers, especially new and beginning, have limited resources to access land and 3200 financing to begin production. Furthermore, all King County farmers, regardless of size 3201 and years of farming, have a great need for information on marketing and production 3202 strategies required to operate their farming businesses. The Local Food Initiative 3203 ((seeks to)) provides this information and assistance((. Under the Local Food Initiative 3204 regulatory and technical assistance will increase and be streamlined through a 3205 coordinated)) by coordinating economic development efforts by different ((ϵ))<u>C</u>ounty 3206 agencies and partner organizations that serve farmers. ((The team will provide 3207 assistance with production, marketing, and business planning through a "one-stop 3208 shop" available on-line with a possibility of physical co-location of services if necessary.))

((R-657)) <u>R-763</u> King County shall work with ((and provide support to)) Washington State University Extension and other technical service providers for ((its)) their research and education programs that assist small-scale commercial farmers.

3209 3210

3211

3212

3213

3214

3220

3221

3222

3223

3224

3229

3231

3232

- 3215 ((R-658)) <u>R-764</u> King County shall work with other jurisdictions and non((-))profits 3216 to expand markets for farm products by supporting ((Puget Sound 3217 Fresh and other)) programs that promote local food and connect buyers 3218 with producers. 3219
 - ((R-659)) <u>R-765</u> King County should work with other jurisdictions, farm advocacy groups, and others to support ((Farmlink,)) farmer training and other programs that help new farmers get started, gain access to farmland, and develop successful marketing methods.

3225 ((King County recognizes the value of Farmers Markets for their role in 3226 community-building, their contribution to farmer success by providing a 3227 direct-marketing opportunity, and for making the bounty of King County farms available 3228 to city residents.

3230 R-660)) R-766 King County should work with other jurisdictions to continue to provide support to Farmers Markets.

3233 ((R-661)) <u>R-767</u> King County should develop <u>and encourage the use of</u> incentives 3234 ((to encourage)) for food production on prime farmland. These

- 3235incentives could include tax credits, expedited permit review, reduced3236permit fees, permit exemptions for activities complying with best3237management practices, or similar programs.
- 3239R-768The ((c))County should continue to work with community-based
organizations that can assist farmers who are Black, Indigenous, or
other People of Color, immigrants, ((and minority farmers)) refugees,
and other communities that have traditionally experienced ((access))3243issues((;)) in gaining access to farmland.
- 3245((R-661a)) R-769To help make more farmland accessible to beginning,3246((and)) low -income, historically underinvested, and socially3247disadvantaged3248agricultural land to farmers, King County should expand its leasing of3249appropriate and should encourage private farmland owners to lease3250unused land to farmers.
- 3252((R-661b)) R-770King County should expand representation of low income,3253((and)) historically underinvested, and socially disadvantaged farmers3254and community organizations within King County agricultural3255processes, such as the Agriculture Commission, advisory committees,3256task forces, and hiring.3257

 3258 ((King County recognizes the importance of adding value to and direct sales of 3259 agricultural products as a way to keep agriculture viable in an urban landscape. King 3260 County's agriculture program works with farmers to encourage them to add value to 3261 their products by processing, packaging, and selling them directly to the consumer.

- 3262326332643264326432643265326532663266326732683268326932693269appropriate to the zone in which they are operating. King County
work with local and state health departments to
develop regulations supporting these activities and with local
non((-))profits and academic institutions to educate farmers about safe
food processing practices and compliance.
- 3271((R-663)) R-772 King County supports the processing and packaging of farm3272products from crops and livestock, and ((will)) shall continue to work3273with farmers, ranchers, cities, neighboring counties, and other3274interested parties to address infrastructure and regulatory needs that3275promote sales to consumers, institutions, restaurants, and retail3276enterprises.
- 3278((R-664)) R-773 King County supports innovative technologies to process waste3279from dairy and other livestock ((waste)) to reduce nutrients and to3280create other products such as energy and compost in areas that have3281Agriculture and Rural Area land use designations.

3283 ((King County's Agricultural Production Districts have some of the best soil and 3284 conditions for growing food in the country. There is an increasing awareness among 3285 farmers about the potential for expanding local food production compatible with a 3286 variety of sustainability goals. Concerned about multiple threats to future food 3287 production, King County farmers are working with others to promote voluntary 3288 incentives that will increase the community of those involved in the local production of 3289 food:

3290

3238

3251

3270

3277

3291R-665))R-774King County should develop incentives that support local food3292production and processing to increase food security; provide a healthy,3293affordable local food supply; and reduce energy use.3294

3295 Agricultural practices modify the natural environment ((in order)) to produce food or 3296 fiber or maintain livestock for human use. Ideally, practices that maintain the 3297 productivity of the lands also protect environmental quality ((and)), respect natural 3298 processes such as flooding and channel migration, and help mitigate the impacts of 3299 climate change. Farmers, technical advisors, floodplain managers, and environmental 3300 regulators must work together to understand the relationships between production 3301 practices, environmental protection, public safety, and profitability. ((These practices, 3302 referred to as b))Best management practices($(\frac{1}{2})$) are designed to prevent erosion, 3303 maintain flood conveyance and flood storage, retain riparian vegetation, avoid stream 3304 bank collapse, properly dispose of animal wastes, safely use and dispose of pesticides 3305 ((and)), prevent excessive stormwater runoff, capture and reuse methane gas, reduce greenhouse gas emissions, and retain access to local food. ((Best management 3306 3307 practices planned and implemented through efforts such as farm management plans 3308 can control runoff volumes and prevent pollutants from being discharged into local 3309 waterways and groundwater. These practices, such as manure bins, paddock and 3310 grazing area designs, and stream exclusion fencing, can reduce or eliminate pollutants in stormwater runoff from agricultural activities. 3311 3312

3313 Climate change has the potential to affect farming in King County, with increased 3314 severity of winter flooding, higher summer temperatures, reduced availability of surface 3315 and groundwater for irrigation, increased pest risk, and changes in the types of crops 3316 suited to this area. At the same time, soil best management practices, including use of 3317 cover crops and modified tilling methods, and amendment with compost, biosolids or 3318 other organic matter can help to mitigate the impacts of climate change by retaining soil 3319 moisture, sequestering carbon, and reducing other greenhouse gas emissions. 3320 Consideration and investigation of alternative water supplies, such as recycled water, 3321 can also help to mitigate the impacts of climate change and help support local and 3322 sustainable agriculture. Development of anaerobic digesters for dairy manure and other 3323 agricultural waste products can capture methane gas and convert it to usable energy. 3324 Having locally-available produce can help to reduce greenhouse gas emissions from 3325 transport.

3326

King County's policies in this chapter to conserve farmland and encourage food
 production take on a greater significance when considering that climate change may
 result in food shortages in other parts of the country and world. The Puget Sound region
 may become even more valuable for food production than it already is if producing
 food in other parts of the world becomes more difficult.

3333 R-666) R-775 King County shall provide incentives, educational programs, and 3334 other methods to encourage agricultural practices and technological 3335 improvements that maintain water quality, protect public health, 3336 protect fish and wildlife habitat, protect historic resources, maintain 3337 flood conveyance and storage, reduce greenhouse gas emissions, 3338 control noxious weeds, ((and)) prevent erosion of valuable agricultural 3339 soils, and increase soil water holding capacity while maintaining the 3340 functions needed for agricultural production. 3341

((In order t))<u>T</u>o maintain and operate their farms, farmers need assistance in maintaining
 farm viability in the face of increasing urbanization, soil degradation, increased flooding
 and water scarcity caused by climate change, and the increased impacts of upslope
 development. The maintenance of drainage and irrigation systems is essential for
 commercial agriculture to succeed in the county.

3348((R-667 King County shall continue to support agriculture with an expedited3349review process and reduced fees for structures necessary for farm3350operations.

3351

3394

- 3352 R-668)) R-776 King County shall work with federal, state, local, and private 3353 agencies to improve the availability and efficiency of water for 3354 agriculture through use of tools such as: expanding the availability of 3355 recycled water to farms((,)); offering incentives for irrigation efficiency((,)); and supporting mechanisms for water rights banking and 3356 3357 trading that will give farmers greater certainty for water rights while protecting instream flows. King County ((will)) shall encourage the 3358 3359 maintenance and preservation of agriculture water rights for agriculture purposes. Assessments of future surface and groundwater 3360 3361 availability for agriculture should consider projected impacts of climate 3362 change.
- 3364((R-668a))R-777King County ((will))shall continue to support drainage3365improvements through its Agricultural Drainage Assistance Program3366and actively seek new ways to make drainage projects less expensive3367and easier to implement and to improve drainage systems across3368property lines.
- 3370((R-669)) R-778King County should continue to collaborate with the Washington3371State University Extension, the University of Washington, and King3372Conservation District to:
 - a. ((d))Develop information on and analyze the ((likely)) current and future impacts of climate change on agriculture in King County((7));
 - b. ((and to d))Develop mitigation, resiliency, and adaptation strategies that are appropriate for King County's soils and farm economy((. Research should address)), such as soil management, use of commercial compost, water storage, irrigation, alternative crops, integrated pest management, and nutrient management((. The information should be made available to)); and
 - <u>c. Share the information and strategies with</u> farmers through technical assistance programs and farm planning.
- 3384((R-669a))R-779Farmers leasing King County properties, or conducting work on3385((property))properties on which King County owns a Farmland3386Preservation Program easement should use ((A))agricultural ((B))best3387((M))management ((P))practices, integrated pest management, and3388other sustainable farming methods.
- 3390((R-670)) R-780King County should provide incentives for soil management3391practices that reduce greenhouse emissions through its ((A))agricultural3392((B))best ((M))management ((P))practices ((C))cost-((S))sharing3393((P))program.

3395 ((Agricultural lands have historically been located in floodplains. Agriculture coexists 3396 with flood storage and seasonal inundation; however, there is a growing concern that 3397 farmers cannot protect their investments from flooding. The federal, state and local 3398 flood hazard management standards are designed to ensure there is no adverse impact 3399 to upstream or downstream property owners from activities that are allowed within the 3400 floodplain. King County recognizes that most of the agriculture in the county is located 3401 in the floodplains because that is where the prime agricultural soils are located. In 3402 recent years, King County has provided extensive technical and financial support to 3403 farmers to build farm pads and raise homes and agricultural buildings in the 3404 Snoqualmie floodplain. This industry requires special consideration because it is tied to these agricultural soils, and can occur almost nowhere else in the county. 3405 3406

3407R-672))R-781King County should work with federal, state, and local jurisdictions3408to reduce flood impacts to agricultural operations. The ((c))County3409((will)) shall continue to investigate the needs of agriculture before,3410during, and after flood events, to determine if and how losses can be3411reduced, and ((will)) shall use this information in designing its3412floodplain policies and regulations.

The high cost of agricultural land continues to be a barrier for many farmers wishing to locate their farm businesses within King County. The steady rise in agricultural land values continues to hamper the ability of many potential and current farmers to enter or expand their operations.

3419((R-673)) R-782In addition to enhancing the Farmland Preservation Program, the3420((c))County should develop more innovative solutions and incentives to3421keep agricultural land affordable and profitable for active farming.

3422 3. Agriculture and the Food System

3423 King County has a year-round growing season, a strong farming tradition and local 3424 farming expertise, and proximity to major markets for local foods and food products. 3425 Many of the policies in the previous section are aimed at helping to overcome obstacles 3426 to successful farming in King County. With that direction and a focus on production of 3427 food, farmlands in King County could be even more instrumental in strengthening the 3428 food system for the benefit of all King County residents.

Agricultural lands, farming practices and activities, and farmers are part of the local and regional food system. In addition to the growing of food, the food system includes processing, distribution, food availability, and disposal. As more people move to this region, King County recognizes the importance of planning for the regional food system to be more sustainable and resilient.

3435

3413

3436 ((In order to do so, King County will focus on developing a local food system that can:

- 3437 Expand opportunities for local farms and enhance the rural economy;
- 3438 Promote healthy eating to improve public health;
- Improve access to healthy, safe, and affordable food, to all county residents;
 especially those with low incomes;
- 3441 Reduce energy use and greenhouse gas emissions; and
- 3442 Divert food waste from landfills.

Studies have shown that 35% of garbage is food. Efforts to prevent food waste divert
edible food to hunger programs and recycle food waste into compost could reduce
what goes to the landfill, reduce methane generated by landfills, provide food for
hungry people and provide soil amendments.

3448

3443

Food and nutrition are major factors in public health. The USDA's 2010 Dietary 3449 3450 Guidelines for Americans call for significant increases in daily consumption of fruit, 3451 vegetables, milk products and whole grains. In 2013, 13.4% of King County residents lacked access to enough food for an active, healthy life and 18.7% of King County 3452 children lived in food-insecure households (Feeding America, Map the Meal Gap 2015); 3453 3454 and 73% of King County middle and high school age youth do not consume 3455 recommended levels of fruits and vegetables (Healthy Youth Survey 2012). Thirty-two 3456 percent of adults in King County consume less than one serving of fruits per day and 17 percent less than one serving of vegetables daily, and there are significant differences 3457 3458 across education levels for both fruit and vegetable consumption and across race and 3459 income groups for vegetable consumption (Communities Putting Prevention to Work, 2010 and 2012). Efforts to increase the availability of(these foods to King County 3460 3461 residents should include encouraging an increase in food production on King County farms. Although it is not realistic for King County farms and farmers to provide the full
 complement of recommended foods in public health guidelines, there is the potential
 to increase food production for local and regional consumption, particularly in the first
 three categories.

- 3467
3468R-674)) R-783
understand the constraints to increased food production in the county
and develop programs that reduce barriers and create incentives to
growing food crops and raising food-producing livestock.
- 3472((R-675)) R-784 King County ((should)) shall prioritize its programs to help build3473and support a sustainable, reliable, equitable, and resilient local food3474system. King County ((should)) shall strive to ((make)) strengthen the3475local food system, ((accessible)) increase accessibly to ((all)) the local3476food supply, and strive to make access to the local food system3477culturally appropriate by:
- 3478a. Expanding leadership and ownership of food production3479opportunities to low-income, historically underinvested, and3480socially disadvantaged farmers;
- 3481b. Making locally grown, healthy, and culturally relevant foods3482available to and reflective of King County communities and low-3483income, historically underinvested, and socially disadvantaged3484farmers; and3485c. Supporting low-income, historically underinvested, and socially
 - c. Supporting low-income, historically underinvested, and socially disadvantaged populations in efforts to improve equitable food access and food production goals, including alternative pathways for farmland access that meet their community's needs.
- 3490((R-676)) R-785King County should consider adopting procurement policies that
would encourage purchases of locally grown fresh foods.
- 3493
3494((R-677)) R-786 King County should ((promote local food production and
processing to)) strengthen a sustainable and climate-resilient local food
system and reduce the distance that food must travel from farm to table
by promoting and supporting local food production and local
food processing.34939495
system and reduce the distance that food must travel from farm to table
by promoting and supporting local food production and local
processing.
- 3499((R-677a))R-787King County should continue food waste programs for single3500((family,))detached residences,((multifamily))multiunit residences,3501businesses, and institutions, aimed at reducing generation, promoting3502donation, and encouraging curbside collection for anaerobic digestion3503and composting.3504
- 3505((R-677bKing County should prioritize the economic development of the food3506and agriculture industries in order to build a more sustainable and3507resilient local food system.

3509 Government funded food programs are increasingly relying on electronic cards for 3510 clients to purchase food. For example, food stamps have been replaced with electronic 3511 benefits transfer cards. Grocery stores can easily adopt new electronic technology to 3512 accept such cards. It is more challenging for Farmers Markets to do so as the majority of 3513 them are open-air events in parking lots without access to electricity or telephone 3514 connections. To improve accessibility of Farmers Markets for low-income shoppers, a 3515 concerted effort needs to be made to develop the ability to easily accept electronic 3516 payment. This will help make fresh food more available to low-income shoppers as well 3517 as increase the customer base for farmers.

3518

3508

3466

3471

3486

3487

3519 R-678)) R-788 King County should support and collaborate with ((other 3520 organizations to further the development of) food incentive program

3521	providers, with food providers, producers, and distributers, and with
3522	community based organizations to further develop and expand
3523	programs that increase ((the ability of shoppers to)) access to affordable
3524	foods and the use of food assistance benefits ((and the ability of farmers
3525	to accept electronic and other forms of payment)) at ((F))farmers
3526	((M)) <u>m</u> arkets and farm stands.

3527 ((E.))D. Mineral Resources

King County contains many valuable mineral resources, including deposits of sand, rock, gravel, silica, clay, and metallic ores. Mineral extraction and processing ((these deposits)) is an important part of King County's economy, currently providing hundreds of jobs and producing materials used locally, regionally, and nationally. ((Mineral extraction also has historic significance, in that it provided the impetus for past development in many parts of King County, including Black Diamond and the Newcastle area.

3536 King County is required by the Growth Management Act to designate and conserve 3537 mineral resource lands and plan appropriately to protect them. In doing so t))The 3538 County must assure that land uses adjacent to mineral resource lands do not interfere 3539 with the continued use of mineral resource lands in their accustomed manner and in 3540 accordance with best management practices. ((The policies in this section explain the 3541 steps taken to designate and conserve mineral resource lands and provide direction on 3542 the comprehensive review needed before additional sites are designated for mineral 3543 resource extraction. 3544

3545 Four main steps are necessary to support and maintain local availability of mineral resources. First, mineral resource sites should be conserved through designation and 3546 3547 zoning. Second, land use conflicts between mineral extraction, processing and related 3548 operations and adjacent land uses should be prevented or minimized through policies 3549 and assessment and mitigation of environmental impacts. Third, operational practices 3550 should protect environmental quality, fisheries and wildlife, in balance with the needs of 3551 the industry. Finally, mineral extraction areas need to be reclaimed in a timely and 3552 appropriate manner.))

The Mineral Resources Map identifies three different types of Mineral Resource Sites -((D))<u>d</u>esignated Mineral Resource Sites, Potential Surface Mineral Resources, and Nonconforming Mineral Resource Sites and Existing Mineral Resource Sites in the Forest Production District. The sites were identified in the 1994 King County Comprehensive Plan or in subsequent ((annual)) updates. Before the Mineral Resources Map is a table that contains information on each Mineral Resource Site parcel.

3561 ((The Designated Mineral Resources Sites on the Mineral Resources Map satisfy King County's responsibility to designate and conserve mineral resources consistent with 3562 requirements of the Growth Management Act. All Designated Mineral Resources Sites 3563 3564 have Mineral zoning. Most of the Designated Mineral Resources Sites shown on the 3565 map contain sand and/or gravel; however, a few contain other mineral resources such as silica, rock, stone, shale, and clay. The criteria used in the 1994 King County 3566 Comprehensive Plan called for designation of properties that at the time were either 3567 3568 zoned outright for mining or those operating under an approved Unclassified Use 3569 Permit.)) In addition to the designated Mineral Resources Sites, the Forest Production 3570 District and Forest (F) zone preserves the opportunity for mineral extraction. Mineral extraction is a permitted or conditional use in the F zone. Because forestry does not 3571 3572 preclude future mineral extraction, King County considers the Forest Production District 3573 ((as)) part of its strategy to conserve mineral resources.

3574

3535

3575 The Mineral Resources Map also shows Potential Surface Mineral Resource Sites. These 3576 are sites where King County may allow some future surface mining to occur or where 3577 the owner or operator indicates an interest in future mineral extraction. ((The Potential Surface Mineral Resources Sites shown on the map do not indicate the material. 3578 Because of the geology of King County, most valuable metallic mineral resources are 3579 located in the Forest Production District, and are therefore already protected from 3580 urban development.)) Identification of Potential Surface Mineral Resources Sites 3581 3582 satisfies the Growth Management Act requirements to not knowingly preclude 3583 opportunities for future mineral extraction and to inform nearby property owners of the potential for future mineral extraction use of these areas ((in order)) to prevent or 3584 3585 minimize conflicts.

3587 The Mineral Resources Map also shows Nonconforming Mineral Resources Sites. These 3588 are sites on which some mining operations predated King County zoning regulations without appropriate zoning or other land use approval. Mining for these sites has not 3589 3590 been authorized through a land use designation or zoning classification. These sites are shown for informational purposes only. Mining can occur on an identified site only if 3591 mining has been approved as a nonconforming use by the Department of Local 3592 3593 Services - Permitting Division, and mining activities have received all other necessary 3594 permit approvals. Because the sites have not undergone formal review to be 3595 designated on the Land Use Map or zoned for mining, the sites do not have long-term 3596 commercial significance. However, they can continue to serve mineral supply needs. 2507

3586

3597	
3598	((R-679)) <u>R-789</u> King County shall identify existing and potential mineral extraction
3599	sites on the Mineral Resources Map ((in order)) to conserve mineral
3600	resources, promote compatibility with nearby land uses, protect
3601	environmental quality, maintain and enhance mineral resource
3602	industries, and serve to notify property owners of the potential for
3603	mineral extraction activities. The County shall identify((:
3604	a. Sites with existing Mineral zoning as Designated Mineral Resource
3605	Sites;
3606	b. Sites where the landowner or operator has indicated an interest in
3607	mineral extraction, sites that as of the date of adoption of the 1994
3608	Comprehensive Plan had potential Quarrying/Mining zoning, or
3609	sites that the County determines might support future mineral
3610	extraction as Potential Surface Mineral Resource Sites; and
3611	c. Sites where mining operations predate zoning regulations but
3612	without zoning or other land use approvals as Nonconforming
3613	Mineral Resource Site <u>sites consistent with Washington State</u>
3614	Department of Natural Resources mineral resource mapping and in
3615	<u>accordance with the mineral resource lands evaluation and</u>
3616	designation criteria established in Chapter 36.70A Revised Code of
3617	Washington and applicable sections in Washington Administrative
3618	<u>Code</u> .
3619	
3620	((R-680)) <u>R-790</u> King County shall designate as Mining on the ((Comprehensive
3621	Plan)) Land Use Map those sites that had Potential Mineral (M) zoning
3622	prior to the date of adoption of the 1994 Comprehensive Plan and
3623	those sites that had Mineral zoning as of the date of the adoption of the
3624	2000 King County Comprehensive Plan update.
3625	
3626	A Mining designation on the Land Use Map shall not create a
3627	presumption that Mineral zoning will be approved for sites with
3628	Potential Mineral zoning. Potential Mineral zoning shall not be applied
3629	to additional sites.
3630	
3631	((Mineral extraction is an intense operation that may continue for many years. Mineral

3631 ((Mineral extraction is an intense operation that may continue for many years. Mineral
 3632 extraction operations can significantly change the land being mined and have impacts
 3633 on the environment and on nearby properties. Beyond direct impacts to the mine site

Rural Area((s)) and Natural Resource Lands - Page 3-66

and nearby properties, mineral extraction and processing can contribute to greenhouse
 gas emissions. In 2014, the County and cities updated the Countywide Planning
 Policies to set a goal to reduce greenhouse gas emissions 80% by 2050 at the county
 scale. The County's 2015 Strategic Climate Action Plan includes the same overarching
 goal.

3639

3657 3658

3659

3660

3661

3662

3663

3664

3665

3666

3667

3668

3669

3670

3640 King County requires comprehensive review, including environmental analysis, prior to
 3641 approving a Land Use Map and zoning change. Site-specific environmental review will
 3642 also be required for a grading permit or any other permit that is necessary for a mineral
 3643 extraction operation. Therefore, a comprehensive site-specific study is required prior to
 3644 any such approval.

- 3646 R-681)) R-791 King County may designate additional sites on the 3647 ((Comprehensive Plan)) Land Use Map as Mining only following a sitespecific rezone to Mineral zoning. Upon approval of a rezone to 3648 Mineral zoning, the ((Comprehensive Plan)) Land Use Map shall be 3649 3650 amended to designate the site as Mining during the next 3651 Comprehensive Plan update. King County should approve applications 3652 for site-specific rezones to Mineral zoning and applications for permits 3653 that would authorize mineral extraction and processing only following 3654 site-specific environmental study((,)) and early and continuous public 3655 notice and comment opportunities, when: 3656
 - a. The proposed site contains rock, sand, gravel, or other mineral resources;
 - b. The proposed site is large enough to confine or mitigate all operational impacts;
 - c. The proposal will allow operation with limited conflicts with adjacent land uses when mitigating measures are applied;
 - d. The proposal has been evaluated under the State Environmental Policy Act so that the County may approve, condition, or deny applications consistent with the County's substantive State Environmental Policy Act authority, and ((in order)) to mitigate significant adverse environmental impacts((-;)); and
 - e. Roads or rail facilities serving or proposed to serve the site can safely and adequately handle transport of products and are in close proximity to the site.

3671 ((If King County denies an application for a site-specific Mineral rezone it should remove 3672 the Mining land use designation from the Land Use map and the associated Potential Surface Resource Mineral site designation from the Mineral Resources Map. If the 3673 3674 County denies a permit that would authorize mineral extraction and/or processing on a 3675 Designated Mineral Resources Site, the County should consider new information 3676 generated during the permit review process to determine whether the site is not 3677 properly designated as mineral resource land of long-term commercial significance, the 3678 designation for the site on the Mineral Resources Map should be changed from Designated Mineral Resources Site to Potential Surface Mineral Resource Site. In 3679 3680 addition, the Mining land use designation and the Mineral zoning classification for the 3681 site should be amended to be compatible with the surrounding properties.

3683 R-682)) R-792 King County should remove the Mining land use designation on the 3684 ((Comprehensive Plan)) Land Use Map and associated Potential Mineral 3685 zone or Mineral zoning for any sites that have been denied a rezone to 3686 Mineral.

3687

3701

3707

3708 3709

3710

3711

3712

3688 If a grading or other permit necessary for the extraction of mineral 3689 resources is denied on a ((D))designated Mineral Resource Site, the 3690 County shall evaluate whether such mineral resource designation is 3691 appropriate. The re-evaluation process may occur as part of the annual 3692 update and information produced during the permit review process shall be used to evaluate the appropriateness of changing the existing 3693 designation. If the County determines that the site should not be 3694 3695 designated as mineral resource land of long-term commercial significance as defined in the Growth Management Act, the County 3696 3697 shall evaluate whether the site should remain on the Mineral Resource 3698 Map, and whether the land use designation and zoning classification 3699 should be changed, with consideration for compatibility with the 3700 surrounding properties.

- 3702 ((R-683)) R-793 King County may amend the Mineral Resources Map to identify 3703 additional Potential Surface Mineral Resource Sites as part of the 3704 ((eight)) <u>10-year or midpoint update.</u> 3705
- 3706 ((R-684)) R-794 The preferred adjacent land uses to sites designated as Mining on the Land Use Map are mineral extraction, industrial, open space, or forestry uses. Sites for newly proposed Mineral zones shall not be adjacent to or within Agricultural Production Districts. Agricultural lands and operations should be protected from significant impacts associated with nearby mineral extraction operations.
- 3713 ((R-685)) <u>R-795</u> Mineral extraction activities are ((permitted)) allowed within the 3714 Forest Production District, consistent with policy R-((620))718. 3715 However, a conditional use permit shall be required for mineral extraction activities in the Forest zone located within one-quarter mile 3716 3717 of established residences or for proposals seeking to use local access 3718 streets where abutting lots are developed for residential use. 3719
- 3720 ((R-686)) <u>R-796</u> ((In order t))<u>T</u>o comprehensively assess the environmental impacts 3721 associated with a zoning change, conditional use, or operating 3722 approval for a mineral extraction proposal, the range of environmental 3723 impacts, including short-term and long-term effects arising or existing over the lifetime of the proposal, shall be assessed at the earliest 3724 3725 possible stage. This should include the potential for phasing of future 3726 proposals for structures and operations related to mineral extraction, 3727 such as asphalt and concrete batch plants. 3728
- 3729 ((R-687)) <u>R-797</u> King County should prevent or minimize conflicts with mineral extraction when planning land uses adjacent to ((D))designated Mineral 3730 3731 Resource Sites and Potential Surface Mineral Resource Sites. Subarea 3732 plans or area zoning and land use studies may indicate areas where 3733 Mining is an inappropriate land use designation. ((Đ))designated 3734 Mineral Resource Sites and Potential Surface Mineral Resource Sites 3735 and Nonconforming Mineral Resource Sites should be shown on the 3736 Mineral Resources Map ((and subarea study maps in order)) to notify 3737 nearby property owners and residents of existing and prospective 3738 mineral extraction activities. 3739
- 3740 ((R-688)) <u>R-798</u> The periodic review process for mineral extraction and processing operations shall include sufficient public notice and comment 3741 3742 opportunities. The purpose of the periodic review process is to provide

- 3743 opportunities for public review and comment on the mineral resource 3744 facility's fulfillment of state and County regulations and 3745 implementation of industry-standard best management practices, and 3746 for King County to modify, add or remove conditions to address new 3747 circumstances and/or unanticipated project-generated impacts. The 3748 periodic review process is not intended to re-examine the 3749 appropriateness of the mineral resource use, or to consider expansion 3750 of operations beyond the scope of existing permitted operations since 3751 that review would be accomplished through the County's permitting 3752 process. The periodic review is intended to be a part of King County's 3753 ongoing enforcement and inspections of mineral resource sites, and 3754 not to be a part of the County's permitting process. 3755
- ((R-689)) R-799 Conditions and mitigations for significant adverse environmental 3756 3757 impacts associated with mineral extraction or mining operations and 3758 their associated structures or facilities should be required, especially in 3759 the following areas: 3760
 - a. Air quality, including greenhouse gas and other emissions from minerals extracted for energy production and from transportation of materials to and from the site during operation and reclamation;
 - b. ((Environmentally sensitive and c))Critical areas, such as surface and groundwater quality and quantity, wetlands, fisheries and wildlife habitats, and aquatic habitats;
- 3766 Noise levels: с.
- d. Vibration; 3767 3768

3761

3762

3763

 - Cultural and historic features and resources; j.
 - k. Site security; and
 - I. ((Climate change impacts from minerals extracted for energy production; and
 - m.))Others unique to specific sites and proposals.

3779((R-690)) R-800Where mineral extraction or mining are subject to state or federal3780regulations, King County should work with the state and federal3781governments to ensure that proposals are reviewed with consideration3782of local land use and environmental requirements, regional impacts3783from transport, and assessment of climate change impacts from end((-))3784use of minerals and mined materials.

3785

3796

- 3786 ((R-691)) R-801 King County should work with the Washington State Department of 3787 Natural Resources to ensure that mining areas are reclaimed in a timely and appropriate manner. Reclamation of mineral extraction or mining 3788 sites in the Forest Production District should return the land to forestry. 3789 3790 Where mineral extraction is completed in phases, reclamation also 3791 should be completed in phases as the resource is depleted. When 3792 reclamation of mineral extraction sites located outside of the Forest Production District is completed, the site should be considered for 3793 3794 redesignation to a land use designation and zoning classification 3795 compatible with the surrounding properties.
- ((R-692)) <u>R-802</u> King County shall encourage the removal of existing stockpiles of previously mined material ((in order)) to promote and achieve reclamation of land to its highest and best use.
- ((R-693)) <u>R-803</u> King County shall prohibit the establishment of new coal mines and the expansion of existing coal mines.

((2016)) 2024 King County Comprehensive Plan - ((updated December 6, 2022)) Adopted TBD Attachment A to Ordinance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555)) xxxxx (Proposed Ordinance 2023-0440)

6

Establishment of vibrant, thriving, healthy, and sustainable communities is a key goal of King County's Strategic Plan. Offering adequate choices and opportunities to fully address the spectrum of housing needs in all communities for all of King County's residents is an essential step toward meeting this goal. The County's Strategic Plan aligns with the Washington State Growth Management Act, VISION 2040's Multicounty Planning Policies, and the King County Countywide Planning Policies regarding establishing and implementing clear goals for affordable housing.

The Countywide Planning Policies provide a framework within which all jurisdictions are called upon to plan for a range of affordable housing choices within neighborhoods that promote health, well-being, diversity and access to opportunities for employment, recreation, social interaction and cohesion, active transportation (walking, biking and public transit) and education. The King County Comprehensive Plan strengthens this connection by promoting affordable housing for all county residents through support for adequate funding, zoning, and regional cooperation to create new and diverse housing choices in communities throughout the county.))

I. Housing 8

9 10

((A. King County's Regional Role in Promoting Housing Choice and Opportunity

11 Most housing is financed by and developed in the private sector. The ability of the private sector to develop affordable housing is affected by a wide range of market 12 forces. However, local government actions such as land use policies, development 13 14 regulations and infrastructure finance also have a significant impact on housing 15 affordability. Public funding, incentive programs and mandatory programs are essential 16 to addressing the housing needs of historically disadvantaged communities, including 17 lower-income county residents, older adults, people of color, children and vulnerable adults (including victims and survivors of domestic violence, human trafficking, and 18 19 commercial sexual exploitation), people with developmental disabilities, people with 20 behavioral, physical, cognitive and/or functional disabilities, people who are experiencing homelessness, and growing segments of the population such as 21 22 immigrant and refugee communities.)) The ability of the private and public sector to 23 develop housing is affected by a wide range of market forces. However, local government actions, such as land use policies, development regulations, funding, 24 25 regional collaboration, community engagement, and infrastructure financing 26 significantly impact the capacity to increase housing supply for all incomes, including 27 affordable housing.

28

29 The policies in the housing section set a framework for individual and collective action 30 and accountability to meet regional housing needs and local housing unit growth 31 allocations. The policies seek to increase the supply and diversity of housing, expand 32 housing choice, improve housing stability, reduce displacement, promote equity in 33 housing outcomes, strengthen partnerships to meet housing goals, improve housing tools and processes, and foster a more sustainable and healthier built environment. 34

35

36 ((Summary data regarding housing needs in King County can be found in Technical Appendix B of this Comprehensive Plan.)) 37

Housing Needs in King County А. 38

39 ((The policies in this chapter address affordable housing development, preservation and 40 assistance programs administered by King County, King County's regulatory role in helping to ensure that there is adequate safe and healthy affordable housing in the 41 42 unincorporated areas of the County, and King County's regional role convening 43 partners to meet the housing needs of all county residents at a variety of income levels. 44 45 This chapter calls for more residential growth by preserving existing housing stock and developing new units on vacant parcels within established neighborhoods and in areas 46 47 for new development near high capacity and frequent transit. These locations can offer 48 affordable housing that is close to jobs, transportation and services. Housing 49 development can also provide welcome improvements to communities suffering from a 50 lack of investment. New development in established communities may result in the loss 51 of existing low-cost housing; thus, this plan calls for King County and its partners to work 52 together to help preserve and rehabilitate existing affordable housing. Low-cost 53 housing is a community resource that should be preserved. 54 55 The Countywide Planning Policies have identified the substantial need that exists for

56 low-income rental housing and for moderately priced homes that can be purchased by 57 income-gualified homebuyers. In the past decade, a significant number of homeowners

59 term, those households may need affordable rents, while in the longer term they may 60 again seek to own a moderately-priced home.)) The Growth Management Act requires 61 all jurisdictions to plan for and accommodate the housing needs of residents at every 62 income level. The King County Countywide Planning Policies establish allocations of 63 housing need for each jurisdiction for all income levels, as well as emergency housing, 64 emergency shelters, and permanent supportive housing. Table 1 shows the housing 65 need for urban unincorporated King County, reflected as new units in service, by 66 income levels, including, permanent supportive housing, and emergency housing. The 67 total number of new housing units needed in urban unincorporated King County by 2044 is 5,412. Additionally, 1,034 new emergency housing beds are needed by 2044 to 68 69 meet temporary housing needs.

70

71 <u>Table 4-1: Projected Housing Needs by Income Level in Unincorporated King</u> 72 <u>County</u>

Emergency Housing/Shelter	

73

Appendix B, Housing Needs Assessment, contains summary data and analysis
 regarding housing needs in King County. The findings demonstrate a substantial need
 for extremely low-, very low-, and low-income rental housing and low-to moderately
 priced homes for ownership. In addition, there is a significant need for more permanent
 supportive housing, shelters, and tiny homes.

1,034

79

80 The findings also show that approximately 25,500 households in unincorporated King 81 County are cost burdened. When a household spends more than 30 percent of its 82 income on housing, they are considered cost burdened. Severe cost burden means 83 more than 50 percent of a household's income goes toward housing costs. In 84 unincorporated King County, Black, Indigenous, and other People of Color households are more likely to be cost burdened and severely cost burdened than White 85 86 households. Senior renters with lower incomes and LGBTQIA+ households are disproportionately cost burdened. Renter-occupied households are almost twice as 87 likely to be cost burdened than owner-occupied households. Black, Indigenous, and 88 other People of Color and Latin(a)(o)(x) households, as well as many immigrant and 89 90 refugee households, are disproportionately represented both among households 91 earning less than 80 percent of area median income as well as among cost burdened 92 households, in part due to the legacy of structural racism and discrimination in housing 93 and land use policies and practices. Households earning at or below 30 percent are 94 disproportionately impacted by housing cost burden than higher income households.

96 Housing disparities by race, ethnicity, income, disability status, and age also exist in 97 homeownership. For example, in unincorporated King County, 88 percent of White 98 households, compared to 43 percent of Black and 49 percent of Hispanic or 99 Latin(a)(o)(x) households, own their own home. 100

- 101 The policies in the housing section seek to reduce disparities in housing by ensuring 102 there is adequate capacity for housing; addressing affordable housing funding, 103 preservation, and assistance programs administered by King County; utilizing the 104 County's regulatory role to help ensure that there is adequate safe and healthy housing 105 in the unincorporated areas; and strengthening housing partnerships and regional 106 collaboration to meet the housing needs of all county residents at all income levels.
- 108 ((H-125)) H-101 King County shall ((assure)) ensure that there is sufficient ((land)) 109 zoned capacity in the unincorporated urban area((s zoned)) to 110 accommodate King County's ((share of affordable)) housing need 111 allocations and provide a ((range)) variety of affordable, sustainable 112 housing types, including higher-density single((-family homes)) 113 detached residences, ((multifamily properties)) middle housing, 114 manufactured ((housing)) home communities, ((cottage housing,)) 115 accessory dwelling units, and mixed-use developments. ((King County 116 should work with cities to increase opportunities for affordable housing 117 development by assuring there is sufficient land capable of being 118 developed for this range of housing types that are more likely to be 119 affordable to low-, moderate- and middle-income households.)) 120

107

129

130

131

132

133

134

135

- 121 H-102 King County shall ((work with jurisdictions, the private sector, state and 122 federal governments, other public funders of housing, other public 123 agencies such as the Housing Authorities, regional agencies such as the 124 Puget Sound Regional Council, intermediary housing organizations, 125 and the non-profit sector, to encourage)) <u>plan for</u> a wide range of 126 housing types and ((to)) reduce barriers to the preservation, 127 improvement, and development ((and preservation)) of ((a wide range 128 of)) affordable housing, at an appropriate size and scale, that:
 - Provides housing choices ((for)) affordable to people of all income a. levels, particularly in areas with existing or planned high capacity and frequent ((public transportation access where it is safe and convenient to walk, bicycle, and take public transportation to work and other key destinations such as educational facilities, shopping and health care)) transit service;
 - b. Provides housing choices and supportive services to households at or below 30 percent of area median income;
- 137 c. 169		violence)).

170 ((1. Regional Convener))

171 <u>B. Housing Partnerships and Regional</u> 172 Collaboration

173

174 Just as housing needs rarely recognize jurisdictional boundaries, housing issues will not 175 likely be solved by King County alone. For these reasons, it is important that King 176 County's housing policies support a regional approach and collaboration among 177 agencies to meet housing goals. In addition, nonprofits or housing authorities often 178 provide the most affordable housing, while private sector developers create most 179 housing units. Without collaboration, King County, the cities in King County, and the 180 region will likely fail to meet housing goals and needs. All the partners mentioned in this chapter are vital in helping King County achieve its housing goals. 181

182

183 King County has a role to play in promoting ((cooperation)) regional collaboration and 184 public((//)-private partnerships to address the full range of ((critical)) housing needs in 185 King County and the Puget Sound region. In 2017, King County convened the Regional Affordable Housing Task Force ((in July 2017. The task force met for 18 months)) to 186 187 understand the affordable housing challenges and to meet people most affected by the lack of affordable units in the county. The ((t))Task ((f))Force's ((work culminated in-a)) 188 189 2018 Final Report and Recommendations, which included a Five-Year Action Plan, ((and 190 Final Report, which was)) were adopted as ((the policy of the)) County policy by ((in)) 191 Motion 15372. The overarching goal of the Five-Year Action Plan is to "strive to 192 eliminate cost burden for households earning 80 percent Area Median Income and 193 below, with a priority for serving households at or below 50 percent Area Median Income." ((The Action Plan contains seven goals to accomplish the overall goal: 194

- 195 1. Create and support an ongoing structure for regional collaboration;
- 196 2. Increase construction and preservation of affordable homes for households earning
 197 less than 50 percent area median income;
- 198 3. Prioritize affordability accessible within a half-mile walkshed of existing and planned
 199 frequent transit service, with a particular priority for high-capacity transit stations;
- 4. Preserve access to affordable homes for renters by supporting tenant protections to
 increase housing stability and reduce risk of homelessness;
- 202 5. Protect existing communities of color and low-income communities from
 203 displacement in gentrifying communities;

- 204 6. Promote greater housing growth and diversity to achieve a variety of housing types
 205 at a range of affordability and improve jobs/housing connections throughout King
 206 County; and
- 207 7. Better engage local communities and other partners in addressing the urgent need
 208 for and benefits of affordable housing.
- The King County Department of Community and Human Services is managing the
 County's role in implementing the Five-Year Action Plan, in collaboration with other
 internal parties such as the Metro Transit Department, the Facilities Management
 Division, the Department of Natural Resources and Parks, and the Department of Local
 Services.))
- 215

216 In 2019, ((Ŧ))the King County Growth Management Planning Council created ((a new)) 217 the Affordable Housing Committee ((to serve)) as a regional advisory body to ((with the 218 goal of recommending)) recommend actions and ((assessing)) assess progress toward 219 ((implementation of)) the Five-Year Action Plan. The Affordable Housing Committee, comprised of representatives of King County, the City of Seattle, the Sound Cities 220 221 Association, housing authorities, and others with expertise in affordable housing, 222 including preventing displacement, functions as a point of coordination and accountability for affordable housing efforts across King County. ((The Committee is 223 comprised of representatives of King County, the City of Seattle, Sound Cities 224 225 Association, housing authorities, and others with expertise in affordable housing, 226 including preventing displacement.)) King County provides staff support, data, and 227 policy analysis, and other resources for the Committee.

228

229 The 2021 Countywide Planning Policy update assigned additional responsibilities to the 230 Affordable Housing Committee, including reviewing all jurisdictions' draft periodic 231 comprehensive plan updates for alignment with the King County Countywide Planning Policies Housing Chapter goals and policies prior to plan adoption; providing a hub to 232 share best practices for increasing affordable housing supply; and monitor progress 233 towards planning for and accommodating housing needs, and making 234 235 recommendations to the Growth Management Planning Council on potential actions a 236 jurisdiction could take to address shortfalls in meeting housing needs. King County will 237 lead the data collection and reporting process with cities.

238

239 The Countywide Planning Policies also require regional collaboration in meeting 240 countywide housing growth targets and affordable housing needs and developing 241 programs to provide affordable housing. The following policies require King County to 242 collaborate with multiple partners, including cities, regional and subregional 243 organizations such as the Puget Sound Regional Council and Growth Management 244 Planning Council, interlocal groups such as ARCH (A Regional Coalition for Housing) 245 and SKHHP (South King Housing and Homelessness Partners), nonprofit organizations, 246 private sector developers, community-based organizations, and community members. 247

248 The Committee ((is responsible for recommending amendments to)) aided in the 249 development of the 2021 Countywide Planning Policies, including recommending 250 amendments to regional goals, metrics, and land use policies. ((The Committee 251 functions as a point of coordination and accountability for affordable housing efforts 252 The 2021 Countywide Planning Policy update assigned across King County.)) 253 additional responsibilities to the Affordable Housing Committee, including review of all 254 King County jurisdictions' draft periodic comprehensive plan updates for alignment with the King County Countywide Planning Policies Housing Chapter goals and policies prior 255 256 to plan adoption; provide a hub to share best practices for increasing affordable 257 housing supply; monitor progress towards planning for and accommodating housing 258 needs; and make recommendations to the Growth Management Planning Council on 259 potential actions a jurisdiction could take to address shortfalls in meeting housing 260 needs. King County will lead the data collection and reporting process with cities.

261 262 ((H-110)) H-103 King County shall work with regional bodies, including the Puget 263 Sound Regional Council and the Growth Management Planning 264 Council, or their successors, and the private and non((-))profit sectors to 265 support development of an adequate supply of housing commensurate 266 with job growth within the county ((and its cities)). To attain this goal, 267 King County shall work with such regional partners to: 268 a. Support job and household growth targets, housing needs for 269 people of all incomes, and policies established in the Countywide 270 Planning Policies; and 271 b. ((Establish performance measures to gauge how jurisdictions are 272 accommodating growth and housing needs; 273 c. Participate in buildable lands inventories, market analyses and 274 other studies to evaluate if sufficient land capacity is available for 275 residential development; and 276 d.)) Work with cities to ensure additional actions are taken throughout 277 the county to accommodate and promote residential development 278 when job growth causes great demand for housing and severe 279 shortages in the availability of housing for new workers in the 280 county. 281 282 <u>H-104</u> King County shall collaborate with the Puget Sound Regional Council 283 and subregional organizations to advance equitable development and 284 the implementation and monitoring of countywide affordable housing 285 goals, policies, and programs. 286 287 <u>H-105</u> King County shall participate in regional efforts to: 288 a. Conduct a housing-focused review of and provide comments on a 289 jurisdiction's draft periodic comprehensive plan update for 290 alignment with the King County Countywide Planning Policies 291 Housing Chapter goals; and 292 Report and monitor progress towards meeting countywide and b. 293 jurisdictional housing growth targets and housing needs and 294 eliminating disparities in access to housing and neighborhood 295 <u>choice</u>. 296 297 H-106 King County shall provide through the Growth Management Planning 298 Council, or designee, the necessary, ongoing information to 299 jurisdictions on their progress toward planning for and accommodating 300 their housing needs using public-facing tools. 301 302 King County shall initiate and actively participate in regional solutions ((H-101 303 to address critical affordable housing needs in unincorporated King 304 **County and throughout the region.**)) 305 306 H-107 King County shall equitably engage ((Jurisdictions)) cities, community 307 members, community-based organizations, the private sector, people 308 with lived experience of housing instability, and housing representatives ((should be invited)) to identify and implement 309 310 solutions to further housing stability, access, and choice, and 311 affordability goals established in the Countywide Planning Policies. 312 313 <u>H-108</u> King County shall engage historically underrepresented populations in 314 the implementation and monitoring of countywide affordable housing 315 goals, policies, and programs. 316 317 ((H-101a King County should participate in regional efforts related to tenant 318 protections throughout the region. 319

320	H-103	Through subarea and regional planning with jurisdictions and partners
321		in the Puget Sound region, mandatory and incentive programs and
322		funding initiatives for affordable housing, King County shall serve as a
323		regional convener and local administrator in the unincorporated areas
324		to plan for housing to meet the needs of all economic segments of the
325		population. With respect to affordable housing, King County shall
326		address the countywide need for housing affordable to very-low, low
327		and moderate-income households pursuant to the countywide targets
328		established in the most recently adopted Countywide Planning
329		Policies.))

330 ((D. Regional Affordable Housing Funding, 331 Resources and Programs))

332 C. Funding for Affordable Housing

333 ((The King County Consortium is a partnership that represents unincorporated areas and most cities outside of Seattle in obtaining, administering and distributing federal, 334 state and local funds to address housing, homelessness and community development 335 336 needs. The King County Consortium prepares a five-year strategic plan, the 337 Consolidated Housing and Community Development Plan, that outlines the needs, 338 resources available and housing and community development goals to be achieved. An Annual Action Plan details specific planned affordable housing and community 339 340 development project projects.

341

342 Over the past ten years, King County has faced considerable funding challenges for 343 developing affordable housing because of cutbacks in levels of state and federal 344 housing funds along with local budget issues that have impacted housing and 345 community/economic development funds.)) Housing provided by private development 346 accounts for most new units in the county. However, the private market alone cannot 347 provide affordable housing for all residents. As reported in the Housing Needs 348 Assessment (Appendix B), nearly one-third of households in King County (31.5 percent) 349 and unincorporated King County (28.5 percent) are cost burdened, and Black, 350 Indigenous, and other People of Color households are disproportionately cost burdened. More deeply affordable units are needed in King County to reduce racially 351 352 disparate housing outcomes and meet King County's housing goals. 353

354 As of 2023, the development and preservation of affordable housing has become increasingly and prohibitively expensive. In 2023 dollars, the cost of an affordable unit 355 is estimated to be \$475,404 per unit. The Housing Funding Gap Analysis section of the 356 357 Housing Needs Assessment identifies a funding gap of approximately \$450 million to 358 meet the housing needs of unincorporated King County households at or below 80 359 percent of area median income through 2044. The Countywide Planning Policies call for 360 prioritizing housing affordable to households with less than or equal to 30 percent of 361 area median income. Addressing the needs of the lowest-income households will cause 362 a chain reaction, freeing up more moderately priced housing units that are more affordable for households at higher income thresholds. 363

364

365 Meeting the County's housing needs and goals will require significant incentives, 366 subsidies, and funding, as the private market cannot produce enough affordable 367 housing without public intervention. King County will continue to pursue new funding 368 sources to fund affordable housing development and operations. The policies in this 369 section call for identifying existing and developing new funding sources, as well as 370 establishing funding priorities. 371 372 ((King County has been pro-active in working with local and national partners to seek out and advocate for new funding sources on the local and state levels, and to 373 374 re-establish or expand federal funding levels. Despite the decreases in some state and 375 federal resources, King County and its partners have been successful in securing new 376 housing resources, and continue to be able to fund the development and preservation 377 of affordable housing. As a result, residents of King County continue to have affordable 378 housing choices and housing stability programs. Local housing funds have also 379 leveraged significant private and non-profit investment as well as other public funding 380 resources. 381 382 H-152)) H-109 ((King County shall give priority in its affordable housing subsidy 383 programs to projects that serve individuals and households at or below 384 80% of area median income, and/or that provide older adults, people 385 with behavioral health, cognitive, physical or developmental 386 disabilities, people who are experiencing homelessness and people who are at risk of homelessness and/or displacement.)) King County 387 388 shall prioritize funding in its affordable housing programs and projects 389 that: 390 a. Provide low-barrier housing designed to meet the needs of people 391 experiencing or at risk of homelessness; 392 Provide accessible housing to persons with behavioral health, b. 393 cognitive, physical, or developmental disabilities; 394 c. Provide permanent supportive housing for households at or below 395 30 percent of area median income; 396 d. Create homeownership opportunities for households at or below 397 80 percent of area median income to build generational wealth and 398 promote housing stability; 399 e. Create rental housing for households at or below 30 percent of area 400 median income and for households at or below 80 percent of area 401 median income to meet a range of housing needs; 402 Are located near high-capacity or frequent transit to increase f. 403 residents' access to job opportunities and services; 404 g. Are in areas with communities at risk of displacement; 405 h. Reflect an equitable distribution of funding; 406 Are community-driven projects; or <u>i.</u> 407 Reduce the time and cost of achieving the County's affordable j. 408 housing goals, which may include leveraging additional public and 409 private loans. 410 411 ((H-148)) H-110 King County shall work with community members, cities, the 412 private sector, and ((community representatives)) service providers to 413 establish new, countywide funding sources for affordable housing 414 development, acquisition, rehabilitation, preservation, and ((related 415 services)) operating costs,((such that cities and King County contribute 416 on an equitable basis)) focused on households at or below 30 percent of 417 area median income. 418 419 ((H-149)) H-111 King County shall work with other jurisdictions, housing 420 developers, and service providers throughout the state to urge federal 421 and state governments to expand both capital and operating funding 422 for ((low-income)) housing at or below 120 percent of area median 423 income, including ((low-income housing for older adults, people who 424 are experiencing homelessness and people with behavioral health, 425 cognitive, physical and developmental disabilities)) for persons with 426 special housing needs. 427 428 ((H-150 King County should encourage and support efforts by non-profit 429 housing developers, housing agencies, and service providers to

420	
430	develop long-term nongovernmental funding sources, such as planned
431	giving, endowments, and related economic development ventures.
432	
433	H-151 King County shall seek opportunities to fund programs and projects
434	where county funds are matched by additional public and private loans
435	and investments, and/or contributions in order to increase the amount
436	of financing available for affordable housing.
437	5
438	H-153 King County shall encourage the inclusion of smoke-free housing
439	policies in projects funded through its affordable housing subsidy
440	programs, in a manner that limits the creation of new barriers to
441	housing.
442	neusing.
443	H-154 King County shall work with partners and stakeholders to encourage
444	improvement in healthy housing elements in existing affordable
444	housing sustainability standards, with emphasis on healthy housing
446	elements that reduce problems such as asthma, falls, gun-related injury
447	and violence, and unintentional poisoning.
448	
449	H-155 King County shall give particular consideration in its affordable housing
450	and community development investments to projects that provide
451	housing and community development solutions in the areas of the
452	county with the most disparate outcomes in health, economic
453	prosperity and housing conditions, and where residents may be at high
454	risk of displacement. King County shall work to coordinate planning
455	and community development investments to support such communities
456	as they experience changes in their demographics, built environment,
457	and real estate markets.
458	
459	H-156 King County shall give particular consideration in its affordable housing
460	subsidy programs to projects in areas where there is a severe shortage
461	of affordable housing, and where there is access to job opportunities, a
462	healthy community and active transportation.
463	
464	H-157)) <u>H-112</u> King County ((should expand its)) <u>shall prioritize the</u> use of surplus
465	((c)) <u>C</u> ounty-owned property ((and air rights over county owned
466	property)) for affordable housing <u>for households at or below 80</u>
467	percent area median income, especially in the urban growth area
468	where it could aid a jurisdiction in meeting its housing targets, and for
468 469	crisis care centers and community development((and its possible use
-	
470	for other public benefits, such as human services; and) should consider
471	conveyance of properties to public or non-profit housing developers
472	and agencies at below-market cost for the purpose of building or
473	providing affordable housing. Surplus county property shall be
474	prioritized for housing development that will be consistent with King
475	County adopted plans. This policy shall be carried out consistent with
476	King County Charter Section 230.10.10 and other applicable laws,
477	regulations and contract restrictions, such as grant funding
478	requirements)).
479	
480	((H-109)) H-113 King County should develop new partnerships with public and private
480 481	lending institutions to find solutions that reduce ((housing financing))
481 482	
	<u>homeownership</u> costs for ((both builders and consumers)) <u>residents</u> .
483	LI 114 King County should not an article most and with the second
484	H-114 King County should pursue creative methods within existing programs,
485	funding sources, and state enabling legislation for property tax relief to
486	provide direct assistance to builders and leverage funds for the
487	construction of affordable housing.
488	

489		115 King County should support the efforts of non((-))profit developers
490		((and)), housing agencies <u>, and community-based organizations (</u> (t o
491		increase the supply of housing for low-income households,)) through
492		((<mark>affordable housing planning, policy and advocacy activities and the</mark>

520		<u>outreach</u> .
521		
522		<u>117 King County shall administer standards for publicly ((subsidized))</u>
523		<u>funded</u> housing that ((will)):
524		a. Increase <u>s</u> the ability of ((people)) <u>persons</u> with physical disabilities
525		to have physical access to housing and mobility within housing
526		regardless of their residency status;
527		b. Allows household members to age in place through the inclusion of
528		universal design principles that make housing units more
529		accessible and usable by all persons;
530		c. Support <u>s</u> the ability of ((older adults and people with behavioral
531		health, physical, cognitive and developmental disabilities)) persons
532		with special housing needs to find housing opportunities that allow
533		them to live as independently as possible in the housing and
534		community of their choice; and
535		d. Increase <u>s</u> the ability of people to have access to smoke-free
536		housing, while not creating barriers to housing.
537		
538		King County should use opportunity mapping:
539	:	a. To support the siting of community facilities and assisted publicly
540		subsidized affordable housing in locations where low- and
541		moderate-income residents and persons with behavioral health,
542		physical, cognitive and developmental disabilities have convenient
543		access to transportation; employment opportunities; amenities,
544		such as parks, trails, libraries and other public facilities; and
545		services, such as grocery stores; and
546	-	b. To promote fair housing and diverse communities that are inclusive
547		of residents with a range of abilities, ages, races, incomes and
548		other diverse characteristics of the population of King County.))

549 <u>D. Housing Supply and Housing for those with</u> 550 <u>the Greatest Needs</u>

551

To meet the County's goal of an equitable future for all, more housing of different types and price levels is needed in locations with access to jobs, transit, and services. The policies in this section encourage more multiunit and mixed-income housing choices near transit, developing middle housing to provide greater housing choice and increased affordability, and reducing the costs to build housing.

((As the Countywide Planning Policies note, residents in King County are facing an unmet need for housing that is affordable to households earning less than 80 percent of area median income. Recent data indicate that 295,000 households in King County spend more than 30 percent of their income on housing.[†] The lack of affordable housing is felt in every community in the county. A regional problem requires a regional approach. As such, King County and the jurisdictions within the county have a shared responsibility to increase the supply of housing affordable to these households.

566 Based on the identified need for affordable housing for households who are spending 567 more than 30 percent of their income on housing, Countywide Planning Policy H-1 has 568 established estimates of the countywide need for housing affordable to households with moderate, low and very low incomes The Countywide Planning Policies require King 569 570 County and the jurisdictions located within King County to identify barriers to housing affordability and implement strategies to overcome them. The Countywide Planning 571 572 Policies also require regional collaboration in meeting countywide housing growth 573 targets and affordable housing needs, as well as in developing resources and programs 574 to provide affordable housing.)) 575

- 576H-118King County should encourage a mix of housing types, sizes, tenure, and577affordability levels to meet the needs of people who work in and desire to578live in King County, especially near countywide and local centers.579
- 580H-119King County should encourage the development of housing suitable for581families with children, larger households, and multigenerational living that582is affordable for households with a broad range of incomes.583
- ((H-114)) H-120 King County should ((encourage development of residential communities that achieve lower prices and rents through)) pursue strategies and regulations that increase affordable housing and sustainable housing. These developments should utilize smaller-scale units ((clustered)) and higher density housing that shares common spaces, open spaces, and community facilities to increase the housing supply affordable to all incomes.

^{((&}lt;sup>+</sup>Briefing 2015-B0143, based on data from 2015-2019 Consolidated Housing and Community Development Plan (Ordinance 18070)))

592 ((H-136)) H-121 King County should provide opportunities within unincorporated 593 urban ((growth)) areas and in Rural Towns with sewer service for the 594 development, rehabilitation, and preservation of rental residential 595 buildings with ((that have)) shared facilities ((, such as single-room 596 occupancy buildings, boarding homes, micro-units buildings and 597 clustered micro homes to provide opportunities for lower rent housing 598 options and higher density ownership options including 599 condominiums, co-operative mutual housing, cottage housing)) and 600 ((other forms of clustered)) higher density ownership housing.

601

606

- 602H-122King County should support the efforts of nonprofit developers, housing603agencies, and community-based organizations to preserve or develop the604supply of housing for households at or below 30 percent of area median605income.
- 607H-123King County shall prioritize community-driven development of608permanently affordable homeownership and rental projects led by609community-based organizations and community land trusts to increase610supply and improve housing stability.611
- 612H-124King County should work with the state and other partners to remove613barriers to providing farmworker housing and explore innovative614approaches to meeting farmworker housing needs.615
- 616((H-111)) H-125 King County should work with local employers to promote the
development of affordable ((employer-assisted)) workforce housing
opportunities located ((within commuting distance of)) near ((the))
employment sites.618opportunities located ((within commuting distance of)) near ((the))
employment sites.
- 621H-126King County should encourage the development and preservation of622affordable family-sized and family-friendly housing to increase the supply623of housing suitable and affordable for families with children, recognizing624that family housing requires greater subsidies due to larger household625size, the need for play areas for children, and separation of parking and626access roads from play areas.
- 627 <u>1. Expand Housing Options and Increased Affordability Near</u> 628 Transit
- 629 ((B. Strengthen Housing Linkages with
 630 Transportation

631 In accordance with the Countywide Planning Policies, VISION 2040 and federal priorities, King County intends to)) The policies in this subsection strengthen the linkage 632 of affordable housing to jobs and public transportation through transit-oriented 633 634 development and the preservation and development of affordable housing near transit 635 stations and along transit corridors ((, even though few of these exist in unincorporated 636 areas)). Strengthening linkages between housing and public transportation is beneficial 637 to the community, economy, and environment. As housing density increases to meet 638 the needs of the current and growing population, supportive infrastructure and services, 639 such as public transit, needs to be utilized and adapted. The Metro Strategic Plan for 640 Public Transportation 2021-2031 directs King County to strengthen this connection and 641 support equitable transit-oriented communities. As the population of the Puget Sound region grows, King County is expected to remain the major employment center of the 642 643 region. As job growth occurs, the workers for these jobs must be accommodated with adequate opportunities for housing and access to public transportation options. 644 645

((The w	orkforce of King County includes households earning a wide variety of incomes,
from in	ndividuals earning minimum wage at a less than full-time job to dual- or
triple-ir	ncome households earning well above the County's median income. If a balance
of job d	growth, improved public transportation, and affordable housing availability is not
	d, workers at the lower end of the income scale face particular pressures when
	to live longer distances away from their jobs. This increases pressures on
	internation systems, contributes to higher energy use and greenhouse gas
	, , , , , , , , , , , , , , , , , , , ,
	ms, and reduces the time workers have for family, recreation, volunteer work, or
continu	ing education.
H-121)) <u>H-127</u> King County shall support affordable and mixed-income housing
	development in transit-oriented locations that is compatible with
	surrounding uses by:
	a. Providing information and a process for accessing potential
	development sites in transit-oriented locations where King County
	has ownership or access to potential sites; <u>and</u>
	<mark>b. Promoting land use patterns that ((cohesively)) connect</mark>
	((affordable and mixed-income)) housing with active transportation
	choices((; and
	c. Developing public financing techniques that will provide an
	advantage for projects that will create and/or preserve affordable
	and mixed-income housing within transit-oriented communities
	and neighborhoods that promote health, well-being and
	opportunity, and or within a neighborhood plan for revitalization)).
((H-122	!)) <u>H-128</u> King County shall support transit-oriented development ((at)) <u>near</u>
	high-capacity or frequent transit ((supportive density and scale)) that
	preserves and expands affordable, sustainable, and mixed-income
	housing opportunities ((at locations near frequent and high-capacity
	transit service. King County shall engage in this work through a variety
	of strategies, including)) by:
	a. Enabling development of affordable housing on suitable Metro-
	owned property;
	b. Using Metro's authority and influence as a transit provider; and
	((the engagement of))
	<u>c. Engaging with funding partners, transit partners, jurisdictions,</u>
	private for-profit and non((-))profit development entities, <u>communities</u>
	<u>at risk of displacement</u> , and other transit-oriented development
	partners.
((H-123	King County will evaluate and seek opportunities for equitable transit-
((11-123	oriented development at major transit centers and hubs when
	investments are likely to produce increased ridership, community
	benefits and affordable housing opportunities.
	penents and anordable nousing opportunities.
11.40.43	
H-124)) <u>H-129</u> King County shall work with partners to ((reduce)) <u>mitigate</u> and
	prevent displacement of ((very-low to moderate-income)) households
	earning up to 120 percent of area median income, including from
	transit oriented-locations, ((to the extent possible;)) and shall strive to
	align affordable housing investments and transit investments ((in
	order)) to increase the quality of life of <u>historically</u> ((disinvested))
	<u>underinvested</u> communities ((as measured by the Determinants of
	Equity)).
2. Ho	ousing Tools and Processes

700

With the projected population growth and increased number of family and senior
 households with limited income, combined with the short supply of affordable housing

available today, new development must include affordable housing and a variety of
 housing types to meet the housing need and reduce racial disparities in housing
 outcomes.

706

717

726

727

728

729

730

747

707 Meeting King County's housing needs means adopting appropriate land use regulations to require and incentivize the development, rehabilitation, and preservation 708 709 of a variety of affordable housing, such as higher-density single detached homes, 710 duplexes, triplexes, fourplexes, townhouses, apartments, manufactured housing, 711 cottage housing, accessory dwelling units, and mixed-use developments. In addition, a clear and consistently applied set of land use tools and processes will increase King 712 713 County's housing supply. Shorter and more consistent permit processing can save 714 applicants time and money, which means housing projects can be completed sooner 715 and at less cost. Streamlined processes can also improve community involvement because it is easier to understand a project's review process. 716

- ((H-129)) H-130 King County shall continue to improve development standards, planning tools, and policies to allow higher densities and flexibility of housing types in all <u>urban</u> residential zones ((, in order)) to increase housing supply, types, tenure, choice, access, and stability in a manner that also enriches the area's urban form and character ((best accommodate the environmental conditions on the site and the surrounding neighborhood when planning housing developments)).
 - ((H-130 King County shall explore zoning policies and provisions that increase housing density and affordable housing opportunities within unincorporated urban growth areas near transit and near commercial areas.
- H-126)) H-131 King County shall provide opportunities for attached and detached
 accessory dwelling units and middle housing in urban residential areas
 ((and shall encourage all jurisdictions within King County to adopt
 provisions to allow accessory dwelling units in their communities)) and
 Rural Towns to increase housing supply affordable to all incomes.
- 737 ((H-133)) H-132 King County shall ((encourage)) incentivize the development of 738 new housing models that are healthy and affordable by providing 739 opportunities ((for new models)) within unincorporated urban 740 ((growth)) areas and Rural Towns and near commercial areas. King 741 County shall ((work to)) allow innovative housing projects to move 742 forward, including affordable housing demonstration projects, 743 community-driven development projects, affordable owner-built 744 housing, land trusts and cooperative ownership structures for rental 745 and ownership housing, co-housing, and other innovative 746 developments.
- ((H-127)) H-133 King County shall adopt appropriate land use regulations to require and ((encourage)) incentivize development, rehabilitation, and preservation of <u>sustainable housing affordable to</u> ((very-low to moderate-income housing)) households earning up to 120 percent of area median income.
- ((H-128 King County should pursue land use policies and regulations that result in lower development costs without loss of adequate public review, environmental quality or public safety and do not reduce design quality, inhibit infrastructure financing strategies, or increase maintenance costs for public facilities.

- H-144)) H-134 King County ((will)) shall ensure that mandatory and((/or))
 incentivized affordable housing units created through its land use
 policies and regulations are high quality, safe, and integrated on-site
 with market rate housing.
- 765 ((H-131)) H-135 King County shall seek to minimize the time necessary to process 766 ((development)) permits for developments ((in unincorporated King County)) that will include affordable housing ((and address 767 768 environmental goals and community and aesthetic concerns)). King County ((should continue to)) shall expedite plan and permitting 769 reviews for affordable housing projects in coordination with 770 771 mandatory, incentive, or subsidy programs, including tax abatements, 772 exemptions, and credits.
 - ((H-135)) H-136 King County shall, to the maximum extent allowed by law, exempt payment of impact fees in unincorporated areas for developments that will include affordable rental or ownership housing.
- ((H-107)) H-137 King County ((should)) shall encourage regional land use and investment strategies to stimulate ((mixed-use and)) mixed-income developments ((as a way)) to economically integrate neighborhoods, ((and)) increase housing and transportation choices throughout King County, and improve housing stability for people of all incomes.
- 784H-138King County shall support integrated multi-generational communities785through increased housing options, incentives, and zoning flexibility.
- 787H-139King County shall encourage the development of single detached788residences through the splitting of a single residential lot into two789residential lots.790790

H-140 King County shall continue to seek opportunities to fund anti-displacement tools and programs.

794 <u>E. Expanded Housing and Neighborhood Choice</u> 795 <u>for All Residents</u>

796 ((3. Fair Housing Access

797 An important element of this Comprehensive Plan is to address equal access to housing 798 and freedom from discrimination in housing for all residents of King County. A number 799 of the policies in this Plan address fair housing through support and encouragement of both the successful integration of housing for low to moderate-income households into 800 801 all communities and, in particular, into healthy communities with access to jobs, 802 transportation, good schools and economic opportunities; and the successful 803 improvement of community conditions for those communities that are currently low on 804 the opportunity scale.

805

764

773 774

775

776

777

783

786

791

792

793

806 Opportunity is a situation or condition that places individuals in a position to be more 807 likely to excel or succeed. Opportunity mapping assesses the conditions present in 808 neighborhoods across a region, by looking at indicators of opportunity in education, 809 economy, transportation, housing, environment, and health, and ranks communities on 810 a scale from low to high opportunity. High opportunity areas have the best conditions for the success of the residents living there. Opportunity mapping can also be useful in 811 812 helping to identify transition areas where existing residents may be at risk for displacement. Analysis of opportunity mapping can provide valuable information about 813

814 where more affordable housing needs to be located, and what needs to be remedied in 815 areas that have very limited opportunities.

816

817 Local, state and federal fair housing laws, including the King County Fair Housing 818 Ordinance, have set the stage for policies in this Plan that favor community-based, 819 integrated housing and independent living, rather than institutional settings, for older 820 adults and persons with behavioral, cognitive, physical and developmental disabilities. 821 Service-enriched housing is also best integrated into community-based settings in 822 apartments or single-family homes rehabilitated to meet the needs of the residents.))

- 823
- 824

836

Equitable access to housing plays a critical role in promoting social justice and reducing 825 racial disparities in King County. King County supports policies that promote equitable access to housing for all and repair racially disparate housing outcomes. This includes 826 827 policies that address housing discrimination, protect renters, promote homeownership, 828 expand access to affordable housing, and encourage equitable development. King 829 County partners with community organizations and other partners to work towards 830 meeting the needs of Black, Indigenous, and other People of Color communities; and 831 those with special housing needs; veterans, military servicemembers, and their 832 respective families; persons experiencing homelessness; people with disabilities; 833 immigrants; refugees; LGBTQIA+ persons; families with children; and survivors of 834 domestic violence, gender-based violence, human trafficking, and commercial 835 exploitation.

837 The Racially Disparate Impact Analysis section of the Housing Needs Assessment details 838 the local history of racially exclusive and discriminatory land use and housing in 839 unincorporated King County. Historically, private property owners, lending institutions, 840 and federal, state, and local governments implemented strategies to restrict access to 841 housing, land, and neighborhoods to people based on their race, nation of origin, and 842 sometimes religion. These strategies perpetuated racial segregation and wealth 843 inequities throughout the country and in King County. Some of these policies and practices known to have been enforced or practiced in unincorporated King County 844 845 include Indigenous land dispossession, the Alien Land Law, Japanese internment and 846 incarceration, racially restrictive covenants, and discriminatory lending practices that led 847 to disproportionate access to homeownership (redlining). While some explicitly 848 discriminatory laws have been overturned, their legacy and effects have remained, 849 preventing Black, Indigenous, and other People of Color communities from sharing the 850 recent prosperity of King County and the Puget Sound region. The policies in this 851 section seek to identify and remediate inequitable policies, processes, or regulations 852 and remove barriers to equity and inclusion for these communities.

853 1. Equitable Housing Access

854 ((H-118)) H-141 King County shall actively promote and affirmatively further fair 855 housing in unincorporated King County through its housing programs, 856 and shall ((work with all of)) <u>participate in efforts with</u> its partners to 857 further fair housing, ((in its regional role promoting housing 858 affordability,)) housing and neighborhood choice, and provide access 859 to opportunity for ((all)) communities((, especially those communities)) 860 that bear the burdens ((from lack of investment and access to 861 opportunity; and shall work with residents and stakeholders to help 862 them understand the rights protected by federal, state, and local fair 863 housing laws and shall help to promote equitable housing practices for 864 protected classes through fair housing education and enforcement)) of 865 systemic underinvestment and lack of access and opportunity. 866

867 ((H-146)) H-142 King County shall prohibit restrictive covenants or other land use,
 868 permitting, or property conditions that limit the ability of persons from
 869 protected classes (as defined in the King County Fair Housing
 870 Ordinance in King County Code Chapter 12.20) to live in residences of
 871 their choice.

872

879

- ((H-119)) H-143 King County shall flexibly apply its zoning, rules, policies, practices, and services in its funding, incentive, or mandatory affordable housing programs((, when necessary)) to afford persons with disabilities equal opportunity to use or enjoy a dwelling or to create new affordable housing opportunities for persons with disabilities.
- 880 ((H-120)) H-144 King County should work with housing industry representatives to 881 identify and remove barriers (such as real estate marketing, finance, or 882 insurance practices) that restrict housing choices and opportunities for 883 ((: low- and moderate-income people older adults, people who are 884 experiencing homelessness and people with behavioral, physical, 885 cognitive and developmental disabilities)) households at or below 50 886 percent of area median income and persons with special housing 887 needs. 888
- ((H-147)) H-145 King County shall permit group living situations, including those
 where residents receive ((such)) supportive services, such as counseling,
 foster care, or medical supervision, within a single((-family house))
 detached residence, houseplex, or apartment.
- 894 ((H-108)) H-146 King County shall ((work with other jurisdictions to)) encourage the
 895 use of universal design in the development of affordable housing((, familysized housing)) and market-rate housing to create units that are accessible
 897 to people aged 62 years and older.
- 898 <u>2. Repairing Harm and Promoting Equitable Outcomes in</u>
 899 <u>Communities Most Impacted by Racially Exclusive Land Use</u>
 900 <u>and Housing Practices</u>
- 901 <u>H-147</u> King County shall take intentional actions that repair harms to Black, 902 Indigenous, and other People of Color households from past and 903 current racially exclusive and discriminatory land use and housing 904 practices that result in racially disparate outcomes, such as 905 development patterns, disparate homeownership rates, affordable 906 housing divestment in lower-income communities, and infrastructure 907 availability, such as through: 908 a. Creating opportunities for development of middle housing; 909 b. Investing in rental assistance and eviction prevention programs; 910 c. Implementing a community preference program to prevent 911 displacement; 912 d. Investing in equitable development projects to support 913 community-driven priorities; 914 e. Preserving manufactured home communities and affordable 915 housing to prevent displacement; 916 f. Expanding homeownership programs to increase wealth building; 917 g. Supporting programs that mitigate and prevent displacement of 918 households at or below 120 percent of area median income; and 919 h. Supporting efforts by Washington State to fund down payment and 920 closing costs assistance.

921		
922	<u>H-148</u>	King County shall promote equitable outcomes in communities most
923		impacted by racially exclusive and discriminatory land use and housing
924		practices, such as in North Highline and Skyway-West Hill, by
925		supporting equitable access to resources, in partnership with impacted
926		communities, such as through surplus properties, affordable housing
927		financing, and capacity building for community-based organizations.
928		
929	<u>H-149</u>	King County shall support actions that increase and preserve access to
930		affordable rental and ownership housing in communities at risk of
931		displacement and advance housing stability for populations who
932		experience systemic racism or discrimination.
933		
934	((H-105a))	H-150 King County shall engage ((marginalized)) underrepresented
935	((populations ((in the)) <u>to advance community-driven</u> development((,
936		implementation, and evaluation of county-wide affordable housing
937		goals, policies and programs)).
938		
939	<u>H-151</u>	King County shall support development of new affordable housing
940		units that promote culturally relevant and multi-generational housing
941		options, through strategies such as prioritized funding, technical
942		assistance, and flexible development regulations.
943		
944	<u>H-152</u>	King County shall support equitable development projects and
945		investments in areas most directly impacted by structural racism and
946		discrimination, in communities at a higher risk of displacement, that
947		have low access to economic and health opportunities, or that are
948		home to significant populations of communities experiencing
949		disparities in life outcomes, through:
950		a. Advancing home ownership opportunities as a means to economic
951		mobility and opportunity for residents:
952		b. Preventing displacement;
953		c. Building upon and protecting local cultural assets that anchor
954		<u>communities;</u>
955 956		d. Supporting organizational capacity building:
950 957		e. Promoting transportation mobility and connectivity; and f. Enabling equitable access for all communities.
958		<u>i. Enabling equitable access for an communities.</u>
959 959	H-153	King County shall take actions to prevent and mitigate displacement by
960	<u>11-133</u>	supporting cultural institutions and community hubs and implementing
961		programs that help people with a connection to the local community
962		remain in or return to their community of choice.
963		
964	<u>H-154</u>	King County should implement anti-displacement measures prior to or
965		concurrent with development capacity increases or capital investment.
966		
967	<u>H-155</u>	King County shall support policies and programs that minimize risks of
968		displacement, such as:
969		a. Community preference and right to return policies;
970		b. Property tax exemption programs;
971		c. Priority hire programs;
972		d. Mandatory and voluntary inclusionary housing programs;
973		e. Tenant relocation assistance policies;
974		f. Down payment assistance programs;
975		g. Affordable rental housing policies;
976		h. Community land trusts;
977		i. Manufactured housing community preservation policies; and
978		j. Redevelopment assistance programs.
979		

980H-156King County shall raise awareness of existing Property Tax Exemption981programs offered by the Assessor's Office for eligible homeowners.

982 <u>F. Housing Stability</u>

983 ((E. Support the Housing Stability of Households in 984 King County))

985

986 The rising cost of housing threatens people's ability to remain in their communities. The 987 housing market has experienced great highs and lows that have benefitted some, 988 creating and exacerbating hardship and inequalities for others. There are substantial 989 disparities in housing access between White and Black, Indigenous, and other People of 990 Color households, underscoring the ongoing effects of systemic racism in housing. 991 Housing stability creates a foundational structure for individuals and families that , 992 contributes to every person's well-being and improvements to health, economic, and 993 educational outcomes for communities. VISION, the Countywide Planning Policies, and 994 the Regional Affordable Housing Task Force's Five Year Action Plan prioritize housing 995 stability strategies. 996

997 These policies in this section support housing stability through the preservation of
 998 existing affordable units, increasing access to homeownership, assisting those with
 999 special housing needs to remain in their homes, and supporting tenant protections and
 eviction prevention programs. King County raises local resources for housing stability
 programs from the Best Starts for Kids Levy, the Crisis Cares Centers Levy, and the
 Veterans, Seniors, and Human Services Levy.

1003 <u>1. Preservation of Existing Units</u>

1004 1005

1016

1017

1018

1019

1020

((H-103a King County will work collaboratively with jurisdictions and partners to identify and meet affordable housing needs, including eliminating

- 1006identify and meet affordable housing needs, including eliminating1007barriers to housing. This effort should take the form of a regional1008affordable housing plan that summarizes existing efforts and identifies1009the roles and strategies of the county, jurisdictions and partners to1010meet affordable housing needs.10111011
- 1012H-104)) H-157King County shall work with ((the multiple)) partners ((outlined in
this section to promote)) to support the preservation ((and expansion))1013of:
a. ((a))Affordable rental housing opportunities for households earning
 - <u>a. ((a))Affordable rental housing opportunities for households earning up to 80((%)) percent</u> of ((the King County)) area median income((;)); and
 - b. Affordable ownership housing opportunities for households earning up to 120 percent of area median income.
- H-158
 King County should prioritize ((P))preservation ((is a particularly acute need)) in communities at risk of displacement or areas that may experience redevelopment due to proximity to high((-))-capacity or frequent transit ((and/or an area experiencing changing market conditions)).

 1021
 frequent conditions)).
- 1027((H-105King County shall work with the multiple partners outlined in this
section to promote the preservation and expansion of affordable
ownership housing opportunities for households earning up to 120% of
the King County median income. Preservation is a particularly acute
need in areas that may experience redevelopment due to proximity to

high capacity transit and/or an area experiencing changing market conditions.

- H-161)) H-159 King County ((should develop and expand)) shall explore
 incentives and subsidy programs to preserve affordable housing
 threatened by market forces and expiring federal subsidies. Relocation
 assistance and replacement housing should be funded((, where
 feasible, to help low-income households)) when displacement is
 unavoidable.
- 1042 ((H-162)) H-160 King County should assist owners of rental properties serving
 1043 ((low- and moderate-income residents)) <u>households between 50 to 120</u>
 1044 percent of area median income to acquire affordable financing for
 1045 building health and safety improvements in exchange for long((-))term
 1046 agreements to maintain affordable rents.
- 1048((H-163)) H-161 King County should coordinate preservation of existing affordable1049housing with city and ((c))County historic preservation programs and1050incentives((,)) and should promote preservation and restoration of1051significant historic features in the rehabilitation of existing buildings1052and sites for housing.
- 1054((H-117)) H-162 King County shall support ((partnership efforts and the application1055of innovations in manufactured home production that may allow1056mobile home parks to adapt and improve the quality of housing stock1057and to increase the density of housing stock in order to preserve1058housing affordability while accommodating the region's growth1059needs)) the preservation, and improve the quality and livability, of1060manufactured home communities to prevent displacement.
- 1061 <u>2. Increase Access to Homeownership</u>

1032

1033

1034

1041

1047

1053

1071

1080

- 1062 ((H-173)) H-163 King County shall provide financial assistance for ((ownership)) 1063 housing rehabilitation to ((low-income)) home((-))owners <u>at or below</u> 1064 1065 80 percent of area median income, including owners of ((mobile/))manufactured homes residing in ((parks)) mobile home 1066 communities or on their own land through individual or cooperative 1067 1068 ownership. ((King County should also consider support for 1069 community-based repair programs, such as tool banks or painting 1070 programs.))
- 1072 ((H-174)) H-164 King County should work with local lenders and non((-))profit 1073 organizations providing home((-))ownership assistance to expand 1074 assistance for eligible income-qualified homebuyers, including 1075 homebuyer education and counseling, mortgage default and 1076 foreclosure counseling, culturally relevant low cost financing and 1077 assistance with down payments and closing costs, and alternative 1078 ownership housing models such as land trusts((,)) and co-housing((, 1079 etc)).
- 1081H-165King County should advocate for revisions to state law that facilitate and1082support tools, such as condominium reforms, for advancing more1083homeownership opportunities.

1084	3. Tena	nt Protections, Eviction Prevention, and Homelessness
1085		
1086	((H-169	King County shall play a leadership role in implementing the All Home
1087		Strategic Plan to make homelessness rare, brief and one-time.
1088		
1089	H-168)) H-	<u>166</u> King County ((should)) <u>shall</u> support ((flexible)) <u>and implement</u>
1090	<u> </u>	programs and ((emerging strategies)) policies that increase housing
1091		stability and ((that)) help to prevent and reduce homelessness, such as
1092		<u>permanent supportive housing</u> , emergency rental assistance, short-
1072		term rental assistance, diversion assistance, <u>eviction prevention</u> ,
1094		mortgage default and foreclosure counseling, and improvements to
1095		emergency services referral networks, including coordinating with
1075		service providers contracting with King County to develop an efficient,
1097		<u>coordinated intake system for families and individuals experiencing</u>
1098		homelessness.
1098		nomelessness.
1099	LI 167	King County should support fodoral and state legislation that muchibits
1100	<u>H-167</u>	King County should support federal and state legislation that prohibits
		rental property owners from:
1102		a. contracting with companies that coordinate rental housing prices
1103		and housing supply information; and
1104		b. coordinating price, supply, and other rental housing information
1105		with other rental property owners.
	110 C	and the size Mardale and Deliving that Decourse that the
1106		pport Housing Models and Policies that Promote Healthy
1107	E	ommunities, Housing Affordability and an End to
1108	++	omelessness
1109		Note that the second state of the second state
1110 1111	H-106	King County, in partnership with other jurisdictions, shall evaluate
1112		achievement of countywide and local goals for housing for all economic
		sectors of the population by analyzing housing indicators, adopted
1113		land use regulations, actions that encourage development, and the
1114		effect of market factors on housing development. The results of this
1115		evaluation shall be used to develop new or revised policies, programs,
1116		regulations, and incentives to better meet the Countywide Planning
1117		Policies' housing goals. These may include adopting appropriate land
1118		use regulations and other actions that encourage development,
1119		rehabilitation and preservation of low and moderate-income housing.
1120		
1121	H-112)) <u>H-</u>	168 King County should encourage <u>development of permanent</u>
1122		supportive and other affordable housing through redevelopment of
1123		nonresidential buildings((, such as schools and commercial buildings,))
1124		in locations suitable for housing <u>to create housing stability for</u>
1125		households at or below 80 percent of area median income and in ways
1126		that preserve significant historic features where appropriate.
1127		
1128	((H-171	King County should support innovative and flexible tools and programs
1129		that assist low-income renters to maintain housing stability or to gain
1130		access to permanent affordable housing and private market housing,
1131		such as revolving loan funds that cover utility and damage deposits,
1132		and rental assistance programs.
1133		

1134	H-172)) H-16	9 King County shall support:
1135		. Rental assistance, eviction prevention, and other programs that
1136		provide ((landlord-tenant counseling, sessions and workshops,
1137		mediation in landlord-tenant disputes,)) tenants with the resources
1138		and information to successfully navigate landlord-tenant disputes;
1139		and
1140	k	<u>o. ((ł))Legislation that ((protects the rights of tenants and landlords, such</u>
1141		as uniform protections for tenants and landlords and fair rental
1142		contracts)) increases tenants' access to safe, affordable, healthy, and
1143		stable housing.
1144		
1145	H-170 k	King County shall pursue code changes that provide housing stability
1146		or tenants, including rent stabilization, and protect investment for the
1147		ental property owner.
1148	_	
1149	((H-170)) H-1	71 King County shall work with jurisdictions and housing providers

1166		County Regional Homelessness Authority, other cities, and housing

County Regional Homelessness Authority, other cities, and housing partners in efforts to prevent and end homelessness and focus those efforts on providing permanent housing with supportive services, expanding safe temporary shelter, and securing necessary resources to implement these efforts.

<u>G. Health Equity</u>

1167 1168

1169

1170

1171

1172 1173

1174 Healthy housing protects all residents from exposure to harmful substances and 1175 environments, provides opportunities for safe and convenient daily physical activity, 1176 reduces the risk of injury, and ensures access to healthy food and social connectivity. 1177 Housing characteristics, including location, surrounding conditions, size, indoor air 1178 guality, ambient pollution exposure, and amenity availability, significantly affect 1179 household residents' physical and mental health. Household conditions in the built 1180 environment, where people spend the most time, have a pronounced effect on health 1181 outcomes, especially for children and youth experiencing their sensitive years of physical, emotional, and mental development. An unaffordable housing market, 1182 1183 historical racially restrictive covenants, and other patterns of systemic disinvestment 1184 have resulted in significant disparities in housing-related health outcomes. In King County, asthma, mental health challenges, and elevated blood lead levels are more 1185 1186 prevalent in households of greater social vulnerability. 1187

1188 Chemicals representing the "worst in class" substances prevalent in the building 1189 industry that pose serious risks to human health and the environment are identified as 1190 red list chemicals. Red list chemicals serve many different functions in many building 1191 products. However, the use of these chemicals can cause harm to health and the

1192 1193 1194 1195 1196	environment. Hazards include cancer, reproductive toxicity, acute or chronic organ toxicity, endocrine disruption, ozone depletion, and others. Although prevalent, red list chemicals are not necessary in most instances. Safer chemical alternatives, product designs, and building designs are possible.
1197 1198 1199 1200 1201	((H-139)) H-174 King County should ((provide opportunities for incorporation of)) incorporate the principles of healthy housing and communities ((and housing, sustainability, and greenhouse gas emissions mitigation)) into programs, plans, and policy initiatives on ((housing,)) affordable housing, and community development in unincorporated areas.
1202 1203 1204 1205 1206 1207	H-175 King County should promote the incorporation of non-toxic and red list-free materials in the construction of affordable housing through use of the Evergreen Sustainable Development Standard, to improve the social determinants of health for residents.
1208 1209 1210 1211 1212 1213 1214 1215 1216	((H-113)) H-176 King County should support the development, preservation, and rehabilitation of affordable, healthy, and sustainable housing that protects residents from exposure to harmful substances and environments, ((including)) such as lead ((poisoning,)); reduces the risk of injury((;)); is well-maintained((;)); and is adaptable to all ages and abilities. King County should work on a regional level with jurisdictions to explore tools to ensure healthy housing is provided throughout the region to improve housing stability of residents.
1217 1218 1219 1220 1221	((H-204)) H-177 King County shall strive to apply principles that lead to thriving healthy communities in all neighborhoods of the ((region)) county. ((King County will support public health investments that help all residents to live in thriving communities where they have the opportunity to make healthy choices.)) King County shall support:
1222 1223 1224 1225 1226 1227 1228 1229 1230 1231 1232 1233 1234 1235 1236 1237 1238 1239	 a. Access to safe and convenient opportunities to be physically active, including access to walking, bicycling, recreation, and transit infrastructure; b. Access to healthy, affordable foods and the elimination of food deserts; c. Protection from exposure to harmful environmental agents, such as lead((7)) and infectious disease; d. Access to transportation infrastructure designed to prevent pedestrian, bicyclist, and motor vehicle-related injuries; e. ((Residential n))Neighborhoods free from violence and fear of violence; f. Protection from involuntary exposure to second((-))hand tobacco smoke and under-age access to tobacco products; g. Protection from disproportionate retail and promotion of products known to cause poor health outcomes, such as tobacco and cannabis, in areas where residents have higher social vulnerability and risk factors; h. Community amenities and design that maximizes opportunities for
1240 1241 1242 1243 1244	social connectivity and stress reduction; and ((h.)) <u>i.</u> A range of health services, including timely emergency response and culturally-((specific)) <u>relevant</u> preventive medical, behavioral, and dental care within their community.
1244 1245 1246 1247 1248 1249	1. Asthma Prevention Approximately six percent of children and nearly nine percent of adults in King County have been diagnosed with asthma. The demographic group in which this chronic disease is most common is American Indians/Alaska Natives, with a prevalence of over 26 percent. Housing is perhaps the most critical social determinant in asthma health

26 percent. Housing is perhaps the most critical social determinant in asthma health 1249 1250

1251 <u>unventilated or damp basements, may lead to mold development and attract pests.</u>
 1252 <u>Cracks, holes in the walls, and water leaks are associated with cockroach allergen.</u>
 1253 <u>Research has shown that household repairs to address these conditions reduce asthma</u>
 1254 <u>symptoms and hospitalizations and improve quality of life.</u>

((H-116)) <u>H-178</u> King County shall support and encourage smoke free policies in ((multi-family)) <u>multiunit</u> housing and affordable housing, where appropriate.

H-179 Public Health - Seattle & King County should reduce the prevalence and harm of asthma by conducting population studies, providing technical support to policy advocates, and training and deploying a Community Health Worker program.

1299

1300

1301

1303

1267 Crime and perceived safety ((varies)) vary by geographic area in King County and is an 1268 equity and racial and social justice concern. Safe communities promote resiliency and 1269 can act as a protective factor preventing violence and other crime. In particular, 1270 ((G))gun violence, including suicide, is ((in particular)) a public health and public safety 1271 issue. Unsafe((ly stored firearms)) <u>firearm storage</u> ((are a risk factor for suicide or other 1272 violence in the home. In addition, unsafe storage contributes to gun theft, which)) can 1273 result in the gun finding its way into the hands of someone planning to use it for suicide, 1274 ((Over half of King County residents who own firearms homicide, or assault. 1275 (approximately 123,000 people; based on 2014 data) report that they store at least one 1276 firearm unlocked. King County's Child Death Review regularly documents cases where 1277 unsafe firearm storage resulted directly or indirectly in a child's death.)) For the most 1278 recent three years for which King County data are available (2016, 2018, and 2020), 27 1279 percent of firearm owners with children and 44 percent of firearm owners without 1280 children kept their firearms stored unlocked. Evidence has shown that safely storing 1281 firearms - unloaded and locked - is a protective factor in preventing youth suicide. Safe 1282 storage can also limit the ft((-)) and the expansion of the illegal gun market. Education of 1283 firearm owners about safe firearm storage is a key public health strategy, as is making 1284 safe firearm storage an easy choice. ((Emerging evidence also shows that community 1285 and housing design can decrease violence in communities, including firearm violence.)) 1286

((H-209)) H-180 King County should work to address the public health and public safety crisis of gun violence by collecting epidemiological and other data((,;)); engaging with cities, local neighborhoods, and other ((stakeholders;)) partners; and making information available that promotes safe firearm storage and fosters community safety.

- H-181 King County shall work with jurisdictions, the private sector, state and federal governments, other funders of public housing, other public agencies, and the nonprofit sector to support public and private housing that allows for the opportunity to encourage permanent safe firearm storage locations that make safe storage an easy choice and foster safety from injury and violence, through exploring housing and community designs that are shown to increase connectivity and reduce violence.
- 1302 <u>3. ((Reducing)) Eliminating Lead Exposure</u>

Although exposures to lead have generally decreased ((as a result of)) <u>due to</u> regulatory
 interventions, lead poisoning remains a significant, but preventable, environmental
 ((health)) justice problem. ((Our)) <u>The</u> most vulnerable populations are children under
 ((6)) <u>six</u> years of age. ((The largest source of lead exposure nationwide and in King
 County is lead-based paint)) Lead-based paint is the largest source of lead exposure

1309 nationwide and in King County. The greatest lead-based paint risk is in housing built 1310 before 1978. The ((2010-2014)) 2017-2021 American Community Survey ((5-Year)) Public Use Microdata Sample indicates that among King County children under age six, 1311 46 percent live in homes built before 1978. ((Estimates shows 54% of all King County 1312 1313 housing was built prior to 1978.)) The preferred method for eliminating exposure from 1314 lead-based paint would be to remove it from all housing; however, it is impracticable to 1315 require this of all property owners. King County assists developers, ((building and)) 1316 home((-))owners, and tenants to become aware of the lead-based paint risks, its impacts 1317 ((to)) on health, and the tools and requirements needed to reduce exposures, including 1318 the use of lead-safe work practices. 1319 1320 King County has regulatory or programmatic reach to address many housing-related 1321 health challenges. Most new affordable housing is developed under Washington State 1322 Evergreen Sustainable Development Standards, and substantial renovation of existing 1323 housing may require upgrades to the current building code. Indoor air quality is being 1324 improved in the limited number of homes that receive equipment and/or technical 1325 assistance from Public Health - Seattle & King County and partner programs. 1326 1327 The policies in this subsection are intended to work upstream of programmatic 1328 responses to help avoid and mitigate exposures and harms. They point to harm-1329 reduction countermeasures in housing development characteristics, operations and 1330 maintenance stages, and housing demolition practices. 1331 1332 ((H-210)) H-182 King County ((should seek to develop strategies to decrease)) shall 1333 implement strategies to eliminate exposure to lead where children, 1334 vouth, and families live, learn, and play, including: 1335 a. Advocating for countywide efforts to screen all children (at 12 1336 months and 24 months) for exposure to lead poisoning and 1337 monitoring of this data; 1338 Working to ensure all renovation, repair, and painting work that b. 1339 disturbs painted surfaces in pre-1978 dwellings be performed in 1340 compliance with the requirements of the Washington Department 1341 of Commerce to reduce exposure to lead-contaminated dusts; and 1342 Working to ensure strategies are used that minimize or eliminate с. 1343 the spread of lead dust during the demolition of pre-1978 1344 residential and commercial buildings, including community 1345 education and notification. 1346 1347 ((H-211 King County shall advocate for regional efforts to screen all children (at 1348 12 months and 24 months) for exposure to lead poisoning. 1349 1350 H-212 King County should work to ensure all renovation, repair and painting 1351 work that disturbs painted surfaces in pre-1978 dwellings be 1352 performed in compliance with the requirements of the Washington 1353 Department of Commerce to reduce exposure to lead contaminated 1354 dusts. 1355 1356 H-213 King County should work to ensure strategies are used that minimize or 1357 eliminate the spread of lead dust during the demolition of pre-1978 1358 residential and commercial buildings, including community education 1359 and notification.

1360 C. Housing and Land Use Regulation

In King County today, a substantial need exists for low-income rental housing and for
 moderately priced homes that can be purchased by first-time homebuyers. In the past
 decade, a significant number of homeowners have lost their homes due to foreclosure
 and have become renters again. In the short term, those households may need

1365 affordable rents, while in the longer term they may again seek to own a 1366 moderately-priced home. 1367 1368 While King County has seen a growth in the percentage of smaller (one- and two-person) households, there are also some large households that need affordable 1369 1370 housing with three or more bedrooms. Existing units will provide some of the affordable housing needed for low-income households in the future. However, with the 1371 1372 projected growth in the number of low- to moderate-income households prospect of 1373 increasing numbers of family and senior households with limited income, and the short 1374 supply of lower-cost housing available today, new construction must include affordable 1375 housing. Efforts to provide sufficient land and infrastructure and reduced development costs will help make new units affordable. In addition, a combination of incentive 1376 programs and funding will help keep rents affordable and expand opportunities for 1377 1378 first-time homebuyers. 1379 1380 Meeting these objectives will entail providing sufficient land for a variety of affordable 1381 housing, such as higher-density single-family homes, multifamily properties, manufactured housing, accessory dwelling units and mixed-use developments. 1382 1383 1384 H-132 King County should encourage the formation of common development 1385 codes and standards, as well as common mandatory and incentive 1386 programs for affordable housing, with cities, sewer and water districts 1387 and other permitting agencies to increase predictability and reduce 1388 development costs. 1389 1390 Density bonuses and other incentives for the development of H-134 1391 affordable housing by for-profit and non-profit developers shall be 1392 available within unincorporated urban areas, with a focus on 1393 commercial areas to both single-family and multifamily developments 1394 to promote development of affordable rental and/or ownership 1395 housing. Bonuses shall be periodically reviewed and updated as 1396 needed, to assure they are effective in creating affordable housing unit, 1397 especially in coordination with any mandatory inclusionary affordable 1398 housing requirements that may be adopted. 1399 1400 H-138 Housing developments in the urban unincorporated areas, consisting of 1401 not less than 100 acres, shall provide a mix of housing types and 1402 densities, including housing that is affordable to low-, moderate-, and 1403 middle-income households. This mix should include housing 1404 opportunities for older adults, persons who are experiencing 1405 homelessness and persons with behavioral, cognitive, physical, and/or 1406 developmental disabilities. 1407 1408 H-140 King County shall allow five-story wood frame construction to increase 1409 the availability of multifamily housing while lowering development 1410 costs and maintaining fire safety. 1411 1412 H-141 King County shall explore the expansion of land use and financial 1413 incentives to preserve and improve existing housing in redeveloping 1414 areas through the use of programs such as transfer of development 1415 rights, tax credits and tax exemptions for new and preserved affordable 1416 housing, as well as tax abatements and restoration loans for housing 1417 designated as a historic landmark. 1418 1419 H-143 King County development standards should promote lower-cost infill 1420 development, such as accessory dwelling units, in a manner that allows existing housing to be retained through measures such as an innovative 1421 1422 or flexible building envelope, access and infrastructure standards. 1423

1424H-145King County shall continue to require Evergreen Sustainable1425Development Standards, or an equivalent successor standard, and will1426work with partners and stakeholders to encourage the improvement in1427healthy housing elements of Evergreen Sustainable1428Standards, with emphasis on healthy housing elements that reduce1429asthma.))

II. ((Regional)) Health and Human Services

King County has a regional role in health and human services, working with many 1432 1433 partners, such as the federal, state, and other local governments, service providers, 1434 non((=))profit organizations, foundations, faith communities, businesses, schools, and the 1435 criminal ((justice)) legal system, to help those most in need. King County's investments 1436 in human services are guided by ((Health and Human Services Transformation and the 1437 joint transformation initiatives² of the Department of Community and Human Services 1438 and Public Health Seattle King County; as well as policy and planning documents such 1439 as the Consolidated Housing and Community Development Plan 2015-2019³ and the All Home Strategic Plan 2015-2019⁴, the King County Youth Action Plan, Framework 1440 1441 Policies for Human Services,)) policies in this section and the Best Starts for Kids Levy; 1442 Mental Illness and Drug Dependency Behavioral Health Sales Tax Fund; Veterans, 1443 Seniors, and Human Services Levy; Crisis Cares Centers Levy; Initial Health through 1444 Housing Implementation Plan 2022-2028, or successor plans; Strategic Climate Action 1445 Plan; and the King County Board of Health Planning for Healthy Communities 1446 Guidelines and Recommendations. ((-and ultimately, the King County Strategic Plan. 1447

1448 The Framework Policies are contained in Chapter 2.51 of the King County Code. The 1449 purpose of the Framework Policies for Human Services is to communicate King County 1450 government's role in Human Services, the goals the county seeks to achieve and the 1451 principles that will underlie its investments. The Framework Policies are reviewed and 1452 revised as needed.

1454 Health and Human Services Transformation, the Framework Policies and the Strategic 1455 Plan)) King County places a strong emphasis on ((prevention,)) stabilizing people and 1456 diverting them from jails, emergency rooms, and crisis services by providing residents 1457 with appropriate treatment and services ((for those with the high needs, as well as 1458 providing)). The County also provides upstream prevention ((and intervention)) services 1459 ((and opportunities that increase the stability and resiliency)) for the health of 1460 children((,)) and youth ((, and communities, and)) to reduce the need for acute care and 1461 crisis interventions later in life.

1462

1453

 ((King County has grappled with unsustainable costs in criminal justice and emergency medical services and is taking steps to reduce cost growth in this primary area of service responsibility. A major component of these efforts has been)) King County's overreliance on the criminal legal system and emergency medical responses to health and human service needs has proven fiscally unsustainable, ineffective at creating lasting change, and frequently harmful to Black, Indigenous, and other People of Color

^{((&}lt;sup>2</sup> The initiatives of Health and Human Services Transformation include Familiar Faces, Communities of Opportunity, Accountable Communities of Health and its subcommittees, Best Starts for Kids Levy.

³ The Consolidated Housing and Community Development Plan is a HUD required document that guides the investment of a significant portion of DCHS' funds for affordable housing and community/economic development, and a smaller portion of DCHS' funds to address homelessness.

The Committee to End Homelessness (CEH) is located in the Director's Office of DCHS, and is the regional planning entity and continuum of care for addressing homelessness in King County.))

1469 residents. Acknowledging these unacceptable costs, King County and other partners 1470 have expanded alternative approaches to prevent unnecessary engagement with law 1471 enforcement and the criminal legal system, including jail diversion programs and 1472 increased coordination with health and human services programs((, in order to prevent 1473 unnecessary engagement with law enforcement and the criminal justice system. These 1474 efforts have begun to show results, and the Health and Human Services Transformation 1475 and Strategic Plan continue this emphasis)).

1477 The King County Regional Homelessness Authority was created to coordinate funding, contracting, service delivery, and performance measurement for the regional 1478 1479 homelessness crisis response system.. After King County and the City of Seattle signed 1480 the Interlocal Agreement to establish the Regional Homelessness Authority in 2020, and 1481 with support from the Sound Cities Association, the transition of homelessness crisis 1482 response to the Regional Homelessness Authority began. The County continues to 1483 separately fund and manage investments in capital housing development and other 1484 permanent housing purposes.

King County ((will)) <u>shall</u> preserve the resources necessary to collaborate as a ((true)) partner in regional human service systems. These focus areas include the following priority investment areas, which are consistent with other regional plans and initiatives: a. Job readiness, support for job development in business innovation districts; b. Affordable housing; c. Community and economic development activities; d. Strategies to ((make homelessness rare, brief and one-time)) create a homelessness response system that centers people with lived experience to focus on responding to needs and eliminating inequities to end homelessness for all; ((and))) e. Behavioral health services (including crisis services, mental health treatment, substance use disorder treatment, co-occurring disorder treatment, and housing support services); and f. Strategies and programs to build the life, academic, and employment skills for young people to reach their full potential as they transition from childhood to adulthood.
1606	
1607	B. Locating and Designing Health and Human
1608	Services Facilities
1609	
1610	It is critical to consider the role of the built environment in healing and how health and
1611	care services are provided. The built environment has the potential to transform the
1612	quality of life that people experience when they are in care. Thoughtful people- and
1613	patient-centered design has the potential to build on individual or community
1614	resiliency, mitigate prior trauma, prevent further harm, and promote healing, especially
1615	when developed in consultation with those who use the facility.
1616	
1617 1618	Consideration of the physical environment, both inside and outside of facilities, can
1618	support trauma-informed care by health service providers. Such design incorporates elements that support physical, psychological, and emotional safety, such as access to
1620	nature, clear wayfinding, wider hallways, open and well-lit stairways, clear sightlines,
1620	noise mitigation, flexible lighting, calming paint colors, exterior fences, reflecting and
1622	honoring culture, and warm and welcoming open spaces and communal areas.
1623	<u></u>
1624	The design elements of facilities are only one component of how a facility can contribute
1625	to an individual's health and well-being. Where a facility is located and its accessibility
1626	to the clientele it is intended to serve is another important aspect of systems planning.
1627	
1628	((H-205)) H-206 King County ((will)) shall support and implement health-related
1629	policies and programs that address the social determinants of health and the built environment by partnering with health((-))care services,
1630 1631	community-based organizations, foundations, other regional agencies,
1632	boards, commissions, and elected officials to improve public health.
1633	
1634	((H-206)) <u>H-207</u> King County ((will)) <u>shall</u> ((encourage)) <u>support</u> significant increases
1635	in the role and influence of residents living in communities that have
1636 1637	disproportionately lower health outcomes by intentionally engaging ((people)) <u>those</u> who are affected by health and human services policy
1637	development, planning, and service delivery in authentic and
1639	meaningful ways((, especially residents living in communities that have
1640	disproportionately lower health outcomes)).
1641	

- 1642((H-207 King County recognizes that poverty, lack of affordable housing and
lack of access to economic opportunity for all residents are critical
public health issues. King County will take steps to address these issues
through ongoing county plans, programs and funding.))1646
- 1647 H-208 King County ((will)) shall, to the extent possible, ((locate)) promote the 1648 location of health and human services facilities ((where)) in areas that 1649 balance the County's shared interests in service delivery that is ((most 1650 cost)) more accessible, effective, and efficient. The equity and racial 1651 and social justice opportunities and impacts of possible locations ((will)) 1652 shall be taken into account. Locations should be easily accessible to 1653 anticipated clientele via various transportation methods including 1654 public transit((,)) and make the best use of existing facilities ((and 1655 opportunities to co-locate services and be compatible with adjoining 1656 uses)) consistent with the land use element of the Comprehensive Plan. 1657
- 1658((H-208a)) H-209((When a health and human services facility is being
relocated,)) King County ((consideration)) should consider, and work to
minimize, the impacts on current clients when a health and human
services facility is being relocated, ((such as)) which may include
impacts related to accessibility, transportation options, and services
available at the relocated facility.

ENVIRONMENT

1

))

9 The environment in King County includes a rich and valuable array of natural resources 10 ranging from marine and freshwater environments((-)) to the highly urbanized area((-)), 11 lower-density rural area((s)), highly productive farm and forest land, and to nearly pristine landscapes in the foothills of the Cascades. The policies in this chapter protect 12 13 that environment, ensure its effective management, and support its restoration where 14 needed((, and support the Strategic Plan's goal of a healthy environment)). King County 15 residents depend on sound policies not only to protect public health and safety, but 16 also to preserve quality of life for future generations. King County is committed to 17 pursuing partnerships, cost effective strategies, and best management practices to 18 optimize the long((-))term protection and restoration of the environment within available 19 resources. These ((polices)) policies guide King County's environmental development 20 regulations as well as incentives, education, and stewardship programs in 21 unincorporated King County.

22

23 ((One of the central tenets of the Growth Management Act, the Countywide Planning 24 Policies, and King County's Comprehensive Plan is that new growth be focused within 25 designated urban areas with the aim of protecting resource lands (forestry, agriculture, and mining) and reducing development pressure on the Rural Area and Natural 26 27 Resource Lands. At the same time, t))The Growth Management Act requires that each 28 city and county in Washington State identify, designate, and protect critical areas found 29 in their local environment. Critical areas, as defined by the Growth Management Act, 30 include wetlands, areas with a critical recharging effect on aquifers used for potable 31 water, fish and wildlife habitat conservation areas, frequently flooded areas, and 32 geologic hazard areas. Achieving development goals must be integrated with 33 protecting critical area functions and values. ((Individual solutions can be tailored by 34 following the guidance of comprehensive plan policies that recognize both critical area 35 protection and the need to reduce urban sprawl.))

36

37 All parts of the county – from densely developed urban areas, to farm and forest land, to 38 the Rural Area – have a role to play and a common interest in environmental protection. 39 Responsibility for environmental protection cannot fall on one geographic area or ((category of people)) community alone. ((Tools for environmental protection, for all 40 41 residents whether in the Urban Area, Rural Area or Natural Resource Lands, include 42 buying locally grown produce at a Farmers Market, taking care to avoid polluted 43 discharges to stormwater drainage systems, riding the bus, investing in natural resource 44 programs like those offered by the King Conservation District, complying with 45 stormwater standards, controlling invasive plants, protecting forest cover, and ensuring 46 development minimizes flood risk.))

47

48 For the urban ((residents)) area, environmental protection occurs through ((different)) 49 various means, including investing in wastewater treatment and stormwater improvements, protecting greenbelts and other remnants of native habitats, adding 50 new public open space - especially in historically underinvested communities, and 51 52 $((\frac{1}{1}))$ concentrating development in densely developed areas. For the ((r))53 ((residents)) Area and Natural Resource Lands, it means protecting aquifers used for 54 drinking water, using development practices that ((slowly)) infiltrate stormwater, and 55 ((using best management practices to protect)) protecting water quality and habitat for <u>fish and wildlife</u>. On farm((-))lands, forest((-))lands, and lands in the Rural Area, stewardship and technical assistance provide((s)) opportunities for supporting 56 57 58 long-term resource use while protecting the environment. 59

60 Climate change is already having severe and wide-ranging impacts on public health,

- safety, and welfare; the economy; and the environment. Climate change in the Pacific
 Northwest is projected to continue to bring more severe weather events including
- 63 extreme heat events, wildfires, storms, and droughts; decreased water supply for
- 64 people and fish; and changes in habitat and species distribution.
- 65

66 ((One of the most significant environmental issues facing King County during the past 67 decade was)) Salmon recovery continues to be one of the biggest challenges facing the 68 Puget Sound Region, despite significant investment in habitat protection and restoration over more than twenty years since the listing of Chinook salmon and bull 69 70 trout as threatened under the Endangered Species Act. ((Since 2000, the region has 71 seen)) There has been unprecedented cooperation between Indian tribes, local 72 governments, residents, ((tribes,)) conservation districts, non((-))profit groups, and 73 federal and state fisheries managers to develop watershed-based Water Resource 74 Inventory Area plans for salmon conservation. These plans form the basis for the federal 75 recovery plan for Chinook salmon. Watershed partners are continuing to work together 76 to implement and monitor these plans through Water Resource Inventory Area Forums. Southern Resident orca, which are dependent on Chinook salmon as a food source, 77 78 were listed as endangered in 2005.

79

80 ((King County has taken significant steps to increase protections for Chinook and other 81 salmon species and improve habitat through changes in daily operations (such as 82 maintenance of county roads and parks), increased open space protection, tax incentives, updated development regulations, and construction of habitat restoration 83 84 projects. The lessons learned and relationships developed through cooperative 85 planning in response to the Chinook salmon and bull trout listings should help to inform 86 King County's response to new listings, and bolster efforts to prevent future species 87 listings.))

88

Individual species protections under the Endangered Species Act continue to play an
important role. At the same time, both nationally and internationally, many
governments are initiating multi-species approaches aimed at conserving biodiversity.
Biodiversity refers not only to plants and animals but also to their habitats and the
interactions among species and habitats.

94

95 Protection of biodiversity in all its forms and across all landscapes is critical to continued 96 prosperity and quality of life in King County. In fisheries, forestry, and agriculture, the 97 value of biodiversity to sustaining long-term productivity has been demonstrated in 98 region after region. ((With the impending effects of climate change, maintaining 99 biodiversity will be critical to the resilience of resource-based activities and to many 100 social and ecological systems. The continued increase in King County's population and 101 the projected effects of climate change make conservation a difficult but urgent task.)) 102 The protection and restoration of biodiversity and of a full range of supporting habitats 103 is important to King County. King County ((will)) incorporates these considerations in its 104 operations and practices, ranging from its utility functions (such as wastewater, solid 105 waste, and stormwater management) to its regulatory and general government 106 practices. 107

108 ((State and federal agencies are undertaking biodiversity initiatives. The Washington
 Biodiversity Council was created by the Governor in 2004, in part, with the aim of
 refocusing state conservation efforts from the species level to the ecosystem level. In
 2009, the Washington Department of Fish and Wildlife released Landscape Planning for
 Washington's Wildlife: Managing for Biodiversity in Developing Areas. The goal of this
 document is to provide information to planners and others that can be used to minimize
 the impacts of development on fish and wildlife and to conserve biodiversity.

115

The U.S. Forest Service also integrates biodiversity principles into its land management
 practices. Internationally, Local Governments for Sustainability's Local Action for
 Biodiversity Project convenes local governments from around the world, including King
 County, to establish strategies for the conservation of urban biodiversity.

120

121 Climate change has the potential for severe and wide-ranging impacts on public health,
 122 safety, and welfare; the economy; and the environment. Climate change in the Pacific

123 Northwest is projected to bring more severe weather events including heat events,
 124 winter storms and summer droughts, decreased water supplies for people and fish, and
 125 changes in habitat and species distribution. King County is a leader in taking steps to
 126 reduce greenhouse gas emissions and to adapt to climate change.

127

128 New approaches for stormwater management known as Low Impact Development, are 129 providing additional options for stormwater management, especially in site 130 development. Low Impact Development Best Management Practices can mimic the 131 natural functions of soil and forest cover in slowing and filtering stormwater runoff by 132 infiltrating or dispersing stormwater onsite, or by capturing and reusing it. Used 133 exclusively, or in conjunction with a comprehensive stormwater management program 134 of structural controls and other best management practices, Low Impact Development 135 Best Management Practices can reduce environmental impacts from stormwater runoff. 136 Low Impact Development techniques also work in tandem with other strategies such as 137 retaining forest cover, preserving native plants and preserving native soil.

138

153

These techniques help to meet other objectives such as retention of canopy cover, protection of riparian habitat and preservation of native soils that help protect biodiversity, improve air quality, and protect the ecological functions of the landscape and surface waters. These approaches help create a more sustainable environment and create a better quality of life for King County residents.))

145 Untreated stormwater runoff remains the largest source of pollution to Puget Sound. 146 Stormwater management requirements and practices continue to evolve, with greater 147 emphasis on low impact development and green stormwater infrastructure that can 148 mimic the natural functions of soil and forest cover in slowing and filtering stormwater 149 runoff by infiltrating or dispersing stormwater on-site, or by capturing and reusing it. 150 The County continues to develop, apply, and update evidence-based tools to identify 151 and prioritize actions to achieve the best outcomes for reducing pollution to Puget 152 Sound.

154 ((Environmental initiatives during the past decade have underscored the need for monitoring changes in the environment and the effectiveness of the County's efforts to 155 156 protect it.)) Monitoring and performance measurement help local governments to 157 target limited resources on existing and emerging environmental problems, determine 158 whether actions are having their intended effect, promote accountability, and adapt approaches to environmental management. ((The Department of Natural Resources and 159 160 Parks assesses environmental conditions with a variety of monitoring programs. The 161 results are presented in the environmental indicator section of KingStat and are used to 162 develop appropriate county responses and provide an opportunity to collaborate and 163 partner with other organizations in making improvements.

164 165 This chapter reflects the overarching goal of the Countywide Planning Policies to 166 protect, restore and enhance the quality of the natural environment in King County for 167 future generations. This chapter has been updated to integrate county strategies for 168 protection of land, air, and water; to emphasize implementation of salmon recovery 169 plans; to reflect increased emphasis on climate change and biodiversity; and to support 170 monitoring and adaptive management. These policies guide King County's 171 environmental regulations and incentives, education and stewardship programs in 172 unincorporated King County.))

173

I. ((Natural Environment and Regulatory 174 Context)) General Policy Guidance 175

((A. Integrated Approach 176

177 Environmental protection efforts need to be integrated across species, habitats, 178 ecosystems, and landscapes. Efforts to reduce flooding or protect water quality and 179 habitat cannot work successfully in isolation from management of land use across the larger contributing landscape. Efforts to protect one particular species or resource type 180 could be detrimental to another if such efforts are not considered in an ecosystem 181 182 context.

183

184 Likewise, t))The tools King County uses to protect the environment_-_incentives, 185 regulations, changes in ((c))County operations, planning, capital projects, land 186 acquisition, education, stewardship, and monitoring_-((also)) need to be integrated. For 187 example, the regulatory buffers placed around wetlands need to consider changing 188 conditions in the watershed around the wetland, including natural hydrological 189 pr<u>ocesses</u>. These conditions are influenced by land use, stormwater runoff 190 management, clearing and grading requirements, and protection of forest cover and 191 open space. Incentives, education, and technical assistance programs also must work 192 hand-in-hand so that land((-))owners can access a seamless set of programs that work 193 together to accomplish environmental protection and restoration.

194

195 As part of the ((2004)) <u>10-year</u> Comprehensive Plan update <u>process</u>, King County 196 ((updated)) <u>updates</u> its critical areas, stormwater runoff management, and clearing and 197 grading regulations consistent with Growth Management Act requirements to include 198 best available science, ensure no net loss of the functions and values of critical areas, 199 and demonstrate "special consideration" given to conservation and protection of 200 anadromous fish species. These regulations are functionally interrelated, with the 201 standards for protection of wetlands, aquatic areas, and wildlife areas also working in 202 tandem with ((landscape-level)) standards for stormwater management, water quality, 203 and clearing and grading, as well as programs for land conservation.

204

205 ((Habitat conditions vary throughout unincorporated King County, with higher quality 206 habitat generally found in less developed areas of the county. However, both urban 207 and rural habitats play a critical role for various species and during different life stages. 208 The environmental protections the county uses should consider development patterns, 209 habitat conditions, and the roles played by different geographic and ecologic areas. A 210 geographic and watershed-based approach to planning, stewardship, and 211 environmental protection acknowledges that different areas of King County may have 212 different environmental and resource values and face different levels of development 213 pressure. Therefore, methods of protecting critical areas that respect those distinctions 214 must continue to evolve to balance the protection of the environment with the need to 215 reduce urban sprawl and preserve the County's quality of life.

216

217 In 2004, the county strengthened)) The County offers a variety of incentives ((available to)) for land((-))owners ((through its Public Benefit Rating System, a)) to promote 218 219 environmental stewardship and restoration and enhancement of ecosystems. These 220 include tax incentive programs through which landowners can receive reduced 221 property taxes in exchange for commitments to protect open space and natural 222 resources((. However, incentives are not just limited to tax incentives, but can include)), 223 market-based programs for permanent land protection and regulatory flexibility (((e.g., 224 alternatives to fixed-width buffers)) such as the Transfer of Development Rights program 225 and fee-in-lieu compensatory mitigation program), ((streamlined permit processing, 226 reduced permit fees,)) and free or low -cost technical assistance. ((Additionally, the King

227 County Strategic Plan, released in 2010 and updated in 2015 through Motion 14317, 228 has a healthy environment goal to preserve open space and rural character while 229 addressing climate change.))

231 King County ((will)) use<u>s</u> existing and updated subarea and functional plans and Water 232 Resource Inventory Area salmon recovery plans to ((provide guidance to)) guide 233 programs, regulations, and incentives to protect and restore environmental guality. The 234 County has initiated the Land Conservation Initiative, which calls for a series of 235 accelerated actions to close gaps in equitable access to open space and to protect King County's last, most important natural lands and urban green spaces before increasing 236 237 land prices and development pressure foreclose opportunities for conservation. The 238 Land Conservation Initiative is a regional collaboration between King County, cities, 239 businesses, farmers, environmental partners, and other key partners to achieve 240 conservation results more quickly and cost-effectively.

- 242 ((E-105)) E-101 Environmental quality and important ecological functions shall be 243 protected and hazards to health and property shall be minimized 244 through development reviews and implementation of land use ((plans, 245 Water Resource Inventory Area salmon recovery plans, stormwater 246 management plans and programs, flood hazard management plans, 247 environmental monitoring programs, and park master plans. These 248 plans shall also encourage stewardship and restoration of critical areas 249 as defined in the Growth Management Act, and include an adaptive 250 management approach)) and environmental plans and programs. 251
 - ((E-101)) E-102 In addition to its regulatory authority, King County should use incentives to protect and restore the natural environment ((whenever practicable)). Incentives ((shall)) should be monitored and periodically reviewed to determine their effectiveness ((in terms of)) at protecting and restoring natural resources.
 - ((E-102)) E-103 King County should take a regional role in promoting and supporting environmental stewardship through direct education, coordinating of educational efforts, and establishing partnerships with other entities that share similar environmental concerns and stewardship opportunities.
 - ((E-102a)) E-104 King County ((will)) shall consider environmental justice and climate ((justice)) equity impacts and disparities in its planning, projects, and services to assess and mitigate unintended impacts on frontline communities and to ensure solutions that enhance conditions for people and the environment.
- 270 ((E-112a)) E-105 The protection of lands where development would pose hazards 271 to health and safety, property, important ecological functions, or 272 environmental quality shall be achieved through acquisition, 273 enhancement, incentive programs, and appropriate regulations. The 274 following critical areas and their buffers are particularly susceptible and 275 shall be protected in King County: 276
 - a. ((Floodways of 100-year floodplains;
 - b. Slopes with a grade of 40% or more or landslide hazards that cannot be mitigated;
 - Wetlands and their protective buffers;
 - d. Aquatic areas, including streams, lakes, marine shorelines and their protective buffers;
 - e. Channel migration hazard areas;
 - f. Critical Aquifer Recharge Areas;
- 284 g. Fish and Wildlife Habitat Conservation Areas; and
- 285 h. Volcanic hazard areas)) Critical aquifer recharge areas:

286 287 288 289 290 291 292 293 294	 b. Fish and wildlife habitat conservation areas; c. Frequently flooded areas, regulated as flood hazard areas; d. Geologically hazardous areas; and e. Wetlands. ((E-417)) E-106 King County should take precautionary action informed by best available science where there is ((a significant)) risk of damage to the environment. Precautionary action should be coupled with monitoring and adaptive management.
295 296 297 298 299 300 301 302 303 304 305 306 307 308 307 308 307 308 307 310 311 312 313 314 315 316 317 318 319 320 321 322 323 324 325	King County coordinates many programs internally as well as with other agencies and governments. The cooperative development and implementation of watershed-based salmon recovery plans over the last decade has brought together local governments, federal and state agencies, residents, and interest groups. Continued collaboration at the watershed level is critical for successful implementation of these habitat focused plans. Indian ((F))tribes with treaty-reserved fishing rights and the Washington Department of Fish and Wildlife co-manage harvest and hatchery actions. Working closely with these co-managers is essential to ensure that watershed-based salmon recovery strategies effectively integrate habitat, harvest, and hatchery actions. King County works closely with federal and state agencies, cities, and other counties to try to integrate and streamline compliance with federal mandates, including the Clean Water Act. Clean Air Act, and Endangered Species Act. In doing so, multiple benefits can be achieved. For example, in some cases mandated monitoring for Clean Water Act compliance and provide useful information to support salmon conservation efforts. King County also participates in ((F))the Puget Sound Partnership's goal is), which works to coordinate and significantly strengthen the federal, state, local, and private efforts undertaken to date to protect and restore the health of Puget Sound Partnership is found later in this chapter:
326 327 328 329 330 331 332 333	((E-104)) E-107 Development of environmental regulations, restoration and mitigation projects, and incentive and stewardship programs should be coordinated with <u>Indian tribes</u> , local jurisdictions, federal and state agencies, ((t ribes,)) special interest groups, and residents when conserving and restoring the natural environment consistent with Urban Growth Area, Rural Area, and ((designated)) Natural Resource Land <u>s</u> goals.
334 335 336 337 338 339 340	((E-422)) E-108 King County's land use and park planning((7)) and regulatory((7)) and operational functions related to environmental protection, public safety, and equity should be closely coordinated across departments and with other applicable agencies and organizations to achieve an ecosystem-based approach.

341	E-109	King County should promote the efficient provision of utilities and
342		public services by exempting minor activities from ((its)) critical areas
343		regulations((,)) if the agency ((has an approved)) <u>develops a</u> best
344		management practices plan ((approved by King County, and the plan
345		ensures that proposed projects that may affect habitat of listed species
346		be carried out in a manner that protects the resource or mitigates
347		adverse impacts)) <u>that:</u>
348		a. Is based on best available science;
349		b. Accounts for no net loss of ecological functions; and
350		<u>c. Ensures projects that may affect habitats of endangered,</u>
351		threatened, sensitive, or candidate species, or species of local
352		importance, are carried out in a manner that protects the resource and
353		mitigates adverse impacts.
354		

355 The State Environmental Policy Act requires King County to consider the environmental 356 impacts of proposed actions ((that may have a significant adverse environmental 357 impact)). Over the years, King County has adopted development regulations that 358 address many of the impacts that are likely to occur as a result of development. In many 359 cases, King County's regulations adequately address environmental impacts and 360 development proposals do not require additional mitigation under the State 361 Environmental Policy Act. However, there may be certain development proposals or 362 unusual circumstances not contemplated by the development regulations that require 363 further mitigation under the State Environmental Policy Act. This principle is articulated in King County Code Chapter 20.44. The presence of a species listed by the federal 364 <u>government</u> as endangered or threatened ((by the federal government)) is an example 365 366 of such an unusual circumstance. 367

- 368 ((E-107 Regulations to prevent unmitigated significant adverse environmental impacts should be based on the importance and sensitivity of the resource.
 371
- 372 E-108)) E-110 King County may exercise its substantive authority under the State 373 Environmental Policy Act to condition or deny proposed actions ((in 374 order)) to mitigate associated individual or cumulative impacts such as 375 significant habitat modification or degradation that ((may actually kill, 376 injure or harm listed threatened or endangered species by significantly 377 impairing essential behavioral patterns, including)) impairs breeding, 378 feeding, spawning, rearing, migrating, ((or)) sheltering, or other 379 essential behavior patterns for endangered, threatened, sensitive, or 380 candidate species, or species and habitats of local importance.
- 381 ((B. Policy and Regulatory Context

382 3. Growth Management Act and Critical Areas Protection

The Growth Management Act requires that each city and county in Washington State identify, designate, and protect critical areas found in their local environment. Critical areas, as defined in the Growth Management Act, include wetlands, areas with a critical recharging effect on aquifers used for potable water, fish and wildlife habitat conservation areas, frequently flooded areas and geologically hazardous areas. This chapter establishes policies for designating and protecting critical areas in King County. King County Code Title 21A provides the regulatory framework for these policies.

391 The Growth Management Act also requires local governments to include the best 392 available science in developing policies and development regulations to protect the 393 functions and values of critical areas, and to give special consideration to the 394 conservation or protection measures necessary to preserve or enhance anadromous 395 (fish that spawn in freshwater and spend part of their lifecycle in salt water) fisheries. 396

397 4. Shoreline Management Act

398 The Shoreline Management Act requires each city and county with Shorelines of the 399 State to adopt a Shoreline Master Program that complies with state guidelines but that is 400 tailored to the specific needs of the community. The Shoreline Management Act applies 401 to all marine waters, streams with a mean annual flow of 20 cubic feet or more per second, and lakes that are 20 acres or more in size. The Shoreline Management Act also 402 applies to upland areas called "shorelands" within 200 feet of these waters, as well as 403 404 associated wetlands and floodplains. The program's goals are set by state law and 405 include protecting natural resources, increasing public access to shorelines and 406 encouraging businesses such as marinas along the waterfront.

407

408 Under the Shoreline Management Act, the Shoreline Master Program includes both a
 409 Shoreline Master Plan and implementing shoreline land use and development
 410 regulations. The Growth Management Act requires that a local government's
 411 Comprehensive Plan, Shoreline Master Plan, and development regulations, including
 412 both shoreline regulations and critical area regulations, must be consistent with each
 413 other. The Shoreline Master Program is included in its entirety in Chapter 6,
 414 Shorelines.))

415 II. Climate Change

Climate change is one of the paramount environmental and economic challenges for
this generation. <u>Human-caused sources of greenhouse gas emissions, including carbon</u>
dioxide and methane, are causing unprecedented and severe changes in global and
local climate systems. This is the consensus view of the world's leading scientists,
including the Intergovernmental Panel on Climate Change and the U.S. National
Academy of Sciences.

422

423 King County faces significant environmental and economic challenges stemming from 424 climate change, including stressed and rapidly changing ecosystems, costly impacts on public and private property, and increasing public health risks related to wildfire smoke, 425 426 extreme heat waves, and changes in infectious diseases. The impacts of a changing 427 climate will be experienced differently by King County residents, influenced by factors such as income, age, health, and location. These changes can act as a threat multiplier 428 429 that creates complex challenges, particularly for frontline communities affected by 430 historical and current inequities who have limited resources to adapt. 431

432 <u>Effective and equitable climate action requires a significant commitment on the part of</u>
 433 <u>King County to reduce greenhouse gas emissions, prepare for climate change impacts,</u>
 434 <u>and build sustainable and resilient frontline communities.</u>

435

436 King County's ((2015)) Strategic Climate Action Plan, ((which was adopted)) <u>updated</u> 437 every five years and approved by the King County Council ((through Motion 14449)), is 438 King County's comprehensive legislative and policy plan for equitable climate action. ((Ht 439 provides the blueprint for county decision-makers, employees, and the general public 440 to learn about the County's climate change commitments.)) The Strategic Climate 441 Action Plan outlines King County's priorities and commitments for climate action, 442 integrating climate change and climate equity into all areas of County operations and in 443 the County's work with cities, partners, communities, and residents. A subset of the 444 policies and commitments from the Strategic Climate Action Plan are also reflected in 445 this section of the Comprehensive Plan. ((To learn more about the Strategic Climate 446 Action Plan: http://www.kingcounty.gov/climate:

448 Impacts from climate change have the potential to dramatically impact ecosystems, 449 agriculture, economy, biodiversity, and public health and safety in myriad and 450 interrelated ways. Impacts of a changing climate will be experienced differently by King 451 County residents, influenced by factors such as income, age, health, and location. 452 However, by working collaboratively to develop and implement strategies to prevent, 453 respond to, and prepare for climate change, King County has many opportunities to address broader inequities. Sustaining quality of life and the environment requires a 454 455 significant commitment on the part of King County to both reducing greenhouse gas 456 emissions, the primary driver of human caused climate change, and preparing for 457 climate change impacts in an ever-changing and increasingly dynamic landscape.)) 458

459E-201The County's Strategic Climate Action Plan should guide the planning,460development, and implementation of greenhouse gas reduction goals and461actions, equitable and community-driven climate solutions, and policies462and actions that reduce climate change vulnerabilities and increase climate463resilience.

464

465 ((Climate Change Science and Impacts

 Human caused sources of greenhouse gas emissions, including carbon dioxide and methane, are causing unprecedented and severe changes in global and local climate systems. This is the consensus view of the world's leading scientists, including the Intergovernmental Panel on Climate Change and the US National Academy of Sciences.

471 In King County, decreasing mountain snowpack, increasing flooding, and rising sea 472 levels are evidence that the climate system is changing. While many factors affect the climate system and natural environment, scientists have attributed many changes in 473 474 significant part to recent increases in atmospheric greenhouse gas concentrations. The 475 County faces significant environmental and economic challenges stemming from 476 climate change, including stressed and rapidly changing ecosystems, costly impacts on 477 public and private property, and new public health risks resulting from worsening air 478 and water quality (e.g., toxic algal blooms), additional heat related impacts, and 479 increased exposure to infectious disease.

480

481 King County Greenhouse Gas Emissions

482 Climate change over the last century has been caused primarily from increasing
 483 greenhouse gas emissions such as methane, carbon dioxide and nitrous oxide. King
 484 County is committed to reduce the greenhouse gas emissions of its operations and
 485 support broader efforts to reduce countywide emissions.

486

487 Government Operations

488 King County government operations create greenhouse gas emissions.)) Major 489 ((government)) sources of greenhouse gas emissions from King County government 490 operations are associated with combustion of diesel and gasoline for transit buses and 491 fleet vehicles, methane from landfills, electricity usage<u>fossil fuel usage</u> in buildings and 492 for wastewater treatment, and emissions from the production, use<u>f</u> and disposal of 493 government<u>-</u>purchased goods and services.

494

((King County is making progress in reducing greenhouse gas emissions from county operations, with emissions from energy-related non-transit sources decreasing 14% between 2007 and 2014. During this time emissions directly associated with vehicles and transit service increased by six percent, primarily due to increased use of biodiesel and increased transit service.

500

501 Countywide

502 Within King County's geography)) At the countywide community scale, the largest 503 contributors to greenhouse gas emissions are ((primarily caused by)) fossil fuel use (((gasoline and diesel) for transportation and to a lesser but significant extent to heat 504 505 buildings (natural gas and heating oil))) for building energy and transportation, followed to a lesser extent by land use, refrigerants, waste, and wastewater. In King County, 506 overall greenhouse gas emissions increased by 11 percent from 2007 to 2019; however, 507 508 per capita emissions declined by seven percent during the same time period. The most 509 substantial drivers for an increase in emissions were population growth, higher 510 greenhouse gas emissions from electricity, and increased aviation emissions. The 511 largest contributors to decreasing emissions have been increased efficiency of 512 passenger vehicles (decreased emissions per mile) and more efficient electricity use by 513 households and commercial entities. Additional significant emissions are associated 514 with consumption in King County, but these sources do not necessarily occur within its 515 geographic borders. These emissions are created through the production, transport, sale, use, and disposal of ((imported)) <u>purchased</u> goods and services ((such as food and 516 517 electronics)).

518

519 ((Preparing for Climate Change Impacts

520 Even if all human sources of greenhouse gas emissions ceased today, global and 521 regional temperatures would continue to increase for several decades. Therefore, King County must be proactive in preparing for local climate change impacts. For King 522 523 County, this includes preparing for more frequent and severe flooding and droughts, 524 developing recycled water sources, working with farm and forest owners to address 525 climate change impacts, planning for effects of climate change on human health, taking 526 steps to improve the resiliency of the natural and built environments, and ensuring that 527 the County can continue to provide services such as transit, wastewater treatment, and flood protection. 528

529

530 Status of King County Climate Change Efforts))

531 King County ((has a long record of)) is committed to innovation, leadership, and 532 investment in reducing greenhouse gas emissions, prioritizing climate equity, and preparing for the impacts of climate change. Consideration of climate change impacts 533 534 and opportunities to reduce energy use and greenhouse gas emissions are deeply 535 embedded throughout the work plans and capital investments of $((\overline{c}))$ <u>C</u>ounty 536 departments and lines of business. ((Since 2010, the investments in energy efficiency 537 and changes in operations have reduced building energy use and costs by over \$3 538 million annually.

539

King County Metro has pioneered the use of hybrid bus technology is on track to have
an all hybrid or electric bus fleet by 2018. As of 2015, the county is now producing
renewable energy equivalent to 57% of its government operational energy needs.
However, to make significant reductions in greenhouse gas emissions and ensure that
the built and natural environment are resilient in the face of a changing climate, even
bolder action and stronger collaboration with cities, businesses, and county residents is
required.))

547

The following ((sections of this section highlight and)) subsections include climate related policies, which are consistent with key ((2015)) Strategic Climate Action Plan
 ((policies and commitments)) goals, strategies, and priority actions.

- 551
- 552 553
- 55.

554 ((B.)) <u>A.</u> Reducing Greenhouse Gas Emissions

555 King County is ((leading by example in)) reducing operational sources of greenhouse 556 gas emissions through efforts such as:

- ((Green building and sustainable development practices that reduce emissions of capital facilities projects;
- Purchasing and maintenance practices that reduce emissions associated with the
 production, use and disposal of goods and services;
- Modifying operations of county buildings and facilities that reduce emissions and resource demand;
- Purchasing and efficiently using alternative vehicles such as electric powered
 vanpools and hybrid cars and buses;
- Improving energy efficiency and producing renewable energy sources at King
 County's wastewater treatment and solid waste disposal facilities; and
- Protecting forested areas, encouraging and supporting active stewardship, and undertaking tree planting and restoration projects that enhance biological carbon sequestration)) Increasing the efficiency of County vehicle fleets and minimizing their greenhouse gas emissions;
- 571 <u>• Reducing energy use in County facilities, making investments to reduce building</u>
 572 <u>fossil fuel use, and producing more renewable energy;</u>
- <u>Building, maintaining, and operating County facilities consistent with the highest</u>
 <u>green building and sustainable building practices;</u>
- Minimizing operational resource use, maximizing reuse and recycling, and choosing
 products and services with low environmental and greenhouse gas impacts; and
- Managing and restoring County-owned parks, natural lands, and farmlands to maximize biological carbon storage and increase climate resilience.

580 King County is also supporting emissions reductions at the broader countywide scale 581 through ((sustainable land use policies, transportation infrastructure, and through the 582 provision of important services such as recycling and transit, including actions and 583 policies)) <u>efforts</u> such as:

- 584 ((
- Land use designations and zoning that influence the pattern and density of development and the level of reliance on single occupancy vehicles;
- 587 Use of voluntary tools such as Transfer of Development Rights to reduce
 588 development density on Rural Area and Natural Resource Lands;
- Building codes and facilities standards that can influence the types of building
 materials and future energy demands;
- Promoting the use of transit and non-motorized travel modes to decrease vehicle
 miles traveled; and
- Protecting Rural Area and Natural Resource Lands from further development
 through acquisition of fee title or conservation easements to redirect future growth
 to urban areas to reduce emissions related to transportation and new
 development))
- <u>Reducing passenger car trips and vehicle emissions by sustaining and increasing</u> transit services, focusing development into urban areas and centers, supporting equitable pricing of vehicle usage, and supporting clean fuels and electric vehicles;
- <u>Reducing energy and fossil fuel use in the built environment and increasing the use</u>
 <u>of clean energy supplies and technologies by partnering to develop efficiency</u>
 <u>programs and supporting converting oil, natural gas, and propane-heated homes</u>
 to clean sources;
- <u>Reducing energy use and greenhouse gas emissions associated with new</u>
 <u>construction, additions, retrofits, and remodels in all buildings in King County by</u>
 working with partners to advance state green building code amendments, updating
 <u>building codes in unincorporated King County, and improving commercial energy</u>

- 608 code;
 609 Achieving a circular economy, whereby waste is minimized though prevention,
 610 reuse, recycling, and materials staying in use longer, by spurring and supporting
 611 new recycled markets, implementing a regional organics plan, prioritizing food
 612 waste reduction strategies, and making recycling improvements at County-owned
 613 transfer stations; and
 614 Protecting high value forgets and formlands, even diag, the total area of forgets
- Protecting high-value forests and farmlands, expanding the total area of forest cover and actively farmed lands, and restoring health, vitality, and resilience of forest and farmlands by implementing the Land Conservation Initiative and Rural Forest Carbon Program, and ensuring that strategies to reduce emissions and increase carbon sequestration are included in farm and forest stewardship plans.
- 619

620 King County is committed to actions and solutions that reduce emissions and prevent 621 and repair harms to frontline communities. To learn more about how the County is 622 committed to advancing climate equity, see additional details in the "Advancing Climate 623 Equity" subsection of this section. Many actions that reduce greenhouse gas emissions 624 result in additional benefits, such as saving energy and fuel costs, improving health, and 625 minimizing other types of air and water pollution. For example, walkable, transit-626 oriented communities have been shown to have significantly below average per capita 627 greenhouse gas emissions while at the same time saving residents money, supporting 628 healthier lifestyles, and creating stronger communities.

629

630 In some cases, ((-))County actions are direct sources of greenhouse gas emissions((-,)) 631 but, when considered at a broader scale, have a net emissions reduction benefit. For 632 example, ((providing public transportation results in significant direct greenhouse gas emissions, primarily from combusting diesel. At the same time,)) the greenhouse gas 633 634 emissions avoided by providing public transit service ((offsets these direct operational 635 emissions by more than three times by decreasing)) - from decreased driving, providing 636 traffic congestion relief, and supporting walkable, efficient land use - are three times 637 greater than direct emissions from operating public transit service itself. As this 638 example shows, there are sometimes complex considerations that need to be taken into 639 account in making decisions about greenhouse gas emissions reduction strategies.

640

641 ((Policies related to King County efforts to reduce operational and countywide 642 greenhouse gas emissions are presented below. Policies related to reducing 643 greenhouse gas emissions and adaptation strategies for agriculture and forestry can be 644 found in Chapter 3: Rural Area and Natural Resource Lands. Policies related to 645 reduction of Greenhouse Gas Emissions from transit and fleet vehicles can be found in Chapter 8: Transportation. Policies related to water supply, use of recycled water, and 646 647 energy can be found in Chapter 9: Services, Facilities and Utilities. Policies related to 648 green building and sustainable development can be found in Chapter 9: Services, 649 Facilities and Utilities (as related to government operations) and Chapter 10: Economic 650 Development (as related to private development).))

651 1. Government Operations

- 652 ((E-205)) E-202 King County shall reduce greenhouse gas emissions from ((all 653 facets of)) its operations and actions, including but not limited to, those associated with construction and management of ((c))County-owned 654 655 facilities, infrastructure development, transportation, and 656 environmental protection programs, to achieve the emissions 657 reductions targets set in ((E-206)) E-203 and to work towards the 658 carbon neutral goal in F-((215b))415.
- ((E-206)) E-203 King County shall reduce total greenhouse gas emissions from
 government operations, compared to a 2007 baseline, by at least
 ((25%)) 50 percent by ((2020)) 2025 and ((50%)) 80 percent by 2030.

- 664((E-206a)) E-204King County's Department of Natural Resources and Parks,665including the Wastewater Treatment Division, Solid Waste Division,666Parks and Recreation Division, and Water and Land Resources Division,667shall achieve, at a minimum, net carbon neutrality ((for its operations by6682017)) on an annual basis.
- ((E-206b)) E-205 King County's Wastewater Treatment Division and Solid Waste
 Division shall each independently achieve carbon-neutral operations by
 2025.
- 674 ((E-207)) <u>E-206</u> King County shall ((develop and)) <u>continue to</u> implement an 675 operational "social cost of carbon." The social cost of carbon should be 676 used in life-cycle assessments and decision making related to County 677 operations, including for purchase of vehicles, buses, and fuels, for 678 facility construction and resource efficiency projects, and for related 679 technology investments. King County should also ((pursue)) consider 680 using the social cost of carbon to inform broader County planning and 681 decision making. 682
- 683((E-208King County shall maximize the creation of resources from waste684products from county operations such as gases produced by685wastewater treatment and solid waste disposal in a manner that686reduces greenhouse gas emissions and produces renewable energy.687
- 688E-207)King County ((will)) shall continue to evaluate its own maintenance689and operations practices, including procurement, for opportunities to690reduce its own emissions or emissions produced in the manufacturing691of products.

692 2. Countywide

669

673

705

693 ((In 2014,)) King County and the 39 King County cities ((came together to develop)) have 694 shared, countywide greenhouse gas emissions reduction targets. ((In July 2014, targets 695 were unanimously)) These targets are adopted in the Countywide Planning Policies ((by the King County Growth Management Planning Council)). The formal adoption of a 696 697 shared, community_scale greenhouse gas emissions target by local governments ((is 698 relatively unusual, and)) provides a strong foundation and guidepost for 699 community-scale efforts to reduce greenhouse gas emissions. The shared targets are 700 near- and long-term, ambitious and achievable, and consistent with what climate 701 science says needs to be done ((in order)) to avoid the worst impacts of climate change. 702 (The adopted targets are significantly more ambitious than Washington State's 703 greenhouse gas emissions reduction requirements (Revised Code of Washington 704 47.01.440).

E-210)) <u>E</u>-208 706 King County shall ((collaborate)), independently and in 707 <u>collaboration</u> with ((its)) cities(($_{7}$)) and other partners, ((to reduce 708 countywide sources of greenhouse gas emissions, compared to a 2007 baseline, by 25% by 2020, 50% by 2030, and 80% by 2050)) adopt and 709 710 implement policies and programs to achieve a target of reducing 711 countywide sources of greenhouse gas emissions, compared to a 2007 712 baseline, by 50 percent by 2030, 75 percent by 2040, and 95 percent 713 by 2050, with net-zero emissions through carbon sequestration and 714 other strategies by that year. King County shall evaluate and update 715 these targets over time in consideration of the latest international climate science and statewide targets aiming to limit the most severe 716 717 impacts of climate change and keep global warming under 1.5 degrees 718 Celsius. 719

720((E-212King County will work with its cities and other partners to establish a
greenhouse gas emissions inventory and measurement framework for
use by all King County jurisdictions to efficiently and effectively
measure progress toward countywide targets.))724

725 Renewable energy technology, such as solar power, has the potential for replacing a 726 significant share of King County's energy portfolio. Renewable energy technologies 727 that have the benefit of zero or very low levels of greenhouse gas emissions should be encouraged. <u>Renewable energy production can consider other potential benefits and</u> 728 729 uses of available resources, such as avoiding waste-to-renewable-energy efforts that 730 disincentivize waste reduction or more beneficial societal uses. The renewable energy 731 technology industry is evolving, and no single technology is guaranteed to fit all the 732 county's alternative energy needs. King County should provide flexibility in its policies 733 and regulations to adapt to the changing circumstances. 734

- 735((E-213)) E-209King County should ensure that its land use policies, development736and building regulations, technical assistance programs, and incentive737programs support and encourage the use of viable renewable energy,738energy efficiency, and fossil fuel reduction and transition technologies739that ((have)) produce zero or minimal greenhouse gas emissions, while740considering equity and racial and social justice siting impacts.
- 742E-210King County shall develop and implement building and energy codes743that reduce energy use and phase out fossil fuel use in the built744environment within King County's jurisdiction.745
- 746 E-211 King County shall support:

741

771

772

773

- 747a. Stronger Washington State building and energy codes and policies748that reduce energy use, reduce the embodied carbon of materials,749phase out fossil fuel use, and support deployment of electric750vehicles and clean energy; and751b. Increased state resources for local code development and752implementation.
- 753754E-212King County should work with other local building officials and staff, as755well as community partners and the building industry, to effectively756implement building and energy codes that reduce energy use and the757embodied carbon of materials and phase out fossil-fuel use.758
- ((F-215a)) <u>E-213 King County should plan to achieve net-zero greenhouse gas</u>
 emissions associated with new residential and commercial buildings
 built in King County ((2030)) <u>2031</u>.
- 762 763 <u>E-214</u> King County shall develop and implement countywide community-764 scale built environment programs and policies that: 765 a. Reduce energy use, increase the use of renewable energy, and 766 phase out the use of fossil fuels, such as: energy loan, residential 767 efficiency retrofits; and fossil fuel reduction and transition 768 incentives and programs; and 769 b. Prioritize access and affordability of solutions for frontline 770
 - <u>communities, especially for households at or below 80 percent of</u> area median income, renter households, and households headed by people aged 62 years and older.
- ((E-214 King County, through its Comprehensive Plan policies and development regulations, should promote healthy community designs that enable walking, bicycling, and public transit use, thereby reducing greenhouse gas emissions and regional air pollution.

779 New Development

780 Nearly every new development results in new sources of greenhouse house gas 781 emissions. These include emissions from construction and land development, 782 emissions created from producing and transporting building materials, energy used in 783 operating buildings and structures, and transportation associated with the development. Although the emissions associated with construction occur today, the 784 emissions associated with energy and transportation will occur over the life of the 785 development, which may extend for 50 years or more. This means that decisions made 786 today about development will have an effect on climate change far into the future. 787 788 King County shall evaluate proposed actions subject to the State 789 E-215 790 Environmental Policy Act for their greenhouse gas emissions. King 791 County may exercise its substantive authority under the State 792 Environmental Policy Act to condition or deny proposed actions in 793 order to mitigate associated individual or cumulative impacts to global 794 warming. In exercising its authority under this policy, King County 795 should consider project types that are presumed to be not significant in

796generating greenhouse gas emissions and do not require review for797their greenhouse gas emissions. (Any standards related to798consideration of greenhouse gas emissions through the State799Environmental Policy Act process shall be subject to Council review and800adoption by ordinance.))

801 3. Assessment

807

802 King County has completed periodic inventories and assessments of greenhouse gas 803 emissions associated with government operations, as well as emissions associated with 804 all resident and business activity in the county, since 2000. These assessments have 805 provided valuable data to inform actions that will reduce greenhouse gas emissions, as 806 well as to monitor progress toward meeting emissions reduction targets.

808	((E-202)) <u>E-215</u>	King County shall ((assess and publicly report on:
809		Its normalized and total energy usage and total greenhouse gas

810	emissions associated with county operations;
811	b. Countywide greenhouse gas emissions associated with resident,
812	business, and other local government activities; and
813	c. Countywide greenhouse gas inventories that quantify all direct
814	local sources of greenhouse gas emissions as well as emissions
815	associated with local consumption));
816	a. Assess and publicly report on countywide greenhouse gas
817	emissions associated with resident, business, and local government
818	buildings, vehicles, and solid waste at least every two years;
819	b. Update its comprehensive greenhouse gas emissions inventory that
-	
820	quantifies all direct local sources of greenhouse gas emissions and
821	emissions associated with local consumption at least every five
822	years; and
823	c. Develop city-specific emissions inventories and data, in partnership
824	with cities.
825	
826	((E-203)) E-216 King County shall ((collaborate to set transparent standards to
827	account for the net energy and greenhouse gas emissions impacts of
828	government actions such as constructing transportation infrastructure
829	and providing services such as recycling and transit and shall)) assess
830	and ((publically)) <u>publicly</u> report <u>on</u> ((these impacts as practicable)) <u>the</u>
831	net and total energy and greenhouse gas impacts of County operations
832	and services at least every five years, using best practice accounting
833	standards.
000	

834 B. Advancing Climate Equity

835	V:	a County recognized that alignets above an hous dispresentionets impacts on		
836		ng County recognizes that climate change can have disproportionate impacts on ntline communities due to existing and historical racial, social, environmental, and		
837		onomic inequities. These inequities create barriers to frontline community		
838		rticipation in decision-making processes. Climate equity ensures just distribution of		
839		mate protection efforts and alleviates the unequal burdens created by climate change		
840		ough an equitable division of accountability, benefits, and opportunities. Addressing		
841	<u>cliı</u>	mate change and social inequities simultaneously requires bold action to prioritize		
842	<u>eq</u>	uity, to develop solutions that benefit people and stabilize climate impacts in		
843		rtnership with frontline communities, and to address climate change as a threat		
844	<u>mı</u>	Itiplier to other social issues, including systemic racism.		
845	•			
846 847		King County transitions away from an extractive fossil fuel-based economy toward a		
848		pre resilient, equitable, and sustainable one, it is critical that the County's solutions nefit frontline communities and avoid leaving people behind. This approach requires		
849		dressing the root causes of climate vulnerability, which often overlap and compound		
850		pacts. By intentionally investing in and partnering with frontline communities, the		
851		unty can center and integrate community-driven climate solutions. The County is		
852		dressing climate equity by working with frontline communities to:		
853	<u>•</u>	Plan for and invest in long-term partnerships that build capacity in frontline		
854		communities; Black, Indigenous, and other People of Color populations; and		
855		among youth;		
856	<u>•</u>	Build the knowledge base of community leaders and community-based		
857		organizations regarding climate change impacts on frontline communities;		
858	<u>•</u>	Invest in and support green jobs pathways that advance sustainability and living-		
859		wage career opportunities for frontline communities;		
860	<u>•</u>	Invest in frontline communities' ability to prepare for, respond to, and recover from		
861		emergency events and climate-related health impacts;		
862	<u>•</u>	Invest in strengthening local, culturally relevant food systems and food security for		
863		populations at risk of food insecurity;		
864	<u>•</u>	Support, align, and elevate actions and strategies advancing affordable and		
865		climate-resilient housing in frontline communities, including anti-displacement		
866		<u>strategies;</u>		
867	•	Support and invest in reducing energy burden, and increase access to and		
868	_	resources for transitioning to sustainable and energy efficient systems; and		
869	•	Prioritize community-driven mobility development and climate-resilient transit		
870	_	infrastructure.		
871				
872	<u>E-2</u>	217 King County shall prioritize and support ongoing partnerships with		
873		<u>frontline communities in co-development and implementation of</u>		
874 875		County climate planning, policies, and programs.		
876	E-2	218 King County shall invest in and enable culturally contextualized and		
877		linguistically appropriate climate change education that builds frontline		
878	<u>communities' capacity to engage on climate change impacts and</u>			
879		solutions.		
880 881	E-2	King County shall invest in climate solutions that result in equitable		
882		outcomes that benefit frontline communities by:		
883		a. Centering and funding access and pathways to living wage green		
884 885		jobs and careers for frontline communities, including youth and		
885		Black, Indigenous, and other People of Color populations, and		

886		identifying and promoting other environmentally beneficial jobs
887		that create living wage career pathways into high demand fields;
888		b. Providing frontline communities with resources and support to
889		respond to extreme weather events and public health emergencies
890		through culturally relevant strategies and avenues;
891		c. Supporting a just food economy that increases affordability and
892		access to healthy foods;
893		d. Addressing housing insecurities intensified by climate change
894		through programs and resources expanding frontline community
895		access to climate-resilient housing and anti-displacement
896		strategies; and
897		e. Expanding public transportation mobility access and climate-
898		resilient infrastructure for frontline communities in greatest need of
899		public transit.
900		
901	E-220	King County shall prioritize an affordable transition from fossil fuels to
902		renewable energy for frontline communities, and should expand the
903		availability to those communities of utility assistance and measures for
904		<u>energy efficiency, renewable energy, and fossil fuel reduction and</u>
905		transition.

906 C. Preparing for Climate Change Impacts

907 Climate change impacts are here and now((; in the last century, sea level in Seattle has risen by eight inches and average annual temperatures in the Pacific Northwest have 908 909 increased 1.5 degrees Fahrenheit)). Average annual air temperature is increasing, 910 heavy rain events are getting heavier, the region is experiencing a long-term decline in 911 snow and ice in the Cascades and Olympic mountains, sea level is rising, and ocean 912 chemistry is changing in ways that are harmful to local marine species like shellfish and 913 salmon. These changes can have significant consequences. More than 30 deaths in King County were attributable to a record-setting June 2021 heat wave that saw 914 915 temperatures reach 108 degrees Fahrenheit or higher in the County. While greenhouse 916 gas emissions must be reduced to avoid the worst impacts of climate change, impacts 917 are projected through the end of the century or longer, even if global and local 918 greenhouse gas emissions are drastically cut. To ensure that County residents are 919 prepared for and able to effectively adapt to climate change impacts, $((\bar{\tau}))_{t}$ the County is 920 integrating climate change preparedness into:

- Operations and maintenance of infrastructure, programs, and natural
 resources;
- 923
 Provision of public services;
 924
 Policies and regulation: and
- 924
 Policies and regulation; and
 925
 Partnerships with other local
 - Partnerships with other local governments, community groups and businesses.
- 926

927 1. Overarching Climate Change Preparedness Goals

928 929	((E-215a	King County will collaborate with local cities, residents, and other partners to prepare for the effects of climate change on the
930		environment, human health, public safety, and the economy.))
931		
932	<u>E-221</u>	King County shall take actions that equitably reduce climate change
933		vulnerabilities and increase the resilience of King County residents,
934		communities, natural systems, and the built environment by:
935		a. Integrating and accounting for climate impacts in policies, plans,
936		practices, and procedures, and implementing climate-resilient
937		decisions;
938		b. Investing in and using data and other technical information to inform
939		climate preparedness work at King County;

940	с.	Prioritizing health and equity in climate preparedness actions and
941		activities;
942	<u>d.</u>	Strengthening collaborations and partnerships to address countywide
943		climate impacts and increase regional resilience; and
944	<u>e.</u>	Investing in public outreach, engagement, and technical assistance
945		related to climate preparedness.

946 2. Integrating Climate Preparedness

950

976

981

947 More transformative changes may be needed to achieve climate-resilient outcomes.
 948 Evaluating the effectiveness of actions over time and implementing evidence-based
 949 decisions that reduce climate impacts and increase resilience is necessary.

- 951((E215b)) E-222 King County ((will)) shall plan and prepare for the likely impacts of952climate change on County-owned facilities, infrastructure, and natural953resources, and shall develop and, as feasible, implement strategies to954incorporate climate change response into the design and operations of955its facilities, infrastructure, and natural resources.956
- 957 ((E-215bb)) E-223 King County ((should)) shall develop and implement 958 regulations that help mitigate and build ((resiliency)) resilience to the 959 anticipated impacts of climate change, based on best available 960 information. Such impacts <u>could</u> include sea level rise((,)); changes in 961 rainfall patterns and flood volumes and frequencies((,)); changes in 962 average and extreme temperatures and weather((,)); impacts to slope 963 stability, including increasing and more intense landslides and alluvial 964 fan hazards; and impacts to forests, including increased wildfires, 965 droughts ((and pest infiltrations)), disease, and insect attacks. Methods 966 could include mitigating greenhouse gas emissions, establishing sea 967 level rise regulations, managing existing and limiting new 968 development in floodplains and riparian areas, and/or strengthening 969 forests' ability to withstand impacts. 970
- ((E-219)) E-224 King County shall integrate estimates of the magnitude and timing
 of climate change impacts into capital project planning, siting, design,
 and construction and ((also)) implement infrastructure operation and
 maintenance programs that consider full life-cycle costs and climate
 change impacts in asset management.
- ((E-216)) E-225 King County shall integrate observed and projected climate change
 impacts, including severe weather, <u>extreme heat, extreme cold,</u>
 flooding, drought, <u>wild</u>fire, and landslides, into emergency
 management planning and programs.
- ((E223)) E-226 King County shall consider projected impacts of climate change on habitat for salmon and other wildlife when developing long-range conservation plans and prioritizing habitat protection and restoration actions.
- 987 ((E-224)) E-227 To foster resilience to climate change in ecosystems and species, 988 King County should prioritize efforts such as: the restoration of 989 floodplains to improve the resilience of major rivers to changing flow 990 regimes and temperatures; the protection and restoration of riparian 991 vegetation and mature and old-growth forests to reduce warming in 992 cold water systems, of wetlands to reduce drought and flooding, and of 993 connections between different habitats to maintain current seasonal 994 migration; and facilitate migration opportunities for species whose 995 ranges shift in latitude and altitude.

996 3. Building Technical Capacity

1015

1022

1039

1044

King County is committed to using best available science and technical information to
 inform its climate preparedness work. This includes drawing on existing climate change
 research and technical studies conducted by other agencies and organizations, as well
 as directly funding and/or conducting new studies and technical assessments. This also
 includes building internal staff capacity and expertise to apply current data and science
 to preparedness activities.

- 1004 ((E-204)) E-228 King County shall collaborate with ((experts in the field of climate 1005 change,)) the scientific community, including scientists at the University 1006 of Washington's Climate Impacts Group((,)) or successor groups, and 1007 with state and federal agencies and other jurisdictions, when needed, 1008 to monitor, assess, and publicly share information about the impacts of 1009 climate change in King County, including development of detailed, 1010 science-based estimates of the magnitude and timing of impacts on air 1011 temperatures and heat waves, rainfall patterns and severe weather, 1012 forest health and wildfire, public health, flooding, landslides and debris 1013 flows, channel migration, sea level rise, biodiversity (including fish and 1014 wildlife), and ocean acidification.
- 1016
1017((E-215c
and federal agencies, and other jurisdictions to develop detailed,
and federal agencies, and other jurisdictions to develop detailed,
science-based estimates of the magnitude and timing of climate change
impacts on air temperatures and heat waves, rainfall patterns and
severe weather, river flooding, sea level rise, fish and wildlife, and
ocean acidification in King County.
- 1023
1024E-215bbb))E-229 King County shall assess the best available sea level rise
projections ((two years)) prior to each ((eight))10-year update((;)) and
update relevant risk1025shall ((incorporate the projections into))update relevant risk
assessments and policies in
appropriate.1027appropriate.
- 1029((E-220)) E-230King County shall periodically review and evaluate climate change1030impacts on natural resources that its resource programs are designed to1031protect, such as open space, forests, fisheries, productive farmland, and1032water ((quality and treatment)) resources, ((in order)) to assess and1033improve the efficacy of existing strategies and commitments.
- 1034 4. Prioritizing Health and Equity
- 1035((E-218)) E-231King County shall ((apply its Equity Impact Review process)) use1036equity impact reviewsto help prioritize investments in making1037infrastructure, natural resources, and communities more resilient to the1038impacts of climate change.
- 1040((E-225)) E-232Through land use and transportation actions, King County should1041work to reduce ((air quality and)) climate change ((related)) health1042inequities ((and)) related to the exposure of vulnerable populations to1043poor air quality and extreme weather events.
- 1045((E-226)) E-233 King County shall develop and incorporate into outreach efforts1046public health messages related to the health implications of climate1047change, particularly in urban communities, and the benefits of actions((;1048such as using alternative transportation options that simultaneously1049reduce greenhouse gas emissions, improve air quality, and improve1050public health)) that can reduce climate impacts on health.

1052
1053E-234King County should explore creation of culturally welcoming climate1053resilience hubs throughout unincorporated King County to equitably1054enhance community resilience while reducing greenhouse gas1055emissions and improving local quality of life. King County should also1056partner through the King County-cities Climate Collaboration to1057explore opportunities to partner on climate resilience hubs throughout1058all King County.

1059 5. ((Public Services)) Outreach, Engagement, and Education

1060

1067

- 1061E-235King County shall implement and support equitable outreach,
engagement, and technical assistance related to reducing climate risks.1063This should include, but not be limited to, providing information on
climate change impacts in King County, local efforts to address climate
change, and actions that individuals and communities can take to
reduce climate risks.
- 1068((E-217King County will work with its cities and other partners to formulate1069and implement climate change adaptation strategies that address the1070impacts of climate change to public health and safety, the economy,1071public and private infrastructure, water resources, and habitat.
- 1072 County Infrastructure and Operations
- 1073 Natural Environment
- 1074

1075E-222King County should collaborate with climate scientists in order to1076increase knowledge of current and projected climate change impacts to1077biodiversity.

1078 Public Health

1079 Vulnerable populations are often defined as groups whose unique needs may not be 1080 fully integrated into planning for disaster response. These populations include, but are 1081 not limited to, those who are physically or mentally disabled, blind, deaf, hard-of-hearing, cognitively impaired, or mobility challenged. Also included in this 1082 1083 group are those who are non-English (or not fluent) speakers, geographically or 1084 culturally isolated, medically or chemically dependent, homeless, frail elderly and 1085 children. Public Health - Seattle & King County has established a Vulnerable Population 1086 Action Team (The Community Resilience + Equity Program) to address the needs of this 1087 population.))

1088 D. Collaboration with Others

1089 King County recognizes that ((the)) climate change ((challenge)) is worldwide in its 1090 scope, ((and that)) with far-reaching consequences to the environment and to 1091 ((humankind's)) quality of life ((may result if this issue is not addressed effectively)). 1092 ((King)) <u>While the</u> County's actions are important ((contributors to addressing this issue; 1093 however, its)) contributions, the global nature ((will)) of climate change requires 1094 cooperation across local, regional, state, and international boundaries. King County can 1095 play important roles in collaborating with others ((on solutions, especially)) through 1096 community outreach, education, advocacy, monitoring, and information sharing with 1097 other ((local)) governments and universities. 1098

1099((E-201)) E-236 King County ((should)) shall participate in and support appropriate1100local, regional, and national efforts and organizations focused on1101reducing greenhouse gas emissions, advancing climate equity, and1102preparing for climate change impacts.1103

- 1104 ((E-227)) E-237 King County shall support((s)) comprehensive federal, regional, 1105 and state science-based limits and a market-based price on carbon 1106 pollution and other greenhouse gas emissions. A portion of revenue 1107 from these policies should support local greenhouse gas emissions 1108 reduction efforts, such as funding for transit service, energy efficiency 1109 and fossil fuel reduction projects, and forest protection and restoration 1110 initiatives; efforts that advance climate equity and frontline community 1111 investments; and climate preparedness and resilience efforts.
- 1113E-238King County shall ((also)) support((s)) renewable energy standards for1114electricity production and vehicle efficiency performance standards.
- 1116((E-228)) E-239 King County ((should)) shall advocate for federal, regional, and1117state initiatives and grant and loan programs that support local1118investments in projects and programs, such as community solar, fossil1119fuel reduction, ((and)) energy efficiency retrofits to reduce greenhouse1120gas emissions, climate equity, and ((prepare)) preparedness strategies1121for climate change impacts.
- ((E-215a)) E-240 King County ((will)) shall collaborate with ((local)) cities,
 residents, and other partners to prepare for and adapt to the effects of
 climate change on the environment, natural resources, human health,
 public safety, infrastructure, and the economy.
- 1128((E-215d)) E-241King County ((should)) shall share information on climate1129change impacts and collaborate on approaches to improving1130((resiliency of)) infrastructure resilience, disaster preparedness, and1131public engagement with ((local)) cities and other partners to ((make the1132best use of limited resources and)) more efficiently and1133engage King County residents.
- 1135 ((E-229)) E-242 King County shall work with ((the business community)) relevant 1136 industry sector partners to support efforts that reduce energy and fossil 1137 fuel use and greenhouse gas emissions, ((and to promote King County 1138 and the Puget Sound region as a center for green manufacturing)) as 1139 well as to promote locally recognized high growth sectors such as 1140 green manufacturing, construction, transportation, and professional 1141 services in King County and the Puget Sound. The ((c))County shall also 1142 work with community groups, consumers, and the retail sector to 1143 promote the consumption ((of green-manufactured products)) and 1144 adoption of products and services supporting reduced energy use and 1145 reduced greenhouse gas emissions.
- 1146

1148 A. Conserving King County's Biodiversity

1149 It is King County's goal to conserve fish and wildlife resources in the county and to 1150 maintain countywide biodiversity. This goal may be achieved through implementation 1151 of several broad policy directions that form an integrated vision for the future. Each of 1152 the pieces is necessary for the whole to be successful. The policy objectives are to: (1) 1153 initiate multi-species, biodiversity management approaches, (2) integrate biodiversity 1154 conservation goals and climate change planning into new and existing developments 1155 and habitat restoration programs, (3) identify and protect fish and wildlife habitat 1156 conservation areas, (4) connect the fish and wildlife habitat conservation areas and other

1157 important conservation areas and protected lands through a habitat network system, (5) 1158 include working farmland and forestland within the larger conservation landscape, and 1159 (6) provide education and incentive opportunities to engage residents. ((Incentives can include, but are not limited to, tax incentives, regulatory flexibility (e.g., alternatives to 1160 fixed-width buffers), streamlined permit processing, reduced permit fees, and free or 1161 1162 low-cost technical assistance:)) Conservation of biodiversity is necessary if benefits 1163 including important ecosystem services such as clean water, natural flood control, 1164 agricultural and timber production, climate ((regulation)) change adaptation, and 1165 pollination currently enjoyed and relied upon by residents of the county are to be 1166 available for future generations.

1167 ((1. Biodiversity))

1193

1196

1168 Because of its size, topography, and geology, the diversity of landscapes and habitats in 1169 King County is dramatic. From the Cascade Mountains to Puget Sound, alpine areas to lowland bogs, King County possesses an astonishing array of habitats and species. 1170 1171 Approximately 220 species of breeding and non-breeding birds are usually seen on an annual basis in King County. Based on an analysis by the State of Washington, 69 1172 species of mammals, 12 species of amphibians, and 8 species of reptiles are thought to 1173 1174 be breeding in the county. About 50 species of native fish (and 20 species of 1175 introduced fish) are found in the freshwater streams, rivers, ponds, and lakes of King 1176 County. In the county's marine environment, over 200 species of fish, some 500 species of invertebrate animals, and eight species of marine mammals can be found. A total of 1177 1178 1,249 (383 introduced) species of vascular plants have been identified in the county. The diversity of geography combined with King County's history of land use has shaped 1179 1180 the biodiversity of the past and present and will continue affecting it into the future. 1181

King County defines biodiversity as the variety of living organisms considered at all levels, from genetic diversity through species, to higher taxonomic levels, including the variety of habitats, ecosystems, and landscapes in which the species are found. ((The Washington Biodiversity Conservation Strategy provides another working definition:)) Biodiversity is the full range of life in all its forms, including the habitats in which ((they)) species live, the ways species interact with each other and their environment, and the natural processes (such as flooding) that support those interactions.

The biggest threats to biodiversity in King County visible today are <u>climate change and</u>
habitat loss and fragmentation from development((, invasive plant and animal species,
and climate change)).

- 1194((E-401)) E-301King County shall strive to conserve the native diversity of species1195and habitats in the county.
- 1197((E-402)) E-302In the Urban Growth Area, King County shall strive to maintain a
quality environment that includes fish and wildlife habitats that support
the greatest diversity of native species consistent with Growth
Management Act-mandated population density objectives.1201
- 1202E-303((In areas o))Qutside the Urban Growth Area, the ((c))County should1203strive to maintain, protect, and recover ecological processes, native1204landscapes, ecosystems, and habitats that can support viable1205populations of native species. This should be accomplished through1206coordinated conservation planning and collaborative implementation.1207

- 1208((E-403)) E-304 King County should develop a biodiversity conservation1209framework and conservation strategy to achieve the goals of1210maintaining and recovering native biodiversity. ((This framework1211should be coordinated with the Washington Biodiversity Conservation1212Strategy where applicable.)) King County should collaborate with other1213governments and private and nonprofit organizations on the creation1214and implementation of this strategy.1215
- 1216((E-404King County should collaborate with other governments and private
and non-profit organizations to establish a bioinventory, an assessment
and monitoring program, and a database of species currently using
King County to provide baseline and continuing information on wildlife
population trends in the county.))
- 1221 ((2. Climate Change and Biodiversity

1222 The effects of climate change on native biodiversity in the Pacific Northwest are likely to be serious, but as yet are largely unpredictable. In King County, some effects already 1223 1224 are apparent as average temperatures over the last decade have increased slowly but 1225 steadily, especially in winter. For many native species, c))Climate change ((will present)) 1226 brings added stresses ((to)) for many native species and ecosystems ((and populations)), 1227 including changes in distribution and availability of food, cover, and breeding habitat. 1228 Changes in temperature can alter productivity and growth rates or cause direct 1229 mortality, particularly for salmon, and trigger invasions of non((-))native species. The 1230 range and seasonal presence of some species will shift, and ((it is likely that)) the timing 1231 of when some species are in certain habitats won't match ((with)) the availability of their food sources. Some species will go extinct locally, and new species will move into the 1232 1233 area. Finally, changing lake and ocean temperatures may have devastating impacts on 1234 the base of food web. 1235

- 1236 The effects of climate change are ((only beginning to)) be<u>ing</u> observed and understood 1237 in the county and ((are presumed to)) <u>will</u> increase over time. In the face of climate 1238 change, biodiversity conservation may be of critical importance for buffering the effects 1239 of rising temperatures on regional ecosystems, damping the rates of ecological change, 1240 and reducing the potential for sudden, extreme changes in the environment.
- 1242((E-405)) E-305King County should evaluate a range of projected future climate1243scenarios based on best available science to help ensure that1244biodiversity conservation efforts are able to meet their objectives in a1245changing climate.
- 1246 ((c. Ecosystem Resilience and Natural Processes))

1241

1262

Ecosystems and habitats suitable for particular species communities are the result of various geologic, hydrologic, <u>climatic</u>, and biologic processes. Where habitat<u>-</u>forming processes are intact, ecosystems and their inhabitants are more likely to persist in the face of environmental variation <u>and disturbances made worse by climate change</u>, including disease, invasive species, wildfire, flooding, and drought.

1253 ((Further, reducing vulnerability of systems to large-scale disturbances including 1254 disease, invasive species, catastrophic fire, flooding, and drought is best accomplished 1255 by supporting resilience, which is the ability of a system to return to its former state after 1256 a disturbance. When an ecosystem is resilient, that system with its species communities 1257 is better able to bounce back following disturbance or change with ecological functions 1258 and processes still intact. In addition, current efforts such as the Washington State 1259 Department of Ecology's Watershed Characterization analysis can be used to inform 1260 decisions and direct resources for regarding land protection and restoration efforts with maximum ecological benefit. 1261

- 1263 E-413)) E-306 King County's efforts to restore and maintain biodiversity should
 1264 place priority on protecting and restoring ecological processes that
 1265 create and sustain habitats and species diversity and support climate
 1266 change resilience.
 1267
- 1268((E-414 When acquiring land for habitat protection, efforts should be made to
protect and restore areas of each habitat type most likely to be
resistant to and enhance resilience to climate change.
- 1271 E-411)) E-307 King County should ((conduct an analysis to identify areas critical for 1272 functional habitat connectivity. This assessment should be coordinated with 1273 state and federal mapping efforts as appropriate)) map habitat connectivity 1274 corridors and biodiversity areas to protect fish and wildlife populations in a 1275 changing climate. Areas identified by this analysis ((as being critical for functional habitat connectivity)) should be prioritized by King County, and in 1276 collaboration with Indian tribes, the state, cities, and other landowners, for 1277 1278 land conservation and restoration actions and programs.
- 1279 ((3. Biodiversity Conservation Approaches

This section provides guidance for biodiversity management of the county's natural
 resources. The following concepts and principles are based on current approaches to
 conservation biology, restoration ecology, and climate science combined with input
 from the new Washington State Climate Change Response Strategy.

1284 a. Landscape Context))

1285 Natural resource protection occurs within an ecological context. Environmental 1286 management should consider not only the immediate site but also the spatial and 1287 temporal context that surrounds it. In terms of spatial context, different activities will 1288 require consideration of different scales-from small sub-basins of a few square miles to 1289 watersheds and ecosystems that contain many hundreds or thousands of square miles. 1290 For example, watershed boundaries are useful ways to define ecological planning units 1291 for resource protection of aquatic systems whereas large-scale vegetation communities 1292 may be more useful for terrestrial systems.

1293

1294 In terms of temporal contexts, habitat conditions and populations can fluctuate over 1295 long time periods. It may take decades to see the results of habitat restoration projects 1296 and other environmental management actions on populations, and in the interim 1297 climate change and possibly major events such as flooding will also impact the 1298 trajectory of restoration actions. 1299

There is no single scale appropriate for all planning and management of conservation activities. Management within the context of a landscape helps to ensure the actions in one area will not be undone or rendered unsustainable by conditions in the surrounding watershed or ecoregion. Conservation efforts designed to protect only one species could have an unintended, detrimental effect on others. Ecological communities consist of multiple species often that interact in the same geographical area.

1308((E-406)) E-308King County's conservation efforts should be integrated across1309multiple landscape scales, species, and ecological communities.

1311((E-407)) E-309Distribution, spatial structure, and diversity of native wildlife and1312plant populations should be taken into account when planning1313restoration activities, acquiring land, and designing, planning, and1314managing parks.

1315

1310

1316((E-408)) E-310King County should carry out conservation planning efforts in close1317collaboration with ((other)) Indian tribes, local governments, ((tribes,))1318state and federal governments, land((-))owners, community groups,1319and other conservation planning ((stakeholders)) partners.1320

(("Ecoregions" are land areas that contain a geographically unique set of species, communities, and environmental conditions. Washington is a highly diverse state, with portions of nine ecoregions located within its boundaries. Three ecoregions cover parts of King County: the Puget Lowland Ecoregion in the western half of the county, the North Cascades Ecoregion in the northeastern and east central portion, and the Cascades Ecoregion in the southeastern portion of the county.

Ecoregions are the largest units of biodiversity in King County, and this scale is appropriate for broader natural resources planning and management. More localized habitats and species can be identified within these ecoregions, and can inform actions at the watershed and even property-specific level. Funding for landscape evaluations of this nature is extremely limited and will typically require grant funds. The County should take advantage of opportunities that may arise to collaborate with other ecoregional planning efforts.

E-409 King County should develop a countywide landscape characterization system based on ecoregions as a key tool for assessing, protecting, and recovering biodiversity.))

1340 "Structural diversity" is ((an accepted scientific term whose)) the range of different physical landscapes within a habitat. What this means ((meaning)) varies depending on 1341 the ecosystem. For example, ((in)) in a forest, structural diversity means the combination 1342 1343 of tree species, tree height classes, and legacy components (snags, logs); the more of 1344 each of these there are, the greater the forest structural diversity. Structural diversity of 1345 a river or stream means the degree of sinuosity (meaning curviness of the river and more is better) combined with both native riparian habitat and natural in-stream 1346 1347 structure, which includes downed wood, various-sized substrate, and a combination of 1348 pools, riffles, and glides. "Landscape diversity" means the size, shape, and connectivity 1349 of different ecosystems across a large area; a mosaic of heterogeneous land cover types 1350 and vegetation types; assemblages of different ecosystems. 1351

((E-415)) <u>E-311</u> King County should conserve areas where conditions support dynamic ecological processes that sustain important ecosystem and habitat functions and values, and promote structural and landscape diversity.

1356 ((e. Rare Ecosystems, Habitats, and Species))

1336

1337

1338

1339

1352

1353

1354

1355

1357 Rare or sensitive ecosystems, habitats and species are at a greater risk of extinction than 1358 those that are widespread and abundant and therefore should be a high priority for 1359 ((An important secondary benefit of protecting habitat for rare, conservation. 1360 e))Endemic species are those that are (((f))native to a particular geographic area and found nowhere else. If the habitat where endemic species live is damaged or lost, the 1361 1362 species would cease to exist. ((), or k))Keystone species are those (((a species)) that ((is)) have a disproportionately large effect on their natural environment relative to their 1363 abundance and are central to the survival of a multitude of other species(() species is 1364 1365 that habitat for many other species is protected as well. For example, the most effective way to protect and enhance native salmonid populations is through protection of those 1366 1367 river and stream channels, riparian corridors, lakes, wetlands, groundwater, headwaters, 1368 and watersheds that provide or impact spawning and rearing habitat, food resources, 1369 and fish passage. Protecting these resources also enhances protection of habitat for 1370 other species.)). Keystone species may have habitat-regulating functions, as is the case 1371 with sea stars, or they may have habitat-forming functions, as is the case with North 1372 American beavers.

1373	
1374	((E-418)) E-312 King County should assess different land types, habitats, and
1375	<u>resources for:</u>
1376	<u>a.</u> ((the)) <u>Their</u> relative scarcity and sensitivity;
1377	<u>b.</u> ((of different land types, habitats and resources, the)) <u>their</u> role ((of
1378	these land types, habitats and resources)) in supporting <u>endangered,</u>
1379	<u>threatened, sensitive, or candidate</u> species, <u>or species of local</u>
1380	importance; and
1381	<u>c. ((and the level of threat to these land types, habitats, and resources</u>
1382	in terms of habitat modifications that would likely)) <u>the degree to</u>
1383	which habitat alterations would reduce these populations ((of sensitive
1384	species)).
1385	
1386	((E-419)) <u>E-313</u> King County should give special consideration to protection of
1387	rare, endemic, and keystone species when identifying and prioritizing
1388	land areas for protection through acquisition, conservation easements,
1389	and incentive programs.
1390	
1391	((E-420)) <u>E-314</u> King County should incorporate climate change projections into
1392	new species protection plans and shall revise older species protection
1393	plans when feasible or when conducting ((eight)) <u>10</u> -year updates to
1394	incorporate projected impacts from climate change.
1395	
1396	((Rare ecosystems, habitats, and species are also addressed in the Fish and Wildlife
1397	Habitat Conservation Areas section below:))

1398 <u>B. Habitat</u>

1399 ((4.)) <u>1.</u> Fish and Wildlife Habitat Conservation Areas

1400 Fish and wildlife habitat conservation, according to the state's definition, means land management for maintaining populations of species in suitable habitats within their 1401 1402 natural geographic distribution so that the habitat available is sufficient to support 1403 viable populations over the long term and isolated subpopulations are not created. 1404 This definition does not mean that all individuals of all species at all times must be 1405 maintained, but it does mean not degrading or reducing populations or habitats so that 1406 they are no longer viable over the long term. Additionally, it should be recognized that 1407 geographic distributions will shift with climate change. 1408

1409 ((King County's fish and wildlife policies and regulations have been informed by current 1410 state fish and wildlife guidance, recommendations, and requirements. The Growth 1411 Management Act directs local jurisdictions to designate and protect critical areas, including Fish and Wildlife Habitat Conservation Areas. Fish and Wildlife Habitat 1412 1413 Conservation Areas are designated with the intent to ensure the conservation of 1414 individual species recognized as declining or imperiled as well as protect and connect 1415 specific areas of habitat deemed important. This approach of protecting individual 1416 species and their habitat comprises one of the five major objectives described above for 1417 protecting the county's biodiversity. Because biodiversity encompasses a variety of 1418 levels, from genes to ecosystems, and occurs at multiple spatial scales, a wider 1419 approach beyond single-species management is necessary to conserve biodiversity in 1420 King County. Additionally, most fish and wildlife species are not confined to small 1421 portions of the landscape; rather, they move about for feeding, breeding, rearing 1422 young, and interacting with other members of their species to insure adequate genetic 1423 exchange and population viability.))

1424

1425 Federal laws have been enacted over the past century to protect a wide range of 1426 species. In addition to the Endangered Species Act, other federal laws include the Marine Mammal Protection Act, and the Migratory Bird Treaty Act. Individuals of
Endangered Species Act -listed species, marine mammals, and migratory birds in King
County are protected under the provisions of these laws.

1430

1455

1461

1462

1463

1431 ((In order t))<u>T</u>o build a robust approach to biodiversity conservation, especially in view 1432 of a changing climate, individual species and habitat protections must be integrated 1433 with a landscape-scale approach to fostering and protecting resilient and diverse 1434 ecosystems. Fish and Wildlife Habitat Conservation Areas occur on both publicly and 1435 privately owned lands. Designating these areas is an important part of land use planning for appropriate development densities, the $((\frac{1}{2}))$ Urban $((\frac{1}{2}))$ Growth $((\frac{1}{2}))$ Area 1436 ((boundaries)) boundary, open space corridors, incentive-based land conservation and 1437 1438 stewardship programs, and acquisition planning. The policies in this section are 1439 intended to fulfill federal and state requirements for protection of specific species and 1440 habitats while implementing landscape-based approaches to conserve native 1441 biodiversity in the long term. Protection measures designed to help maintain 1442 populations of certain species may necessarily include protecting the habitat where 1443 those species have a primary association with the protected area such as spawning or 1444 breeding, and also for rearing young, resting, roosting, feeding, foraging, and 1445 migrating.

1446 ((f. Integrated Land and Water Management and Planning

1447 In the past, aquatic and terrestrial habitats and species have often been managed 1448 independently of each other.)) Effective conservation and resource management of 1449 aquatic and terrestrial systems requires coordinated planning among departments with 1450 authority over development regulations and guidelines, wastewater treatment, stormwater management, flood hazard management, groundwater protection, 1451 1452 transportation planning and road building, water quality, natural resource management, 1453 agriculture, and fish and wildlife conservation. Effective conservation planning must include the interests of private landowners as well. 1454

1456 Coordinated planning and management can improve understanding of cumulative
1457 effects on terrestrial and aquatic systems, and can allow for a systems-based approach
1458 to avoiding or mitigating for adverse effects and improving habitat functions and value
1459 over time.
1460

((E-421)) <u>E-315</u> Terrestrial and aquatic habitats should be conserved and enhanced to protect and improve conditions for fish and wildlife.

1464	((E-432)) <u>E-</u>	316 King County shall designate and protect the following areas as Fish
1465		and Wildlife Habitat Conservation Areas:
1466		a. Areas with which federal- or state-listed endangered, threatened,
1467		candidate, or sensitive species have a primary association;
1468		b. Habitats of Local Importance and ((H))habitats for Species of Local
1469		Importance, including Wildlife Habitat Conservation Areas;
1470		c. Wildlife habitat networks designated by the ((c)) <u>C</u> ounty;
1471		d. <u>Aquatic Areas</u>
1472		e. Commercial and recreational shellfish areas;
1473		((e)) <u>f</u> . Kelp and eelgrass beds;
1474		((f)) <u>g</u> . Herring, smelt, and sand lance spawning areas;
1475		((g)) <u>h</u> . Riparian ((corridors)) <u>areas</u> ; and
1476		((h)) <u>i</u> . State aquatic reserves.
1477		
1478	((E-433	King County should map Fish and Wildlife Habitat Conservation Areas.
1479		King County shall protect Fish and Wildlife Habitat Conservation Areas
1480		through measures such as regulations, incentives, capital projects or
1481		purchase, as appropriate.
1/182		

1483 The Washington Administrative Code guidelines suggest considering waters of the 1484 state, wetlands, salmonid habitat (which includes marine nearshore areas), and riparian 1485 ecosystems when designating fish and wildlife habitat conservation areas. All of these 1486 areas and their associated buffers are highly valuable wildlife habitat, and they serve 1487 many other functions as well. Protections for these areas are addressed more broadly in 1488 other provisions of this chapter.

1489 g:)) <u>2.</u> Habitat and Development

1510

1514 1515

1516

1517

1518

1519

1520

1521

1522

1523

1524

1525

A key element in local wildlife conservation is the integration of wildlife and habitats into developments of all types. Wildlife protection does not have to be at odds with many types of development. Urban ((multifamily)) <u>multiunit</u> projects, industrial developments, new school facilities and rural open space projects all provide opportunities to enhance wildlife ((amenities)) <u>habitat quality and connectivity</u>. Residential developers and businesses have been able to use wildlife in marketing strategies to attract more potential homeowners, renters, and ((quality)) employees.

Techniques such as minimizing clearing during site preparation, using native plant species in required buffers, landscaping, using bridges ((and wildlife-specific crossings)) rather than culverts to cross streams, wildlife-specific crossings, and innovative site design can be used to promote wildlife presence and connectivity and minimize ((problems)) conflicts with ((nuisance)) wildlife. Other plan elements, such as open space, road system design, and housing density((;)) also have related impacts on the remaining wildlife values that must be considered.

Benefits to wildlife are enhanced ((if)) when native vegetation is retained or when
 screening and landscaping is composed of native vegetation. ((Retention of natural
 vegetation can provide wildlife and aesthetic benefits often at a lower cost than
 non-native or constructed options.

1511 Standard buffers for streams and wetlands will not always adequately protect wildlife
 1512 resources that utilize those sensitive areas. Areas with critical wildlife resources may
 1513 need larger buffers to protect the resource.

E-425)) E-317 King County may increase the size of riparian areas, buffers, and critical area setbacks ((T))to protect ((or improve)) adjacent wetland((s)), ((and)) aquatic area, and riparian habitat((s)), native vegetated areas that connect wetlands complexes, and species of local importance and their habitats. ((stream and wetland buffer requirements may be increased to protect King County species of Local Importance and their habitats, as appropriate.)) Whenever possible, density transfers, clustering, ((and)) buffer averaging, and other mechanisms should be ((allowed)) utilized in order to protect and/or enhance ecological functions.

1526((E-475To improve adjacent wetlands and aquatic habitat, areas of native1527vegetation that connect wetland complexes should be protected.1528Whenever effective, incentive programs such as buffer averaging,1529density credit transfers, or appropriate non-regulatory mechanisms1530shall be used for this purpose.

1531 d. Decisions in the Face of Uncertainty

Both)) <u>Historical</u>, current, and ((<u>historical</u>)) <u>projected</u> information on habitat conditions, including climate, and species distribution can inform ecologists and decision-makers about environmental management decisions. However, decision-makers do not always have access to complete information.

- 1537 ((E-416)) E-318 King County should use a mixture of information on historical,
 1538 current, and projected future conditions to provide context for
 1539 managing public hazards and protecting and restoring habitat.
- ((E-423)) E-319 ((New d))Development, erosion control projects, and critical area
 mitigation and restoration should((, where possible,)) incorporate
 native plant communities ((into the site plan)), both through the
 preservation of existing ((native)) plants and addition of new native
 plants. The introduction of nonnative and invasive species should be
 avoided.
- ((E-424)) E-320 King County shall steward public lands well and shall integrate fish and wildlife habitat considerations into capital improvement projects whenever feasible. Fish and Wildlife Habitat Conservation Areas should be protected and, where possible, enhanced as part of capital improvement projects.

1553 3.((b.))Habitat connectivity

Protecting and enhancing habitat connectivity is a critical action for maintaining ecosystem integrity and resilience, particularly in the face of climate change. However, funding for such evaluations is extremely limited. Protection of isolated blocks of habitat is critical but not enough to adequately protect wildlife in King County. Critical wildlife habitats and refuges also need to be connected across the landscape through a system of habitat corridors, or networks.

1560

1540

1547

1561 The King County Wildlife Habitat Network was designed to help reduce the effects of 1562 fragmentation by linking diverse habitats through the developed and developing 1563 landscape. The network is intended to facilitate animal dispersal by connecting isolated 1564 critical areas, segments, open space, and wooded areas on adjacent properties. The 1565 corridors tend to follow riparian <u>areas</u> and streams ((corridors)) across the lowlands and 1566 the upland plateau to the east and southeast of Lake Washington into the foothills. The Wildlife Habitat Network is mapped on the "Wildlife Network and Public Ownership 1567 1568 Map." 1569

1570 How wide the corridors within the network should be is related to requirements of 1571 target wildlife species, length of network segment and other important characteristics 1572 within the network. Wider corridors will be required for larger species if the distance between refuges is great or if multiple uses, such as public access and trails, are desired. 1573 Because it may not be possible to protect wide corridors in the Urban Growth Area, it 1574 1575 may not be possible to accommodate larger wildlife species in all areas. Networks will 1576 address some of the problems of habitat fragmentation for smaller species within the 1577 Urban Growth Area.

1579 Open spaces set aside during subdivision of land should be located to make 1580 connections with larger off-site systems. This approach will also benefit other open 1581 space goals. 1582

- 1583 ((E-410)) E-321 Habitat networks for threatened, endangered and Species of Local 1584 Importance((, as listed in this chapter,)) shall be designated and 1585 mapped. Fish and wildlife habitat areas and ((H))habitat networks for 1586 other priority species ((in the Rural Area and Natural Resource Lands)) 1587 should be identified, designated, and mapped using ecoregion 1588 ((information about the county and its)) and resource((s and)) data. 1589 Mapping should be coordinated with state and federal ecosystem 1590 mapping efforts as appropriate.
- 1591

1578

1592 ((As mentioned above, protecting and enhancing habitat connectivity is critical for

1593 maintaining ecosystem integrity and resilience. Functional habitat connectivity is the

1594 degree to which a given species can easily move between habitat areas. Because
 1595 individual species respond to the landscape, functional connectivity depends on both
 1596 the features in the landscape and how particular species respond to that landscape.
 1597 Focal species are used to identify important linkages between habitat areas that will be
 1598 suitable for a variety of species.

 1600 E-412)) E-322 King County should work with <u>Indian tribes</u>, adjacent jurisdictions, 1601 state and federal governments, ((tribes,)) and landowners to identify 1602 and protect habitat networks at jurisdictional and property boundaries 1603 during development of land use <u>and environmental</u> plans((, Water 1604 Resource Inventory Area salmon recovery plans, and site development 1605 reviews to identify and protect habitat networks at jurisdictional and 1606 property boundaries)).

1607 ((5.))<u>4.</u> Conservation Incentives and Education

1599

1617 1618

1619

1620

1621 1622

1623

1624

1625

1626

1627

1608 King County offers landowner technical assistance for protection of fish and wildlife 1609 habitat through programs including Forest Stewardship, Noxious Weed Control, ((the 1610 GoNative web site,)) and assistance for native plant restoration and landscaping. Other organizations, including King Conservation District, Natural Resource Conservation 1611 1612 Service, Washington State University Extension, and Washington Department of Fish 1613 and Wildlife's Backyard Wildlife Sanctuary Program offer support to landowners to 1614 enhance fish and wildlife habitat. Landowners can also receive property tax reductions through the King County Public Benefit Rating System in exchange for protecting and 1615 1616 improving habitat.

((E-443)) <u>E-323</u> King County should promote voluntary wildlife habitat enhancement projects by private individuals and businesses through educational, active stewardship, and incentive programs.

- ((E-444)) E-324 King County should partner with community associations, realtors, community groups, and other agencies to conduct targeted outreach to potential and new property owners about fish and wildlife habitat education and forestry education and incentive programs, particularly in <u>the</u> Rural Area((s)) and Natural Resource Lands in the county.
- 1628 ((E-469)) E-325 ((A tiered system for protection of aquatic resources should be 1629 developed based on an assessment of basin conditions using 1630 Regionally Significant Resource Area and Locally Significant Resource 1631 Area designations, Water Resource Inventory Area Plans, habitat 1632 assessments completed for acquisitions plans, the Water Quality 1633 Assessment, Total Maximum Daily Loads, ongoing monitoring 1634 programs, and best available science.)) Through a coordinated 1635 approach of incentives and acquisitions, King County should prioritize, 1636 enhance, and protect a variety of ecosystems, including urban open 1637 space uplands, riparian areas, floodplains, and aquatic systems with the 1638 highest conservation value and those supporting equitable access to 1639 quality open space.

1640 ((c. Wildlife Habitat Network

1641 The King County Wildlife Habitat Network was designed to help reduce the effects of 1642 fragmentation by linking diverse habitats through the developed and developing 1643 landscape. The network is intended to facilitate animal dispersal by connecting isolated 1644 critical areas, segments, open space, and wooded areas on adjacent properties. The 1645 corridors tend to follow riparian and stream corridors across the lowlands and the 1646 upland plateau to the east and southeast of Lake Washington into the foothills. The Wildlife Habitat Network is mapped on the "Wildlife Network and Public Ownership 1647 1648 Map."))

1649 <u>C. Animals and Plants</u>

1650 ((a.)) <u>1.</u> Federal and State Listed Endangered, Threatened, Sensitive 1651 Species

1652 ((1. Endangered Species Act

In March 1998, The National Marine Fisheries Service proposed to list the Puget Sound
 Chinook salmon as "threatened" under the Endangered Species Act. This Chinook
 population was officially listed in March 1999. The listing of Chinook as threatened
 triggered a requirement for consultations with the National Marine Fisheries Service on
 any activity requiring a federal permit, relying on federal funds, or being sponsored by a
 federal agency.

1660 Since that listing, several other aquatic species present in King County have been listed 1661 as threatened, including two additional salmonids: bull trout in November 1999, and 1662 steelhead in May 2007. Coho salmon are considered a Species of Concern. Puget 1663 Sound's southern resident Orca, which rely almost solely on Chinook salmon as a food 1664 source, were also listed under the Endangered Species Act as endangered in 1665 November 2005.)) Over the last twenty years, several species connected to King County's streams and rivers have become listed under the Endangered Species Act. 1666 Threatened species include Chinook salmon, bull trout, and steelhead, and Southern 1667 1668 Resident orca are listed as endangered. The listing of Chinook salmon and Southern 1669 Resident orca are related to one another, as Southern Resident orca rely heavily on 1670 Chinook as a primary food source. The listings trigger requirements for consultations 1671 with the National Marine Fisheries Service on any activity requiring a federal permit, 1672 relying on federal funds, or being sponsored by a federal agency.

1673 1674 The National Marine Fisheries Service and the U.S. Fish and Wildlife Service have also 1675 issued rules describing regulations deemed necessary to conserve Puget Sound 1676 Chinook and steelhead, as well as other threatened West Coast salmonids. ((These 1677 rules, commonly referred to as "4(d) rules," legally establish the protective measures 1678 that are necessary to provide for conservation of a listed species. These rules also make 1679 it a violation of the Endangered Species Act for any person, government, or other entity 1680 to "take" a threatened species. Prohibited "take" under the Endangered Species Act 1681 includes harm through significant habitat modification or degradation where it actually 1682 kills or injures wildlife by significantly impairing essential behavioral patterns, including 1683 breeding, feeding, spawning, rearing, migrating or sheltering.

The 4(d) rule for Chinook and steelhead also establishes conditions or limits under
 which certain categories of activities that may result in "take" may be conducted. King
 County takes actions under the conditions established for two categories of activity:
 routine road maintenance and habitat restoration projects funded by the State Salmon
 Recovery Funding Board:))

1691 Final Endangered Species Act Recovery Plans have been developed for Puget Sound 1692 Chinook (2007) ((and)), bull trout (((2004)) 2015), and Puget Sound steelhead (2019). A 1693 final Recovery Plan for ((Orca whales)) orca was published in 2008. These plans 1694 describe recovery goals for the species, specific measures to address the factors that 1695 are limiting the health of the species, and timeframes and cost estimates for recovery 1696 measures. Conservation actions identified in Water Resource Inventory Area salmon 1697 recovery plans for King County watersheds are now being implemented subject to 1698 available funding and are anticipated to contribute significantly to the achievement of 1699 recovery goals for these species and their eventual removal from the Endangered 1700 Species list.

1701

1684

1659

1702 Many of the $((\tau))$ <u>C</u>ounty's ((functional)) plans, programs, and development regulations 1703 assist in the ((c))County's effort to conserve and recover Endangered Species Act listed 1704 species. These include the code provisions governing zoning, critical areas, clearing 1705 and grading, landscaping, and the shoreline master program. County ((plans)) 1706 documents guiding operations and regulations include the Surface Water Design 1707 Manual, the ((f))Elood ((f))Hazard ((f))Management ((f))Plan, and ((f))Regional1708 $((\mathbf{w}))$ Wastewater $((\mathbf{s}))$ Services $((\mathbf{p}))$ Plan. Finally, the $((\mathbf{c}))$ County's reliance on best 1709 management practices for vegetation management((-)); use of insecticides, herbicides, 1710 and fungicides((, and)); pest management((, as well as for)); and management of 1711 agricultural and forest lands also plays a crucial role in protecting Endangered Species 1712 Act listed species.

1714 ((E-499m)) E-326 King County ((will)) shall monitor and evaluate programs 1715 and regulations to determine their effectiveness in contributing to 1716 Endangered Species Act listed species conservation and recovery, and 1717 ((will)) shall update and enhance programs and plans as necessary. 1718 King County should amend regulations, plans, and best management 1719 practices to enhance their effectiveness in protecting and restoring 1720 ((salmonid)) habitat, using a variety of resources, including best available science as defined in <u>Chapter 365-195</u> Washington 1721 1722 Administrative Code ((365-195-905 through 365-195-925)).

The importance of designating seasonal ranges and habitat elements where federaland state_listed endangered, threatened, and sensitive species have a primary association is that these areas, if altered, may reduce the likelihood that the species will survive over the long term. The state recommends that King County and other local jurisdictions identify and classify these areas.

((E-434)) E-327 Habitats for species that have been identified as endangered, threatened, or sensitive by the state or federal government shall not be degraded or reduced in size and ((should)) shall be ((conserved)) preserved and protected.

1735 ((E-499p King County shall, in cooperation with the cities, ensure a no net loss of housing capacity that preserves the ability to accommodate adopted growth targets, while pursuing compliance with Endangered Species Act requirements. To achieve this goal, densities shall be increased on buildable lands, consistent with H-110.

1740 b.)) 2. Species and Habitats of Local Importance

1713

1723

1729

1741 Federal and state listings of species as endangered or threatened often encompass 1742 relatively large geographic areas. More localized declines of species within King 1743 County may not be captured by state and federal listings. For example, local monitoring 1744 data indicate the extinction of the ((Early)) Lake Sammamish Kokanee <u>Early</u> run, ((likely)) possible extinction or significant decline of the ((Middle)) Lake ((Sammamish)) 1745 1746 Washington Kokanee ((salmon)) Middle run, and a significant decline in the ((Late)) Lake 1747 Sammamish Kokanee ((salmon)) Late run((s)). ((In 2000, a petition to list just the Early 1748 run was filed with the U.S. Fish and Wildlife Service, but by 2003 the run went extinct 1749 without any federal action to prevent that result. In 2007, a second petition was filed to 1750 list all remaining Lake Sammamish kokanee. This petition led to an official review of the 1751 population's status by the U.S. Fish and Wildlife Service.

1752
1753 On September 30, 2011, the U.S. Fish and Wildlife Service concluded that kokanee and
1754 sockeye throughout the Pacific Northwest should be considered together in their listing
1755 determination and therefore declined to list this unique kokanee population. However,
1756 King County believes the c))Conservation of local native kokanee salmon and its
1757 watershed habitat ((to be)) is important to the quality of life and natural heritage of the

1758 region's residents. ((Towards that end t))Ihe County maintains strong collaborative 1759 relationships with the watershed cities, the U.S. Fish and Wildlife Service, Washington 1760 Department of Fish and Wildlife, Washington State Parks, the Muckleshoot Tribe, the 1761 Snoqualmie Tribe, Trout Unlimited. Long Live the Kings, and additional governmental and non-governmental organizations, schools, watershed residents, and other key 1762 1763 contributors. Together these partners work to: improve kokanee salmon habitat, 1764 including Lake Sammamish, tributary streams, and contributing watershed areas; 1765 conduct research((,)); educate local residents and businesses((,)); and support an 1766 artificial propagation program at the Issaguah Salmon Hatchery and the Long Live the 1767 Kings hatcheries to increase the viability of the kokanee population.

1768

1769 King County defines Species of Local Importance as those species that are of local 1770 concern primarily because of their population status or their sensitivity to habitat 1771 manipulation. The ((-)) county takes into consideration native species named as priority 1772 species by the Washington Department of Fish and Wildlife; anadromous salmonids; 1773 aquatic species whose populations are particularly vulnerable to changes in water 1774 guality and guantity; species whose habitat or mobility is limited (local populations of 1775 species that are immobile or have very limited habitat); and species that can be directly 1776 impacted by King County (for example, where road projects or other infrastructure 1777 development can impact habitat; where the ((c)) county may acquire, protect, or restore 1778 certain habitat types). King County Species of Local Importance are identified so that 1779 they and their habitats may be considered during land use planning and protected 1780 during project implementation and development. Habitats for Species of Local 1781 Importance are designated as a type of Fish and Wildlife Habitat Conservation Area and 1782 are covered by policies and regulations designed to protect those areas. However, 1783 individual animals or plants may also be at risk of injury from development or during 1784 construction or other changes to the landscape and may require additional measures to 1785 protect them from injury. For example, freshwater mussels may be protected from an 1786 instream project by relocating individual animals so they are not injured or killed during 1787 construction. Or, a rare individual plant may require the protection of an area of land 1788 because the plant cannot be relocated.

((E-435)) <u>E-328</u> King County designates the following to be Species of Local Importance:

Olympic mudminnow;

1793	
1794

Waterfowl Concentrations (Anatidae excluding Canada Geese in 1822 urban areas); and 1823 ii. Western Washington nonbreeding concentrations of plovers 1824 (Charadriidae), sandpipers; 1825 Mammals - American marten, ((mink, Columbian black-tailed f. 1826 deer,)) Wolverine, Fisher, Gray wolf, Cascade red fox, Douglas 1827 squirrel, Northern flying squirrel, Townsend's chipmunk, Hoary 1828 marmot, Roosevelt ((E))elk ((in their historic range)), mountain 1829 goat, Pika, Townsend's big-eared bat, roosting concentrations of 1830 Big-brown bat, Pallid bats, and Myotis bats, Killer whale (Orca), 1831 Gray whale, Dall's and Harbor porpoise, Harbor seal, Stellar sea 1832 lions, and concentrations of California sea lions; 1833 g. Amphibians - Red-legged frog, Larch Mountain salamander, 1834 Oregon spotted frog, and Western toad; 1835 h. Reptiles - Western fence lizard and Northwestern pond turtle; 1836 i. Rare Plants - ((bristly sedge; Canadian St. John's-wort; clubmoss 1837 cassiope; Oregon goldenaster; toothed wood fern; Vancouver 1838 ground-cone; and white-top aster)) Tall bugbane, Triangular-lobed 1839 moonwort, Western moonwort, Stalked moonwort, Harvest 1840 brodiaea Alaska harebell, Few-flowered sedge, Long-styled sedge, 1841 Clubmoss mountain-heather, Golden paintbrush, Weak thistle, 1842 Spleenwort-leaved goldthread, Tree clubmoss, Spotted Joe-pye 1843 weed, Kamchatka fritillary, Swamp gentian, Oregon goldenweed, 1844 Large St. Johns'-wort, Pacific peavine, Water lobelia, Northern bog 1845 clubmoss, One-cone clubmoss, White meconella, Branched montia, 1846 Old field blue toadflax, Brewer's cliffbrake, Whitebark pine, 1847 Choriso's bog-orchid, Columbia white-topped aster, and Flat-1848 leaved bladderwort; and 1849 ((High-quality ecological communities - Douglas-fir - Pacific j. 1850 Madrone / Salal; Douglas-fir - Western Hemlock / Swordfern; 1851 Forested Sphagnum Bog PTN, Low Elevation Freshwater Wetland 1852 PTN, North Pacific Herbaceous Bald and Bluff, Red Alder Forest; 1853 Western Hemlock - (Western Redcedar) / Bog Labrador-tea / 1854 Sphagnum Spp.; Western Hemlock - (Western Redcedar) / 1855 Devil's-club / Swordfern; Western Hemlock - (Western Redcedar) / 1856 Sphagnum Spp.; Western Hemlock / Swordfern - Foamflower; 1857 Western Redcedar- Western Hemlock / Skunkcabbage; and Willow 1858 Spp. Shrubland [Provisional]).)) Other invertebrates - Blue gray 1859 taildropper, Hatch's click beetle, Beller's ground beetle, Pacific 1860 clubtail, Western bumblebee, Johnson's hairstreak, and Valley 1861 silverspot. 1862 1863

((E-436)) E-329 King County shall protect Species of Local Importance through measures such as regulations, incentives, capital projects, or purchase, as appropriate.

1867 Caves, cliffs, and talus (a sloping mass of rocky fragments at the base of a cliff) occupy a 1868 very small percent of the total land area, yet they are disproportionately important as 1869 wildlife habitats. The same is true for sphagnum-dominated peat bogs, Oregon white 1870 oak woodlands, herbaceous balds, Westside prairie, old((=))_growth forest, and snag 1871 -rich areas, which have all declined as a result of development. Each of these habitats 1872 concentrates and supports a unique plant and animal community. Plant associations 1873 adjacent to caves, cliff, and talus are important because they help stabilize light and 1874 wind patterns, and as with snag -rich areas, they provide perches for raptors. Caves, 1875 cliffs, talus, Oregon white oak woodlands, herbaceous balds, Westside prairie, and

1876	sphagnum-dominated peat bogs are fragile environments that can be easily destroyed,
1877	but cannot be easily restored <u>.</u>
1878	
1879	((E-437)) <u>E-330</u> King County shall designate the following to be Habitats of Local
1880	Importance:
1881	a. Caves;
1882	b. Cliffs;
1883	c. ((Talus)) <u>Herbaceous balds</u> ;
1884	d. Old-growth forest;
1885	e. ((Sphagnum-dominated peat bogs; and)) <u>Oregon white oak</u>
1886	woodlands;
1887	f. Snag-rich areas;
1888	g. Sphagnum-dominated peat bogs;
1889	h. Talus; and
1890	i. Westside prairie.
1891	
1892	The federal and state governments also designate "candidate" species. In the context of
1893	the Endangered Species Act, candidate means any species being considered for listing
1894	as an endangered or a threatened species but not yet the subject of a proposed rule.
1895	Lists of federal candidate species are updated annually. Review of these lists and the
1896	supporting assessments can provide valuable information about threats to species
1897	found within King County and can help the $((c))$ County to be proactive in preparing for
1898	potential future listings.
1899	potential luture listings.
1900	((E-438)) <u>E-331</u> King County should review federal and state candidate listings for
1901	information about candidate species that are under consideration for
1902	listing as an endangered or threatened species and found in King
1903	County. King County shall protect habitat for candidate species, as
1904	listed by the Washington Department of Fish and Wildlife or a federal
1905	agency. Information regarding candidate species should be used to
1906	inform King County's long-term wildlife conservation and planning
1907	efforts.
1908	
1909	((E-439)) <u>E-332</u> King County shall review fish and wildlife surveys and assessments
1910	with local application to King County and consider additional habitat
1911	protections where warranted. Habitat protection should be
1912	accomplished through incentives, cooperative planning, education,
1913	habitat acquisition, habitat restoration, or other appropriate actions
1914	based on best available science.
1915	
1916	((E-440)) <u>E-333</u> King County should regularly review the Washington Department
1917	of Fish and Wildlife's list of Priority Species and other scientific
1918	information on species of local importance, and evaluate whether any
1919	species should be added to or deleted from the lists in policies
1920	E-((435)) <u>328</u> and E-((437)) <u>330</u> . Any additions or deletions ((should))
1921	<u>may</u> be made through the annual update.
1922	
1923	((E-441)) <u>E-334</u> Development proposals shall be assessed for the presence of King
1924	County Species of Local Importance. A comprehensive assessment
1925	should follow a standard procedure or guidelines and shall occur one
1926	time during the development review process.
1927	3. Salmon
1020	Salmon are particularly important because of their significance to least and regional
1928 1929	Salmon are particularly important because of their significance to local and regional character, Indian tribes, salt and freshwater ecosystems, and recreational and

character, <u>Indian</u> tribes, salt and freshwater ecosystems, and recreational and
commercial fisheries. A growing number of salmon stocks within King County and other
areas of Puget Sound are in a serious state of decline. Three salmonid species present
within King County have been listed under the Endangered Species Act, several others

- have significant potential for listing, and the salmon-dependent ((Orca whale)) orca has
 been listed as endangered.
- 1935

1976

1984

The protection and restoration of river and stream channels, riparian ((corridors)) <u>areas</u>, lakes, wetlands, headwaters and watersheds, and marine nearshore habitats that provide or impact spawning and rearing habitat, food resources, and fish passage is essential to the conservation of native fish populations. Intermittent streams also can be critical to native fish populations.

Hatcheries and other artificial propagation facilities that are properly managed to
protect the abundance, productivity, genetic diversity, and spatial distribution of native
salmon may contribute in the near term to both maintaining sustainable salmon stocks
and harvest opportunities while habitat protection and restoration measures for salmon
are implemented.

- 1948 ((E-442)) E-335 King County should conserve and restore salmonid habitats by 1949 ensuring that land use and facility plans (transportation, water, sewer, 1950 electricity, gas) include riparian and stream habitat conservation 1951 measures developed by the ((c))County, ((cities,)) Indian tribes, cities, 1952 service providers, and state and federal agencies. Project review of 1953 development proposals within basins that contain hatcheries and other 1954 artificial propagation facilities that are managed to protect the 1955 abundance, productivity, genetic diversity, and spatial distribution of 1956 native salmon and provide harvest opportunities should consider 1957 significant adverse impacts to those facilities. 1958
- 1959 ((E. Watershed-Based Salmon Recovery))

The protection and recovery of salmonid species that are listed under the Endangered Species Act and encompassed by <u>Indian</u> tribal treaty rights are and will continue to be a significant priority for King County. The listing of a species under the Endangered Species Act and decline of <u>Indian</u> tribal treaty right protected species are cause for great concern, because wild Pacific salmon have great environmental, cultural, economic, nutritional, recreational, and symbolic importance to local communities, in particular <u>Indian</u> tribal communities, in the entire Puget Sound region.

1968 It is King County's goal to ensure the recovery and maintenance of salmon populations 1969 to sustainable and harvestable levels, and to accrue the ecological, cultural, economic, and local food supply benefits that will be provided by healthy salmon stocks. King 1970 1971 County ((will)) pursues salmon conservation strategies that sustain the region's vibrant 1972 economy. Successful restoration and maintenance of healthy salmon populations ((will)) 1973 requires time, money, and effort, and collaboration with Indian tribal, federal, state, 1974 ((tribal)) and local governments, as well as businesses, environmental groups, and 1975 residents.

 1977 ((The increasing number and diversity of Endangered Species Act federally protected species in King County and around the Puget Sound calls for the development and implementation of species conservation actions that are embedded within a strategy that addresses natural resource management issues at the ecosystem scale. Although species are listed one at a time, managing them toward recovery and robust health that way increases the likelihood that conservation efforts will be incomplete, redundant, and more expensive.

 1985 ((More detailed policies related to reducing greenhouse gas emissions and improving 1986 air quality can be found in Section II of this chapter, Chapter 8: Transportation, and 1987 Chapter 9: Services, Facilities and Utilities.))
 1988

1989 In accordance with new statutory requirements, ((as described in Chapter 9, Services, Facilities and Utilities,)) the Department of Ecology has established a Watershed 1990 1991 Restoration and Enhancement Committee in all five Watershed Resource Inventory Areas located either entirely or partially within King County. King County is 1992 1993 participating in the Ecology process of developing a flow restoration strategy for each of 1994 the Watershed Resource Inventory Areas to mitigate the consumptive use of new 1995 permit-exempt wells drilled in the next 20 years. ((The flow restoration strategies are 1996 anticipated to be recommended by 2021.)) As of 2024, Ecology has adopted 1997 streamflow restoration plans for Water Resource Inventory Area 9 (the Green/Duwamish Watershed), and Water Resource Inventory Area 10 (the White/Puyallup Watershed). 1998 1999 The streamflow restoration committees for Water Resource Inventory Area 7 (the Snohomish/Snoqualmie/Skykomish Watershed), Water Resource Inventory Area 8 2000 2001 (Cedar/Sammamish Watershed), and Water Resource Inventory Area 15 (Kitsap) did not 2002 reach agreement by all members to complete their planning process. Ecology has completed these plans and forwarded them to the Salmon Recovery Funding Board for 2003 2004 technical review after which they may amend and adopt the plans. Ecology will initiate 2005 rulemaking within six months of plan adoption. 2006

((As a means to address salmonid listings and to sustain this precious resource for generations to come, I))Local governments in the Puget Sound region, in cooperation with ((state and)) Indian tribal governments, the state, and other ((major stakeholders)) partners, have developed long-term salmon habitat conservation strategies at the Watershed Resource Inventory Area level. The boundaries of Water Resource Inventory Areas are defined under state regulations, and generally adhere to the watershed boundaries of major river or lake systems.

2015 King County participated as an affected jurisdiction in the development Water Resource 2016 Inventory Area plans for Water Resource Inventory Area 8 (Cedar/Sammamish 2017 Watershed), Water Resource Inventory Area 9 (the Green/Duwamish Watershed), Water 2018 Resource Inventory Area 7 (the Snohomish/Snoqualmie/Skykomish Watershed), about 2019 half of which is in King County, and Water Resource Inventory Area 10 (the White/Puyallup Watershed), a small percentage of which is in King County. 2020 2021 Additionally, King County has acted as a service provider at the direction of 2022 multi-jurisdictional forums for the development and implementation of the salmon 2023 recovery plans for Water Resource Inventory Areas 8 and 9, and for the King County 2024 portion of Water Resource Inventory Area 7.

2025 2026 ((E-499j)) E-336 King County shall continue to participate in the Water Resource 2027 Inventory Area salmon recovery plan implementation efforts and in 2028 other regional efforts to recover salmon and the ecosystems they 2029 depend on, such as the Puget Sound Partnership. King County's 2030 participation in planning and implementation efforts shall be guided by 2031 the following principles: 2032 a. Focus on federally listed salmonid species and declining stocks 2033 protected under Indian tribal treaty rights first, then take an 2034 ecosystem approach to habitat management and seek to address 2035 management needs for other species over time; 2036 b. Concurrently work on early actions((,)) and long-term projects and 2037 programs that will lead to improvements to, and information on, 2038 habitat conditions in King County that can enable the recovery of 2039 endangered or threatened salmonids, while maintaining the 2040 economic vitality and strength of the region; 2041 c. Address both King County's growth management needs and 2042 habitat conservation needs; 2043 d. Use best available science as defined in Chapter 365-195 2044 Administrative Code ((365-195-905 through Washington 2045 365-195-925));

2046	e. Improve water quality, water quantity, and channel characteristics;
2047	and
2048	f. ((Coordinate with key decision-makers and stakeholders; and
2049	g.))Develop, implement, and evaluate actions within a watershed-
2050	based program of data collection and analysis that documents the
2051	level of effectiveness of specific actions and provides information
2052	for adaptation of salmon conservation and recovery strategies.
2052	for adaptation of samon conservation and recovery stategies.
2054	((The Water Resource Inventory Area plans recommend an array of actions including the
2055	restoration, acquisition and preservation of landscapes, municipal programmatic
2056	activities, and public outreach and education. The plans suggest that programmatic
2057	activities for salmon habitat conservation can generally be accomplished with the
2058	following three tools: regulation, incentives and education. Consequently, in addition
2059	to capital projects, local governments including King County will need to incorporate
2060	salmon recovery objectives and strategies into their normal operations, making best use
2060	
	of a wide range of their authorities and programs.
2062	
2063	E-103)) E-337 King County should coordinate with <u>Indian tribes,</u> local
2064	jurisdictions, universities, federal and state agencies, ((tribes,)) special
2065	interest groups, special districts, businesses, and residents to
2066	implement, monitor, and update Water Resource Inventory Area
2067	salmon recovery plans for all areas of King County.
2068	
2069	((E-499k)) <u>E-338</u> King County should use the recommendations of approved Water
2070	Resource Inventory Area salmon recovery plans and other watershed
2071	planning efforts to inform ((the)) establishment of Fish and Wildlife
2072	Habitat Conservation Areas, updates to development regulations,
2073	establishment of incentive programs, and ((as well as)) operations and
2073	capital planning for its <u>floodplain management</u> , fish passage, surface
2075	water management, transportation, wastewater treatment, parks, and
2075	open space programs.
2070	open space programs.
2078	((E-4991)) E-339 King County should seek to support Water Resource Inventory Area
2079	salmon recovery plan goals of maintaining intact natural landscapes
2080	through:
2081	a. ((Retaining low density land use designations such as Agriculture,
2082	Forestry and Rural Area designations;
2083	b.)) Promoting Current Use Taxation and other incentives;
2084	((c.)) <u>b.</u> Promoting stewardship programs including development
2085	and implementation of Forest Plans((,)) <u>and</u> Farm Plans((, and Rural
2086	Stewardship Plans)); and
2087	((d. Promoting the use of Low Impact Development methods; and
2088	e.)) <u>c.</u> Acquiring property or conservation easements in areas of
2089	high ecological importance with unique or otherwise significant
2090	habitat values.
2091	
2092	((E-499n Through the Watershed Resource Inventory Area planning process,
2093	geographic areas vital to the conservation and recovery of listed
2094	salmon species are identified. King County will evaluate this
2095	information to determine appropriate short and long-term strategies,
2096	including, but not limited to: designation of Fish and Wildlife Habitat
2097	Conservation Areas, development regulations (special district overlays,
2098	zoning, etc.), acquisitions, facility maintenance programs, and capital
2098	improvement projects.
2077	
2100	

E-499o)) E-340 King County may use its authority under the Growth Management Act, including its authority to designate and protect critical areas, such as fish and wildlife habitat conservation areas, to preserve and protect key habitat for listed salmonid species by developing and implementing development regulations and nonregulatory programs.

2107 Local governments primarily have authority and influence over land use actions 2108 affecting habitat. However, protecting and restoring habitat is just one piece of the 2109 salmon recovery puzzle. Management of fish harvest, hatchery, hydropower, and water 2110 storage actions is also critical, and actions need to be coordinated with entities having 2111 authority in these areas.

2113 ((E499q)) E-341 King County should continue to take actions that ensure its habitat 2114 restoration and protection actions are implemented as part of a 2115 watershed-based salmon conservation strategy that integrates habitat 2116 actions with actions taken by harvest and hatchery managers. Harvest 2117 and hatchery managers specifically include Indian tribes, the 2118 Washington Department of Fish and Wildlife, the National Marine 2119 Fisheries Service, and the U.S. Fish and Wildlife Service. Appropriate 2120 venues for this coordination include watershed plan implementation 2121 groups and other local or regional salmon management entities that 2122 rely on actions by habitat, harvest, and hatchery managers to achieve 2123 specific goals and objectives. 2124

((To ensure the long-term success of salmon recovery actions, King County will need to develop and implement a program that provides for monitoring the effectiveness of recovery actions and the status and trends of priority fish populations and habitat conditions. Both types of monitoring provide valuable information to redirect and adapt salmonid recovery strategies and actions over time. Please see the Monitoring and Adaptive Management Section at the end of this chapter for policies related to this topic.))

2133 In planning for climate change, it will be increasingly important to provide for habitat 2134 connectivity not only across jurisdictional boundaries, but also across a range of 2135 environmental gradients. ((As the "Washington State Integrated Climate Change 2136 Response Strategy" explains:)) Habitat connectivity is ((expected)) anticipated to allow species and ecosystems to ((better withstand)) adapt to a changing climate ((change)) 2137 2138 by allowing ((them)) species to follow changes in climate across the landscape and 2139 maintain critical ecological processes such as dispersal and gene flow. ((In general, it is 2140 much costlier and more difficult to restore connectivity than to maintain existing 2141 connectivity, yet ongoing development rapidly removes this opportunity. Planning for 2142 habitat connectivity in the near term will be far more economical the sooner it is 2143 implemented.))

2145 King County's Fish Passage Restoration Program is an example of prioritizing 2146 investments in habitat restoration with a focus on restoring habitat connectivity. The program has surveyed more than 3,000 potential blockages to salmon migration up 2147 2148 streams and prioritized 50 barrier locations where restoration of fish passage would open half of historically connected habitat blocked by County-owned barriers. The 2149 2150 County-owned barriers occur mixed with fish passage barriers owned by other 2151 municipalities and landowners. Coordination with other barrier owners to address 2152 nearby barriers will maximize the habitat benefits of restoring fish passage in county 2153 waterways. 2154

2144

2155 ((Additional medium- and long-term strategies identified in the "Washington State
 2156 Integrated Climate Change Response Strategy" that are appropriate for the County to
 2157 consider when planning for connectivity include:

2158	<mark>●—_td</mark>	entifying and designating areas most suitable for core habitat and
2159	cc	onnectivity in view of a changing climate.
2160	<mark>●——Pr</mark>	otecting and restoring areas most suitable for current core habitat, likely
2161		ture core habitat, and connections between them.
2162		otecting and re-establishing connectivity of rivers and their floodplains.
2163		djusting the size and boundaries of conservation areas (parks and natural
2164		eas) to accommodate anticipated shifts in habitat and species' ranges.
2165		djusting land use designations in important connectivity areas (for example,
2166		lowable density).
2167	●—_ Fa	cilitating inland migration of marine shoreline habitats.
2168		
2169		i ty is addressed further below, as the Wildlife Habitat Network is a designated
2170	Fish and W	/ildlife Habitat Conservation Area.))
2171		
2172	E-342	King County shall work with non-governmental organizations and
2173		regulatory agencies to accelerate removal of barriers to fish passage
2174		and shall:
2175		a. Seek opportunities to accelerate permitting and project
2176		implementation;
2177		b. Explore all mechanisms available to remove barriers and restore
2178		salmon access to the most and highest quality habitat as quickly as
2179		possible; and
2180		c. Aggressively seek funding for projects to remove barriers.
2181		
04.00	<i></i>	
2182	((L-465)) <u>E</u>	<u>-343</u> King County should use the information from local and regional
2183		water ((supply planning processes)) <u>comprehensive plans</u> to enhance
2184		the county's water resource protection and planning efforts, including
2185		implementation of Water Resource Inventory Area salmon recovery
2186		plans.
2187		
2188	((E-466)) <u>E</u>	<u>-344</u> ((As watershed plans are developed and implemented, zoning,
2189		regulations and incentive programs may be developed, applied and
2190		monitored so that critical habitat in King County watersheds is capable
2191		of supporting sustainable and fishable salmonid populations.))
2192		Watershed-based plans should define how the natural functions and
2193		values of watersheds critical to salmonids are protected so that the
2194		quantity and quality of water and sediment entering the streams, lakes,
2195		wetlands and rivers can support salmonid spawning, rearing, resting,
2196		and migration.
2197		
2198	((E-467	Responsibility for the costs of watershed planning and project
2199		implementation, including water quality, groundwater protection, and
2200		fisheries habitat protection, should be shared between King County
2201		and other jurisdictions within a watershed.))
2202		
2203		nty contains a number of wetlands, <u>floodplains</u> , lakes, and river and stream
2204		nat are important to the viability of fish and wildlife populations and are
2205		considered biological, social and economic resources. Some ((resource))
2206	areas((, inc	Huding Regionally Significant Resource Areas and Locally Significant Resource
2207	Areas, wer	re previously)) <u>have been</u> identified ((through basin plans and other resource
2208		efforts. Additional)) <u>as</u> high-priority habitat areas ((have been identified))

2212		buffers along wetlands and streams under the ((Critical Areas Ordinance))
2212		ty Code. Protection and restoration of connections between rivers and their
2213 2214		
		s is increasingly recognized as a priority element of salmon recovery and
2215	climate res	siliency efforts.

2216

2223

These areas contribute to the resource base of the entire Puget Sound region by virtue of exceptional species and habitat diversity and abundance when compared to basins of similar size and structure elsewhere in the region. These areas may also support rare, endangered, or sensitive species, including Endangered Species Act-listed salmonids. They also provide wetland, lake, and stream habitat that is important for wildlife and salmonid diversity and abundance within the basin.

2224 The Puget Sound region has responded commendably to the listing of Puget Sound 2225 Chinook. In King County, more than 40 jurisdictions have joined together to 2226 cooperatively lead salmon recovery in the $((-))_{county}$'s watersheds. In the $((-))_{county}$ 2227 years since the plans were adopted (2006_-((2015)) 2022), King County has 2228 implemented ((65)) 80 priority salmon-restoration capital projects within its jurisdiction 2229 ((and has initiated work on an additional 33)) in addition to dozens of small habitat 2230 projects, such riparian restoration on private lands. King County has identified nearly 100 additional capital projects for future implementation. ((Im)) Since 2011, ((NMFS)) the 2231 2232 National Marine Fisheries Service has conducted ((a)) several five-year assessments of 2233 progress to implement the Puget Sound Salmon Recovery Plan. The assessments have 2234 repeatedly concluded that good habitat projects are being implemented across Puget 2235 Sound, but that the pace of salmon recovery implementation is too slow, primarily due 2236 to insufficient funding. This is true in King County as well, though in recent years the 2237 County has developed significant additional sources of local revenue to advance 2238 restoration. ((The salmon recovery plans for the Snoqualmie portion of WRIA 7, WRIA 8 2239 and WRIA 9 hit their ten year mark in 2015.)) King County has renewed interlocal 2240 agreements with its ((43)) 44 jurisdictional partners to continue to fund salmon recovery 2241 coordination in those watersheds ((for the next decade)) through at least 2025, with the 2242 expectation of renewal for another 10 years beyond that date. 2243

- 2244 Key conclusions and recommendations from the five-year assessments ((completed in 2245 2011)) include:
- Habitat continues to decline, and the region needs to increase its scrutiny of the sources of habitat decline and the tools used to protect habitat sites and ecosystem process.
- Habitat protection needs improvement, and salmon recovery lead entities and regional groups should advocate for stronger regulatory programs to protect habitat.
- While extensive habitat work has taken place across King County and in the broader
 Puget Sound, funding has fallen well short of the need as identified in the work
 plans that have been developed in each watershed. Moreover, most sources only
 fund on-the-ground projects rather than the staffing that is needed to plan and
 coordinate overall recovery efforts.
- 2257

((

- Adaptive Management Plans are not completed: A process should be established to recognize changes that are being made to Recovery Plan strategies as implementation proceeds.))
- 2261

Although Water Resource Inventory Area plans are Chinook salmon-focused, they are expected to also provide the basis for recovery planning for other listed aquatic species, including ((Orcas)) orca, steelhead and bull trout.

2265 ((5. Puget Sound Partnership))

The Puget Sound Partnership ((was created by the Washington State Legislature and Governor in July 2007 to achieve the recovery of the Puget Sound ecosystem by the year 2020. Its goal is)) works to consolidate and significantly strengthen the federal, state, local, and private efforts undertaken to date to protect and restore the health of

2270 Puget Sound and its watersheds((. The Puget Sound Partnership also)), and serves as an 2271 umbrella group for salmon recovery efforts in Puget Sound, including implementation 2272 of salmon recovery plans prepared for Chinook salmon. King County, through its land 2273 use decisions, management of stormwater and wastewater discharges, development of 2274 recycled water supplies, cooperative habitat protection and restoration projects, work in 2275 flood risk reduction, salmon recovery, support for agricultural and natural land 2276 protection, actions to address climate change, and ongoing environmental monitoring, 2277 is actively involved in the conservation and recovery of Puget Sound. ((King County has 2278 the opportunity, and responsibility, to make significant contributions to protecting and 2279 restoring Puget Sound. The Puget Sound Partnership's 2018-2020 Action Agenda for 2280 Puget Sound was revised in 2012, 2014, 2016, and 2018, focusing on three Strategic 2281 Initiatives: protecting and restoring habitat, preventing pollution from stormwater, and 2282 recovering shellfish beds.

 2284
 E-113)) E-345
 King County should actively participate in updating and implementing the Puget Sound Partnership's Action Agenda, through the following Local Integrating Organizations: Puyallup-White River;

 2287
 South Central Action Area Stillaguamish; and West Sound Partners for Ecosystem Recovery ((Local Integrating Organizations, consistent with King County goals)).

2300 ((The Puget Sound Partnership maintains a Strategic Science Plan and Biennial Science 2301 Work Plan which provide an overall framework for development and coordination of 2302 specific science activities necessary to support Puget Sound ecosystem protection and 2303 restoration under the Partnership's Action Agenda. The Puget Sound Partnership also organizes the Puget Sound Ecosystem Monitoring Program, a collaborative effort to 2304 2305 improve communication and data sharing among the many monitoring programs 2306 operating in Puget Sound, with the goal of assessing progress towards recovery of the 2307 health of the Sound. King County actively participates in the Ecosystem Monitoring 2308 Program. 2309

- E-115)) E-348 King County should identify opportunities for coordinating its
 existing monitoring programs with monitoring and assessment work
 conducted through the Puget Sound Ecosystem Monitoring Program,
 the Puget Sound Partnership's Strategic Science Plan, and the Puget
 Sound Partnership's Biennial Science Work Plan.
- 2316 ((E-706 King County should work with other Water Resource Inventory Area 2317 salmon recovery plan partners to establish a program (framework and 2318 methodology) for monitoring project specific and cumulative 2319 effectiveness of King County salmonid recovery actions. This program 2320 should include data collection and analysis and should provide 2321 information to guide an adaptive management approach to salmonid 2322 recovery. 2323

King County shall continue to coordinate with other governments, 2324 E-707 2325 agencies, tribes, non-governmental organizations and others to 2326 develop and implement regional and watershed-based Monitoring and 2327 Adaptive Management programs focused on achieving salmon 2328 recovery goals. The programs shall continue to include monitoring of 2329 salmon populations and habitat status and trends over time in order for 2330 the county and its partners in salmon recovery to be able to access the 2331 overall trajectory of salmon recovery efforts.))

2332 ((h. Non-Native)) <u>4. Invasive Species and Noxious Weeds</u>

2333 Non((-))native species are often invasive because they did not evolve as part of the 2334 ecosystem and therefore do not have natural controls or competition. These species 2335 may be terrestrial, freshwater, or marine. Invasive species can create costly 2336 maintenance problems for both public and private landowners. ((Noxious and invasive 2337 weeds)) Invasive plant and animal species pose threats to the environmental health of all 2338 landscapes in King County, including natural, agricultural, wildlife, wetland, stream, and 2339 recreational areas. ((Weeds spread in a variety of ways, including the transport of seeds 2340 or plant parts by vehicles boats, shoes, clothing and animals (including pets, livestock, 2341 wildlife, birds and insects), in soil, gravel and other landscaping and building materials, down watercourses and in floods, by wind, and occasionally through deliberate 2342 2343 introduction by people.)) They alter ecosystems through disrupting food chains, 2344 out-competing native species, and reducing habitat for native wildlife. Invasive species, 2345 including weeds, are widely recognized as having a significant negative impact on 2346 wildlife biodiversity. Invasive plants can also increase the risk of forest fire by acting as 2347 an accelerant for fire (when extremely flammable) and/or by acting as ladder fuels that 2348 carry a fire from ground level to the crown of trees.

2350 ((King County offers technical assistance with identification and removal of non-native 2351 plants through programs, including Forest Stewardship and Naturescaping. The county 2352 also partners with volunteer groups to remove invasive plants from open space and 2353 natural areas. Some non-native species are classified as "noxious" weeds. The King 2354 County Noxious Weed Control Program provides many services to county residents, including: educational materials and workshops, current information on control and 2355 2356 eradication of noxious weeds, support to volunteer and land owner groups, and annual 2357 road-side surveys. In addition, the Noxious Weed Control Program implements the 2358 State Weed Law (Revised Code of Washington chapter 17.10) in the county which 2359 requires all landowners to eradicate Class A noxious weeds and control designated 2360 Class B and county-selected Class C noxious weeds on their properties.

2361 6. Noxious Weeds

2362 Left uncontrolled, n))Noxious weeds can significantly impact public and private land use 2363 in the County. Left uncontrolled, noxious weeds will ultimately undermine many of the 2364 County's environmental goals and initiatives, including the Local Food Initiative, salmon 2365 habitat restoration projects, and the Land Conservation Initiative. The State Noxious 2366 Weed Control Law (Chapter 17.10 Revised Code of Washington ((17.10))) establishes all 2367 property owners' responsibility for preventing and controlling the spread of noxious 2368 weeds. Because plants grow without regard to property lines or political jurisdictions, 2369 everyone's cooperation is needed ((- city gardeners, government land agencies, 2370 foresters, and farmers all have a role to play)). The key to successful noxious weed 2371 control is effective engagement and participation of landowners and communities in the 2372 stewardship of their lands. ((The law spells out these responsibilities and creates the 2373 government infrastructure needed to educate residents and implement regulatory 2374 processes.))

2374

2349

The State Weed Law applies to both private and public lands (except for <u>Indian tribal</u>
 and federal ((and tribal)) lands). King County manages approximately ((4,420)) 4,400

2378 parcels of public land totaling over 36,000 acres. King County also owns or manages 2379 approximately 1,500 linear miles of roads and right_of_way. These lands are managed 2380 by multiple ((ϵ))<u>C</u>ounty agencies, including the King County Departments of Natural 2381 Resources, ((Transportation)) Local Services, and Executive Services. Since weed 2382 infestations can spread from property to property, on both public and private lands, it is 2383 critical that the ((ϵ))<u>C</u>ounty have a coordinated strategy for controlling noxious and 2384 invasive weeds on ((ϵ))<u>C</u>ounty-owned and managed lands.

2386The King Conservation District and the County offer guidance and assistance on use of2387native plants. These plants are more resistant to pests and able to withstand the wet2388winters and dry summers. They can be used for nature-scaping (low-water requirement2389landscapes), wildlife enhancement, erosion control, and beautification. The County also2390establishes a list of "climate-smart plants," which are native plant species currently,2391historically, or prehistorically found within the surrounding ecoregion that are predicted2392to maintain their abundance under climate change.

2470 IV. Water

2471 ((D. Aquatic Resources))

King County's aquatic resources include rivers, streams, lakes, wetlands, groundwater,
and the marine waters of Puget Sound. These resources provide many beneficial
functions, including fish and wildlife habitat; food supplies; flood risk reduction; water
supply for agricultural, commercial, domestic, and industrial use; energy production;
transportation; recreational opportunities; and scenic beauty.

In order to preserve and enhance aquatic resources in King County, they must be
managed as an integrated system together with terrestrial resources, and not as distinct
and separate elements. The hydrologic cycle (the occurrence, distribution, and

- circulation of water in the environment) is the common link among aquatic resourcesand describes their interdependence.
- 2483

2506

2507

2508

2509

2510

2511

2512

2513

2484 Use and modification of water resources and the surrounding terrestrial environment 2485 affects how the hydrologic cycle functions and can cause unintended detrimental 2486 impacts such as flooding, low stream and river flows, reduced groundwater availability, 2487 erosion, degradation of water quality, loss of fish and wildlife habitat, and loss of 2488 archeological and traditional cultural resources that depend upon but do not damage 2489 natural resources. In order to minimize adverse impacts on the water resources of King 2490 County and ensure the continued ability to receive the beneficial uses they provide, the 2491 $((\mathbf{c}))$ County will need to promote responsible land and water resource planning and use. 2492 These beneficial uses include fish and wildlife habitat, flood risk reduction, water quality 2493 control, sediment transport, energy production, transportation; recreational 2494 opportunities, scenic beauty, and water supply for agricultural, municipal, and industrial 2495 purpose.

2496 ((1.))<u>A.</u> Watersheds

2497 A watershed is an area that drains to a common outlet or identifiable water body such as 2498 Puget Sound, a river, stream, lake, or wetland. There are six major watersheds in King County (Cedar/Lake Washington, Green/Duwamish, Puget Sound, South Fork 2499 Skykomish, Snoqualmie, and White) that, in turn, contain numerous smaller catchments 2500 and water bodies. Surface and ground waters are managed most effectively by 2501 understanding and considering potential problems and solutions for an entire 2502 2503 watershed. Because watersheds frequently extend into several jurisdictions, effective 2504 restoration and preservation planning and implementation must be coordinated. 2505

((E-464)) E-401 King County shall protect and should enhance surface waters, including streams, lakes, wetlands, and the marine waters and nearshore areas of Puget Sound, on a watershed basis by analyzing water quantity and quality problems and their impacts to beneficial uses, including fish and wildlife habitat, flood risk reduction, and erosion control. Conditions of and impacts to the downstream receiving marine beaches and waters of Puget Sound shall be included in watershed management efforts.

2514 ((Over the past several years King County has been working cooperatively with many of 2515 the water utilities, local governments, state agencies, _tribes, and other interested 2516 parties in the region to gather data and information to support a regional water supply 2517 planning process. (For more information and specific policies related to regional water 2518 supply planning, please see Chapter 9: Services, Facilities and Utilities). - This 2519 cooperative work includes assessments of current and future water demands and 2520 supplies, potential climate change impacts on water, opportunities for use of recycled 2521 water, and potential improvements to steam flows. These cooperative efforts will 2522 provide valuable information to inform not only water supply planning but also salmon recovery planning and projects. 2523 2524

E-468)) E-402 King County's ((Shoreline Master Program,)) watershed management
 plans, Water Resource Inventory Area salmon recovery plans, flood hazard
 management plans, master drainage plans, open space acquisition plans,
 and critical areas regulations should apply a tiered system of protection
 that affords a higher standard of protection for more significant resources.

((E-463)) E-403 King County shall integrate watershed plans with marine and
 freshwater surface water, flood hazard management, stormwater,
 groundwater, drinking water, wastewater, and recycled water
 planning, as well as federal and state Clean Water Act compliance and
 monitoring and assessment programs, to provide efficient water
 resource management.

2537 ((2.))<u>B</u>. Wetlands

2568

2569

2570

2571

Wetlands are valuable natural resources in King County. They include deep ponds,
shallow marshes and swamps, wet meadows, and bogs. Wetlands comprise forested
and scrub-shrub communities, emergent vegetation, and other lands supporting a
prevalence of plants adapted to saturated soils and varying flooding regimes.
Wetlands, with their highly diverse forms and diffuse distribution, can be particularly
challenging to categorize and manage.

The federal and state governments also have roles in identifying and regulating certain types of wetlands and development activity. $((\frac{1}{10} \text{ order t}))$ o streamline and synchronize regulatory standards for wetlands, the $((\frac{1}{2}))$ outry relies on guidance from the Washington State Department of Ecology, U.S. Army Corps of Engineers Seattle District, and Environmental Protection Agency for wetland identification, delineation, categorization, and, where appropriate, mitigation.

((E-470 King County shall use current manuals and guidance from state and federal governmental agencies and departments to identify, delineate, and categorize wetlands and to establish mitigation requirements for wetlands.

E-471 King County will apply the current scientifically accepted methodology for wetland mitigation based on technical criteria and field indicators. Where appropriate, King County should rely on publications and recommendations from state and federal agencies to ensure King County-approved mitigation will be accepted by state and federal agencies with jurisdiction.

Some wetlands are large and their physical boundaries as well as their functions and values extend beyond individual jurisdictional boundaries.

E-472)) E-404 King County shall ((communicate and coordinate with other jurisdictions and tribes to)) <u>encourage the</u> establish<u>ment</u> <u>of</u> uniform countywide wetlands policies that provide protection of both regionally and locally highly-rated wetlands.

2572 Wetlands are productive biological systems, providing habitat for fish and wildlife. 2573 Wetlands also store flood waters and control runoff, thereby reducing flooding, 2574 downstream erosion, and other damage. Further, wetlands protect water quality by 2575 trapping sediments and absorbing pollutants. They allow rain and snowmelt to infiltrate 2576 into aquifers, recharging them and potentially making that water available for human 2577 use. They discharge groundwater, making it available to plants and animals. Wetlands 2578 store peak flows and discharge to streams in dry periods, thus enabling fish and riparian animal populations to survive. They may serve as outdoor classrooms for scientific 2579 2580 study. Some are used for hiking, hunting, and fishing. These wetland functions and values need consideration from a watershed perspective. Measures to protect wetland 2581 2582 functions and values need to be taken at both the site-specific and watershed scale. In 2583 the $((\underline{u}))\underline{U}$ rban $((\underline{\sigma}))\underline{G}$ rowth $((\underline{\sigma}))\underline{A}$ rea, land use authority is often shared by multiple 2584 jurisdictions at the scale of a drainage basin. Similarly, efforts to protect and restore 2585 wetlands may be sponsored by multiple parties, including local governments. 2586

Buffers are necessary but often insufficient to adequately protect wetland values and
functions especially when wetlands are small and the adjacent watershed large.
Consequently, the location of development in addition to its size is important in
determining its impact on wetland functions and values.

The functions and values of a wetland will change as the surrounding land is altered by development and other human activities, and as local conditions are influenced by climate change. Silviculture, agriculture, and development-related changes in forest cover and impervious surface affect stormwater runoff patterns, flooding, water quality, and wetland hydrology.

2598 ((E-473)) E-405 King County(('s overall goal for the protection of wetlands is)) shall protect wetlands to achieve no net loss of wetland functions and values 2599 2600 within each drainage basin. Acquisition, enhancement, regulations, 2601 and incentive programs shall be used ((independently or in 2602 combination with one another)) to protect and enhance wetland((s)) 2603 functions and values. Watershed management plans, including Water 2604 Resource Inventory Area plans, should be used to coordinate and 2605 inform priorities for acquisition, enhancement, regulations, and 2606 incentive programs within unincorporated King County to achieve the 2607 goal of no net loss of wetland functions and values within each 2608 drainage basin. 2609

((E-474 Development adjacent to wetlands shall be sited such that wetland functions and values are protected, an adequate buffer around the wetlands is provided, and significant adverse impacts to wetlands are prevented.))

2615 The diversity of plants and animals found in wetlands generally far exceeds that found in 2616 terrestrial habitats in the Pacific Northwest. Habitat loss and fragmentation are considered the greatest threats to this native biodiversity. Wetlands in the Urban 2617 2618 Growth Area will experience the largest reduction in the distribution and number of 2619 native animals and plants due to habitat loss and fragmentation. It is anticipated that 2620 climate change will exacerbate the adverse effects of habitat loss and fragmentation by 2621 further reducing existing wetland habitat and altering wetland hydroperiods thereby 2622 increasing the inter-habitat distances and potentially restricting the dispersal and 2623 movement of plants and wildlife between favorable wetlands and habitats. 2624

2625 Protecting wetland biodiversity depends upon supporting the natural processes 2626 (including hydrology, nutrient cycling, and natural disturbances) that shape wetland 2627 habitat, protecting wetlands functions and values from the impacts of adjacent land 2628 uses, maintaining biological linkages, and preventing fragmentation of wetland habitats. 2629 Small wetlands strategically located between other wetlands may provide important 2630 biological links or "stepping stones" between other, higher quality wetlands. Wetlands 2631 adjacent to habitat networks also are especially critical to wildlife because they allow 2632 individual animals to escape danger and populations to inter((-di))sperse and breed. 2633 Wetlands adjacent to habitat networks should receive special consideration in planning 2634 land use. 2635

2636 Many wildlife species require access to both wetlands and adjacent terrestrial lands to 2637 support them at different stages of their lives. For example, many amphibians breed in 2638 the water and need access to terrestrial habitat for feeding and for shelter during the 2639 winter. Fixed-width buffers alone are unlikely to adequately address these needs or 2640 entirely protect wetlands from surrounding human activity. Adjacent and accessible 2641 terrestrial habitat may be too small or fragmented to provide core feeding, 2642 overwintering, and other habitat needs.

2643

2591

2610

2611 2612

2613

2614

((E-476)) E-406 King County should identify upland areas of native vegetation that 2644 2645 connect wetlands to upland habitats and that connect upland habitats 2646 to each other. The ((c)) county should seek protection of these areas 2647 through acquisition, stewardship plans, and incentive programs such as 2648 the Public Benefit Rating System and the Transfer of Development 2649 **Rights Program.** 2650 2651 ((E-477)) <u>E-407</u> The unique hydrologic cycles, soil and water chemistries, and vegetation communities of bogs and fens shall be protected through 2652 2653 the use of incentives, acquisition, best management practices, and 2654 implementation of the King County Surface Water Design Manual to 2655 control and/or treat stormwater within the wetland watershed. 2656 2657 ((E-478)) E-408 Public access to wetlands for traditional cultural, scientific, and 2658 recreational((, and traditional cultural use is desirable, providing that)) 2659 use should be encouraged, if: a. ((p))Public access trails are carefully sited((;)); 2660 2661 b. ((sensitive habitats and species are protected,)) Protection is provided for critical areas; and 2662 2663 c. ((h))Hydrologic continuity is maintained. 2664 2665 ((E-479)) E-409 Regulatory approaches for protecting wetland functions and 2666 values, including the application of wetland buffers and the siting of 2667 off-site compensatory mitigation, should consider intensity of 2668 surrounding land uses and basin conditions. King County shall 2669 continue to review and evaluate wetland research and implement 2670 changes in its wetland protection programs based on such information. 2671 2672 ((E-480)) E-410 Enhancement or restoration of degraded wetlands may be allowed to ((maintain or)) improve wetland functions and values, provided that 2673 2674 all wetland functions are evaluated in a wetland management plan, and 2675 adequate monitoring, code enforcement, and evaluation is provided 2676 and assured by responsible parties. The enhancement or ((R))restoration ((or enhancement)) must result in a net improvement to 2677 2678 the functions and values of the wetland system. Within available 2679 resources, King County should provide technical assistance to small 2680 property owners as an incentive to encourage the enhancement or 2681 restoration ((or enhancement)) of degraded wetlands. 2682 2683 ((E-481)) E-411 Provided all wetland functions are evaluated, impact avoidance 2684 and minimization sequencing is followed, affected ((significant)) 2685 functions are appropriately mitigated, and mitigation sites are 2686 adequately monitored, alterations to wetlands may be allowed to: 2687 a. Accomplish a public agency or utility development; 2688 Provide necessary crossings for utilities, stormwater tightlines and b. 2689 roads; or 2690 c. Allow constitutionally mandated "reasonable use" of the property. 2691 2692 When adverse impacts cannot be avoided, compensatory mitigation may be allowed. 2693 This means wetland enhancement, restoration, or creation to replace project-induced 2694 losses of wetland functions and values. The ((c)) County recognizes that, especially in the 2695 Urban Growth Area, allowing alteration of low-function wetlands in exchange for 2696 compensatory mitigation that contributes to wetlands of higher functions and values 2697 within a connected wetland system may achieve greater resource protection than simply 2698 preserving the low functioning wetland. 2699

- ((E-482)) E-412 A small Category IV wetland that is less than 2,500 square feet and that is not part of a wetland complex may be altered to move functions to another wetland as part of an approved mitigation plan that is consistent with E-((483))413 and E-((484))414.
- 2705 ((E-483)) E-413 Wetland impacts ((should)) shall be avoided if possible, and minimized 2706 in all cases. Applicants shall demonstrate that impacts are unavoidable due 2707 to circumstances outside of the applicant's control, and not for the profit or 2708 convenience of development. Where impacts cannot be avoided, they 2709 should be mitigated on site if the proposed mitigation is ((feasible)) 2710 practical, ecologically appropriate, and likely to continue providing 2711 equivalent or better biological functions in perpetuity. ((Where on-site 2712 mitigation is not possible or appropriate,)) When it is demonstrated that 2713 there are not enough opportunities available for on-site mitigation, King 2714 County may approve off-site mitigation.

2704

- ((E-484)) E-414 Mitigation projects should contribute to an existing wetland system or restore an area that was historically a wetland. Mitigation should only create new wetlands after site monitoring indicates that hydrologic conditions exist to support a new wetland. Mitigation sites should be strategically located to reduce habitat fragmentation or to restore and enhance area-specific functions within a watershed.
- ((E-485)) E-415 Land used for wetland mitigation should be preserved in perpetuity. Monitoring and maintenance in conformance with King County standards should be provided or paid for by the project proponent until the success of the site is established. Long-term stewardship should occur at mitigation sites to ensure sites continue to provide desired functions and values.

2731 Mitigation banks and in-lieu fee programs are forms of watershed-based compensatory 2732 mitigation, with the goal of providing greater resource protection and benefit to the 2733 public. Both approaches can allow for the consolidation of multiple, small mitigation 2734 projects into a large-scale wetland or wetland complex, resulting in economies of scale 2735 in planning, implementation, and maintenance. Depending on their location and 2736 functions, mitigation banks and projects constructed using in-lieu fee programs can 2737 result in wetlands of greater hydrologic, chemical, and biological value because of their 2738 size and ecological context and the commitment to long((-))term management. These 2739 mitigation approaches also provide applicants with a range of options for meeting their 2740 off-site mitigation obligations.

2742 Mitigation banking allows compensatory mitigation to occur prior to the loss of existing 2743 wetlands and their functions and values, thereby reducing "temporal" losses. Mitigation 2744 banking allows a project proponent to mitigate for their impacts by contributing fees to 2745 a bank sponsor for the creation or restoration of the bank site. In-lieu fee programs, 2746 such as King County's Mitigation Reserves Program, allow an applicant to meet its off-2747 site wetland mitigation requirements through payment of a fee to King County or 2748 another authorized agent with the capacity to design and construct, maintain, and 2749 monitor a successful mitigation project. Both types of programs enable fees to be 2750 pooled so that larger projects can be constructed to offset impacts elsewhere in a 2751 watershed.

2753 Moreover, King County's Mitigation Reserves Program enables such projects to be 2754 constructed on lands with degraded wetlands or aquatic areas or lands with the 2755 potential to reestablish wetlands or aquatic areas that could be restored or enhanced to 2756 benefit overall watershed functions. These Mitigation Reserve lands are managed for

2757 long term ecological protection, so that the landscape and stream basin context 2758 support a successful enhancement project. Such projects should be planned in a 2759 watershed context and may achieve multiple ecological objectives, including meeting 2760 salmon conservation and other habitat protection objectives as well as wetland 2761 enhancement needs.

2762

2799 2800

2801

2802

2803

2804

2805

2806

2807

2808

 ((E-486)) E-416 King County, in partnership with other governmental entities and interested parties, should encourage the development and use of wetland mitigation banks through which functioning wetlands or aquatic areas are enhanced, restored, or created prior to the impacting of existing wetlands or aquatic areas. ((The county shall encourage establishment of such banks by established government entities as well as by private, entrepreneurial enterprises.

In 2008, the U.S. Army Corps of Engineers and the Environmental Protection Agency
 jointly issued new federal rules (40 Code of Federal Regulations Part 230 and 33 Code
 of Federal Regulations Part 332) regarding compensatory mitigation for losses to
 functions and values of aquatic resources associated with unavoidable permitted
 impacts. These rules require implementation of mitigation in a watershed context and
 consideration of functional losses to resources from permitted impacts and functional
 gains at mitigation sites.))

2779 King County ((revised its compensatory mitigation program in 2011 to comply with 2780 these new federal rules and is well positioned to become)) is a regional service provider 2781 for compensatory in-lieu fee mitigation - both to permittees in unincorporated King 2782 County and within cities ((when appropriate agreements are in place)). The ((revised)) County's compensatory mitigation program((, authorized by state and federal agencies 2783 2784 in 2012,)) offers private and public project proponents the opportunity to pay a fee to 2785 King County in lieu of completing their own mitigation. These fees in turn will be used 2786 to implement mitigation projects, equitably applied among larger- and smaller-scale 2787 developments, that address watershed needs as determined through analysis of best 2788 available science. 2789

2790 ((In approving mitigation proposals, King County should consider the ecological context 2791 of the impacted wetland, as well as the wetland impact acreage, functions, and values. 2792 Mitigation sites should be located in areas in which the project will enhance ecological 2793 conditions of the watershed and should first replace or augment the functions and 2794 values that are most important to the optimum functioning of the wetland being 2795 created, restored, or enhanced. These functions and values may differ from those lost 2796 as a result of the impacting development project. Wetland mitigation proposals should 2797 result in no net loss, and if possible, in an increase in overall wetland functions and 2798 values within the watershed in which the impacted site is located.

E-487)) E-417 King County should continue to implement and encourage use of its Mitigation Reserves Program to provide a fee-based option for permit applicants to mitigate for unavoidable impacts of permitted development on wetland and aquatic area functions and values. The fee structure shall be based on the full costs of land acquisition, site selection, design, construction, and long((-))term maintenance and monitoring. Mitigation projects implemented through the Mitigation Reserves Program should occur within a watershed context.

((E-488)) E-418 King County should be a regional service provider of compensatory
 mitigation through the Mitigation Reserves Program by working with
 local cities, other counties, and state agencies to establish partnerships
 for implementation of inter((-))jurisdictional in-lieu fee mitigation.

2814E-419When implementing in-lieu fee mitigation projects, King County should2815consider the ecological context of the impacted wetland, and the2816impacted wetland's acreage, functions, and values. In-lieu fee2817mitigation should result in no net loss, and if possible, in an increase in2818overall wetland functions and values within the watershed in which the2819impacted site is located.

2820

2849 2850

2851

2852

2853

2854

2855

2821 Through the King County Mitigation Reserves Program, ((restoration)) mitigation sites 2822 are selected ((and pre-purchased in advance of)) to offset development_related impacts. 2823 Selected sites, with wetland or aquatic area preservation, enhancement, restoration, or 2824 creation potential, will be ((purchased)) protected in perpetuity as open space and 2825 actively managed as mitigation sites ((and will be protected in perpetuity as open 2826 space)). Mitigation projects implemented through the Mitigation Reserves Program will 2827 preserve, enhance, restore, and/or create ecological functions at the site to compensate 2828 for wetland, stream, river, and/or buffer functions and values lost during unavoidable 2829 impacts associated with permitted construction of projects at other locations. Sites and 2830 projects through the Mitigation Reserves Program will occur where the projects will 2831 have sustainable long-term benefits to aquatic resources in the watershed, ensuring 2832 projects at protected sites occur in places with importance to ecological integrity of the 2833 watershed. King County's Mitigation Reserves Program ((has received approval from)) is 2834 approved by the U.S. Army Corps of Engineers, ((the)) Environmental Protection 2835 Agency, ((and the)) Washington Department of Ecology, and other agencies to ((serve 2836 as an in-lieu fee program to mitigate)) provide mitigation for the impacts to wetlands 2837 and other aquatic resources ((subject to state and federal regulations)). 2838

2839 A large portion of western Washington farming occurs in lands that were once wetlands. 2840 Region-wide, agricultural lands have been targeted as mitigation sites because the 2841 relative cost of land is low and the likelihood of success in returning wetland functions is 2842 high. King County's Agricultural Production Districts that are located in floodplains and 2843 the poorly drained Osceola soils of the Enumclaw Plateau are no exception. Unless 2844 carefully sited and engineered, wetland mitigation projects can inadvertently raise water 2845 tables on adjacent agricultural properties. King County has joined other counties in 2846 discouraging the use of productive farmland for wetland mitigation, while working with 2847 farmers on wetland enhancement and restoration at a scale appropriate to sustaining 2848 their farms.

((E-489)) E-420 Wetland mitigation projects should avoid impacts to and prevent loss of farmable land within Agricultural Production Districts. Creation of wetland mitigation banks ((are)) shall not be allowed in the Agricultural Production Districts when the purpose is to compensate for wetland impacts from development outside the Agricultural Production Districts.

2856 ((5.)) <u>C.</u> Rivers, Streams, and Floodplains

There are approximately ((3,100)) 6,400 miles of rivers ((and)), streams, and creeks in King County and more than ((52,000)) 59,000 acres of floodplains along rivers, streams, and marine shorelines. The river and stream channels, the surrounding riparian (streamside) areas and upland areas, their floodplains all contribute to the functioning and integrity of rivers and streams. Many rivers and streams provide habitat that is essential for various life stages of many species of wildlife and fish, including salmonids.

Rivers, streams, and floodplains are dynamic systems. When flood waters overtop banks, floodplains temporarily store that water. Depending on the depth and flow, floods can dramatically alter river and stream courses, creating new channels, eroding banks, and depositing sediment and gravel. Flooding and erosion can also dislodge trees. These changes slow flood flows and help to support dynamic and complex

habitat for fish and wildlife. At the same time, they can create public safety issues for 2869 2870 people living along and recreating in rivers. 2871

2872 In addition, public access to rivers and streams is both a requirement of the Shoreline 2873 Management Act and a goal for King County to support the regional economy and 2874 provide recreational opportunities for the community. People enjoy rivers and streams 2875 for the scenic and recreation values, including boating, floating, swimming, fish and 2876 wildlife viewing, and fishing. Management of these systems needs to consider not only 2877 habitat protection, but also public health and safety and opportunities for education 2878 and stewardship.

2880 ((E-498a)) E-421 The existing flood storage and conveyance functions and 2881 ecological values of floodplains, wetlands, and riparian ((corridors)) 2882 areas shall be protected, and should((, where possible,)) be restored 2883 and enhanced ((or restored)) through integrated actions that provide 2884 multiple benefits, such as preservation of open space and adjacent low-2885 density development.

2918

2919

2920

2921

2927

((E-499)) E-422 ((Rivers and streams are inherently dangerous.)) King County should coordinate across ((c))County departments and with other agencies and organizations to promote public awareness of the dynamics and dangers of river and stream systems and the need for personal responsibility when living near or recreating in or on rivers and streams.

((E-499a)) E-423 When King County places large wood in rivers and streams for habitat restoration or enhancement, it should do so in a manner that minimizes danger to the public.

2898 Specific policies addressing management of large wood are found in the King County 2899 Flood Hazard Management Plan. In urban areas, rivers and streams in some cases also 2900 serve as stormwater drainage systems. During the winter months, stormwater runoff during storms can bring pollutants to these water bodies. During the summer months, 2902 lawn irrigation and other water uses can also carry pollutants to rivers and streams. 2903

((E-499b)) E-424 River and stream channels, stream outlets, headwater areas, riparian ((corridors)) areas, and areas where dynamic ecological processes are present should be preserved, protected, and enhanced for their hydraulic, hydrologic, ecologic, and aesthetic functions, including their functions in providing large wood to salmonid-bearing streams. ((Management of)) Actions taken along river and stream channels should ((consider other beneficial uses of these water bodies, including recreation)) provide multiple benefits, including resiliency to climate change. Flood risk reduction actions should benefit all communities, especially frontline communities, consistent with equity and racial and social justice goals and the policies of the King County Flood Hazard Management Plan or successor plans.

- ((E-499c)) E-425 To protect or improve adjacent wetlands and aquatic habitat, the designation of buffers for aquatic areas, including rivers and streams, should take into account watershed-scale actions to mitigate the impacts of upland development on flooding, erosion, and habitat.
- 2922 ((E-499d)) E-426 King County shall continue to monitor and assess river and stream 2923 flows, water and sediment quality, physical habitats, and biotic 2924 resources in rivers and streams. Assessment shall identify trends and 2925 describe impacts on human health and safety, aquatic life, and wildlife 2926 habitat.

2928 ((E-499e)) E-427 To maintain and restore stream health, sources of uncontrolled 2929 stormwater flows contributing to peak flows in small streams should be 2930 managed using on-site structural or non-structural flow control 2931 techniques.

2933 Most streams in King County originate in either mountainous terrain or on rolling glacial 2934 uplands. These streams often descend through steep, narrow ravines before reaching 2935 the floodplain. At the point where these streams leave their ravines and flow onto the 2936 floodplain, the channel gradient (slope) and confinement decrease quickly, dramatically 2937 reducing the streams' ability to carry sediment. These are areas of natural sediment 2938 deposition and channel migration. The combination of sediment deposition and 2939 repeated channel migration creates fan-shaped depositional features known as alluvial 2940 "fans." 2941

2942 During periods of heavy rainfall, streams often carry large sediment loads from 2943 upstream that deposit on downstream alluvial fans. Landslides, beaver dam failures and 2944 other natural disturbances can create episodes of particularly high rates of sediment 2945 production and delivery. In many stream systems, instances of heavy sediment 2946 deposition may occur episodically with years or decades of apparent stability in the 2947 intervening periods. In many instances, sediment production and tributary or stream 2948 flow rates are exacerbated by upland land use conditions and associated stormwater 2949 effects. 2950

2951 Alluvial fans share many of the ecological attributes and land use risks associated with 2952 channel migration hazard areas and landslide hazards, though they are unique in many 2953 respects. In a natural environment, alluvial fans often provide some of the best available 2954 spawning habitat in a tributary stream, while also providing a source of gravel for areas 2955 downstream. In some heavily altered streams, the alluvial fan may represent the only 2956 remaining areas that are suitable for spawning. Alluvial fans can also form the highest 2957 ground available in the floodplain, and have historically been used for construction of 2958 buildings (including farm buildings), roads, and other structures. Unfortunately, they are 2959 inherently unstable environments in which to build. During high flows coupled with 2960 sediment deposition, a stream may jump its bank in the area of the alluvial fan, in some 2961 cases damaging private property, disrupting agricultural activities, destroying culverts 2962 and road crossings, stranding fish, and creating risks to public safety. Protecting 2963 buildings, roads, <u>bridges</u>, and crops on and ((along)) <u>adjacent to</u> alluvial fans often 2964 requires extensive((7)) and costly ongoing maintenance activities. Maintenance activities 2965 can have adverse effects on habitat, and in some circumstances may not be permittable 2966 under state regulations nor feasible as a management strategy.

2967
 2968 ((The Rural Areas and Natural Resource Lands chapter calls for alluvial fan pilot projects
 2969 to test best management practices and innovative solutions for reducing hazards to
 2970 agricultural landowners and protecting and restoring habitat.

2971

2932

- E-499f)) E-428 King County should improve the management of alluvial fans ((by 2972 2973 developing and clarifying definitions of alluvial fans,)) through 2974 mapping the locations of existing alluvial fans and areas at risk of 2975 alluvial fan hazards, and through developing appropriate management 2976 strategies such as development standards and mitigation requirements. 2977 Strategies should: 2978 a. Address potential conflicts between adjacent landowners and natural alluvial fan hazards and processes; 2979 2980 b. Take climate change into account; 2981 с. ((p))Protect intact habitat ((and)); 2982 d. ((r))Restore degraded habitat((,)); and e. ((r))Reduce threats to public safety((, and accommodate)) for 2983 2984 existing land uses. ((Findings from Alluvial Fan Management Pilot 2985 Projects should inform management strategies for alluvial fans.)) 2986 2987 ((An alluvial fan is a depositional landform along a watercourse where there is an abrupt 2988 decrease in gradient and a resulting area of active sediment deposition. Most alluvial 2989 2990 2991 2992 2993 2994 2995 2996
- fans in King County form where steep tributary streams discharge onto nearly level river floodplains. Since m))Much of the county's farmland is located ((in)) on valley floors, ((some)) and agricultural landowners frequently have properties on ((or containing)) alluvial fans ((that are significantly affected by t)). The episodic deposits of ((upslope)) sediment and debris that ((accumulate on their land)) naturally occur on alluvial fans can reduce the capacity of stream channels and wetlands, and debris flows may cover fertile farmland, disrupting agricultural operations. ((These events result in obstructed stream channels, filled wetlands, covered farmland, and disruptions in operations. Water is 2997 redirected into unexpected places. Permits, regulations, and the lack of approved 2998 management practices make it difficult to remedy the situation to regain operations and 2999 farm viability.)) Sudden shifts in the location of streams on alluvial fans can also flood 3000 agricultural buildings and farm residences. Obtaining permits allowing active 3001 management to remove the accumulated sediments and reestablish stream channels 3002 can be difficult given the regulations that apply to critical areas such as alluvial fan 3003 hazards, aquatic areas, and floodplains. 3004
 - ((R-671)) E-429 King County should ((use pilot or demonstration projects and multiagency collaboration to develop a new suite of practices that will)) provide regulatory options ((for landowners whose existing)) to protect existing residences and agricultural operations that are ((affected)) threatened by alluvial fan ((deposits)) hazards. These options should provide ((timely and cost-effective)) emergency relief from debris and ((the associated)) stream flow changes ((to the watercourse along with protection of intact)) and consider long-term multi-benefit solutions that protect and restore fish habitat ((and restoration of degraded fish habitat within these areas)).
- ((F.))D. Flood Hazard Management 3015

3005

3006

3007

3008

3009

3010

3011

3012 3013

3014

3021

3016 Floodplains are lands adjacent to lakes, rivers, and streams that are subject to periodic 3017 flooding. Floodplains naturally store flood water, contribute to groundwater recharge, 3018 protect water quality, and are valuable for recreation, agriculture, and fish and wildlife 3019 habitat. Floodplains also provide a deposition zone for sediments mobilized by rivers 3020 and streams. Wetlands are often an integral part of floodplains.

3022 There are two primary types of flood hazards: inundation and channel migration. 3023 Inundation is defined as floodwater and debris flowing through an area that is not 3024 normally under water. Such events can cause minor to severe damage, depending on 3025 the velocity and depth of flows, the duration of the flood event, the quantity of logs and 3026 other debris carried by flows, and the amount and type of development and personal 3027 property in the floodwater's path. Floodplains are designated based on the predicted **Environment - Page 5-56**

frequency of flooding for a particular area. For example, a 100-year floodplain is a land area that has a one percent probability of experiencing flooding in any given year. Inundation hazards can come from major rivers, smaller tributary streams, local stormwater runoff, high lake levels, high groundwater levels, coastal storm surge, and tidal action.

3034 Channel migration results from ((erosion wears)) the wearing away of a riverbank by 3035 flowing water. Ongoing erosion of one riverbank coupled with sediment deposition 3036 along the opposite bank results in the lateral movement or migration of a channel 3037 across its floodplain. When this shift is abrupt it is called channel avulsion. Channel 3038 migration can lead to flood and erosion damage to structures, farms, and critical 3039 infrastructure. At the same time, it is a natural process that forms complex fish habitat 3040 by creating braided channels and causing trees to fall into rivers. Bank stabilization 3041 actions to limit channel migration have negative impacts on channel processes and reduce salmonid habitat quality and quantity. Channel migration hazard areas are 3042 3043 designated based on geomorphic analyses and review of historical channel migration 3044 patterns and rates, consistent with the King County Flood Hazard Management Plan and 3045 the Shoreline Management Act.

3047 Development can reduce the floodplain's ability to store and convey floodwaters, 3048 thereby increasing the velocity and depth of floodwaters in other areas. In addition, 3049 floodplain development puts humans in harm's way and often occurs at the expense of 3050 important fish and wildlife habitat. King County has adopted the Flood Hazard 3051 Management Plan as a functional element of the King County Comprehensive Plan to 3052 detail regional policies, programs, and projects to reduce the risk to people and 3053 property from river flooding and channel migration in King County and to provide 3054 guidance for decisions related to land use and floodplain management activities. 3055

((E-499qq)) E-430 King County shall implement a comprehensive local floodplain management program that, consistent with the King County Flood Hazard Management Plan or successor plans: protects lives((;)); minimizes damage and disruption to infrastructure and critical facilities((;)); preserves and restores natural floodplain functions((;)); uses integrated approaches to provide multiple benefits; is resilient to climate change; supports floodplain management actions that benefit frontline communities; and ensures that new development does not put people in harm's way or cause adverse flooding impacts elsewhere((; consistent with the King County Flood Hazard Management Plan)).

- 3067 ((E-499qqq)) E-431 King County shall continue to exceed the federal minimum
 3068 standards stipulated by the National Flood Insurance Program for
 3069 unincorporated areas to better protect public safety, reduce the risk of
 3070 flood and channel migration hazards to existing public and private
 3071 property, and prevent new at-risk development.
 3072
- 3073 ((E-499r)) E-432 King County's floodplain land use and floodplain management 3074 activities shall be carried out in accordance with policies, programs, 3075 and projects detailed in the King County Flood Hazard Management 9076 Plan, or successor plans.
- 3077 ((7. Beavers and Beaver Activity))

3033

3046

3056

3057

3058

3059

3060

3061

3062

3063

3064

3065

3066

3078 Beaver ponds, created when beavers dam watercourses, provide a protective pool for a 3079 beaver lodge and environmental benefits. They help retain stormwater runoff, trap 3080 sediment and pollutants, maintain stream flow during summer, reduce downstream 3081 flooding and erosion, raise groundwater levels, and help create diverse plant and 3082 animal habitat. <u>Beaver ponds also provide significant environmental benefits and</u>

- 3083 <u>functions for salmon rearing habitat, floodplain connectivity, wood inputs, increased</u>
 3084 <u>complexity of aquatic systems, and biodiversity.</u>
 3085
- Beaver dams may also cause upstream flooding of roads, utilities, and both public and private property, and create the potential for downstream risk to public safety and infrastructure should dam failure occur. If a dam is harmed or removed, the beavers will typically repair the damage quickly, because their survival depends on having the entrance to their lodge underwater.

3092 ((For over 150 years beavers and humans were able to coexist in King County, because
 3093 beaver populations were kept in balance through trapping and human development
 3094 was confined to areas without large beaver populations. However, as the urban and
 3095 suburban areas of King County extended out into areas with an abundance of beaver
 3096 habitat and beaver populations increased, beavers have begun to come into greater
 3097 conflict with humans.

3099 These growing conflicts were exacerbated in 2000 with the passage of Initiative 3100 Measure 713 (I-713), a law that prohibited the use of body-gripping traps with the 3101 exception of a Conibear trap in water, a padded leg-hold trap, or a non-strangling type 3102 foot snare, all of which require a special permit (see Revised Code of Washington 3103 77.15.194). The results of these changes were that fewer beavers are being trapped and 3104 more beavers are repopulating historic habitat.

3106 Fifteen years since I-713 went into effect, beavers continue to repopulate the water 3107 bodies of King County. Non-lethal/engineered solutions (beaver deceivers and pond 3108 levelers) help control water levels of beaver ponds and are part of the solution for 3109 co-existing with beavers. But these solutions are not always sufficient and will likely 3110 become less and less feasible in terms of maintenance capacity as beaver populations 3111 continue to expand.

E-499ii)) E-433 King County <u>should</u> support((s)) the coexistence of beavers and people in rural King County. ((King County should prepare a beaver management strategy to guide a program on issues such as where and how beavers and humans can co-exist with or without engineered solutions and where beavers should be excluded or removed.

3118 3.)) <u>E.</u> Lakes

3091

3098

3113

3114

3115

3116

3117

There are approximately 700 lakes in King County ranging in size from less than one 3119 3120 acre to Lake Washington's roughly 21,500 acres. These lakes provide habitat that is essential for various life stages of many species of fish and wildlife, including salmonids, 3121 3122 as well as recreational opportunities and scenic beauty. <u>Watershed</u> $((\frac{D}))$ <u>d</u>evelopment, 3123 shoreline alteration, and stormwater runoff into lakes can alter their functioning and lead 3124 to eutrophication (increases in nutrients), loss of ((shoreline)) habitat, and threats to 3125 human and ecosystem health. Although sewage treatment has greatly reduced 3126 pollution in urban lakes like Lake Washington, stormwater runoff polluted by oil, metals, 3127 sediments, pet waste, lawn fertilizers, and ((pesticides)) toxic chemicals can threaten 3128 ((human health, aquatic life, and habitat. Construction of bulkheads and docks also has 3129 the potential to impact habitat by altering shoreline vegetation and natural erosion 3130 patterns)) lake ecosystems and those who use them. 3131

King County conducts water quality monitoring assessment on lakes throughout ((King County, in some cases supported by interlocal agreements with cities)) the county, including sediment quality, habitat, biotic resources, and hydrology. ((Some of the earliest evidence of climate change includes temperature changes in regional lakes.
 Changes in annual temperature cycles in King County's regional lakes, particularly Lake Sammamish, Lake Union, and Lake Washington, provide some of the most accurate

3138 measures of climate change available locally.)) This monitoring supports restoration and
 3139 protection of lakes in King County, as well as improves understanding of climate
 3140 change, watershed development, stormwater impacts, and swimming, fishing, and
 3141 drinking water uses.

3142

3157

3165 3166

3167

3168

3169 3170

3171

3172 3173

3174

3175 3176

3177

3178

3186

3143 King County also conducts specialized monitoring assessments for public health and 3144 safety. During the summer months, the ((-))County conducts regular monitoring at 3145 public swimming beaches and contaminate monitoring of some fish species. When 3146 monitoring indicates a public health hazard, the County works collaboratively with state 3147 agencies and local jurisdictions, and ((the)) information is provided to Public Health -3148 Seattle & King County((, which can issue a temporary closure order. The Washington 3149 State Department of Health issues fish and shellfish consumption advisories to protect 3150 human health. There are consumption advisories for a number of species in Lake 3151 Washington. King County recently implemented a monitoring program to track the level 3152 of select contaminants in some fish species in Lake Washington. These data are used to 3153 evaluate the potential for both human health (through consumption) and ecological 3154 impacts)). This can result in public warnings, consumption advisories, management 3155 recommendations, and a temporary closure order if necessary. King County also offers 3156 technical response assistance to harmful algal bloom incidents.

- ((E-490)) E-434 Lakes ((should)) shall be protected through management of lake watersheds and shorelines. Lakes ((sensitive to nutrients shall)) should also be protected through the management of nutrients that stimulate potentially harmful algae blooms and aquatic plant growth. Where sufficient information is available, measurable standards for lake quality should be set and management plans established to meet the standards.
 - E-435 When a lake borders multiple jurisdictions, King County should coordinate with those jurisdictions on lake protection and management. Formation of lake management districts or other financing mechanisms should <u>also</u> be considered to provide the financial resources necessary to support actions for protection of ((sensitive)) lakes.
 - ((E-491)) <u>E-436</u> King County, in partnership with other governments and community groups, should monitor and assess lake water and sediment quality, physical habitat, ((and)) biotic resources<u>, and hydrology</u>. Assessment should identify trends and describe impacts on human <u>and</u> <u>ecosystem</u> health, aquatic life, and wildlife habitat.
- 3179E-437((The c)) King County should collaborate with other ((affected))3180jurisdictions, Public Health Seattle & King County((, the State3181Department of Health, and the State Department of Ecology)), and state3182agencies to identify and address pollutant sources adversely impacting3183aquatic life and/or human and ecosystem health((; through local or3184grant funding opportunities, the county should reduce or remove these3185inputs)).
- 3187 ((E-492)) E-438 Swimming beaches on lakes should be monitored for ((bacterial))
 3188 fecal contamination and algal toxins. When data shows public health to
 3189 be at risk, Public Health Seattle & King County should take
 3190 appropriate action to address public health risks.
- 3191 ((6.)) <u>F.</u> Puget Sound

3192 There are approximately ((110 miles of marine shoreline in King County, including)) 51 3193 miles <u>of marine shoreline</u> in unincorporated areas. Shorelines provide important

3194 functions for maintaining a healthy ecosystem and also provide essential habitat for a 3195 variety of important and listed species, including mammals, birds, fish, and 3196 invertebrates. In addition to recreational opportunities, the marine nearshore 3197 environment provides essential habitat for a variety of species including juvenile 3198 salmonids, forage fish, and several commercially important shellfish species. Kelp and 3199 eelgrass populations are particularly important for providing food and habitat, 3200 especially for juvenile life stages for a variety of key fish and invertebrate species. The 3201 intertidal area of marine beaches are the only spawning habitats for Pacific sand lance 3202 and surf smelt, which form the base for much of the food chain in Puget Sound and are 3203 highly susceptible to impacts from residential development of shoreline areas. Marine 3204 resources and shorelines, especially embayments, are susceptible to impacts from water 3205 pollution, changes in upland vegetation, alteration of natural bluff and beach erosion 3206 patterns, and alteration of nearshore substrates and aquatic vegetation. 3207

3208 The majority of marine waters within King County are subtidal waters, which provide 3209 important ecosystem functions and essential habitat for a variety of important species, 3210 including marine mammals, birds, salmonids and other fish, and invertebrates. Subtidal 3211 waters support geoduck, shrimp, and ((bottomfish)) commercial and Indian tribal 3212 fisheries ((as well as)), and also provide critical rearing habitats for salmonids and 3213 migratory pathways for marine mammals ((and salmonids)). Resident ((killer whales)) 3214 orca are often observed in King County subtidal waters feeding on salmonids, and 3215 Biggs' whales are often seen feeding on seals and sea lions. Adult life stages of many 3216 species, such as rockfish and Dungeness crab, use subtidal waters extensively. In 3217 addition, subtidal waters provide an important connection to Pacific Ocean waters as 3218 well as waters within other parts of Puget Sound. Subtidal habitat is susceptible to 3219 impacts from water pollution, over-utilizing of biological resources, and climate change. 3220

3221 King County conducts water quality monitoring in marine offshore and nearshore areas 3222 throughout King County as part of the Marine Monitoring Program. Nutrients, 3223 chlorophyll, and dissolved oxygen are measured along with other physical and chemical 3224 parameters. Biological parameters, such as ((chlorophyll)) fecal indicator bacteria and 3225 phytoplankton and zooplankton community structure are also assessed. Offshore 3226 sediment quality is assessed in various subtidal areas and nearshore sediments are 3227 assessed throughout King County. The Washington State Department of Health issues 3228 fish and shellfish consumption advisories to protect human health. There are 3229 consumption advisories for a number of species within King County marine waters. 3230 King County ((recently implemented)) maintains a monitoring program to track the level 3231 of select contaminants in some species of fish and shellfish in Elliott Bay and King 3232 County's marine waters. These data are used to evaluate the potential for both human 3233 health (through consumption) and ecological impacts.

3235 King County's freshwater and saltwater environments are integrally linked. Water, 3236 sediments, and nutrients move from upland areas to Puget Sound. Many species, 3237 including salmon, spend critical periods of their lives in both fresh and salt water. 3238 Salmon migrating from saltwater to their spawning areas bring marine-derived nutrients 3239 back to the upland areas. ((Given the functional linkages between freshwater and 3240 saltwater environments, it is critical that planning and management be integrated. 3241

3234

3242	E-499g)) <u>E-439</u> King County should collaborate with ((the)) <u>Indian tribes,</u> federal
3243	and state agencies, ((((including)) the Puget Sound Partnership(())),
3244	cities, ((tribes,)) other counties, and universities to monitor and assess
3245	Puget Sound marine waters, nearshore areas, and embayments.
3246	Monitoring and assessment should <u>:</u>
3247	a. Address water and sediment quality, bioaccumulation of chemicals,
3248	physical habitat, ((and)) biotic resources <u>, and hydrology</u> ((.
3249	Assessment should)); and
3250	<u>b.</u>Identify trends and describe impacts on human <u>and ecosystem</u>
3251	health and safety, aquatic life, and wildlife habitat.

Environment - Page 5-60

3277

3278

- ((E-499h)) E-441 King County should protect and enhance the natural environment in those areas recommended or adopted as Aquatic Reserves by Washington State Department of Natural Resources. This should include participation in management planning for the aquatic reserves and working with willing landowners adjacent to the reserve on restoration and acquisition projects that enhance the natural environment.
 - E-442 King County shall support efforts of the Poverty Bay Shellfish Protection District to safeguard against threats to water quality that limit access to existing commercial shellfish harvesting areas.
- E-443 King County should continue to support regional programs and actions to monitor and address fecal pollution of King County lakes, streams, and beaches, such as the Pollution Identification and Control Program being run in collaboration with the King Conservation District and Public Health - Seattle & King County.

3279 Human waste contains high levels of nutrients and pathogens. These pollutants can 3280 enter Puget Sound marine waters from a variety of pathways including combined sewer 3281 overflow outfalls, septic systems, stormwater runoff, ships and boats, and rivers and 3282 streams. Nutrients are also present in treated wastewater effluent. Public Health -3283 Seattle & King County is responsible for assuring that ((onsite)) on-site sewage systems 3284 in King County meet state and local regulations. In addition, Public Health - Seattle & 3285 King County is required to identify areas where marine water quality is threatened or 3286 impaired as a result of contamination from ((onsite)) on-site sewage systems, to 3287 designate these areas as Marine Recovery Areas, Public Health - Seattle & King County 3288 has developed a Marine Recovery Areas plan for Vashon-Maury Island to identify failed 3289 septic systems within the Marine Recovery Areas, and to assure that these systems are 3290 repaired and maintained.

3291 3292 The State Department of Health conducts shoreline surveys, which ((identifies)) identify 3293 pollution sources that may impact water quality. Marine water sampling is to determine 3294 fecal coliform bacteria levels in the marine waters. Shellfish_growing areas are classified 3295 ((determining)) <u>according to</u> whether ((or not)) shellfish in the area can be harvested for 3296 human consumption. Public Health - Seattle & King County, in partnership with 3297 Department of Natural Resources and Parks and King Conservation District, has 3298 implemented the Quartermaster Pollution Identification and Correction programs to 3299 address the fecal coliform discharges that ((caused the shellfish beds to be prohibited 3300 from)) limit commercial harvesting. 3301

The Marine Recovery Areas/Pollution Identification and Correction program has successfully returned portions of Quartermaster Harbor to harvestable condition and is continuing work on Vashon-Maury Island to address fecal coliform sources such as properties that have on-site sewage systems that pre-date regulatory oversight systems or that have failing systems. In addition to Quartermaster Harbor, other ((King County)) commercial shellfish beds that are listed as threatened or concerned <u>in King County</u> are East Passage and Colvos Passage on Vashon, and Poverty Bay on the mainland.

Most landowners act as responsible managers of their septic systems and maintain them
 effectively. However, those septic systems that are not maintained can fail, and impact
 the environment. ((The County and the State should work with landowners by providing
 technical assistance and support to prevent failures, take action to correct failing
 systems and address the associated problems.))

((E-499i)) E-444 King County should work with landowners, other jurisdictions, the
 state Department of Health, sewer districts, and the Puget Sound
 Partnership to proactively address failing septic systems with a priority
 in ((environmentally sensitive areas, including)) areas where on-site
 septic could pose an increased public health risk, critical areas and their
 buffers, and constrained shoreline environments.

3322 ((4.)) G. Groundwater Resources

Protecting groundwater is an important regional issue because groundwater provides approximately 30((%)) <u>percent</u> of the water used in King County and is the primary source of water in the Rural Area((s)) geography. On Vashon-Maury Island and in other sole-source aquifer areas, it is the only source of drinking water.

3361

3362

3363

3364

3315

3328 The natural hydrologic system can be altered by development practices and overuse of 3329 the aquifer. The result may be depletion of aquifers. Groundwater is also subject to 3330 contamination from human activity. Once a source of groundwater is contaminated it 3331 may be lost forever. The cost of protection is considerably less than the cost of 3332 remediation and replacement. Having accurate, up-to-date information on 3333 groundwater quality and quantity is essential for managing this resource. Mapping risk 3334 could be achieved for a variety of pollutants or pollutant classes by integrating 3335 groundwater protection level, distance to groundwater, soil type, pollutant mobility, and 3336 land use information into a new map layer for each pollutant. Finally, public education 3337 (particularly for individual well owners) and coordinated groundwater management 3338 efforts will help to protect this resource over the long((-))_run. 3339

- 3340((E-493)) E-445King County shall identify and map areas in unincorporated King3341County that are considered Critical Aquifer Recharge Areas and sole-3342source aquifers. The ((c))County shall periodically update this map with3343new information from adopted groundwater and wellhead protection3344studies and other relevant sources. King County should develop and3345maintain map layers of groundwater risk level when funding is3346available.

	//E 4071) E	AF1. King County should proto at anough using in the Dural Area b
3415	((E-477)) <u>E-</u>	451 King County should protect groundwater in the Rural Area by:
3416 3417		a. Preferring land uses that retain a high ratio of permeable to
		impermeable surface area, and that maintain and/or augment the
3418 3419		natural soil's infiltration capacity and treatment capability for
3419 3420		groundwater;
3420 3421		 Evaluating impacts on groundwater, where appropriate, during review of commercial, industrial, and residential subdivision
3421 3422		
3422 3423		development projects that are proposed to be located within
5423		critical aquifer recharge areas, and, where appropriate, requiring

mitigation for anticipated groundwater impacts to domestic water

3425 3426		supply resulting from these projects; and c. Requiring standards for ((maximum)) vegetation clearing ((limits)),
3427		impervious surface limits, and, where appropriate, infiltration of
3428		surface water.
3429		
3430	Climate cha	inge has the potential to impact future groundwater availability. Warmer
3431	temperature	es in the Pacific Northwest are projected to lead to greater demand for water
3432	in the sumr	ner and fall, while reduced snow pack and associated stream flows could
3433		sonal groundwater recharge. Further analysis of the potential impacts of
3434		nge on groundwater supplies in King County is needed to understand and
3435		potential impacts.
3436	J	L L
3437	((E-498)) E-4	152 King County should, in partnership with water utilities, ((evaluate
3438		the likely effects of)) work to ensure that climate change impacts on
3439		((aquifer recharge and groundwater supplies and develop a strategy to
3440		mitigate potential impacts in coordination with other climate change
3441		initiatives)) groundwater are being accounted for in water supply
3442		planning and management, such as by:
3443		a. Evaluating effects of climate change on aquifer recharge and
3444		groundwater supplies; and
3445		<u>b. Developing strategies through climate change initiatives with</u>
3446		Indian tribes, cities, water districts, groundwater committees, and
3447		state and federal agencies to mitigate impacts of climate change.

3448 ((B.)) <u>H.</u> Stormwater Quality

3449 Rivers, streams, lakes, wetlands, and groundwater must be protected from the adverse 3450 impacts of development and land use change to continue functioning in a beneficial 3451 manner. Because development both increases runoff from storms and reduces 3452 streamflows in dry months by limiting infiltration, control of the rate, volume, and quality 3453 of stormwater runoff is critical. Unmitigated stormwater runoff can cause erosion, 3454 sedimentation, and flooding with resulting adverse impacts on water quality, fish and 3455 wildlife habitat, property, and human safety. In addition, stormwater runoff can carry 3456 pollutants, such as oil, heavy metals, fertilizers, herbicides, pesticides, ((and)) animal 3457 wastes, dust from tires, naturally occurring nutrients at problematic levels, and toxins 3458 and contaminants of emerging concern into waters. Sedimentation from soil disturbed 3459 by clearing, grading, farming and logging can reduce river or stream channel capacity, 3460 fill lakes and wetlands, and smother aquatic life and habitat. 3461

King County stormwater management encompasses a wide range of strategies that ((integrate proven, traditional approaches with new and innovative concepts,)) include maintenance of more traditional, "gray" infrastructure such as stormwater ponds, and encourage more "green" approaches, such as low impact development practices intended to manage stormwater runoff on_site, reducing discharges of pollutants in stormwater runoff((7)) and mimicking natural hydrology.

3468

3424

3469 ((King County's stormwater management strategies include but are not limited to 3470 encouraging an approach to site development that includes clustering or smart growth, 3471 minimizes impervious surfaces, and maximizes the amount of native plants and soils; 3472 using education and social marketing to increase the public's awareness of water quality issues and encourage behaviors that support water quality; improving pollution source 3473 3474 control by legislating product or material restrictions; improving business practices by 3475 educating business owners and operators about pollution generating activities and best 3476 management practices to mitigate them; and constructing and maintaining an 3477 stormwater infrastructure system that controls, conveys and treats stormwater runoff.

3479 Together these strategies will reduce pollution and flow impacts of stormwater runoff on 3480 King County's surface and ground waters.

3481

3500

3506

3515

3516

3517

3518

3519

3520

3482 As required by the National Pollution Discharge Elimination System Phase I Municipal 3483 Stormwater Permit, King County is making low impact development the preferred and 3484 commonly used approach to site development. As a result of using the low impact 3485 development approach, an increasing number of stormwater management best 3486 management practices including, but not limited to, rain gardens, dispersion, 3487 permeable driveways and walkways, vegetated roofs, and the capture and reuse of

3488 rainwater, will be constructed on private property and will rely on private maintenance 3489 for their continuing function. 3490 3491 In addition to the stormwater strategies discussed above, as well as those discussed in 3492 Chapter 8: Transportation, effective stormwater management will require a basin or

3493 sub-basin approach that identifies areas that were built out under old or nonexistent 3494 stormwater design standards. Basins where deficiencies in flow control or water quality 3495 are identified would be prioritized to correct those deficiencies. These retrofits could 3496 include upgrades to existing stormwater management structures or the placement of 3497 new ones, including onsite low impact development best management practices like 3498 bioretention or raingardens, or the replacement of impervious pavement with 3499 permeable.

3501 Achieving the goals of contemporary stormwater management may require 3502 improvements to best management practices and encouraging or requiring the use of 3503 different products. Approaches could include using green products, implementing new 3504 land development approaches such as cluster housing, and, in some areas, the setting 3505 aside of land and its dedication to riparian habitat, and maintaining natural vegetation.

3507 Stormwater runoff shall be managed through a variety of methods, E-445)) E-453 3508 with the goal of protecting surface water quality, in-stream flows, and 3509 aquatic habitat; promoting groundwater recharge while protecting 3510 groundwater quality; reducing the risk of flooding; protecting public 3511 safety and properties; and enhancing the viability of agricultural lands. 3512

3513 ((E-446)) E-454 King County should: 3514

- a. ((e))Evaluate the need for product or material restrictions because of water quality impacts;
 - b. Use a data- and science-driven approach to identify and reduce the use of contaminants of emerging concern, such as 6PPD; and
 - Seek changes to state regulations and permits to incentivize c. regional stormwater investments where they will achieve the best outcomes for pollution reduction.
- ((2. Clean Water Act)) 3521

3522 The Clean Water Act requires that all states protect and restore their waters to beneficial 3523 uses. This is accomplished through the development of a permitting framework called 3524 the National Pollutant Discharge Elimination System (NPDES) Permit ((p))Program. 3525 Authority for administering the NPDES Program has been delegated by the 3526 Environmental Protection Agency to the Washington State Department of Ecology 3527 (Ecology), and King County holds a number of NPDES general permits for various 3528 specified activities. 3529

3530 ((For instance, the County must comply with permit conditions that cover ongoing 3531 construction site activities, industrial activities, and stormwater runoff discharges from 3532 the municipal stormwater system. Since 1995, Ecology has issued a NPDES Phase 1 3533 Municipal Stormwater permit to King County, authorizing stormwater discharges from 3534 the County's municipal separate stormwater sewer system.

3536	The current permit, set to expire July 31, 2018, contains prescriptive requirements for
3537	discovering, controlling and monitoring pollutants in municipal stormwater, as well as
3538	stormwater control design standards for site development, public education and
3539	outreach, mapping, and operating and maintaining municipal stormwater infrastructure.
3540	

- 3541 The County complies with the current Phase I municipal NPDES stormwater permit by 3542 implementing the County's stormwater management program plan that can be found at
- 3543 the following website:

- 3544 <u>http://www.kingcounty.gov/environment/waterandland/stormwater/pollution-discharge-</u>
 3545 <u>permit/annual-reports.aspx</u>
 3546
- The implementation of the County's plan is reported to Ecology by submitting an annual
 report. The annual report documents compliance with permit requirements over the
 preceding year and the stormwater management plan outlines compliance activities for
 the upcoming year. The most current annual report can be found here:
- 3551 <u>http://www.kingcounty.gov/environment/waterandland/stormwater/pollution-discharge-</u>
 3552 <u>permit/annual-reports.aspx</u>
- 3553 Water Quality Standards and Total Maximum Daily Loads))
- 3554 When a particular water body falls short of state surface water quality standards Ecology 3555 must impose a Total Maximum Daily Load (TMDL). A TMDL is developed to restore 3556 beneficial uses to the water body by reducing or eliminating pollutants. ((In addition to 3557 the actions found in the County's stormwater management plan, the Permit also 3558 contains requirements for the County to implement actions that address four impaired 3559 water bodies.)) The Bear-Evans watershed, Issaquah Creek, and the Puyallup/White 3560 watershed are impaired by elevated levels of fecal coliform((, and)). The Lower White 3561 River has a TMDL for elevated pH and Cottage Lake is impaired by elevated levels of 3562 total phosphorous. The actions to counteract these elevated levels of pollution 3563 include((:)) animal waste education and collection stations at municipal parks, and 3564 inventorying and inspecting commercial animal handling facilities. ((King County's Illicit 3565 Discharge Detection and Elimination program also conducts field screening for 3566 pollution sources by designating high priority areas, and conducting bacteria sampling 3567 and monitoring.)) 3568
- 3569 In addition to the TMDLs found in the Permit, several others have been approved within 3570 King County((:)), including for the Snoqualmie River, Little Bear Creek, Lake Fenwick, 3571 Lake Sawyer, the Duwamish River, Lower Green River, Pipers Creek, North Creek, Newaukum Creek, Puyallup River, White River, and Fauntleroy Creek. King County 3572 3573 TMDLs under development or pending approval by the Environmental Protection Agency include Green River and Newaukum Creek, White and Puyallup Rivers, and 3574 3575 Soos Creek. ((A list of these Water Quality Improvement Projects in King County can be 3576 found at:
- 3577

http://www.ecy.wa.gov/programs/wq/tmdl/TMDLsbyCounty/king.html.

- 3578 3579 E-110 Surface waters designated by the state as Water Quality Impaired 3580 under the Clean Water Act (water bodies included in Category 5 of the 3581 Water Quality Assessment) shall be improved through monitoring, 3582 source controls, best management practices, enforcement of existing 3583 codes, and, where applicable, implementation of Total Maximum Daily 3584 Load plans. The water quality of other water bodies shall be protected 3585 or improved through these same measures. 3586
- 3587E-111King County shall evaluate development proposals subject to drainage3588review in unincorporated King County to assess whether the proposed3589actions are likely to cause or contribute to violations of Washington3590State water quality standards in receiving waters for individual

3591	pollutants of concern and identify mitigation or requirements to avoid
3592	the impacts when appropriate.
3593	
3594	There are certain actions that can be used to help moderate water quality. Such actions
3595	may include maintaining and increasing connections between surface waters and
3596	shallow groundwater or hyporheic flow, promoting riparian vegetation and stormwater
3597	structural retrofitting using infiltration techniques including Low Impact Development
3598	techniques, and increasing the physical complexity of river channels.
3599	
3600	E-112)) E-455 When environmental monitoring, testing, or reliable data indicates
3601	human activities have caused impaired water quality, such as increased
3602	water temperature, fecal contamination, low oxygen, excess nutrients,
3603 3604	metals, or other contaminants, King County shall take actions ((which will)) <u>that</u> help moderate those impairments.
3604	wm)) <u>that</u> help moderate those impairments.
3606	((E-705 King County shall fully comply with the monitoring requirements in its
3607	National Pollutant Discharge Elimination System permits, including
3608	seeking compliance strategies that are cost-effective and useful.
3609	
3610	E-461)) E-456 King County shall use incentives, regulations, capital projects, open
3611	space acquisitions, public education and stewardship, and other
3612 3613	programs, ((like)) <u>such as</u> recycled water, to manage its aquatic
3613	resources (((Puget Sound, rivers, streams, lakes, freshwater and marine wetlands and groundwater))) and to protect and enhance their multiple
3615	beneficial uses. Use of water resources for one purpose should, to the
3616	fullest extent practicable, preserve opportunities for other uses.
3617	
3618	((E-462)) <u>E-457</u> Development shall occur in a manner that supports continued
3619	ecological and hydrologic functioning of water resources and should
3620	not have a significant adverse impact on water quality, ((or)) water
3621	quantity, or sediment transport, and should maintain base flows,
3622	natural water level fluctuations, unpolluted groundwater recharge in
3623	Critical Aquifer Recharge Areas, and fish and wildlife habitat.

3624 ((C.)) <u>V. Upland Areas</u>

3625 ((1.)) <u>A.</u> Forest Cover

King County recognizes the value of trees and forests in both rural and urban 3626 communities for benefits such as improving air and water quality and enhancing fish 3627 3628 and wildlife habitat. Forests absorb and slowly release rainwater to streams and 3629 aquifers, filter runoff, store carbon, and provide food, shade, and cover for wildlife. In 3630 doing so, they help to prevent flooding and erosion, reduce stormwater runoff and increase infiltration, protect drinking water, ((and)) support fish and wildlife and their 3631 3632 habitat, and provide recreational opportunities and health benefits to communities. 3633 ((Therefore, it is important that regulations protecting critical areas like wetlands take 3634 into consideration both regulations and incentive programs intended to conserve forest 3635 cover in upland areas.)) Forested headwaters in upper reaches of watersheds can be 3636 especially important for preventing flooding, improving water quality, and protecting 3637 salmon and other wildlife habitat, given the presence of large areas of with relatively low 3638 levels of development. Forests in rural King County are also relied upon for recreation 3639 and resource use, including harvest and firewood collection and cultivation of special 3640 forest products categorized as edibles, florals, and medicinals. Forest Stewardship 3641 Plans provide mechanisms for tailoring regulations and best management practices for 3642 forest management to individual properties. Completion of one of these plans can also 3643 qualify landowners for tax incentive programs and streamlined permitting. ((The

retention or restoration of forest cover and native vegetation also reduces stormwater
 runoff and maximizes natural infiltration processes, thus reducing the need for
 additional stormwater management.

- 3647 3648 E-447)) E-501 ((King County recognizes that conserving and restoring headwater 3649 and upland forest cover is important for preventing flooding, 3650 improving water quality, and protecting salmon and other wildlife 3651 habitat.)) The central role that forests ((cover)) play((s)) in supporting 3652 hydrologic and other ecological processes should be reflected in 3653 ((policies and programs addressing)) stormwater management, 3654 flooding, fish and wildlife, and open space policies and programs. 3655
- 3656((E-448)) E-502King County's critical areas and clearing and grading regulations3657should provide for activities compatible with long-term forest use,3658including use of recreational trails, firewood collection, forest fire3659((prevention)) risk reduction, forest management, and control of3660invasive plants.
- 3662((E-449)) E-503King County shall promote retention of forest cover and significant3663trees using a mix of regulations, incentives, and technical assistance.
- 3665E-504King County shall identify and implement recommended strategies to3666establish and protect corridors of forest with old-growth characteristics,3667particularly in upper watershed areas and along major river corridors in3668support of habitat for salmon and other wildlife.

3669 ((2. Soils and)) <u>B.</u> Organics <u>and Waste</u>

3670 ((Soils play a critical role in the natural environment. The benefits of healthy soils 3671 include: (1) keeping disease-causing organisms in check, (2) moderating stormwater 3672 runoff, (3) filtering, binding, and biodegrading pollutants, (4) recycling and storing 3673 nutrients, and (5) serving as the basis for forest and agricultural fertility. More recently, 3674 the carbon storage properties of soils have been recognized as a major climate-moderating influence. The properties of a healthy soil are similar to those of a 3675 3676 sponge, faucet and filter. They soak up and store water, naturally regulate the flow of water, and bind and degrade pollutants. The presence of millions of macro and 3677 3678 microorganisms in soil creates a vibrant soil culture where organic material is consumed 3679 and air and water are retained. Nutrients are made available to plants to allow healthy 3680 root growth and oxygen generation. 3681

3682 It is common for healthy native soils to be removed during land development. Even 3683 when soils are not removed, development and other human activity often cause soil 3684 compaction, removal and erosion of healthy, native soils. Fewer organisms are present 3685 in disturbed soils. The resulting decrease in organic matter inhibits the soil's ability to hold water, which increases stormwater runoff. In addition, plants cannot thrive in 3686 3687 disturbed soils because of the lack of nutrients. This, in turn, causes people to use more 3688 chemical fertilizers, pesticides, and water to induce plant growth. The combination of 3689 increased stormwater runoff and increased fertilizer and pesticide use results in greater 3690 water pollution downstream.

3691

3661

3664

Increasing the organic content in disturbed soils can help restore their environmental function. Composted organic materials that might be used include yard debris, food and wood wastes, soiled paper, biochar, biosolids and/or livestock wastes, but not others, such as fly ash from industrial smokestacks. Benefits of incorporating composted organic materials in soils include: improving stream habitat, supporting healthier plants, reducing stormwater runoff, and closing the recycling loop for organic materials. The transformation of degraded soils to enhance their ability to uptake and

3699 store carbon may be the one of the most effective actions that can be taken to mitigate
 3700 the near-term effects of climate change.

3701

3706

3712

3715

3720 3721

3722

3723

3724

3738

3747

3748

3749

3702 It is preferable to leave native soil and vegetation in place as much as possible so that it
 3703 can continue to function as a natural sponge and filter, minimizing erosion and
 3704 stormwater runoff. Where soil is disturbed or removed, soil function can be improved
 3705 by providing soil with adequate depth and organic matter content.

3707E-450Site development practices should minimize soil disturbance and
maximize retention of native vegetation and soils. Where soil
disturbance is unavoidable, native soils should be stockpiled on site
and reused on site in accordance with best management practices to
the maximum extent practicable.

3713E-451King County shall require the use of organic matter to restore disturbed3714soils on site developments.

Salmon play an important role in sustaining the productivity of soils in riparian and
 floodplain areas. Salmon mature in saltwater environments and then spawn and die in
 their original spawning streams. In doing so, salmon transport nutrients back to
 watersheds that eventually become available to vegetation.

E-452 The role of salmon in transferring nutrients and maintaining the productivity of riparian and floodplain soils should be incorporated in the development of salmon and soil conservation plans.))

Organics comprise a large portion of the waste generated by King County residences, businesses, and farms. <u>Management of ((Ŧ))t</u>his organic waste stream requires significant solid waste, farm management, and wastewater treatment resources. Many of these "waste materials" (yard debris, food and wood waste, soiled paper, biosolids, and agricultural livestock wastes), can be <u>minimized</u>, recycled, and reused to provide numerous uses that are beneficial to the environment and the economy.

((King County has a long history of resource conservation and waste recycling.
 Programs have successfully captured organic materials for beneficial use such as yard
 debris and biosolids applications to farms, forests and composting. However, large
 volumes of organic waste continue to be disposed of in the landfill. Significant volumes
 of livestock waste generated in the suburbs, Rural Areas and Natural Resource Lands
 are inadequately managed, which can adversely impact water quality and fish habitat.

Although efforts are underway to increase the amount of organic materials that are recycled, the region still lacks the capacity to process all of these materials. Along with its efforts to promote beneficial use of these products, King County is working with organic material processors and others to try and increase the processing capacity in the region:)) The Re+ program focuses on actions to minimize King County's environmental footprint, create more green jobs, divert waste from the landfill, and ensure everyone in King County has equitable access to efficient waste services.

((E-453)) <u>E-505</u> King County should implement programs to improve availability and markets for organic materials for soils that have been disturbed by new and existing developments.

 3750
 3751 ((E-454 King County shall regard the region's organic waste materials as 3752 resources which should be reused as much as possible, and minimize 3753 the disposal of such materials.
 3754

3755E-455))E-506King County shall work with regional ((stakeholders)) partners to3756ensure a viable and safe organics recycling infrastructure that allows for

3757	yard, food, wood, biosolids, manure and other organic wastes to be
3758	turned into resources benefiting climate change, soil health, water
3759	quality, and maximizing landfill diversion, consistent with the County's
3760	zero waste of resources goals.
3761	-

((King County seeks to divert as much material as possible from disposal to reduce overall costs of solid waste management, conserve resources, protect the environment, and strengthen the county's economy (see Chapter 9: Services, Facilities and Utilities, F-266). In many cases, organic materials can be recycled into a beneficial, highly valued resource helping to meet these diversion goals. Beneficial uses of organic materials include, but are not limited to, the following: soil amendment, mulch, erosion control, and even energy production.

3769

3783

3791

3770 King County recognizes that in most cases, the best management method for yard 3771 debris and livestock wastes is to compost it on the property where it is generated. 3772 Examples of residential onsite yard debris management techniques include grasscycling 3773 (leaving the grass on the lawn when it is cut) and backyard composting.

- 3774 3775 E-456)) E-507 King County shall promote, encourage, and require, where 3776 appropriate, the beneficial use and reuse of organic materials in soils 3777 and minimize their disposal, including but not limited to their use in the 3778 following activities: agriculture and silviculture; road, park, and other 3779 public project development; site development and new construction; 3780 restoration and remediation of disturbed soils; nursery and sod 3781 production; and landscaping. For these purposes, organic materials do 3782 not include fly ash.
- 3784((E-457)) E-508King County agencies shall use and promote compost ((recycled
organic products, such as compost,)) whenever feasible ((and promote
the application of organic material)) to compensate for historical losses
of organic content in soil caused by human actions, including
development, landscaping, agricultural practices, and resource
extraction. Where use of compost is not feasible, agencies shall
consider use of other recycled organic products, such as biosolids.
- 3792((E-458)) E-509King County ((will)) shall seek to enhance soil quality((,)) and3793protect water quality and biodiversity across the landscape by3794developing policies, programs, and incentives that support the goal of3795no net loss of organic material.3796
- Biosolids are the nutrient_rich organic product from the wastewater treatment process which can be recycled as a soil amendment. At King County's wastewater treatment plant, solids are removed from the wastewater and treated in large digesters where the organic solids are stabilized, reducing the volume by half. After digestion, a portion of water is removed, leaving the semisolid material ready for recycling.
- The Biosolids Management Program's mission is to safely and sustainably return carbon and nutrients to the land through the use of biosolids. The Biosolids Management Program pursues environmental stewardship through diverse public-private partnerships. One hundred percent of county biosolids are beneficially used through the forestry and agriculture programs. ((A portion of the County's biosolids are composted as a Class A product. 3809

3810E-510King County supports and should explore ways to beneficially use3811biosolids locally, whenever feasible.

3812

- 3813 On-farm composting as a method of managing livestock waste and other organic waste
- materials is ((becoming)) an important waste management strategy for farmers. Benefits
 of on-farm composting include:
- 3816 Additional revenue from the sale of compost;
- Reduced costs for water, fertilizers and pesticides, due to reduced water usage and
 reduced reliance on fertilizers and pesticides;
- 3819 Reduced impacts to surface waters; and
- 3820 Increased crop yields.

3822 ((King County's Livestock Management Ordinance, adopted in December 1993, sets 3823 manure management standards in order to minimize impacts to water quality by 3824 preventing farm wastes from contaminating the region's watersheds. The Livestock 3825 Management Ordinance)) Regulations for managing livestock encourage((s)) farmers to 3826 implement farm plans in collaboration with the King Conservation District to protect and 3827 enhance natural resources, including water quality. The King Conservation District 3828 provides technical assistance and education to agricultural landowners on how to 3829 implement best management practices, which include manure storage facilities and 3830 pasture renovation, as well as stream and wetland buffer fencing ((and clean water 3831 diversion)). The resulting farm plans can include provisions for ((onsite)) on-site and 3832 ((offsite)) off-site management of livestock wastes and strategies to integrate processing 3833 livestock wastes with other organic waste materials. These strategies should be 3834 consistent with the King County Comprehensive Solid Waste Management Plan, 3835 including but not limited to on-farm composting and land application of processed yard 3836 debris. Farm plans that address livestock waste management further compliance with 3837 the provisions of the Clean Water Act and other federal and state mandates regarding 3838 water quality. 3839

3840((E-460)) E-511King County shall promote livestock waste management that keeps3841waste out of stormwater runoff and from infiltration to groundwater,3842and enhances soil health by methods such as combining livestock3843waste with other plant and animal waste material for incorporation into3844crop soils.

3845 ((G. Hazardous Waste))

3846 Throughout King County, businesses use and generate hazardous materials as part of 3847 their normal operations. There are numerous rules and requirements for the proper 3848 management of these materials and requirements can vary slightly by jurisdiction. 3849 Often the businesses will learn of these requirements after they have found out that they 3850 are not in compliance. To help mitigate the potential harmful effects to human health 3851 and the environment and to minimize the economic impacts to businesses that may 3852 generate hazardous chemicals, King County provides education and technical 3853 assistance to businesses on requirements for proper management and disposal of 3854 hazardous chemicals, as well as information on less toxic alternatives.

3855

Contacting businesses with information on proper hazardous waste disposal as early as
possible in the business development phase can help to prevent improper disposal of
hazardous waste and associated risks to public safety and the environment. Taking a
preventative approach can also help to avoid costly code violations.

3861
3862((E-499t)) E-512 King County should review permits for new businesses ((permit
and change of use applications for businesses)) that propose to use
hazardous chemicals or generate hazardous waste as part of their
operations. The ((c))County should offer to provide technical assistance

3877

related to hazardous waste disposal requirements((, spill response,)) and non-toxic alternatives.

³⁸⁶⁸ VI. Geologically Hazardous Areas

3869 King County is located at a tectonically active convergent plate margin, which is 3870 characterized by dynamic geologic processes including active mountain building, 3871 abundant seismic activity, and volcanism. In addition, the relatively recent glacial history 3872 has resulted in the creation of numerous steep and unstable hillsides throughout the 3873 county, many of which are prone to naturally occurring landslides. Snow avalanches are 3874 also a common occurrence in the Cascade Mountains in ((E)) eastern King County. The 3875 hazardous impacts from these processes can be worsened with climate change, and 3876 increases in extreme wet weather increase risks from geologic hazards.

3878 Often, ((times)) the result of these naturally occurring events can be beneficial to the 3879 environment((-)) by providing gravel and woody debris in streams and rivers((-)) and continuing the process of natural regeneration. Salmon need gravel for spawning and 3880 3881 in-stream debris for cover and to provide shade and regulate temperature. While the 3882 relatively flat Puget Lowlands made it historically ideal for development and agriculture, 3883 the natural processes of erosion and deposition will continue. King County must 3884 balance the positive benefits of these natural occurrences with any adverse impacts that 3885 pose a threat to public health and safety. The ((c)) ounty must also strike a balance 3886 between allowing naturally occurring landslides and erosion, and the need to prevent 3887 the unnatural acceleration of landslides and erosion due to development activities. 3888

Coal mines have created additional areas of subsidence and instability in addition to those ((which)) that occur naturally. When human activity occurs in areas subject to such active geologic processes, the potential consequences to life, property, and environmental integrity can be enormous. If geologic processes are recognized and appropriately addressed in the course of development activities, adverse consequences can be substantially reduced if not completely eliminated.

3895 A. Erosion Hazard Areas

Virtually any area in King County can experience soil erosion if subjected to inappropriate grading and construction practices. The ((US)) <u>United States</u> Department of Agriculture's ((Soil)) <u>Natural Resources</u> Conservation Service has identified certain soil types in King County as being especially subject to erosion((;)) if disturbed. These Erosion Hazard Areas may not be well suited to high-density developments and intensive land uses because of the sensitivity of these soils to disturbance.

- 3903
3904((E-501
Grading and construction activities shall implement erosion control
best management practices and other development controls as
necessary to reduce sediment and pollution discharge from
construction sites to minimal levels.3905
3906construction sites to minimal levels.
- 3908
3909E-601
minimizeLand uses ((permitted))
allowed in Erosion Hazard Areas shall
disturbance and should maximize retention and
replacement of native vegetative cover.3910replacement of native vegetative cover.3911
- 3912((E-503)) E-602Slopes with a grade of 40((%)) percent or more shall not be
developed unless the risks and adverse impacts associated with such
development can be reduced to a non-significant level.3915((No-disturbance zones shall be designated where basin plans identify
the need to prevent erosion damages in areas that are extremely

3917

sensitive to erosion impacts. Properly designed stormwater tightlines may be allowed within designated no-disturbance zones.

Vegetation is an important component of the natural environment. This general term refers to all plant life growing at, below or above the soil surface. It includes trees, shrubs, herbs, grasses and aquatic plants. Vegetation, especially forests, provides many 3922 significant ecological functions. Vegetation absorbs, filters and slows surface water flow. 3923 3924 This is particularly important over aquifer recharge areas. Native vegetation also 3925 provides wildlife habitat to which native species are well adapted. Forests are key 3926 components in atmospheric cycles; they absorb carbon dioxide, produce oxygen and 3927 filter particulate matter. Additionally, they absorb noise and are aesthetically pleasing. 3928

3929 Noxious weeds are nonnative invasive plants that pose a threat to health and safety, agriculture, wildlife, wetlands and recreational areas. They tend to spread in areas that 3930 3931 have been disturbed by urban development and agriculture and are difficult to 3932 eradicate once they become established. Without natural predators, some noxious 3933 weeds can displace native plant communities, reducing plant diversity. Invasive plants also decrease the quality of wildlife habitats, reduce visual quality, and increase 3934 3935 maintenance and production costs for natural resource managers and farmers.

3936 3937 E-504 King County should protect native plant communities by encouraging 3938 management and control of nonnative invasive plants, including 3939 aquatic plants. Environmentally sound methods of vegetation control 3940 should be used to control noxious weeds.

3941 3942 E-506 The use of native plants should be encouraged in landscaping 3943 requirements and erosion control projects, and in the restoration of 3944 stream banks, lakes, shorelines, and wetlands. 3945

3946 E-507 In response to watershed-based salmon conservation Water Resource 3947 Inventory Area plans and as part of King County's continued basin 3948 planning and stewardship programs, King County may adopt 3949 vegetation retention goals for specific drainage basins. These goals 3950 should be consistent with R-334, as applicable. The county should 3951 adopt incentives and regulations to attain these goals, and the county 3952 should monitor their effectiveness.))

I andslide Hazard Areas Β. 3953

3954 Certain hillsides in King County are either naturally unstable or susceptible to instability 3955 when disturbed. These hillsides contain slopes greater than 15((%)) percent, are 3956 underlain by impermeable soils, and are subject to seepage. They also include areas 3957 that have experienced landslides in the past. 3958

3959 Many of the largest and most active landslides in King County are associated with the 3960 steep slopes adjacent to river corridors or along marine shorelines where glacial strata 3961 are eroded and steepened. Areas undergoing rapid undercutting due to stream bank 3962 erosion, wave action, or human alteration of stormwater discharge are potentially 3963 unstable and such areas may be prone to damaging landslides.

3964

3965 Construction in areas susceptible to landslides is expensive and difficult. Landslides on 3966 such slopes following development can result in enormous public and private costs and 3967 severe threats to human health and safety. Such landslides can also cause severe 3968 natural resource damage. 3969

3970 ((Partly in response to the 2014 State Route 530 Landslide,)) King County has 3971 undertaken an effort to refine ((our)) its knowledge of landslide hazard areas using 3972 updated mapping methods. King County ((initiated a project in 2014 to map and **Environment - Page 5-73**

3973 characterize)) has mapped and characterized landslide hazard areas using the best 3974 available Light Detection And Ranging imagery and recent geologic mapping to identify potential areas at risk of ((landsliding)) landslide. Known and potential landslide 3975 3976 hazard areas can be indicated by the known presence of shallow landslides, deepseated slumps, debris fans and flows, rockfalls, avalanches, unstable and over-3977 3978 steepened slopes along river and stream channels, long runout presence or potential. 3979 ((The results of this work will be)) This mapping is used to inform future planning, 3980 outreach, and regulatory decisions.

- 3982((E-507a)) E-603
to ((maintain a)) periodically review and update the
of known and potential landslide hazards ((map and))3983inventory and map
of known and potential landslide hazards ((areas in
unincorporated King County that is based upon the best available
information)) using best available science and current data. ((This
information will be used to inform future planning and guide
development regulations.
- 3990E-507b))E-604King County ((should))shall make landslide hazards information3991readily available to the public ((in order)) to improve the general3992understanding of landslides and their associated hazards. This may3993include making information available on a public website and3994providing outreach and assistance to current and prospective property3995owners and developers.
- 3997 ((E-508)) E-605 Landslide hazard areas shall not be developed unless the risks and 3998 adverse impacts associated with such development are eliminated or 3999 minimized so that they are at a non-significant level. Development 4000 proposed in areas affected by landslide hazards shall be adequately 4001 reviewed and mitigated as needed to eliminate or minimize risk to the 4002 development as well as to ensure the development does not increase 4003 landslide or erosion hazards that would adversely impact adjacent 4004 properties or natural resources.
- 4006
4007((E-508a)) E-606 King County shall consider landslide hazards and related flooding
hazards in the context of hazard communication, operational
preparedness, and emergency response.
- 4009 ((C. Seismic Hazard Areas

3981

3989

4005

4010 King County is an earthquake-prone region subject to ground shaking, seismically
 4011 induced landslide and liquefaction of soil. Areas with low-density soils are likely to
 4012 experience greater damage from earthquakes.
 4013
 4014 E-509 In areas with severe seismic hazards, special building design and

4014E-509In areas with severe seismic hazards, special building design and4015construction measures should be used to minimize the risk of structural4016damage, fire and injury to occupants and to prevent post-seismic4017collapse.

4018 D.)) <u>C.</u> Volcanic Hazard Areas

King County is located in a region characterized by active volcanism. The volcanic hazard that poses the greatest risk to safety and wellbeing of county residents would be from a lahar (volcanic mudflow) originating on ((Mt.)) <u>Mount</u> Rainier and flowing down the White River valley (possibly overflowing into the lower Green River Valley). Ongoing investigations by the ((U.S.)) <u>United States</u> Geological Survey continue to clarify the nature of this hazard. Current information provides the basis for taking steps to mitigate that risk.

4027((E-510)) E-607King County should work with the ((U.S.)) United StatesGeological4028Survey to identify lahar hazard areas and shall work with local4029governments to assess the risk to county residents from lahars and to4030implement appropriate emergency planning and implement4031appropriate development standards.

4032 ((E.)) <u>D.</u> Coal Mine Hazard Areas

4042

4057

4062

4067

4033 King County has a long and varied history of underground and surface coal mining. 4034 Some coal mining was conducted by large, well-capitalized mining companies that used 4035 methods such as detailed underground and surface mapping and protection of surface 4036 improvements. Other mines were small operations or re-mining operations that sought 4037 to maximize coal extraction with less regard for surface impacts or mapping. Some 4038 intensively developed areas of King County are located over abandoned underground 4039 coal workings, including Talbot Hill and the north Benson Hill of Renton, the Spring Glen area around Cascade Vista, East Fairwood, Black Diamond, southwest Issaguah, and the 4040 4041 Newcastle/Coal Creek area.

4043 The greatest dangers to people, wildlife, and surface facilities typically exist around 4044 mine portals, timber chutes, air shafts, and workings which have collapsed to the 4045 surface. Other areas were deep mined by "room and pillar" mining techniques in which 4046 "pillars" of coal were left to provide support for the mining of adjacent "rooms." Once 4047 abandoned, pillars would collapse and rooms of mined-out coal would fill with 4048 collapsed roof material, coal debris, and water. Regional downwarping of these areas 4049 was generally not observable and usually happened in the early years following mining 4050 of a section. Deep-mined areas with a high ratio of overburden/cover-to-void usually 4051 present no hazards for surface development. However, areas with low 4052 overburden/cover-to-void ratio present higher risks and may require more advanced 4053 investigations and construction techniques for development. Mine portals, timber 4054 chutes, airshafts, and workings which have collapsed to the surface require the greatest 4055 need for detailed engineering studies to ensure that these sites are safe for new, 4056 productive use.

4058
4059((E-511)) E-608
property owners and the Office of Surface Mining, Reclamation, and
Enforcement to return lands to their highest productive use by safely
minimizing or eliminating coal mine hazards.

4080 VII. Planning for Disasters

King County has an active <u>emergency</u> planning program((, that goes beyond the land use and supporting services planning, that occurs through the Comprehensive Plan.))
based on the five phases of emergency management (protection, prevention, response, recovery, and mitigation). ((This work takes into account mitigation of hazard impacts prior to disasters, as well as the rebuilding of communities following a disaster. The following diagram illustrates the facets of planning for disasters.

4087

4088 Figure: Resilient King County Planning Model

King County is susceptible to multiple hazards including earthquakes, flooding, and landslides. ((Based on the five phases of emergency management (depicted above),
t))<u>The process of mitigation allows the ((c))County to build more resilient communities</u> by assessing vulnerabilities((;)) and ((taking)) take sustained action to permanently eliminate or reduce risk to future disasters. These actions can inform land use planning, such as in ((the C))critical ((A))areas ((Ordinance)) regulations.

4101

When a disaster does occur, the process of recovery allows the ((c))<u>C</u>ounty to review the
Comprehensive Plan and its core principles, develop a recovery strategy by engaging
the community, and rebuild the community in a way that sustains physical, emotional,
social, and economic ((well-being)) wellbeing.

((E-601)) E-701 King County shall ((incorporate into)) consider high-priority

- 4106
- 4107 4108
- 4109
- 4110
- 4111 4112
- <u>strategies and actions identified in the King County Regional Hazard</u> <u>Mitigation Plan, or successor plans, in</u> its land use and transportation planning, economic development efforts, and natural resource management ((the most promising actions)), to reduce impacts from natural hazards((,)) such as earthquake, flooding, and landslide<u>s</u> ((risk)).
- 4113 <u>V</u>III. Air Quality

4114 A. Overview

4115 ((Clean air, free of pollutants, is essential for the day-to-day quality of life and long-term
4116 health of county residents. King County has shown critical leadership in forging
4117 solutions to air pollution and will continue to do so well into the future.))
4118

King County works ((for clean air)) to ensure clean and healthy air in partnership with the Puget Sound Clean Air Agency, which ((has)) serves as the lead air quality regulatory and monitoring ((responsibilities)) agency for the region in accordance with the Clean Air Act. ((Underlying drivers of the Clean Air Act include protecting public health, reducing property damage, and generally protecting the environment. Because air quality impacts water quality, a better understanding is needed regarding the input of pollutants via air transport from both local and distant sources.

- 4127))The Puget Sound Clean Air Agency is <u>the lead agency</u> responsible for monitoring and 4128 regulating ((six "))criteria air pollutants((" using standards set by the Environmental 4129 Protection Agency. The six "criteria" air pollutants are:
- 4130 Fine particulate matter (dust, soot, smoke);
- 4131 Ground-level ozone (smog);
- 4132 •----Carbon monoxide (gas primarily from vehicle exhaust);
- 4133
 <u>Sulfur dioxide (gas primarily from industrial processes like smelters, paper mills, and power plants);</u>
- 4135 Oxides of nitrogen; and
- 4136 Lead.)) (fine particulate matter, ozone, carbon monoxide, sulfur oxide, oxides of 4137 nitrogen, and lead).
 4138

4139 The Puget Sound Clean Air Agency also focuses on reducing harmful air toxics that 4140 come ((primarily)) from wood smoke and diesel burning((, as well as)) <u>and</u> greenhouse 4141 gases such as carbon dioxide and methane from landfills. ((The Puget Sound Clean Air 4142 Agency is also responsible for regulating)) They also regulate air pollution emissions ((of 4143 air pollution)), such as asbestos and gasoline vapors, from businesses. <u>King County</u> 4144 coordinates with the Puget Sound Clean Air Agency on regional air quality data and on 4145 related community plans and projects.

4147 Efforts to address climate change and improve air quality are strongly linked. For 4148 example, conversion from conventional to ((hybrid)) electric buses and fleet vehicles 4149 ((not only helps to)) reduces greenhouse gas emissions((, but also reduces)) and 4150 emissions of fine particulate((s)) matter that can be harmful to public health. Similarly, in 4151 indoor settings, conversion from gas to electric stoves and furnaces reduces indoor and 4152 outdoor pollution. Additionally, a likely impact of climate change on air quality is an 4153 increase in fine particulate matter from more wildfires and wildfire smoke episodes that 4154 can impact regional air quality and increase ground-level ozone because higher 4155 temperatures enhance the conversion of precursors into ground-level ozone. Ozone 4156 and fine particulate matter can exacerbate health conditions such as asthma, chronic obstructive pulmonary disease, and heart disease, and generally reduce respiratory 4157 4158 system functioning. Because of these linkages, there is significant overlap ((with)) 4159 between this section and the climate change section of this chapter. ((Section II, subpart 4160 B of this chapter relates to reducing greenhouse gas emissions. These strategies usually 4161 concurrently reduce other types of air pollution. Section II, subpart C of this chapter 4162 describes the linkages between climate change and health impacts, including policies 4163 related to minimizing health inequities among vulnerable populations more negatively impacted by climate change and air pollution.)) 4164

4165 B. Ozone, Fine Particulate and Toxics

Reducing criteria pollutants ((will)) continue to be a primary focus for King County. The
ozone strategy identified by the Puget Sound Clean Air Agency for the central Puget
Sound region focuses on reducing volatile organic compounds, which are precursors to
ozone formation. Emission of volatile organic compounds results mostly from vehicles,
as well as to a significant degree from household chemicals and paint evaporation.

4172 In addition to ozone, fine particulate((s)) matter (dust, soot, and smoke) also represent a 4173 serious health threat. Health studies have shown a significant association between 4174 exposure to fine ((particles)) particulate matter and premature death from heart or lung 4175 disease. Fine ((particles)) particulate matter can aggravate heart and lung diseases and 4176 have been linked to effects such as: cardiovascular symptoms; cardiac arrhythmias; 4177 heart attacks; respiratory symptoms; asthma attacks; and bronchitis. These effects can 4178 result in increased hospital admissions, emergency room visits, absences from school or 4179 work, and restricted activity days. Individuals that may be particularly sensitive to fine 4180 ((particles)) particulate matter exposure include people with heart or lung disease, 4181 ((older adults)) <u>people aged 62 years and older</u>, and children. Diesel emissions are one 4182 of the county's largest sources of fine particulate matter emissions. ((King County's 4183 participation in the ultra-low sulfur diesel program, known as "Diesel Solutions," has 4184 made tremendous strides in cleaning up King County Metro's fine particulate 4185 Indoor burning and outdoor burning are a major source of fine emissions.)) 4186 particulate((s)) matter, especially during winter months.

4187

4171

4188 Contributions of fine particulate matter from wildfire smoke are also a growing concern. 4189 Climate change is contributing to an increase in the frequency of large wildfires in the 4190 Pacific Northwest and British Columbia. As a result, King County is seeing more days in 4191 summer with degraded air guality. For example, in 2020, King County experienced 14 4192 days of air quality identified as "unhealthy for sensitive groups" to "hazardous," due to 4193 smoke from fires near Portland, Oregon. In 2022, King County experienced more than 30 days with "moderate" to "very unhealthy" air quality due to smoke from the Bolt 4194 Creek fire near Skykomish. Public Health has partnered with community-based 4195 4196 organizations to develop outreach materials on wildfire smoke hazards, to distribute 4197 box fans and air filters for indoor air filtration, and to set up HEPA air filtration units for 4198 homeless service providers, small businesses, childcare providers, and schools. 4199

4200 ((As a large county with a mix of urban, Rural Area and Natural Resource Lands uses,)) 4201 King County will continue to face risks from air ((toxics)) pollution that can be toxic to 4202 people, pets, and wildlife. Examples of ((air toxics)) toxins that may be present in air 4203 pollution include benzene, formaldehyde, mercury, and dioxins. The air quality impact 4204 of ((toxics)) these toxins cannot be evaluated in isolation. Their greatest health risk 4205 comes from their combined effect. ((National air toxics assessment data indicate that air 4206 toxics risks in the Puget Sound region are in the top five percent in the nation.)) The 4207 Environmental Protection Agency and its regulatory partners at the state and local level 4208 identify steps to reduce toxic air pollutants and provide important health protections((:)) 4209 by reducing toxic emissions from industrial sources; reducing emissions from vehicles 4210 and engines through stringent emission standards and cleaner burning gasoline; and 4211 addressing indoor air pollution though voluntary programs.

4212

4243

4244

4245

4246

4247

4213 Local air monitoring data done by the Washington State Department of Ecology
4214 indicates that diesel exhaust and wood smoke are key contributors to ((toxics)) air
4215 pollution toxins.
4216

4217 ((In 2002, King County Metro became the first transit agency in the United States to test 4218 articulated hybrid-diesel electric buses. King County Metro currently owns 214 4219 articulated hybrid buses, the largest such fleet in the nation. A National Renewable 4220 Energy Laboratory study found articulated hybrids provide a 30% reduction in 4221 greenhouse gases and are 40% more reliable than diesel fueled articulated buses.)) 4222 The U.S. Environmental Protection Agency has adopted increasingly stringent air 4223 pollution standards for heavy-duty vehicles, which has significantly reduced air 4224 pollution. In 2020, Metro retired the last of its diesel-only fleet vehicles; the entire bus fleet is now either diesel electric hybrid or zero-emission. Metro has continued its 4225 4226 efforts to reduce air pollution and greenhouse gas emissions and has committed to 4227 transitioning to a fully zero emission bus fleet by 2035. As of 2023, Metro operates a 4228 fleet of more than 1,300 buses, comprised of approximately 1,145 diesel-electric 4229 hybrids, 174 zero emission trolleys, and 45 zero emission battery electric buses. 4230

4231 ((Wood smoke is a leading contributor to air toxics. King County will examine proposals
 4232 to curtail the impacts of woodstove burning and land-clearing practices in rural parts of
 4233 the county.))
 4234

The focus of King County air quality improvement efforts is to engage in projects and changed practices ((to)) that reduce county emissions, reduce the impacts of poor air quality on health (particularly for frontline communities), and promote policies that incorporate consideration of air quality impacts. Motorized vehicle and other fuel burning engine-related emissions are the primary source of ozone, fine particulate matter, ((toxics)) toxins, and greenhouse gas emissions in King County and therefore should be a primary focus for emissions reduction.

((E-301)) <u>E-801</u> King County should support initiatives that reduce <u>air pollution</u> emissions due to indoor and outdoor wood burning consistent with the actions of <u>the</u> Puget Sound Clean Air Agency to control this source of ((public health threat)) <u>health impacts</u>.

((E-302)) E-802 King County ((will)) shall continue to actively develop partnerships
 with the Puget Sound Clean Air Agency, local jurisdictions, the state,
 and public, private, and ((not-for-profit)) nonprofit groups to promote
 programs, ((and)) policies, and code changes that reduce emissions and
 health impacts of ozone, wildfire smoke, fine particulates, toxics, and
 greenhouse gases, particularly for those populations already
 experiencing health disparities linked to air quality.

4256	E-803 King County shall encourage the use of methods to improve indoor air
4257	guality and reduce smoke infiltration into indoor environments during
4258	wildfire smoke events, particularly for populations already
4259	experiencing health disparities, including people aged 62 and over,
4260	such as air filtration technologies and other mechanisms that reduce
4261	the level of wildfire smoke that can make its way into indoor
4262	<u>environments.</u>
4263	
4264	((More detailed policies related to reducing greenhouse gas emissions and improving
4265	air quality can be found in Section II of this chapter, Chapter 8: Transportation, and
4266	Chapter 9: Services, Facilities and Utilities.
4267	

4268 VII.)) IX. Monitoring and Adaptive 4269 Management

4270 ((King County's environment is constantly changing in response to land and water
 4271 management actions that are within its control, as well as climate cycles and geologic
 4272 processes that are beyond human control. The county makes significant investments in
 4273 projects, programs, and policy implementation to help ensure that its environment
 4274 supports a range of ecological, cultural and economic values that are fundamental to
 4275 the region's quality of life.

4277 King County's policies, regulations, and actions to protect and restore the environment 4278 need to be assessed on an ongoing basis to ensure that they are having the intended 4279 effect, and that they are responding to changing conditions. Efforts to protect the 4280 environment will also need to reflect improvements in knowledge about the natural 4281 environment and how human activity impacts ecological systems, and uncertainties 4282 about ecological and biological processes.))

4284 Assessing the effectiveness of specific and cumulative actions requires data collected 4285 within rigorous monitoring programs. Monitoring provides essential information to 4286 track: (1) changes in the natural and built environment, (2) implementation of planned 4287 and required actions (like construction of wetland mitigation projects), and (3) 4288 effectiveness of environmental protection actions. Monitoring information ((can 4289 support)) is essential to supporting a formal ((A)) adaptive ((M)) management program to 4290 modify policies, goals, and management decisions as necessary, and inform regulatory 4291 change. 4292

4293 Adaptive management can be used to help ((insure)) ensure that projects, programs, 4294 and policies are moving the ((c))County toward its environmental goals over time. 4295 Adaptive ((M)) management is defined as the process of making hypotheses of 4296 management outcomes, collecting data relevant to those hypotheses, and then using 4297 monitoring data to inform changes to policies and actions to better achieve intended 4298 goals. Adaptive management concepts are often applied in programs intended to 4299 address complex natural resource management problems, for example in Water 4300 Resource Inventory Area plans for salmon recovery or in Habitat Conservation Plans to 4301 comply with the Endangered Species Act. The Washington Administrative Code calls for local governments to use monitoring and adaptive management to address 4302 4303 uncertainties in best available science for protecting critical areas like wetlands.

4304

4283

King County conducts a diverse array of monitoring activities, ((ranging from project-specific)) including monitoring of Capital Improvement Projects and legally required monitoring of municipal wastewater and stormwater discharges in compliance with ((National Pollutant Discharge Elimination System)) NPDES permit requirements((, 4309 to)). Effectiveness monitoring is used to evaluate projects and programs to improve

4310 project designs and ecosystem management activities. Ambient monitoring is 4311 performed watershed -wide ((ambient monitoring of)), encompassing groundwater, 4312 rivers, streams, lakes, and marine waters of Puget Sound to the extent that funding 4313 allows. For example, King County maintains a continuous water quality monitoring 4314 program for freshwater streams, rivers, lakes, and marine waters. This long-term 4315 monitoring program informs the County's understanding of changes in water quality 4316 over time ((including those caused by climate change, and contributes to)) allowing for 4317 the identification of emerging pollution issues and sources of water pollution. ((The 4318 monitoring program also allows the quantification of water quality and aquatic habitat improvements.)) The status and trends information provided by long-term monitoring 4319 4320 programs allows for better understanding of how systems are responding to pressures like climate change and human impacts The data collected by these programs 4321 4322 additionally provides the necessary baseline information for many scientific studies conducted in King County wetlands, lakes, streams, and marine waters by ((c))<u>C</u>ounty 4323 4324 scientists, as well as scientists at universities and state and federal agencies.

4325 4326 F

4342

Financial resources for environmental protection programs, including monitoring, are 4327 limited((. Because baseline monitoring does not result in an actual project "on the 4328 ground," and often is not mandated, it may)) and generally do not compete well with 4329 other priorities for limited funding. However, investments in monitoring will provide 4330 essential information for evaluating the effectiveness of current actions and guiding 4331 future policy decisions, priorities, and investments. To make the most efficient use of 4332 limited resources, it is critical that the $((\mathbf{c}))$ county look for opportunities to coordinate its 4333 data collection and dissemination efforts so that they can meet as many information 4334 needs as possible. The ((c))County should also partner with entities conducting 4335 monitoring, including other governments and universities. 4336

4337 ((When data are collected, it is important that its usefulness is maximized. "Metadata" is
4338 background information on data, and is necessary to facilitate the understanding, use,
4339 storage, sharing, and management of data. For example, metadata can describe how a
4340 particular data set was collected, provide definitions for types of data, and describe the
4341 reliability of the data.

- 4343 E-701)) E-901 King County should conduct a comprehensive and coordinated 4344 program of environmental monitoring and assessment to track 4345 long-term changes in climate (((e.g.,)) such as precipitation((,)) and 4346 temperature), water quality and quantity, toxics in fish and shellfish, 4347 land use, land cover and aquatic and terrestrial habitat, natural 4348 resource conditions, and biological resources as well as the effectiveness of policies, programs, regulations, capital improvement 4349 4350 projects, and stormwater treatment facility design. This monitoring 4351 program should be coordinated with Indian tribes, other jurisdictions, 4352 state and federal agencies, ((tribes,)) and universities to ensure the most efficient and effective use of monitoring data. 4353 4354
- 4355
4356
4356((E-702)) E-902
E-902
Accessible((;)) geo-spatial database on environmental conditions to
inform policy decisions, support technical collaboration, and inform the
public. ((All King County monitoring data should be supported by
metadata.4359metadata.

Environment - Page 5-81

4361E-703))E-903King County should establish a decision -support system suitable4362for adaptive management that uses data from its environmental4363monitoring programs.

4364 ((A. Performance Measurement, Performance 4365 Management and KingStat

4366 Like adaptive management in realm of science, performance management includes
 4367 collecting data, analyzing data to inform decision-making, and making programmatic
 4368 course corrections based on this analysis.))
 4369

4370 King County reports to the public both community-level conditions and agency 4371 performance measures. Monitoring data referenced in this chapter serves as a core 4372 element of helping elected officials and the public stay informed about the state of the 4373 environment and the effectiveness of agency programs. 4374

4375 ((The executive's KingStat program is using environmental monitoring data to assess
4376 environmental conditions, develop appropriate county responses, and provide an
4377 opportunity to collaborate and partner with other organizations in making
4378 improvements. With respect to environmental conditions, data used in KingStat
4379 includes marine water, freshwater, terrestrial habitat, fish and wildlife, atmosphere, and
4380 resource consumption.

4382 E-704)) E-904 King County should continue to collect data on key natural 4383 resource management and environmental parameters for use in 4384 ((KingStat, King County's Strategic Plan implementation goals and 4385 objectives, and other)) environmental ((benchmarking)) monitoring 4386 programs. Findings should be reported to the public, partner agencies, 4387 and decision-makers. The information collected should be used to 4388 inform decisions about policies, work program priorities and resource 4389 allocation.

4390 ((B. National Pollutant Discharge Elimination 4391 System Compliance

4392 King County operates under a number of National Pollutant Discharge Elimination 4393 System Permits, including a general Phase I Municipal Stormwater permit, and a number 4394 of general Industrial and Sand and Gravel Stormwater permits for Transit, Solid Waste and Roads facilities. There are individual wastewater permits for wastewater treatment 4395 4396 plants and a solid waste management facility. King County also is issued construction 4397 stormwater permits for capital projects involving land disturbance. Complying with 4398 these permits is a high priority for King County as part of its strategy for protecting 4399 ground and surface water quality.

4400 C. Water Resource Inventory Areas Salmon 4401 Recovery Plan Implementation

4402 D. Effectiveness of Critical Areas Regulations

4403 Under the Growth Management Act, all counties and cities are required to periodically
 4404 review their comprehensive plans and development regulations, including critical area
 4405 regulations, for consistency with the Growth Management Act. Growth Management
 4406 Act also requires local governments to include best available science in the
 4407 development of land use policies and regulations to protect the functions and values of

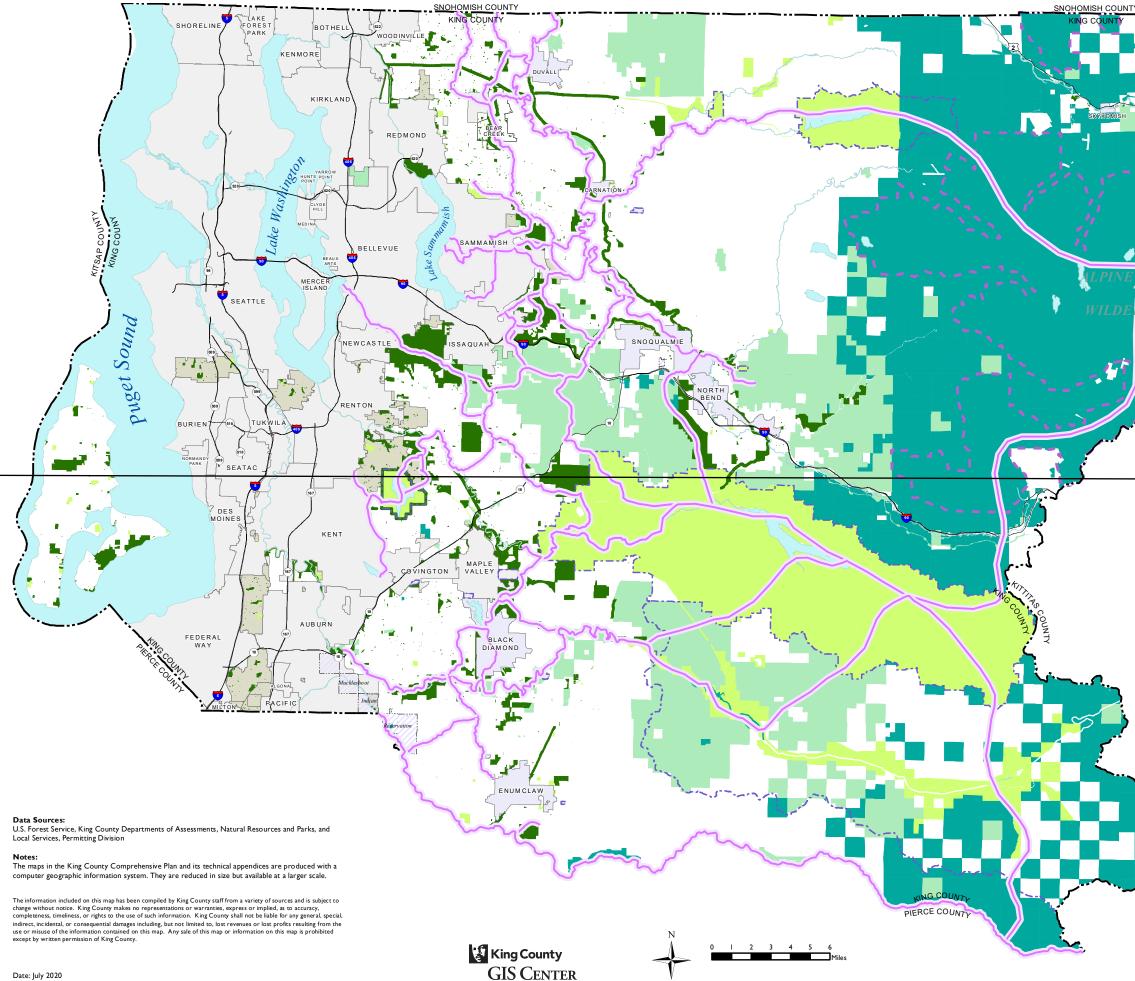

4408 critical areas. Washington State Department of Commerce procedural criteria for 4409 adoption of comprehensive plans and development regulations provide direction on 4410 how local governments should include best available science in their critical area 4411 regulations (Washington Administrative Code 365-195). The procedural criteria call for 4412 the use of a precautionary approach, in which development and land use activities are 4413 strictly limited until the uncertainty is sufficiently resolved, where the science is 4414 uncertain.

4416 Coupled with this precautionary approach should be an adaptive management 4417 program that allows for changes to regulations as new information comes in to address

4418 uncertainties. The adaptive management program is dependent upon a monitoring

4419 program that is designed to obtain the information needed to determine the

4420 effectiveness of regulations.))

SHORELINES

1

2 3

4 I. Introduction

5 A. Recitals

King County adopts the following <u>recitals</u>, which are based on the Shoreline Management Act legislative
findings in Revised Code of Washington 90.58.020. These recitals represent King County's belief and
agreement that a coordinated approach to utilizing, managing, and protecting the shoreline resource is
necessary and essential. ((These recitals apply to the shoreline jurisdiction.))

10 11

12

13

14

15

21

22

23

- 1. Shorelines are some of the most valuable and fragile of King County's natural resources. There is appropriate concern throughout the county relating to the utilization, protection, restoration, and preservation of the shoreline jurisdiction.
- 2. Ever increasing pressures of additional use are being placed on the shoreline jurisdiction, which in turn necessitates increased coordination in its management and development.
- Much of the shoreline jurisdiction and the uplands adjacent thereto are in private ownership.
 Unrestricted construction on the privately owned or publicly owned shorelines is not in the best public interest; and therefore, coordinated planning is necessary ((in order)) to protect the public interest associated with the shoreline jurisdiction while recognizing and protecting private property rights consistent with the public interest.
 - 4. There is a clear and urgent demand for a planned, rational, and concerted effort, jointly performed by federal, state, and local governments, to prevent the inherent harm in an uncoordinated and piecemeal development of King County's shoreline jurisdiction.
- It is the intent of King County to provide for the management of the shoreline jurisdiction by
 planning for and fostering all reasonable and appropriate uses. This program is designed to
 ((insure)) ensure the development in a manner that, while allowing for limited reduction of rights
 of the public in the navigable waters, will promote and enhance the public interest.

((2016)) <u>2024 King County</u> Comprehensive Plan - ((updated December 6, 2022)) <u>Adopted TBD</u> <u>Attachment A to</u> Ordinance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555)) <u>xxxxx</u> (Proposed Ordinance 2023-0440)

- 6. King County shoreline policies are intended to protect against adverse effects to the public health, the land and its vegetation and wildlife, and the waters of the state and their aquatic life, while protecting generally public rights of navigation and corollary rights incidental thereto.
- In the implementation of this chapter, the public's opportunity to enjoy the physical and
 aesthetic qualities of natural shorelines shall be preserved to the greatest extent feasible
 consistent with the overall best interest of the state, the county, and the people generally. To
 this end uses shall be preferred which are consistent with control of pollution and prevention of
 damage to the natural environment or are unique to or dependent upon use of the state's
 shoreline.
- 8. Alterations of the natural condition of the shoreline jurisdiction, in those limited instances when authorized, shall be given priority for single ((family)) detached residences and their appurtenant structures((;)); ports((;)); shoreline recreational uses, including but not limited to, parks, marinas, piers, and other improvements facilitating public access to shorelines((;)); industrial and commercial developments that are particularly dependent on their location on or use of the shoreline jurisdiction((;)); and other development that will provide an opportunity for substantial numbers of the people to enjoy the shorelines.
- 9. Shorelines and shorelands in King County shall be appropriately designated and these
 classifications shall be revised when circumstances warrant, regardless of whether the change in
 circumstances occurs through man-made causes or natural causes. Any areas resulting from
 alterations of the natural condition of the shorelines and shorelands no longer meeting the
 definition of "shorelines of the state" shall not be subject to the provisions of King County
 Shoreline Master Program.
- Permitted uses in the shorelines zone shall be designed and conducted in a manner to minimize,
 insofar as practical, any resultant damage to the ecology and environment of the shoreline
 jurisdiction and any interference with the public's use of the water.
- 53

28

29

30

54 B. About ((King County and)) King County Shorelines

55 1. Geography

King County covers 2,130 square miles and extends from Puget Sound in the west to 8,000-foot Mt.
Daniel at the Cascade crest in the east. King County's shoreline jurisdiction includes saltwater coastline,
river floodplains, and extensive lakes and streams.

- 60 ((2. King County's shoreline jurisdiction))
- 61

King County's diverse shorelines fringe or flow into Puget Sound. Puget Sound and surrounding lowland
 lakes and river valleys are relatively young in geologic terms. Puget Sound is a glacially-carved, deep
 fjord between the Cascade and Olympic mountains.

65

Puget Sound is King County's link to the Pacific Ocean via two connections: the Strait of Juan de Fuca
and the Strait of Georgia. Water, people, and a diverse array of fish and wildlife travel freely between the
ocean and King County via Puget Sound and these Straits.

69

Puget Sound is a large estuary complex created by the freshwater it receives from streams, rivers and
 springs, and tidal exchange introduced through the two Straits. It is one of the more prominent and
 productive estuaries in the world. In 1988, it was identified as an Estuary of National Significance by the

- 73 United States government. Within Puget Sound are numerous small to large estuaries. The largest
- estuary in King County is the Green-Duwamish, although it is now a small remnant of its
- 75 pre-development state.
- 76

((2016)) 2024 King County Comprehensive Plan - ((updated December 6, 2022)) Adopted TBD Attachment A to Ordinance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555)) xxxxx (Proposed Ordinance 2023-0440)

77 Puget Sound consists of five basins. _King County's portion of Puget Sound lies within the Central Basin 78 and includes Vashon-Maury Island. The Central ((or Main)) Basin extends from Admiralty Inlet to Tacoma 79 Narrows. It is the largest and deepest of the basins. The major drainages to the Central Basin, including 80 the Cedar River/Lake Washington watershed (including Lake Sammamish and the Sammamish River), the 81 Green-Duwamish watershed, and the Puyallup River/White River watershed, drain a total area of about 82 2,700 square miles and contribute slightly less than 20((%)) percent of Puget Sound's freshwater input. 83 The Snohomish watershed (including the Snoqualmie River Basin that lies mostly in King County) outlet 84 into Puget Sound lies in Everett.

85

Shorelines of the State in King County, as defined by the Shoreline Management Act, include the total of
all shorelines and shorelines of statewide significance. Shorelines include shorelands, which are defined
as those lands extending landward for 200 feet from the ordinary high water mark, floodways and
contiguous floodplain areas landward 200 feet from such floodways, and all associated wetlands and
river deltas. King County currently includes the 100-year floodplain in its shoreline jurisdiction.
Shoreline jurisdiction under the Shoreline Management Act does not include <u>Indian</u> tribal reservation
lands or lands held in trust by the federal government for ((the)) Indian tribes.

- 93
 94 <u>Table S-1 below shows the number of shoreline miles managed under King County's Shoreline Master</u>
 95 <u>Program.</u>
- 96 97

98

Table S-1. Miles of shoreline under King County's jurisdictionLakeRiver/StreamMarine((234))229((1,696))51

99 ((Puget Sound is located in a region that has great overlap between valuable natural resources and a

100 burgeoning human population. The productivity, diversity and value of the resources are greatly

101 affected by the extent and density of the population. Due to proximity to transportation routes and

102 abundant food and water resources, most of the region's human development since the mid-1800s,

103 when settlers of European descent started to explore and develop the region, has occurred along Puget

104 Sound's shorelines, large lakes and rivers.

105 C. Washington State's Shoreline Management Act

106 1. Overview of)) <u>2. Washington State</u> Shoreline Management Act

107 ((Washington's Shoreline Management Act was passed by the Legislature in 1971 and adopted by the
 108 public in a 1972 referendum. The goal of the Shoreline Management Act is "to prevent the inherent
 109 harm in an uncoordinated and piecemeal development of the state's shorelines."))
 110

- 111 The <u>Shoreline Management</u> Act establishes a broad policy giving preference to uses that:
- 112 113 114

115

116

- Protect the quality of water and the natural environment,
- Depend on proximity to the shoreline ("water-dependent uses"), and
- Preserve and enhance public access or increase recreational opportunities for the public along shorelines.

The Shoreline Management Act establishes a balance of authority between local and state government.
Cities and counties are the primary regulators but the state, through the Department of Ecology, has
authority to review local shoreline master programs and shoreline permit decisions.

120

121 Under the Shoreline Management Act, ((each city and c)) <u>the C</u>ounty adopts a Shoreline Master Program 122 that is based on the Department of Ecology's Shoreline Master Program rules or guidelines, but tailored

123 to the specific needs of the community. ((More than 200 cities and all 39 counties have Shoreline Master

124 Programs. Local Shoreline Master Programs combine both plans and regulations. The plans are a

- 125 comprehensive vision of how shoreline areas will be used and developed over time. Regulations are the
 126 standards that shoreline projects and uses must meet.
- 127

128 The Department of Ecology provides technical assistance to local governments undertaking Master

129 Program amendments. Master Programs and Master Program amendments are only effective after

130 approval from the Department of Ecology. In reviewing Master Programs, the Department of Ecology is

131 limited to a decision on whether or not the Program is consistent with the policy and provisions of the

- 132 Shoreline Management Act and the Department of Ecology's guidelines.))133
- 134 Local governments may modify Master Programs to reflect changing local circumstances, new

information, or improved shoreline management approaches. ((All changes to Master Programs require
 public involvement and approval from the Department of Ecology. At a minimum, local governments

- 137 must hold public hearings.
- 138

In 2003, the Department of Ecology adopted revised state guidelines. Cities and counties with Shoreline
 Master Programs are required to update their Shoreline Master Programs to bring them into compliance
 with these new state guidelines.))

142 ((2. History of shoreline management in King County

King County adopted its original Shoreline Master Program through two ordinances adopted by the
 King County Council and approved by the King County Executive, John Spellman, on May 2, 1978.
 Ordinance 3692 adopted the Shoreline Master Plan, which established the goals, objectives, and

145 Ordinance 3072 adopted the Shoreline Master Program. Ordinance 3688 adopted the development

requiations that implemented the Shoreline Master Plan. By a letter dated June 30, 1978, the

148 Department of Ecology stated that it had approved King County's Shoreline Master Program.

The 1978 Shoreline Master Plan addressed the required elements of the shoreline guidelines originally
 adopted by the Department of Ecology in 1972. The 1978 Plan established goals, objectives, and
 policies for eight different shoreline elements. For each of the four shoreline environments, it also
 established general policies.

155 The 1978 Plan stated that:

156 "Each environment represents a particular emphasis in the type of uses and the extent of
 157 development that should occur within it. The system is designed to encourage uses in each
 158 Environment which enhance the character of the Environment while at the same time requiring
 159 reasonable standards and restrictions on development so that the character of the Environment is
 160 not destroyed."

Finally, the 1978 Shoreline Master Program included general policies for a variety of different shoreline use activities, including agriculture, mining, recreation, and residential development. Associated shoreline regulations establish the designation criteria, the allowed uses, and development standards for the four shoreline environments recognized by the 1972 state guidelines.

166

167 In 1990, the King County Council adopted regulations governing environmentally sensitive areas, some 168 of which include areas also within shoreline jurisdiction. (Ordinance 9614) King County updated its 169 critical areas regulations effective January 1, 2005. (Ordinances 15032, 15033, and 15034) King 170 County's Critical Areas Regulations and its Shoreline Master Program both provide that the regulations 171 that areas regulations are to a physical areas of a conflict.

- 171 that are most protective of the environment apply in the case of a conflict.
- 172

173 3. Shoreline jurisdiction under the Shoreline Management Act

174 D.)) <u>C.</u> King County's Shoreline Master Program

The Shoreline Master Program adopted by King County provides a legal framework for decision((-))making on land use and other activities that complies with the Shoreline Management Act. This section describes the elements of the Shoreline Master Program, with the details being further ((developed)) described throughout this chapter.

179 1. Components of the Shoreline Master Program

180 The King County Shoreline Master Program consists of this chapter and the implementing shoreline181 management regulations.

182

183 This chapter describes King County's shoreline goals and policies. It addresses the shoreline jurisdiction, 184 overall shoreline policy goals, shoreline element policies, Shoreline Master Program relationship to other 185 laws, shoreline environment designations, environmental protection, shoreline use and modification, 186 and administrative policies.

The terms "Shoreline Master Program," "Shoreline Program" and "Program" are all used throughout this
 chapter to describe King County's shoreline policies (this chapter) and shoreline management
 regulations in their entirety.

192 The following documents provide supporting information for these goals and policies: 193

King County Shoreline Protection and Restoration Plan (September 2010): The Shoreline Protection and Restoration Plan summarizes the methods and results of King County's shoreline analysis with respect to restoration planning, the elements and applicability of the restoration plan, and the ways in which shoreline restoration is expected to occur over time.

King County Shoreline Public Access Plan (September 2010): The Shoreline Public Access Plan includes an inventory of existing formal and informal shoreline public access opportunities in the unincorporated area, and identifies gaps in public access opportunities. The Shoreline Public Access Plan describes King County's priorities for providing new public access to major shorelines in the unincorporated area.

King County Shoreline Cumulative Impacts Assessment (September 2010): The Shoreline Cumulative Impacts Assessment provides a mechanism for examining the potential success of ((c))<u>C</u>ounty policies and regulations in meeting the goal of no net loss of shoreline ecological processes and functions.

King County Shoreline Inventory and Characterization (May 2007): The Shoreline Inventory and Characterization includes the data and analytic methods used to develop King County's shoreline inventory and shoreline characterization (including evaluation of existing physical and shoreline ecological processes and functions, public access and recreation, land use and economic development, public facilities and utilities, and archaeological and historic resources). In addition, the Shoreline Inventory and Characterization includes methodologies for cumulative impact analysis associated with shoreline management and comprehensive shoreline restoration planning. ((Specific data can be found at: http://www.kingcounty.gov/shorelines.))

King County Shoreline Map Folio ((and List)) (September 2010): The Shoreline Map Folio includes all maps produced and referenced as part of the Shoreline Master Program, with the exception of those maps included in this chapter.

((2016)) 2024 King County Comprehensive Plan - ((updated December 6, 2022)) Adopted TBD Attachment A to Ordinance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555)) xxxxx (Proposed Ordinance 2023-0440)

223 King County Shoreline List (December 2020): The King County Shoreline List includes all streams 224 and lakes within the shoreline jurisdiction. ((All geographic information can be found at: 225 http://www.kingcounty.gov/shorelines))

226 2. Shoreline ((p))Policies

227 The Shoreline Master Program contains specific policies relating to a wide variety of shoreline uses and 228 issues. 229

230 Shoreline policies establish broad shoreline management directives. They are statements of intent by 231 King County that direct or authorize a course of action or specify criteria for regulatory or non-regulatory 232 action. The policies serve as the basis for regulations that govern use and development along the 233 shoreline. 234

235 King County's shoreline policies must: 236

237

238

239

240

241

242

243

244

- 1. Be consistent with the Shoreline Management Act;
- 2. Address the Master Program elements of Revised Code of Washington 90.58.100;
- 3. Include policies for environmental designations as described in Washington Administrative Code 173-26-211;
- 4. Be designed and implemented in a manner consistent with all relevant constitutional and other legal limitations on regulation of private property; and
- 5. Be consistent with the King County Comprehensive Plan ((and functional plans adopted as components of the Comprehensive Plan)).

245 Shoreline policies provide a comprehensive foundation for the Shoreline Master Program regulations, 246 which are more specific standards that are used to evaluate shoreline development proposals. King 247 County must evaluate permit applications in light of the shoreline policies and may approve a permit 248 only after determining that the development conforms to the policies in the Shoreline Master ((Plan)) 249 Program. 250

251 In addition, shoreline policies assist in prioritizing King County's spending on facilities and services within 252 shorelines of the state. Finally, the shoreline policies provide direction for regional issues such as 253 resource management, environmental protection, transportation, inter-governmental coordination, and 254 regional planning.

255 Shoreline Environments 3.

256 The Shoreline Management Act requires that shoreline ((management)) programs classify shoreline 257 areas into specific environment designations. ((The Department of Ecology's guidelines recommend six 258 different environment designations, but does not require that local programs adopt this particular 259 scheme. King County's 1978 Shoreline Master Program adopted the four environment designations 260 recommended by the Department of Ecology at that time: Urban, Rural, Conservancy, and Natural. In 261 this update King County is adopting eight environment designations in total, based on the 262 recommendations from the Department of Ecology.)) These environment designations are ((+)) listed 263 below and further discussed in the "Shoreline Environment Designations" section of this chapter.

- 264 High Intensity Shoreline Environment _
- 265 **Residential Shoreline Environment** _
- 266 _ **Rural Shoreline Environment**
- 267 **Conservancy Shoreline Environment** Ξ
- 268 **Resource Shoreline Environment** _
- 269 **Forestry Shoreline Environment** _
- 270 Natural Shoreline Environment -

<u>- Aquatic Environment</u>

((High Intensity Shoreline Environment: Applied to areas that provide high-intensity water-oriented commercial, transportation, and industrial uses.

Residential Shoreline Environment: Applied to accommodate residential uses at urban densities, while allowing for non-residential uses that are consistent with the protection of the shoreline jurisdiction.

Rural Shoreline Environment: Applied to accommodate rural residential shoreline development, while allowing for rural non-residential uses that are consistent with the protection of the shoreline.

Conservancy Shoreline Environment: Applied to protect and conserve the shoreline for ecological, public safety, and recreation, purposes. Includes areas with important shoreline ecological processes and functions, valuable historic and cultural features, flood and geological hazards and recreational opportunities. Residential areas can also be designated as conservancy shorelines.

Resource Shoreline Environment: Applied to allow for mining and agriculture land uses, except for shorelines that are relatively intact or that have minimally degraded shoreline processes and functions.

Forestry Shoreline Environment: Applied in areas to allow for forest production and protect municipal water supplies.

Natural Shoreline Environment: Applied to shorelines that are relatively intact or have minimally degraded shoreline processes and functions that are intolerant of human use.

Aquatic Shoreline Environment: Applied to the areas waterward of the ordinary high water mark.

301 4 Shoreline program elements

The Shoreline Management Act identifies eight "program elements" that must be addressed and
 included in local shoreline master programs:
 304

Economic development element that considers the location and design of industries, industrial projects of statewide significance, transportation facilities, port facilities, tourist facilities, commerce, and other developments that are particularly dependent on shorelines of the state.

Public access element that considers public access to publicly owned land along shorelines of the state.

Recreational element that identifies recreational opportunities along shorelines, such as parks, tidelands, beaches, and recreational areas, and that pursues acquisition through implementation of the King County Shoreline Master Program.

Circulation element that consists of the general location and extent of existing and proposed major thoroughfares, transportation routes, terminals, and other public utilities and facilities.

Land use element that considers the general distribution and location, as well as the extent of use
 on the shorelines and adjacent areas for housing, business, industry, transportation, agriculture,
 natural resources, recreation, education, public buildings and grounds, and other categories of
 public and private use of the land.

Conservation element that addresses the preservation of natural resources including, but not limited to, scenic vistas, aesthetics, and vital estuarine areas for fish and wildlife:

Historic, cultural, scientific and educational element that prevents the destruction of or damage to any site having historic, cultural, scientific, or educational value as identified by the appropriate authorities, including affected Tribes, and the state office of archaeology and historic preservation.

Flood hazard element that considers the prevention and minimization of flood damages.

333 5.)) <u>4.</u> Shoreline modifications and uses

334 ((The Shoreline Management Act requires that local Shoreline Master Programs distinguish between
 335 shoreline modifications and shoreline uses.))
 336

The Shoreline Management Act makes a distinction between a shoreline use and a shoreline modification. A shoreline use is an activity that is allowed within the shoreline((s)) jurisdiction. In most cases, ((in order)) to engage in an activity, the shoreline must be modified. Shoreline modifications often involve construction of a physical element, such as a dike, breakwater, dredged basin, or fill, as well as other actions such as clearing, grading, application of chemicals, or significant vegetation removal. This means that shoreline modifications are often undertaken in support of or in preparation for an activity along shorelines.

Shoreline modifications are generally related to construction of a physical element, such as a dike,
 breakwater, dredged basin, or fill, but can include other actions such as clearing, grading, or application
 of chemicals. A shoreline modification is usually undertaken in support of or in preparation for a
 shoreline use.

Shoreline uses are classified as "water-dependent," "water-related," "water-enjoyment," or "water-oriented."

A water-dependent use is a use or portion of a use that cannot exist in a location that is not adjacent to the water and that is dependent on the water by reason of the intrinsic nature of its operations.

A water-related use is a use or portion of a use that is not intrinsically dependent on a waterfront location but whose economic viability is dependent upon a waterfront location because:

(a) The use has a functional requirement for a waterfront location such as the arrival or shipment of materials by water or the need for large quantities of water; or

(b) The use provides a necessary service supportive of the water-dependent uses and the proximity of the use to its customers makes its services less expensive or more convenient.

A water-enjoyment use is a recreational use or other use that facilitates public access to the shoreline as a primary characteristic of the use; or a use that provides for recreational use or aesthetic enjoyment of the shoreline for a substantial number of people as a general characteristic of the use and which, through location, design, and operation, ensures the public's ability to enjoy the physical and aesthetic qualities of the shoreline. In order to qualify as a water-enjoyment use, the use must be open to the general public and the shoreline-oriented space within the project must be devoted to the specific aspects of the use that fosters shoreline enjoyment.

A water-oriented use is a use that is water-dependent, water-related, water-enjoyment, or a
 combination of such uses.

374 II. Shoreline Jurisdiction

375 A. King County's Responsibility to Regulate Shorelines

376 ((1. King County assumes primary responsibility for shoreline planning and 377 regulation

378 King County has primary responsibility for shoreline management planning and for the administration of
 379 shoreline regulations within its jurisdiction.
 380

381S-101King County has primary responsibility within its boundaries for planning required by382the Shoreline Management Act and for administering its shoreline regulatory program.383

384 King County recognizes that its Shoreline Master Program is subject to review and approval by the
 385 Washington State Department of Ecology and that the Shoreline Master Program must be consistent
 386 with the policies and provisions of the Shoreline Management Act (Revised Code of Washington 90.58).

387 2. King County's Shoreline Master Program is intended to be consistent with the 388 Shoreline Management Act & Guidelines

King County's Shoreline Master Program is intended to be consistent with the required elements of the
 Department of Ecology's guidelines for implementing the Shoreline Management Act that are found in
 Chapters 173-26 and 173-27 of the Washington Administrative Code. King County's Shoreline Master
 Program shall be interpreted consistently with the Shoreline Management Act. In the event of a conflict
 between Shoreline Management Act and King County's Shoreline Master Program, the Shoreline Master
 Program should be interpreted to give meaning and effect to the Shoreline Management Act.

396 397 398 398 399 399 399 399 399 390 390 391 392 393 394 395 396 397 398 399 399 399 390 390 391 391 392 393 394 395 395 396 397 398 399 399 399 399 399 399 390 390 391 391 392 393 394 394 395 396 397 398 398 399 399 399 399 390 390 390 391 391 392 393 394 394 395 395 396 397 398 398 399 399 399 399 390 390 390 391 391 392 393 394 394 395 396 397 398

401((S-103King County's Shoreline Master Program is to be interpreted consistently with the402required elements of the shoreline guidelines found in Chapters 173-26 and 173-27 of403the Washington Administrative Code.

404 3. King County's Shoreline Master Program is to be liberally construed

405 The Shoreline Management Act explicitly provides that it is exempt from the rule of strict construction 406 and must be liberally construed to give full effect to the Act's objectives and purposes. By adopting a 407 liberal standard of construction, the state Legislature demonstrated the importance it attached to 408 protecting the shoreline and accomplishing the goals and policies of the Shoreline Management Act. 409 Consistent with this mandate, and because King County believes that accomplishing the goals and 410 objectives of the Shoreline Management Act within the county is of primary importance, the Shoreline 411 Master Program is to be liberally construed to accomplish its objectives and purpose. 412 413 King County's Shoreline Master Program is exempted from the rules of strict S-104 414 construction and shall be construed liberally to give full effect to its objectives and purpose.))

415 416

417 B. <u>King County's Shoreline Jurisdiction</u>

418 ((1. Shoreline jurisdiction extends over all "shorelines" and "shorelines of 419 statewide significance" within unincorporated King County))

The Shoreline Management Act applies to all "shorelines of the state," ((:" "Shorelines of the state" are defined to)) which include "shorelines" and "shorelines of statewide significance." ((It is important to understand the distinction between the terms "shorelines" and "shorelines of statewide significance." Both)) These terms are used throughout the Shoreline Management Act and define the scope of King County's shoreline jurisdiction. The distinction is important because the Shoreline Management Act imposes greater and more specific obligations when dealing with shorelines of statewide significance. 426

427 a. <u>"Shorelines of the state" are defined in the Shoreline Management Act as follows:</u> 428 "Shorelines of the state" are the total of all "shorelines" and "shorelines of statewide significance"

within the state.

429

- 430
 431 b. "Shorelines" ((Shorelines)) are defined in the Shoreline Management Act as follows:
 432 "Shorelines" means all of the water areas of the state, including reservoirs, and their associated
 433 shorelands, together with the lands underlying them; except (i) shorelines of statewide
- shorelands, together with the lands underlying them; except (i) shorelines of statewide
 significance; (ii) shorelines on segments of streams upstream of a point where the mean annual
 flow is 20 cubic feet per second or less and the wetlands associated with such upstream
 segments; and (iii) shorelines on lakes less than 20 acres in size and wetlands associated with
 such small lakes.
- 439 ((b.)) <u>c.</u> "Shorelines of statewide significance,"((Shorelines of statewide significance,)) as specifically defined in the Shoreline Management Act, include:
- 441 Those areas of Puget Sound between the ordinary high water mark and the line of extreme
 442 low tides;
- 443 Lakes, whether natural, artificial or a combination thereof, with a surface acreage of 1,000
 444 acres or more measured at the ordinary high water mark; and
- 445 Natural rivers or segments thereof downstream of a point where the mean annual flow is
 446 measured at 1,000 cubic feet per second or more.
 447
- In unincorporated King County, the water bodies that qualify as shorelines of statewidesignificance include:
- 450 The marine waters around Vashon-Maury Island
- 451 Northeast Lake Washington (north of Kirkland) and southwest Lake Washington (west of Renton)
- 453 Lake Sammamish at Marymoor State Park and Lake Sammamish State Park
- 454 Mud Mountain Reservoir and White River from river mile 15.5 to river mile 46 (excluding the
 455 Muckleshoot Indian Reservation between river mile 8.9 and river mile 15.5)
- 456 Green River from its confluence with the Duwamish River to river mile 95
- 457 Duwamish River from river mile 3.5 to river mile 5
- 458 Chester Morse Lake (Reservoir)
- 459 Tolt Reservoir
- 460 Mainstem Snoqualmie River to river mile 43 and Middle Fork Snoqualmie River to river mile
 461 39
- 462 South Fork Skykomish River to river mile 30

463	
464	Associated shorelands that are adjacent to shorelines of statewide significance are included within
465	the shoreline of statewide significance jurisdiction.
466	
467 468	((c.)) <u>d.</u> "Shorelands" ((Shorelines includes "associated shorelands" which)) are defined in the Shoreline Management Act as follows:
469	"Shorelands" or "shoreland areas" means those lands extending landward for two hundred feet
470	in all directions as measured on a horizontal plane from the ordinary high water mark; floodways
471	and contiguous floodplain areas landward 200 feet from such floodways; and all wetlands and
472	river deltas associated with the streams, lakes, and tidal waters which are subject to the
473	provisions of [Chapter 90.58 RCW].
474	
475	((d.)) <u>e.</u> Shoreline jurisdiction
476	
477	((King County's shoreline jurisdiction consists of the combination of shorelines, shorelines of statewide
478	significance, and shorelands.
479	
480	S-105)) <u>S-102</u> King County's shoreline jurisdiction extends over ((all)) <u>the</u> shorelines of the state((,
481	as that term is defined in the Shoreline Management Act,)) and 100-year floodplain of
482	the shorelines of the state in unincorporated King County. This includes ((jurisdiction
483 484	over)) shorelines, shorelines of statewide significance <u>,</u> ((and)) shorelands, <u>floodways,</u>
485	and the adjacent land extending 200 feet landward from the floodway.
486	((e. Options to extend geographic jurisdiction over shorelines and shorelines of statewide
480	
	significance
488 489	The Charoline Management Act aires King County two antions concerning the second of its sharoline
407 490	The Shoreline Management Act gives King County two options concerning the scope of its shoreline
490	jurisdiction.
492	The first option allows the county to include 100-year floodplains:
493	Any county or city may determine that portion of a one-hundred-year flood plain to be included
494	in its master program as long as such portion includes, as a minimum, the floodway and the
495	adjacent land extending landward two hundred feet therefrom. (Revised Code of Washington
496	90.58.030(2)(d)(i))
497	
498	In its original Shoreline Master Program adopted in 1977, King County included the 100-year floodplain.
499	The continued regulation of the 100-year floodplain is necessary to comply with certain federal
500	requirements under the National Flood Insurance Program. Therefore, King County continues to extend
501	its shoreline jurisdiction to cover 100-year floodplains.
502	
503	S-106 King County includes within its shoreline jurisdiction the 100-year floodplains of
504	shorelines of the state.
505	The second ender all states are straighted by the trade of the test of the test of the test of the first first first first states are test of the first first first states are test of the test of the test of the test of the test of
506	The second option allows the extension of shoreline jurisdiction to include land necessary for buffers for
507	critical areas that extend beyond the 200 foot shoreland jurisdiction:
508	Any city or county may also include in its master program land necessary for buffers for critical
509	areas, as defined in chapter 36.70A RCW, that occur within shorelines of the state, provided that
510	forest practices regulated under chapter 76.09 RCW, except conversions to nonforest land use,
511	on lands subject to the provisions of this subsection (2)(d)(ii) are not subject to additional
512	regulations under Chapter 90.58 RCW.(Revised Code of Washington 90.58.030(2)(d)(ii))
513	
514	King County is not exercising its option to extend its shoreline jurisdiction to include lands for buffers for
515	critical areas.
0.0	

5165175-103518Unincorporated King County ((shorelands)), the shoreline jurisdiction shall not include519the critical area buffers that extend outside of the shoreline jurisdiction boundary.

520 ((2. Jurisdictional map))

Applying these definitions within King County has involved an extensive survey of the shoreline
 jurisdiction, which is discussed in detail in the King County Shorelines Inventory and Characterization
 (May 2007). The Shorelines of the State map at the end of this chapter <u>generally</u> shows the ((complete))
 scope of King County's shorelines and shorelines of statewide significance.

⁵²⁵ III. Shoreline Policy Goals

526 A. Introduction to Shoreline ((g))<u>G</u>oals

527 King County's shoreline has a long history of settlement because of the abundant natural resources,
528 availability of water, and usefulness as transportation routes. The shoreline also draws people to enjoy
529 the aesthetic and recreational value that marine beaches, lakes, and rivers provide. The shoreline
530 supports some of the region's most important industries, such as shipping, fishing, and tourism.
531

Because of the unique and irreplaceable value of the shorelines of the state, King County recognizes that
it is in the public interest to protect shoreline ecological processes and functions, while allowing
reasonable and necessary use of shorelines to support the regional economy and provide recreational
opportunities for the public.

537 The high demand for shoreline use over time has degraded shoreline ecological processes and 538 functions in many areas. Many segments of King County's shoreline jurisdiction are devoid of native 539 vegetation, the banks are hardened with additions of rock and other materials, sediment movement is no 540 longer driven by natural forces, and valuable fish and wildlife habitat is gone or impaired to a significant 541 extent. Unaltered shorelines are increasingly rare. It has become critical to restore and enhance 542 degraded shorelines.

543

A vast majority of the shoreline jurisdiction, particularly in the lower parts of the regional watersheds and
along the marine shorelines, is in private ownership, giving the residents of King County an important
role in protecting unique and irreplaceable shoreline values. The challenge for King County is to
manage these lands in a manner that protects, restores, and enhances King County's shoreline
jurisdiction, while respecting private property rights and protecting the public interest.

((King County has established a set of general policy goals that provide overarching guidance for
 discretionary decision-making, support shoreline regulations, and define the vision that King County has
 for the use, protection, restoration and enhancement of the shorelines of the state. These policy goals
 reflect the wide range of Shoreline Management Act mandates, while at the same time preserving the
 maximum possible flexibility for King County to address the unique shoreline conditions within its
 jurisdiction.))

556 B. Statement of Applicability

((The Shoreline Management Act includes a requirement that development proposals must obtain a
 shoreline substantial development permit. However, the Shoreline Management Act includes a number
 of exemptions from this requirement. For example, proposals to construct a single family residence or to
 construct a bulkhead to protect a single family residence are exempt from the requirement to obtain a
 substantial development permit. Activities that do not require a shoreline substantial development
 permit can, individually and cumulatively, adversely impact adjacent properties and natural resources.

((2016)) 2024 King County Comprehensive Plan - ((updated December 6, 2022)) Adopted TBD Attachment A to Ordinance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555)) xxxxx (Proposed Ordinance 2023-0440)

563 King County has both the authority and the responsibility to enforce Shoreline Master Program

regulations on all uses and development in the shoreline jurisdiction. In order to ensure that
 permit-exempt activities comply with the Shoreline Management Act and the County's Shoreline Master
 Program, King County generally requires applicants with exempt projects to apply for a shoreline
 exemption.

Because there has been confusion in the past regarding the scope of the Shoreline Management Act,
 Ecology requires that all Master Programs contain the following policy statement:))

- S-201 All proposed uses and development occurring within King County's shoreline jurisdiction ((must)) <u>shall</u> conform to the Shoreline Management Act and to King County's Shoreline Master Program.
- S-202 King County should require applicants with exempt projects to apply for a shoreline exemption.

((S-904)) <u>S-203</u> Nothing in the King County Shoreline Master Program nor in any action taken under the Shoreline Master Program shall be construed to affect any <u>Indian tribal</u> treaty right to which the United States is a party.

((The Shoreline Management Act establishes mandatory preferences for uses that are unique to or
 dependent upon a shoreline location. These preferred uses apply to the entire shoreline jurisdiction,
 both the shorelines and shorelines of statewide significance. The Shoreline Management Act preferred
 uses are recognized in the following policies.

- S-202)) <u>S-204</u> In establishing and implementing shoreline policies and development regulations, King County shall give preference to uses that are unique to or dependent upon a shoreline location.
- ((S-203)) <u>S-205</u> King County, when determining allowable uses and resolving use conflicts in the shoreline jurisdiction, shall apply the following preferences and priorities in the order listed below:
 - a. Reserve appropriate areas for protecting and restoring shoreline ecological processes and functions to control pollution and prevent damage to the natural environment and to public health.
 - b. Reserve shoreline areas for water-dependent and associated water-related uses. Harbor areas, established pursuant to Article XV of the State Constitution, and other areas that have reasonable commercial navigational accessibility and necessary support facilities, such as transportation and utilities, should be reserved for water-dependent and water-related uses that are associated with commercial navigation, unless adequate shoreline is reserved for future water-dependent and water-related uses and unless protection of the existing natural resource values of such areas preclude such uses. Shoreline mixed-use developments may be allowed if they include and support water-dependent uses and address specific conditions that affect water-dependent uses.
 - c. Reserve shoreline areas for other water-related and water-enjoyment uses that are compatible with ecological protection and restoration objectives.
 - d. Locate single ((family)) detached residential uses where they are appropriate and can be developed without significant impact to shoreline ecological processes and functions or displacement of water-dependent uses.
 - e. Limit nonwater-oriented uses to those locations that are inappropriate for higher priority uses or <u>locations</u> where the nonwater-oriented uses demonstrably contribute to the objectives of the Shoreline Management Act.
 - Shorelines Page 6-14

617 ((S-204)) <u>S-206</u> In particular circumstances, the preferred use policies, the local economic and land 618 use conditions, and the policies and regulations that ((assure)) ensure protection of 619 shoreline resources may result in a determination that other uses may be considered as 620 necessary or appropriate. These other uses may be accommodated, provided that the 621 preferred uses are reasonably provided for throughout the shoreline jurisdiction.

General Policy Goals D. 622

647

654

655

656

668

623 ((The Shoreline Management Act policies of protecting shoreline ecological processes and functions, 624 fostering reasonable use, and maintaining the public right of navigation and corollary uses result in 625 certain mandatory policy goals for the shoreline jurisdiction.

627 These policies apply to both shorelines and shorelines of statewide significance. The policies are not 628 ranked in a specific order. King County reserves the right to balance these general policies based on the 629 unique circumstances, location and physical condition of the shoreline. 630

- 631 5-205)) S-207 The following policy goals shall apply to all of the shoreline jurisdiction. The goals are 632 not ranked in importance and have been assigned a ((number)) letter for identification 633 purposes only.
 - a. The use of the shoreline jurisdiction for those economically productive uses that are particularly dependent on shoreline location or use.
 - b. The use of the shoreline jurisdiction for public access and recreation.
 - c. Protection and restoration of the ecological processes and functions of shoreline natural resources.
 - d. Protection of the public right of navigation and corollary uses of waters of the state.
 - The protection and restoration of buildings and sites having historic, cultural, and e. educational value.
 - f. Planning for public facilities and utilities correlated with other shorelines uses.
 - g. Prevention and minimization of flood damage.
 - h. Recognizing and protecting private property rights.
 - Preferential accommodation of single ((family)) detached residential uses. i.
 - Coordination of shoreline management with other relevant local, state, and federal j. agencies and programs.

Shorelines of Statewide Significance Policy Goals E. 648

649 ((The Shoreline Management Act identifies certain shorelines as "shorelines of statewide significance" 650 and raises their status by setting use priorities and by calling for a higher level of effort in implementing 651 the Shoreline Master Program. The state legislature has declared that the interest of all people shall be 652 paramount in the management of shorelines of statewide significance. 653

5-206)) S-208 The interests of all people shall be paramount in the management of shorelines of statewide significance within King County.

657 The $(\frac{1}{2})$ equivalent terms of statewide significance. 658 Significantly, these policy goals are ranked in order of preference, ((i.e.,)) meaning the first goal must be 659 given priority over all subsequent goals. 660

661 The following policy recognizes and accepts the policy goals as directed by the Shoreline Management 662 Act for shorelines of statewide significance: 663

664 ((5-207)) 5-209 In developing and implementing its Shoreline Master Program for shorelines of 665 statewide significance, King County shall give preference, in the following order of 666 preference, to uses that: 667

- a. Recognize and protect the statewide interest over local interest;
- b. Preserve the natural character of the shoreline;

669 670

671

672

673

674

675

694

699

700

701

702

703

709

- Result in long-term over short-term benefit;
- d. Protect the resources and ecology of the shoreline;
 - e. Increase public access to publicly owned areas of the shorelines;
 - f. Increase recreational opportunities for the public in the shoreline; and
- g. Provide for any other element as defined in Revised Code of Washington
- 90.58.100.

((5-208)) <u>S-210</u> In developing and implementing policies relating to shorelines of statewide significance, King County shall provide for optimum implementation of policies that satisfy the statewide interest.

679 ((F. State-Owned Shoreline Policy Goals

The state also owns property within King County. The Shoreline Management Act requires that certain
 policies be adopted with regard to shoreline land owned by the state. This is distinct from shorelines of
 statewide significance, which may or may not be in state ownership. Because state-owned shoreline is
 often adapted to providing recreational activities for the public, King County has given special

684 consideration to these factors in developing the Shoreline Master Program.

685 G:)) <u>F.</u> Balancing Policy Goals

686 ((The policy goals for the management of the shoreline jurisdiction have the potential for conflict. King 687 County shorelines are considered among the most valuable and fragile of King County's natural 688 resources. These shorelines are valuable for economically productive industrial and commercial uses, 689 recreation, navigation, residential amenity, scientific research, and education. They are fragile because 690 shorelines depend upon a balance between physical, biological, and chemical systems that may be 691 significantly altered by both natural forces (earthquakes, volcanic eruptions, landslides, storms, droughts, 692 floods) and human activities (industrial, commercial, residential, recreation, navigational). Unbridled use 693 of the shorelines ultimately could destroy their utility and value for human use.

- 695 S-210)) S-211 The policy goals of King County's Shoreline Master Program relate both to the use
 696 and protection of the extremely valuable and vulnerable shoreline resources of the
 697 state.
 698
 - ((S-211)) <u>S-212</u> King County shall accommodate in the shoreline jurisdiction all reasonable and appropriate uses consistent with protecting against adverse effects to the public health, the land and its vegetation and wildlife, and the waters of the state<u>,</u> and consistent with public rights of navigation.
- 704
705((S-212)) S-213
((The policy of achieving)) Development regulations shall provide
use and protection ((is reflected in the provision that)) by requiring permitted uses in
the shoreline jurisdiction ((shall)) to be designed and conducted in a manner to avoid or
minimize, in so far as practical, any resultant damage to the ecology and environment of
the shoreline area and the public's use of the water.
- ((5-213)) S-214 King County shall balance shoreline use and shoreline protection when meeting the policy goals of the Shoreline Management Act.
- 712
 713 ((S-209)) S-215 King County should encourage and help facilitate the use of state-owned shorelines
 714 for public recreational activities, where appropriate.

715 ((H. Multiple Approaches to Accomplishing Policy Goals

The policy goals in the Shoreline Master Program may be achieved through a variety of methods that go
 beyond simply regulating development within the shoreline jurisdiction. There are a wide range of
 non-regulatory tools available that provide incentives for property owners to work cooperatively with

719 King County to achieve these policy goals. In addition, King County works closely with other public and 720 non-profit groups to achieve mutually beneficial objectives. 721

722 S-214)) S-216 The King County Shoreline Master Program policies may be achieved by a number 723 of different means, both regulatory and non-regulatory. These include, but are not 724 limited to: 725

- a. Regulations controlling development within the shoreline jurisdiction;
- b. Acquisition of land and easements by purchase, lease, or gift, either alone or in concert with other local governments;
- c. Accepting grants, contributions, and appropriations from any public or private agency or individuals;
- d. Public facility and park planning;
- e. Watershed planning;

726

727

728

729

730

731

732

733

734

- f. Voluntary salmon recovery projects; and
- g. Incentive programs, such as the transfer of development rights or the public benefit rating system.

IV. Shoreline Element Policy Goals 735

((A. Need for shoreline elements 736

737 The Shoreline Management Act requires local master programs to include a number of elements that 738 range from use of shorelines for economic benefit and accommodating necessary infrastructure to 739 protecting both cultural and natural resources. These elements are addressed separately throughout this 740 chapter and are based on the following overarching King County Shoreline Master Program element 741 policy goals.

B.)) A. Economic Development Element 742

743 ((King County's economy is the largest and most significant in the Puget Sound Region and in 744 Washington State. With almost half of the state's nonagricultural jobs and almost 83,900 businesses, it is 745 essential that the King County accommodate the industries and infrastructure to support a healthy and 746 vibrant economy. Most of the county's industry and infrastructure lies within the incorporated cities and 747 is not subject to the King County Shoreline Master Program. However, there are some portions of the 748 shoreline jurisdiction in unincorporated King County that provide for economic development of the 749 region.)) The Economic Development Element considers the location and design of industries, industrial 750 projects of statewide significance, transportation facilities, port facilities, tourist facilities, commerce, and 751 other developments that are particularly dependent on shorelines of the state. 752

753 S-301 King County should plan for the location and design of industries, transportation 754 facilities, port facilities, tourist facilities, commerce, and other developments that are 755 particularly dependent on their location on or use of the shorelines of the state.

((€)) B. Public Access Element 756

757 ((King County believes the shoreline should be accessible to the general public to enjoy and use within 758 the limitations of private property rights and ecological considerations. Since a significant amount of 759 shoreline property is in private ownership, the responsibility to maintain and provide public access falls 760 primarily on public projects. Not all sites are appropriate for use by the public and must be evaluated 761 carefully to ensure that public access can be safely provided without harm. Provisions should also be 762 retained and sought to provide opportunities for the public to enjoy views of the water and shoreline.)) 763 The Public Access Element considers public access to publicly owned land along shorelines of the state. 764 The King County Shoreline Public Access Plan (July 2009) provides details on the analysis of existing

765 766		public access in King County, identified public access gaps and opportunities, and the horeline Public Access policies.
767 768 769 770 771 772 773 774 775 776 777 778 779	S-302	 King County shall: a. Support the public interest with regard to rights to access waters held in public trust by the state, while protecting private property rights and public safety, as well as considering impacts on shoreline ecological processes and functions. b. Protect the rights of navigation and the space necessary for water-dependent uses. c. To the greatest extent feasible and consistent with the overall best interest of the state and the people generally, protect the public's opportunity to enjoy the physical and aesthetic qualities of shorelines of the state, including views of the water. e. Regulate the design, construction, and operation of permitted uses in the shorelines of the state to minimize, insofar as practical, interference with the public's use of the water.
780 781 782 783 784 785 786 786 787	can supple identified a and public analysis of	anning shoreline public access, King County should try to achieve an integrated system that ement, and be coordinated with, multimodal transportation planning. King County has areas of potential public access that will be assessed in more detail through shoreline permits projects. The King County Shoreline Public Access Plan (July 2009) provides details on the existing shoreline public access in King County, identified public access gaps and ties, and the resulting shoreline Public Access Plan.)
788 789 790 791 792 793	S-303	The King County Shoreline Master Program should increase the amount and diversity of public access to the shoreline jurisdiction in areas identified within a shoreline public access gap. New public access should minimize impacts to shoreline ecological processes and functions, preserve natural shoreline character as much as possible, protect private property rights, and consider public safety.
794 795 796 797 798 799	S-304	Public agencies, including local governments, port districts, state agencies, and public utility districts, should include public access in their development proposals if public access is compatible with the activity and can be provided safely. An assessment of the impact of public access on the shoreline and constructed features should also be conducted.
800 801 802 803 804 805 806 807 808 809	S-305	 King County shall require public access to shorelines of the state for <u>land division of five</u> or more lots, tracts, or parcels and ((water-enjoyment, water-related, and -dependent)) for new non-residential uses ((and for subdivisions of land into more than four parcels)) unless: a. The development proposal is not compatible with public access; b. There is a safety or security concern; c. Inclusion of public access will have an environmental impact that cannot be mitigated; or d. There are legal limitations on allowing public access.
809 810 811 812 813 814 815	S-306	King County shall adopt development regulations that establish maximum building height limits, setbacks, and view corridors to minimize the impact to existing views from public property or a substantial number of residences. Where providing direct public access or allowing for water dependent shoreline uses conflicts with maintaining existing views, the direct public access or water dependent shoreline uses shall have priority.

816 $((\Theta))$ <u>C</u>. Recreational Element

817 Shorelines provide many opportunities for recreation, such as boating, swimming, beach combing,

818 hiking, and nature viewing. Since much of the shoreline jurisdiction is in private ownership, using public

819 lands for recreation will become increasingly important. Opportunities should be sought through public

((2016)) <u>2024 King County</u> Comprehensive Plan - ((updated December 6, 2022)) <u>Adopted TBD</u> <u>Attachment A to</u> Ordinance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555)) <u>xxxxx</u> (<u>Proposed Ordinance 2023-0440</u>)

820 821 822	projects to protect and enhance recreational opportunities. <u>The Recreational Element identifies</u> <u>recreational opportunities along shorelines, such as parks, tidelands, beaches, and recreational areas, and pursues acquisition through implementation of the King County Shoreline Master Program.</u>		
823	•		
824	S-307	King County should protect and, when possible, expand recreational opportunities,	
825		including but not limited to parks, beaches, tidelands, swimming beaches, and boat	
826		launches.	
827			
828	S-308	King County should evaluate opportunities to acquire shoreline property for purposes	
829		of public recreation from willing sellers of private property.	

830 ((E)) <u>D</u>. Circulation Element

831 ((Circulation and transportation planning is conducted at many levels in King County. The overarching 832 transportation planning agency in the Puget Sound region is the Puget Sound Regional Council, an 833 association of cities, towns, counties, ports, and state agencies that serves as a forum for developing 834 policies and making decisions about growth and transportation issues in the Puget Sound region. At the 835 local level, cities and counties approve local circulation patterns for their individual jurisdictions. King County should consider the policy goals in this Shoreline Master Program when participating in regional 836 837 and local transportation planning discussions.)) 838 The Circulation Element consists of the general location and extent of existing and proposed major 839 thoroughfares, transportation routes, terminals, and other public utilities and facilities. 840

841S-309The King County Shoreline Master Program should guide the ((c))County's842transportation plans and projects within the shoreline jurisdiction.

843 ((F)) <u>E</u>. Land Use Element

844 ((Land use in King County is established through implementation of the Washington State Growth 845 Management Act. To implement the Growth Management Act, King County relies primarily on the King 846 County Comprehensive Plan and functional plans that are adopted as part of this Comprehensive Plan 847 for facilities and services. This Comprehensive Plan establishes an Urban Growth Area and designates 848 land use and zoning for the unincorporated portions of King County. It also delineates and protects 849 Agricultural Production Districts, Forest Production Districts and mineral resource sites.)) The Land Use 850 Element considers the general distribution and location, as well as the extent of use on the shorelines 851 and adjacent areas for housing, business, industry, transportation, agriculture, natural resources, 852 recreation, education, public buildings and grounds, and other categories of public and private use of 853 the land. 854

855S-310The King County Comprehensive Plan should consider the policy goals of the King856County Shoreline Master Program when designating land use and zoning on shorelines857of the state and adjacent lands.

858 ((G)) <u>F</u>. Conservation Element

The Shoreline Management Act requires local master programs to include a conservation element for
the preservation of natural resources, including critical areas, scenic vistas, aesthetics, and vital
freshwater, saltwater and estuarine areas for fish and wildlife. <u>The Conservation Element addresses the</u>
preservation of natural resources including, but not limited to, scenic vistas, aesthetics, and vital
estuarine areas for fish and wildlife.

864 865

866 ((1. Critical areas

King County's critical areas ordinance is based on best available science and protects coal mine hazard
areas; erosion hazard areas; flood hazard areas; seismic hazard areas; landslide hazard areas; volcanic
hazard areas; steep slope hazard areas; critical aquifer recharge areas; wetlands; aquatic areas
(including lakes, rivers and streams and marine areas); and wildlife habitat conservation areas. The
Growth Management Act requires that a Shoreline Master Program provide a level of protection for
critical areas located within shorelines that assures no net loss of shoreline ecological functions
necessary to sustain shoreline natural resources. Policy S-403 adopts this requirement.))

Past development of the shorelines has degraded the habitat for many species by activities such as
armoring banks against wave action and the erosive force of water flowing downstream; removal of
vegetation; straightening channels; installing in-stream structures for flood control, hydroelectricity, and
water supply; and allowing stormwater runoff that degrades water quality. ((Degraded shorelines should
be restored and shorelines that are in good condition should be preserved.))

881S-311King County shall protect shoreline critical areas and, where possible, should restore882degraded habitat and critical area functions and values.

883 ((2 Scenic vistas))

The natural topography of King County provides numerous scenic vistas of the shoreline. King County
 should ensure that development occurring both within and outside the shorelines of the state avoids
 impacts on scenic vistas and protects view corridors while balancing other policy goals of this ((plan))
 program.

889S-312King County should consider and, when possible, require protection of scenic vistas of
the shoreline jurisdiction when reviewing public and private development proposals.

891 ((3 Aesthetics))

Natural shorelines are visually aesthetic in their natural state. When these shorelines are altered through
development, the aesthetic value of the shoreline should be preserved as much as possible. In areas
where shorelines have already been developed with little consideration of the aesthetics, restoration
should return the shoreline to an aesthetically-pleasing environment.

897S-313King County should ensure that public and private development proposals protect and
restore the aesthetic quality of shorelines in the project design.

899 ((H)) <u>G</u>. Historic, Cultural, Scientific<u></u>, and Educational 900 Element

901 The ((h))<u>H</u>istoric, ((c))<u>C</u>ultural, ((s))<u>S</u>cientific, and ((e))<u>E</u>ducational ((e))<u>E</u>lement provides for protection and 902 restoration of historic resources. Historic resources include historic building, sites, objects, districts and 903 landscapes, prehistoric and historic archaeological resources, and traditional cultural places.

905 906 907 908 909 910 911 912 913 914 915 916 917 918 919	S-314	 Historic resources in the shoreline jurisdiction should be protected to prevent the destruction of, or damage to, any site having archaeological, historic, cultural, or scientific value through coordination and consultation with the appropriate <u>Indian tribal</u>, local, state, and federal authorities((, including affected tribes)). a. ((Sites should be protected in collaboration with appropriate tribal, state, federal, and other local governments.)) Cooperation among public and private parties ((is to)) should be encouraged in the identification, protection, and management of cultural resources. b. Where appropriate, access to such sites should be made available to parties of interest. Access to such sites ((must)) shall be designed and managed in a manner that gives maximum protection to the resource. c. Opportunities for education related to archaeological, historical, and cultural features should be provided where appropriate and incorporated into public and private programs and development.
920 921 922 923 923 924 925	S-315	King County should work with <u>Indian</u> tribal, state, federal, and local governments to maintain an inventory of all known historic resources. King County shall protect these inventories from public disclosure to the extent permitted or required under applicable federal and state law. As appropriate, such sites should be preserved and restored for study, education, and public enjoyment to the maximum possible extent.
926 927 928 929	S-316	Provisions for historic resource preservation, restoration <u>,</u> and education should be incorporated with open space or recreation areas in site development plans whenever compatible and possible.
930 931 932 933	S-317	Cooperation among ((involved private and public)) parties should be encouraged to ((achieve these)) <u>protect</u> historic, cultural, scientific <u>,</u> and educational ((objectives)) <u>resources</u> .
934 935 936 937 938 939	S-318	Private and public owners of historic resources should be encouraged to provide public access and educational opportunities at levels consistent with long term protection of both historic values and shoreline ecological processes and functions. Site-specific conditions may require public site access to be restricted at times, but educational means should be provided whenever possible.
940 941 942 943	S-319	Historic resource development should be planned and carried out so as to prevent impacts to the resource. Impacts to neighboring properties and other shoreline uses should be limited to temporary or reasonable levels.
944 945 946 947 948 949	S-320	Owners of historic resource <u>s</u> are encouraged to make ((substantial development)) plans known well in advance of application so that appropriate agencies, such as <u>Indian</u> <u>tribes</u> , the Washington State Department of Archaeology and Historic Preservation, ((Tribes)) and others, may have ample time to assess the site and make arrangements to preserve historic, cultural, scientific, and educational values as applicable.

((2016)) <u>2024 King County</u> Comprehensive Plan - ((updated December 6, 2022)) <u>Adopted TBD</u> <u>Attachment A to</u> Ordinance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555)) <u>xxxxx</u> (Proposed Ordinance 2023-0440)

- 950
951S-321If development is proposed adjacent to an historic resource, the proposed development
should be designed and operated so as to be compatible with continued protection of
the historic, cultural, or archaeological resource.
- V. Shoreline ((Plan)) <u>Master Program</u>
 Relationship To ((Other Laws)) <u>County</u>
 <u>Regulations</u>

956 ((A. Washington's Growth Management Act

957 The Growth Management Act, passed by the Washington State Legislature in 1990 and 1991, seeks to 958 further protect the quality of life in Washington State. The Growth Management Act requires that the 959 state's most populous and fastest growing counties and their cities prepare comprehensive land use 960 plans that anticipate growth for a 20-year horizon. Smaller communities and those communities that are 961 experiencing a slow rate of growth may choose to plan under the Growth Management Act, but are not 962 required to do so. Comprehensive Plans adopted in accordance with the Growth Management Act must 963 manage growth so that development is directed to designated urban areas and away from the Rural 964 Area and Natural Resource Lands. The Growth Management Act also requires local governments to 965 designate and protect critical areas and to identify and protect natural resource lands, which include 966 commercially significant forestry, agriculture, and mining areas. In 1997, the Washington State 967 Legislature amended both the Growth Management Act and the Shoreline Management Act in an effort 968 to achieve consistency between the two statutes. Among the amendments to the Growth Management 969 Act was a provision that makes the policies and goals of the Shoreline Management Act also policies and 970 goals of the Growth Management Act. See Revised Code of Washington 36.70A.480.

- 971
- 972 973

S-401 The King County Shoreline Master Program must be consistent with the Washington State Growth Management Act.

974 B. King County Countywide Planning Policies

975 King County, along with the City of Seattle, City of Bellevue, and suburban cities established the Growth 976 Management Planning Council to prepare a coordinated policy framework for future development in 977 King County. In July 1992, the Growth Management Planning Council adopted Phase 1 of the 978 Countywide Planning Policies. Phase 2 was adopted in 1994. The King County Countywide Planning 979 Policies have been ratified by a majority of the jurisdictions in King County and therefore apply to all 980 jurisdictions. The Countywide Planning Policies address critical areas, land use patterns, transportation, 981 community character and open space, affordable housing, development and provision of urban services, 982 siting of public capital facilities, economic development, and regional financing and governance. 983 984 S-402 The King County Shoreline Master Program must be consistent with and coordinated 985 with the King County Countywide Planning Policies.

986 C.)) <u>A.</u> Critical Areas Regulations

987 Critical areas located within shorelines are regulated under the Shoreline Management Act and
 988 implemented through local Shoreline Master Programs. ((The Growth Management Act requires that
 989 shoreline master programs provide a level of protection for shoreline critical areas that assures no net
 990 loss of shoreline ecological functions necessary to sustain shoreline natural resources.
 991

992
993S-401
provide a level of protection for critical areas in the shoreline jurisdiction that ((assures))

994 995 996	<u>ensures</u> no net loss of shoreline ecological functions necessary to sustain shoreline natural resources.
997 998 999 1000 1001 1002 1003 1004	((The Shoreline Management Act provides options for assuring consistency with the Growth Management Act protection of critical areas. These options range from including the Growth Management Act critical areas regulations in the Shoreline Master Program to preparing a discrete set of shoreline regulations.
	S-404)) <u>S-402</u> The King County Shoreline Master Program includes by reference portions of the King County critical areas regulations into the Shoreline Master Program to meet the requirements of Revised Code of Washington 90.58.090(((3) and 90.58.090(4))).
1005	((D.)) <u>B.</u> Zoning, Clearing and Grading, and Stormwater
1006	Regulations
1007 1008 1009 1010 1011 1012 1013 1014	 King County has adopted a wide array of development regulations that protect various aspects of the environment and implement other King County policies. These regulations generally include King County's surface water management regulations, clearing and grading regulations, and zoning. In the shoreline jurisdiction, the Shoreline Master Program may impose additional requirements. Shoreline ((development)) management regulations must: Be sufficient in scope and detail to ensure implementation of the Shoreline Management Act ((statewide)) shoreline ((management)) policies, this chapter, and the King County Comprehensive Plan and functional plans ((adopted to implement the Comprehensive
1015 1016 1017	Plan)); 2. Include regulations that apply to the environmental designations classified under Washington Administrative Code 173-26-211;
1018 1019	 Include general regulations, specific use regulations that address issues of concern in regard to specific uses, and modification regulations;
1020 1021	 Include clearing and grading and stormwater regulations that protect the ecological processes and functions of the shorelines; and
1022 1023 1024 1025	 Design and implement regulations and mitigation standards in a manner consistent with all relevant constitutional and other legal limitations on the regulation of private property. ((Revised Code of Washington 90.58.100)
1026	However, to the extent that it can, consistent with requirements of the Shoreline Management Act, King
1027	County will rely on its existing regulations to meet the requirements of the Shoreline Management Act.

- County will rely on its existing regulations to meet the requirements of the Shoreline Management Act. 1028
- 1029 S-405)) S-403 To the maximum extent practical, King County's Shoreline Master Program shall 1030 rely on King County's existing regulations, including critical areas regulations, surface 1031 water management regulations, clearing and grading regulations, and zoning ((in 1032 order)) to comply with the Shoreline Management Act and the Department of Ecology's 1033 guidelines.

Flood Hazard Management Plan ((E.)) C. 1034

1035 The King County Flood Hazard Management Plan directs floodplain management within King County. 1036 This Plan was developed in coordination with incorporated cities within King County as directed by 1037 Revised Code of Washington 86.12.210 and is binding on each jurisdiction located within King County. 1038 The goals of the King County Flood Hazard Management Plan are: 1039

- 1. To reduce the risks from flood and channel migration hazards.
 - 2. To avoid or minimize the environmental impacts of flood hazard management.
- 3. To reduce the long-term costs of flood hazard management.
- 1041 1042

1040

- Flood hazard regulations are implemented within unincorporated King County. Each jurisdiction within
 King County is required under the Flood Hazard Management Plan to adopt flood hazard management
 regulations that meet the minimum requirements of the National Flood Insurance Program.
- 1046
 1047 ((In 2007, the King County Council approved the formation of a countywide Flood Control Zone District 1048 under the authority in Revised Code of Washington 86.15.025. The overarching countywide strategies 1049 and objectives include:
- 1050 1. Improving levee protection through major commercial, industrial and residential areas;
 - Improving flood water conveyance and capacity;
 - 3. Reducing hazards by removing flood, erosion, and landslide prone residential structures;
 - 4. Providing safe access to homes and businesses by protecting key transportation routes;
 - 5. Minimizing creation of new risks to public safety from development pressure.
- The King County Flood Control Zone District is governed by a District Board of Supervisors that consists
 of the members of the King County Council. An advisory committee advises the board of supervisors of
 the Flood Control Zone District on regional flood protection issues by providing recommendations to
 the board of supervisors on the district's work program and budget, including capital improvement
 program projects. King County will rely on the Flood Hazard Management Plan and the Flood Control
 Zone District to meet the general shoreline master program provisions for flood hazard reduction in
 Washington Administrative Code 173-26-221(3).

¹⁰⁶⁸ VI. Shoreline Environment Designations

1069 A. Introduction ((to shoreline environment designations

Shoreline management addresses a wide range of physical conditions and development settings:)) The
 Shoreline Master Program classifies shoreline reaches into defined environment designations, based on
 the existing use pattern, the current biological and physical character of the shoreline, and the goals and
 aspirations of the community. King County prescribes environmental protection measures, allowable
 use provisions, and development standards for each shoreline environment designation.

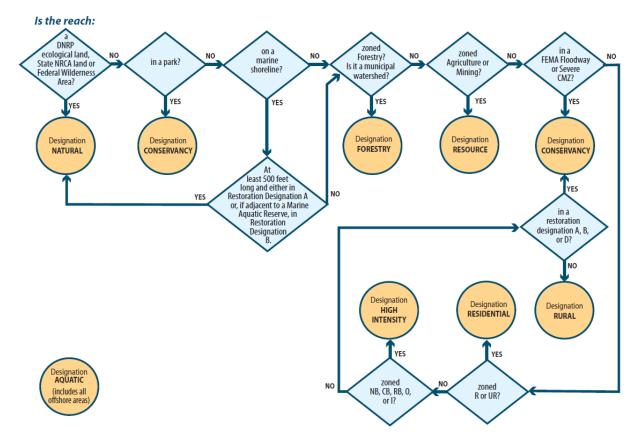

1075 1076 King County has established eight shoreline environment designations: 1077 ((A.)) High Intensity Shoreline Environment • 1078 ((B.)) Residential Shoreline Environment • 1079 ((C.)) Rural Shoreline Environment • 1080 ((D.)) Conservancy Shoreline Environment • 1081 • ((E.)) Resource Shoreline Environment 1082 ((F.)) Forestry Shoreline Environment • 1083 ((G.)) Natural Shoreline Environment • 1084 ((H.)) Aquatic Environment ٠ 1085 1086 This section sets forth the purpose, criteria, and management policies for each shoreline environment 1087 designation. The Shoreline Environment Designation map((s)) at the end of this chapter show how the 1088 environment designations apply to shoreline reaches within the shoreline jurisdiction in unincorporated 1089 King County. ((Shoreline areas that meet the jurisdictional criteria, but that are not mapped or 1090 designated, are assigned a Conservancy designation until the Shoreline Master Program is amended to 1091 assign a shoreline environment to that shoreline reach.))

1093S-501Shoreline areas that are not mapped or designated shall be assigned a Conservancy1094Shoreline Environment until the Shoreline Master Program is amended to assign a1095shoreline environment designation to that shoreline reach.

1096 <u>1. Shoreline</u> Environment Designation Criteria

1097 ((King County has a long history of comprehensive planning and basin planning. Beginning in the 1098 1980s, basin plans were developed throughout the county and helped identify fragile aquatic resources. Relying on these plans, King County has assigned zoning that is appropriate given the nature of the 1099 1100 resources that need protection. As a result, fragile resources generally have zoning classifications that 1101 permit only low intensity development. King County's zoning regulations limit high intensity 1102 development to urban areas designated under the Countywide Planning Policies and the King County 1103 Comprehensive Plan. 1104 1105 King County recognizes, however, that zoning by itself is insufficient to determine the shoreline 1106 environment designations. Other factors are also important in assuring)) To ensure that the shoreline 1107 environment designations help King County achieve the goals of the Shoreline Management Act((-1108 These factors include;)) the following factors are considered for a given shoreline: 1109 Existing development patterns together with zoning, the King County Comprehensive Plan 1110 land use designations and other officially adopted plans; 1111 Existing shoreline ecological processes and functions and the degree of human alteration; 1112 Whether the reach has a restoration priority that demonstrates it has both basin conditions 1113 and existing shoreline condition that support extra efforts to maintain shoreline ecological 1114 processes and functions and the length of such reaches; 1115 Indian tribal, ((F))federal, state, county, ((tribal)) and municipal watershed ownership status; 1116 The goals of King County residents for their shorelines as set forth in this chapter; 1117 Pursuant to Revised Code of Washington 90.58.100(((4))), for state-owned shorelines the 1118 public demand for wilderness beaches and other recreational activities and for ecological 1119 study areas: and 1120 Other state policies in the Shoreline Management Act and the Department of Ecology's 1121 guidelines (Revised Code of Washington 90.58.020 and Chapter 173-26 Washington 1122 Administrative Code ((173-26)), respectively). 1123 Figure S-1 depicts the decision((-))-making process that is used to determine the appropriate shoreline 1124 1125 environment designation for a given shoreline. 1126

- 1127 Figure S-1: Pathway of decisions in applying criteria to produce shoreline <u>environment</u>
- 1128 designations.

Flowchart for Shoreline Environment Designations

1129 1130

1131 The shoreline environment designations take into account several elements. Areas currently meeting the 1132 criteria for high levels of protection are given greater levels of protection. The determination of whether 1133 an area deserves a greater level of protection is based either on its current ownership and condition, 1134 ((e.g.)) such as publicly owned natural areas or wilderness areas, or on its restoration rating. The 1135 restoration rating is discussed in more detail below. Zoning is also an important criterion. King County 1136 has for years implemented zoning as a means to protect more sensitive areas from intense development. 1137 Shoreline environment designations also take into account whether a reach is located within a floodway 1138 and severe channel migration hazard area and gives greater protection to these areas due to their 1139 importance in maintaining shoreline ecological processes and functions and because of public health 1140 and safety concerns.

1141

1142 The restoration rating (see King County Shoreline Protection and Restoration Plan (July 2009)) is 1143 included in the shoreline environment designation as a way to incorporate more strongly the current 1144 degree of alteration along the shoreline, the biological importance of the reach in a watershed context, 1145 and the restoration priorities associated with the combination of the two analyses. The restoration 1146 ((designations)) ratings are largely concerned with whether it is most appropriate to implement measures 1147 to protect or conserve a site, restore it to a previous condition, or undertake projects to enhance its 1148 current condition or to create new features with shoreline ecological processes and functions. These 1149 ratings also provide guidance on areas where it is important to protect existing shoreline ecological 1150 processes and functions.

1151
1152 Restoration ratings combine the reach characterization based on the results from an alterations analysis
1153 with the context of basin analyses (See Table S-2). The reach or drift cell characterization is an

((2016)) <u>2024 King County</u> Comprehensive Plan - ((updated December 6, 2022)) <u>Adopted TBD</u> <u>Attachment A to</u> Ordinance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555)) <u>xxxxx</u> (Proposed Ordinance 2023-0440)

assessment of the extent to which ecosystem structure, processes, and, ultimately, functions for a reach or drift cell are affected by anthropogenic factors. Scores resulting from this assessment are indicative of the degree to which shoreline ecological processes have been altered and impaired. The reach characterizations are found in King County Shoreline Inventory and Characterization: Methodology and Results (May 2007). The basin analysis is based on the Basin Condition Map ((adopted by the King County Council)) in King County Code 21A.24.065.

- 1160
- 1161

Table S-2. Restoration ((scores)) ratings and associated actions.

Restoration Score	Basin Condition	Reach Condition	Actions
Α	High	High	Conserve, Preserve
В	High	Moderate	Conserve, Preserve, Restore, Enhance
С	High	Low	Restore, Enhance
D	Moderate	High	Conserve, Enhance, Restore, Preserve
E	Moderate	Moderate	Conserve, Enhance, Restore
F	Moderate	Low	Enhance, Restore
G	Low	High	Enhance, Conserve
н	Low	Moderate	Enhance, Create
l I	Low	Low	Enhance, Create

1162

Each ((designation)) rating has specific restoration goals associated with it, based on the conditions observed on_site and in the basin. Depending on condition, as indicated by the degree of alteration, reaches and drift cells were placed into one of nine categories of preferred actions. These range from preservation and conservation under the highest conditions (high basin and reach conditions, ((i.e.,)))
meaning the least altered from natural) to enhancement and creation under the poorest condition (low basin and reach conditions, the most altered from natural).

- 1170 The various actions are defined as follows:
- 1171**Preserve** To protect intact processes, often through acquiring lands or easements to exclude
activities that may negatively affect the environment.
- 1173Conserve To maintain biodiversity by protecting or increasing the natural potential of1174landscapes to support multiple native species. Typically, this is accomplished through financial1175incentives for landowners intended to offset any economic loss resulting from managing the1176land for conservation.
- 1177**Restore** To transform degraded conditions to a close approximation of historical conditions.1178Restoration generally involves more intense and extensive modification and manipulation of site1179conditions than would occur with enhancement projects. Example actions include levee1180breaching, removal, or setback.
- 1181Enhance To improve a targeted ecological attribute and/or process. Example actions may1182include culvert replacement, riparian plantings and fencing, invasive species removal, and1183streambank stabilization.
- 1184Create To construct or place habitat features where they did not previously exist ((in order)) to1185foster development of a functioning ecosystem. Examples include tidal channel excavation and1186the placement of dredge material intended to create marsh or other habitat. Creation1187represents the most experimental approach and, therefore, may have a lower degree of success,1188particularly when landscape-scale ecological processes are not sufficient to support the created1189habitat type.
- 1191 The marine shoreline((, which in unincorporated King County occurs only)) around Vashon-Maury 1192 Island((,)) is treated a little differently than freshwater shorelines in the designation strategy. This is in

((2016)) 2024 King County Comprehensive Plan - ((updated December 6, 2022)) Adopted TBD Attachment A to Ordinance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555)) xxxxx (Proposed Ordinance 2023-0440)

- recognition of both the differing character of marine shorelines, which are subject to tidal influences,
- wakes from large commercial vessels, and some variation in the ecological processes affecting them, as
- well as the creation of the Maury Island Environmental Aquatic Reserve along Maury Island and
 Quartermaster Harbor shorelines by the Washington state Department of Natural Resources. N
- Quartermaster Harbor shorelines by the Washington state Department of Natural Resources. More
 protection by shoreline designation was afforded to marine shorelines with active feeder bluffs and little
- 1198 alteration to processes. As a result, in these areas, areas with a restoration rating of A or B were
- designated natural in recognition of the importance of conserving existing shoreline ecological functions
- and processes in this area.

1469	Aquatic ((Shoreline)) Environment Designation Criteria
1470 1471	((S-534)) <u>S-543</u> A shoreline shall be designated Aquatic if it is waterward of the ordinary high water mark ((of the shoreline)).
1472	Aquatic ((Shoreline)) Environment Management Policies((:))
1473 1474 1475 1476	((S-535)) <u>S-544</u> King County shall allow new in-water and over-water structures in the Aquatic ((Shoreline)) Environment only for water-dependent uses, public access, or ecological restoration.
1477 1478 1479 1480	((S-536)) <u>S-545</u> King County shall limit the size of new over-water structures in the Aquatic ((Shoreline)) Environment to the minimum necessary to support the structure's intended use.
1481 1482 1483	((S-537)) <u>S-546</u> King County shall encourage multiple uses of over-water facilities in the Aquatic ((Shoreline)) Environment ((in order)) to reduce the impacts of shoreline development and increase the effective use of water resources.
1484 1485 1486 1487 1488 1489 1490	((S-538)) <u>S-547</u> King County shall require all developments and uses on navigable waters or their beds in the Aquatic ((Shoreline)) Environment to be located and designed to minimize interference with surface navigation, to consider impacts to public views, and to allow for the safe, unobstructed passage of fish and wildlife and materials necessary to create or sustain their habitat, particularly those species dependent on migration.
1491 1492 1493 1494 1495 1496 1497	((S-539)) <u>S-548</u> King County shall not allow uses in the Aquatic ((Shoreline)) Environment that adversely impact the ecological processes and functions of critical saltwater and freshwater habitats, except when necessary to achieve the objectives of Revised Code of Washington 90.58.020, and then only when the adverse impacts are mitigated according to the sequence described in Washington Administrative Code 173-26-201(((2)(e))) as necessary to ((assure)) <u>ensure</u> no net loss of shoreline ecological processes and functions.
1498 1499 1500 1501	((S-540)) <u>S-549</u> King County shall consider the guidance in the Maury Island Aquatic Reserve Management Plan in making decisions about permitted uses in the shoreline jurisdiction.
1502	VII. Environment Protection Policies
1503 1504 1505 1506	A. General Environmental Protection Policy Goals ((The Department of Ecology's guidelines recognize that shoreline ecological processes and functions may be impaired not only by shoreline developments that are required to obtain shoreline substantial development permits, but also by past actions, unregulated activities, and developments that are
1507 1508 1500	exempt from the shoreline substantial development permit requirements. The loss or degradation of shoreline ecological processes and functions from any of these activities can significantly impact

1509 1510

1511The concept of ecological processes and functions recognizes that any ecological system is composed of1512a wide variety of interacting physical, chemical, and biological processes. These processes are1513interdependent in varying degrees and at different scales, and that result in the landscape, habitats and

shoreline natural resources and may also adversely impact human health and safety.))

1514 species as they exist at any time. Ecological functions are the work performed or roles played 1515 individually or collectively within ecosystems by these processes. 1516 1517 Nearly all shoreline areas, even substantially developed or degraded areas, retain important ecological 1518 processes and functions that contribute to the survival and successful reproduction of plants and 1519 animals. For example, an intensely developed harbor area may also have an important function as a fish 1520 migration corridor and feeding area critical to species survival. In addition, ecosystems are 1521 interconnected and many species may depend on the functioning of multiple systems for critical 1522 resources. As examples, anadromous fish depend upon the viability of freshwater, marine, and 1523 terrestrial shoreline ecosystems, and many wildlife species associated with shorelines depend on the 1524 functioning of both terrestrial and aquatic environments. Therefore, the policies for protecting and 1525 restoring ecological processes and functions should apply to the maximum extent practical to all 1526 shoreline areas, not just those that remain relatively unaltered. 1527 1528 1. Cumulative Impacts and "No Net Loss" of Ecological Processes and 1529 **Functions** 1530 1531 The Shoreline Management Act requires that King County's Shoreline Master Program achieve no net 1532 loss of shoreline ecological processes and functions from new uses or development, and that it address 1533 the cumulative impacts on shoreline ecology that would result from future shoreline development. ((The 1534 Shoreline Management Act also requires local governments to plan for restoration of shoreline 1535 ecological processes and functions where they have been impaired, thus working towards actual 1536 improvement in shoreline ecological processes and functions.)) The following policies ensure that King 1537 County will address cumulative impacts of existing and proposed shoreline development and work 1538 towards improving shoreline ecological processes and functions. 1539 1540 ((S-608)) <u>S-601</u> The ((King County)) Shoreline Master Program shall consider the cumulative impacts 1541 of reasonably foreseeable future development to ensure no net loss of shoreline 1542 ecological processes and functions. 1543 1544 ((S-601)) S-602 King County shall ensure that new uses, development, and redevelopment within 1545 the shoreline jurisdiction do not cause a net loss of shoreline ecological processes and 1546 functions. 1547 1548 ((5-609)) <u>5-603</u> The Shoreline Master Program is intended to fairly allocate the burden of 1549 addressing cumulative impacts. King County should adopt policies and regulations that 1550 1551 are designed to avoid the need for individualized cumulative impacts analysis for commonly occurring and planned development. 1552 1553 ((S-602 King County should protect shorelines and conduct restoration in areas that have been 1554 previously degraded.)) 1555 1556 ((S-603)) <u>S-604</u> King County shall require shoreline uses and modifications to be designed and 1557 managed to prevent degradation of water quality and alteration of natural 1558 hydrographic conditions to the maximum extent practical. 1559 1560 ((S-604 King County's Shoreline Master Program shall include regulations and mitigation 1561 standards to ensure that permitted and exempt developments in the aggregate will not 1562 cause a net loss of shoreline ecological processes and functions.)) 1563 1564 S-605 ((King County's)) The Shoreline Master Program ((goals and policies will)) shall promote 1565 restoration of impaired shoreline ecological processes and functions. Policies and 1566 programs and non-regulatory actions that contribute to restoration goals ((will)) shall be 1567 identified. King County should consider the direct and indirect effects of regulatory or 1568 non-regulatory programs of other local, state, and federal governments, as well as any

9 0 1	restoration effects that may result from shoreline ((development)) <u>management</u> regulations and mitigation standards.
2 3 4 5	(S-606 The King County Shoreline Master Program identifies restoration opportunities and planning elements that together should improve the overall condition of habitat and resources within the shoreline jurisdiction.
5 7 3 9)	5-607 King County should provide options for property-specific technical assistance and tailored applications of shoreline management regulations through Rural Stewardship Plans for single family residential uses in the upland areas of the Rural, Conservancy a Natural Shoreline Environments. Rural Stewardship Plans must be consistent with the goals of the Shoreline Management Act and King County Shoreline Protection and Restoration Plan, and ensure no net loss of shoreline ecological processes and function
23456789012345	 5-611)) <u>S-606</u> When updating the Shoreline Master Program, King County should analyze proposed policies and regulations to determine whether they will cause cumulative adverse impacts to the shoreline and consider how such impacts may be avoided. The evaluation of cumulative impacts should consider: a. Current condition of the shorelines and associated natural processes; b. Reasonably foreseeable future development and shoreline uses; c. An appropriate evaluation of the effect on shoreline ecological processes and functions caused by unregulated activities, development exempt from permitting, and effects such as the incremental impact of residential bulkheads, residential piers, or runoff from newly developed properties; and d. Beneficial effects of any established regulatory programs under other local, state, and federal laws.
5 7 3 7 9 0 1 2	(S-612)) <u>S-607</u> King County should use the shoreline permitting or shoreline conditional use permitting processes for development proposals that may have impacts that cannot be anticipated or uncommon impacts that have not been considered or identified at time adoption of the ((King County)) Shoreline Master Program to ensure that all impacts ar addressed and that there is no net loss of <u>shoreline</u> ecological function ((of the shoreline)) after mitigation.
	(S-613)) <u>S-608</u> King County shall consider and address cumulative impacts of shoreline development on shoreline ecological processes and functions and on shoreline uses given priority under <u>Chapter 90.58</u> Revised Code of Washington ((Chapter 90.58)).
	(S-616)) <u>S-609</u> King County shall apply <u>mitigation measures in</u> the following sequence of steps listed in order of <u>highest</u> priority <u>to lowest priority</u> ((in evaluating the impacts of development and redevelopment on critical areas within the shoreline jurisdiction)):
)	 a. Avoid the impacts altogether by not taking a certain action or parts of an action; b. Minimize impacts by limiting the degree or magnitude of the action and its implementation by using appropriate technology or by taking affirmative steps to avoid or reduce impacts; c. Rectify impacts by repairing, rehabilitating, or restoring the affected environment d. Reduce or eliminate the impacts over time by preservation and maintenance operations;
7 8 9 0	 e. Compensate for impacts by replacing, enhancing, or providing substitute resource or environments; and f. Monitor the impact and the compensation projects and taking appropriate corrective measures.
	2. Ongoing Evaluation, Review of Cumulative Impacts and Duty to Update

1622 ((King County will periodically review the Shoreline Master Program and make amendments that it
 1623 determines are necessary to reflect changing local circumstances, new information and improved data,
 1624 and to meet the requirements of Revised Code of Washington 90.58.080 and applicable guidelines.

King County will also monitor actions taken to implement the Shoreline Master Program and the
 shoreline conditions to inform updates of Shoreline Master Program provisions and improve shoreline
 management over time.

1629
1630S-610King County shall periodically review and amend its Shoreline Master Program1630
1631using a process that inventories and ensures meaningful understanding of current and
potential ecological processes and functions provided by affected shorelines.

1632 B. Shoreline Critical Areas

1633 1. Standard for protection under the Shoreline Management Act

1634 The Growth Management Act requires King County to protect the functions and values of critical areas, 1635 which are defined as wetlands, critical aguifer recharge areas, frequently flooded areas, geologically 1636 hazardous areas, and fish and wildlife habitat conservation areas. Critical areas located within the 1637 shoreline jurisdiction are protected under the Shoreline Master Program rather than the Growth 1638 Management Act. The Shoreline Master Program provides a level of protection for critical areas to 1639 ((assure)) ensure no net loss of shoreline ecological functions. In addition, the Shoreline Management Act requires King County to give optimum protection of shorelines of ((state-wide)) statewide 1640 1641 significance. The King County Comprehensive Plan ((and functional plans adopted as elements of the 1642 King County Comprehensive Plan)) also guides the protection of critical areas within the shoreline 1643 iurisdiction.

1644 2. Use of scientific and technical information

1649

1665

1666

1667

1668

1669

The Shoreline Management Act requires local governments to use scientific and technical information
when establishing protection measures for critical areas. To achieve this requirement, King County has,
to the extent feasible:
Used a systematic interdisciplinary approach that ensures the integrated use of the natural

- 1. Used a systematic interdisciplinary approach that ensures the integrated use of the natural and social sciences and the environmental design arts;
 - 2. Consulted with and obtained the comments of any federal, state, regional, or local agency having any special expertise with respect to environmental impacts;
 - Considered all plans, studies, surveys, inventories, and systems of classification made or being made by federal, state, regional, or local agencies, by private individuals, or by organizations dealing with King County shorelines;
 - 4. Used all available information regarding hydrology, geography, topography, ecology, economics, and other pertinent data; <u>and</u>
 - 5. Employed, when possible, all appropriate, modern scientific data processing and computer techniques to store, index, analyze, and manage the information gathered.

King County has reviewed and synthesized a wide range of scientific information resulting in regulatory
standards based on the best available science for the protection of critical areas. In addition, King
County considered ((state,)) Indian tribal, state, and federal programs to provide a full spectrum of
planning and regulatory measures to guide critical areas protection in shorelines.

((S-615)) <u>S-611</u> In considering development regulations to protect shoreline ecological processes and functions, King County shall consider the scientific and technical information contained in functional plans, ((adopted to implement the Comprehensive Plan, adopted)) watershed plans, ((King County)) critical areas regulations, and ((state,)) <u>Indian</u> tribal, <u>state</u>, and federal programs.

- 1670
 1671 ((In order to ensure no net loss of shoreline ecological processes and functions resulting from
 1672 development proposed in shoreline critical areas, the King County Shoreline Master Program requires
- 1673 that development proposals analyze the environmental impacts of the proposal and consider measures
- 1674 to avoid, if possible, and then mitigate for the adverse environmental impacts.))

1675 3. Wetlands

1692	g. Significant vegetation removal, except for non-conversion forest practices				
1693	regulated under <u>Chapter 76.09</u> Revised Code of Washington ((chapter 76.09));				
1694	h. Other uses or development that results in a significant ecological impact to the				
1695	n. Other uses or development that results in a significant ecological impact to the physical, chemical, or biological characteristics of wetlands; and				
1696	i. Activities reducing the functions of buffers.				
1697	i. Activities reducing the functions of bullers.				
1698	((Wetlands shall be categorized based on rarity, irreplaceability, or sensitivity to disturbance, as well as				
1699	the functions the wetland provides. The Shoreline Management Act provides the option of using				
1700	specified wetland rating systems or developing a regionally specific system, provided the system is				
1701	scientifically based and provides a method to distinguish wetland quality and function. King County				
1702	adopted the Washington State Wetland Rating System for Western Washington for use in categorizing				
1703	wetlands under the Growth Management Act critical areas development standards.				
1704					
1705	S-618)) <u>S-613</u> King County shall categorize wetlands within shorelines of the state as provided for				
1706	in Chapter 5((:)), Environment((, of the King County Comprehensive Plan)).				
1707					
1708	((The King County Shoreline Master Program provisions that would allow limited alterations to wetlands				
1709	shall be consistent with the policy of no net loss of wetland area and functions, wetland rating, and				
1710	scientific and technical information.				
1710	scientific and technical mormation.				
1712	S-619)) <u>S-614</u> King County should allow alterations to wetlands only if there is no net loss of				
1713	wetland functions and values and the alteration is consistent with the critical areas				
1714	regulations.				
1715					
1716	((The King County Shoreline Master Program requires buffers be delineated and protected around				
1717	wetlands. The size of the wetland buffer is based on the classification of the wetland and its				

wetlands. The size of the wetland buffer is based on the classification of the wetland and its
 characteristics and whether the wetland is located within or outside of the Urban Growth Area.
 Mitigation measures have been established to obtain a reduced buffer width in return for added
 measures to address light, noise, toxic runoff, change in water regime, pets and human disturbance,
 dust, and degraded buffer condition. Other modifications to buffer widths are allowed through buffer
 averaging. Circumstances, such as the presence of threatened or endangered species or proximity to
 steep slopes, may authorize increased buffer widths.

S-620)) <u>S-615</u> King County shall delineate buffers around wetlands to protect and maintain wetland functions. Buffer widths shall be based on <u>wetland category,</u> ecological function, characteristics and setting, potential impacts with adjacent land use, and other relevant factors.

1730	((The King County Shoreline Master Program requires that mitigation measures achieve equivalent or		
1731	greater wetland functions including, but not limited to, habitat complexity, connectivity and other		
1732			
1733	that replace the impacted functions directly and in the immediate vicinity of the impact.		
1734			
1735 1736 1737 1738 1739	S-621 In determining appropriate mitigation measures applicable to shoreline development, the mitigation sequencing requirements described in Washington Administrative Code 173-26-201(((2)(e))) require that lower priority measures shall be applied only where higher priority measures are determined to be infeasible or inapplicable.		
1740	King County may authorize alternative compensatory mitigation within the watershed that addresses		
1741	limiting factors or identified critical needs for shoreline resource conservation based on watershed or		
1742	comprehensive resource management plans applicable to the area of impact. Authorization of		
1743	compensatory mitigation measures may require appropriate safeguards, terms, or conditions as		
1744	necessary to ensure no net loss of shoreline ecological processes and functions.		
1745	5		
1746	S-622)) <u>S-616</u> King County may allow compensatory mitigation only after a mitigation sequence is		
1747	applied (((see)) <u>consistent with</u> Policy S-((616)))609 and higher priority means of		
1748	mitigation are determined to be infeasible.		
1749	a. Compensatory mitigation replacement ratios or other mitigation provisions shall		
1750	consider:		
1751 1752	1. The risk of failure of the compensatory mitigation action;		
1752	The length of time the compensatory mitigation action will take to replace adequately the impacted wetland functions and values; and		
1754	3. The gain or loss of the type, quality, and quantity of the ecological functions of		
1755	the compensation.		
1756	b. Performance standards shall be established to evaluate the success of		
1757	compensatory mitigation.		
1758	c. Long-term monitoring shall be required to determine if performance standards are		
1759	met.		
1760	d. Long-term protection and management shall be required for compensatory		
1761	mitigation sites.		
1762	4. Critical Aquifer Recharge Areas		
1763	King County has classified and mapped critical aquifer recharge areas according to the vulnerability of		
1764	the aquifer. Vulnerability is the combined effect of hydrogeological susceptibility to contamination and		
1765	the contamination loading potential. High vulnerability is indicated by land uses that contribute		
1766	contamination that may degrade groundwater and by hydrogeologic conditions that facilitate		
1767	degradation. Low vulnerability is indicated by land uses that do not contribute contaminants that will		
1768	degrade groundwater and by hydrogeologic conditions that do not facilitate degradation. ((Critical		
1769	aquifer recharge areas are required to be protected under the Growth Management Act as a critical		
1770	area.		
1771			
1772	S-623)) <u>S-617</u> The King County Shoreline Master Program shall protect critical aquifer recharge		

1772 S-623)) S-617 The King County Shoreline Master Program shall protect critical aquifer recharge areas consistent with the King County Comprehensive Plan and critical areas regulations.

1775 5. Geologically Hazardous Areas

Geologically hazardous areas include areas susceptible to erosion, sliding, earthquake, or other
geological processes and events. They pose a threat to the health and safety of residents when
incompatible commercial, residential, or industrial development is sited in areas of significant hazard.
Some geological hazards can be reduced or mitigated by engineering, design, or modified construction
or mining practices, so that risks to health and safety are acceptable. When technology cannot reduce
risks to acceptable levels, building in geologically hazardous areas is best avoided. Under the King
County Shoreline Master Program, geologically hazardous areas include:

1783 ((1.)) Alluvial fan hazard areas; • 1784 Channel migration zones; • 1785 Erosion hazard areas: • 1786 ((2.)) Landslide hazard areas; • 1787 ((3.)) Seismic hazard areas; • 1788 • ((4.)) Coal mine hazard areas; 1789 ((5.)) Volcanic hazard areas; • 1790 Tsunami hazard area; and • 1791 ((6.)) Steep slope hazard areas. ٠ 1792 1793 The following policies to protect health and safety and also to reduce the loss of shoreline ecological 1794 processes and functions apply to geological hazardous areas located within the shoreline jurisdiction. 1795 1796 ((S-624 **Development regulations for geologically hazardous areas shall meet the minimum** 1797 requirements in Washington Administrative Code 365-190-120. 1798 1799 King County shall prohibit development and new lot creation in geologically S-625)) S-618 1800 hazardous areas if it would result in increased risk of injury to people or property 1801 damage, consistent with King County Code ((c))Chapter 21A.24. 1802 1803 ((S-626 King County shall prohibit new development that requires structural stabilization in 1804 geologically hazardous areas. Stabilization will be allowed in these areas only if the 1805 stabilization is necessary to protect existing allowed uses, there is no alternative 1806 location available, and no net loss of shoreline ecological processes and functions will 1807 result. Stabilization measures shall conform to Washington Administrative Code 1808 173-26-231. 1809 1810 S-627 King County may allow stabilization structures or measures in geologically hazardous 1811 areas to protect existing primary residential structures, if there are no alternatives, 1812 including relocation or reconstruction of the residential structure, the stabilization is in 1813 conformance with Washington Administrative Code 173-26-231, and no net loss of 1814 shoreline ecological processes and functions will result.)) 1815 Fish and Wildlife Habitat Conservation Areas 1816 6.

1817 ((King County is required by the Growth Management Act to protect fish and wildlife habitat 1818 conservation areas as critical area. The Washington State Department of Commerce adopted guidelines 1819 to assist local governments in designating critical areas, including fish and wildlife habitat conservation 1820 areas. The Department of Commerce guidelines are designed to define and protect areas necessary to 1821 maintain species in suitable habitats within their natural geographic distribution, at least in part so that 1822 isolated subpopulations are not created.)) The Department of Commerce identifies the following areas 1823 as being suitable for fish and wildlife habitat conservation areas: 1824 1. Areas with which endangered, threatened, and sensitive species have a primary association;

1825 ((areas critical for habitat connectivity;)) 1826 2. Habitats and species of local importance; 1827 3. Commercial and recreational shellfish areas; 1828 4. Kelp and eelgrass beds; herring, smelt and sand lance spawning areas; 1829 5. Naturally occurring ponds under twenty acres and their submerged aquatic beds that 1830 provide fish or wildlife habitat; 1831 6. Waters of the state; 1832 7. Lakes, ponds, streams, and rivers planted with game fish by an Indian tribal or other 1833 governmental ((or Tribal)) entity; or 1834 8. State natural area preserves and natural resource conservation areas. 1835

The King County Comprehensive Plan and its development regulations protect the functions and values
 of fish and wildlife habitat conservation areas through its provisions governing aquatic areas and wildlife
 habitat conservation areas.

1840 The Department of Ecology's guidelines divide fish and wildlife habitat conservation areas into critical saltwater and critical freshwater habitats.

1843 a. Critical saltwater habitat

1842

1850

1851

1852 1853

1854

1855

1862 1863

1864

1844 Critical saltwater habitats include all kelp beds, eelgrass beds, spawning and holding areas for forage
1845 fish, such as herring, smelt and sand lance; subsistence, commercial and recreational shellfish beds;
1846 mudflats, spits, intertidal habitats with vascular plants((-)); and areas with which priority species have a
1847 primary association. Critical saltwater habitats include both the shorelines and the adjacent submerged
1848 areas.

((S-628)) <u>S-619</u> King County shall provide a high level of protection to critical saltwater habitats due to the important ecological functions they provide.

((S-629)) <u>S-620</u> Protection and restoration of critical saltwater habitats should integrate management of shorelands as well as submerged areas.

1856 Comprehensive planning for the protection and restoration of critical saltwater habitat should include 1857 state resource agencies, local and regional government entities including, but not limited to, affected 1858 Indian tribes, the Port of Seattle, and Sound Transit((, and affected tribes)). To reverse the impacts from 1859 development on critical saltwater habitats, the King County Shoreline Master Program should look for 1860 opportunities to restore critical saltwater shorelines and protect them from further degradation. All 1861 resources should be reviewed and considered.

((S-630)) <u>S-621</u> As part of its management planning for critical saltwater habitats, King County should include an evaluation of current data and trends regarding:

1865 a. Available inventory and collection of necessary data regarding physical 1866 characteristics of the habitat, including upland conditions, and any information on 1867 species population trends; 1868 b. Terrestrial and aquatic vegetation; 1869 c. The level of human activity in such areas, including the presence of roads and level 1870 of recreational types. Passive or active recreation may be appropriate for certain 1871 areas and habitats; 1872 d. Restoration potential; 1873 e. Tributaries and small streams flowing into marine waters; 1874 Dock and bulkhead construction, including an inventory of bulkheads serving no f. 1875 protective purpose; 1876 g. Conditions and ecological function in the near-shore area; 1877 h. Uses surrounding the critical saltwater habitat areas that may negatively impact 1878 those areas, including permanent or occasional upland, beach, or over-water uses; 1879 i. Potential Indian tribal uses of critical saltwater habitats to ensure that these uses are 1880 protected and restored when possible; and 1881 j. An analysis of what data gaps exist and a strategy for gaining this information. 1882 1883 Because of the need for a higher level of protection for critical saltwater habitat, allowed uses should be 1884 carefully limited and only allowed to meet other policy goals of the Shoreline Management Act. 1885 1886 ((S-631)) <u>S-622</u> Docks, bulkheads, bridges, fill, floats, jetties, utility crossings, and other 1887 human-made structures shall not intrude into or over critical saltwater habitats except 1888 when all of the conditions below are met: 1889 a. The public's need for such an action or structure is clearly demonstrated, and the 1890 proposal is consistent with protection of the public trust, as embodied in Revised 1891 Code of Washington 90.58.020;

1892

1893

1894

1895

- b. Avoidance of impacts to critical saltwater habitats by an alternative alignment or location is not feasible or would result in unreasonable and disproportionate cost to accomplish the same general purpose;
 - c. The project, including any required mitigation, will result in no net loss of ecological functions associated with critical saltwater habitat; and
 - d. The project is consistent with ((state and)) Indian ((Ŧ)) tribal and state interests in resource protection and species recovery.

((5-632)) S-623 Public or private noncommercial docks for public, individual residential, or community use may be authorized provided that:

- a. Avoidance of impacts to critical saltwater habitats by an alternative alignment or location is not feasible; and
- b. The project, including any required mitigation, will result in no net loss of ecological
 - functions associated with critical saltwater habitat.

Critical freshwater habitat ((b.))

Critical freshwater habitats are as equally important ((to)) as saltwater areas ((as)) for fish and wildlife habitat conservation areas along shorelines of the state. Critical freshwater habitats include streams and rivers, with their associated channel migration zones, floodplains, wetlands, and lakes. Shorelines along these freshwater habitats often have been highly developed and are currently adversely impacted by improper stormwater, sewer, or industrial outfalls; unmanaged clearing and grading; and stormwater runoff from buildings and parking lots. Some impacts include altered guality and guantity of stormwater 1914 runoff, as well as destruction or alteration of vegetation. Potential impacts from vegetation changes can 1915 include increased water temperatures and altered hydrographic conditions. All of these changes create 1916 inhospitable conditions in water bodies for priority species and, in addition, make them more 1917 susceptible to problems stemming from catastrophic flooding, droughts, landslides, and channel 1918 changes. 1919

1920 Some freshwater habitats, particularly rivers and floodplains, often are considered as hazardous areas 1921 that can threaten life and property during catastrophic events, such as flooding. Development can 1922 exacerbate such conditions. 1923

1924 As with critical saltwater habitats, comprehensive planning for the protection and restoration of critical 1925 freshwater habitat should include affected Indian tribes, state resource agencies, and local and regional 1926 government entities including, but not limited to the Port of Seattle((;)) and Sound Transit((; and affected 1927 tribes)). To reverse the impacts from development on critical freshwater habitats, the King County 1928 Shoreline Master Program should look for opportunities to restore critical freshwater shorelines and 1929 protect them from further degradation. All resources should be reviewed and considered. 1930

((S-633)) <u>S-624</u> King County shall provide a high level of protection to critical freshwater habitats due to the important ecological functions they provide.

- ((5-634)) S-625 King County should establish priorities for protection and restoration, where appropriate, along unincorporated river corridors and lake shorelines.
- 1937 ((S-635)) S-626 King County ((should)) shall regulate uses and development as necessary within and 1938 along stream channels, associated channel migration zones, wetlands, lake shorelines, 1939 ((and)) floodplains, and other critical areas within the shoreline jurisdiction, to ((assure)) 1940 ensure that no net loss of shoreline ecological processes and functions results from new 1941 development near freshwaters of the state, including associated hyporheic zones. 1942
- ((S-636)) <u>S-627</u> King County shall protect ecological functions associated with critical freshwater 1944 habitat as necessary to ((assure)) ensure no net loss from shoreline activities and associated changes.
- 1947 ((S-637)) <u>S-628</u> King County should facilitate authorization of appropriate restoration projects.

1949 C. Frequently Flooded Areas and Channel Migration1950 Hazard Areas

The King County ((2013)) Flood Hazard Management Plan (<u>Flood Plan</u>) ((was)) is adopted as a functional plan of the King County Comprehensive Plan. The Flood Plan outlines the policies, programs, and projects that King County uses to reduce the risk from flooding and channel migration. The ((King County 2013)) Flood Hazard Management Plan was reviewed for consistency with the Shoreline Management Act and determined to be consistent with it. King County maps Channel Migration Hazard 1956 Areas and applies critical areas regulations to ((assure)) ensure that channel migration can be accommodated.

((S-638)) <u>S-629</u> The policies contained within the King County Flood Hazard Management Plan, or ((its)) successor <u>plan</u>, constitute the policies for the protection of frequently flooded areas and channel migration within shorelines. Provisions implementing these policies are included in the critical areas regulations.

1964 ((S-639)) S-630 King County shall continue mapping channel migration zones on all of its rivers and 1965 streams within shoreline jurisdiction where channel migration zones have not already been 1966 mapped.

1967 D. Shoreline Vegetation Conservation

A major intent of vegetation conservation is to protect and restore the ecological processes and functions performed by stands of vegetation along shorelines. Vegetation conservation can also be undertaken to protect human safety and property, to increase the stability of river banks and coastal bluffs, to reduce the need for structural shoreline stabilization measures, to improve the visual and aesthetic qualities of the shoreline, to protect particular plant and animal species and their habitats, and to enhance shoreline uses.

1963

1975 In King County, aquatic environments, as well as their associated upland and wetland vegetated areas,
1976 provide significant habitat for a wide variety of fish and wildlife species. Healthy environments for
1977 aquatic species are inseparably linked with the ecological integrity of the surrounding terrestrial
1978 ecosystems. For example, nearly continuous stretches of mature forest characterize the natural riparian
1979 conditions of the Pacific Northwest. Riparian areas along marine shorelines provide the same or similar
1980 functions as their freshwater counterparts. The most commonly recognized functions of the shoreline
1981 vegetation include, but are not limited to:

1982 1983	 Providing shade necessary to maintain cool water temperatures required by salmonids, spawning forage fish, and other aquatic biota. 	
1984	 Providing external organic inputs critical for some aquatic life. 	
1985	• Providing food for various insects and other benthic macro invertebrates, which are in turn	
1986	food sources for fish, birds, and other wildlife.	
1987	• Stabilizing banks, minimizing erosion, and reducing the occurrence of landslides. The roots	5
1988	of trees and other riparian vegetation provide the bulk of this function.	
1989	Reducing fine sediment input into the aquatic environment through stormwater retention	
1990	and vegetative filtering.	
1991	• Filtering and vegetative uptake of nutrients and pollutants from groundwater and storm	
1992	runoff.	
1993	• Providing a source of large woody debris for introduction into the aquatic system. Large	
1994	woody debris is a primary structural component in streams that functions as a hydraulic	
1995	roughness element to moderate flows and store sediment. Large woody debris also serves	
1996	a pool-forming function, providing critical salmonid rearing and refuge habitat. Abundant	
1997	large woody debris increases aquatic diversity and stabilizes systems.	
1998	 Regulating microclimates in the lake and stream-riparian and intertidal corridors. 	
1999	 Providing critical wildlife habitat, including migration corridors and feeding, watering, 	

2000	rearing and refuge areas
2000	rearing, and refuge areas.
2001	The base of the base of the second state of th
	The length, width, and species composition of a shoreline vegetation community all contribute
2003	substantively to aquatic ecological functions. Likewise, the biological communities of the aquatic
2004	environment are essential to ecological functions of the adjacent upland vegetation. The ability of
2005	vegetated areas to provide critical ecological functions diminishes as the length and width of the
2006	vegetated area along shorelines is reduced. When shoreline vegetation is removed, there is a greater
2007	risk that important ecological functions will not be provided.
2008	
2009	Sustaining different ecological functions requires varying widths, compositions, and densities of
2010	vegetation. The importance of the different functions, in turn, varies with the type of shoreline setting.
2011	For example, in forested shoreline settings, periodic introduction of fallen trees, especially conifers, into
2012	the stream channel is an important attribute that is critical to natural stream channel maintenance.
2012	the stream channel is an important attribute that is chitcar to natural stream channel maintenance.
2014	Vegetation conservation includes activities to protect and restore vegetation that contributes to the
2015	ecological functions of shoreline areas along or near marine and freshwater shorelines.(($^{+}$) Vegetation
2016	conservation provisions generally include ((the)) prohibiting or limiting plant clearing and earth grading,
2017	restoring vegetation, and controlling invasive weeds and nonnative species. Vegetation conservation
2018	does not include those activities covered under the Washington State Forest Practices Act, except for
2019	conversion to other uses and those other forest practice activities over which local governments have
2020	authority.

2048
2049S-645)) S-635King County should adopt mechanisms to implement the vegetation conservation
policies of this chapter. These mechanisms may include setback or buffer requirements,
riparian widths sufficient to support the growth of mature trees and recruitment of
woody vegetation, clearing and grading standards, regulatory incentives, environment
designation standards, or other provisions. Selective pruning of trees for safety and
view protection may be allowed. Removal of noxious weeds and invasive vegetation
should be allowed as long as appropriate best management practices are followed.

2055 E. Water Quality, Stormwater and Non-Point Pollution

The Shoreline Master Program must protect against adverse impacts to the public health, to the land with its vegetation and wildlife, and to the waters of the state and their aquatic life. The intent of water quality, stormwater, and non-point pollution policies is to provide shoreline protection by preventing adverse impacts to shoreline ecological processes and functions, aquatic habitats, and water dependent uses such as aquaculture and fishing.

((S-646 Shoreline Master Program water quality, stormwater, and non-point pollution policies apply to all development and uses in the shoreline jurisdiction that affect water quality.

- S-647)) <u>S-636</u> King County should work to prevent impacts to water quality and stormwater quantity that would result in a net loss of shoreline ecological functions, degraded aesthetic qualities, loss of recreational opportunities<u>,</u> or reduction in water-dependent uses, such as aquaculture and fishing.
- ((S-648)) <u>S-637</u> King County should ensure mutual consistency between shoreline management provisions and other regulations that address water quality and stormwater quantity, including Public Health___Seattle & King County standards, the King County Surface Water Design Manual, and King County surface water management regulations. The regulations that are most protective of ecological functions shall apply.
- ((S-649)) <u>S-638</u> The Shoreline Master Program shall include provisions to implement the water quality, stormwater, and non-point pollution policies in this chapter.

Land uses in King County are based on federal, state, and county policies and regulations.)) The
 baseline permitted uses are established in zoning regulations. Land uses that would be allowed in
 zoning may be further limited by the King County Shoreline Master Program and shoreline management
 regulations.

- ((S-701 King County shall give preference to uses in the shoreline that are consistent with the control of pollution and prevention of damage to the natural environment or are unique to or dependent upon the shoreline.
- S-702)) <u>S-701</u> Development within the shoreline jurisdiction shall protect the public's health, safety, and welfare, as well as the land, including its vegetation and wildlife, and protect property rights<u>,</u> while implementing the policies of the Shoreline Management Act.
- ((S-703)) <u>S-702</u> Where there is a conflict between the uses permitted in the ((land use zone)) <u>zoning</u> <u>code</u> and the Shoreline Master Program for a site, the Shoreline Master Program shall control and preference shall be given first to water-dependent uses, then to water-related uses, and finally to water-enjoyment uses.
 - ((S-704 Shoreline Master Program development regulations shall ensure no net loss of shoreline ecological processes and functions.
- S-705)) <u>S-703</u> King County shall adopt use policies and development regulations to achieve consistency among and between shorelands and adjacent lands as required by Revised Code of Washington 90.58.340.
- 2128 ((2.)) <u>B.</u> Shoreline Conditional Uses
- 2129 ((For the purposes of the King County Shoreline Master Program, a)) <u>A</u> shoreline conditional use may be
 2130 appropriate ((in order)) to:
 - 1. Effectively address unanticipated uses that are not classified in the Shoreline Master Program;
- 2132 2. Address cumulative impacts; or
- Provide the opportunity to require specially tailored environmental analysis or design criteria for types of use or development that may otherwise be inconsistent with a specific designation within the Shoreline Master Program or with the Shoreline Management Act policies.
- 2137 ((S-706)) S-704 The following types of uses and development should require a shoreline conditional
 2138 use permit:
 2139 ((1-)) a. Uses and development that may significantly impair or alter the public's use of
 - ((1.)) <u>a.</u> Uses and development that may significantly impair or alter the public's use of the waters of the state;
 - ((2.)) <u>b.</u> Uses and development which, by their intrinsic nature, may have a significant impact on shoreline ecological processes and functions depending on location, design, and site conditions; and
 - ((3.)) <u>c.</u> Development in critical saltwater habitats.

2146 ((3.)) <u>C.</u> Agriculture

2147 The Shoreline Management Act defines agricultural activities as:

"agricultural uses and practices including, but not limited to: Producing, breeding, or increasing agricultural products; rotating and changing agricultural crops; allowing land used for agricultural activities to lie fallow in which it is plowed and tilled but left unseeded; allowing land used for agricultural activities to lie dormant as a result of adverse agricultural market conditions; allowing land used for agricultural activities to lie dormant because the land is enrolled in a local, state, or federal conservation program, or the land is subject to a conservation easement; conducting agricultural operations; maintaining, repairing, and replacing agricultural facilities, provided that the replacement facility is no closer to the shoreline than the original facility; and maintaining agricultural lands under production or cultivation".

The Shoreline Management Act prohibits shoreline master programs from requiring modification to or limiting existing agricultural activities on agricultural lands in the shoreline jurisdiction. This limitation does not apply to new agricultural activities.

The Shoreline Master Program encourages agricultural uses that are compatible with the shoreline designation in which they are proposed.

((S-707)) <u>S-705</u> The King County Shoreline Master Program shall not require modification of or limit existing agricultural activities in the shoreline jurisdiction. Existing agricultural activities in the shoreline jurisdiction shall be governed by existing provisions of the King County Comprehensive Plan and the King County Code.

((S-708 New agricultural activities in the shoreline jurisdiction shall comply with the critical areas regulations incorporated into the shoreline master program as they apply to agricultural activities.

As required by the Growth Management Act, King County has designated agricultural lands of long-term commercial significance. These lands have been included in Agricultural Production Districts under the King County Comprehensive Plan. Land uses meeting the definition of "agricultural activities" also occur outside the designated Agricultural Production Districts. The King County Shoreline Master Program encourages agricultural uses, but they must be compatible with the shoreline designation in which they are proposed. In addition, under the rare circumstances when land is removed from the Agricultural Production Districts, any development occurring on that land must be consistent with the shoreline designation where it is located.

S-709)) <u>S-706</u> New agricultural activities within the shoreline jurisdiction and outside the Agricultural Production Districts shall be consistent with the shoreline designation where the land is located.

- ((S-710)) <u>S-707</u> New agricultural activities within the shoreline jurisdiction and outside the Agricultural Production Districts shall be located and designed to ensure no net loss of shoreline ecological processes and functions and shall not result in an adverse impact on other shoreline resources and ecological values.
- ((S-711)) <u>S-708</u> Development and uses on land removed from the Agricultural Production Districts shall be consistent with the shoreline designation where the land is located.

2224

2231

2232

2233

2234

In general, the Department of Ecology's guidelines require local shoreline master programs to rely on
 the Forest Practices Act and the rules implementing that Act and the Forest and Fish Report as adequate
 management of commercial forest uses within the shoreline jurisdiction. When a property owner
 chooses to convert commercial timber land to a use other than timber production, the regulations for
 commercial forestry no longer apply. Shorelines of statewide significance require a higher level of
 protection.

((S-712)) <u>S-709</u> If land is being converted to a non-forest use through Class IV-General forest practice, the provisions of the King County Shoreline ((Management)) Program that apply to development activities govern((s)) the proposed land use.

((S-713)) <u>S-710</u> Within shorelines of statewide significance, selective commercial timber cutting shall be used for timber harvest within two hundred feet abutting landward of the ordinary high water mark so that no more than thirty percent of the merchantable trees may be harvested in any ((ten)) <u>10-</u>year period of time. Through a shoreline conditional use permit, King County may approve:

- a. Other timber harvesting methods in those limited instances where the topography, soil conditions, or silviculture practices necessary for regeneration render selective logging ecologically detrimental; and
- b. Clear cutting of timber that is solely incidental to the preparation of land for other uses authorized by the King County Shoreline Master Program.

((S-714)) <u>S-711</u> For forest practice conversions and other Class IV-General forest practices, where there is a likelihood of conversion to nonforest uses, King County shall ensure that there is no net loss of shoreline ecological processes and functions and that there are no significant adverse impacts to other shoreline uses, resources, and values such as navigation, recreation, and public access.

2225 2226 ((5.)) <u>E.</u>Surface Drilling for Oil and Gas

The Shoreline Management Act prohibits surface drilling in the waters of Puget Sound north to the
 Canadian ((boundary)) border and the Strait of Juan de Fuca seaward from the ordinary high water mark
 and on all lands within one thousand feet landward from that line.

((S-715)) <u>S-712</u> Surface drilling for oil or gas shall be prohibited in Puget Sound seaward from the ordinary high water mark and on all lands within one thousand feet landward from the ordinary high water mark on Puget Sound.

2235 ((6.)) <u>F.</u> Aquaculture

2236 ((a.))<u>1.</u> General Aquaculture

Aquaculture is the culture or farming of fish, shellfish, or other aquatic plants and animals. Aquaculture does not include the harvest of wild geoduck associated with the state managed wildstock geoduck fishery. ((Aquaculture is dependent on the use of the water area and, when consistent with goals for aesthetics, public access, control of pollution and prevention of damage to the environment should be allowed so long as it does not result in a net loss of shoreline ecological processes and functions.)) The visual and aesthetic impacts of aquaculture should not overwhelm adjacent land uses.

- 2244
2245((S-716)) S-713
shoreline when consistent with control of pollution and avoidance of adverse impacts to
the environment and preservation of habitat for native species, (((;)) consistent with
Washington Administrative Code 173-26-241(((3)(b)))).2248
 - ((S-716a)) <u>S-714</u>King County shall prohibit nonnative marine finfish aquaculture.

2289

2290

2291

2292

2293 2294

2295

2296

2297

- 2250 2251 ((S-717)) S-715 Potential locations for aquaculture activities are relatively restricted because of 2252 specific requirements related to water quality, temperature, oxygen content, currents, 2253 adjacent land use, wind protection, commercial navigation, and salinity. The 2254 technology associated with some forms of aquaculture is still experimental and in 2255 formative states. Therefore, when implementing development regulations related to 2256 aquaculture, King County should provide flexibility in its development regulations 2257 governing the siting of aquaculture facilities, where appropriate. Those regulations 2258 shall require avoidance of adverse impacts to existing uses((,)) to the maximum extent 2259 practical, and no net loss in shoreline ecological functions and processes. If King County 2260 determines that certain types <u>of</u> aquaculture involve a significant risk of net loss in 2261 shoreline ecological functions or cumulative adverse effects on the environment or 2262 native species and their habitats, the County may prohibit or condition such uses in its 2263 development regulations. 2264
 - ((S-718)) S-716 Aquaculture activities shall be designed, located, and operated in a manner that supports long-term beneficial use of the shoreline and protects and maintains shoreline ecological processes and functions. Aquaculture permits shall not be approved where it would result in net loss of shoreline ecological functions; net loss of habitat for native species including eelgrass, kelp, and other macroalgae; adverse impacts to other habitat conservation areas; or interference with navigation or other water-dependent uses.
 - ((S-719)) <u>S-717</u> Aquaculture facilities shall be designed, operated, and located so as not to spread disease to native aquatic life, establish new nonnative species that cause significant ecological impacts, or substantially impact the aesthetic qualities and public access of the shoreline.
 - ((S-720)) S-718 Preference should be given to those forms of aquaculture that involve lesser environmental and visual impacts and lesser impacts to native plant and animal species. In general, projects that require no structures, submerged structures, or intertidal structures are preferred over those that involve substantial floating structures. Projects that involve little or no substrate modification are preferred over those that involve substantial modification, recognizing that in some circumstances that the importation of sand or pea gravel on rocky or cobble substrates may result in more diverse habitat. Projects that involve little or no supplemental food sources, pesticides, herbicides, or antibiotic application are preferred over those that involve such practices.
 - ((S-721)) <u>S-719</u> Aquaculture shall not be permitted if it involves significant risk of cumulative adverse effects on water quality, sediment quality, benthic and pelagic organisms, or wild fish populations through potential contribution of antibiotic resistant bacteria, ((or)) escapement of non((-))native species, or other adverse effects on native species or threatened or endangered species and their habitats.
 - ((S-722)) <u>S-720</u> King County shall consider the potential beneficial impacts and the potential adverse impacts of new aquaculture development on the physical environment; on other existing and approved land and water uses, including navigation; and on the aesthetic qualities of a project area.

- 2299
2300((S-723)) S-721
should be protected from incompatible uses that may seek to locate nearby. King
County may deny uses or developments that have a high probability of damaging or
destroying a legally established existing aquaculture.2301
2302destroying a legally established existing aquaculture.
 - ((S-724)) <u>S-722</u> King County should review and make permit decisions on restoration projects associated with aquaculture in a timely manner.
 - ((S-725)) <u>S-723</u> Experimental aquaculture projects in water bodies should be limited in scale and should be approved for a limited period of time. Experimental aquaculture means an aquaculture activity that uses methods or technologies that are unprecedented or unproven in the State of Washington.
 - ((S-726)) <u>S-724</u> King County should actively seek substantive comment regarding potential adverse impacts of any shoreline permit application for aquaculture from all appropriate <u>Indian</u> <u>tribal</u>, ((F))<u>f</u>ederal, ((S))<u>s</u>tate, and local agencies((; the Muckleshoot Tribe, the Puyallup Tribe of Indians, the Tulalip Tribes and other tribes with treaty fishing rights;)), and the general public. Comments of nearby residents or property owners directly affected by an aquaculture proposal should be considered and evaluated, especially in regard to use compatibility and aesthetics.
 - ((S-727)) <u>S-725</u> The rights of treaty <u>Indian</u> tribes to aquatic resources within their usual and accustomed areas should be addressed through the permit review process. Direct and early coordination between the applicant or proponent and the <u>relevant</u> tribe<u>s</u> should be encouraged.

((S-727a)) <u>S-726</u> King County should ensure proper management of upland uses in the shoreline jurisdiction to avoid degradation of water quality of existing shellfish areas, including adoption of additional protections from impacts of geoduck aquaculture.

2328 ((b.)) <u>2.</u> Net Pens

2304

2319 2320

2321

2322

2323

2324 2325

2326

2327

One specific type of aquaculture is a net pen, which is a type of large cage used to farm finfish in open water. These net pens allow for the exchange of water between the farm and the surrounding environment. ((In 2017, a large commercial net pen near Cypress Island collapsed and released hundreds of thousands of nonnative salmon into King County's shorelines of statewide significance.

 Following this incident, King County reviewed its net pens regulations in 2018 for potential impacts on native species and found that c))<u>C</u>ommercial salmon net pen aquaculture operations generally have adverse environmental and ecological impacts that do not appear to meet the ((SMA)) <u>Shoreline</u>
 <u>Management Act</u> standard of 'no net loss of ecological function.' These adverse impacts include increased disease transmission, increased water quality impacts, competition for food and habitat, predation on local native salmon, and genetic introgression.

King County's native salmon runs are among the Puget Sound region's most precious and irreplaceable
natural resources. King County, ((area)) Indian tribes, the state, the region, and the federal government
have collectively invested hundreds of millions of dollars over many years to help protect and restore
native salmon species. ((The impacts of net pens to native salmon outlined above would threaten years
of work and millions of dollars in investments.))

The environmental and ecological risks associated with commercial salmon net pens may also apply to
 other finfish net pens, including net pens for noncommercial native salmon and commercial native
 finfish. ((, but there is a lack of current information regarding these risks. The Department of Ecology's
 Shoreline Master Program Handbook lists only three references to guide local jurisdictions in how to
 regulate net pens, all of which predate the Endangered Species Act listings of Southern Resident Puget
 Sound Orcas, Puget Sound Chinook salmon, and Puget Sound steelhead as threatened. The

((2016)) <u>2024 King County</u> Comprehensive Plan - ((updated December 6, 2022)) <u>Adopted TBD</u> <u>Attachment A to</u> Ordinance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555)) <u>xxxxx</u> (<u>Proposed Ordinance 2023-0440</u>)

Department of Ecology acknowledges in the handbook that interim net pen guidelines from the 1980s
 are out of date and caution should be used if relying on them.

In response to the Cypress Island incident, the Washington State Legislature adopted Engrossed House
 Bill 2957 prohibiting new or expanded leases for nonnative marine finfish aquaculture. House Bill 2957
 also directed state agencies to continue updating guidance and informational resources for planning
 and permitting marine net pen aquaculture. State agencies were further directed to seek advice and
 assistance from the Northwest Indian Fisheries Commission, national centers for coastal ocean science,
 and to invite consultation with universities and federally recognized Indian tribes. The applicable state
 agencies must report to the legislature in late 2019.

- S-272b)) <u>S-727</u> King County shall prohibit new commercial salmon net pen aquaculture operations to avoid adverse impacts on native salmon runs.
- ((S-272c)) <u>S-728</u> King County shall support <u>Indian</u> tribal treaty fishing rights, including operation of noncommercial native salmon net pens for temporary rearing and brood stock recovery programs.
 - ((S-727d)) <u>S-729</u> King County shall review and condition the siting of net pens to ensure they apply all necessary environmental and ecological protections and meet the standard of no adverse impacts and no net loss of ecological function.
 - ((S-727e)) <u>S-730</u> King County shall revisit its policies and regulations associated with net pens, including the prohibition on commercial native salmon net pens, during the next statutory-required periodic review of this program. At that time, additional research and guidance from the state is expected to be available.

Boating facilities provide ((the boating public)) recreational opportunities on waters of the state.((, but
 should be sited carefully to assure no net loss of shoreline ecological processes and functions and to
 maintain the aesthetic quality of the shoreline. For purposes of the King County Shoreline Master
 Program, "b))<u>"B</u>oating facilities" do not include docks serving four or fewer single((-family residences))
 detached residences.

((S-728)) <u>S-731</u> Boating facilities shall be located only at sites with suitable environmental conditions, shoreline configuration, access, and neighboring uses, and:

- a. Meet health, safety, and welfare requirements;
- b. Mitigate aesthetic impacts;
- c. Provide public access in new marinas, unless there is a safety or security concern;
- d. Prevent the impacts to shoreline resources from boaters living on their vessels;
- e. Restrict vessels ((should be restricted)) from extended mooring on waters of the state unless authorization is obtained from the Washington Department of Natural Resources and impacts to navigation and public access are mitigated;
- f. ((Assure)) <u>Ensure</u> no net loss of shoreline ecological processes and functions or other significant adverse impacts; and
- g. Protect the rights of navigation.

2400 ((8.)) <u>H.</u> Commercial Development

Some commercial uses within the shoreline jurisdiction may be required to incorporate appropriate design and operational elements to qualify as water-related or water-enjoyment. Public access and ecological restoration are considered appropriate mitigation for the impact to shorelines unless it is determined public access is infeasible or inappropriate. Most commercial land in unincorporated King County is located outside the shoreline jurisdiction.

2406	
2407	((S-729)) <u>S-732</u> King County shall require all commercial development on public land to provide
2408	public access, unless the use is incompatible with public access or there are public
2409	safety concerns.
2410	
2411	((S-730)) <u>S-733</u> King County shall permit non((-))water-oriented commercial uses in the shoreline
2412 2413	jurisdiction only if:
2414	 The non((-))water-oriented commercial use is limited to the minimum size necessary for the use;
2415	b. The use provides a significant public benefit with respect to the Shoreline
2416	Management Act's objectives such as providing public access and ecological
2417	restoration; and
2418	c. The use is part of a mixed-use project that includes water-dependent uses((;)) or
2419	navigability is severely limited at the proposed site.
2420	
2421	((S-731)) <u>S-734</u> King County may allow nonwater-oriented commercial development in the
2422 2423	shoreline jurisdiction if the site is physically separated from the shoreline by another
2423	property or public right-of-way.
2424	((S-732)) <u>S-735</u> King County shall allow over-water nonwater-dependent commercial uses only in
2425	existing structures or if the use is auxiliary to and necessary to support a
2427	water-dependent use. The area of any over-water structure shall be limited to the
2428	maximum extent practical.
2429	maximum extent practical.
2430	((S-795)) <u>S-736</u> King County may allow water-related and water-enjoyment uses as part of a
2431	shoreline mixed-use development on over-water structures where they are clearly
2432	auxiliary to and in support of water-dependent uses, provided the minimum size
2433	requirement needed to meet the water-dependent use is not violated.
2434	
2435	((S-733)) <u>S-737</u> King County shall prohibit commercial development that will have significant
2436	adverse impact to other shoreline uses, resources, and values, such as navigation,
2437	recreation, and public access. King County shall require mitigation for all commercial
2438 2439	development in the shoreline jurisdiction to ensure that it does not cause a net loss of
2439 2440	shoreline ecological processes and functions.
2440	
2441	((9.)) <u>I.</u> Industr((y)) <u>ial</u> Development

2442 ((The King County Shoreline Master Program establishes a hierarchy for industrial development within
 2443 the shoreline jurisdiction. Most industrial land in King County is located within cities rather than within

2468

2469

2470

2475 ((10.)) <u>J.</u> In-Water Structures

"In-water structure" means a structure placed by humans within a stream, river, or lake waterward of the ordinary high((=)) water mark that either causes or has the potential to cause water impoundment or the diversion, obstruction, or modification of water flow. In-water structures may include those for hydroelectric generation, irrigation, water supply, flood control, transportation, utility service transmission, fish collection weir, or other purposes.

((S-740)) <u>S-744</u> In-water structures shall provide for the protection and preservation of shoreline ecological processes and functions, and cultural resources, including, but not limited to, fish and fish passage, wildlife and water resources, shoreline critical areas, hydro((-)) geological processes, and natural scenic vistas.

((S-741)) <u>S-745</u> The location and planning of in-water structures shall give due consideration to the full range of public interests and shoreline ecological processes and functions, with special emphasis on protecting and restoring habitat for threatened or endangered species.

2492 ((11.)) <u>K.</u> Mining

2493 King County has identified and designated land that is appropriate for the removal of sand, gravel, soil, 2494 minerals, and other extractable resources. ((In King County, gravel removal was a common method of 2495 flood control in the first half of the 20th century. However, m))<u>M</u>ining within shorelines can have 2496 significant impacts, particularly to habitat for threatened and endangered aquatic and riparian species. 2497 2498 ((S-742)) S-746 Mining may be allowed within the shoreline jurisdiction if it is: 2499 Consistent with the environment designation policies of the King County Shoreline a. 2500 Master Program and provisions of the Shoreline Management Act; and 2501 b. Located within mineral resource lands designated by the King County 2502 **Comprehensive Plan.**

2503 2504 2505 2506 2507 2508 2507 2510 2511 2512 2513 2514 2515 2516 2517 2520 2521 2522 2523 2524 2522 2524 2522 2524 2522 2524 2522 2522 2522 2522 2522 2522 2522 2523 2531 2532 2532	 ((5-743)) <u>5-747</u> New mining and associated activities shall be designed and conducted to comply with the regulations of the environment designation where the activity occurs and the provisions applicable to critical areas where relevant. Accordingly, meeting the standard of no net loss of ecological function shall include avoidance and mitigation of adverse impacts during the course of mining and reclamation. It is appropriate, however, to determine whether there will be no net loss of ecological function based on evaluation of final reclamation required for the site. Preference shall be given to mining proposals that result in the restoration, creation, or enhancement of habitat for threatened or endangered species. ((5-744)) 5-748 The King County Shoreline Master Program provisions and permit requirements for mining should be ((coordinated)) consistent with the requirements of Chapter 78.44 Revised Code of Washington ((Chapter 78.44)). ((5-745)) 5-749 The proposed subsequent use of mined property shall be consistent with the provisions of the shoreline environment designation in which the property is located. ((5-746)) 5-750 King County shall permit mining within the active channel of a river only as follows: a. Removal of specified quantities of sand and gravel or other materials at specific locations will not adversely affect the natural processes of gravel transportation for the river system as a whole; b. The mining and any associated permitted activities will not have significant adverse impacts to habitat for threatened or endangered species nor cause a net loss of shoreline ecological processes and functions; c. The determinations required by items ((†)) a. and ((2)) b. of this policy shall be consistent with Revised Code of Washington PO.58.100(((†))) and Washington Administrative Code 173-26-201(((2/(a)))). Such evaluation of impacts should be appropriately integrated with relev
2532 2533 2534 2535 2536 2537 2538 2539 2540 2541 2542	 d. In considering renewal, extension, or reauthorization of gravel bar and other in-channel mining operations in locations where they have previously been conducted, King County shall require compliance with this policy if no such review has previously been conducted. Where there has been prior review, King County shall review the previous determinations ((in order)) to ensure that current site conditions comply with the Program; and e. These requirements do not apply to dredging of authorized navigation channels when conducted in accordance with Washington Administrative Code 173-26-231(((3)(f))).
2542 2543 2544 2545	((S-747)) <u>S-751</u> King County shall require a shoreline conditional use permit for mining activity within a severe channel migration hazard zone located within the shoreline jurisdiction.
2546	((12.)) <u>L.</u> Recreational Development

Recreational development includes uses and activities designed to allow public enjoyment and use of
 the water and shoreline((. King County recreational planning provides for)), including parks, trails, open
 space, and opportunities for both active and passive recreational use ((in King County)).

((S-748)) <u>S-752</u> Recreational development is allowed in the shoreline jurisdiction and ((must)) <u>shall</u> be consistent with the shoreline environment designation in which the property is located.

((S-749)) <u>S-753</u> King County shall plan to provide public recreational uses on ((c))<u>C</u>ounty-owned shoreline, consistent with the goals of this chapter.

2551

2552

2553

2554 2555

2556

2558 ((13.)) <u>M.</u> Residential Development

2559 The Shoreline Management Act recognizes single ((family)) detached residential development as a 2560 priority use within shorelines of the state. The term "residential development" also includes attached 2561 and ((multifamily)) multiunit dwellings ((units)) as well as subdivision of shoreline land into new residential 2562 lots. In King County, single detached ((dwelling units)) residences are the most common shoreline 2563 development. Residential development is often fairly high density to maximize water frontage. Care 2564 must be taken to assure that shoreline residential development and the related impacts from shoreline 2565 armoring, stormwater runoff, on-site sewage disposal systems, introduction of pollutants, and vegetation 2566 modification and removal do not result in significant damage to the shoreline. 2567

((S-750)) <u>S-754</u> Single ((family)) <u>detached</u> residential development is a priority use in the shoreline jurisdiction in King County.

- ((S-751)) <u>S-755</u> King County shall require a conditional use permit for construction or expansion of a single((-family residence)) <u>detached residence</u> that is located within an aquatic area buffer in the Forestry or Natural Shoreline Environment<u>s</u>.
- ((S-752 Shoreline residential development, including accessory structures and uses, should be sufficiently set back from steep slopes and shorelines vulnerable to erosion so that structural improvements, including bluff walls and other stabilization structures, are not required to protect these structures and uses.
- 5-753)) <u>S-756</u> New over-water residences((, including floating homes,)) are not a preferred use and shall be prohibited in the shoreline jurisdiction. Existing communities of ((floating or))-over-water homes should be reasonably accommodated to allow improvements associated with life-safety matters and to ensure protection of private property rights. King County shall limit the expansion of existing ((floating homes, including over-water and underwater footprint, and)) over-water communities to the minimum necessary to ensure consistency with constitutional and other legal limitations that protect private property.
- ((S-754)) <u>S-757</u> King County should require ((multifamily)) <u>multiunit</u> residential development and subdivisions within the shoreline jurisdiction creating more than four lots to provide public access.

((S-755)) <u>S-758</u> King County shall require subdivisions and short subdivisions to:

- a. Be designed, configured, and developed in a manner that ensures no net loss of shoreline ecological processes and functions at full build-out of all lots;
- b. Prevent the need for new shoreline stabilization or flood risk reduction measures that would cause significant impacts to other properties or public improvements, a net loss of shoreline ecological processes and functions, or interfere with channel migration; and
- c. Implement the provisions and policies for shoreline designations and the general policy goals of this chapter.

2603 ((14.)) <u>N.</u> Transportation and Parking

Providing for transportation and parking is necessary to support water-dependent uses, to support the
 regional economy, and for access to privately owned property. ((However, transportation facilities
 should be located and designed to have the least impact on the ecological processes and functions of
 the shoreline.)) Transportation planning in shorelines should ((not be focused totally on automobiles,
 but should)) consider a wide range of options, including vehicles, buses, light rail, commuter rail, bicycle,
 equestrian, and pedestrian facilities. Transportation planning can be a tool for ((finding opportunities to
 provide)) providing public access to the shorelines.

2600

2601

- 2612 ((S-756)) S-759 King County shall require transportation and parking plans and projects located in
 2613 the shoreline jurisdiction to be consistent with the public access policies in this chapter
 2614 and environmental protection provisions.
 - ((S-757)) <u>S-760</u> Where appropriate, circulation system planning in the shoreline jurisdiction shall include systems for pedestrian, bicycle, and public transportation and ((combining)) <u>combine</u> transportation uses to minimize the footprint of transportation facilities. Circulation planning and projects should support existing and proposed shoreline uses that are consistent with the King County Shoreline Master Program.
 - ((S-758)) S-761 Transportation and parking facilities located in the shoreline jurisdiction shall be planned, located, and designed to have the least possible adverse impact on unique or fragile shoreline features, not result in a net loss of shoreline ecological processes and functions, or adversely impact existing or planned water-dependent uses. Where other options are available and feasible, new transportation facilities or transportation facility expansions should not be constructed within the shoreline jurisdiction.
 - ((S-759)) S-762 Parking facilities in the shoreline jurisdiction are not a preferred use. King County shall allow parking facilities in the shoreline jurisdiction only when necessary to support an authorized use and when an alternatives analysis shows there are no feasible alternatives outside of the ((200-foot)) shoreline jurisdiction. Parking facilities in the shoreline jurisdiction shall use ((L))low ((I))impact ((D))designs, such as porous concrete and vegetated swales, and be planned, located, and designed to minimize the environmental and visual impacts.

2637 ((15.))<u>O.</u> Utilities

Utilities include services and facilities that produce, convey, store, or process power, gas, water, sewage,
 stormwater, communications, oil, or waste. Utilities that are classified as on-site utilities serving only one
 primary use are considered "accessory utilities" and are considered part of the primary use.

((S-760)) <u>S-763</u> Utility facilities shall be designed and located to ((assure)) <u>ensure</u> no net loss of shoreline ecological processes and functions, preserve the natural landscape, and minimize conflicts with present and planned land and shoreline uses, while meeting the needs of future populations in areas planned to accommodate growth.

- ((S-761)) S-764 King County shall allow modification of existing utility facilities and the location of new water-oriented portions of utility facilities in the shoreline jurisdiction provided that ((a)) mitigation sequenc((e))ing is applied (((see policy S-616))) consistent with Policy S-609 and there is no net loss of shoreline ecological processes and functions. To the maximum extent practical, those parts of utility production and processing facilities that are not water-oriented, such as power plants and sewage treatment plants, shall be located outside of the shoreline jurisdiction.
- ((S-762)) <u>S-765</u> Transmission facilities for the conveyance of services, such as power lines, cables, and pipelines, shall be located outside of the shoreline jurisdiction where<u>ver</u> feasible. ((Transmission facilities located within the shoreline jurisdiction shall assure no net loss of shoreline ecological processes and functions.))
- ((S-763)) <u>S-766</u> Utilities should be located in existing developed rights-of-way and corridors to the maximum extent practical.

 Locating pipelines and cables in water, on tidelands, or roughly parallel to the shoreline: and
 - b. The development of facilities that may require periodic maintenance that disrupts shoreline ecological processes and functions.

((King County shall ensure that any utility facilities that are allowed do not result in a net loss of shoreline ecological processes and functions or significant adverse impacts to other shoreline resources and values.

2673 C.)) <u>IX.</u> Shoreline Modifications

2674 ((1.))<u>A.</u> General Policies Governing Shoreline Modifications

A shoreline modification is construction of a physical element, such as a dike, breakwater, dredged
 basin, or fill, as well as other actions such as clearing, grading, application of chemicals, or significant
 vegetation removal to support or prepare for a shoreline use. ((These activities should be directly
 related to a legal shoreline use and should not be conducted for other purposes.

S-765)) S-801 King County should allow structural shoreline modifications only when necessary to support or protect a legally established structure or a legally existing shoreline use that is in danger of loss or substantial damage, or when a modification is necessary for reconfiguration of the shoreline for mitigation or enhancement purposes.

- ((S-766)) <u>S-802</u> ((In order t))<u>T</u>o reduce the adverse effects of shoreline modifications, King County should limit <u>the number and extent of</u> shoreline modifications ((in number and extent to the maximum extent practicable)).
- ((S-767)) <u>S-803</u> King County shall only allow shoreline modifications that are appropriate to the specific type of shoreline and environmental conditions for which they are proposed.
- ((S-768)) <u>S-804</u> King County shall ensure that shoreline modifications individually and cumulatively do not result in a net loss of shoreline ecological processes and functions. ((In order t))<u>T</u>o achieve this goal, King County shall give preference to those types of shoreline modifications that have a lesser impact on the shoreline and by requiring mitigation of identified impacts resulting from shoreline modifications.
- ((5-769)) <u>S-805</u> Where applicable, King County shall develop regulations and impose conditions based on scientific and technical information and a comprehensive analysis of shoreline conditions for drift cells for marine waters or reaches for lakes and river and stream systems.
- ((5-770)) <u>S-806</u> King County should plan for the enhancement of impaired shoreline ecological
 processes and functions where feasible and appropriate, while accommodating
 permitted uses. To the maximum extent practical, King County should incorporate
 appropriate measures to protect shoreline ecological processes and functions from the
 impacts of shoreline modifications.

2708 ((2.)) <u>B.</u> Shoreline Stabilization

Shorelines are impacted by wind and wave action, currents, tides, and flood waters, resulting in erosion
 of banks and shifts in channels. These ((impacts)) are natural processes that support shoreline ecological
 processes and functions, but they also impact human use of shorelines.

((2016)) <u>2024 King County</u> Comprehensive Plan - ((updated December 6, 2022)) <u>Adopted TBD</u> <u>Attachment A to</u> Ordinance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555)) <u>xxxxx</u> (Proposed Ordinance 2023-0440)

2713 These natural processes are likely to be affected by climate change. Lowland rivers may see higher flows 2714 in the autumn and winter and mid-elevation rivers may see higher winter flows. In both cases, these 2715 changes could lead to more frequent flooding. The marine shorelines around Vashon-Maury Island and 2716 the Duwamish Estuary may also see effects due to sea((-)) level rise. Increased sea elevations will make 2717 development and infrastructure in low-lying areas more susceptible to flooding due to high tides and 2718 storms. Waves will encroach further onto low-lying beaches and cause greater beach erosion, 2719 threatening or damaging low-lying structures. At the same time steep slopes may receive increased 2720 moisture due to predicted changes in precipitation patterns, potentially resulting in an increase in 2721 landslides that may cause property destruction and threaten human safety. 2722

Humans have long desired to "control" these natural processes by constructing shoreline stabilization
structures. The negative ((side)) impacts of structural solutions includes the high cost of construction,
long-term cost of maintenance and repair, the false sense of security for humans relying on these
structures, and the high impact to the shoreline environment. These negative impacts are likely to
increase as the effects of climate change become more apparent. These impacts include:

- Beach starvation where sediment is prevented from supplying the beach, thus impeding a dynamic process.
- 2730 2. Habitat degradation, particularly through removal of shoreline vegetation.
- 2731
 3. Sediment impoundment where the sources of sediment are lost and longshore transport is diminished, resulting in lowering of down-drift beaches, narrowing of the high tide beach, and the coarsening of beach sediment.
- 2734
 4. Exacerbation of erosion as wave energy is reflected back from hard surfaces onto the beach, increasing erosion.
- 5. Groundwater impacts that can lead to a rise of the water table on the landward side of an erosion control structure, which results in increased pore pressures in the beach material and accelerated erosion of sand-sized material from the beach.
- 4. Hydraulic impacts where wave energy is reflected back onto the beach, resulting in scour
 lowering the beach elevation, or coarsening the beach, resulting in failure of the structure.
- 2741
 7. Loss of shoreline vegetation and the loss of erosion control that the vegetation provided, as well as loss of the habitat function provided by vegetation.
- 2743
 8. Loss of large woody debris, which plays an important role in biological diversity and habitat as well as stabilizing the shoreline.
 - 9. Restriction of channel movement and creation of side channels, impacting recruitment of large woody debris and gravel for spawning.

2748 As alternatives to constructing a hard-surfaced structural facility, nonstructural methods that have lesser 2749 impacts on shoreline ecological processes and functions are available. These nonstructural methods 2750 may also allow for adaptation to the effects of climate change. For example, if buildings are constructed 2751 further away from the existing water edge, beyond the range of sea((-)) level rise, shoreline protection 2752 would be unnecessary. For most projects, a range of options is available. These include "soft" measures, 2753 such as revegetation to stabilize banks, which provide a variety of other ecological processes and 2754 functions, and "hard" measures, such as bulkheads, which often detract from or provide only limited 2755 ecological function. Shoreline stabilization options include, but are not limited to:

- 2756 1. Vegetation enhancement;
- 2757 2. Upland drainage control;
- 2758 3. Biotechnical measures;
- 2759 4. Beach enhancement;
- 2760 5. Anchor trees;

2745

2746

2761 6. Gravel placement; 2762 7. Rock revetments; 2763 8. Gabions; 2764 9. Concrete groins; 2765 10. Retaining walls and bluff walls; 2766 11. Bulkheads; and 2767 12. Seawalls. 2768 2769 ((5-771)) 5-807 King County shall require shoreline stabilization to be consistent with Washington 2770 Administrative Code 173-26-221(((5))) for vegetation retention and ((Washington 2771 Administrative Code 173-26-221(2) for)) protection of critical areas. 2772 2773 ((5-772)) S-808 King County shall adopt standards to first avoid and then mitigate the impact to 2774 shoreline ecological processes and functions when alteration of the shoreline is allowed 2775 for the construction of single detached ((dwelling units)) residences and accessory 2776 structures. These standards shall address the design and type of protective measures 2777 and devices that are allowed. 2778 2779 ((When structural shoreline stabilization is proposed to protect existing development, the following 2780 measures apply: 2781 2782 King County may allow construction of new or replaced structural shoreline stabilization S-773 2783 and flood control works to protect an existing structure if King County determines there 2784 is a documented need, including a geotechnical analysis that the structure is in danger 2785 from shoreline erosion caused by tidal action, currents or waves. 2786 2787 When new development occurs within the shoreline jurisdiction, the following measures apply: 2788 2789 S-774)) S-809 King County shall ((require)): 2790 2791 2792 a. Require new shoreline development, including subdivisions and short subdivisions, to be located and designed to avoid the need for future structural slope or shoreline stabilization ((to the maximum extent practicable)); 2793 b. Require new development to be set back from steep or eroding slopes so that 2794 structural slopes or shoreline stabilization is not needed for the life of the 2795 development; and 2796 c. Not allow new development that requires shoreline stabilization that will cause 2797 significant impacts to adjacent or down-current properties and shoreline areas. 2798 2799 ((S-775 King County shall require that lots in new subdivisions and short subdivisions to be 2800 created so that shoreline stabilization will not be necessary in order for reasonable 2801 development to occur, using geotechnical analysis of the site and shoreline 2802 characteristics. 2803 2804 S-776 King County shall require new development on steep slopes or bluffs to be set back 2805 sufficiently to ensure that shoreline stabilization is unlikely to be necessary during the 2806 life of the structure, as demonstrated by a geotechnical analysis. 2807 2808 King County shall not allow new development that requires shoreline stabilization that S-777 2809 will cause significant adverse impacts to adjacent or down-current properties and 2810 shoreline areas. 2811

S-778	King County should notify all prospective developers of new development along
	Vashon-Maury Island that their development may be impacted by sea-level rise and
	should encourage all such new development to be set back a sufficient distance to
	avoid the need for shoreline protection during the expected life of the development.
New "hard"	structural stabilization measures should be used as a last resort after exploring and
evaluating c	other soft measures.))
-	
S-810	New or enlarged structural shoreline stabilization to protect an existing primary
	structure shall be allowed only when:
	 <u>a. The structure is at imminent risk from shoreline erosion caused by tidal action</u>, currents, or waves;
	<u>b. No lower-impact alternative exists, including relocation or reconstruction of the</u>
	structure;
	c. On-site drainage has been directed away from the shoreline edge; and
	d. There is no net loss of shoreline ecological processes and functions.
(3-777)) <u>5-6</u>	<u>811</u> ((King County shall require the use of soft methods of shoreline stabilization to the maximum extent practicable.)) King County shall allow new ((hard)) structural
	stabilization measures ((only)) for new nonwater-dependent development, as follows:
	a. ((To protect existing -dependent development and structures, including
	single-family residences), if:
	1.)) The erosion is not the result of upland conditions, such as the loss of vegetation
	and drainage;
	((2.)) <u>b.</u> Nonstructural measures, such as locating the development further from the
	shoreline, planting vegetation, or installing on-site drainage improvements, are not feasible or not sufficient:
	((3.)) <u>c.</u> The need to protect primary structures from <u>imminent risk of</u> damage due to
	erosion is demonstrated through a geotechnical report submitted by a qualified
	specialist. The damage must be caused by natural processes, such as tidal action,
	currents, and waves; and
	((4.)) <u>d.</u> Mitigation is provided such that the ((erosion control structure)) <u>shoreline</u>
	<u>stabilization</u> will not result in a net loss of shoreline ecological processes and functions.
<u>5-812</u>	((b. To protect water-dependent development if)) <u>King County shall allow new</u>
	structural shoreline stabilization for water-dependent development, as follows:
	((1.)) <u>a.</u> The erosion is not the result of upland conditions, such as the loss of vegetation
	and drainage;
	((2-)) <u>b.</u> Nonstructural measures, planting vegetation, or installing on-site drainage improvements are not feasible or not sufficient;
	((3.)) <u>c.</u> The need to protect primary structures from damage due to erosion is
	demonstrated through a geotechnical report submitted by a qualified specialist;
	and
	((4.)) <u>d.</u> The ((erosion control structure)) <u>shoreline stabilization</u> will not result in a net
	loss of shoreline ecological processes and functions.
	King County shall allow new structural stabilization ((c. T))to protect shoreline

2906	functions waterward of the ordinary (( <del>high-water</del> )) <u>high water</u> mark.
2907	
2908	(( <del>S-785</del> )) <u>S-818</u> King County should encourage replaced structural shoreline stabilization located on
2909	Vashon-Maury Island to be relocated outside of the coastal high hazard area (also
2910	known as the coastal 100-year floodplain) whenever possible.
2911	
2912	(( <del>King County should make decisions on shoreline stabilization measures based on technical studies and</del>
2913	reports that objectively analyze the current conditions and the impact of the proposed stabilization
2914	measure. A geotechnical report addressing geologic and habitat conditions developed by a qualified
2915	geologist or geotechnical report addressing geologic and habitat conditions developed by a qualmed geologist or geotechnical engineer and habitat specialist should be a requirement of a development
2916	proposal application that includes shoreline stabilization as part of the development.
2917	proposal application that includes shoreline stabilization as part of the development.
2917	C 704 When shereling stabilization is growned Wing Country to Hollow is sector by t
	S-786 When shoreline stabilization is proposed, King County shall require a geotechnical
2919	report to address the need to prevent potential damage to a primary structure. The
2920	report shall estimate time frames and rates of erosion and the urgency associated with
2921	the specific situation. King County should not allow hard armoring solutions, unless a
2922	geotechnical report confirms that there is a significant possibility that the structure will
2923	<del>be damaged within three years as a result of shoreline erosion in the absence of such</del>
2924	hard armoring measures, or where waiting until the need is immediate would foreclose
2925	the opportunity to use measures that avoid impacts on shoreline ecological processes
2926	and functions. If the geotechnical report confirms a need to prevent potential damage
2927	to a primary structure, but the need is not as immediate as the three years, the report

2928	may still be used to justify more immediate authorization to protect against erosion
2929	using soft measures.
2930	
2931	The construction of shoreline stabilization measures results in impacts to the ecological processes and
2932	functions of the shoreline. The following measures should be considered to mitigate the impacts of
2933	shoreline stabilization projects.
2934	shorenne stabilization projects.
2935	<del>S-788</del> )) <u>S-819</u> If structural shoreline stabilization measures are demonstrated to be necessary,
2936	Sing County shall:
2937	(( <del>1.</del> )) <u>a.</u> Limit the size of stabilization measures to the minimum necessary;
2938	((1.)) <u>a.</u> Elimit the size of stabilization measures to the minimum necessary, (( <del>2.</del> )) <u>b.</u> Require the use of measures designed to (( <del>assure</del> )) <u>ensure</u> no net loss of
2939	shoreline ecological processes and functions;
2940	<u>c. Ensure the shoreline stabilization method is the least ecologically impactful,</u>
2941	technically feasible option; and
2942	(( <del>3.</del> )) <u>d.</u> Require the use of soft approaches, unless they are demonstrated not to be
2943	sufficient to protect primary structures, dwellings, and businesses.
2944	summent to protect primary structures, awenings, and businesses.
2945	(( <del>S-789</del> )) <u>S-820</u> King County shall ensure that publicly financed or subsidized shoreline erosion
2946	((3-767)) <u>3-620</u> King County shall ensure that publicly infanced of subsidized shoreline erosion control measures do not restrict appropriate public access to the shoreline, except
2947	where such access is determined to be infeasible because of incompatible uses, safety,
2948	security, or harm to shoreline ecological processes and functions. Where feasible, King
2949	County shall require ecological restoration and public access improvements to be
2950	incorporated into the project.
2951	
2952	(( <del>S-790</del> )) <u>S-821</u> King County shall discourage new development and redevelopment on feeder
2953	bluffs. Where a legal building lot exists and the landowner has no option to locate new
2954	development or redevelopment away from feeder bluffs and other areas that affect
2955	beach sediment-producing areas, King County shall require that they avoid, to the
2956	maximum extent (( <del>practicable</del> )) <u>feasible</u> , and then minimize the adverse impacts to
2957	sediment conveyance systems from erosion control measures.
2958	
2959	(( <del>S-791</del> )) <u>S-822</u> King County should prioritize feeder bluffs as areas for protection using acquisition,
2960	easement, transfer of development rights, and other programs that eliminate or reduce
2961	development threats.
2962	•
2963	(( <del>Erosion is the breakdown of soil, mud, rock, and other particles by the agents of wind, water, or ice or</del>
2964	by living organisms. These materials are moved downward or down-slope in response to gravity.
2965	Upland conditions may contribute to this on-going natural physical process and may impact the ability of
2966	people to use the shoreline.)) Mass wasting is the geomorphic process by which soil, mud, rock, and
2967	other particles move downslope under the force of gravity. Types of mass wasting include creep, slides,
2968	flows, topples, and falls, each with its own characteristic features. Mass wasting may occur at a very slow
2969	rate, particularly in areas that are very dry or those areas that receive sufficient rainfall such that
2970	vegetation has stabilized the surface. ((It may also occur at very high speed, such as in rock slides or
2971	landslides, with disastrous consequences. The desire to protect shoreline development from these
2972	impacts leads to proposals for shoreline stabilization.
2972	impacts leads to proposals for shorenine stabilization.
2973 2974	6.709)) 6.822 The impacts of exection and mass westing should be mitigated through protection of
2974	S-792)) S-823 The impacts of erosion and mass wasting should be mitigated through protection of
2715	geological hazardous areas.

### 2976 ((<del>3.</del>)) <u>C.</u> Piers and Docks

Piers and docks are some of the most commonly requested modifications to the shorelines. Because
they extend over the water, piers and docks can have a significant impact on the shoreline ecological
processes and functions. Careful consideration should be given to the construction of new piers and
docks, and how they are constructed ((in order)) to minimize their impacts.

2982 2983 2984 2985 2986 2987	(( <del>5-798</del> )) <u>5-824</u> King County shall require piers and docks(( <del>, including those accessory to single-family residences,</del> )) to be designed and constructed to avoid and then minimize and mitigate the impacts to shoreline ecological processes and functions. King County shall (( <del>require piers and docks to be constructed of non-toxic materials. Where toxic materials, such as treated wood, are proposed, the proponent must show that no non-toxic alternative exists)) prohibit the use of creosote or pentachlorophenol pilings.</del>
2988 2989 2990 2991 2992 2993 2994 2995 2996 2997 2998 2997 3000 3001 3002 3003 3004 3005	<ul> <li>((5-793)) <u>5-825</u> King County shall allow new piers and docks only for water-dependent uses, single detached residences, or <u>for</u> public access.</li> <li><u>a.</u> For single detached residences, the pier or dock shall be considered a water-dependent use((1)) if it is designed and intended as a facility for access to watercraft((, a dock associated with a single-family residence is considered a water-dependent use)). As an alternative to individual private moorage for residential development: mooring buoys are preferred over floats or docks and shared moorage facilities are preferred over single use moorage, where feasible or where water use conflicts exist or are predictable.</li> <li><u>b.</u> For all other development, piers or docks shall only be allowed when the applicant demonstrates that a specific need exists to support the intended water-dependent use.</li> <li>((5-794)) <u>5-826</u> King County shall require piers and docks ((construction)) to be limited to the minimum size necessary to meet the needs of the proposed water-dependent use.</li> <li>((S-796 King County shall allow new pier or dock construction, excluding docks accessory to single-family residences, only when the applicant has demonstrated that a specific need</li> </ul>
3006 3007 3008	exists to support the intended water-dependent uses.)) (( <del>5-610</del> )) <u>5-827</u> King County shall prefer and provide special permitting considerations for docks
3009 3010 3011 3012 3013 3014 3015	and piers that are shared among multiple landowners. ((5-797)) <u>S-828</u> If new piers or docks are allowed, King County shall require new residential development of two or more dwelling units, subdivisions, and short subdivisions to provide joint use or community dock facilities, when feasible, rather than individual docks for each dwelling unit or lot. King County shall allow only one pier or dock associated with <u>a</u> residential development on a parcel.

### 3016 ((<del>4.</del>))<u>D.</u> Fill

 3017 ((Fill means the addition of soil, sand, rock, gravel, sediment, earth retaining structures, or other material 3018 to an area waterward of the ordinary high water mark, in wetlands, or on shorelands in a manner that 3019 raises the elevation or creates dry land.)) Fill is not permitted within the 100-year floodplain without 3020 providing compensatory flood storage to prevent a rise in the base flood, which is a flood having a one 3021 percent chance of being equaled or exceeded in any given year, often referred to as the "100-year 3022 flood." Fill can impact shoreline ecological processes and functions, including channel migration.

## 3024<br/>3025((S-799)) S-829<br/>shoreline ecological processes and functions and ecosystem-wide processes, including<br/>channel migration and side channels.3026<br/>3027

#### 3028 ((S-800)) S-830 King County shall allow fill waterward of the ordinary ((high-water)) high water 3029 mark only when necessary to support: 3030 ((1.)) a. Water-dependent use; 3031 ((2.)) b. Public access; 3032 ((3.)) c. Cleanup and disposal of contaminated sediments as part of an interagency 3033 environmental clean-up plan; 3034 ((4.)) d. Disposal of dredged material considered suitable under, and conducted in 3035 accordance with, the dredged material management program of the 3036 Washington Department of Natural Resources; 3037 ((5.)) e. Expansion or alteration of transportation facilities of statewide significance 3038 currently located on the shoreline and then only upon a demonstration that 3039 alternatives to fill are not feasible; ((or)) 3040 ((<del>6.</del>)) <u>f.</u> Mitigation actions, environmental restoration, beach nourishment, 3041 enhancement projects; or

((7-)) <u>g.</u> Flood risk reduction projects implemented consistent with the goals, policies, and objectives of the King County Flood Hazard Management Plan where no reasonable alternative exists.

# 3045304630473048304830493049and the ordinary ((high-water)) high water mark for any use, except for projects for ecological restoration or for the maintenance, repair, or replacement of flood protection facilities.

## 3050 ((5.))<u>E.</u> Breakwaters, Jetties, Groins, and Weirs

3042

3043

3044

3051 Breakwaters, jetties, groins, and weirs are all structural elements that are constructed to absorb or deflect 3052 wave action or to control excess sediment. A breakwater is an off-shore structure, either floating or not, 3053 which may or may not be connected to the shore and is designed to absorb and reflect back into the 3054 water body the energy of the waves. A jetty is an artificial barrier used to change the natural littoral drift 3055 to protect inlet entrances from clogging by transported sediment. A groin is a barrier-type structure 3056 extending from the backshore into the water across the beach, which is constructed to interrupt 3057 sediment movement along the shore. A weir is a small dam in a stream or river to control the flow of 3058 water. ((Although each of these structural elements may sometimes be appropriate, they should be 3059 allowed only under limited circumstances.

3060	
3061	<del>S-802</del> )) <u>S-832</u> King County shall allow breakwaters, jetties, and weirs located waterward of the
3062	ordinary (( <del>high-water</del> )) <u>high water</u> mark only where necessary to support
3063	water-dependent uses, public access, shoreline stabilization, or other specific public
3064	purpose.
3065	
3066	(( <del>S-803</del> )) <u>S-833</u> Groins are prohibited except as a component of a publicly((+))sponsored project to
3067	protect or restore shoreline ecological processes and functions.
3068	
3069	(( <del>S-804</del> )) <u>S-834</u> King County shall require a shoreline conditional use permit for the construction of
3070	breakwaters, jetties, groins, weirs, and similar structures, except for those structures
3071	installed to protect or restore shoreline ecological processes and functions, such as
3072	woody debris installed in streams.
3073	•
3074	(( <del>S-805</del> )) <u>S-835</u> Breakwaters, jetties, groins, and weirs shall be designed to protect critical areas and
3075	shall provide for mitigation according to the sequence in policy S-616 and defined in
3076	Washington Administrative Code 173-26-201(( <del>(2)(e)</del> )).

### 3077 ((<del>6.</del>))<u>F.</u> Beach and Dunes Management

3078 ((Washington's beaches and their associated dunes lie along the Pacific Ocean coast between Point
 3079 Grenville and Cape Disappointment and, as shorelines of statewide significance, are mandated to be

3080 managed from a statewide perspective by the Shoreline Management Act.)) There are no beaches
 3081 ((and)) with associated dunes in King County.

## 3082 ((<del>7.</del>)) <u>G.</u> Dredging and Dredge Material Disposal

3125

3126

Dredging is the removal, displacement, or disposal of unconsolidated earth material such as sand, silt,
 gravel, or other submerged materials, from the bottom of water bodies, ditches, or natural wetlands.
 Long-term maintenance and support activities are also considered dredging. Dredging can cause
 significant ecological damage, which cannot always be avoided. ((Mitigation measures should be
 required to assure no net loss of shoreline ecological processes and functions.))

King County has a channel monitoring program for King County rivers, which can be used to inform decisions on dredging activities. ((While only certain reaches of these rivers have been surveyed, King County recognizes the need to continue and enhance the channel monitoring program. In addition, King County should avoid d))Development of shorelines that would require new or maintenance dredging should be avoided.

- ((<del>S-806</del>)) <u>S-836</u> King County shall require that new development should be sited and designed to avoid, to the maximum extent practical, and then to minimize<u>,</u> the need for new or maintenance dredging.
- ((<del>S-807</del>)) <u>S-837</u> King County shall allow dredging for the purpose of establishing, expanding, or relocating or reconfiguring navigation channels and basins when necessary to ((<del>assure</del>)) <u>ensure</u> safe and efficient accommodation of existing navigational uses. Significant adverse ecological impacts shall be minimized and mitigation shall be provided to ensure that there is no net loss of shoreline ecological processes and functions. Maintenance dredging of established navigation channels and basins should be restricted to maintaining previously dredged or existing authorized location, depth, and width.
- ((<del>S-808</del>)) <u>S-838</u> King County shall not allow dredging waterward of the ordinary ((<del>high-water</del>)) <u>high</u> <u>water</u> mark for the primary purpose of obtaining fill material, except ((<del>when the</del> <del>material is necessary</del>)) for the restoration of shoreline ecological processes and functions. ((<del>When allowed, the site where t</del>))<u>T</u>he fill ((<del>is to</del>)) <u>shall</u> be placed ((<del>shall be</del> <del>located</del>)) waterward of the ordinary ((<del>high-water</del>)) <u>high water</u> mark. The project must be either associated with a habitat restoration project under the Model Toxics Control Act or the Comprehensive Environmental Response, Compensation, and Liability Act, or, if approved through a shoreline conditional use permit, any other significant habitat enhancement project.
- ((<del>S-809</del>)) <u>S-839</u> King County shall ((<del>not</del>)) <u>only</u> allow disposal of dredge material on shorelands<u>,</u> ((<del>and</del>)) in side channels within a river's channel migration zone<u>,((. King County shall not</u> <del>allow disposal of dredge material</del>)) <u>and</u> in wetlands located ((within the shoreline jurisdiction. In the limited instances where it is allowed, such disposal shall require)) <u>through</u> a shoreline conditional use permit.
  - ((<del>S-810</del>)) <u>S-840</u> King County shall require dredging to be conducted consistent with Policy RCM-3 of the ((<del>2006</del>)) King County Flood Hazard Management Plan<u>, or successor policies or plans</u>.

## 3127 ((8.)) <u>H.</u> Shoreline Habitat and Natural Systems 3128 Enhancement Projects

Shoreline habitat and natural systems enhancement projects should be supported and coordinated with
 other planning processes, such as salmon conservation plans and the ((<del>2006</del>)) King Count<u>y</u> Flood Hazard
 Management Plan, or successor plans.

3132 3133 3134 3135 3136 3137 3138 3139 3140 3141 3142 3143	<ul> <li>((5-811)) <u>5-841</u> King County should allow for habitat and natural systems enhancement projects that include, but are not limited to: <ul> <li>a. Modification of vegetation;</li> <li>b. Removal of nonnative or invasive plants;</li> <li>c. Shoreline stabilization using soft or non-structural techniques; and</li> <li>d. Dredging, and filling, provided that the primary purpose of such actions is clearly restoration of the natural character and shoreline ecological processes and functions of the shoreline.</li> </ul> </li> <li>((5-812)) <u>5-842</u> Habitat and natural systems enhancement projects should ((assure)) ensure that the projects address legitimate restoration needs and priorities.</li> </ul>

## 3181 C. Treaty Rights Not Affected by Shoreline Master Program

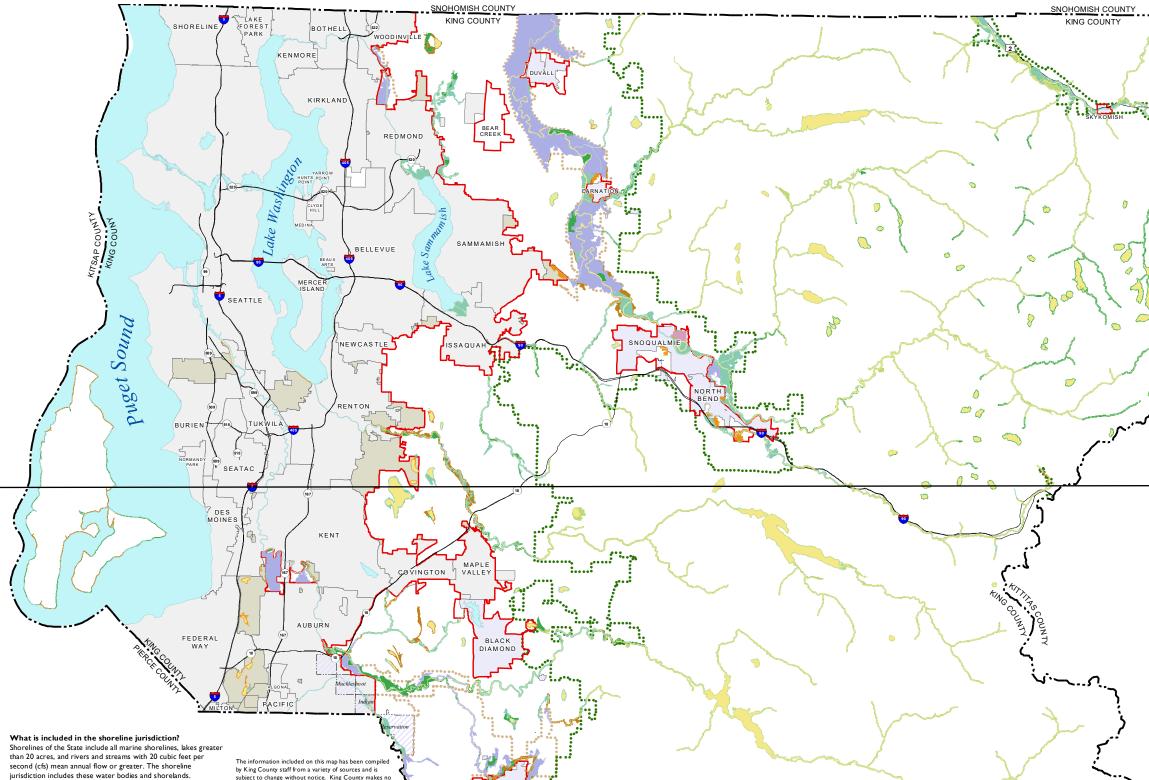

King County has sought the input of and consulted with tribes located in and adjacent to King County
 when developing the Shoreline Master Program. However, the Shoreline Master Plan and associated
 shoreline regulations shall not be construed to affect any treaty rights established between the United
 States and the individual tribes.

#### 3186 D. Power to Abate Nuisance Retained by King County and 3187 the State of Washington

Adoption of the Shoreline Master Program is a requirement of the Shoreline Management Act. King
 County's compliance with this state law should not be construed in any way to limit or modify all other
 powers possessed by King County.
 3191

<del>S-905</del>)) <u>S-901</u> Nothing in the King County Shoreline Master Program shall be construed to limit the power of King County or the State of Washington to abate nuisances within the shoreline jurisdiction.

((<del>S-906</del>)) <u>S-902</u> King County specifically reserves all rights, power, and authority granted to it by law. Nothing in the King County Shoreline Master Program shall be construed in any way to limit any power or authority possessed by King County.

ENUMCLAV

King County

GIS CENTER

than 20 acres, and rivers and streams with 20 cubic feet per second (cfs) mean annual flow or greater. The shoreline jurisdiction includes these water bodies and shorelands. Shorelands are defined as those areas extending landward for two hundred feet from the ordinary high water mark, floodways and contiguous floodplain areas landward two hundred feet from such floodways, and all associated wetlands and river deltas. King County currently includes the zero-rise floodway, essentially the 100-year floodplain, in its shoreline jurisdiction.

#### What is contained in the shoreline jurisdiction? The updated map of the shoreline jurisdiction was developed

Include all qualifying shorelines on federal lands (these were

not previously included) Use a 1998 USGS study to identify the location of 20 cubic feet per second flow points on streams (these are higher up in the watershed than most current points)

Further, lakes were reevaluated in relation to the 20-acre threshold given the availability of new data about lake size.

The information included on this map has been compiled by King County staff from a variety of sources and is subject to change without notice. King County makes no representations or warranties, express or implied, as to accuracy, completeness, timeliness, or rights to the use of such information. King County shall not be liable for any general, special, indirect, incidental, or consequential damages including, but not limited to, lost revenues or lost profits resulting from the use or misuse of the information on this map. Any sale of this map or information on this map is prohibited except by written permission of King County.

## CHAPTER 7

# PARKS, OPEN SPACE, &

## **CULTURAL RESOURCES**

2 3 4

> The quality of life in King County is directly linked to the quality of the region's environment, with its diverse landscapes reaching from Puget Sound to the Cascade Mountains, scenic beauty and the variety of cultural and recreational opportunities that enriches lives. These vital natural and cultural resources contribute to the physical, mental, and emotional well-being of county residents and are integral to attracting employment and business activity.

The policies in this chapter focus on the county's role as a regional leader in acquiring and protecting its system of county-owned parks, forests, natural areas, trails and other open spaces. In addition to protecting these natural resources, the county promotes a high quality of life by supporting cultural opportunities such as music, theater, ethnic heritage museums, literary activities, public art collections, urban historic districts, and rural landmarks.))

## ⁷ I. Parks, Recreation, and Open Space

8 ((The Growth Management Act requires cities and counties to identify open space 9 corridors within and between Urban Growth Areas, including lands useful for recreation, 10 wildlife habitat, trails, and connection of critical areas.)) The ((c))County's designation of 11 open space includes those lands that are part of the King County open space system as 12 well as state parks and natural resource conservation areas and federal wilderness areas 13 in unincorporated King County. ((See the Land Use Map is located at the end of 14 Chapter 1, Regional Growth Management Planning. The Growth Management Act 15 states that counties are the providers of regional services and local rural services, while 16 cities are the appropriate providers of local urban services. As the regional 17 government,)) King County manages a regional open space system of parks, regional 18 trails, natural or ecological areas, and working resource lands, which includes ((- While 19 the cities are the managers of local parks, trails and open space lands in the Urban 20 Growth Area, King County will continue to be the provider of)) local parks, trails, and 21 open space lands in the ((Rural Area and Natural Resource Lands)) unincorporated areas 22 in addition to regional facilities.

23

24 ((Population growth and associated development continue to transform the county's 25 landscape as forested and open lands have been converted to urban uses resulting in 26 the fragmentation of wildlife corridors and riparian habitat, as well as the depletion of 27 working resource lands and open vistas. The policies in this section provide guidance 28 for the open space system of lands the county owns and manages to protect and restore 29 the health of natural systems, provide recreational opportunities, shape community 30 character, and help sustain agriculture and forestry economics.)) Additional benefits ((of 31 the open space and regional trails systems)) beyond recreation include providing 32 transportation alternatives, ((as well as)) health benefits from physical activity, and access 33 to the outdoors for those who have mobility disabilities. Large, forested parks and 34 natural areas help maintain air quality((-,)) and water quality and quantity, and help 35 mitigate the effects of climate change. Parks and green spaces also provide stress relief, 36 rest, and relaxation and contribute to improved mental health and ((<del>well-being</del>)) 37 wellbeing. The policies also reinforce the ((c))County's focus on linking components of 38 the open space system with an emphasis on completing the regional trails system, 39 connecting riparian habitat, and reducing forestland fragmentation.

40

41 Regional recreation and multiuse parks serve a countywide population and provide 42 high-quality, developed facilities that support multiple events, large group gatherings, 43 and special events. Passive parks serve less formal, organized, or intense activities. 44 Local ((rural)) park sites provide for active and passive recreation close to home. The 45 Regional Trails ((System)) network forms the foundation for King County and other 46 agencies' shared-use path networks that reach broadly throughout the ((-))County. 47 linking cities, other counties, and the state, and offering extensive recreation 48 opportunities. In addition to serving recreational users,  $((\mp))$  the Regional Trails ((<del>System</del>) 49 is also an essential part of King County's multimodal transportation system, providing)) 50 network also provides interconnected ((nonmotorized travel)) active transportation 51 options that are important for getting King County residents from place to place. Local 52 trails provide circulation within local communities and access to the larger  $((\mathbf{r}))$ Regional 53 ((t))Trails ((system)) network.

54

Natural areas and working forest sites can provide opportunities for informal, low intensity, and low_impact activities which enable the understanding, appreciation, and significance of natural resources. Passive recreation use of these sites requires little infrastructure, although amenities such as backcountry trails and trailhead facilities may be needed to accommodate appropriate types and levels of public use. Natural areas often contain undeveloped or un((=))developable acreage that is managed primarily to support habitat to provide ecological benefits ((and contribute to biodiversity)).

- 62 Forested areas provide carbon sequestration and reduction in greenhouse gas 63 emissions, and play a role in adaptation to climate change.
- 64

69

65 For the purposes of the King County open space system, "regional" means sites and 66 facilities that are large in size and serve communities from long distances and multiple jurisdictions. "Local" means sites and facilities that serve unincorporated communities 67 68 and are smaller sites servicing close-to-home park and recreation needs.

70 ((<del>P-101</del> For the purposes of the King County open space system: "regional" 71 shall define sites and facilities that are large in size, have unique 72 features or characteristics or significant ecological value, and serve 73 communities from many jurisdictions; and "local" shall define sites and 74 facilities that serve unincorporated communities predominately in the 75 Rural Area and Natural Resource Lands.))

111

112

#### ((The Regional)) King County's Open Space Α. 77 System of Parks, Trails, Natural Areas, and 78 Working Resource Lands 79

80 The policies in this chapter provide the basis to develop a contiguous and functional 81 open space system, connecting and including recreation and multiuse parks, natural 82 areas, working resource lands and regional trails. ((The components of this vital system 83 contribute to the physical, mental and emotional well-being of county residents. Other publicly-owned lands such as Farmland Preservation Program and Flood Hazard 84 85 Management properties also contribute to the system and its environmental benefits.)) 86 The Open Space System Map shows these publicly((=))_owned open space lands and 87 provides the basis for identifying the linkages necessary to strengthen the physical and 88 functional connectivity of the ((c))County's open space system. The following policies 89 reinforce the importance of the ((c))C ounty's open space system(( $\frac{1}{7}$ )) and guide planning 90 and management of appropriate recreational opportunities that best meet regional and 91 local ((rural)) unincorporated area needs, preserve ecologically significant resources and 92 protect working resource lands.

#### 94 ((P-102)) P-101 King County shall ((be)) provide a regional ((leader in the provision 95 of a regional)) open space system consisting of regional and local 96 parks, regional and backcountry trails, natural areas, working resource lands, and flood hazard management lands.

- 99 ((P-125)) P-102 Management of the ((regional)) County's open space system ((of 100 parks, regional trails, natural areas and working resource lands is)) shall 101 be guided by the King County Open Space Plan: Parks, Trails and 102 Natural Areas.
- 104 P-103 ((The regional network of open spaces provides benefits to all county 105 residents including: recreation facilities, conservation of natural and 106 working resource lands, improving air and water quality, flood hazard 107 management and related programs and services, thereby contributing 108 to the physical, mental, and emotional well-being of county residents.)) 109 King County shall: 110
  - Prioritize equity and use the opportunities areas map in the development and acquisition of its open space system to help reduce health disparities and promote environmental justice; b. Promote equitable access to the open space system for historically
- 113 114 underrepresented and historically underinvested communities; and

 c.
 Ensure that equity and racial and social justice benefits to all

 116
 residents are prioritized in the open space system.

 117
 ((P-103)) P-104 King County ((will)) shall preserve wildlife corridors, riparian

 118
 ((P-103)) P-104 King County ((will)) shall preserve wildlife corridors, riparian

 119
 habitat, contiguous forest land, ((as well as)) and open space areas

 120
 separating ((U))urban ((A))areas from the Rural Area((s)) and Natural

 121
 Resource Lands, as part of its open space system.

## B. Components of ((the Regional)) King County's Open Space System

#### 131 1. Recreation Sites

#### 132 Regional Parks

133 King County's regional ((recreation)) parks and facilities accommodate a wide range of 134 ((active and passive)) recreational activities. Recreation sites that make up a functional 135 system include: highly developed sites with organized, scheduled activities such as 136 soccer and softball; ((passive or low impact recreation sites that include both physical 137 activities and less intense activities such as)) informal play, trail use, and picnicking; and 138 multiuse sites that include a ((combination of active recreation and passive)) spectrum of 139 recreational ((with less intensely developed facilities and natural areas)) opportunities. 140 ((Regional recreation parks serve a broad spectrum of users. These parks and their 141 facilities include those not generally viable for individual communities due to site or 142 specialized facility requirements or the unique nature of the offering requiring a broader 143 user base to support them.)) Regional parks include recreational facilities that rely on a 144 broad user base, require a large area, include a specialized facility, or offer a unique 145 experience.

146

Educational and interpretive programming promotes appropriate and enjoyable use of the park system, increases public awareness of the park system's resources and values, and builds support and stewardship for the system and its resources. Programming and special events provide activities and entertainment that attract people to the parks.

- 152((P-104)) P-105King County shall provide regional parks and recreational facilities153that serve users from multiple neighborhoods and communities((-<br/>Regional parks include unique sites and facilities that should be)) and154Regional parks include unique sites and facilities that should be)) and155strive to be equitably and geographically distributed, and shall ensure156that investments prioritized using opportunity area metrics are<br/>delivered in collaboration with the community, cities, and other158partners.159
- 160((P-105)) P-106 King County should facilitate affordable and culturally((-))161accessible educational, interpretive, and aquatic programs on162((c))County-owned properties that further the enjoyment,163understanding and appreciation of the natural, cultural, and164recreational resources of the park system and the region.165

# ((P-106)) P-107 King County should facilitate and seek regional and national programs and special events at regional sites and facilities.

# 168 2. Local ((Parks)) Open Space

169 In the Rural Area, the large geographic area and dispersed populations, individual lots, 170 low residential density, and economies of site management dictate fewer and smaller 171 individual park sites than in urban areas. ((Nearby regional parks and other open 172 spaces also provide recreational opportunities in the Rural Area and Natural Resource 173 Lands.)) King County's role in the Rural Area and Natural Resource Lands ((will)) reflects 174 rural levels of service. King County also provides local parks in unincorporated urban 175 areas and the County's role in these parks reflect urban levels of service. ((These vital 176 local parks, local trails, and recreational facilities contribute to the physical, mental and 177 emotional well-being of county residents.

- 178
- 179 180 181

184

185

208

P-107)) P-108 King County shall provide local parks, <u>trails</u>, and other open spaces in ((the Rural Area)) <u>urban and rural unincorporated areas</u>. Local parks, trails, and other open spaces that complement the regional ((<del>system</del>)) <u>open space</u> should be provided in each community ((<del>in Rural Areas</del>)) to meet local recreation <u>and open space</u> needs and enhance environmental <u>guality</u> and ((<del>visual quality</del>)) <u>view corridors</u>.

186((P-108)) P-109King County should provide local parks that include fields and<br/>other active recreation facilities ((with))in urban and rural<br/>unincorporated ((communities with fields and other facilities that<br/>provide opportunities for active sports)) areas. These facilities shall be<br/>((in addition to and compatible)) additional and complimentary to<br/>those in ((with King County's)) regional parks.

# 192 3. Regional Trails ((System)) <u>Network</u>

193 The Regional Trails ((<del>System</del>)) network is a major element of the county's greater open 194 space system that provides opportunities for recreation and ((nonmotorized 195 transportation)) active transportation, as well as corridors often used by wildlife. This 196 system contributes to the health and ((wellbeing)) wellbeing of ((both county residents)) 197 trail users and the environment. King County is home to one of the largest 198 ((nonmotorized)) regional trail networks in the North America. King County and local 199 jurisdictions collectively offer ((approximately)) over 300 miles of shared-use (multi((= 200 ))purpose) paved and unpaved paths connecting communities and linking Puget Sound 201 urban areas with the Rural Area((s)), Natural Resource Lands, and the Cascade 202 Mountains. ((These facilities are classified as shared use paths by the Federal Highway 203 Administration and are a component of the federally-designated regional transportation 204 plan administered by the Puget Sound Regional Council. The)) King County 205 ((<del>government</del>)) stewards some 175 miles of the overall network. The remaining 206 portions of the network are managed by local cities, the Port of Seattle, and Washington 207 State.

((Regional trails are non-motorized facilities used for bicycling, walking, jogging, 209 skating, horseback riding where appropriate, and other activities. The paths provide 210 211 both recreational opportunities and mobility options, connecting users in neighborhoods and communities with schools, parks, employment, and other important 212 213 destinations. Regional trails may be paved or soft-surface (gravel) or a combination of 214 both. The network reaches more than 30 cities throughout King County, and use is 215 extensive. It has been estimated that 12 million bicycle and pedestrian trips are made 216 on the network in King County annually. These paths serve a wide range of land uses, 217 both urban and rural. They link urban centers, business districts, neighborhoods, 218 universities, schools, parks, and transportation centers. They run through cities, along waterfronts and scenic shorelines, through river valleys and farmlands, and into the
 Cascade forests.

While intended originally as recreational amenities and linear parks, the regional trails in King County have evolved to provide not only extensive recreation, but also important active transportation opportunities, and social and cultural venues. Today, thousands of daily trips are made on paths such as the Burke-Gilman Trail between suburban cities and Seattle.))

Recreation remains the primary use <u>on regional trails</u>, but ((<del>an increasing number of those</del>)) <u>some</u> trips are made for work and school, combining the healthy recreational benefits of cycling and walking with the workday commute. The trails are also used for a variety of special activities that enrich life in the central Puget Sound region, from art-related treks to community fundraisers to long-distance cycling events.

233

221

227

234 Regional trails in King County now include ((not only)) decades-old popular routes like 235 the Burke-Gilman Trail((, but also)) and trails networking many landscapes and 236 destinations. Routes follow abandoned railroad lines, water pipeline and power line 237 corridors, river levees, and other special features or they may establish their own 238 alignments as they seek out practical courses between destinations. More 239 interconnections provide more travel opportunities. Paths access parks and scenic 240 landscapes, but they also now serve urban centers, major transit facilities, and other 241 important everyday destinations. Future facilities will continue to provide the joint 242 benefits of recreation and regional mobility. More information regarding King County's 243 Regional Trails ((System)) network, including the proposed future regional trails plan, 244 the Regional Trails Needs Report, can be found in ((the Appendices)) Appendix C2. 245

246 ((P-109)) P-110 King County shall complete and maintain a regional trails ((system)) 247 network, ((linking trail corridors to form a countywide network)) to 248 provide recreational opportunities and to allow for transportation and 249 wildlife corridor uses to contribute to the health and wellbeing of both 250 trail users and the environment. King County ((will)) shall continue to 251 primarily own the land necessary for the operation and management of 252 the trail ((system)) network and pursue public-private funding opportunities for development and maintenance, while ensuring 253 254 opportunities for access for all King County residents. 255

((Policies related to the planning, development, and management of the Regional Trails
 System can be found in the King County Parks Open Space Plan, a functional plan of the
 King County Comprehensive Plan. Additional policies can also be found in Chapter 8,
 Transportation.

260

## 261 Eastside Rail Corridor)) Eastrail

262 ((The Eastside Rail Corridor)) Eastrail provides a ((rare and)) unique opportunity to 263 develop a major north-south, dual-use (((recreational trail and public transportation))) 264 corridor in support of active transportation and transit mobility ((through transit, 265 nonmotorized and active transportation, including access to transit outside the 266 corridor,)) consistent with its federal railbanked status. The owners share ((other)) 267 multiple objectives for the corridor including accommodating utilities, parks, recreation, 268 and cultural amenities, and encouraging equitable access to these facilities, and to 269 housing and jobs, in support of economic opportunity for all King County residents. 270 ((The corridor will be the focus of regional trail planning and development by King 271 County Parks)) King County is actively developing the regional trail component of 272 Eastrail, connecting regional growth centers, urban communities, other regional trails, 273 and ((both)) local and high-capacity transit. The trail will connect to existing major 274 regional trail corridors including the Mountains to Sound/I-90 Trail, State Route 520

Trail, Sammamish River Trail, Lake to Sound Trail, and others. ((The trail will provide opportunities for safe recreation and mobility as a component of King County's Regional Trails System and provide opportunities for environmental benefits to the region.

- 279 P-110a)) P-111((The Eastside Rail Corridor regional trail shall be developed)) King 280 County shall develop Eastrail in coordination with the other trail 281 owners, other jurisdictions, local and state agencies, utilities with 282 property interests, and nonprofit and private partners to enhance regional recreation and mobility and connectivity between regional 283 284 growth centers, urban communities, other regional trails, and local and 285 high-capacity transit, consistent with a commitment to dual use 286 (recreational trail and public transportation), and consistent with 287 federal railbanking. ((The trail will enhance the quality of life by 288 providing important recreation and mobility options for adjacent land 289 uses.)) The trail corridor shall include high-quality landscaping and environmental features, where appropriate, to enhance the trail 290 291 experience and to provide ecological benefits to the region. 292
- ((<del>P-110</del> 293 King County shall include the planning and development of a regional 294 trail in the Eastside Rail Corridor, to enhance regional recreation and 295 mobility. This facility will be planned and developed in coordination 296 with other owners of BNSF's former interests, and in close coordination 297 with King County Department of Transportation and other state and 298 local agencies, in support of the commitment to dual use (recreational 299 trail and public transportation), consistent with federal railbanking, and 300 multiple objectives of King County and the other owners. The trail will 301 be identified in King County's regional trails plan, the Regional Trails 302 Needs Report, as a priority capital facility.
- 304P-110bThe Eastside Rail Corridor regional trail shall be developed to the most305current regional trail standards, ensuring safe recreation and mobility306in accessing trails, streets and transit consistent with a commitment to307dual use (recreational trail and public transportation), and consistent308with federal railbanking. The trail corridor will include high-quality309landscaping and environmental features where appropriate to enhance310the trail experience and to provide ecologic benefits to the region.))

# 311 4. Multi((-<del>U</del>))<u>u</u>se Sites

312 ((Each portion of a multi-use site will be developed and managed to support the level of
 313 use or conservation appropriate to that portion of the site.

315P-112Multi((-))use sites should include lands that have areas of316environmental value, but also may accommodate extensive public317access and active and/or passive recreation opportunities. Each portion318of a multiuse site shall be developed and managed to support the level319of use or conservation appropriate to that portion of the site.

# 320 5. Natural Areas

321 The King County open space system includes many sites owned by King County whose 322 primary purpose is to conserve and restore ecological value. These sites may allow 323 varying types of public use that do not harm the ecological resources of the site. These 324 sites include many scenic and environmental features of King County's landscape, which 325 play a role in protecting a diversity of vegetation and fish and wildlife important to the 326 beauty and character of the region. King County ((will)) focuses on linking natural areas 327 to create regional open space corridors of greenways and waterways along the major 328 natural systems, such as rivers and shorelines.

278

303

314

 ((Preserving these areas in partnership with other agencies, private groups and individuals will provide multiple values including environmental and economic benefits of air and water quality, surface water management, aquifer recharge, and fish and wildlife habitat preservation and enhancement.))

- ((P-111)) P-113 King County ((will)) shall manage its natural areas to protect,
   preserve, and enhance important natural resource habitat, biological
   diversity, and the ecological integrity of natural systems.
- 339 ((P-112)) P-114 King County shall recognize and protect the natural character and 340 ecological value of its natural areas. These areas are important for 341 preserving fish and wildlife and their habitat, native vegetation, ((and)) 342 features of scientific and educational value, and Indian tribal cultural 343 and historic resources. Development and public use may be limited to 344 preserve the natural state and reduce disturbance of the natural and 345 cultural resources. Site improvements should be focused on providing 346 educational and interpretive opportunities. Public access should be 347 directed to ((the)) less-fragile portions of a site to ensure continued 348 protection of the ecological and cultural resources.

# 349 6. Working Resource Lands

350 The ((c)) county's open space system includes lands owned by King County that are 351 managed as working farms and forests. The ((<del>c</del>))<u>C</u>ounty has purchased these properties 352 ((in fee or less than fee ownership)) with the intention of conserving the resource use on 353 the site. County ownership and management of these lands conserves the resource 354 land base, allowing the resource activity to continue, while contributing to the local 355 ((<del>rural</del>)) economy, providing healthy foods, reducing carbon emissions associated with 356 importing food into the region, providing education about agriculture and forestry, and 357 providing passive recreational opportunities on some properties. The ((-))County's358 policies to conserve farmland and encourage agriculture are discussed in Chapter 3, 359 Rural Area((s)) and Natural Resource Lands.

## 360 Farmland

334

361 ((The Farmland Preservation Program is a county program that preserves farmland through the purchase of development rights. The farms in the Farmland Preservation 362 Program generally remain in private ownership. The county has purchased a farm 363 outright in a few cases, with the intention of reselling the land without the development 364 365 rights to a private farmer.)) The County occasionally acquires farmland, either to address 366 farmland access issues or as part of an acquisition for other purposes, such as habitat 367 protection, food risk reduction, or recreational access. Although the County usually 368 intends to resell farmland to a farmer while retaining a Farmland Preservation Program 369 easement, some farmland has strategic importance to advancing County initiatives and 370 priorities and will be retained in County ownership long-term. The ((+))County has 371 developed a program to lease farms ((to small-scale farmers)) until such time that the 372 property ((<del>can be</del>)) <u>is</u> resold. 373

374 ((<del>P-113</del>)) P-

375

376

377

378

379

380

381

## ((<del>P-113</del>)) <u>P-115</u> Farmland owned by King County shall<u>:</u>

- <u>a.</u> ((c))<u>C</u>ontribute to the preservation of contiguous tracts of agricultural land; ((<del>and</del>)) <u>or</u>
- <u>b.</u> ((make affordable farmland available for use by small-scale and new farmers)) <u>Provide access to farmland to farmers who are</u> <u>historically underrepresented in agriculture, beginning farming, or</u> <u>economically disadvantaged</u>.

- ((P-114)) P-116 ((Farmers leasing properties owned by King County shall use
   Agricultural Best Management practices, Integrated Pest Management
   and other sustainable farming methods.))
- 386P-117King County shall explore opportunities to allow farmers who are387historically underrepresented in agriculture, beginning farming, or388economically disadvantaged to build equity while leasing farmland389owned by the County.
- ((P-115)) P-118 The use and management of farmlands owned by King County shall
   be consistent with any requirements imposed by the funding program
   used to purchase each property and shall serve to meet and enhance
   the objectives of the King County Agriculture Program.
- 395 Forestland

396 ((One goal of the King County Open Space System is the c))Conservation of forestland, 397 through acquisition of land or conservation easements, ((to)) decreases threats of 398 conversion resulting from development and fragmentation, ((as well as)) and promotes 399 ((the)) understanding of the importance of forest management, including restoration of 400 the forests to more natural conditions. The working forests owned by King County are 401 generally very large parcels of land (several hundred acres or more) that support 402 sustainable forest management practices and contribute to the retention of a 403 contiguous forest.

404

- These properties contain valuable fish and wildlife habitat, provide environmental services (such as stormwater management, clean air and water and carbon sequestration), and help mitigate the impacts of climate change, as well as provide high-quality passive recreation, scenic vistas, and educational((*t*)) and interpretation opportunities.
- 411<br/>412((P-116)) P-119<br/>County shall provide large tracts of forested property in the Rural<br/>Forest Focus Areas, the Forest Production District, and Rural Area.<br/>((that will))413((that will))
- 416P-120Working forest land and conservation easements owned by King417County shall remain in active forestry, protect areas from development,418or provide a buffer between commercial forestland and adjacent419residential development, and may provide ecological or recreational420benefits.421
- ((P-117)) P-121 Management goals for working ((F))forest land owned by King 422 423 County shall ((be used to sustain and enhance environmental)) include 424 enhancing ecological benefits and functions, ((demonstrate 425 progressive)) demonstrating best forest management ((and research)) 426 practices, ((and provide)) providing passive recreation opportunities, 427 and generating revenue ((for the)) to facilitate sustainable management 428 of ((the working forest lands)) those sites. 429
- 430((P-118Forest land owned by King County shall provide a balance between431sustainable timber production, conservation and restoration of432resources, and appropriate public use.))
- 433 7. Backcountry Trails

Backcountry trails are ((not a separate open space category; rather they are)) facilities located within King County's multi((=))use sites, forest lands and natural areas. These trails allow visitors to directly experience the county's beautiful natural environment as found in its forests, meadows, and marine and fresh((-))water shoreline. Unlike multi((=

438 ))purpose regional trails that network urban and rural landscapes throughout the 439 county, these soft-surface <u>trails</u> are intended for ((<del>passive</del>)) <u>outdoor</u> recreation and 440 appreciation and enjoyment of a natural experience with forest and trees, streams and 441 wetlands, shorelines, and birds and wildlife. Where backcountry trails are developed on 442 lands containing fish ((<del>and</del>)), wildlife, <u>and cultural</u> resources, development and 443 management of such trails is undertaken ((<del>so as</del>)) to minimize the impacts on those 444 resources.

# 446((P-118a)) P-122King County ((will)) shall continue to provide and manage a447backcountry trail system on its lands in collaboration with other public448and private landholders and consistent with its Trail Programmatic449Permit.

# 450 8. Other Open Spaces

445

451 Preservation of open space in the county reaches beyond the  $((c))County_owned$ 452 system. Large areas of the county are owned and managed by federal agencies, the 453 state, and other local jurisdictions ((that manage the land)) for environmental protection, 454 resource production, or a wide range of recreational ((opportunities)) uses. 455 Additionally, open space benefits are often provided by private land((-))owners 456 managing their land in ways that protect the environment, conserve natural resources, 457 or provide scenic vistas. ((King County acquires property for other reasons, such as 458 flood hazards or providing needed public facilities. These lands can also provide open 459 space conservation benefits.)) 460

# 461P-123King County shall encourage and pursue partnerships and mutually462beneficial agreements with Indian tribes, public agencies, nonprofit463and community organizations, and the private sector to fund, program,464manage, and steward sites and facilities for public recreation and465natural resource protection consistent with the classification, role, and466use of said sites and facilities.

468 ((King County has acquired lands and manages facilities along major river and stream 469 systems for the primary purpose of floodplain management and flood hazard 470 management. Major streams and rivers are vital components of the county's open 471 space system, therefore the flood hazard management lands contribute critical links in 472 the county's open space network. The King County Flood Control District will continue 473 to maintain flood hazard management land and facilities within available funding levels. 474 The county will also seek innovative measures for maintaining and improving flood hazard management, reducing maintenance costs, integrating flood hazard 475 management and recreational opportunities, and achieving wildlife habitat protection 476 477 and salmon recovery.))

# 478 C. ((Achieving)) Sustaining and Growing the Open 479 Space System

480 Parks and other ((-))County-owned open space lands ensure a quality of life today and a legacy to future generations. In King County, many types of open spaces and fish and 481 482 wildlife habitat remain in private ownership and may be subject to future development. 483 King County's Land Conservation Initiative guides the collaborative strategy to accelerate the preservation of natural lands, working farms and forests, urban green 484 485 space, and trails in the next 30 years. To ensure that these lands and resources are 486 protected and to offer an alternative to acquisition, the  $((\tau))$  County offers landowners a 487 wide variety of tools to preserve their property. ((Policies outlining strategies for using 488 these tools can be found in Chapters 3, Rural Areas and Natural Resource Lands, 4, 489 Housing and Human Services, and 7, Parks, Open Space and Cultural Resources.)) 490

491 Cooperation, coordination, and partnerships with public agencies, private groups, and 492 individuals are necessary to develop the ((regional parks and)) open space system, to 493 meet existing needs for park and recreation facilities, and to accommodate the needs of 494 growth. The Mountains-to-Sound Greenway National Heritage Area, along the I-90 495 corridor, is a successful model for coordination of efforts by public and private entities 496 to protect the backbone of the ((c))County's open space system. King County will 497 achieve the multiple benefits of resource protection and recreation by building 498 partnerships and coordinating with providers and user groups of the ((<del>parks and</del>)) open 499 space system. Working together, stewardship can be fostered and these lands and facilities can be enhanced, restored, and operated more economically and efficiently to 500 501 benefit all county residents.

## 502 1. Priorities

506

509

516

537

# ((P-119)) P-124 Open space lands should be acquired to expand and enhance the open space system as identified in the King County Open Space Plan: Parks, ((Regional)) Trails and Natural Areas.

- 507((P-120)) P-125Regional trail corridors should be acquired when identified in King508County's Regional Trails Needs Report or other trails plans.
- 510((P-121King County shall consider equity in the location, development and<br/>acquisition of its open space system to help in the reduction of health<br/>disparities and in the promotion of social and environmental justice.))

## 513 2. Criteria

- 514((P-122)) P-126Lands preserved for ((public parks, regional trails or other)) open515space should provide multiple benefits whenever possible.
- 517((P-123)) P-127Decisions on acquisition and development of park, regional trail,518and other open space sites should consider funding needs for public519engagement, initial stewardship, site development, long((-))-term520maintenance, and operations.521
- 522((P-124)) P-128 A variety of measures should be used to acquire, protect, manage,523and develop regional and local ((parks, regional trails and)) open space.524Measures can include((: county funding and other)) funding525mechanisms, grants, partnerships, incentives, regulations, dedications,526((and)) contributions from residential and commercial development527based on their service impacts, ((and)) trades of lands, and shared528development activities.

# 529 3. Managing the System

As the caretaker of ((<del>200</del>)) <u>205</u> parks, 175 miles of regional trails, more than ((<del>200</del>)) <u>250</u> miles of backcountry trails, ((<del>28,000</del>)) <u>32,000</u> acres of open space, and ((<del>145,000</del>)) <u>150,000</u> acres of conservation easements, King County is one of the region's important providers and managers of public lands. As such, the principles and policies that guide stewardship and management of these lands and resources are critical to ensure these assets continue to contribute to the region's quality of life now and for future generations.

# ((P-126)) P-129 Development and management of ((parks, regional trails and)) open space ((sites)) should be consistent with the purposes of their acquisition and in consideration of their funding sources.

- 542((P-127)) P-130Open space lands shall be classified to identify their role in the543open space system and the purpose of the acquisition as recreation544site, regional trail, natural area ((park, multiuse site, or)), working545((resource land)) forestland, or multiuse site.546
- 547((P-128King County will adopt an entrepreneurial approach to managing and548operating the open space system and work aggressively to implement549multiple and appropriate strategies to fiscally sustain the open space550system.))
- 552((P-128a)) P-131 King County should develop management plans (such as master553plans, forest stewardship plans, or site management guidelines) that554outline goals and objectives and management recommendations for555sites within the open space system, as appropriate.
- ((P-128b)) P-132 King County's use of pesticides and fungicides ((will)) shall be
   based on integrated pest management principles.
- 560((P-128c)) P-133 King County shall support activities at County parks that advance561public health, provide clean environments, and avoid exposure to562harmful products, such as tobacco and vaping products, ((in order)) to563promote play, physical activity, and family and community connection.

# 564 4. Coordination and Partnerships

551

556

559

573

574

575

576

577

578

579

- ((P-129)) P-134 Recognizing the value of open space in promoting social and 565 566 economic health and wellness across the county, King County shall be a 567 leader in establishing partnerships with Indian tribes, cities, adjacent 568 counties, (tribes,)) state and federal agencies, school and special purpose 569 districts. community organizations, non((-))profit 570 organizations, land((-))owners, and other residents. The ((c)County and 571 these partners should work to: 572
  - a. Support and strengthen the linkages between rural, resource, and urban communities' use and maintenance of open spaces;
  - <u>b.</u> ((p))<u>P</u>romote and protect all aspects of environmental quality, while addressing equity <u>and racial</u> and social justice goals to complete the ((<del>regional parks and</del>)) open space system through joint planning and management of local and regional sites and facilities.
- ((P-130)) P-135 In the Urban Growth Area, King County shall work in partnership
   with other jurisdictions to facilitate annexation and transfer of local
   parks((, and local trails)) and other open space sites to cities or other
   providers to ensure continued service to the community.
- 585((P-131King County should work with cities to share operational and<br/>maintenance costs of parks and other open spaces in unincorporated<br/>areas in which a substantial portion of the users are from incorporated<br/>areas.580areas.580areas.

- 590 P-132)) P-136 King County ((will)) shall encourage and support volunteer efforts
   591 to maintain and enhance programs, sites, and facilities.
- 592 5. Public Participation
- ((P-133)) P-137 King County ((will)) shall encourage and seek public input, advice, and participation ((from the public)) in decisions about ((management of)) the open space system ((that relate to key issues such as funding, planning, acquisition, development and stewardship)) and to advance equitable access to parks and trails.
- ((P-134)) P-138 King County ((will invite and involve a wide variety of interests via 599 600 a diversity of individuals, groups and agencies)) shall use a variety of 601 methods to ensure early, continuous, and broad engagement with the 602 public consistent with the County's equity and racial and social justice 603 goals and policies. King County ((will)) shall intentionally engage 604 communities that are the most affected by proposals and plans and 605 shall provide equitable access for historically underrepresented and 606 underinvested populations in public engagement about and access to 607 the open space system. 608
- 609((P-135King County will use a variety of methods to ensure public involvement610from all county residents such as public meetings, advisory groups,611surveys, web and social media postings, news releases, park site612signage, mailing lists, newsletters and through various community613groups (including Community Service Areas). These methods will allow614for early, continuous and broad public participation.))
- 615 II. Cultural Resources

616 Cultural resources make a significant contribution to the guality of life in King County. 617 Arts and heritage organizations, public art ((and)), historic and archaeological properties, and Indian tribal celebrations and traditional cultural events contribute to 618 619 the region's economic vitality, play an essential role in cultural tourism, and contribute 620 significantly to the county's overall quality of life. As King County grows, the need to 621 protect, support, and enhance cultural opportunities and resources is essential ((in 622 order)) to ((sustain)) livability. King County plays an important role in supporting the 623 region's cultural life. 4Culture, a County-chartered Public Development Authority, 624 serves as the cultural services agency of King County ((county's cultural services 625 agency)). 4Culture has operational responsibility for advancing the work of the cultural 626 community in King County by advocating for, supporting, promoting, and enhancing:

- arts;
- 628 heritage;
  - preservation; and
  - public art.
- 630 631

627

629

598

- publicard
- 632 4Culture(('s)) and the King County ((h))Historic ((p))Preservation ((p))Program work 633 together to provide((s)) funding, advocacy, assistance, and support in preserving and 634 conserving the county's historical and archeological resources through projects and 635 programs including((+)) interpretation, community education and outreach, cultural 636 tourism, and rehabilitation of historical resources((. The King County Historic 637 Preservation Program, housed in the County's Department of Natural Resources and 638 Parks, also plays an important role ensuring)), as well as to ensure that historic 639 properties throughout King County are protected and enhanced.
- 640

King County government can lead by example through stewardship and wisemanagement of its own cultural resources. Historic public buildings and facilities, such

as bridges and roads, can be preserved and continue to be used; other historic
resources can be converted to public use. As set by policy ED-((<del>106</del>))<u>109</u>, found in
Chapter 10, Economic Development, ((<del>in order</del>)) to enhance the region's quality of life
and economic vitality, the ((<del>c</del>))<u>C</u>ounty will engage in programs and projects to protect
cultural resources and promote expanded cultural opportunities for the county's
residents and visitors.

- 650P-201King County shall be a steward of cultural resources under its control.651It shall identify and evaluate cultural resources, preserve public art652((works)) and significant historic properties, and interpret and provide653public access to them whenever appropriate. County departments and654divisions shall collaborate with the Historic Preservation Program to655nominate eligible properties for landmark designation.
- 657P-202King County shall consider equity and racial, social, and environmental658justice in its promotion and protection of cultural resources.
- 660 P-203 King County shall encourage ((preserving, reusing and recycling)) preservation and reuse of historic buildings in its facilities planning and 661 662 other relevant actions, including open space acquisition, and shall 663 encourage the salvage and recycling of those that cannot be feasibly 664 King County shall also encourage interested parties in <u>reused</u>. 665 pursuing preservation, restoration, and repurposing projects, 666 particularly in those doing repairs and/or upgrades themselves.

# 667 A. Relationships

668 County residents need arts and heritage opportunities. These include both 669 attendance-driven programs and projects, as well as more localized. 670 community-orientated opportunities ((of)) for hands-on participation and education. 671 The county's cultural system is comprised of regional and local arts and heritage 672 organizations, individuals, and venues. It also involves relationships with both public 673 and private entities to preserve the region's history, as well as to enhance placement of 674 art in public places. As such, cultural resource management crosses jurisdictional 675 boundaries and involves countless public and private entities and artists throughout the 676 region. The range and complexity of cultural activity in the region requires coordination 677 and cooperation. King County, through its creation of 4Culture, provides this regional 678 coordination and leadership.

679 680 While 4Culture is not a ((c)) county department, the ((c)) county and 4Culture maintain a 681 unique cooperative relationship. Historically, over 95((%)) percent of 4Culture's budget 682 has been funded by King County resources from either dedicated tax revenue or capital 683 improvement project budgets. The ((council approves the executive's nominations for 684 membership on)) <u>Council appoints and confirms members of the</u> 4Culture((+s)) board of 685 directors((-)), and  $((\mp))$ three ((-))Councilmembers serve on ((4Culture's)) the board. 686 <u>Additionally</u>,  $((\mp))$ the  $((\mp))$ <u>C</u>ouncil annually receives briefings from 4Culture on its work 687 program and ((to discuss plans for the coming year)) budget. Therefore, it is through 688 4Culture that King County maintains its regional role ((with regard to)) in cultural 689 resource management.

690

649

656

659

691P-204King County shall support the retention and promotion of the region's692cultural legacy, promote cultural education, and encourage the693preservation and celebration of cultural diversity and creativity.694

- 695P-205King County shall support and encourage development of regional<br/>cultural organizations, facilities, and services that address a countywide<br/>audience or are dedicated to unique and significant cultural themes or<br/>disciplines.
- 700P-206King County shall support and encourage community cultural<br/>organizations, facilities, and services to provide opportunities for local<br/>access and participation by all residents throughout the county.
- 704P-207King County shall encourage excellence and vitality in the arts by<br/>supporting opportunities for attendance at and participation in diverse<br/>arts, ((and)) cultural, and heritage activities throughout the county.707
- 708P-208King County shall pursue its cultural resource goals by working with<br/>Indian tribes, residents, property owners, cultural organizations, public<br/>agencies, ((tribes,)) schools and school districts, and others.711
- 712P-209King County shall provide leadership in pursuing its cultural resource<br/>goals by actively advancing the protection, enhancement, and ongoing<br/>use of ((c))County-owned and other cultural resources, and by<br/>promoting intergovernmental cooperation and partnerships for the<br/>preservation and use of cultural resources.717
- 718P-210King County shall partner with cities to protect and enhance historic<br/>resources and public art located within city boundaries and <u>Potential</u><br/>((a))<u>A</u>nnexation ((a))<u>A</u>reas.

# B. Arts, Heritage, and Public Art

699

703

733

((The region's artistic environment parallels its natural features in variety and richness. Its arts organizations, artists and opportunities are widely known and valued for their diversity and excellence in music, theater, dance, literary activity, and visual arts. Museums, historical societies, heritage groups, historians, archivists, folklorists and other heritage specialists enrich community life and provide rich cultural experiences for county residents and visitors. Without preservation and stewardship of local history by these groups, the county's rich history would be lost.

- 730 P-211 King County shall support, preserve and enhance its heritage by
   731 encouraging opportunities for public attendance and participation in
   732 diverse heritage activities throughout the county.
- P-212)) P-211 ((The)) King County ((executive and the King County council)) shall
   ((regularly seek advice from)) continue to collaborate with 4Culture
   ((on)) when developing programs, policies, and regulations that
   support, enrich, and increase access to the arts, public art, and King
   County's heritage.
- 740 P-212 King County shall continue to provide financial support for culture 741 through the Doors Open cultural access program or similar programs 742 that provide operational and capital support to arts, culture, heritage, 743 science, and historic preservation non-profit organizations; increase 744 access to programming for public school children; help launch new 745 organizations and expand access in underinvested areas; and provide 746 free public access. 747

((Public art means art for shared public space in King County, including King County
 buildings and infrastructure.)) King County's public art collection includes portable,
 permanently sited, and architecturally integrated artworks that help define ((c))<u>C</u>ounty

buildings as cultural spaces. Public art also includes art installed or incorporated in places developed by others, but accessible to the public. Public art enhances community character and diversity, sparks imagination, and provides a direct cultural experience for county residents and visitors every day. For new or changing communities, public art is a powerful contributor to local character, sense of place, and belonging. Public art can also help mitigate the adverse effects of new development.

- 758P-213King County shall, as appropriate, incorporate public art in its<br/>construction and mitigation projects, as well as its undertakings<br/>involving public-private partnerships((;)) and development authorities<br/>that include public funds or resources or have publicly accessible<br/>components.763763
- 764P-214Maintenance and conservation shall be a consideration in the765development and management of public art.

## 767 P-215 King County shall incorporate public art into its open space system.

# 768 C. Historic Preservation

769 ((Preservation of historic properties provides multiple benefits.)) Historic properties 770 maintain a tangible connection with the past and contribute to community 771 understanding, character, and diversity. Preservation can save((s)) energy, conserve((s)) 772 existing housing and commercial buildings, and retain((s)) historically significant open 773 space. Historic properties also play a major role in attracting tourists. The mission of 774 the King County Historic Preservation Program((, housed in the County's Department of 775 Natural Resources and Parks,)) is to conserve existing historic housing, commercial 776 buildings, and other significant properties and to foster heritage tourism throughout the 777 county. It provides technical and other assistance ((to cities lacking preservation 778 programs)). It also supports the work of the King County Landmarks Commission. 779

Many municipalities do not have sufficient resources to administer an historic
 preservation program. As a result, the history of the region is endangered. <u>King County</u>
 <u>helps in this regard by providing contracted historic preservation services to interested</u>
 <u>King County cities.</u> Comprehensive and coordinated protection of significant historic
 properties is necessary ((in order)) to ensure that King County's history is preserved.

((<del>P-217</del>)) <u>P-216</u> King County shall acquire and preserve historic properties for use by ((c))<u>C</u>ounty and other public agencies and shall give priority to occupying historic buildings whenever feasible.

- ((P-215)) P-217 ((The)) King County ((executive and the King County council)) shall
   regularly seek advice from the Landmarks Commission on programs,
   policies, and regulations that support and enhance preservation and
   protection of significant historic properties.
  - ((<del>P-216</del>)) <u>P-218</u> King County shall administer a historic preservation program to identify, protect<u>,</u> and enhance historic properties throughout the region.

((Historic preservation is an ongoing process that requires identification, evaluation,
 designation and protection of significant properties, and attention to long-term
 enhancement and interpretation. Historic properties are often destroyed through
 neglect. Regular maintenance and other management practices that protect historic
 properties are critical to long-term preservation. King County government can lead by
 example through stewardship and wise management of its own historic properties.))

786

787 788

789

795

796

797

798

757

766

Review of development proposals and other actions affecting historic properties resources is necessary ((in order)) to eliminate or minimize adverse effects of development or changing land use. Archaeological sites are particularly sensitive and endangered because they are not visible and may be unexpectedly encountered. King County government can also protect historic properties through careful planning and review of its own undertakings, both directly and in partnerships with private parties and other agencies.

# ((P-218)) P-219 King County shall establish comprehensive review and protection procedures for historic properties affected by public and private projects.

813

823

830

835 836

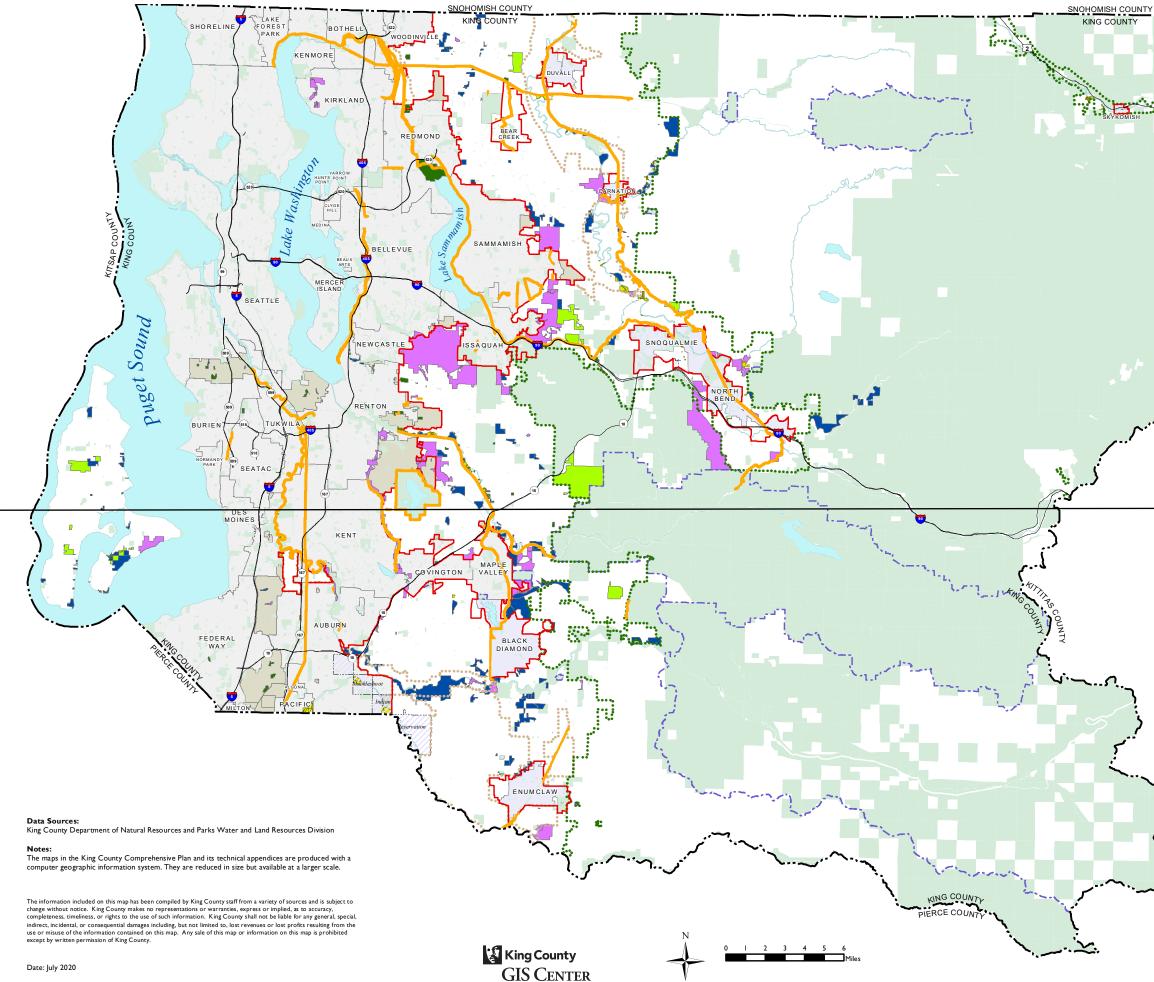

837

838

- 818((P-219)) P-220 King County ((may)) should condition public and private projects819((in order)) to protect historic properties. King County agencies shall820coordinate with the Historic Preservation Program to provide821consistent review and mitigation for their projects and undertakings822throughout the county.
- 824((P-220)) P-221King County shall encourage land uses and development that825retain and enhance significant historic properties and sustain historic826community character. County building and zoning codes and other827regulations and standards should provide flexibility to accommodate828preservation and reuse of historic properties. Zoning actions should829take into account the effects of zoning on historic properties.
- 831<br/>832P-222<br/>Parcels on which a cemetery is located should be given a land use<br/>designation, a zoning classification, or both, that allows less intensive<br/>development than would be assigned to the parcel were the cemetery<br/>not present.

## ((<del>P-221</del>)) <u>P-223</u> King County shall maintain an inventory of historic properties ((<del>in</del> <del>order</del>)) to guide its historic preservation decision making.

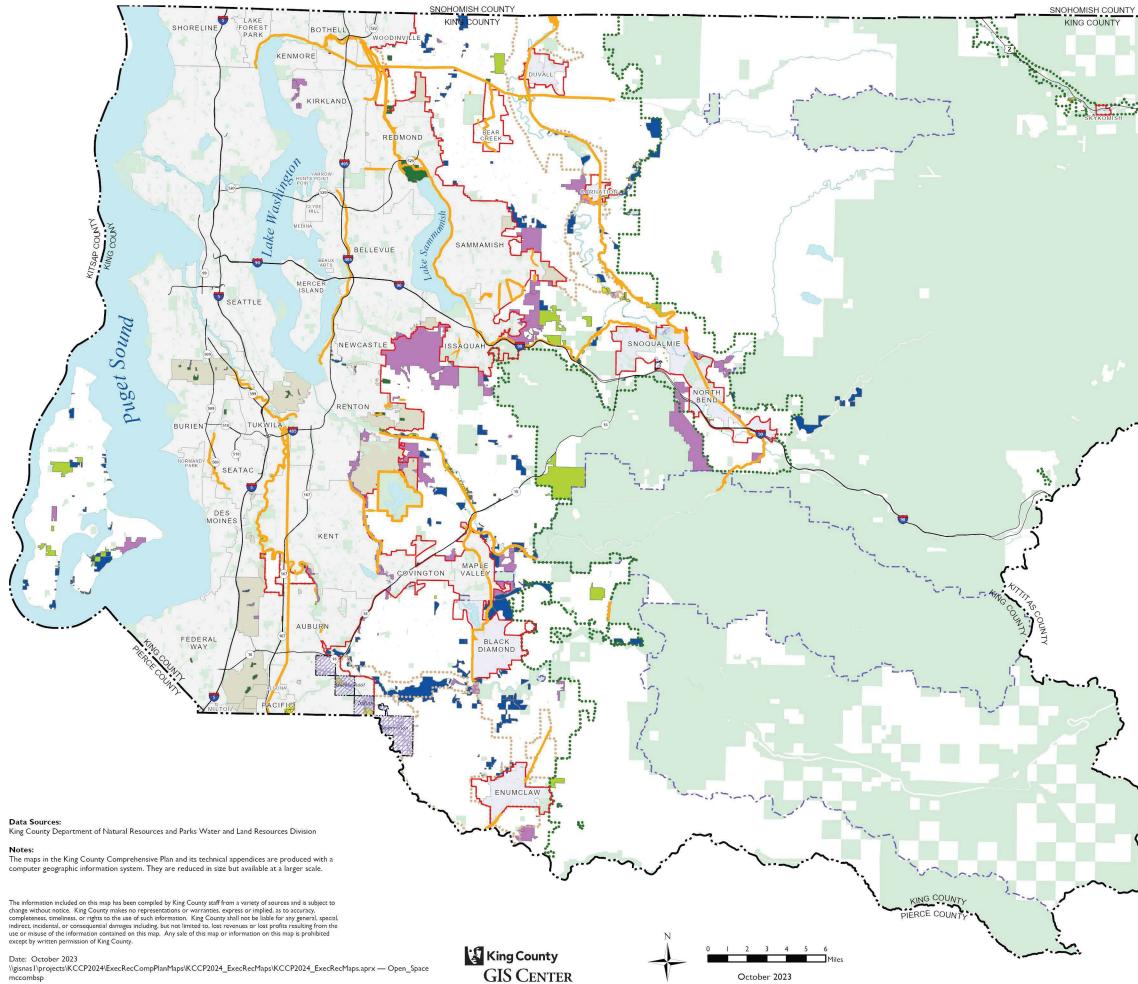

839 ((Preservation requires active support by governments and cooperation with property 840 owners. Incentives such as tax reduction, revolving loans, transfer of development 841 rights, expedited permitting, reduced permit fees, zoning flexibility, technical assistance 842 and other measures can be used to encourage preservation. As set by policy ED-208, 843 found in Chapter 10, Economic Development, the county shall assist businesses, 844 property owners, and other jurisdictions in preserving and enhancing historic 845 properties, including historic business districts, through a variety of incentives and 846 economic development measures.))

# CHAPTER 8

# TRANSPORTATION

1

Transportation is critically important to King County and the surrounding region and has profound effects on quality of life and the vitality of the economy. Transportation provides access to jobs, education, services, recreation, and other destinations throughout King County. King County plays a central role in the regional transportation sector, supporting a variety of motorized, nonmotorized, air and marine transportation needs and providing services and facilities ranging from local to international.

The County has direct responsibility for the unincorporated area road network. It provides transit services and facilities throughout the County, including within cities, and also performs many of Sound Transit's services under contract. King County Metro also operates streetcar services within the City of Seattle. The King County International Airport/Boeing Field is owned, operated and maintained by the County.

King County's Marine Division operates passenger-only ferry service from downtown Seattle to Vashon Island and West Seattle.

The County also provides requested road-related services to over two dozen cities or other agencies through contractual agreements where there is mutual benefit to the County and its customer cities and agencies.))

((Creating an Integrated, Sustainable, 8 and Safe Transportation System That 9 Enhances Quality of Life)) The 10 **Regional Transportation System** 11

# 12 A. Introduction

13 King County collaborates with the state and other local governments with the goal of providing an integrated, multi((=))modal transportation system for the Puget Sound 14 15 These intergovernmental partnerships seek to ensure that the county's reaion. 16 transportation system is designed, operated, and maintained in a manner that provides 17 mobility options for a wide range of users((7)); contributes to safe, affordable, and accessible communities for all((, and)); advances social and racial equity; helps ((to)) 18 19 address complex issues like climate change and homelessness; and safeguards and 20 enhances King County's natural resources and environment. It is important ((for)) that 21 the county's and the region's transportation system ((to achieve)) provide equitable 22 travel opportunities for all people and communities. It is also important for all 23 jurisdictions, including King County, to exercise sound financial management in the 24 provision of transportation services and infrastructure.

25

26 ((The King County Strategic Plan, as updated in 2015 by Motion 14317, provides policy 27 direction for transportation under the "Mobility" goal, through which the county aims to "deliver a seamless network of transportation options to get people where they need to 28 go, when they need to get there.")) Transportation and mobility are ((further)) 29 30 implemented ((at)) in King County through the functional plans: the ((Strategic Plan for Public Transportation, the Long Range Plan for Public Transportation, the Strategic Plan 31 32 for Road Services, the King County International Airport Strategic Plan and the King County Ferry District 2014 Strategic Plan, discussed later in the chapter.)) King County 33 34 Metro Strategic Plan for Public Transportation 2021-2031, Metro Connects (Metro's 35 long-range plan), the King County Metro Service Guidelines, the Strategic Plan for Road 36 Services, and the King County International Airport Strategic Plan. Implementation of 37 the Regional Trails network, which provides important bicycling and walking links, is 38 guided by Chapter 7, Parks, Open Space, and Cultural Resources, and the 2022 King 39 County Open Space Plan. King County transportation planning is further informed by the King County Strategic Climate Action Plan, which provides additional guidance 40 related to greenhouse gas reduction goals, community-driven transit development, and 41 42 climate-resilient transit infrastructure, and King County Code Chapter 2.10, which 43 establishes an integrated effort that intentionally applies the "Fair and Just" principle to all work to achieve equitable opportunities for all people and communities. 44 45 46 ((The following summarizes c)) The County's priorities ((for responding to policy

46 ((The following summarizes c)) The County's priorities ((for responding to policy
 47 direction established and articulated in the King County Strategic Plan, the King County
 48 Comprehensive Plan, County transportation agencies' functional plans, and the
 49 associated state and regional laws and planning requirements)) include:

- Maintain safe and secure County-owned infrastructure, including roads, bridges, trails, transit vehicles (buses, paratransit vehicles, passenger ferries, non-revenue fleet, etc.), transit facilities, and airport facilities;
   Coordinate and develop multimodal services and facilities for an integrated and
- Coordinate and develop multimodal services and facilities for an integrated and
   seamless regional and local transportation system;
- Deliver transportation services that support density and growth in the urban area, and meet the transportation needs of <u>the</u> Rural Area((s)) and Natural Resource Lands without creating additional growth pressure;

58 59	•	Maintain and preserve infrastructure that facilitates the efficient movement of freight and goods to support economic vitality and regional trade;
60	((	
61 62 63	•	–Maintain safe and secure county-owned infrastructure, including roads, bridges, trails, buses and passenger ferries, transit and ferry facilities, and airport facilities;))
64 65	•	Provide transportation choices and support travel modes that use less energy, produce fewer pollutants <u>,</u> and reduce greenhouse gases in the region;
66 67	•	Identify and adapt to the impacts of climate change on transportation infrastructure and services;
68 69 70	•	Provide opportunities for people to make active transportation choices by increasing the convenience, accessibility, safety, and comfort of taking transit, walking, and bicycling;
71 72 73 74 75 76 77	•	((Address the transportation needs of people of color, low-income communities, immigrant and refugee populations, people with limited English proficiency, and others who may have limited transportation options)) Support safe and equitable access to mobility options through transportation investments where needs are greatest, including for historically underinvested groups, people with disabilities, people aged 62 years and over, and people with special transportation needs;
78 79 80 81 82	•	Address homelessness and other significant issues using a holistic, countywide approach, through actions such as supporting equitable and affordable transit- oriented development, making transit more accessible through actions such as Metro's income-based approach to fare discounts, and by connecting people to the services and opportunities they need;
83	((	
84 85	•	– <del>Identify and adapt to the impacts of climate change on transportation</del> infrastructure and services;))
86 87 88 89	•	Integrate transportation and land use planning to increase transit use; support sustainable community development, including equitable and affordable transit-oriented development; and provide mobility services that are responsive to community characteristics;
90 91	•	Incorporate sustainable development practices into the design, construction, and operation of infrastructure and facilities;
92 93 94	•	Establish and implement clear transportation service priorities and guidelines - with a focus on equity <u>and racial</u> and social justice - and use transportation resources wisely and efficiently;
95 96	•	Develop sustainable <u>, equitable</u> funding sources to support the level of services needed by communities; and
97 98 99	•	Monitor and measure system performance and use this feedback to continuously improve transportation products and services.
100 101 102 103	The current and projected economic climate, however, places severe constraints on the County's ability to meet these important goals. The strategic plans for the Road Services Division, Metro Transit Department ( <u>Metro</u> ), and the Marine Division identify priorities, analyze available funding and constraints, and set targets to help reach these goals.	

# 104 B. Components of the Transportation 105 Element

- 106 The following documents address the Growth Management Act requirements for the 107 transportation element:
- 108 a. This Transportation chapter, which includes the narrative and policy language;
- b. Technical Appendix C<u>, Transportation</u> ((of this Comprehensive Plan)), which contains the Travel Forecast Summary, ((the)) Arterial Functional Classification Map, ((a t))<u>T</u>ransportation ((i)<u>I</u>nventory; and Transportation Needs Report ((that)), which contains a multi((=))year financial forecast and a multi((=))year list of road facility needs;
- 114 c. The ((<del>r</del>))<u>R</u>oads Capital Improvement Program;
- 115 d. The <u>King County Metro</u> Strategic Plan for Public Transportation, ((the Long Range Plan for Public Transportation)) <u>Metro Connects</u>, and the Transit Capital 117 Improvement Program; and
- e. Concurrency regulation, which implements the concurrency requirements and
   is codified ((<del>at</del>)) in King County Code Title 14.
- 120 ((<del>C. Consistency with Plans</del>

121 The framework and direction for the development of Comprehensive Plans are 122 provided by the Growth Management Act. The transportation element of the King 123 County Comprehensive Plan is consistent with and meets the requirements of regional 124 and countywide plans and policies that respond to the Growth Management Act. The 125 Countywide Planning Policies have been used to guide the development of the 126 transportation element and to ensure consistency with plans and programs developed 127 by adjacent jurisdictions.

128

Regional direction for the transportation element is set by Transportation 2040,
 developed by the Puget Sound Regional Council. (Transportation 2040 is consistent
 with the region's urban growth strategy, VISION 2040, also developed by the Puget
 Sound Regional Council.

133

134 King County identifies improvements and strategies needed to carry out the land use 135 vision and meet the Level of Service requirements for transportation. Road 136 improvements are guided by the Strategic Plan for Road Services, prioritized in the Transportation Needs Report and funded in the Roads Capital Improvement Program. 137 138 Public transportation investments are guided by the Strategic Plan for Public Transportation and are identified in the Transit Capital Improvement Program, and the 139 140 King County Ferry District 2014 Strategic Plan, 2014 - 2018, or successor plans. 141 Operation and management of the King County International Airport/Boeing Field is 142 guided by the King County International Airport Strategic Plan.

# 143 <del>D.</del>)) <u>C.</u> Transportation System, Services, and 144 County Responsibilities

- 145 The region's transportation system is comprised of the following elements:
- 146 a. Highways, arterial streets, and local/neighborhood streets;
- 147 b. Bridges;
- 148 c. Local and express bus transit and paratransit services and facilities, including
   149 Americans with Disabilities Act service programs;
- 150 d. High-capacity transit;

- 151 e. High-occupancy-vehicle lanes and ridesharing facilities; 152 Facilities and programs for ((pedestrians, bicycle riders and equestrians)) f. 153 active transportation, including sidewalks, shoulders, bicycle racks on transit, 154 and regional trails; 155 g. Facilities to accommodate freight and goods movement, including railroads, intermodal yards, and distribution centers; 156 157 h. Marine transportation services, ferries and ferry facilities, and navigable 158 waterways;
- 159 Airports; i.
- 160 Transportation Demand Management programs, systems, facilities, and j. 161 technologies; and
- 162 k. Facilities to maintain the transportation system elements.
- 163

### ((The specific responsibilities of King County government are described below.)) 164

#### Public Transportation 165 1.

166 ((Public transportation is vitally important to the Puget Sound region. It provides)) Public 167 transportation enhances regional economic vitality by providing connections to jobs, 168 schools, and other destinations, and enables those with limited mobility options to 169 travel. ((Public transportation enhances regional economic vitality by freeing up 170 roadway capacity and improving the mobility of people, goods, and services. It saves 171 the region time and money.)) It helps accommodate regional growth by ((making better 172 use of)) more efficiently moving people within the region's existing infrastructure and 173 ((benefiting the environment)) reducing the need for single-occupant vehicles and 174 space for parking. Public transportation can help address major societal issues, such as 175 homelessness, by connecting people to the services and opportunities they need. It 176 improves the quality of life and health for residents and visitors to the Puget Sound 177 region. ((King County provides public transportation services through the Metro Transit 178 Department, as well as passenger ferry service through the Marine Division.

179

### 180 Metro Transit Department

181 The King County Metro Transit Department (Metro) is the designated public transit provider for King County. Metro's mission is to provide the best possible public 182 transportation services and improve regional mobility and quality of life in King 183 184 County.))

185

186 Metro ((provides)) operates more than 180 bus routes, and its fixed-route services delivered more than ((120)) 130 million ((fixed-route transit rides per year)) passenger 187 188 trips in 2019. Prior to the COVID-19 pandemic, Metro delivered more than 400,000 trips every weekday; roughly half of downtown Seattle commuters relied on transit. 189 190 Even at the peak of the COVID-19 pandemic, Metro delivered more than 100,000 trips daily. Its fixed((-))-route system includes a network of frequent all-day((, two-way)) bus 191 192 routes between residential, business, and other ((transit)) activity centers; express and 193 peak-period commuter service to major destinations from many neighborhoods and 194 from a network of park-and-ride lots; and local bus services that connect people to their 195 communities and the larger transportation system. ((In addition to bus service, Metro 196 provides alternative services, such as commuter vanpools, Access paratransit service, 197 Commute Trip Reduction programs, and Rideshare Online, as well as community programs such as In Motion and car-sharing.)) For people with disabilities who cannot 198 199 use Metro's regular fixed-route buses, Metro offers Access paratransit service. Metro 200 also offers additional services for specific age groups, such as people aged 55 years and 201 older via the Community Access Transportation program, which is open to people with

# 202 disabilities as well. Metro also operates a commuter vanpool program for people who 203 don't have convenient transit service between home and work. As of 2023, the vanpool 204 program was serving 1,200 commuter groups with a fleet of 1,347 vehicles.

205 206 Metro augments its own investments by developing partnerships with ((local 207 jurisdictions, other agencies, employers, and institutions to increase public 208 transportation services and improve service effectiveness. Metro enters into agreements 209 with public and private entities to fund new or improved public transportation services, 210 where the partner contribution may be in the form of direct funding or investment that results in transit speed or reliability improvements. Metro also forms partnerships to 211 212 develop and promote alternative commute programs and to manage parking and traffic to make public transportation more efficient and attractive. Metro works with the 213 214 Washington State Department of Transportation and local cities to provide services that 215 help mitigate the impacts of major construction projects)) a range of entities, including 216 transit providers; community-based groups; schools and universities; human service 217 organizations; property owners and managers; businesses; and local, regional, and 218 state agencies and jurisdictions. By working with partners, Metro can leverage public 219 and private resources and discover new opportunities to improve service or 220 infrastructure. Metro can expand its accomplishments by collaborating with partners to 221 design and deliver services, facilities, and access improvements, and to develop policies, programs, products, and incentives. Metro's Service Guidelines and Metro 222 223 Connects include more information about how Metro will partner with other entities and 224 offer examples of such partnerships.

225

226 Metro is guided by ((its)) the Strategic Plan for Public Transportation ((2011-2021)) 2021-227 2031, the King County Metro Service Guidelines, and ((its Long Range Plan for Public Transportation)) Metro Connects. The Strategic Plan for Public Transportation defines a 228 229 vision and mission for public transportation services in King County and describes the 230 strategies to implement that vision. It also defines desired outcomes and describes how 231 progress will be measured. The Strategic Plan for Public Transportation and Service 232 Guidelines ((strike a balance between productivity,)) prioritizes social equity and 233 ((<del>geographic value</del>)) sustainability to ensure Metro ((<del>serves areas that have many low-</del> 234 income and minority residents - and others who may depend on transit)) invests where 235 needs are greatest (including for populations who identify as Black, Indigenous, other 236 People of Color; immigrants; refugees; people with low- or no incomes; people with 237 disabilities; and people who are linguistically diverse); addresses climate change; and 238 ((that)) meets public transportation needs ((are met)) throughout the county. The 239 ((Metro)) Service Guidelines ((augment the Strategic Plan for Public Transportation by 240 identifying)) identifies detailed methodologies for how Metro should measure the 241 performance of ((Metro's overall)) its transit network((, as well as each)) as a whole and of 242 its individual bus routes, and ((<del>by providing</del>)) <u>provides</u> clear guidance on how Metro 243 should use transit resources in alignment with ((the County's Equity and Social Justice Ordinance. The Long Range Plan)) Metro and King County policies and values, 244 245 including equity. Metro Connects sets the long((-))-term vision for service and 246 supporting capital infrastructure.

247

248 Increasing the use of public transportation plays an important role in King County's 249 efforts to ((mitigate)) address climate change and support livable, healthy communities. 250 Public transportation reduces greenhouse gas emissions by eliminating private vehicle 251 trips, reducing vehicle miles traveled, mitigating traffic congestion, and supporting 252 efficient land use. Metro((<del>'s use of green vehicles, such as</del>)) provides public 253 transportation using a "green" fleet of electric trolleys, ((and)) hybrid diesel-electric 254 buses((, and cleaner-burning fuels, such as Ultra Low Sulfur diesel,)) fueled with a biodiesel blend, and battery electric buses. This efficient fleet adds to the 255 256 environmental advantage of combining many riders in a single vehicle. Metro's policies 257 articulate a goal of transitioning to a zero-emissions bus fleet powered by renewable 258 energy by 2035. Metro's wide range of ((transportation)) mobility alternatives ((=))

- (including ((vanpools, carpools)) fixed-route transit, passenger ferries, flexible services,
   and Access paratransit); ((- and)) its support of choices such car- and bicycle-sharing,
   ((biking and)) walking and rolling to transit; and its commitment to seek out and support
   opportunities for transit-oriented development make transit a powerful tool to help
   reduce pollution and support active, healthy lifestyles.
- 264

265 ((In addition to reducing single occupant vehicle trips,)) Metro is ((also)) committed to 266 being a leader in environmentally((-)) friendly operating and maintenance practices and 267 minimizing its energy use. ((Metro educates its employees about reducing energy consumption at work and using public transportation to commute.)) The King County 268 269 Employee Transportation Program educates people about commuting to work via 270 another option than a single-occupancy vehicle. The agency also incorporates 271 cost-effective green building and sustainable development practices in all capital 272 projects that it plans, designs, constructs, remodels, renovates, and operates.

273

274 ((Metro also is committed to providing equitable opportunities for people from all areas

275 of King County to access the public transportation system. It provides travel

276 opportunities and supporting amenities for historically disadvantaged populations, such

277 as low-income people, students, youth, seniors, immigrants and refugee populations,

- 278 people with disabilities, and others with limited transportation options.
- 279 Water Taxis: King County's Marine Division

280 The Marine Division, which is a part of the Metro Transit Department, provides service 281 from downtown Seattle to West Seattle and Vashon-Maury Island. The Marine Division is 282 guided by the King County Ferry District 2014 Strategic Plan, which was developed 283 while under the King County Ferry District's governance. The plan expresses the vision 284 and goals for passenger-only ferry service in King County for the next three to five years. 285 The strategies are the broad initiatives to pursue the vision and goals, with specific 286 actions listed under each strategy. The plan's vision is to be a leader in regional mobility 287 benefiting the community and economic development needs of King County through 288 providing water taxi service that is safe, reliable, and a great customer experience while 289 being responsive and accountable to the public. The goals are to: 1) provide reliable 290 and safe service; 2) deliver financially sustainable water taxi service; and 3) to integrate 291 water taxi service with the broader regional transportation system and economy. The 292 strategies to achieve these goals include: 1) build on strengths and grow ridership; 2) 293 achieve financial stability; 3) coordinate with regional planning and emergency 294 management efforts; and 4) explore growth and partnership opportunities.

295

Similar to Metro, King County's passenger-only ferries also use cleaner-burning fuels
 such as Ultra Low Sulfur diesel and a blend of biodiesel (B-10).))

298

299 Bus, rail, ((<del>and</del>)) passenger-only ferry<u>, and flexible</u> transit services provide the critical 300 transportation links on which the regional economy depends. ((<del>In addition,</del>)) <u>These</u> 301 public transportation services depend on convenient connections to roads, highways, 302 and ((nonmotorized)) active transportation systems. As the region grows, coordinating 303 ((transit and passenger-only ferry)) public transportation routes and schedules ((among)) 304 across agencies and modes will make public transportation a more viable and 305 convenient option for people traveling in King County. King County seeks input from a 306 broad spectrum of county residents and businesses to identify needs and provide 307 services to meet those needs.

# 308 2. Road System

Travelers in King County use a system of interconnected roads that includes interstate highways, state highways, urban and rural arterials, local access roads, private roads, and forest((t)) and logging roads. King County is responsible for all ((c))<u>C</u>ounty-owned roads, bridges, and related infrastructure in the unincorporated areas of the county, and

must meet the road-related transportation needs of a very large and geographically and demographically diverse service area. The ((e))<u>C</u>ounty's many bridges are an integral part of the road system, as are other components such as sidewalks, shoulders<u>((and))</u> pathways, bicycle lanes, guardrails, stormwater drainage and water quality treatment facilities, traffic control equipment, and traffic cameras. Interstate highways, state highways, city roads<u>a</u> and private roads are not under ((e))<u>C</u>ounty jurisdiction; rather, they are the responsibility of other government agencies or property owners.

320

321 The Strategic Plan for Road Services defines the ((vision and mission)) strategic direction 322 for the King County Department of Local Services - Road Services Division ((.The 323 Strategic Plan for Road Services provides detailed direction for the response to the 324 many complex challenges, including two trends that have had significant impacts on the 325 County's road services. One is that annexations, consistent with the goals of the Growth 326 Management Act, have reduced the urban unincorporated area and therefore the tax 327 base that supports the unincorporated road system has shrunk significantly. By 2024, 328 when the next eight-year Comprehensive Plan update is completed, Road Services 329 Division's responsibilities will likely focus almost entirely on the Rural Area and Natural 330 Resource Lands. A second trend is the decline in County road funding, described in 331 greater detail in Section IV. The Strategic Plan for Road Services guides the Road 332 Services Division)) as it ((is faced with the consequences of a smaller service area and 333 reduced funding and seeks to manage the unincorporated King County road system 334 through focused investment of available resources to facilitate the movement of people, 335 goods and services, and respond to emergencies)) seeks to safely connect communities while addressing a county road funding crisis, widespread and aging infrastructure, and 336 337 historical underinvestment in urban areas.

338

As of winter 2023, ((Ŧ))the ((c))County-owned unincorporated((=)) area road system
 includes approximately:

- ((<del>1,469</del>)) <u>1,469</u> miles of roadway;
- ((<del>181</del>)) <u>185</u> bridges, including several jointly owned with cities;
- 343 <u>275 miles of sidewalks;</u>
- ((<del>78</del>)) <u>79</u> traffic signals;
- ((<del>44,000</del>)) <u>49,000</u> traffic control signs;
- ((<del>50</del>)) <u>57</u> traffic cameras; ((<del>and</del>))
- 347 <u>3.5 million linear feet of drainage pipes; and</u>
- 348 ((<del>114</del>)) <u>118</u> miles of protective guardrail.
- 349

350 The users of the ((c))County road system may travel on foot or by car, public transit, 351 truck, or bicycle, or even on horseback. They may live in an unincorporated area, in 352 ((<del>one of the county's 39</del>)) cities, or in another county. The unincorporated road system 353 supports local trips close to home, commuter trips, the movement of freight and goods, 354 and regional travel between jurisdictions. The system also provides access to outdoor 355 recreational activities in King County((, which has one of the largest concentrations of outdoor recreation enthusiasts in the state)). Public service providers, such as police, 356 fire, emergency medical responders, Metro ((Transit)), and school buses are also key 357 358 users. In total, more than one million daily trips are taken on King County's 359 unincorporated road network. ((During this time of tight budgets, changing 360 communities, annexations, and increasing traffic on aging roads and bridges, the county 361 must manage facilities and services with exceptional care and efficiency.))

362

# 363 3. Air Transportation

364 ((Ŧ)) Established in 1928, the King County International Airport/Boeing Field is located in south Seattle in the Duwamish River Industrial Corridor. It operates on a ((24/7)) twenty-365 366 four hours a day, seven days a week basis and in all weather. ((Established in 1928, the 367 airport is supported by revenue generated by its operations, rather than relying on 368 general tax revenues.)) King County plans, designs, and implements services, 369 programs, and facilities for the King County International Airport in compliance with Federal Aviation Administration regulatory requirements to support a safe, secure, and 370 371 efficient international aerospace system. The airport is also a significant employment 372 center and supports more than ((150)) 50 on-airport aviation-related businesses, 373 including The Boeing Company. The airport is a port of entry for international flights 374 and serves regional air carriers, national and regional cargo carriers, corporate aviation, 375 and general aviation.

376

377 King County International Airport/Boeing Field is the ((34th)) 75th busiest airport in the 378 United States and ranks ((25th)) <u>46th</u> in cargo handling. The airport's air taxi carrier serves 379 the San Juan Islands. It is also the largest corporate aircraft center in the Pacific 380 Northwest. Airport business activities are estimated to support almost ((5,000)) 7,000 direct jobs, plus more than ((16,000)) 9,000 additional jobs in the region. The airport's 381 382 total positive economic impact within the Puget Sound Region and Washington State is 383 more than ((<del>\$3.5</del>)) \$5.2 billion in direct and induced economic activity, including the sale 384 of goods and services, labor income, and tax revenues.

385

396

386 ((The King County Department of Transportation has developed a strategic plan for King County International Airport/Boeing Field. This plan was the result of a strategic 387 388 planning process, which was guided by an advisory committee comprised of Airport 389 Roundtable members and staff from both the executive and legislative branches of King County. The Strategic Plan complements)) The King County International Airport 390 391 Strategic Plan, or successor plans, guides the planning, development, and 392 implementation of airport facilities and services managed by the King County 393 International Airport. Management of the airport is informed by the King County 394 International Airport Master Plan and the Federal Aviation Administration((+))-mandated 395 ((Airport Master Plan and)) Airport Layout Plan.

397 The Bandera and Skykomish Airports, located in eastern King County near the 398 communities of North Bend and Skykomish, are state((-))-owned and operated. Vashon 399 Airport, located on Vashon-Maury Island, is publicly owned and operated by King 400 County Airport Special District Number One. King County does not have operating or regulatory authority over these airports, but does control land use activity adjacent to 401 402 the facilities. ((All airports in the county should make every effort to minimize noise impacts to land uses that are especially sensitive to the effects of noise such as 403 404 residential areas, hospitals and schools.

# 405 E.))II. General Policy Guidance

# 406 ((<del>II. Providing Services and Infrastructure that</del> 407 Support the County Land Use Vision

408 This section of Chapter 8 discusses c))<u>C</u>ounty transportation services and policies ((<del>as</del> 409 they)) support the ((c))<u>C</u>ounty's land use strategy, which seeks to concentrate 410 development and services in urban areas, conserve and enhance the Rural Area((s)) and 411 Natural Resource Lands, and create communities that have a positive effect on public 412 health and climate change. ((<del>One focus of this section is on issues related to the</del> 413 county's responsibilities in the unincorporated area, including Level of Service standards

414 for county roads, transportation concurrency management, mitigation of growth-related 415 impacts, avoidance of road expansion in Rural Areas and Natural Resource Lands, prevention of airport/land use conflicts, and support for nonmotorized transportation 416 417 options. Another focus is on county transportation activities that affect a broader 418 region, notably the four-county region's policy of concentrating development in more 419 densely populated urban areas. King County Metro operates a majority of the transit 420 service in the region and provides transportation demand management services to 421 cities and employers. Consequently, the region's success in achieving its development 422 goals will depend to a great extent on King County's ability to provide appropriate 423 transit services within King County.))

425T-101King County should provide a safe and accessiblesystem of426transportation services and facilities that offers travel options to all427members of the community.

424

428

438

446

450

- 429 ((T-101a)) T-102 King County should seek to ensure that its system of transportation 430 services and facilities equitably serves the mobility needs of 431 ((disadvantaged)) communities with the greatest need, ((and people with limited transportation options, including people of color, low 432 income communities, people with limited English proficiency, 433 immigrant and refugee populations, students, youth, seniors, and)) 434 435 including historically underinvested groups, people with disabilities, 436 people aged 62 years and over, and people with special transportation 437 needs.
- 439((T-102)) T-103As a transportation provider and participant in regional<br/>transportation planning, King County should support, plan, fund,<br/>design, and implement an integrated((;)) and coordinated ((and<br/>balanced)) multimodal transportation system that serves the growing<br/>travel needs of the county safely, equitably, effectively, sustainably,<br/>affordably, and efficiently, and ((promotes a decrease in the share of<br/>trips made by single occupant vehicles)) reduces vehicle miles traveled.
- ((T-103)) T-104 In striving to meet the growing need for transportation services,
   King County shall seek to maximize the efficiency and effectiveness of
   its services, infrastructure, and facilities.
- 451((T-104)) T-105The Strategic Plan for Public Transportation ((2011-2021))2021-4522031, King County Metro Service Guidelines, and ((the King County453Metro Long Range Plan for Public Transportation))Metro Connects, or454successor plans, shall guide the planning, development, and455implementation of the public transportation system and services456operated by the King County Metro Transit Department.457
- 458((T-105The King County Ferry District 2014 Strategic Plan, or successor plans,459shall guide the planning, development and implementation of the460passenger only ferry system and services operated by the King County461Marine Division.))

- 463T-106The King County Strategic Plan for Road Services, or successor plans,<br/>shall guide the planning, development, and implementation of the<br/>unincorporated road system managed by the King County Road<br/>Services Division.4634664645465467
- 468T-107The King County International Airport Strategic Plan, or successor<br/>plans, shall guide the planning, development, and implementation of<br/>airport facilities and services managed by the King County International<br/>Airport.471Airport.
- T-108
  473 T-108
  474
  475
  476
  477
  477
  King County shall ((consider)) evaluate equity impacts and benefits when planning, developing, and implementing transportation programs, projects_z and services, including physical, economic, and cultural displacement risk.
- 478T-109As directed by the King County(('s)) Comprehensive Emergency479Management Plan, King County shall seek to protect its transportation480system against disasters, to the extent possible, by developing481prevention and recovery strategies in partnership with other482jurisdictions and agencies, and coordinating emergency transportation483response.

# 484 A. Land Use and Growth Strategy

485 The transportation element of this Comprehensive Plan is grounded in a firm understanding of the important relationship between land use and transportation. A 486 487 thoughtfully designed transportation system that supports the  $((-))C_{ounty's}$  long-term 488 land use vision and regional growth strategy should provide improved mobility and 489 greater accessibility for all users and contribute to vibrant, thriving communities. 490 Considering the interconnection of land use and transportation can also help address 491 issues like regional affordability by supporting equitable, transit-oriented communities. 492 It should also facilitate more efficient travel that addresses climate change, in part, by 493 ((reduces)) reducing energy consumption, ((and)) greenhouse gas emissions, and other 494 forms of pollution. 495

- 496 Integrated transportation and land use planning is called for at the regional level in 497 ((<del>Vision 2040</del>)) <u>VISION</u>, ((Transportation 2040)) the Regional Transportation Plan, and 498 the Countywide Planning Policies regarding transportation((, which)); these plans and 499 policies outline and support a regional growth strategy built around the concept that 500 additional infrastructure and services are to be provided in areas that accept an 501 increased share of the region's growth. The Countywide Planning Policies' ((-)) 2019-502 <u>2044</u> ((H))housing and ((E))employment ((G))growth ((T))targets (( $\frac{2006-2031}{2000})$  adopted 503 by King County and its cities, represent each jurisdiction's agreed upon fair share of 504 future growth and)) have been incorporated into the travel demand forecast developed 505 for this plan.
- 506

462

507 ((<del>Vision 2040</del>)) <u>VISION</u>, ((<del>Transportation 2040</del>)) <u>the Regional Transportation Plan</u>, and 508 the Countywide Planning Policies also promote the concept of maximizing mobility 509 choices through a multimodal approach to moving people, goods, and services 510 efficiently within and beyond the region. Travel to and within regional and countywide 511 growth centers is emphasized, with a focus on the availability of transit and 512 ((nonmotorized modes)) active transportation facilities in centers. These urban centers 513 are characterized by compact, pedestrian-oriented development((7)) with a mix of 514 ((<del>different</del>)) office, commercial, civic, entertainment, and residential uses ((<del>and</del>)) <u>that</u> can 515 be efficiently and cost-effectively served by transit and ((nonmotorized travel)) active 516 transportation options. In addition, these regional plans and policies address the 517 importance of protecting and preserving the Rural Area and Natural Resource Lands

- and avoiding construction of major new roads and capacity expansion on existing roads
   in <u>the</u> Rural Area((<del>s</del>)) and Natural Resource Lands.
- 520

521 Metro's Strategic Plan for Public Transportation, Service Guidelines, and Metro 522 Connects also emphasize the importance of integrated transportation and land use planning in providing an integrated mobility network that advances policy goals related 523 524 to equity, climate change, transit-oriented communities, and others. A multimodal 525 transportation system supports healthful choices by providing greater access to 526 housing, jobs, schools, medical care, healthy food, shopping, recreation, and other 527 services - all of which contribute to a high quality of life. Designing highly connected 528 communities that support safe ((nonmotorized travel)) active transportation and 529 ((facilitate nonmotorized)) access to the transit system without a car reduces the overall 530 cost of living by controlling or lowering transportation costs, reduces vehicle miles 531 traveled, reduces air pollution, and leads to opportunities for greater levels of physical 532 activity ((through walking and bicycling)).

533

538

Regional and countywide guidance also encourages innovative approaches to
transportation and land use management, including Transportation Demand
Management strategies designed to reduce vehicle miles traveled, single-occupant
vehicle trips, and greenhouse gas emissions.

539 ((Metro operates transit service throughout King County, including in cities, while the 540 county's road system service area is limited to the unincorporated area. Due to 541 annexations and incorporations, the unincorporated road system is transitioning to 542 become primarily rural.)) In the Rural Area and Natural Resource Lands, protection of 543 natural resources, agriculture and forestry, and the rural lifestyle and character are a 544 high priority. ((At the same time)) However, there is still a ((certain)) limited amount of 545 growth within the Rural Area and on Natural Resource Lands, ((as well as high)) 546 significant growth in some adjacent Cities in the Rural Area, ((<del>or</del>)) and growth beyond 547 the county's boundaries((-7)) that must be considered in managing the road system. 548

549 ((The county's urban areas, Rural Areas and Natural Resource Lands form a complex 550 landscape, and the urban/rural boundary is not a simple straight line. As a result, t))The 551 ((<del>c</del>))<u>C</u>ounty's arterial network weaves through ((<del>both</del>)) urban areas, <u>the</u> Rural Area((<del>s</del>)). 552 and Natural Resource Lands as it facilitates regional mobility. This ((complex 553 urban/rural/resource pattern)) presents challenges to planning for the region's mobility 554 needs and providing safe and adequate roadways. ((Issues include regional arterial 555 corridors that link designated urban areas by crossing Rural Areas and Natural Resource 556 Lands, and roads located in the Urban Growth Area)). High traffic volumes on ((these)) 557 roads in the Rural Area and Natural Resource Lands may necessitate road improvements 558 to ensure safe and efficient travel. However, it is critical to ensure that appropriate 559 development regulations and access management strategies are first in place ((in 560 order)) to prevent unplanned and unwanted growth in the Rural Area((s)) and Natural 561 Resource Lands.

562

566

((Growth management envisions different landscapes and infrastructure for urban and
 rural communities. King County is committed to managing its transportation system
 consistent with that vision.))

((T-201)) T-110 King County prioritizes multimodal transportation options in the
 urban areas, where they are most effective. ((Multimodal transportation
 options such as public transportation, bicycling and walking, are most
 effective in densely developed urban areas. As resources allow;)) King
 County's transportation investments in urban areas should emphasize
 public transportation and road services and facilities that support
 multiple modes and facilitate connections between them.

- 575((T-202)) T-111 ((As resources allow,)) King County's transportation investments in576the Rural Area((s)) and Natural Resource Lands should emphasize577maintaining, ((and)) preserving, and, where appropriate, providing578flexible service options and safe road infrastructure that is compatible579with the preservation of rural character and does not promote urban or580unplanned growth.
- 582
   ((T-202a)) T-112
   In areas not well suited to fixed((-))-route transit, the

   583
   ((c))County should work with partners to develop a range of

   584
   ((alternative)) flexible service options ((such as community shuttles,

   585
   real-time rideshare, community vans and other innovative options)),

   586
   consistent with Metro plans and policies.

   587
- 588((T-203)) T-113 ((As funding permits,))King County should partner with589jurisdictions and the private sector to spur infrastructure investments590that enhance safe, equitable, and accessible opportunities for transit,591pedestrians, bicyclists, carpools and van((-))pools, and other592alternatives to single-occupant vehicles.
- 593 <u>B.</u> Level of Service Standards

581

611

627

((The Growth Management Act requires Level of Service standards for all arterials and transit routes to judge performance of the transportation system. The Growth Management Act also calls for specific actions and requirements for bringing into compliance facilities or services that are not meeting the adopted Level of Service standard. King County's Level of Service standards comply with growth management policies of encouraging growth in the urban area while restricting growth in the Rural Area and Natural Resource Lands.))

602 Level of service for arterials is a qualitative measure that describes traffic flow and is 603 often represented by a system using the letters A through F. Level of Service A 604 represents the least-congested conditions and Level of Service F represents the most-605 congested conditions. Level of Service B is indicative of stable traffic flow. However, 606 unlike Level of Service A, operating speed is beginning to be restricted by other traffic. 607 At Level of Service E, operation is unstable, and speeds are reduced but will fluctuate 608 widely from point to point. ((There is little independence of speed selection and 609 maneuverability at Level of Service E.)) Level of Service F is indicative of forced flow of 610 traffic with extremely low speeds and long delays at intersections.

612 ((King County has been one of the most successful jurisdictions in the state in 613 implementing the Growth Management Act by directing growth to urban areas and 614 encouraging annexation by cities, which are the preferred provider of municipal services. As a result, the majority of the urbanized area is contained within cities and the 615 616 final remaining urban unincorporated islands are expected to annex by 2020. While 617 annexations have helped support the County's land use, density and service goals, 618 unincorporated King County no longer has the tax base to support growing travel 619 needs with transportation capacity improvements in the urban area. The urban pockets 620 that remain are influenced by development in surrounding cities and during the peak 621 travel times commute travel is heavily impacted from people traveling to and from cities 622 and other counties.)) 623

In the remaining urban pockets of unincorporated King County, road usage is heavily
 impacted by development in the larger surrounding cities; however, there are more
 travel choices available in these areas. The urban level of service reflects these factors.

628 ((King County recognizes a profound difference between t))The differences in the nature
 629 and character of the Rural Area and Natural Resource Lands as compared with the
 630 urban area ((and therefore sets)) means that ((±))level of ((5))service standards for
 Transportation - Page 8-13

arterials ((to)) allow less congestion in the Rural Area and Natural Resource Lands. In the 631 632 Rural Area and Natural Resource Lands the ((vast)) majority of the road network 633 operates at Level of Service B; however, there are key arterials (typically the Rural 634 Regional Corridors) that are frequently congested from carrying traffic from one urban 635 area to another, and these often operate at a Level of Service C or lower.

636 637 In addition, King County recognizes ((certain areas, called)) that Rural Towns, or Rural 638 Mobility Areas, ((where)) have land use designations that support a greater variety of transportation mode choices. The  $((\underline{t}))$  evel of  $((\underline{s}))$  ervice standards for <u>Rural</u> Mobility 639 640 Areas are set to recognize these greater choices and support and encourage people to 641 use forms of transportation other than ((cars)) single-occupant vehicles. ((The Rural 642 Mobility Areas are the Rural Towns of Vashon, Snoqualmie Pass and Fall City.))

684	<u>T-118</u>	The appropriate levels of service for King County Metro transit services
685		shall be established in Metro's Strategic Plan for Public Transportation,
686		the King County Metro Service Guidelines, and Metro Connects, or
687		successor documents.

# 688 C. Travel Forecasts

Travel demand forecasts are used to project transportation system needs. They provide
an important link between land use and transportation. The Puget Sound Regional
Council's Forecasting Model uses regionally adopted growth targets for the year
((2031)) 2050, and was used to develop the travel demand forecasts for this plan, the
Transportation Appendix, and the Transportation Needs Report Appendix.

694

703

714

715

716 717

718

719

695 ((Recent generations of the Puget Sound Regional Council model have increased the
 696 level of detail in unincorporated King County, allowing improved analysis of future
 697 transportation system performance and system improvement needs, within the
 698 framework of growth management and regional and county policy guidance regarding
 699 appropriate urban and rural levels of service.))

# 700 <u>D</u>. Impact Mitigation

701 ((The State Environmental Policy Act establishes environmental review of project
 702 impacts on all elements of the environment including transportation.

- T-225)) T-119 Needed rights-of-way, strategies to manage transportation
   demand, and off-site improvements should be identified and required
   as conditions of development approval to the extent that such
   conditions are directly related to impact mitigation.
- ((<del>T-226</del>)) <u>T-120</u> King County shall encourage the development of highly connected,
   grid-based arterial and nonarterial road networks in new developments
   and areas of in((-))fill development. To this end, the ((-))County should:
   a. Make specific findings at the time of land-use permit review to
   establish a nonarterial grid system for public and emergency access
  - establish a nonarterial grid system for public and emergency access in developments; and
  - b. Require new commercial((7)) <u>and</u> ((<del>multifamily,</del>)) <u>multiunit</u> <u>developments</u> and residential subdivisions to develop highly connective street networks to promote better accessibility and avoid single street((-))-only access.
- ((<del>T-227</del>)) <u>T-121</u> Development proposals should extend the public road system
   through dedication when the extension is in the public interest.
   Conditions that may warrant such an extension include, but are not
   limited to, impacts on neighborhood circulation, increases in the use of
   arterials for local vehicular trips, reductions in traffic safety through
   uncoordinated and inadequately spaced street access to arterials, and
   restrictions on the availability of alternative emergency access routes.

728	((T-228)) T-122 As mitigation for the impacts of new development and as a
729	condition of development approval, King County shall require the
730	improvement of existing off-site roadways and undeveloped road
731	rights-of-way, and other strategies to reduce demand on roads.
732	Impacts that may warrant such mitigation include, but are not limited
733	to, those that create safety concerns, raise road operational issues, or
734	increase the number of residences served by a single access route.

# 735 ((<del>E. Financing</del>

736 Fully achieving King County's transportation goals depends on adequate funding for 737 transportation system and service needs. This section discusses the extent to which the 738 transportation system and services can be funded within a reasonable revenue forecast and expenditure schedule. The Growth Management Act requires the county to include 739 740 an analysis of funding capabilities, a multiyear financing plan based on needs, and a 741 discussion of how to raise additional funds to build needed transportation projects, or 742 to reassess growth and Level of Service standards to resolve potential funding shortfalls 743 in a ten-year time frame. This analysis is provided in the Transportation Needs Report 744 and summarized below.

745

# 746 D)) <u>E</u>. Funding Priorities ((Consistent with Transit and Road Strategic Plans

748 C. Public Transportation Revenue Sources

# 749 1. Metro Transit

King County Metro Transit's)) Metro's budget provides for both the operating and
 capital needs of its public transportation system. The operating budget funds Metro's
 broad range of public transportation services. The capital budget provides for transit
 facilities needed to operate Metro's services, such as maintenance and bus storage
 facilities, transit centers and park-and-ride((s)) lots, bus shelters and other passenger
 facilities, buses, and non-revenue vehicles.

757 Metro's primary source of revenue, a 0.9((%)) percent sales tax (the maximum authorized by the state), provides ((approximately 54%)) more than half of Metro's 758 759 revenues. This rate has been in effect since late 2006, when voters approved a 0.1((%))760 percent increase as part of the Transit Now initiative. Sales tax is a highly volatile 761 revenue source because it fluctuates with changes in economic conditions. It is also 762 regressive, as people with lower incomes spend a larger portion of their income on sales tax than people with higher incomes. Metro has had to rely more on sales tax 763 764 since 2000, when the Washington legislature eliminated the motor vehicle excise tax for 765 transit.

766

767 ((Beginning in 2009, King County levied a 5.5 cent property tax to support transit.)) King 768 County levies a 1.25 cent property tax for ferry service and a 5.5 cent property tax for 769 other Metro transit services. Fares paid by users of Metro's system ((and transit 770 advertising revenues)) provided about ((a quarter)) 15 percent of Metro's operating 771 revenues before the COVID-19 pandemic and about five percent of operative revenues 772 in 2022. ((Metro also receives)) Other sources of revenues include: federal and state 773 grants, ((that)) which can fluctuate significantly and contribute primarily to capital 774 expenses, and revenues from vanpool operations, investment income, and service partners. Examples of service partnership funding include revenue from Sound Transit 775

for operating Link light rail and Sound Transit Express, and from the City of Seattle;
 these sources account for about 15 percent of Metro's total operating revenue.

((The Great Recession and a slower than normal recovery took a major toll on Metro's largest revenue source, sales taxes. After the 2008 recession caused a steep drop in sales tax revenue, Metro took action to preserve transit service by cutting costs, raising fares, and making a host of fiscal reforms. Metro's ongoing efficiency gains, projections of lower fuel costs, improved sales tax forecasts and other financial improvements enabled the County to adopt a 2015/2016 budget and six-year financial plan that does not envision future service cuts.

Beginning in 2011, sales tax revenues began to recover and by 2015, sales tax receipts
 have been restored to pre-recession levels in terms of purchasing power. The near term
 outlook is for continued growth; however this is tempered by the reality and need to
 plan for economic downturns. Over the last 50 years there has been, on average, a
 recession every eight years. The county's financial policies and reserve requirements
 help Metro plan for the eventuality of economic downturns.

In November 2014, Seattle voters approved funding for additional transit service. The
 City of Seattle subsequently entered into a contract with King County to purchase Metro
 service through the County's Community Mobility Contracts Program. Seattle will
 expand service on Metro routes that serve the city by about 10%. Additionally, Metro
 will leverage Seattle's Regional Partnership Fund created as part of the voter approved
 measure to improve transit service for suburban commuters through regional
 partnerships. This funding is scheduled to expire after 2020.))

801

778

786

802 The COVID-19 pandemic added uncertainty to Metro's financial situation, particularly 803 due to the pandemic's impact on ridership and the resultant fare revenue impacts. The 804 need remains for long-term, sustainable funding that fully meets King County's current 805 and future demand for ((bus)) transit service. The need for transit outlined in Metro 806 Connects exceeds Metro's current funding capacity for service, and the funding gap will only increase as Metro moves toward the 2050 service network, which envisions 807 808 approximately 70 percent more transit service. Metro will not be able to grow its system 809 as planned without significant amounts of new, sustainable funding. Funding source 810 volatility has a uniquely negative impact on service growth and capital program 811 <u>development.</u>

812

813 ((Metro will continue striving for efficiency improvements to make the most of every
 814 available transit dollar, and county leaders have pledged to continue working for a
 815 statewide transportation funding solution. Over the coming years, Metro will continue
 816 to take actions to stabilize its finances and improve the efficiency and effectiveness of
 817 service delivered as state, county and local officials work on a long-term transit funding
 818 solutions.

# 819 D. Road-Related Funding Capabilities))

King County ((is experiencing)) has a structural roads funding crisis, largely due to municipal annexations, ((the 2008 recession, declines in)) Washington State's outdated tax system, stagnant gas tax revenues, the effects of voter initiatives, and an aging bridge and road system. The lack of revenue is significantly impacting the ((c))County's capacity to maintain and improve roads. Regional growth over the last few decades has resulted in higher traffic volumes and congestion, contributing to the deterioration of the County's road network.

827

King County receives road revenues from a variety of sources, including a dedicated
 unincorporated King County property tax, ((federal and state grants,)) gas tax, federal
 and state grants, and local taxes ((and road mitigation payments from private)

developments)). The dedicated property tax and gas tax provide the largest portion of 831 832 funding for the Road Services Division (((71% in 2014)) 76 percent in 2023). The property tax is tied to the assessed value of properties in unincorporated King County. 833 834 The County road system and its funding mechanisms predate growth management. 835 After annexation of high-property value properties into cities, the County's unincorporated area tax base is small relative to the size and age of the unincorporated 836 837 road system. In King County, 13 percent of the total population pays for the roads that 838 support more than one million trips every day.

839

840 ((<del>During the recession, property values in unincorporated King County dropped sharply.</del> 841 While the economy has shown signs of recovery, future growth in revenues is 842 significantly limited by state law and is not predicted to recover in real terms during the 843 horizon of this plan.)) Property tax growth is capped at one percent annually, a pace 844 slower than the ongoing growth in the cost of delivering services or the rate of inflation. 845 Washington State's outdated tax system limits the County's ability to leverage revenue 846 sources to support its funding needs. Local governments, like King County, need the flexibility and tools to help implement a more effective tax system and to preserve and 847 848 maintain local roads. Gas tax revenues ((have been)) are flat, in part because of 849 increased vehicle((<del>s that are more fuel efficient</del>)) fuel efficiency, lower sales of gas due to 850 ((the)) economic conditions, changing driving patterns, and a decline in the revenue 851 allocation to King County due to the reduction in road miles from ((recent)) annexations. 852

853 Grant funding supports important road projects, but grants alone, even sizeable ones,
854 will not be sufficient to address the current and growing volume of unmet road and
855 bridge needs. In addition, grants typically fund capital projects, are rarely available for
856 maintenance and operations, and are an unpredictable and unreliable source of
857 funding due to the competitiveness of the grant process.

859 The County has consistently pursued structural funding solutions through regional
 860 collaboration. However, solutions to address the estimated \$250-400 million annual
 861 funding gap are still needed at the local, regional, and state level, including:
 862

863 ((In August 2015, a panel regional leaders and community members began meeting to 864 explore solutions for maintaining and preserving the aging bridge and road system in 865 unincorporated King County. The Bridges and Roads Task Force membership included 866 neighbors, representatives from agriculture and recreation organizations, road experts 867 and public policy leaders. In January 2016, the Task Force recommended a host of reforms and funding principles. The Task Force identified the range of the Roads 868 869 funding gap as \$250 to \$400 million a year, and generated 152 recommendations to 870 address that gap. Among the recommendations were the following:

((Revenue:)) Authority from the state Legislature for a fair, non-regressive, sustainable countywide revenue tool ((that is)) tied to inflation((, is sustainable over the long-term, and)) that provides a benefit to both cities and the County. ((The Task Force recognized that the most successful approach may involve using multiple revenue tools and efficiencies with some additional resources dedicated to city transportation needs.))

877 • ((Infrastructure: Authority)) Support from the state Legislature ((that provides for cities to annex orphan)) to facilitate the annexation of County roads ((that lie)) inside ((their)) and adjacent to city boundaries((;)) and ((supports)) annexation of Potential Annexation Areas ((within the growth boundaries of those cities)).

Without additional funding, it is increasingly difficult to monitor, maintain, operate,
 repair, and improve the system of bridges and roads in unincorporated King County.
 Aging infrastructure and maintenance facilities, and an inability to adequately invest in
 infrastructure asset management, have resulted in a system of roads, bridges, and

887 buildings in decline and at risk of failure. Without the resources to perform timely 888 preventative maintenance, the County is forced into a more reactive maintenance 889 mode. Deferring maintenance leads to an exponential increase in the cost to repair and 890 sustain roads in the future.

891

902

907

911

919

921

930

931

932

933

934

892 Financial viability to support the operation of the road system and provide for capital 893 construction and preservation needs is tested over two ((time frames)) timeframes for 894 the Comprehensive Plan. The Transportation Needs Report, the  $((\tau))$ County's 20-year 895 transportation plan, identifies the road-related investments needed to support the land use vision of the ((<del>County's</del>)) Comprehensive Plan. The ((<del>20-year plan</del>)) Transportation 896 897 Needs Report provides an assessment of revenues projected from currently available 898 resources and identifies reasonable options for securing additional revenues over the 899 life of the plan. Secondly, the biennial update of the  $((\tau))$  Boads Capital Improvement 900 Program examines the specifics of how to implement the financing plan over the next six 901 years.

- 903 ((T-401)) T-123 Financial investments in transportation should support a 904 sustainable((,)) transportation system, consistent with the priorities 905 established in ((the King County Strategic Plan and)) each department 906 and division's strategic plan or other functional plans.
- 908 ((<del>T-402</del> King County should fund services, operations, and capital facilities that 909 support local and regional transportation and land use goals and result 910 in a balanced, multimodal transportation system.
- 912 T-403)) T-124 ((The unincorporated county road system provides transportation 913 connections for large numbers of users that travel through the Rural 914 Area and Natural Resource Lands to reach adjoining cities, other 915 counties or regional destinations.)) King County should ((seek)) pursue 916 and support regional planning and funding sources that ((could be used t<del>o repair and maintain the arterial system</del>)) <u>recognize the</u> 917 interdependent, cross-jurisdictional nature of the region's 918 transportation system, including impacts of urban development on the 920 rural area transportation network.
- 922 ((T-404)) T-125 When funding transportation projects in areas where annexations 923 or incorporations are expected, King County should seek interlocal 924 agreements with the affected cities and other service providers to 925 provide opportunities for joint grant applications and cooperative 926 funding of improvements.
- ((D. Revenue Shortfall)) 927

928 The state Growth Management Act provides guidance for managing a revenue shortfall. 929 The following actions can be used to balance the funding shortfall of the plan:

- 1. Reduce transportation funding needs;
  - 2. Develop new revenue options;
  - 3. Change ((<del>L</del>))level of ((<del>S</del>))service; or
- 4. Change land use.
- 935 ((T-405)) T-126 During review of its Comprehensive Plan, King County should 936 consider and address any potential shortfalls likely to occur between 937 expected revenues and costs to maintain, preserve, and improve 938 transportation infrastructure and service levels. Such review could 939 include a reassessment of land use, growth targets, ((t))level of 940 ((S))service standards, and revenue availability. 941

942	(( <del>T-406</del> )) <u>T-127</u> King County shall continually work to improve the efficiency of its
943	operations and delivery of projects and services ((in order to minimize
944	t <del>he need for new revenue sources</del> )).
945	
946	(( <del>T-407</del> )) <u>T-128</u> (( <del>New funding sources should be identified and pursued that</del>
947	provide adequate and sustainable resources for transportation system
948	investments.)) <u>To provide adequate and sustainable resources for</u>
949	transportation services, infrastructure, and facility improvements, King
950	County shall maximize its efforts to obtain federal and state funding
951	and should identify and pursue new funding sources, including
952	leveraging partnership opportunities, grants, and other cooperative
953	<u>funding mechanisms.</u> These funding sources should not be regressive,
954	and whenever possible, provide multi((-))jurisdictional benefits.
955	
956	(( <del>T-408 King County should leverage partnership opportunities, grants and</del>
957	other cooperative funding mechanisms to help finance transportation
958	services, infrastructure and facility improvements.

0,0	

# 960 961

962

972

980

King County shall maximize its efforts to obtain federal and state T-409 funding for its transportation services, infrastructure and facility improvements.))

### F. Climate Change, Air Quality, and the 963 Environment 964

965 Clean air and minimizing greenhouse gas emissions contribute((<del>s</del>)) to the health of people, ((the)) ecosystems, and the economy. ((Transportation is the primary source of 966 air pollutants regionally. In addition to complying with state and federal regulations 967  $\frac{described}{described}$  below, t))The ((c))County is working to reduce transportation-related 968 969 emissions, which are the primary source of air pollutants regionally and a major driver of 970 climate change. ((through the policies and actions contained in this Comprehensive 971 Plan.

973 The Washington State Clean Air Conformity Act establishes guidelines and directives for 974 implementing the federal Clean Air Act Amendments. It specifically links air quality 975 conformity to growth management planning efforts at the local and regional level. The 976 King County transportation system complies with the federal and state Clean Air Acts by 977 maintaining conformity with the Puget Sound Regional Council Transportation 2040 978 plan and by following the requirements of Chapter 173-420 of the Washington 979 Administrative Code.

981 Climate change is of significant local, national and global concern. It is clear that 982 greenhouse gas emissions from transportation sources are a significant contributing 983 factor to climate change. In addition to meeting its regulatory requirements, King 984 County is committed to addressing climate change through its decisions and actions 985 and encouraging others to act to reduce greenhouse gas emissions as well. Climate 986 change is projected to increase the frequency of flood events in most of western 987 Washington's river basins. Increased flood frequency and intensity will increase public 988 investment needed to ensure public safety and mobility, particularly on the county road 989 system. Climate change will affect the county's road and transit infrastructure. More 990 storm events and increased temperatures will disrupt service, increase road 991 maintenance requirements and adversely affect mobility. Changes in precipitation 992 patterns and sea levels may cause greater damage to roads, bridges and seawalls from 993 erosion, landslides, and flooding.

994

995 The goals and activities of King County departments and agencies that provide 996 transportation services in King County are integrally linked to the County's strategies

997 and activities for addressing climate change. This linkage was refined in the County's
 998 2012 Strategic Climate Action Plan, with an entire chapter focused on the operational
 999 and service targets related to transportation and land use. The Strategic Climate Action
 9100 Plan identifies clear performance targets (how much change is the County attempting to
 1001 achieve) and strategies and priority activities that reduce greenhouse gas emissions. It
 1002 allows for the reporting of strategies, program activities, and performance measures
 1003 related to climate change in one location.

 1005 The updated 2015 Strategic Climate Action Plan provides a mechanism to evaluate 1006 progress since the 2012 Strategic Climate Action Plan and refines strategies and 1007 program activities to achieve the objectives of reducing greenhouse gas emissions and 1008 adapting to climate change impacts.))

1004

1009

1025

1026

1027

1028

1029

1030

1031

1032

1033

1034

In addition to reducing transportation-related greenhouse gas emissions, King County must also prepare County roads and transit infrastructure for climate change. More extreme heat events, heavier rain events, and sea level rise increase the potential for damage to roads, bridges, and sea walls, particularly as infrastructure ages. This can result in higher maintenance costs, more service disruptions, and mobility impacts. Increased flood impacts will require public investment to ensure public safety and mobility, particularly on the County road system.

1018King County transportation services are integral to implementing the Strategic Climate1019Action Plan. The Strategic Climate Action Plan sets transportation-related greenhouse1020gas reduction goals and guides the planning, development, prioritization,1021implementation, and tracking of County actions, such as linking transportation and land1022use, developing community-driven transit, and creating climate-resilient transit1023infrastructure and services.

((T-320)) T-129 Transportation improvements should be designed, built, and operated to minimize air, water, and noise pollution, greenhouse gas emissions, and the disruption of natural surface water drainage in compliance with provisions and requirements of applicable federal, state, and local environmental regulations. Natural and historic resource protection should also be considered. Particular care should be taken to minimize impacts where the location of such facilities could increase the pressure for development in critical areas or <u>the</u> Rural Area((s)) and Natural Resource Lands.

- 1035
   T-130
   King County should proactively identify barriers to fish passage created

   1036
   by existing County roads and prioritize multiple-benefit solutions that

   1037
   enhance high-priority habitats and address critical roadway

   1038
   maintenance and preservation needs.
- 1040 ((T-321)) T-131 ((Within new developments, King County supports designing and 1041 building roads, bicycle facilities, pedestrian ways and trails in ways that 1042 minimize pollution, provide opportunities for physical activity, promote 1043 energy conservation,)) King County, through its Comprehensive Plan policies and development regulations, should support healthy 1044 1045 community, road, and other transportation infrastructure designs that 1046 enable active transportation and public transit use, increase community 1047 cohesion, reduce greenhouse gas emissions, and preserve natural 1048 ((flora and wildlife)) habitats. 1049

1050	(( <del>T-322</del> )) <u>T-1</u>	<u>32 Through its own actions and through regional partnerships, King</u>
1051		County ((will promote)) shall pursue strategies to reduce emissions
1052		from the transportation sector <u>, including((. The county will promote</u> ))
1053		new vehicle technologies, the use of low-carbon fuels, (( <del>and strategies</del>
1054		to reduce greenhouse gas emissions, including)) land use changes,
1055		investment in equitable transit-oriented development, provision of
1056		transit, promotion of (( <del>nonmotorized travel</del> )) <u>active transportation</u> , joint
1057		purchasing, pilot projects, and actions to reduce vehicle miles traveled.
1058		parenasing, prot projects, and actions to reduce venicle nines travered.
1059	T-133	King County shall increase the share of its fleet that is electric vehicles,
1060		as guided by County policies.
1061		as guided by county policies.
1062	(( <del>T. 323</del> )) T.1	34 King County (( <del>will</del> )) <u>shall</u> strive to become a world leader in the use
1063		of transportation fuels and technologies that reduce operational
1064		greenhouse gas emissions from its fleets and vessels. King County
1065		(( <del>will</del> )) <u>shall</u> achieve this goal by:
1065		a. (( <del>b</del> )) <u>B</u> uying (( <del>hybrid-electric,</del> )) electric, zero-emission, and other clean
1067		transportation technologies <u>when feasible to meet operational needs</u> ;
1068		<u>b. ((tr))U</u> sing clean fuels in its fleets and vessels;
1069		<u>c.</u> (( <del>i</del> )) <u>I</u> mplementing demonstration projects that use alternative fuels
1070		and technologies;
1071		<u>d. ((<del>p</del>))P</u> urchasing locally((-)) produced energy sources when practical;
1072		<u>e.</u> (( <del>s</del> )) <u>S</u> eeking local and federal support to expand the use of
1073		low-carbon fuels and alternative, zero(( <u>—))-</u> emission technologies;
1074		(( <del>and</del> ))
1075		<u>f. ((p))P</u> romoting best practices, innovations, (( <del>trends</del> )) and
1076		developments in transportation fuels and technologies(( <del>.</del> )) <u>; and</u>
1077		<u>g.</u> (( <del>The county will also s</del> )) <u>S</u> eek <u>ing</u> to deploy and use its vehicles in an
1078		energy-efficient manner through vehicle routing, idling-reduction, and
1079		operator practices.
1080		
1081		King County will incorporate climate change impacts information into
1082		construction, operations, and maintenance of infrastructure projects.
1083		The department will incorporate climate change into its planning and
1084		design documents and also develop strategies to incorporate climate
1085		change response into the design and operations of its transportation
1086		structures and services.))
1087		
1088	(( <del>T-324a</del> )) <u>T-</u>	<u>135</u> King County (( <del>will</del> )) <u>shall</u> reduce greenhouse gas emissions from its
1089		off-road vehicles and equipment by using low-carbon fuels and
1090		advanced technologies, and by partnering with other agencies to
1091		implement demonstration projects using these vehicle technologies.
1092		
1093	(( <del>T-325</del>	King County will develop methods to evaluate the climate change
1094		impacts of its actions and transportation services and will implement
1095		climate sensitive strategies and practices consistent with the
1096		environmental sustainability goals and policies described in Chapter 5,
1097		Environment, as well as existing state, regional and local plans, laws,
1098		and regulations.
1099		
1100	<del>T-326</del>	To the extent practicable, future expansion or redevelopment of the
1101		county's road stormwater infrastructure should minimize pollutant
1102		discharges and flow alterations by mimicking the natural drainage
1103		system or preserving the ability to create such a system in the future.))

1104 <u>1. Electric vehicles</u>

1105 <u>Transportation emissions - primarily from passenger cars and trucks - are the biggest</u>
 1106 <u>source of carbon pollution in Washington, accounting for 39 percent of total</u>
 1107 <u>greenhouse gas emissions in 2019. Supporting the transition of private cars and trucks</u>

	and 19555)) xxxxx (Proposed Ordinance 2023-0440)
1108	to electric vehicles will lead to fewer climate-altering pollutants, improved air quality,
1108	lower maintenance and fueling costs for car owners, and reduced pollution exposure for
1110	
1110	communities along major transportation corridors.
	The Constants Climate Action Discourses to efforts to encoderate the enlastice of electric
1112	The Strategic Climate Action Plan supports efforts to accelerate the adoption of electric
1113	vehicles while ensuring the equitable distribution of benefits of electric vehicles and
1114	promoting equitable access to mobility that prioritizes shared mobility solutions. The
1115	Strategic Climate Action Plan sets the following targets for the share of new vehicles
1116	sold that are electric vehicles by 2035: 100 percent of light-duty vehicles, 50 percent of
1117	medium-duty vehicles, and 28 percent of heavy-duty vehicles. King County and the
1118	State have adopted regulations requiring electric vehicle charging infrastructure be
1119	provided with new and substantial improvements to residential and nonresidential
1120	development. Washington State has also developed the Washington State Plan for
1121	Electric Vehicle Infrastructure Deployment and has set a target that all model year 2030
1122	and later passenger and light-duty vehicles that are sold, purchased, or registered in
1123	Washington be zero-emission vehicles. The State also mandates that all new vehicles
1124	must be zero-emission vehicles from model year 2035 onward.
1125	
1126	Challenges remain for equitable access to electric vehicles due to higher vehicle costs
1127	and access to charging infrastructure. On average, electric vehicles have a higher
1128	purchase price, though they are less expensive to own overall. Additionally, people
1129	who live in older multiunit or rental housing face barriers to securing electric vehicle
1130	charging at home, as tenants do not have property control and property owners have
1131	few incentives to install charging equipment. Constricted charging supply is
1132	exacerbated by existing disparities, as historically underinvested families
1133	disproportionately rent. However, there are some state and federal financial incentives
1134	<u>available</u> .
1135	
1136	T-136 King County should support expansion of private electric vehicle use
1137	and the provision of necessary charging infrastructure, including
1138	opportunities to improve equitable access to the benefits of electric
1139	vehicles and geographically dispersed access to public vehicle
1140	charging at King County-owned facilities and at partner locations, by
1141	taking action such as convening partners and leading grant proposals,
1142 1143	administering grants, and supporting regional planning for electric vehicle infrastructure.
1143	venicie infrastructure.
1145	T-137 King County should support expansion of private electric vehicle
1146	freight use and the geographically dispersed charging infrastructure
1147	necessary to enable the emission-free movement of goods traveling
1148	throughout the county, regionally, nationally, and internationally.
1149	III. <u>Multimodal Transportation</u> ((Ensuring Effective
	Management and Efficient Operations
1150	5
1151	This section contains policy direction to guide the ongoing design, maintenance,
1152	operation and management of the county transportation system to provide for safety,
1153	efficiency and sustainability. It is consistent with the King County Strategic Plan, which,
1154 1155	as a component of the county's Performance Management and Accountability System,
1166	

1155 provides the foundation for managing the performance of county services. The
 1156 Strategic Plan for Public Transportation, and the Strategic Plan for Road Services, as
 1157 transportation functional plans, provide the detailed guidance on operational issues
 1158 and also address transportation performance measurement and reporting.))

((<del>2016</del>)) <u>2024 King County</u> Comprehensive Plan - ((<del>updated December 6, 2022</del>)) <u>Adopted TBD</u> <u>Attachment A to</u> Ordinance ((<del>18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555</del>)) xxxxx (Proposed Ordinance 2023-0440)

## 1159 A. Public Transportation System

1172

1180

1181

1182

1183 1184

1185

1186

1187

1188

1189

1160 Metro ((and the Marine Division)) plays an important role in achieving the region's 1161 growth strategy by focusing public transportation services in the  $((\frac{1}{2}))$ Urban  $((\frac{1}{2}))$ Growth 1162  $((\frac{1}{2}))$  Area of King County and providing service to designated regional, countywide, and other centers and ((other)) areas of concentrated activity. Centers and other 1163 1164 communities that are compact and ((friendly to pedestrians and bicycles)) designed to 1165 prioritize walking and biking are most easily served by transit. Such communities foster 1166 healthier, more active lifestyles while reducing ((auto)) vehicle dependency and 1167 associated road investments. By the same token, transit service can support and 1168 encourage development that is more compact. Metro's Service Guidelines describe the 1169 types of land uses that support different types of transit service. Metro's Strategic Plan 1170 for Public Transportation and Metro Connects direct Metro to support equitable, 1171 affordable, transit-oriented communities and development.

 ((Metro and the Marine Division support municipal, agency and private development of transit-supportive, pedestrian- and bicycle-friendly communities through partnership, coordination and delivery of public transportation services. Metro also promotes partnerships to implement transit-supportive infrastructure to improve access to transit.
 Metro also partners with jurisdictions and the private sector to spur transit-oriented development through redevelopment opportunities at or adjacent to park-and-rides.

#### T-204)) <u>T-201</u> King County should support local and regional growth plans and policies by focusing transit services on centers and other areas of concentrated activity.

((<del>T-205</del>)) <u>T-202</u> King County should support, encourage, and implement high-capacity transit facilities and services that are consistent with, and supportive of, the Comprehensive Plan, Metro's Strategic Plan for Public Transportation, Metro's ((<del>Long Range Plan for Public Transportation and the King County Ferry District 2014 Strategic Plan</del>)) Service Guidelines, and Metro Connects, or successor plans.

## 1190 <u>B.</u> Public Transportation Policies and Service1191 Guidelines

1192 Metro is committed to ((using)) delivering a regional, innovative, and integrated mobility 1193 network that is safe, equitable, and sustainable. To do this, Metro must invest in line 1194 with its values and policies, use resources wisely, and ((increasing)) increase the 1195 efficiency of its operations. Consistent with its Strategic Plan and ((Long Range Plan)) 1196 Metro Connects, Metro emphasizes planning and delivery of productive services and is 1197 committed to controlling costs. To help ensure efficiency and investments aligned with 1198 Metro's values, Metro uses service guidelines and performance measures to manage 1199 the transit system. Performance monitoring helps Metro evaluate its progress, plan and 1200 budget for the future, and improve agency practices. Metro is also committed to 1201 improving its transparency and so makes performance reports readily available to 1202 internal and external audiences. 1203

1204 Metro's Strategic Plan for Public Transportation, Service Guidelines, and Metro Connects emphasize advancing equity and addressing climate change. The three 1205 documents strongly emphasize the need to invest upstream and where needs are 1206 1207 greatest, including for priority populations: people who have low or no income; are 1208 Black, Indigenous, and other People of Color; are immigrants or refugees; have 1209 disabilities; or are linguistically diverse. For example, when considering where to add 1210 new service, Metro's Service Guidelines now direct Metro to consider social equity first, 1211 and land use second.

 1213 ((<del>T-301</del>)) <u>T-203</u> King County should provide reliable, safe, convenient, equitable, 1214 and accessible public transportation services that are responsive to the needs of people, businesses, and communities in King County <u>-</u> 1216 especially where needs are greatest.
 1217

1212

1224

1225

1226

1227

1228 1229

1230

1231

1232

1233

1234

1235

- 1218 ((T-301a)) T-204((The)) King County ((Marine Division)) should be a leader in regional mobility by providing ((passenger-only ferry)) service that benefits the community, helps reduce road congestion, can assist in emergency management needs, and supports the economic development and growth management needs of King County.
  - ((T-301b)) T-205
     King County((¹s)) should provide ((passenger-only ferry))

     service ((should be)) that is efficient, safe, accessible, and reliable, ((and provide)) in addition to providing excellent customer service while being responsive and accountable to the public.
  - ((<del>T-302</del>)) <u>T-206</u> ((The)) King County ((Marine Division)) should work with the Washington State Department of Transportation, Kitsap County, and other entities offering passenger ferry services((;)) to ensure that service and capital plans for ferries are consistent with ((the King County Ferry District 2014 Strategic Plan)) <u>Metro's Strategic Plan for</u> <u>Public Transportation, Service Guidelines, and Metro Connects</u>, or successor plans.

#### 1236 ((<del>I. Nonmotorized</del>)) <u>C. Active</u> Transportation 1237 Program

1238 ((Vision 2040, the region's long-range growth management, economic 1239 transportation strategy, and Transportation 2040, the adopted Metropolitan Transportation Plan, and the associated Active Transportation Plan call for the 1240 1241 development of a regional transportation system that offers a variety of travel choices 1242 while preserving environmental quality and open space. Nonmotorized)) Active 1243 transportation - such as walking, biking, using a wheelchair, and, in some parts of the 1244 county, equestrian travel - ((plays a key role in achieving these goals and)) is an essential 1245 component of King County's multimodal transportation system. ((Pedestrians, bicyclists 1246 and in some parts of the county, equestrians, are nonmotorized users of the 1247 transportation system.)) Regional trails serve a recreational function and also allow for 1248 uses such as transportation-enabling integration of the trail network with other active 1249 transportation networks. 1250

1251 ((Biking and walking are)) Active transportation is an energy efficient, economical, and 1252 low((-))_impact mode((-)) of travel that promotes health ((and don't contribute to air or 1253 water pollution)). By providing options for ((nonmotorized travel)) active transportation, 1254 King County helps to reduce ((automobile)) vehicle dependency and congestion, 1255 reduce greenhouse gas emissions, and create opportunities for individuals to integrate 1256 healthy exercise into everyday activities. The ability to safely ((bicycle and walk)) use 1257 active transportation can provide varying levels of accessibility and mobility to almost 1258 everyone, including people who are young, ((elderly)) who are aged 62 years and older, 1259 ((physically disabled, or)) who have physical disabilities, who are part of a household at 1260 or below 80 percent of area median income, ((low-income people and others)) or who 1261 may not drive for other reasons. Well-designed, strategically located ((bicycle and 1262 pedestrian)) active transportation facilities can also provide increased and safer access 1263 to transit for more people. ((Bicycle, pedestrian, and equestrian trails are important 1264 community amenities that foster vibrant communities and may help spur economic 1265 development. Equestrian travel is also an important aspect of the rural heritage and 1266 lifestyle of King County as well as a very popular recreational activity.))

1267 1268 In unincorporated King County, the Road Services Division is responsible for 1269 ((nonmotorized)) active transportation facilities such as bicycle lanes, sidewalks, or 1270 shoulders on County roads. The ((d)) Division also provides crosswalks and specialized 1271 signals or signage that help facilitate safer ((nonmotorized travel)) active transportation. 1272 The King County Road Design and Construction Standards ((include accommodation for 1273 nonmotorized uses and)) specify bicycle lane, sidewalk, or road shoulder criteria for 1274 unincorporated ((urban and rural)) roads. Sidewalks are allowed in Rural Towns and, 1275 under certain circumstances, ((sidewalks)) are allowed in the Rural Area as a spot 1276 improvement to address an existing safety or high-use issue when other walkway 1277 alternatives would not be as effective((, or)) and for safe routes to school. Road-related 1278 ((nonmotorized)) active transportation capital needs in the unincorporated area are 1279 included in the Transportation Needs Report and are programmed in the six-year Roads 1280 Capital Improvement Program as funding allows. ((The HealthScape Transportation 1281 Programming Tool, along with other criteria, is used in evaluating nonmotorized 1282 projects in the Transportation Needs Report.)) Road safety, including consideration of 1283 vehicle speeds in roadway design, and strategic, capital, and operational 1284 countermeasures to enhance safety are critical tools to provide for safe and easy 1285 transportation options. 1286

1287 ((King County also plays a countywide role in nonmotorized transportation through its Regional Trails System and transit services.)) The ((r))Regional ((t))Trails network((r 1288 1289 discussed in Chapter 7, Parks, Open Space and Cultural Resources,)) is an integral 1290 component of the  $((\Theta))_{county's}$  recreational and transportation system. It includes 1291 facilities located both in cities and the unincorporated area. ((The trail network functions 1292 as the spine of the County's nonmotorized system in many areas)). Transit and ((walking 1293 or biking)) active transportation are highly synergistic; transit use tends to be highest in 1294 locations where ((walking and biking are)) active transportation use is prevalent, and 1295 vice versa. ((The)) Metro ((Transit Department)) supports ((nonmotorized)) active 1296 transportation programs such as bicycle racks on transit buses and passenger ferries. 1297 and bicycle lockers at park-and-ride lots, employment sites, ferry terminals, and other 1298 locations.

((<del>T-230</del>)) <u>T-207</u> King County shall consider the <u>safety</u>, needs, and abilities of ((<del>nonmotorized</del>)) <u>active transportation</u> users ((<del>of the transportation system</del>)) in the planning, design, construction, maintenance, preservation, and operation of road infrastructure and other transportation facilities ((t<del>o the extent feasible given available funding</del>)).

1323	b. Fostering safe (( <del>walking and bicycling</del> )) <u>active transportation</u>
1324	routes to schools and other areas where school-aged children
1325	regularly assemble;
1326	c. Filling gaps in, or enhancing connections to, the ((r)) <u>R</u> egional
1327	((t)) <u>T</u> rail <u>s</u> (( <del>system</del> )) <u>network;</u>
1328	d. <u>Serving</u> (( <del>L</del> ))locations of high concentration of pedestrian and/or
1329	bicycle traffic; and
1330	e. Providing safe routes to transit.
1331	
1332	(( <del>T-234</del> )) <u>T-211</u> In urban areas, (( <del>nonmotorized</del> )) <u>active transportation</u>
1333	improvements should increase access to transit and urban centers while
1334	enhancing community connections to parks, local trails, shopping,
1335	libraries, healthcare, and other public and private services and
1336	facilities.
1337	identicis.
1338	(( <del>T-235</del> )) <u>T-212</u> The King County Regional Trails (( <del>System</del> )) <u>network</u> (( <del>is</del> )) <u>shall be</u>
1339	the centerpiece of the (( <del>nonmotorized system</del> )) network for active
1340	transportation in the Rural Area and Natural Resource Lands. The
1341	(( <del>c</del> )) <u>C</u> ounty's efforts to enhance the Rural Area and Natural Resource
1342	Lands (( <del>nonmotorized</del> )) <u>active transportation</u> network should include
1343	(( <del>filling in</del> )) <u>completing</u> the Regional Trails (( <del>System's</del> )) <u>network's</u>
1344	(( <del>missing links</del> )) gaps, coordinating road and trail projects whenever
1345	possible, considering access from roadways such as <u>gateway (trailhead)</u>
1346	parking, and enhancing access to transit, especially park((-))-and((-))-
1347	ride((s)) lots and transit centers.
1348	
1349	T-213 The Regional Trails network, and its use, shall be for both recreation
1350	and transportation purposes. Not all facilities are appropriate for all
1351	modes and may have restrictions on the use of any mode.
1352	modes and may have restrictions on the use of any mode.
1353	(( <del>T-236</del> )) <u>T-214</u> In <u>the</u> Rural Area((s)) and Natural Resource Lands, (( <del>nonmotorized</del> ))
1354	active transportation improvements shall be (( <del>consistent with</del>
1355	providing)) provided at rural levels of service, ((preserving)) preserve
1356	rural character, and (( <del>avoiding</del> )) <u>avoid</u> impacts to the environment and
1357	significant historic properties.
1358	
1359	(( <del>T-237</del> )) <u>T-215</u> To increase equitable access to walking, bicycling, and transit
1360	mobility options, the (( <del>c</del> )) <u>C</u> ounty should actively seek grant funding to
1361	improve (( <del>nonmotorized</del> )) <u>active transportation</u> infrastructure that
1362	serves the needs of (( <del>people of color, low-income communities, people</del>
1363	with limited English-speaking proficiency, immigrant and refugee
1364	populations, and others who may have limited transportation options
1365	such as students, youth, seniors, and)) historically underinvested
1366	groups, people with disabilities, people aged 62 years and over, and
1367	people with special transportation needs.
1368	propie mili special transportation needs.
	(( <del>T-238</del> )) <u>T-216</u> New school development should address safe walking and
1369	
1370	bicycling routes for students. If the existing transportation
1371	infrastructure within a one-mile radius, together with the school's road
1372	frontage improvements, cannot support safe walking or bicycling to
1373	school, King County shall use its development review authority to
1374	require the school district and the new school to address the long-term
1375	transportation needs of students, including through the
1376	state-mandated Safe Routes to School program.
1377	

- ((T-239)) T-217 New ((land use)) binding site plans, commercial developments, and 1378 1379 subdivisions shall seek to accommodate internal ((nonmotorized)) 1380 active transportation mobility and access to nearby shopping, parks, 1381 trails, schools, healthcare, community resources, and other public and 1382 private services and facilities, consistent with the different needs and 1383 service levels for urban ((and)) areas, the Rural Area((s)), and Natural 1384 Resource Lands.
- 1386 ((<del>T-240</del>)) <u>T-218</u> The specifications in the King County Road Design and 1387 Construction Standards shall support ((nonmotorized)) active 1388 transportation safety and accessibility, consistent with the County's adopted policies regarding appropriate urban and rural levels of 1390 service.
  - ((T-241)) T-219 In supporting equestrian travel in the Rural Area((s)) and Natural Resource Lands, King County should emphasize safety and connection to ((the Regional Trail System and other)) established trail networks open to equestrian use.
- 1397 ((<del>T-242</del>)) T-220 King County shall seek opportunities to acquire and develop 1398 ((nonmotorized)) <u>active</u> transportation corridors. **Evaluation** of 1399 requests to vacate unused road rights-of-way ((<del>will</del>)) should consider 1400 existing ((nonmotorized)) active transportation uses and future development of such uses.
  - ((<del>T-243</del>)) <u>T-221</u> King County should coordinate with ((<del>bicycling, pedestrian and</del> equestrian stakeholders)) active transportation users and advocacy organizations to ensure that their input is included early ((in)) and throughout the planning and project design process for projects with ((nonmotorized)) active transportation elements or that have the potential to affect ((nonmotorized)) these users.
  - ((<del>T-244</del>)) T-222 King County should participate((<del>d</del>)) in the Puget Sound Regional Council's regional bicycle network planning efforts((;)) and consider related project needs within King County's jurisdiction ((should be considered)) in the ((c))County's ((nonmotorized)) active transportation planning and project prioritization processes ((as financial resources allow)).
- ((<del>E</del>)) D. **Transportation Demand Management** 1416

1417 Transportation affects every aspect of the lives of King County residents, not only in 1418 terms of mobility but also in terms of health, equity, racial and social justice, economy, 1419 and environment. Transportation Demand Management consists of a broad range of 1420 strategies that provide for reduced reliance on single occupancy vehicle trips, reduced 1421 vehicle miles traveled, and increased efficiency of the whole transportation system. 1422 Transportation Demand Management results in lower greenhouse gas emissions and 1423 other pollutants, and equitable access to alternative mobility options. 1424

1425 ((King County, both as a government and as an employer, is a leader in implementing 1426 transportation initiatives and encouraging land uses, policies and development that 1427 lead people and businesses to reduce single occupant vehicle trips and vehicle miles 1428 traveled, while decreasing the impacts of greenhouse gas emissions from the 1429 transportation sector. King County's ability to provide for the mobility needs of its 1430 residents will increasingly depend on actively managing the existing transportation 1431 system.))

1603

((The Growth Management Act requires local jurisdictions to adopt and enforce 1611 ordinances that prohibit development approval if the development causes the Level of 1612 Service on identified county arterials to decline below the adopted Level of Service 1613 1614 standards. King County's Transportation Concurrency Management program was 1615 developed to address the Growth Management Act's concurrency requirement.)) The 1616 Transportation Concurrency Management program requires that adequate 1617 transportation facilities must be available to carry the traffic of a proposed development 1618 at ((-))<u>County</u> ((+))<u>l</u>evel of ((-))<u>s</u>ervice standards, or <u>that</u> construction for needed 1619 improvements is funded in the adopted Six-Year Roads Capital Improvement Program, 1620 or else the proposed development cannot be approved. 1621

 1622 ((The requirements of King County's Transportation Concurrency Management program 1623 may apply to transportation facilities designated by the Washington State Department 1624 of Transportation as "highways of statewide significance." The portions of certain 1625 highways of statewide significance that do not have limited access and function like 1626 county arterials may be included in the King County concurrency test.))

1628The Transportation Concurrency Management program has been designed to meet the<br/>following goals:

- Fulfill the requirements of state growth management legislation;
  Be simple to understand, easy to implement and administer, and transparent to those affected by its processes and regulations;
  Consider and encourage multimodal travel;
  Encourage growth in urban areas where provision of transportation
- Encourage growth in urban areas where provision of transportation
   infrastructure and services is most efficient and economical; and

1672 1673

1674

• Efficiently integrate concurrency determination into the permit system process and database.

1639 Transportation concurrency is a plan-level system that does not require testing of 1640 individual developments. Instead, concurrency status is determined by broad 1641 geographic areas within unincorporated King County called ((travel sheds)) travelsheds, 1642 which were drawn to reflect where travel patterns share common characteristics. Trips 1643 associated with development within a particular ((travel shed)) travelshed would likely 1644 use or be affected by traffic on arterials located within and bordering that ((travel shed)) 1645 travelshed. A development proposal ((fincluding both residential and nonresidential 1646 proposals))) will be considered to meet the transportation concurrency standard if it is 1647 located in a ((travel shed)) travelshed that meets (( $\pm$ )) evel of (( $\pm$ )) service standards as 1648 depicted on the concurrency map in effect at the time of development application. 1649 Development proposals must still meet all applicable zoning and land use regulations.

 1651 ((T-219 For the purposes of concurrency testing, a travel shed is a geographic area within unincorporated King County where trips generated by development within the travel shed would likely use or be affected by traffic on arterials within the travel shed.

  - T-221)) <u>T-307</u> The concurrency map shall identify the ((travel sheds)) <u>travelsheds</u> that meet or do not meet concurrency standards. Any proposed development in ((travel sheds)) <u>travelsheds</u> that meet concurrency standards ((<del>will</del>)) <u>shall</u> be deemed concurrent.
  - ((<del>T-222</del>)) <u>T-308</u> The concurrency test shall be based on the ((±))<u>l</u>evel of ((<del>S</del>))<u>s</u>ervice on arterials in unincorporated King County using the ((c))<u>C</u>ounty's adopted methodology. ((<del>The test may be applied to designated</del> Highways of Statewide Significance.
  - T-223)) <u>T-309</u> The concurrency test may include provision of factors for safety, pavement condition<u>,</u> and availability of multiple modes of transportation.
- 1675 ((<del>T-224</del>)) <u>T-310</u> In the Rural Area, the concurrency test may include a provision that
   1676 allows the purchase of Transferable Development Rights ((in order)) to
   1677 satisfy transportation concurrency requirements.
- 1678 C. Road Services Policies and Priorities

1679 Effective design, management, and operation of the road system are critical to mobility 1680 and quality of life. King County strives to make efficient use of the existing infrastructure, serve the broad needs of users, address safety issues, and design 1681 facilities that are appropriate for the surrounding communities. King County has a 1682 1683 structural funding deficit that continues to severely impact the ((-))County's ability to 1684 provide basic preservation and maintenance of its aging and declining road system. 1685 Therefore, as the revenue available to manage the road system fluctuates, so will the 1686  $((\tau))$ <u>C</u>ounty's ability to maintain and preserve its roads and bridges. If sufficient revenue 1687 is not available to sustain the road system, then infrastructure may be downgraded or 1688 closed. The ((c))C ounty's focus will remain on the priorities in the Strategic Plan for 1689 Road Services to guide these critical decisions. The Strategic Plan for Road Services 1690 also prioritizes funding of services and projects, including both the type of activities and 1691 the location of investments.

1692 1693 The Strategic Plan for Road Services lays out the priority for the Road Services Division 1694 funding decisions in the following order: 1695 1. Prevent and respond to immediate operational life safety and property damage 1696 hazards. 1697 2. Meet regulatory requirements and standards in cooperation with regulatory 1698 agencies. 1699 3. <u>Maintain and ((P))p</u>reserve the existing roadway facilities network. 1700 4. Enhance mobility (movement of people and goods) by facilitating more 1701 efficient use of the existing road system. 1702 5. Address roadway capacity when necessary to support growth targets in the 1703 urban area. 1704 1705 Based on the Strategic Plan for Road Services, King County has implemented a 1706 graduated service level decision framework that considers road function, traffic volume, 1707 life-safety needs, network connectivity, and transit use. Priority will be given to keep the 1708 most vital components of the road system operational for users. This approach guides 1709 service provision under limited funding scenarios and also helps direct investments 1710 toward the most critical needs when additional resources are available. Performance 1711 measurement and reporting is also an important aspect of the Strategic Plan for Road 1712 Services and a critical tool in managing the ((c))C ounty's road system. 1713 1714 To improve efficiency and productivity, King County has implemented and continues to 1715 enhance and refine a data-driven asset management approach that, combined with the 1716 policy direction in this Comprehensive Plan and the Strategic Plan for Road Services, will 1717 guide investment choices over the next biennium and beyond. 1718 1719 The Road Services Division's Capital Improvement Program and Financial Plan must be 1720 consistent with this Comprehensive Plan and consider the current performance of the 1721 transportation system, concurrency needs of planned developments, priority projects, 1722 phased implementation of improvements, and other related factors. Revenues from a 1723 range of sources, including grants, are programmed to appropriate projects. 1724 1725 While new streets are designed to balance the safety and mobility needs of all users, 1726 including people walking and biking, much of the network was built many generations 1727 ago using the standards of the time. Over time, as resources become available, the 1728 County strives to improve the system to one that is designed and operated in a humancentric manner to accommodate certain types and levels of human mistakes, 1729 accommodates physical human vulnerabilities, proactively addresses safety, and 1730 1731 reduces risk through redundant measures. The responsibility for traffic safety outcomes 1732 on the road network is shared between multiple actors, including the Road Services 1733 Division as the road system manager, as well as public health organizations, law 1734 enforcement agencies, emergency responders, road users, and others. 1735 1736 Arterial Functional Classification, established in Appendix C, Transportation, is 1737 implemented through the specifications provided in the King County Road Design and Construction Standards. The Urban Growth Area boundary provides the distinction 1738 1739 between urban and rural arterials. 1740 1741 Management of the County road network gives special consideration to its designated 1742 Heritage Corridors, where travelers can still experience a sense of the county's rich 1743 transportation history. These historic and scenic corridors include: 1744 Cedarhurst Road/Westside Highway and Dockton Road on Vashon Maury 1745 Island;

- 1746 <u>Green Valley Road in the Auburn Black Diamond area;</u>
- 1747 <u>Issaquah Fall City Road, West Snoqualmie River Road, and West Snoqualmie</u>
   1748 <u>Valley Road/Carnation Farm Road in the Snoqualmie Valley;</u>
- 1749 Old Cascade Scenic Highway and Old Sunset Highway in Stevens Pass; and
- 1750 <u>Osceola Loop in the Enumclaw Plateau.</u>

1752 <u>Likewise, travelers in King County also benefit from multiple scenic, historic, and</u>
 1753 <u>recreational highways located within King County. Designated Washington Scenic and</u>
 1754 <u>Recreational Highways include</u>:

- 1755 <u>I-90 (Mountains to Sound Greenway),</u>
- 1756 <u>US 2 (Stevens Pass Greenway),</u>

1751

- 1757 <u>State Route 410 (Chinook Pass Scenic Byway), and</u>
- 1758 <u>State Route 202 (Cascade Valleys Scenic Byway).</u>
- 1759 ((Equity and Social Justice))

Equity and racial and ((<del>5</del>))social ((<del>3</del>))justice principles receive significant consideration in
decision_making processes. The Road Services((²)) <u>Division's</u> approach to integrating
equity and <u>racial and</u> social justice into agency business operations and budgeting
includes the following components:

- Prioritize emergency snow and ice response along Metro's highest priority transit snow routes, since these may be the only source of transportation available to lower-income residents.
- Promote equal access to, and availability of, information and services for all county residents by designing ((d))Division communications and public engagement processes that are culturally relevant for diverse communities, including communities whose residents ((have limited English proficiency)) speak languages other than English.
- Utilize partnerships with other King County or external agencies, community groups, and non((=))profit organizations to better understand community needs and obtain community input and involvement.
- When available, grant-funded ((non-motorized)) active transportation improvements are directed to ((disadvantaged)) historically underinvested communities because they both help to support active, healthy lifestyles and also facilitate mobility for people with disabilities((7)) and those who cannot drive or are unable to afford a car.
- 1780 ((King County a))Acknowledge((s)) that ((there are significant concentrations of)) 1781 Black, Indigenous, and other ((p))People of ((c))Color((, low income 1782 populations)); households at or below 80 percent of area median income((-,)); 1783 people ((with limited English proficiency)) speaking languages other than 1784 English((, and)); immigrants; and refugees ((populations)) disproportionately 1785 reside in ((certain areas)) some King County neighborhoods. The ((c))County 1786 also recognizes that these groups of people are ((<del>disbursed</del>)) <u>dispersed</u> across the county. ((Their mobility needs, as well as the mobility needs of students, 1787 youth, seniors, and people with disabilities, should be considered when 1788 1789 evaluating division projects and programs.

- 1791 T-303)) T-311 King County shall maintain and preserve the unincorporated area
   1792 road system to keep it operating safely, protect mobility and
   1793 infrastructure investments, and maximize the useful life of
   1794 transportation assets to the extent feasible under available funding
   1795 levels.
- ((T-304)) T-312 ((In order t))To keep the most vital components of the road system
   operational for users, King County should use a decision framework
   that considers road function, life-safety needs, network connectivity,
   traffic volume, transit use, and other assessment criteria to both guide
   service provision and help direct investments toward((s)) the most
   critical needs when additional resources are available.
- 1804((T-305)) T-313 ((To ensure that the most vital components of the county's road1805system are kept operational,))King County should fund safety,1806essential regulatory compliance, and maintenance and preservation1807needs of the existing road system ((should be funded)) prior to mobility1808and capacity improvements.
- 1810((T-306)) T-314Maintenance and preservation of the unincorporated rural roadway1811system shall be emphasized in long-term planning and asset1812management in recognition of the fact that Rural Area and Natural1813Resource Land roads and bridges will remain the ((c))County's1814long-term responsibility after all annexations are complete.
- 1816T-315King County should contribute to achieving the state traffic safety goal1817of zero deaths and serious injuries using a safe systems approach,1818through which road system managers, public health organizations, law1819enforcement agencies, emergency responders, road users, and other1820parties collaborate to prioritize the elimination of crashes that result in1821death and serious injuries.
  - ((<del>T-306a</del>)) <u>T-316</u> Decisions on <u>long-term</u> road closures and abandonments should be made based on public safety considerations, technical((*f*)) <u>or</u> engineering standards, and the policy guidance set forth in the Strategic Plan for Road Services, <u>including preservation of local access</u> <u>to adjacent property</u>. Impacts to residents, businesses, and other road users or ((<del>stakeholders</del>)) <u>affected parties</u> should be identified and communicated to them in a timely manner.
- 1831 ((T-307)) T-317 Roadway stormwater facilities are an integral component of a
   1832 properly functioning transportation network and shall be maintained,
   1833 preserved, and, when ((practicable)) feasible, upgraded ((in order)) to
   1834 protect infrastructure, public health, and the natural environment, as
   1835 well as meet federal, state, and local regulations.
- 1837 ((<del>T-308</del>)) <u>T-318</u> Road projects and programs ((<del>shall</del>)) <u>should</u> be implemented in 1838 ways that avoid or minimize negative impacts to, as well as seek to 1839 provide positive benefits for, ((people of color, low-income 1840 communities, people with limited English proficiency, immigrant and 1841 refugee populations and others who may have limited transportation 1842 options, such as students, youth, seniors, and)) historically 1843 underinvested groups, people with disabilities, people aged 62 years 1844 and over, and people with special transportation needs. ((Projects and 1845 programs shall seek to provide tangible, positive benefits.)) 1846

- 1847 ((T-309)) T-319 To facilitate the establishment of a safe and efficient traffic 1848 circulation network reflecting all transportation modes and to retain the 1849 availability of access to adjacent properties, the ((c))County shall review 1850 and comment on the appropriate placement of new or major modified 1851 facilities or physical barriers, such as buildings, utilities, and surface 1852 water management facilities in or adjacent to road rights-of-way. 1853 1854
- ((T-310)) T-320 ((State highway facilities and arterial roads are designed to 1855 accommodate higher traffic volumes, at higher speeds, than local 1856 roads. To protect residential neighborhoods from the impacts of pass 1857 through traffic,)) King County should design and operate roads to direct ((<del>such</del>)) <u>pass-through</u> traffic away from local roads and 1858 encourage such traffic to use highways or arterials ((whenever 1859 1860 possible)), which are designed to accommodate higher traffic volumes 1861 at higher speeds.
- 1863 ((<del>T-311</del> The Department of Local Services has responsibility for development 1864 and maintenance of transportation facilities in County-owned road 1865 rights-of-way. Other right-of-way users must obtain approval from the 1866 department regarding projects, maintenance and other activities 1867 impacting the right-of-way.

1862

1874 1875

1876

1877

1879

1880

1881

1882

1883 1884

1885

1886

1887

- 1869 T-312 Arterial Functional Classification, established in Appendix C of this 1870 plan, should be implemented through the specifications provided in 1871 the King County Road Design and Construction Standards. The 1872 Comprehensive Plan's Urban Growth Area boundary provides the 1873 distinction between urban and rural arterials.
- <del>T-313</del>)) T-321 The King County( $\binom{t}{s}$ ) ((r))Road ( $\binom{d}{t}$ )Design and ((c))Construction ((s))Standards shall promote safe, cost-effective roads that, ((encourage multimodal use,)) to the extent practical and allowed by law, 1878 incorporate complete streets infrastructure to balance the health and safety needs of all road users, contribute to the state traffic safety goal of zero deaths and serious injuries, and reflect the function of the road and the different needs of and service levels for the Urban Growth Area and Rural Area and Natural Resource Lands.
  - ((T-314)) T-322 King County should provide road services in a manner that is sensitive to the natural environment, historic((al)) properties, and archaeological resources, and to design new facilities that fit within the context of the built or natural environments in which they are located.
- 1889 ((T-315)) T-323 King County should preserve its identified Heritage Corridors 1890 through context-sensitive design, planning, and maintenance, as 1891 exemplars of historic and scenic character. ((The corridors include: 1892 Cedarhurst Road/Westside Highway (Vashon Island), Dockton Road (Vashon-Maury Island), Green Valley Road (Auburn-Black Diamond), 1893 1894 Issaquah-Fall City Road (Snoqualmie Valley), Old Cascade Scenic 1895 Highway (Stevens Pass), Osceola Loop (Enumclaw Plateau), Old Sunset 1896 Highway (Snoqualmie Pass), West Snoqualmie River Road (Snoqualmie 1897 Valley), and West Snoqualmie Valley Road/Carnation Farm Road 1898 (Snoqualmie Valley).)) In-kind replacement of road and roadside 1899 features and the use of materials that complement the character of each 1900 corridor should be utilized to the extent ((that is practicable)) feasible 1901 and meets safety needs. King County should encourage adjacent 1902 property owners, through outreach efforts, to similarly support the 1903 preservation of these corridors. 1904

1905	((T-316)) T-324 King County shall support and encourage the preservation and
1906	enhancement of scenic, historic, and recreational resources along the
1907	designated Washington Scenic and Recreational Highways located in
1908	the county(( <del>, including I-90 (Mountains to Sound Greenway), US 2</del>
1909	<del>(Stevens Pass Greenway), State Route 410 (Chinook Pass Scenic</del>
1910	Byway), and State Route 202 (Cascade Valleys Scenic Byway))). The
1911	corridor management plans established for these highways should be
1912	considered in the development and implementation of King County's
1913	plans, projects <u>,</u> and programs.

## 1914 <u>V. Air Travel</u>

#### 1915 A. Airports

1930

1939

1916 ((T-213)) T-401 King County should use its authority, including zoning, permitting, 1917 and development standards, to protect the ((public use airports of)) 1918 Bandera ((<del>near the town of North Bend</del>))<u>, Vashon</u>, and Skykomish 1919 ((airport in King County)) public-use airports and private airports from 1920 encroachment of non-compatible land uses. Compatible airport land 1921 uses are those that comply with ((generally accepted)) Federal Aviation 1922 Administration guidance on location, height, and activity that provide 1923 for safe aircraft movement, airport operations, including expansion, 1924 and community safety.

#### 1925 B. Air Transportation

- ((T-317)) T-402 King County shall plan, design, and implement services, programs, and facilities for the King County International Airport ((in compliance with Federal Aviation Administration regulatory requirements)) to support a safe, secure, and efficient global aerospace system.
- 1931 ((T-317a)) T-403 King County International Airport shall continue to provide 1932 and maintain safe and secure transportation services and facilities for 1933 the flying public and aviation community in support of a broad range of 1934 uses, including corporate general aviation, small general aviation, 1935 charter and commercial passenger services, military aircraft, air cargo, 1936 and aircraft manufacturing, maintenance, storage, and service, while 1937 improving mobility for people and freight to meet growing and 1938 evolving demand.
- 1940 T-404 King County and King County International Airport planning efforts 1941 shall: 1942 a. Promote coordinated planning and effective management to 1943 optimize the movement of people and goods in the region's 1944 aviation system in a manner that minimizes health, air quality, and 1945 noise impact to the community, especially frontline communities; 1946 b. Consider demand management alternatives as future aviation 1947 growth needs are analyzed, recognizing capacity constraints at 1948 existing facilities and the time and resources necessary to build 1949 new ones; and 1950 c. Support the ongoing process of development of a new commercial 1951 aviation facility in Washington State. 1952 1953 ((In 2005,)) King County International Airport noise-reduction efforts in communities 1954 surrounding Boeing field are guided by the Federal Aviation Administration approved 1955 ((<del>a</del>)) Part 150 Noise and Land Use Compatibility Plan ((<del>to reduce noise impacts in</del> 1956 communities surrounding Boeing Field. This is a significant event and represents a
- 1957 positive step in making)). The Plan supports King County International Airport efforts to Transportation - Page 8-38

be a "good neighbor" to affected residential areas((. The Part 150 plan)) and identifies
many actions that ((are allowed to)) may be taken by King County International Airport,
pilots, tenants, the Federal Aviation Administration, and others to reduce noise impacts
on residential areas. ((The Part 150 noise mitigation program, including home
insulation, was completed in 2015.

- 1964 <del>T-318</del>)) <u>T-405</u> Recognizing that certain noise-reduction measures are contingent 1965 on ongoing and future Federal Aviation Administration funding, King 1966 County shall implement those  $actions((\overline{t}))$  under its control and 1967 identified in the Part 150 Noise and Land Use Compatibility Plan. King 1968 County shall encourage other entities to implement those measures 1969 under their control and also identified in the Part 150 Noise and Land 1970 **Use Compatibility Plan.** 1971
  - ((T-319)) T-406 King County shall ((encourage all airports located in the county, whether owned by a public or private entities, to be responsible neighbors and make all reasonable efforts to minimize noise impacts on sensitive land uses such as residences, hospitals and schools)) work with airports, federal agencies that oversee flight operations, local jurisdictions, community-based partners, and others to advance health equity and racial and social justice by mitigating exposure to noise and other airport-related harm.

## ¹⁹⁸⁰ <u>VI.</u> Coordination and Public Outreach

(All)) <u>The</u> elements of the transportation system outlined in ((this)) the ((c))<u>C</u>omprehensive ((p))<u>P</u>lan ((update)) are planned and operated in coordination with the cities in and abutting King County, the adjoining counties, the Puget Sound Regional Council, the Port of Seattle, the transit agencies providing service in and connecting to King County, and the Washington State Department of Transportation. ((Agencies and the public were invited to review and comment on this plan.))

1988 The following activities support the coordination process:

- Review <u>of plan updates</u> by <u>affected and interested parties</u>, <u>such as</u> the transportation subarea boards((;
   <u>Review by</u>)) and unincorporated area residents and organizations ((<del>within the</del>))
  - Review by)) and unincorporated area residents and organizations ((within the county's Community Service Areas));
  - ((The u))Updates of <u>King County functional, strategic, and other plans such as</u> the <u>Strategic Plan for Public Transportation</u>, ((and)) <u>Metro</u> Service Guidelines, <u>Metro Connects</u>, the Open Space Plan, and the Strategic Climate Action Plan;
  - ((The development of the Long Range Plan for Public Transportation;))
    - The statewide and countywide grant application process;
- 1998 The Transportation Needs Report and Capital Improvement Program coordination process;
- Participation in the Puget Sound Regional Council((<del>, which enables King County</del> to coordinate its transportation planning activities with other local and regional agencies for the four central Puget Sound counties));
  - <u>Review of information provided online by external agencies and organizations;</u>
  - ((Internet sites and other p))Public information ((provided in a variety of formats)); and
- Public outreach and meetings.
- 2007

2003

2004

2005

2008 ((As a countywide transportation service provider, King County provides Metro Transit's public transportation services and works with Sound Transit and other transit and transportation agencies to provide seamless, multimodal transit services. King County cooperates with other local governments and the Washington State Department of

Transportation to improve freight mobility and carry out strategies to maintain the efficiency of freeways and arterials in the region. One such strategy would include active management, which is the ability to dynamically manage congestion based on prevailing traffic conditions. King County works with the PSRC and its members to ensure that the transportation needs of the region's residents and economy are

2017 addressed in a timely manner.))

2043

2052

### 2018 A. Regional Coordination

- 2019
   T-501
   King County should pursue regional coordination and partnership to address county((-))wide transportation challenges.

   2021
   2021
- 2022T-502King County should promote a multi((-))jurisdictional, multimodal2023regional corridor approach to reducing congestion and improving2024efficiency on highways and arterial roads.20252025
- 2026T-503King County should lead, partner in, and promote regional technology2027initiatives that help to improve mobility.2028
- 2029<br/>2030T-504King County should work with state agencies,<br/>Regional Council, and ((its members)) other jurisdictions<br/>to ensure that<br/>any regional projected aviation capacity problems, and the air<br/>transportation needs of the region's residents and economy, are<br/>addressed in a ((timely)) manner that is timely and reflects the County's<br/>land use plans, transportation plans, and infrastructure capacity.
- 2036T-505King County shall support active management of state-owned freeways2037to optimize movement of people. High((-))-Occupancy Vehicle, High((2038))-Occupancy Toll, or Express Toll lanes should be managed to prioritize2039reliable speed advantage for transit and vanpools, and maintain a2040reliable speed advantage for the other high((-))-occupancy vehicles2041consistent with the State's High-Occupancy-Vehicle lane minimum2042performance standard.
- 2044 T-506 King County shall advocate that transit should be exempt from paying 2045 tolls as it is an essential element of the transportation system, and is 2046 critical to maintaining and increasing the person-carrying capacity of 2047 the highway and arterial network. Transit provides an alternative travel 2048 mode and improves mobility for all users of the system. Transit also increases the efficiency of transportation infrastructure, thereby 2049 2050 reducing investments needed in roadway expansion and additional 2051 parking.
- 2053<br/>2054T-507King County should collaborate with the Puget Sound Regional<br/>Council, cities, and other affected agencies to develop a regional<br/>parking strategy consistent with the parking pricing and management<br/>recommendations of ((Transportation 2040))<br/>the Regional<br/>Transportation Plan, or successor plans.2058
- 2059 ((T-507a)) T-508 King County should collaborate with the Puget Sound 2060 Council, cities, and other agencies to improve Regional 2061 interjurisdictional coordination on active transportation and Regional Trail infrastructure ((including bicycle/pedestrianfacilities)). 2062 The 2063 County should support efforts to maintain comprehensive information 2064 about existing and planned facilities, model plans and best practices, 2065 and grant opportunities. 2066
- The ((Eastside Rail Corridor)) Eastrail corridor provides a ((rare and)) unique opportunity to ((develop dual use (recreational trail and public transportation) facilities supporting:

#### ((<del>2016</del>)) <u>2024 King County</u> Comprehensive Plan - ((<del>updated December 6, 2022</del>)) <u>Adopted TBD</u> <u>Attachment A to</u> Ordinance ((<del>18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555</del>)) <u>xxxxx (Proposed Ordinance 2023-0440)</u>

2069 mobility through transit, nonmotorized and active transportation, including access to 2070 transit outside the corridor)) support active transportation and transit mobility, 2071 consistent with its federal railbanked status. The ((owners share other multiple 2072 objectives for the corridor including)) County's goal for the corridor is to support 2073 economic opportunity for all King County residents by linking jobs and housing through 2074 multimodal connections between regional growth centers, urban communities, local 2075 and high-capacity transit, and other regional trails - while accommodating utilities, 2076 parks, recreation, and cultural amenities((, and encouraging equitable access to these 2077 facilities, and housing and jobs, in support of economic opportunity for all King County residents. Development of the corridor will provide multimodal facilities and 2078 2079 connections that link jobs and housing, and provide an opportunity to illustrate 2080 innovative ways of connecting growing communities)).

2082 ((<del>T-507b</del>)) T-509 King County ((shall support and participate in collaborative 2083 planning efforts - both inter-departmentally and)), in coordination with 2084 ((other)) federal, state, and other local agencies ((- to)), shall develop 2085 the ((Eastside Rail C)) Eastrail corridor in ways that enhance multimodal 2086 mobility and connectivity, with a commitment to dual use (recreational 2087 trail and public transportation), consistent with federal railbanking. 2088 Planning and development should consider opportunities for 2089 integration of multimodal facilities, including regional trails, into the 2090 greater transportation network.

### 2091 B. Freight Mobility

2081

2099

2100

2101

2102

2103

2104 2105

2106

2107

2108 2109

2110

2111

2112

2113

Freight mobility is critical to King County's economy and western Washington's role as a major national and international trading region. King County supports efforts to plan and create a fast, reliable freight transportation system in the region. To maintain the region's competitive edge, transportation infrastructure must provide for the efficient movement of goods and freight to and from ports, airports, and industrial areas balanced with the needs of general purpose and high((-))-occupancy vehicle traffic.

((<del>T-508</del>)) <u>T-510</u> The King County transportation system should support reliable and efficient movement of goods throughout the county, while minimizing the impacts of freight traffic on general purpose traffic and residential neighborhoods. The ((<del>c</del>))<u>C</u>ounty should participate in regional efforts and partnerships to achieve these goals.

((<del>T-509</del>)) <u>T-511</u> King County should support regional freight mobility by incorporating freight considerations into road planning, design, construction, and maintenance.

#### ((<del>T-510</del>)) <u>T-512</u> King County should coordinate with other jurisdictions, the public, and the private sector to identify barriers to the effective and efficient movement of freight and goods and develop proposals to improve freight mobility on the arterial system.

New or expanded truck parking along the I-5 corridor within the Seattle, Tacoma, and Federal Way areas is needed. Improved and expanded truck parking facilities are also needed at the chain-up locations on both sides of Snoqualmie Pass. The lack of truck parking capacity not only causes safety problems, it <u>also</u> has a negative impact on communities in high((-))-demand areas. For example, the city of North Bend is inundated with trucks parking on local roads when Snoqualmie Pass is closed in the winter.

2122 ((The Federal Hours of Service rule changed effective July 1, 2013, exacerbating the
 2123 state's truck parking problem as it shortened)) Federal law limits the number of hours
 2124 that truck drivers may work. This ((rule change)) means that drivers must stop for rest

((more)) frequently and need ((increased)) access to safe, secure, and legal truck parking facilities. The shortage of truck parking can contribute to truck drivers driving while fatigued and parking illegally, creating a safety hazard on highways and greater community impacts.

2129
2130 Interstate commerce is a state and national priority and small communities located next
to high-volume, long-haul truck corridors are not able to resolve multistate truck parking
2132 issues by themselves. Washington State Department of Transportation Truck Parking
2133 Studies show that the state's greatest need for additional truck parking is along I-5, I2134 <u>405</u>, ((and)) State Route 167 in central Puget Sound, and ((on)) I-90 near North Bend.

2136((T-510a))T-513King County should work with regional partners ((and<br/>stakeholders)) to plan for and develop adequate truck parking in<br/>high-demand locations along King County's Truck Freight Economic<br/>Corridors to improve safety and reduce negative impacts on local<br/>communities. Development of truck parking should be supportive of<br/>technologies that reduce greenhouse gases, such as electric charging,<br/>energy efficiency, and biodiesel.

#### 2143 C. Public Involvement

- ((T-511)) T-514 King County should provide accessible, culturally((-)) appropriate, 2144 2145 timely, accurate, and consistent public information about 2146 transportation services, infrastructure, and funding issues, and ensure a 2147 wide range of opportunities for input and engagement with county 2148 residents, including ((low income communities, people of color, people 2149 with limited English proficiency, immigrant and refugee populations 2150 and other stakeholders)) historically underinvested groups, people 2151 with disabilities, people aged 62 years and over, and people with 2152 special transportation needs, and other affected community members. 2153
- 2154((T-512)) T-515King County should actively engage the public and other2155appropriate ((stakeholders)) parties, such as the ((c))Community2156((s))Service ((a))Areas constituencies, community groups, ((and subarea2157transportation forums)) elected officials, and jurisdictions throughout2158the region, in transportation planning processes and plan updates.
- 2160T-516King County Metro Transit's engagement should follow guidance in2161Metro's Strategic Plan for Public Transportation, Service Guidelines,2162and Metro Connects, or successor plans, to prioritize equity, involve2163communities in upstream decisions, and build lasting relationships with2164community partners.

# SERVICES, FACILITIES, AND UTILITIES

## CHAPTER 9

1

The Growth Management Act requires coordinated planning so that the services required by new residents and their homes and businesses are available as growth occurs. Needed services include many that are not provided by King County, such as water supply, local sanitary sewers, fire protection, schools, energy facilities, and. King County does provide services such as regional wastewater treatment, regional solid waste management, and local stormwater management. The County also has a regional human services role, which is described in Chapter 4: Housing and Human Services. This chapter contains policies that guide service provision.

# 8 C.)) <u>I.</u> Identifying Needs for Facilities 9 and Services

, 10

Public facilities and services are vital to protect public health, safety, and welfare and to protect and enhance community and environmental quality. Inadequate sewage disposal, for example, could directly threaten public health. Inadequate groundwater protection could result in unsafe drinking water and threaten stream flow. Deficiencies in ((other)) services, such as police protection or parks, might not raise severe obstacles to any single new development, but over time could cause general threats to public health, safety, and welfare and deterioration of community quality.

18

34

35

36

King County government is responsible for ((assuring that)) ensuring adequate facilities and services are available or can be made available to support planned growth. This responsibility is carried out by identifying needs for facilities and services based on the planned amount and location of growth. The mechanism for identifying needs is capital improvement programming.

The Growth Management Act requires the ((<del>c</del>))<u>C</u>ounty to prepare a capital facility plan that includes an inventory of existing capital facilities owned by public entities, a forecast of the future needs for capital facilities, including the proposed locations and capacities of expanded or new facilities, ((<del>and</del>)) a six-year plan that will finance the expanded or new facilities, and direction for reassessment of land use if funding is unavailable to meet existing and future needs. These requirements are addressed through:

- Chapter 9, Services, Facilities, and Utilities, including policies F-405, F-406, F-411, F-413, and F-306;
   Chapter 8, Transportation, including the "Funding Priorities" section and policy
  - <u>Chapter 8, Transportation, including the "Funding Priorities" section and policy</u> <u>T-126; and</u>
  - <u>Appendix A, Capital Facilities and Utilities</u>.
- 37 ((The Capital Facility Plan Element for King County is comprised of the following four
   38 components:
- Technical Appendix A is an executive summary of documents containing inventories
   of facilities and services provided by King County (health and human services and
   law, safety and justice, transportation, stormwater and regional wastewater
   treatment and reclamation) and those provided by other entities (drinking water
   supply, sanitary sewer collection and treatment, schools, fire protection, libraries,
   natural gas, telecommunications, and electricity).
- 45
   2. Technical Appendix A is an executive summary of documents containing the forecast of future needs for capital facilities, including the proposed locations and capacities of expanded or new facilities:
- 48 <del>3. Six-year plan that will finance the expanded or new facilities:</del>
- 49 a. Technical Appendix A is an executive summary of the finance plans for facilities
   50 and services provided by the county and other entities.
- 51 b. Technical Appendix A references the Transportation Needs Report, which
   52 includes an analysis of funding capability to judge needs against probable
   53 funding resources, and a 20-year financial forecast report based on identified
   54 needs.
- 55 Current adopted King County Capital Improvement Program for facilities other than
   56 transportation.
- 57 4. Requirement to reassess land use if funding is unavailable to meet existing and future needs:

59	a. Policies of Chapter 9 Section II (Facilities and Services), subparts B through F.
60	b. Chapter 8: Transportation, Section IV.
61	
62	F-201 All facilities and services should be provided in compliance with
63	provisions and requirements of the Endangered Species Act, the Clean
64	Water Act and the Growth Management Act.
65	
66	<del>F-202</del> )) <u>F-101</u> King County (( <del>should seek to create quality communities by</del>
67	defining)) shall seek to identify the needs and propose((ing)) strategies
68	for a full range of public facilities and services, including physical
69	infrastructure and health, human, and public safety services((. King
70	County should strive to provide an adequate and equitable supply and
71 72	appropriate level of public facilities)) necessary to support all communities at appropriate urban and rural service levels.
72	communities <u>at appropriate urban and rural service levels</u> .
74	(( <del>F-202a</del> )) <u>F-102</u> Results from ((t <del>he King County E</del> )) <u>e</u> quity (( <del>l</del> )) <u>i</u> mpact

76	evaluating funding, <u>capital project</u> , and service delivery decisions, <u>and</u>
77	the County's equity and racial and social justice principles should be
78	used to improve residents' access to the determinants of equity.
79	
80	(( <del>F-101a</del> )) <u>F-103</u> King County agencies (( <del>will</del> )) <u>shall</u> engage communities in
81	a culturally((-)) and audience-appropriate manner <u>, including language</u>
82	access. King County agencies (( <del>will</del> )) <u>shall</u> also engage communities
83	(( <del>that are</del> )) most affected by proposed projects.
84 85	(( <del>F-101b King County shall adhere to the Executive Order on Written Language</del>
o5 86	Translation Process and other applicable policies for those with limited
87	English proficiency.
88	
89	F-108a)) <u>F-104</u> King County (( <del>should</del> )) <u>shall consider</u> (( <del>address historic</del> )) <u>historical</u>
90	inequities and (( <del>disadvantaged</del> )) <u>historically underinvested</u>
91	communities both in rural and unincorporated urban areas in
92	determining the priority areas for public funding of capital facilities,
93	services, and infrastructure.

⁹⁴ <u>I</u>I. Regional Services

King County ((government)) is a regional and local service provider. ((Types of r))<u>R</u>egional services provided <u>by the County</u> include transit, wastewater treatment, human services, and solid waste management. ((Local services provided to))

<u>For</u> residents of unincorporated urban areas, the Rural Area, and Natural Resource
 Lands in King County, <u>local services</u> may include ((<del>police, building permits,</del>)) <u>sheriff</u>,
 <u>development review</u>, <u>land use regulation</u>, <u>and the coordination of water</u>, sewer, and
 health service((<del>s</del>)) <u>providers</u>.

102

103 ((As annexations and incorporations of unincorporated urban areas continue, King 104 County government will focus more on its role as the coordinator and provider of regional services and protector of the county's Rural Area and Natural Resource Lands. 105 106 As annexations of unincorporated urban areas continue, King County will transition out 107 of the role of coordinating with local service providers on how to best provide local 108 services to those areas, and transition to lead for that coordination role to the cities, 109 through collaboration with current service providers, as those former unincorporated 110 areas become part of city limits. The following policies direct King County's evolving 111 role as regional service provider. Provisions related to housing and human services are 112 found in Chapter 4.

113	
114	<del>F-103</del> )) <u>F-201</u> King County (( <del>will</del> )) <u>shall</u> provide or manage (( <del>countywide</del> ))
115	regional services and programs, which include but are not limited to:
116	a. Affordable housing;
117	b. Economic development;
118	c. Flood warning and flood hazard management;
119	d. Harborview Hospital;
120	e. Hazardous waste management;
121	f. Human services;
122 123	g. (( <del>Protection and preservation of natural resource lands;</del>
123	h.)) Public health;
124	(( <del>i.</del> )) <u>h.</u> (( <del>Regional I</del> )) <u>L</u> aw and criminal (( <del>justice</del> )) <u>legal</u> services; (( <del>j.</del> )) <u>i.</u> (( <del>Regional p</del> )) <u>P</u> ark, trails <u>,</u> and open space systems;
125	(( <del>k.</del> )) <u>i.</u> (( <del>Regional w</del> )) <u>W</u> astewater collection (( <del>and</del> )), treatment,
120	and ((reclamation)) resource recovery;
128	((+)) <u>k</u> . Solid waste management, including recycling;
129	(( <del>m.Stormwater management;</del>

131	(( <del>o.</del> )) <u>m.</u> Water resource management.
132	<u></u>
133	((F-107 King County will, in cooperation with special purpose districts or local
134	service providers, continue to plan for and provide public services to
135	the Rural Area and Natural Resource Lands, consistent with rural
136	<del>standards and needs.</del>
137	
138	F-108)) F-202 ((To support the intent of the Growth Management Act,)) King
139	County should work with cities and other service providers to establish
140	priority areas for public funding of capital facilities, services, and
141	infrastructure.

142 III. Partnerships and Coordination

- 143((F-101King County, the cities, special purpose districts or local service144providers shall plan as partners. King County's planning will focus on<br/>unclaimed urban unincorporated areas and cities' Potential Annexation145Areas.
- 148 F-102)) F-301 King County shall ((work)) plan as partners with cities, special 149 purpose districts, other local service providers, and residents to 150 ((identify and distinguish)) provide local((, countywide)) and regional 151 services. ((Over time,)) As cities ((will)) assume primary responsibility 152 for coordinating the provision of local services delivery in urban areas((-153 In general)), the ((c))County ((will)) shall continue to provide local 154 services delivery within the Rural Area and Natural Resource Lands, 155 consistent with rural standards and needs. Special purpose districts 156 may still provide services, where appropriate. The ((c))County ((will)) 157 shall also assume primary responsibility for coordinating the provision 158 of ((countywide)) regional services, including ((countywide)) services 159 that must be delivered within city boundaries. The ((c))County ((will)) 160 shall also work with cities, special purpose districts, and other counties 161 to identify regional service and facility needs and develop strategies to 162 provide them.

## 163 ((II. Facilities and Services

167

#### 164 A. Providing a Spectrum of Services

King County and numerous service providers need to coordinate planning and funding
 activities to ensure that needed facilities and services are provided in the region.

- 168F-203)) F-302 ((When service providers are planning and designing facilities,))169King County should ((encourage them to use sustainable development170practices to achieve net-zero greenhouse gas emissions in new171buildings by 2030))172incentives that encourage green building, such as financial and173development incentives, and help more people to access healthier174buildings with reduced utility bills.
- 175
   176 ((F-204 King County should work with the cities, special purpose districts and 177 other service providers to define regional and local services and to 178 determine the appropriate providers of those services.
   179
- 180 F-206)) F-303 Public and private community service providers should be 181 encouraged((, as appropriate,)) to share or reuse facilities when 182 appropriate to reduce costs, conserve land, and provide convenience, 183 access, and amenity for the public, and to reduce the generation of 184 greenhouse gas((s))es. Joint siting and shared use of facilities should 185 be encouraged for schools, community centers, health facilities, cultural 186 facilities, libraries, swimming pools, and other social and recreational 187 facilities. Sharing of facilities may include providing meeting space 188 that can be accessed by the community, as appropriate. 189
- ((F-206a)) F-304 King County should make its public facilities and properties available for renewable energy production, such as community solar programs, when such use is compatible with the primary use of and any regulations associated with the facility.
- ((F-207)) F-305 King County should make its public facilities or properties available
   for use as a P-patch or community garden when such use is compatible
   with the primary public use of the facility.
- 198 ((<del>E.</del>))<u>A.</u> Addressing Service Deficiencies

((In the event that needed facilities and services are not available to support either
 existing development or growth, King County will work with other service providers,
 such as water, sewer or solid waste purveyors, to address the service deficiency.

203 F-221)) F-306 ((King County shall consider the initiation of a subarea study, or 204 other corrective action, with any)) If a service provider ((that)) declares, 205 through their capital facilities plan, an inability to accommodate 206 projected service needs inside their service area, King County and the 207 service provider shall remedy the deficiency through a joint planning 208 process addressing capital improvement programs, long-term funding 209 strategies, or other appropriate corrective actions. If those actions 210 cannot resolve the deficiency, King County shall not allow for 211 expansion of the service provider's service area and shall consider 212 regulations to mitigate the effect of the deficiency. 213

044	
214	(( <del>F-221a Results from the King County Equity Impact Review Tool will be used as</del>
215	an important consideration in evaluation funding and service delivery
216	decisions when needed to address service deficiencies.
217	
218	F-222)) F-307 King County (( <del>and its</del> )) <u>should coordinate with Indian tribes,</u> cities,
219	and hospital districts (( <del>should coordinate planning for</del> )) on health and
220	human service facilities and services. County investments in health and
221	human service facilities should be targeted primarily to the designated
222	Urban Centers and secondarily to other locations in the Urban Growth
223	Area and Rural Towns.
224	
225	(( <del>F-223 If a service deficiency is identified in a service provider's existing</del>
226	service area, King County and the applicable service provider shall
227	remedy the deficiency through a joint planning process addressing
228	capital improvement programs and long-term funding strategies. If
229	financing and level of service remedies cannot solve the deficiency,
230	King County shall not allow for expansion of the service provider's
231	service area and shall consider regulations to mitigate the effect of the
232	deficiency.
252	uenciency.

233 F:)) <u>B.</u> Financing Strategies

236 237

238

239

240

241

242

243

244 245

246

247

248

249 250

251

252

253

234 ((King County, cities, and other service providers will work together to address the
 235 financing needs of facilities and services.

- F-224)) F-308 As part of pre-annexation or annexation agreements, excluding Four-to-One Program-related agreements, King County shall work with the cities to create a financing partnership for areas of the Urban Growth Area that the cities will annex. This includes determining county/regional and city/municipal facilities and services and then committing to a shared financing strategy to build or provide these infrastructure improvements or services.
- ((F-225)) F-309 King County should, in cooperation with other jurisdictions, develop funding strategies for governmental infrastructure that take into account economic development goals and consider the costs to, and benefits for, the jurisdictions and the region.
- ((F-225a)) F-310 King County should ((consider)) identify, strengthen, and support equitable discount or low-rate service fees ((for)) to reduce cost burden on people aged 62 years and older, and households at or below 80 percent of area median income ((low-income households)).
- ((B. Urban and Rural)) IV. Facilities and 254 Services 255 256 ((Although growth will be directed to Urban Areas, it is recognized that Rural Areas and 257 Natural Resource Lands have facility and service needs also. 258 259 <del>F-208</del>)) <u>F-401</u> Public spending to support growth should be directed to the Urban 260 Growth Area and to maintain existing ((unincorporated)) infrastructure 261 in the unincorporated area, and should be prioritized through the 262 Capital Facility Plan to comply with the concurrency requirements of 263 the Growth Management Act. 264 265 ((<del>F-209</del>)) F-402 In the Rural Area and Natural Resource Lands, services provided by 266 agencies ((should)) shall support a rural level of development and Services, Facilities, and Utilities - Page 9-7

267		support service that meets the needs of the community and not
268		facilitate urbanization.
269		
270	(( <del>F-209a</del> )) <u>F</u>	- <u>403</u> King County (( <del>will</del> )) <u>shall</u> provide or manage local services <u>and</u>
271		programs for unincorporated areas, which include but are not limited
272		to:
273		<ul> <li>a. ((Building permits)) Permitting and code enforcement;</li> </ul>
274		b. District Court;
275		c. Economic Development;
276		d. Land use regulation;
277		e. Law enforcement;
278		f. Local parks;
279		g. Roads;
280		h. Rural Area and Natural Resource Lands protection, preservation,
281		<u>and</u> management (( <del>assistance</del> )); and
282		i. Surface water management.
283		
284	(( <del>F-209b</del>	King County's local economic development services are provided in
285		Rural Areas and Natural Resource Lands through the Rural Economic
286		Strategies Plan and in unincorporated urban areas through joint
287		partnerships with cities, including annexation and governance
288		transition services.))
289		
290	F-404	King County shall encourage investment in improved infrastructure and
291		amenities in existing neighborhoods, particularly in communities at risk
292		of displacement.
		-

## 293 ((<del>D.</del>)) <u>A.</u> Capital Facility Planning

297

302

((King County and other service providers are required to prepare six-year capital facility
 plans that describe needs for the six-year facility and propose funding to meet those
 needs.

- F-210)) F-405 The capital facility plans and capital improvement programs
   prepared by all other agencies that provide services to unincorporated
   areas ((of the county)) should be consistent with the King County
   Comprehensive Plan.
- King County shall engage in ongoing facilities planning to 303 ((F-210a)) F-406 304 ensure that it has sufficient ((work space)) workspace to meet its 305 operational needs on a going-forward basis. Facilities planning shall 306 include an assessment of current facilities and future needs and shall 307 promote equity, economic and operational efficiencies, and 308 environmental sustainability. ((This f))Facilities planning, decisions, 309 and implementation ((policy)) shall be ((implemented through)) guided 310 by the Real Property Asset Management Plan.((, which shall be updated 311 at least every four years, but may also be updated, in whole or in part, 312 when proposals with significant impacts on county facilities are made. 313
- 314 F-210b Consistent with K.C.C. 20.12.100, the Real Property Asset Management 315 Plan shall consist of real property asset management policies, practices 316 and strategies, including planning policies, locations of county 317 agencies and implementation plans, planned moves and references to 318 King County space standards. The Real Property Asset Management 319 Plan shall guide facility planning processes, decisions and 320 implementation. 321

- F-210c)) F-407 King County shall take into account the equity <u>and racial</u> and social justice opportunities for capital investments within a community when siting a facility or changing locations to improve service delivery.
- 326((F-211)) F-408To reduce overall public costs, noise, climate change impacts, and327disruption to the local area during construction, installation of new or328maintenance of existing utility facilities should be timed and329coordinated with other projects that utilize public rights-of-way and330easements, where possible.
- ((F-212)) F-409 King County's capital facility plans ((should)) shall identify
   financing strategies to support ((its)) the land use assumptions in the
   Comprehensive Plan, including adopted ((20-year)) growth targets
   ((and land use plan)) and allocated housing needs.

331

353

- 337((F-205)) F-410King County shall work with ((its)) neighboring counties, the state,338Puget Sound Regional Council, special purpose districts, ports, and339((the)) cities to identify areas of shared need and adequate land supply340for public facilities. The ((c))County's capital acquisition budget shall341reflect the jointly agreed-upon priorities and ((time)) schedule.342
- 343 ((F-213)) F-411 King County's capital improvement program shall demonstrate that 344 projected needs for facilities and services can be met within the Urban 345 Growth Area and can be served in compliance with the concurrency 346 requirements of the Growth Management Act ((<del>or, if</del>)). If that is not 347 possible, King County shall determine where and when deficits may 348 occur and how needed facilities and services might be phased in and(( 349 ))/or financed to serve such deficit areas. Alternative phasing and 350 financing strategies must be identified and determined to be infeasible 351 prior to triggering a land use and zoning reassessment ((under Policy 352 F-223)).
- 354F-412King County shall work with the school districts and other special purpose355districts to plan for growth in line with the county's housing and job356growth targets.357
- 358((F-214)) F-413School districts that choose to have the ((c))County collect impact359fees for them, and water and sewer utilities that provide their services360to unincorporated King County((;)) shall prepare capital facility plans361consistent with requirements of the Growth Management Act, the362Countywide Planning Policies, and King County Code.363
- 364 ((<del>F-215</del>)) F-414 Provision of an adequate supply of kindergarten through ((twelfth)) 365 12th grade public schools and public school facilities is essential to 366 avoid overcrowding and to enhance the educational opportunities for 367 children. King County shall adopt regulations that are supportive of the 368 permitting of kindergarten through ((twelfth)) 12th grade public 369 schools and facilities in a manner consistent with the goals of the 370 Growth Management Act and as provided in policies R-((326))325 and 371 R-((327))326. 372
- ((F-215b)) <u>F-415</u> King County shall strive to provide services and build and operate
   public buildings and infrastructure that are ((carbon neutral)) fossil fuel
   free and shall strive to eliminate fossil fuels in new construction.
- 376 B. Sustainable Capital Facilities

((It is the goal of)) King County's goal is to work toward a model sustainable community
 to balance growth with natural resource protection while addressing climate change.

- 379 Sustainable development seeks to achieve this goal by addressing the impacts of the380 built environment in which people live and work.
- 381

382 Traditional development practices can contribute significantly to the adverse impacts 383 ((that)) of buildings and associated infrastructure ((have)) on the environment and 384 people's health. These impacts include heavy consumption of material resources, 385 energy, and water, large-scale production of wastes, water pollution, degradation of 386 habitats and other ecological resources, and contribution to greenhouse gas emissions. 387 Implementing sustainable development includes incorporating green building practices into policies through education, incentives, and regulations that help reduce negative 388 389 impacts. 390

- 391 The elements of green building include:
- ((s))Siting the project ((f))to take advantage of existing services, ((to)) retain
   existing landscaping and natural features, and ((to)) increase building energy
   performance (());
- 395 ((r))<u>R</u>equiring energy efficiency ((f))to reduce energy consumption, ((to))
   396 increase occupants' comfort, and ((to)) reduce greenhouse gas emissions(());
- ((m))<u>M</u>anaging building construction and demolition materials efficiently to reduce greenhouse gas emissions and ((to)) increase the life((=))_cycle of the building(()));
   ((i))Increasing water efficiency ((f))to reduce water consumption and ((to))
  - ((i))Increasing water efficiency ((())to reduce water consumption and ((to reduce)) wastewater treatment(()));
  - ((i))Improving water management to reduce stormwater runoff and produce less pollution and damage to water bodies;
- 404 ((<del>u</del>))<u>U</u>sing sustainable materials to improve indoor air quality, minimize toxic
   405 materials, reduce material consumption, and foster sustainable manufacturing;
- 406 ((a))<u>A</u>ddressing equity <u>and racial</u> and social justice to ensure equitable access to sustainable development, services, and community amenities; and
- 408
   ((i))Implementing universal design to ensure potential for aging in place and to service diverse occupancy opportunities.
- 410

401

402

403

411 The incorporation of sustainable practices into the design, construction, and operation 412 of King County capital improvement projects can reduce greenhouse gas emissions, 413 ((reduce)) pollution, ((reduce)) the use of natural resources, ((reduce)) energy, and other 414 operating costs, and can enhance asset value, optimize performance, promote cultural 415 sustainability by preserving historic resources, and create healthier and more appealing 416 environments for the visiting public and for King County employees. ((The strategic 417 energy management, efficiency, and conservation program called for in F-312 will 418 enable King County to monitor the effectiveness of sustainable development practices 419 in improving energy efficiency.))

420

421 The LEED rating system is a voluntary, consensus-based national((17)) standard for 422 developing high performance, sustainable buildings and ((to guide)) guiding project 423 design. The LEED rating system components include sustainable site design((;)), water 424 efficiency( $(\tau)$ ), energy and atmosphere( $(\tau)$ ), indoor environmental quality( $(\tau)$ ), materials 425 and resources( $(\tau)$ ), innovation in design( $(\tau)$ ), and regional priorities. For those projects 426 that are not eligible for LEED certification, the ((-)) county's Green Building Team, 427 comprised of representatives from the various ((c))County departments that have capital 428 projects, developed a Sustainable Infrastructure Scorecard and guidelines to help such 429 projects achieve measurable green building goals.

430

The Green Building and Sustainable Development Ordinance ((17709)) 19402, adopted
in ((2013)) 2022, requires that new ((c))County capital projects ((set a goal to)) achieve a
platinum level certification using the Leadership in Energy and Environmental Design
(LEED) rating system ((of)) or the King County Sustainable Infrastructure Scorecard, or

435 the highest certification level using an approved alternative rating system((, when the 436 incremental costs do not exceed the maximums allowed by the King County Code)). 437 Minimum performance requirements include implementing energy and emission 438 reduction targets as instructed by the King County Strategic Climate Action Plan; 439 diverting ((80%)) 85 percent of demolition and construction materials by ((2016 and 440 85%)) by 2025 and zero waste of resources by 2030; integrating equity and racial and 441 social justice efforts; and implementing the King County ((Stormwater)) Surface Water 442 Management Design Manual or more stringent guidelines reguired by jurisdiction.

- 444((F-216)) F-416King County capital facilities and ((c))County -funded projects445should be designed and constructed using sustainable development446practices, with consideration for long-term environmental and447economic sustainability.
- 449 ((F-217)) F-417 All eligible King County new capital projects shall ((plan for and 450 should)) achieve Leadership in Energy and Environmental Design 451 (LEED) Platinum certification level using the LEED rating system or the 452 Sustainable Infrastructure Scorecard, or achieve the highest 453 certification level using an ((approved alternative rating system, and 454 apply minimum performance standards when the incremental cost 455 impacts do not exceed the maximums allowed by King County code)) 456 accepted alternative green building rating system.
- 458((F-217a))F-418All eligible King County major remodels and renovations shall459((plan for and should)) achieve LEED Gold certification level using the460LEED rating system or the Sustainable Infrastructure Scorecard, or461achieve a similar certification level using an ((approved)) accepted462alternative green building463performance standards when the incremental cost impacts do not464exceed the maximums allowed by King County code)).
- 466 ((F-217b)) F-419 All King County-owned new construction capital projects should
   467 achieve net-zero greenhouse emissions by 2030.
   468
- ((F-217c)) F-420 All King County capital programs ((will)) shall evaluate their project portfolio for opportunities to achieve net-zero greenhouse gas emissions through ((programs)) alternative green building rating systems such as ((the)) LEED Zero Energy or Zero Carbon, Living Building ((c))Challenge, Living Communities Challenge, Net Zero Energy, ((Envision)) Built Green Emerald Star, or EcoDistrict.
- ((F-217d)) F-421 King County should build and operate public buildings and infrastructure that result in regenerative and net positive benefits related to energy, water, greenhouse gas emissions, and other resources ((and, for private development, guide development practices to achieve these same benefits)).
- 482((F-217e)) F-422 King County ((will)) shall increase water efficiency, ((and)) improve483conservation, and ((reduce purchased water consumption)) minimize484the purchasing of water in its facilities through ((appropriate and485economically feasible)) methods such as486recycled water, stormwater, and harvested rainwater.
- 487

443

448

488((F-219)) F-423King County should leverage its purchasing power related to489capital improvement projects to help expand the markets for green490building products, including recycled-content materials and clean,491renewable energy technologies((, including))492buses, and particularly for products and services that are locally493produced.

655

607 King County's Comprehensive Solid Waste Management Plan, prepared by the Solid 608 Waste Division of the Department of Natural Resources and Parks, guides the 609 management of solid waste in the unincorporated county and for cities with which the ((c))<u>C</u>ounty has interlocal agreements. The Comprehensive Solid Waste Management 610 611 Plan presents policies, recommendations, and goals for the following elements of solid 612 waste management: system planning, policy priorities, waste prevention, recovery and recycling, solid waste collection and processing, the transfer system, landfill 613 614 management ((and)), solid waste disposal, and system financing. The overall vision is for 615 healthy, safe, and thriving communities in a zero-waste county, working in partnership 616 with communities, businesses, local jurisdictions, and residents to create a more circular economy through programs like Re+. 617

- 619 ((F-265)) F-433 Regional solid waste planning should integrate the principles of 620 environmental stewardship, circular economy, equity and racial and social justice, and sustainable development into all aspects of solid 622 waste management.
  - ((F-266)) F-434 Solid waste should be collected, handled, processed, and disposed of in ways that reduce waste, conserve resources, and protect public health and the environment.
- 628 ((F-267)) F-435 King County should achieve ((Z))zero ((W))waste of ((R))resources 629 by 2030 and an 85 percent construction and demolition diversion rate 630 by 2025 by targeting areas of the waste stream that have the greatest 631 potential for ((diversion)) prevention and reuse, product stewardship, 632 recycling and composting, beneficial use, and recovery while 633 regenerating natural systems.
  - ((F-268 Solid waste management should be planned, and transfer and disposal capacity provided, on a regional basis.
- 638 King County shall plan for and operate a regional transfer system <del>F-269</del>)) F-436 639 that is dispersed throughout the county to ensure access to safe, 640 reliable, efficient, and affordable solid waste services, and improves 641 recycling opportunities for residents and businesses. King County 642 should continue to provide facilities for self-haulers.
  - ((F-269a)) F-437 King County should ((consider demand management)) implement strategies that increase equitable participation from frontline communities and that maximize the safety and efficiency of the transfer system and encourage use of solid waste curbside collection services.
- 649 ((F-269b)) F-438 ((In order to support achieving a 70% recycling goals)) To minimize 650 the disposal of materials with economic value, King County should 651 work with partners and jurisdictions to encourage implementation of 652 frequency and separation policies for curbside collection of garbage, 653 recyclables, and organics throughout the county, including in 654 unincorporated areas.
- 656 King County shall collaborate with cities to achieve a circular economy F-439 and preserve landfill space by implementing policies and hauler 657 658 contract amendments that harmonize recycling and compost standards 659 regionally, such as through the zero waste of resources plan. 660
- ((F-270)) F-440 King County should maximize the capacity and lifespan of the 661 662 Cedar Hills Regional Landfill and plan for future disposal when Cedar 663 Hills Landfill closes to ensure no gap in service, subject to

664	environmental constraints, relative costs to operate, (( <del>stakeholder</del> ))
665	partner and public interests, and overall solid waste system
666	optimization. The County shall not seek to site a replacement landfill in
667	King County for the Cedar Hills regional landfill.
668	
669	(( <del>F-271</del> )) <u>F-441</u> King County shall <u>:</u>
670	<u>a. ((e))Encourage sustainable development and development of</u>
671	markets for <u>reusable and</u> recyclable materials(( ₇ )); and
672	b. (( <del>p</del> ))Provide consumer education in the public and private sectors
673	regarding green building practices, product stewardship, <u>extended</u>
674	producer responsibility, circular economy, recycling, purchasing,
675	and consumption (( <del>in order</del> )) to reduce the amount of waste
676	
	disposed.
677	
678	(( <del>F-271a</del> )) <u>F-442</u> King County should consider (( <del>whether</del> )) opportunities to
679	increase energy recovery from select solid waste materials including
680	organics, mixed plastics, and the non-recyclable portion of the waste
681	stream (( <del>are beneficial in terms of cost,</del> )) <u>by factoring in</u> the <u>financial,</u>
682	(( <del>natural environment</del> )) <u>environmental</u> , greenhouse gas (( <del>emissions</del> )),
683	and community impacts(( <del>, as well as whether any such energy recovery</del>
684	facilities might be more appropriately located outside King County)).
685	
686	(( <del>F-271b Results from the King County Equity Impact Review Tool will be used as</del>
687	an important consideration to identify and assess the impacts of
688	proposed service changes, and the county's Equity and Social Justice
689	principles should be used to improve residents' access to the
690	determinants of equity.
070	

# ⁶⁹¹ +:)) <u>E.</u> Public Sewers and On-Site Wastewater ⁶⁹² Treatment and Disposal Systems

693 King County protects water quality and public health in the central Puget Sound region by providing ((high quality)) high-quality and effective treatment to wastewater collected 694 695 from 34 local sewer utilities. The ((c)) County's Wastewater Treatment Division serves 696 about ((1.6)) 1.9 million people within a ((420)) 424-square-mile service area, which 697 includes most urban areas of King County and parts of south Snohomish County and 698 northeast Pierce County. In addition to treating wastewater, King County also creates 699 resources such as energy, recycled water, and biosolids from byproducts of the 700 treatment process. 701

- 702 The County's wastewater system includes:
- ((t))<u>Three large regional wastewater treatment plants (the West Point Plant in the City of Seattle, the South Plant in the City of Renton, and the Brightwater Plant in unincorporated Snohomish County)((7));
  </u>
- ((t))<u>Two</u> small wastewater treatment plants (one on Vashon<u>-Maury</u> Island and one in the City of Carnation)((-,));
- ((<del>o</del>))<u>One community septic system (Beulah Park and Cove on Vashon-Maury</u> Island)((-,));
- ((four)) <u>Five</u> combined sewer overflow treatment facilities (Alki, Carkeek, <u>Georgetown, Henderson/Martin Luther King Jr. Way, and Mercer/Elliott West((7) and Henderson/Norfolk</u>))-all in the City of Seattle)((7));
- 713 ((<del>m</del>))More than ((<del>350</del>)) <u>390</u> miles of pipes((<del>,</del>));
- 714 ((<del>19</del>)) <u>25 regulator stations((-,));</u>

748

749

- ((42)) <u>48</u> pump stations((,)); and
- ((<del>38</del>)) <u>39</u> combined sewer overflow outfalls.

718 Recycled water is an important wastewater-management tool that can also be used as a beneficial resource. King County has been producing and distributing recycled water 719 720 since 1997. Recycled water is used for treatment process water and on-site landscaping 721 at the County's wastewater treatment plants. In addition, some of the recycled water 722 from the South Treatment Plant is used off-site for irrigation purposes and public works 723 uses, such as street sweeping and sewer flushing. Recycled water from the Carnation 724 Treatment Plant is ((sent to the wetlands)) is used for wetland enhancement at the 725 Chinook Bend Natural Area in accordance with the County's commitment to use the 726 wetlands as its primary discharge location rather than the Snoqualmie River. The 727 Brightwater Treatment Plant ((started distributing)) distributes recycled water to the 728 Brightwater Education Center for irrigation and toilet and urinal flushing, as well as to 729 the Sammamish Valley ((for irrigating golf courses, nurseries, farms and for commercial and industrial uses)) to irrigate turf and trees. 730

((King County adopted the Regional Wastewater Services Plan in 1999 to make sure the regional wastewater system keeps pace with growth and meets permitting standards.
 The Regional Wastewater Services Plan includes a number of planned projects through 2030 to protect public health, the environment and the economy for both present and future wastewater customers, such as:

- + building the Brightwater Treatment System to accommodate growth in the northern portion of the wastewater service area;
   + improvements to the county's regional conveyance system to meet the 20-year peak storm design standard and accommodate increased wastewater flows;
   + improvements to reduce existing and future levels of infiltration and inflow into
- improvements to reduce existing and future levels of militration and milow into 100 million and milow into 100 million and mi
  - improvements to control combined sewer overflows so that an average of no more than one untreated discharge occurs per year at each combined sewer overflow site by 2030.
    - The adopted policies that guide implementation of the Regional Wastewater Services Plan are in King County Code 28.86.010 through 28.86.180.))

750 The King County Regional Wastewater Services Plan establishes, or sets direction to 751 establish, a number of programs to guide long-term planning and investments in 752 wastewater infrastructure. The Regional Wastewater Services Plan guides improvements to the regional wastewater system to ensure the continuation of 753 wastewater treatment services in the future to sustain a healthy environment and 754 755 economic development in the King County wastewater service area. Many of the major 756 projects outlined in the Regional Wastewater Services Plan have been completed, are 757 underway, or are planned to begin by 2030. The Regional Wastewater Services Plan, 758 codified in King County Code Chapter 28.86, and component plans (such as the Combined Sewer Overflow Long Term Control Plan) serve as the most recent 759 760 amendment to King County's general sewer plan until a new plan is developed. The 761 County is working on a wastewater planning effort that is expected to result in a new 762 plan that sets the direction beyond 2030. 763

In addition to King County's role as the regional wastewater treatment provider, Public
Health - Seattle & King County is the agency responsible for permitting on-site
wastewater treatment and disposal systems (septic systems). In addition, the Utilities
Technical Review Committee and the King County Council review and approve sewer
utility comprehensive plans.

770	(( <del>F-255</del> )) <u>F-443</u> In the Urban Growth Area, all new development shall be served by
771	public sewers unless:
772	a. Application of this policy to a proposal for a single(( <del>- family</del> ))
773	detached residence on an individual lot would deny all reasonable
774	use of the property; or
775	b. Sewer service is not available for a proposed short subdivision of
776	urban property in a timely or reasonable manner as determined by
777	the Utilities Technical Review Committee. These on-site systems
778	shall be managed by one of the following entities, in order of
779	preference:
780	1. The sewer utility whose service area encompasses the
781	proposed short subdivision; (( <del>or</del> ))
782	2. The provider most likely to serve the area; or((;))
783	3. An On-site Sewage System Maintainer certified by the Public
784	Health - Seattle & King County.
785	The on <u>-</u> site system shall meet all state and county approval
786	requirements. The approved short subdivision shall indicate how
787	additional lots to satisfy the minimum density requirements of the
788	zoning will be located on the subject property in case sewers become
789	available in the future. There shall be no further subdivision of lots
790	created under this policy unless served by public sewers.
791	
792	(( <del>F-256</del> )) <u>F-444</u> In the Urban Growth Area, King County and sewer utilities should
793	jointly prioritize the replacement of on-site systems that serve existing
794	development with public sewers, based on the risk of potential failure.
795	King County and sewer utilities should analyze public funding options
796	for such conversion and should prepare conversion plans that will
797	enable quick and cost-effective local response to health and pollution
798	problems that may occur when many on-site systems fail in an area.
799	
800	(( <del>F-257</del> )) <u>F-445</u> City-owned parks that are redesignated from Rural to Urban <u>on or</u>
801	<u>after September 20, 2004</u> to allow future annexation by a city, and that
802	are subsequently served by public sewers, shall be tightlined. (( <del>This</del>
803	policy applies to parks that were redesignated from Rural to Urban on
804	or after September 20, 2004.
805	······································
806	F-258)) F-446 The existing public sewer system in the Rural Towns of Vashon and
807	<u>Snogualmie Pass</u> shall not be expanded to serve land beyond the
808	boundaries of the town, except as provided in Policy (( <del>F-264</del> )) <u>F-452</u>
809	and as consistent with Title 57 Revised Code of Washington. <u>Subject to</u>
810	<u>F-451, $((\Theta))on$-site systems, community on-site systems, or</u>
811	decentralized treatment systems may be used as appropriate for
812	planned growth in the Rural Town((s)) of Fall City ((and Snoqualmie
813	Pass)).
814	
815	(( <del>F-259</del> )) <u>F-447</u> Sewer facilities such as pump stations, force mains, and trunk lines
816	that do not provide connections to the Rural Area may be located in the
817	Rural Area only when they are identified in a King County-approved
818	comprehensive sewage system plan and upon a finding by King County
819	that it is technically necessary ((in providing)) to provide service to the
820	Urban Growth Area.
821	
822	(( <del>F-260</del> )) <u>F-448</u> On <u>-</u> site wastewater treatment systems in the Rural Area and
823	Natural Resource Lands that serve the Rural Area((s)) and Natural
824	Resource Lands should be designed, built, and operated as permanent
825	methods of sewage disposal.
826	
827	(( <del>F-261</del> )) <u>F-449</u> King County should monitor on <u>-</u> site wastewater systems that have
828	shown evidence of failure or potential for failure. The data should be
829	used to correct existing problems and prevent future problems. King

830 831 832 833 834		County should analyze public funding options for correcting on-site wastewater system failures and only as a last resort in Rural and Natural Resource Lands, and as otherwise consistent with this plan, conversion to community sewage systems or installation of public sewers.
835 836 837 838 839 840 841 842	(( <del>F 282a</del> )) <u>F</u>	-450 King County should work with landowners, other jurisdictions, the state Department of Health, sewer districts, and the Puget Sound Partnership to develop effective strategies and additional resources for working with landowners to provide technical assistance and requested support regarding managing on-site septic systems, and proactively addressing failing septic systems in ((environmentally sensitive)) critical areas.
843	(( <del>F-262</del> )) F-4	451 <u>Developments using a</u> (( <del>Collective</del> )) <u>community</u> on-site <u>sewage</u>
844		system((s)) or large on-site sewage system may be ((used)) allowed
845		only in the following circumstances in the Rural Area and Natural
846		Resource Lands:
847		a. Existing on-site systems are failing within an area and ((the
848		Seattle/King County Department of)) Public Health - Seattle & King
849		County concurs that long-term individual on-site sewage system
850		repairs are not feasible or water quality is threatened by the
851		presence of or potential for health hazards resulting from
852		inadequate on-site wastewater disposal methods;
853		b. An authorized public agency will manage the (( <del>community</del> ))
854		system; ((and))
855		
856		c. The (( <del>community</del> )) system is designed only to serve existing structures and lots. <u>Modifications to existing uses and lots shall not</u>
857		be allowed if the modification triggers an expansion of sewage
858		capacity above the original approval of the system; ((and))
859		d. The system cannot be used as a basis to ((increase)) exceed base
860		density <u>for the zone, special district overlay(s), or p-suffix(es)</u> (( <del>or to</del>
861		expand permitted nonresidential uses)). Substandard vacant lots
862		must be combined to the extent feasible to meet rural density
863		policies(( <del>. Management of the community system must be by an</del>
864		authorized public agency.)) and regulations;
865		e. A system serving residentially developed lots cannot be used to:
866		expand existing allowed nonresidential uses in size or scale;
867		establish new allowed nonresidential uses; or serve commercially
868		zoned properties; and
869		f. For a system serving commercially developed lots: the system is
870		used only to serve commercially zoned properties; property-
871		specific development conditions are imposed that establish a range
872		of allowed uses that can be adequately served by the system at the
873		time of its construction; and the allowed uses are not more
874		expansive than those allowed in the underlying zone.
875		
876	(( <del>F-264</del> ))	<u>F-452</u> ((Except as otherwise provided for in this policy, p))Public
877		sewer service shall be prohibited in the Rural Area or on Natural
878		Resource Lands((-)), except ((a. Public sewer service may be expanded
879		to the Rural Area or to Natural Resource Lands, only: 1. W))where
880		needed to address specific health and safety problems threatening the
881		use of existing structures, and the use of septic or other on-site
882		wastewater systems has been determined by King County to be not
883		feasible; or (( <del>2. T))to</del> serve a new school authorized to be located in the
884		Rural Area by R-(( <del>327</del> )) <u>326. An extension may only be approved if:</u>
885		(( <del>b. Public sewers may be extended, pursuant to this policy, only if they</del>
886		are)) a. It is tightlined; ((and only))
887		
888		<b><u>b.</u></b> (( <del>a</del> )) <u>A</u> fter a finding is made by King County <u>determining</u> that no
000		reasonable alternative technologies are feasible((-)) <u>: and</u>

889

c. ((Public sewers that are allowed in the Rural Area or on Natural Resource Lands pursuant to this policy shall not be used to)) It does not add pressure to convert Rural Area land or Natural Resource Lands to urban uses and densities or to expand ((permitted)) nonresidential uses.

895 ((Greywater is residential wastewater generated from bathtubs, showers, bathroom
 896 sinks, washing machines, dishwashers, and kitchen sinks. It includes sewage from any
 897 source in a residence or structure that has not come into contact with toilet wastes.
 898 Greywater comprises 50-80% of residential wastewater.
 899

900F-263)F-453 King County should support((s)) development and implementation901of innovative technologies, such as composting toilets and greywater902reuse systems, to process wastewater ((greywater for safe use)) on-site in903the Rural Area and on Natural Resource Lands. The County should explore904regulatory options to allow use of such technologies, including use of905composting toilets in place of on-site septic systems for primary and906accessory dwelling units.

# 907 ((<del>K.</del>))<u>F.</u> Stormwater Management

Stormwater runoff occurs when precipitation runs off the landscape and picks up pollutants, including pesticides, fertilizers, pet wastes, oils, metals, and ((<del>many</del>)) other chemicals. These pollutants enter surface and ground waters, disrupt ecosystems, and threaten public health. Runoff can also cause erosion, create higher peak flows in streams and rivers in winter, and((<del>, because of reduced infiltration,</del>)) create lower flows in summer <u>due to reduced infiltration</u>.

 915 ((Early King County stormwater management strategies primarily focused on reducing 916 the risk of localized flooding, without concern for potential adverse impacts on receiving 917 water bodies. Over time, experts recognized the harm stormwater runoff was having on 918 receiving waters and regulations have been put into place to address those impacts.
 919 Current stormwater management programs and policies focus on protecting the quality 920 and beneficial uses of surface and ground waters and are a requirement of the federal 921 Clean Water Act.

- 922 923 Prevention or mitigation of flooding, erosion, sedimentation, and water quality and 924 habitat degradation is important for both the built and natural environments. 925 Stormwater water management activities address the guantity and guality of stormwater 926 runoff entering the natural environment as well as its quality. As described in Chapter 5: 927 Environment, the management of stormwater runoff is generally driven by the National 928 Pollutant Discharge Elimination System Phase I Municipal Stormwater Permit and the County's Stormwater Management Program plan, which can be found online at: 929 930 http://www.kingcounty.gov/services/environment/water-and-
- 931 land/stormwater/pollution-discharge-permit/annual-reports.aspx))
- 932

914

- 933 <u>Untreated stormwater runoff is the largest source of pollution to Puget Sound.</u> The lack
   934 of stormwater <u>flow</u> controls in older developed areas is one of the most significant
   935 problems impacting receiving water bodies in King County and preventing Puget
   936 Sound recovery. Although King County has been developing and applying best
   937 available stormwater controls to new development since the late 1970s, the application
   938 of water quality controls and more effective flow controls did not occur until the early
   939 1990s.
- 940

941 Consequently, nearly all development occurring prior to 1990 has little or no flow
942 control and no water quality control. In unincorporated King County, over two-thirds of
943 the developed land was created prior to 1990. This amounts to about 150 square miles

of land on which native forest was converted to impervious surfaces (such as roads, parking lots, and rooftops), lawns, and landscape surfaces((, and pasture and crop land surfaces)) without stormwater controls to mitigate the increased runoff and pollution generated by these surfaces.

948

976

985

986 987

988

989

990

991

992

993

949 The County ((is)) also ((working to)) promotes site development that preserves natural 950 hydrologic processes by protecting and enhancing native vegetation and soils, 951 reducing impervious surfaces, and managing stormwater on-site. This approach, 952 termed  $((\pm))$  low  $((\dagger))$  impact  $((\oplus))$  development, is used to reduce impacts on aquatic resources. In the King County Surface Water Design Manual, King County provides a 953 954 menu of  $((\underline{t}))$  w  $((\underline{t}))$  mpact  $((\underline{t}))$  development options for individuals planning new or 955 re((-))development projects. King County ((will)) continues to help minimize new 956 impervious surfaces through code and incentive programs that keep lands in forest and 957 agricultural uses. Implementing ((+))low ((+))impact ((+))development satisfies 958 requirements of the National Pollutant Discharge Elimination System Permit, while 959 helping to protect the region's streams, rivers, lakes, and Puget Sound from harmful 960 pollutants. 961

962 The County has identified watershed-based management efforts as a strategy that 963 simultaneously integrates floodplain connectivity, salmon recovery, habitat restoration, 964 stormwater flow control and water quality retrofits, economic development, agricultural 965 preservation, and principles of equity and racial and social justice. One strategy that 966 holds promise for reducing pollutants and improving water quality while providing 967 access to new green space for communities is creating "stormwater parks." Stormwater 968 parks, if located strategically, could treat billions of gallons of stormwater a year, significantly reducing stormwater pollution reaching receiving water bodies, which 969 970 would in turn improve salmon recovery and habitat. The County will leverage alternative 971 funding mechanisms, and engage in various partnerships with groups that include, but 972 are not limited to, the existing National Pollutant Discharge Elimination System 973 permitted jurisdictions, Water Resource Inventory Areas, the Puget Sound Partnership, 974 and Local Integrating Organizations to undertake a collaborative watershed-based 975 approach to restoring aquatic ecosystems.

977 ((King County has been and will continue to be a leader in developing and 978 implementing state-of-the-art stormwater management strategies including education 979 and outreach, source control programs, basin or sub-basin planning for retrofitting in 980 built out areas with inadequate stormwater controls, and mapping and maintenance of stormwater infrastructure. Strategies for managing stormwater runoff are continuing to 981 982 evolve. Development of regional, collaborative approaches, including the creation of 983 watershed basin plans across multiple disciplines, will be the next evolution of 984 stormwater management.

- F-272)) F-454 To reduce flooding, erosion, and sedimentation, prevent and mitigate habitat loss, enhance groundwater recharge, and prevent groundwater and surface water quality degradation, consistent with the Growth Management Act, King County shall manage stormwater through plans, programs, and regulations developed by ((<del>King</del>)) the County in cooperation with affected jurisdictions and agencies whenever possible.
- 994 ((<del>F-273</del>)) F-455 ((<del>A</del>)) King County shall take a watershed approach ((<del>shall be taken</del>)) 995 for stormwater management, with responsibility shared between King 996 County and affected jurisdictions. This approach should emphasize 997 prevention of surface water and groundwater degradation through 998 education programs, retrofits of existing stormwater controls or the 999 placement of new controls, and implementation of best management 1000 practices to reduce pollution entering the region's groundwater and 1001 surface waters, including Puget Sound. This approach should also

1002	continue to support and build upon regional collaborative stormwater
1003	management planning including consideration of incentives for
1004	regional collaboration and identification of supplemental funding
1005	sources for collaborative stormwater management in the region.
	sources for conaborative stornwater management in the region.
1006	
1007	((F-274)) <u>F-456</u> ((In the Rural Area and Natural Resource Lands, King County shall
1008	minimize the use of constructed facilities for stormwater management
1009	and, through Low Impact Development, maximize the use of natural
1010	systems, provided that the ecological functions of the natural systems
1011	are not harmed. The County should provide incentives to keep these
1012	
	natural systems intact. Low Impact Development is also preferred in
1013	the Urban Growth Area, but it is recognized that structural systems may
1014	<del>be needed to realize urban growth and density goals in these areas.</del> ))
1015	King County shall implement stormwater management that protects
1016	native vegetation and soils, restores disturbed soils, facilitates reuse of
1017	recycled or harvested water, maximizes the use of natural systems and
1018	protects the ecological function of natural systems by:
1019	a. Minimizing grey infrastructure in the Rural Area and Natural
1020	Resource Lands;
1020	b. Requiring low impact development to the maximum extent
1021	
	feasible, as a part of its strategy to mitigate impacts from new
1023	development;
1024	<mark>c. Considering additional supportive strategies, such as in-lieu fee</mark>
1025	mechanisms to result in overall benefits to regional stormwater
1026	management and water quality;
1027	d. Continuing to support innovative stormwater management
1028	programs, such as the RainScapes Green Stormwater Infrastructure
1029	Incentive program for private landowners; and
1030	e. Incorporate innovative stormwater management techniques into
1030	
	the design, construction, and operation of all County facilities and
1032	County-funded projects to the maximum extent feasible.
1033	
1034	(( <del>F-275</del> )) <u>F-457</u> King County (( <del>will</del> )) <u>shall</u> plan and manage stormwater by basin or
1035	sub-basin consistent with Policies E-(( <del>463</del> )) <u>403</u> and E-(( <del>464</del> )) <u>401</u> . To
1036	accomplish this goal, stormwater runoff should not be diverted from
1037	one basin or sub-basin into another, unless no other reasonable
1038	alternative is available for managing run((-))off within the same basin
1039	and an analysis using evidenced-based science determines cross-basin
1040	diversion or mitigation actions for unavoidable impacts will have
1040	
	greater benefit to regional stormwater management. Where such
1042	diversions are (( <del>permitted</del> )) <u>allowed</u> , King County (( <del>will</del> )) <u>shall</u> require
1043	environmental analysis and mitigation adequate to protect surface
1044	water and groundwater resources from significant adverse impacts.
1045	
1046	(( <del>F-276</del> )) <u>F-458</u> In the Urban Growth Area, ((r <del>egional and</del> )) shared surface water
1047	management facilities should be encouraged to support infill
1048	development to preclude the need for individual on-site facilities,
1049	provide development incentives, encourage efficient use of land, and
1050	reduce overall facility maintenance costs. These facilities should be
1050	
	planned and financed through public and private partnerships.
1052	

((<del>2016</del>)) <u>2024 King County</u> Comprehensive Plan - ((<del>updated December 6, 2022</del>)) <u>Adopted TBD</u> <u>Attachment A to</u> Ordinance ((<del>18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555</del>)) <u>xxxxx (Proposed Ordinance 2023-0440)</u>

1053	(( <del>F-277</del> )) F-4	459 Stormwater programs including public education, stormwater
1054		system mapping, construction of ((regional and)) shared stormwater
1055		facilities, retrofitting developed areas, and operation and maintenance
1056		programs should be funded through an adequate and equitable
1057		funding mechanism. Stormwater facilities required for new
1058		development, redevelopment, and retrofitting should be designed and
1059		built to improve regional water quantity and quality to the maximum
1060		extent possible, as well as for aesthetic value((, as well as for)) and low-
1061		cost, long-term maintenance.
1062		····,·····
1063	(( <del>F-278</del>	King County shall continue to encourage, support and require the use
1064		of low impact development as a part of its strategy to mitigate
1065		stormwater impacts from new development to the maximum extent
1066		feasible.
1067		
1068	<del>F-279</del>	King County should incorporate state-of-the art stormwater
1069		management techniques including Low Impact Development into the
1070		design, construction and operation of all county facilities and
1071		county-funded projects to the maximum extent feasible.))
1072		
1073	<u>F-460</u>	When scoping and designing flood risk reduction, fish passage, park,
1074		trails, and habitat restoration projects, the County should actively
1075		review and pursue opportunities to support stormwater retrofit
1076		projects.
1077		
1078	(( <del>F-280</del> )) <u>F-4</u>	461 King County shall continue to promote the preservation of native
1079		vegetation and soils and the restoration of disturbed soils on (( <del>rural</del>
1080		residential)) <u>Rural Area-</u> zoned parcels to the maximum extent feasible.
1081		Minimized impervious areas and the dispersion of stormwater runoff
1082		from impervious surfaces into native vegetation in accordance with the
1083		Surface Water Design Manual are the preferred methods of stormwater
1084		management in the Rural Area.
1085		
1086	(( <del>F-281</del>	King County should work with residential and commercial developers
1087		to incorporate state-of-the art stormwater management techniques,
1088		such as Low Impact Development, that protect native vegetation and
1089		soils, restore disturbed soils by increasing the use of compost, facilitate
1090		reuse of resources such as recycled or harvested water, reduce the
1091		carbon footprint of the project, and minimize impervious surfaces.
1092	F 000	
1093 1094	<del>F-282</del>	When King County provides technical assistance and incentives for the
1094 1095		use of state-of-the art stormwater management techniques, it shall be at no cost to any private sector development.))
1095		at no cost to any private sector development.)
1096		
1097	F-462	King County should work with regional partners to identify locations for
1098	1-402	stormwater parks, focusing first on communities with the most polluted
1100		water that lack easy access to green space.
1100		Harden and harden and areas to Arean sharen
1102	((F-283)) F-4	463 King County shall identify and evaluate potential changes to land
1103	((- <u>-</u>	use development regulations and building codes to support and
1104		promote state-of-the art stormwater management techniques.
1105		······································
1106	(( <del>F-284</del>	King County should work cooperatively with other jurisdictions to
1107		develop and implement plans and programs that address the
1108		appropriate recycling, reuse, reclamation and disposal of the materials
1109		generated from maintenance of stormwater infrastructure.
1110		-
1111	F-285)) F-40	54 King County shall work with jurisdictions to ensure that storm and
1112		surface water management facilities are transferred from King County

to the local jurisdiction that annexes or incorporates that portion of King County.

# 1115 ((<del>L.</del>)) <u>G.</u> Floodplain Management

((Six major river systems flow through King County - the South Fork Skykomish, Snoqualmie, Sammamish, Cedar, Green and White. These rivers, and their major tributaries, pass through lands ranging in use from forested to agricultural to urbanized cities. Each of these major river systems are unique in their geology and geomorphology as well as the extent in which the hydraulics of the rivers have been altered by dams, levees and bank hardening. All of these rivers are used by federally listed endangered species of salmonid.

1124 Within unincorporated King County over 61% of the mapped floodplain is within land 1125 zoned for agriculture, forest or mining. Another 32% is zoned as rural leaving just under 1126 seven percent within the urban area, mainly contained within Potential Annexation 1127 Areas around the City of Carnation. Consequently much of the flood risk in unincorporated King County is to natural resource lands, primarily agriculture, and rural 1128 1129 lands with a lower relative risk to residential and resource based commercial activities. 1130 Most of these rivers also pass through highly urbanized incorporated cities that are 1131 important economic centers for King County and the Puget Sound region. These river 1132 segments are often constrained by levee systems that provide varying level of flood risk 1133 reduction.)) 1134

1135 Both the Washington State Growth Management Act((<del>, Chapter 36.70A</del>)) and Title 86 of the Revised Code of Washington((, Flood Control)) require interlocal coordination for 1136 1137 effective flood hazard management. Counties are directed to prepare comprehensive 1138 flood hazard management plans with participation of the cities. ((Once King County 1139 adopts the plan it is binding on all jurisdictions within the county.)) Flooding is a 1140 ((countywide)) regional issue impacting public safety, regional economic centers, 1141 Agricultural Production Districts, transportation corridors, and public and private 1142 As such, King County is a regional service provider for floodplain properties. 1143 management.

## ((F-286)) F-465 King County shall participate with cities to prepare, update, and implement comprehensive flood hazard management plans that meet or exceed standards established by the National Flood Insurance Program and Washington State Flood Control statutes.

((F-287)) F-466 King County shall include equity <u>and racial</u> and social justice principles in ((<del>planning</del>)) <u>updating</u> and implementing the King County Flood Hazard Management Plan ((to assure floodplain property owners and residents are given equitable access to flood risk reduction services. Outreach should consider vulnerable populations that may face barriers to accessing services and programs based on age, income, disability, English language proficiency, race and ethnicity, or other factors.)) and when assessing flood risks, evaluating impacts of risk reduction actions, and working in partnership with the most impacted communities to develop and prioritize future actions.

((In 2011 King County celebrated the 50th anniversary of the King County Flood Warning
 Program, which is responsible for the collection, analysis and dissemination of flood
 data and forecasts to individuals and organizations and for coordinating the response to
 flooding.

## 1166 F-288)) F-467 King County shall maintain a regional flood warning program in King County.

((There is now evidence that climate change is resulting in significant changes in temperatures; sea level rise; and timing and magnitude of stream and river flows, resulting in impacts on plant and animal species, water supply and humans. King County's ability to adapt to these changing conditions will likely depend on the policy decisions made today. King County can expect to see more frequent and severe flooding and a shifting of when storm events occur during the winter months.

1176
 F-289)) F-468 King County should continue to assess and revise current flood
 1177
 warning phases based on the most current data on hydrology and
 climate change ((predictions)) projections and modify the King County
 Flood Warning Program, as needed, to reflect these revised flood
 phases.

1189

1190

1191

1192

1193

1201

- ((F-290)) F-469 King County should assess the most appropriate level of service for flood risk reduction along river segments based on existing and predicted development density, land use, and hydrologic conditions, inclusive of climate change impacts.
- ((F-291)) F-470 King County ((will)) shall review available information on the potential impacts of climate change and other natural hazards on ((winter floods)) flooding conditions, and consider those potential impacts when updating the flood risk reduction policies and capital improvement projects for the King County Flood Hazard Management Plan.

King County works with the U.S. Army Corps of Engineers to construct and maintain flood levees along the Lower Green River. Under Public Law 84-99, the U.S. Army Corps of Engineers is authorized to provide emergency assistance to cost share and construct levee repairs following a flood disaster. However, eligibility for this cost-sharing program requires that levee sponsors (often local jurisdictions) comply with the U.S. Army Corps of Engineers Public Law 84-99 program standards as outlined in the Rehabilitation and Inspection Program.

An Interim Policy for Determining Eligibility Status of Flood Risk Management Projects was issued in 2014 and its primary effect was that vegetation no longer served as a criterion for determining a levee's eligibility for the Public Law 84-99 program. So long as vegetation in the vicinity of Public Law 84-99 levees is maintained by local sponsors to support levee inspections, the national levee vegetation standards for risk reduction no longer affect the eligibility of King County's levees.

1209 The Green River System Wide Improvement Framework Vegetation Plan provides 1210 recommendations for vegetation planting and maintenance practices, in the vicinity of 1211 levees and floodwalls enrolled within the Public Law 84-99 program. These 1212 recommendations acknowledge that, while vegetation may pose a risk in some 1213 situations, King County has found through many years of experience that vegetation can 1214 be incorporated into levee designs and, when properly maintained, contributes to the 1215 resiliency of the levee system. King County believes that bioengineered techniques 1216 provide a stronger, more sustainable levee and revetment system that will reduce 1217 long-term maintenance and repair and contribute toward the recovery of endangered 1218 species. 1219

1220((F-293 King County shall continue to work with the U.S. Army Corps of<br/>Engineers, the Puget Sound Partnership, and other regional partners to<br/>develop a science-based vegetation management framework that<br/>provides for safe and effective levees, functional riparian habitat, and<br/>cost-effective use of limited resources.1225

1226 The September 2008 National Marine Fisheries Service Biological Opinion on the 1227 Federal Emergency Management Agency's National Flood Insurance Program raises 1228 specific concerns about the application of the Corps vegetation management standards 1229 in the Puget Sound region. The Biological Opinion directs the Federal Emergency Management Agency to recognize only those vegetation standards that "enable the 1230 1231 riparian vegetation to function in support of salmon habitat forming processes." 1232 1233 <del>F-294</del>)) <u>F-471</u> King County ((will)) shall ((assess participation)) participate in the 1234 U.S. Army Corps of Engineers Public Law 84-99 Program ((to ensure)) 1235 on a case-by-case basis, provided that compliance with the National 1236 Marine Fisheries Services Biological Opinion on the Federal Emergency 1237 Management Agency National Flood Insurance Program standards for 1238 levee vegetation, ((as well as)) and cost-effective maintenance and 1239 repair of levees. 1240 1241 ((The Biological Opinion for the National Flood Insurance Program established 1242 'reasonable and prudent alternatives" that may be taken to reduce the adverse effects of 1243 development with the 100-year floodplain. Compliance with the Biological Opinion is 1244 required in order to participate in the National Flood Insurance Program. 1245 1246 <del>F-295</del>)) <u>F-472</u> King County ((will)) shall maintain compliance with the National 1247 Flood Insurance Program by: 1248 a. Assessing the projects and programmatic actions recommended in 1249 the King County Flood Hazard Management Plan for compliance with 1250 the Biological Opinion prepared for the Program; and 1251 b. Making necessary amendments to the Plan and its implementing 1252 development regulations. 1253 1254 ((In 2007 King County established the King County Flood Control District to protect 1255 public health and safety, regional economic centers, public and private properties and transportation corridors. The Flood Control District adopted the 2006 King County 1256 1257 Flood Hazard Management Plan as its comprehensive plan. A private firm, 1258 ECONorthwest, was hired to study the economic benefits of implementing the plan. 1259 This report, the "Economic Connections Between the King County Floodplains and the 1260 Greater King County Economy," estimated that a one-day shutdown of economic activity 1261 in the King County floodplain areas would result in at least \$49 million in forgone 1262 economic output in the region (2007 dollars). The study also found that, 52,000 people 1263 in King County commute into or out of the 100-year floodplain for work. 1264 1265 Implementation of the 2006 King County Flood Hazard Management Plan has played a 1266 significant role in protecting King County's economic base. .The 2006 Flood Hazard 1267 Management Plan was updated in 2013. 1268 1269 King County ((will)) shall work cooperatively with Indian tribes, the <del>F-296</del>)) <u>F-473</u> 1270 King County Flood Control District, cities, and other ((stakeholders)) 1271 partners to implement the integrated approaches to floodplain 1272 management outlined in the Flood Hazard Management Plan, or 1273 successor plans, to protect public safety, prevent property damage, and 1274 help protect the greater King County economy, consistent with the 1275 Growth Management Act. Actions should advance King County's 1276 equity and racial and social justice goals, promote resiliency to the 1277 potential impacts of climate change, and provide multiple benefits for 1278 the residents of King County. 1279 1280 ((<del>F-297</del>)) F-474 Consistent with guidance from the Federal Emergency 1281 Management Agency and the U.S. Army Corps of Engineers, King 1282 County's flood risk reduction strategies should focus first on risk 1283 avoidance, followed by actions intended to reduce vulnerability in at-

1284	risk areas. New levees and other flood facilities should be the last
1285	rather than the first line of defense.
1286	
1287	(( <del>F-298</del> )) F-475 King County shall continue to (( <del>promote</del> )) <u>encourage</u> the purchase
1288	of flood insurance to (( <del>businesses</del> )) <u>owners and tenants of properties</u>
1289	located within (( <del>the floodplain</del> )) <u>flood hazard areas</u> , including those
1290	(( <del>businesses</del> )) <u>properties</u> located behind accredited levees, to protect
1291	the (( <del>economic</del> )) value of the (( <del>business</del> )) <u>properties,</u> and <u>to</u> reduce the
1292	economic vulnerability ((to the region's economic activity from a larger
1293	but less frequent)) from flood events, and shall, where feasible,
1294	participate in programs that keep flood insurance rates as low as
1295	possible for community members.
1296	
1297	(( <del>F-299</del> )) <u>F-476</u> King County should continue to discourage new(( <del>, at-risk</del> ))
1298 1299	development in mapped flood hazard areas, and coordinate with
	partners to avoid this in other jurisdictions.
1300 1301	
1301	(( <del>F-299a</del> )) <u>F-477</u> King County should seek to site new critical public facilities outside of the 500-year floodplain <u>(except for water-dependent</u>
1302	facilities, such as wastewater treatment facilities and associated
1303	<u>conveyance infrastructure)</u> .
1304	
1305	Levee setbacks (moving levees away from the river channel) can provide a higher level
1307	of risk reduction, reduce future maintenance costs, enhance habitat, and provide open
1308	space benefits. However, levee setbacks require purchase of additional right-of-way
1309	and, in some cases, relocation of homes and businesses, which is more costly in urban
1310	areas. The $((c))$ County has <u>purchased homes and</u> relocated $((homes))$ residents from
1310	high-hazard residential areas along the Tolt, Raging, Snogualmie, Middle Green, and
1312	Cedar Rivers. ((Levee setbacks can be more challenging in urban areas with higher land
1312	costs, well established businesses, and more extensive relocation needs.
1313	COSIS, WEILESIADIISHED DUSHIESSES, AND MOLE EXTENSIVE LEIOCATION N <del>EEDS.</del>
1314	F-299b)) F-478 King County should work with cities, businesses, and landowners
1315	to evaluate the alternatives for levee setbacks that would provide a
1317	higher level of risk reduction, reduce long-term maintenance costs, and
1318	enhance habitat while promoting long-term economic resilience and
1319	vitality.

#### Water Supply Η. 1320

1321 King County is not a water utility that provides potable water to residents and 1322 businesses in the region. ((However, it plays an important)) The County serves a role in 1323 the coordination ((or linking)) of water resources and growth and regional protection and management of water resources. This ((regional protection and management)) 1324 includes protection of the quantity and quality of groundwater((, stormwater 1325 management, flood hazard management, protection of fish and wildlife habitat,)) and 1326 1327 commitment to regional water strategies through such efforts as ((the Puget Sound 1328 Partnership,)) regional water supply planning((, salmon recovery planning, and multiple 1329 groups engaged on)) and climate change mitigation and adaptation. It carries out this 1330 role through ((its responsibilities for)) planning, permit issuance, and regulatory 1331 oversight. ((The King County Comprehensive Plan must demonstrate that projected 1332 needs for facilities and service can be met within the Urban Growth Area and can be 1333 served in compliance with the concurrency requirements of the Growth Management 1334 Act. Within Rural Areas and Natural Resource Lands, the Comprehensive Plan must 1335 provide for rural services, including domestic water service, needed to serve permitted 1336 densities and uses.))

1337

1338 The Utilities Technical Review Committee((, as authorized in King County Code chapter 1339 13.24, assures)) ensures that water system and water supply planning by water utilities in

1340 King County meet the requirements of the Growth Management Act and other 1341 applicable statutory requirements, ((as well as determining)) and determines 1342 consistency with the King County Comprehensive Plan. ((The Utilities Technical Review Committee is responsible for identifying the elements and provisions of the 1343 1344 Comprehensive Plan and development regulations, adopted by the county under the 1345 Growth Management Act, with which water system plans must be consistent, as 1346 prescribed in Revised Code of Washington 43.20.260. The Utilities Technical Review 1347 Committee is also responsible for ensuring that the purposes of chapter 13.24, as 1348 provided in King County Code 13.24.005, are carried out. Water system plans are ultimately approved by ordinance by the King County Council and King County 1349 Executive. 1350

1352 King County has been working with water utility representatives for the last several years on refinements to the Utilities Technical Review Committee review process. The intent 1353 1354 of the refinements has been to clarify the County's interests in reviewing water systems 1355 plans, create more transparency in the review process, provide clarity on what the 1356 County does with the information it gets from water purveyors and reduce overall 1357 processing time. King County will continue coordinating with water utilities to help 1358 ensure successful implementation of the Utilities Technical Review Committee review 1359 process refinements.))

1361 Water utility service areas in King County are described in Coordinated Water System Plans developed under the Public Water System Coordination Act (((c))Chapter 70.116 1362 1363 Revised Code of Washington) and individual water system plans developed under State 1364 Board of Health rules adopted under ((c)) hapter 43.20 Revised Code of Washington. 1365 Coordinated Water System Plans describe future service areas for water utilities within 1366 which they are provided the exclusive right to serve future customers((7)) and are to 1367 include the means for meeting those needs in the most efficient manner possible. 1368 Other service providers may serve within the future service area of a designated water 1369 utility if the designated water utility is unable to provide service in a timely and 1370 reasonable manner.

1371

1351

1360

((Individual water system plans must include the water utility's retail service area, which includes existing customers and areas where the utility plans future service. Under state law (Revised Code of Washington 43.20.260), the water utility is required to provide service within its retail service area, provided it can meet the conditions prescribed in state law, including the ability to deliver such service in a timely and reasonable manner. The planned provision of service must be consistent with local government comprehensive plans, land use plans, and development regulations.))

1380 Washington State laws encourage the development and use of recycled water, require 1381 consideration of recycled water in wastewater planning, and recognize the importance 1382 of recycled water as a strategy for water resource management statewide (Chapters 1383 90.46, 90.48, and 90.82 Revised Code of Washington)(()). Recycled water is an 1384 important mechanism for improving water quality and reducing discharge of treated 1385 wastewater into Puget Sound and other sensitive areas. Safely reusing non-potable 1386 water within a building requires sufficient plan review and system inspection capacity. 1387 ((Recycled water is an important wastewater management tool that can also be used as 1388 a beneficial resource. King County has been producing and distributing recycled water 1389 since 1997. Recycled water is used for treatment process water and onsite landscaping 1390 at the County's wastewater treatment plants. In addition, some of the recycled water 1391 from the South Treatment Plant is used off-site for irrigation purposes and public works uses, such as street sweeping and sewer flushing. Recycled water from the Carnation 1392 1393 Treatment Plant is sent to the wetlands at the Chinook Bend Natural Area in accordance 1394 with the County's commitment to use the wetlands as its primary discharge location 1395 rather than the Snoqualmie River. The Brightwater Treatment Plant started distributing

- recycled water to the Sammamish Valley for irrigating golf courses, nurseries, farms and
   for commercial and industrial uses.))

((In recent years King County worked cooperatively with many of the larger water utilities in the region to gather information about regional water demand and supply. As a result of potential impacts from climate change on water demand and supply, this effort will become increasing important in future years. King County would like to use this information to help develop a regional water supply plan.

- 1405 F-231)) F-479 King County should support((s)) coordination of regional water
   1406 supply planning, sale((s)) of excess water supplies among
   1407 municipalities in the region, water quality programs, and water
   1408 conservation, reuse, and recycled water programs. This regional
   1409 planning should support King County's goals of focusing growth in the
   1410 Urban Growth Area and ensuring water availability for resource lands.
- ((F-242)) F-480 King County should support((s)) initiation of a water planning process for the development of a regional or subregional water plan.
   ((The planning process should at a minimum cover all of King County, but may include a broader geographic area.)) The County ((will)) shall work in concert with Indian tribes, water utilities, state agencies, and other((s that participate)) key partners. ((Key components of this planning process should include:
  - a. Involvement, oversight and support of elected officials in the region;
    - b. Meaningful public participation including the involvement of the state and federally recognized tribes; and
    - c. Recognition of, and making appropriate linkages with, other state, regional, or local planning processes.
- 1426
   1427
   1427
   1428
   1428
   1429
   1429
   F-243)) F-481 King County recognizes that a regional water planning process
   1428 ((will)) should be a collaborative process. King County's objectives for
   the process and a resulting plan are that it:
   a. Be consistent with, and support, growth management objectives
  - a. Be consistent with, and support, growth management objectives and decisions made by local and regional jurisdictions under the Growth Management Act;
  - Address the need for sufficient <u>in-stream</u> flows to achieve salmon recovery objectives of the approved regional recovery plan for species listed under the Endangered Species Act, and recognize <u>Indian</u> tribal water rights;
  - c. Be consistent with and support the approved water quality and quantity strategies adopted by the region, local governments, and other responsible entities (such as water utilities) in compliance with federal requirements under the Clean Water Act, Safe Drinking Water Act, and other authorities relevant to water quantity and quality;
  - Include provisions for the efficient use of water, including recycled water;
    - Consider the impacts of climate change on water demand and supply;
- 1446f. Address the water needs of other specific sectors of the local1447economy, including agriculture and other industries with1448significant water uses;1449g. Include, to the extent possible, assigned accountability for
  - g. Include, to the extent possible, assigned accountability for implementing conservation and developing new supplies and related infrastructure; and
    - Identify, and develop a strategy for, any legislative changes necessary or desirable to implement the plan.

1479	<del>regional water plan.</del>

## 1480 1.)) 2. Potable Water Systems

1 1 - 1

1481 Potable water is provided by Group A public water systems having 15 or more 1482 connections, Group B public water systems having ((three)) two to 15 connections, and individual private wells serving one connection. The type of water system required for 1483 1484 new development will depend upon whether a proposed development is ((or is not 1485 <del>located within the Urban Growth Area, is or is not</del>)) within an approved service area of 1486 an existing public water system, and is or is not able to provide an adequate water supply as required under Revised Code of Washington 19.27.097 and 58.17.110. 1487 1488 Exempt wells refer to wells that do not require obtaining a water right permit from the 1489 state for withdrawal of water. These exempt wells are subject to all other rules and 1490 regulations of the water code other than the requirement to get a permit from the state to withdraw water. ((Water withdrawn from an exempt well for individual or group 1491 1492 domestic water supply cannot exceed 5,000 gallons per day, nor may the water be used to irrigate more than a half-acre of lawn or noncommercial garden.)) Issuance of a 1493 1494 building permit or subdivision approval that is interconnected with a permit-exempt 1495 well requires the following measures: (a) a fee of five hundred dollars; (b) maximum 1496 average withdrawal of groundwater in an amount not exceeding 950 gallons per day 1497 per connection and not exceeding 5,000 gallons per day per well; (c) curtailment of 1498 withdrawal of groundwater to an amount not exceeding 350 gallons per day per 1499 connection for indoor use only upon issuance of a drought emergency order; (d) 1500 outdoor use limited to watering of a lawn or noncommercial garden not exceeding one-1501 half acre in area; and (e) management of stormwater runoff on-site to the extent feasible 1502 to maximize infiltration, including use of low impact development techniques. 1503

1504((F-232)) F-481Water utilities that obtain water from, or distribute water in1505unincorporated King County, and water utilities formed as special1506purpose districts under Title 57 Revised Code of Washington are1507required to submit water system plans to the ((c))County for review and1508approval and shall describe in their plans how they intend to meet their1509duty to provide service within their retail service areas, and generally1510how they plan to meet water service needs in their future service.

1539

1540

1541

1542

1548

- 1512 ((<del>F-233</del>)) F-482 In both the Urban Growth Area and Rural Area((s)) of King County, 1513 all new construction and all new subdivisions shall be served by an 1514 existing Group A public water system((s)), except in the circumstance 1515 when no Group A public water system can provide service in a timely and reasonable manner per Revised Code of Washington 70.116.060 1516 and 43.20.260 or when no existing system is willing and able to 1517 1518 provide safe and reliable potable water with reasonable economy and 1519 efficiency per Revised Code of Washington 19.27.097.
- 1521 ((<del>F-234</del>)) <u>F-483</u> In the Urban Growth Area, individual private wells <u>for single</u> 1522 detached residences are not ((permitted)) allowed unless ((application 1523 of Policy F-233 to a proposal for a single-family residence on an 1524 individual lot)) requiring connection would deny all reasonable use of 1525 the property. In that case, the well would be allowed only as an interim 1526 facility until service by a public water system can be provided. ((The 1527 individual well must meet the criteria of the King County Board of 1528 Health Title 13.))
- 1530((F-235)) F-484In the Urban Growth Area, if an existing Group A water provider1531cannot provide direct or indirect service to new development under1532Policy F-((233))482, a new public water system may be established if it1533is owned or operated by the following, in order of preference:
  - a. By a satellite management agency approved by the State Department of Health under contract with the Group A system in whose service area the system is located, provided that the existing Group A water system remains responsible for meeting the duty to serve the new system under Revised Code of Washington 43.20.260; or
  - b. By a satellite management agency approved by both the State Department of Health and King County.
- 1543F-485All new public water systems ((formed in the Urban Growth Area)) shall<br/>connect to the Group A water system in whose service area the new<br/>system is located when direct service becomes available. Such a<br/>connection shall be made by the homeowner or association in a timely<br/>and reasonable manner.
- 1549 ((<del>F-236</del>)) F-486 In the Rural Area and Natural Resource Lands, King County land use 1550 and water service decisions should support the long-term integrity of 1551 Rural Area and Natural Resource Lands ecosystems. ((Within the Rural 1552 Area, individual private wells, rainwater catchment, Group B water 1553 systems, and Group A water systems are all allowed.)) If an existing 1554 Group A water provider cannot provide direct or indirect service to new 1555 development per the exceptions in Policy F-233, a new public water 1556 system ((or private well)) may be established if it is owned or operated 1557 by the following, in order of preference:
- 1558a. By a satellite management agency approved by the state1559Department of Health under contract with the Group A system in1560whose service area the system is located, provided that the existing1561Group A water system remains responsible for meeting the duty to1562serve the new system under Revised Code of Washington156343.20.260; ((and))

1582 1583F-487In the Rural Area or Natural Resource Lands, if water service cannot be obtained by the options provided in F-486, then use of private wells or rainwater catchment may be allowed.1586 1586((F-237)New public water systems established in the Rural Area shall be owned and operated by the following, in order of preference: a. By the Group A public water system in whose service area the system is located, by direct service or satellite management by the Group A system;1590 1592b. By a satellite management agency approved by the State Department of Health and providing service within the county and under contract with the Group A system if it is located in a Group A system service area; or c. By the owners of the lots, which are provided water by a new Group A or B system if not within the service area of an existing Group A system or not within the area covered by a satellite management agency. Approval for any such system shall be conditioned for future ownership or management by a satellite management agency, when such service becomes available, and for periodic review of system operations, as required by Revised Code of Washington 70.119A.060(2).))1605The State Department of Ecology has determined that the rivers and streams in the major river basins in King County have no water available for further consumptive	1564 1565 1566 1567 1568 1569 1570 1571 1572 1573 1574 1575 1576 1577 1578 1579 1580 1581		<ul> <li>b. By a satellite management agency or an existing Group B system approved by both the State Department of Health and King County; or</li> <li>c. 1629

1643

1644

1645

1646

1647

1656

1673

- Water utilities obtain water supplies from many varying sources. Some water utilities
   receive the vast majority of their water supply from wells. Others receive substantial
   portions from municipal watersheds and reservoirs. The varying water supply sources
   can differ substantially in terms of dependability of output, so that while one water utility
   may have excess capacity, a neighboring water utility could be experiencing severe
   shortages and be unable to adequately serve their customers.
- 1674F-246King County supports interties that allow the transfer of water1675resources among water utilities to meet the projected demands for1676growth where such interties meet the requirements of Revised Code of1677Washington 90.03.383 and are also consistent with any applicable1678locally adopted comprehensive plans, regional water supply plans,1679adopted groundwater management plans, watershed plans, approved

- 1680Coordinated Water System Plans, Endangered Species Act response1681requirements and Clean Water Act requirements.1682
- 1683F-247King County supports the development of appropriate regional water1684intertie capital projects, subject to approval from appropriate local,1685state, and federal agencies and consistent with Policy F-246.

# 1686 4.)) <u>3.</u> Water Use Efficiency, Planning, and Management

1687 ((Water is becoming an increasingly scarce resource, which calls for commitments to 1688 improved planning, more efficient water use, and better water management. The 1689 impacts of climate change on water demand and supply adds to the need to make 1690 efficient use of this scarce resource. As part of its resource management and land use 1691 planning responsibilities, the King County Utilities Technical Review Committee reviews 1692 water utility plans for those w))Water utilities serving unincorporated King County or 1693 otherwise subject to the planning requirements of King County Code (( $\frac{c}{c}$ ))Chapter 13.24 1694 ((and ensures the inclusion of)) are required to include elements related to recycled 1695 water, water use efficiency, and water conservation in the plans as may be called for 1696 under state law, the King County Code, or the King County Comprehensive Plan. ((As 1697 part of its evaluation process, the Utilities Technical Review Committee also encourages 1698  $\overline{\mathbf{w}}$ ))Water purveyors are encouraged to include conservation and reuse measures, where 1699 applicable, as well as development of new sources to support planned land use with 1700 reliable service at a reasonable cost.

1701

1702 The Reclaimed Water Act of Washington State (Revised Code of Washington 90.46) 1703 recognizes the value of recycled water in the process to better manage, protect, and 1704 conserve water resources. In addition, measures to increase water conservation and 1705 expand the use of recycled water for non-potable uses throughout the county are 1706 important elements in preparing for potential climate change impacts((7)) and ((to))1707 addressing water as a recognized limiting factor for Puget Sound and salmon recovery 1708 The King County Code also directs ((c))County programs to act as a efforts. clearinghouse for data related to groundwater quality and quantity ((in order)) to 1709 1710 facilitate implementation by King County and others of the groundwater management 1711 plans that have been developed for major portions of King County.

1712

1728

1713 Under Revised Code of Washington 43.20.310, larger water systems that serve more 1714 than 1,000 connections will be required to address the impacts of climate change in 1715 future water system plans. These large water systems will be required to include a 1716 climate resilience element in plans initiated after June 30, 2025. This new plan element 1717 must 1) determine the types of extreme weather events that would significantly 1718 challenge the system and build scenarios to identify potential impact, 2) identify critical 1719 assets and steps necessary to protect the system from the weather events on the 1720 systems operations, and 3) describe the costs and benefits of system's risk reduction 1721 strategies and capital project needs.

## 1722 ((<del>6. Water Availability and New State Laws</del>

In January 2018, the Washington State Legislature approved Engrossed Substitute
 Senate Bill (ESSB) 6091, now codified in c))Chapters 19.27, 58.17, 90.03, and 90.94
 Revised Code of Washington((- The adopted statutes)) clarify the steps building permit
 and subdivision applicants must take to establish that water is "legally available" when
 proposing to obtain water from a new permit-exempt well.

In King County, the ((new water law)) requirements most directly affect development in
the Rural Area and on Natural Resource Lands where new development may not be
served by public water systems, and applicants are proposing to use permit-exempt
wells for a source of water supply. King County has a prioritization for water use that
intends to limit permit-exempt wells and requires new development to be connected to
Services, Facilities, and Utilities - Page 9-33

Group A water systems. Consistent with the ((new)) water law requirements, King
County permitting processes ensure that the hierarchy of water service is fully
implemented with the Comprehensive Plan policies and the King County Code.
Additionally((, consistent with new water law)), King County ((will participate)) has
participated in the Washington State Department of Ecology's Watershed Restoration
and Enhancement Committee process((, which may lead to the identification of new
water planning provisions in future Comprehensive Plan updates)).

1742((F-248)) F-491King County shall partner with utilities to publicize water1743conservation and encourage best management practices that conserve1744potable water supply through measures that include use of alternative1745supplies such as recycled water.

- 1754((F-250)) F-493King County shall encourage local developers with new projects in<br/>unincorporated King County to ((explore the possibility of using)) use<br/>recycled water for non-potable purposes when ((a plan for)) recycled<br/>water ((has been approved for the area)) is available for use.
- ((F-251)) F-494 ((In its review of water system plans, the Utilities Technical Review Committee shall consider the criteria provided in King County Code 13.24.010, 13.24.060, and 13.24.070, and determine the plan's consistency with the following:
  - a. Applicable provisions of the King County Comprehensive Plan, land use plans, and development regulations adopted under the Growth Management Act;
  - b. Approved or adopted regional water resource plans, such as basin plans, groundwater plans, watershed-based conservation and recovery plans developed under Endangered Species Act, salmon recovery plans developed under chapter 77.85 Revised Code of Washington, water resource plans developed under chapter 90.54 Revised Code of Washington, watershed plans developed under chapter 90.82 Revised Code of Washington, and a regional water supply plan or water resource management plan;
    - c. The county's Regional Wastewater Services Plan; and
- 1775 d. Other applicable provisions of countywide plans managed by King 1776 County, as specified in Utilities Technical Review Committee guidance or checklists.)) The Utilities Technical Review Committee shall work 1777 1778 with state agencies, water utilities, and other parties to develop any 1779 necessary rules, policies, or checklists to provide clear information and 1780 guidance as to the county's expectations for its reviews. ((For each plan 1781 submitted to the county for review, the Utilities Technical Review 1782 Committee should have the goal of providing an initial response and 1783 comments to the water utility within the same timeframes as the state 1784 Department of Health under Revised Code of Washington 43.20.250. 1785
- 1786F-252)) F-495In reviewing proposals for modified and expanded service area1787boundaries for municipal water suppliers, as defined under Chapter178890.03 Revised Code of Washington, the Utilities Technical Review1789Committee shall consider((, in addition to Policy F-251)):1790a. Compliance by the water system with its water system
- 1790a. Compliance by the water system with its water system1791comprehensive plan, including water conservation elements;

- 1792 1793
- 1794
- 1795
- 1796
- 1797 1798
- b. Whether it can meet its duty to provide service within its service area, as required under ((c))Chapter 43.20 Revised Code of Washington; and
- c. Consistency with the service provisions of any applicable Coordinated Water System Plan, as adopted in King County Code Chapter 13.28.
- 1799 F-496 ((The c)) King County shall not approve a water system plan with a 1800 proposed retail service area where the water system is unable to 1801 provide timely and reasonable service for one or more of the reasons identified in Revised Code of Washington 43.20.260. King County 1802 1803 accepts and encourages timely and reasonable service by a water utility 1804 within its service area through the provision of satellite or remote 1805 ownership or management of facilities that are not physically 1806 connected with the water utility's other facilities. This does not 1807 preclude a modified or expanded service area boundary for the water 1808 system ((in order)) to correct problems and provide reliable potable 1809 water service to existing water users within the proposed modified 1810 service area. The Utilities Technical Review Committee is responsible 1811 for making determinations of timely and reasonable service, as 1812 provided for under Chapter 70A.100 Revised Code of Washington 1813 ((<del>70.116,</del>)) and ((<del>K.C.C.</del>)) <u>King County Code Chapters</u> 13.24 and 13.28.

#### ((5.)) <u>4.</u> **Resource Management and Protection** 1814

1815 Water system reservoirs and watersheds often serve a number of functions((. These 1816 functions can include)) including open space, recreation, forestry, and resource 1817 management. ((However, each function must be weighed against t))The primary 1818 purpose of ((such)) reservoirs and watersheds((, which)) is to provide and protect 1819 supplies of potable drinking water.

1820 1821 ((<del>F-253</del>)) F-497 ((<del>Consistent with Countywide Planning Policies, p</del>))Public drinking 1822 water system surface water reservoirs and their watersheds should: 1823

- a. ((b))Be managed primarily for the protection of drinking water((, but should)); and
- b. ((a))Allow for multiple uses, including recreation, when such uses do not jeopardize drinking water quality standards((. P)) and public watersheds ((must be)) are managed to protect downstream fish and agriculture resources.
- 1830 ((F-254)) F-498 Groundwater-based public water supplies should be protected by 1831 preventing land uses that may adversely affect groundwater quality or 1832 quantity to the extent that the supply might be jeopardized. The 1833 ((c))County shall protect the quality and quantity of groundwater used 1834 as water supplies through implementation of Policies E-((493))445 1835 through E-((497))451 where applicable.

#### Energy ((and Telecommunications)) Ι. 1836

1837 King County's economy and quality of life depend on readily available, affordable, 1838 ((and)) clean energy ((and telecommunications)) resources. Energy ((and electronic 1839 communications)) systems provide important public services, and their implementation 1840 must be coordinated with land use planning. The sustainable development and 1841 efficient use of energy resources can ensure their continued availability while minimizing 1842 long-term costs, risks, and impacts to public health and safety, air and water quality, and 1843 essential public infrastructure and services.

1844

1824

1825

1826

1827

1828

1829

1845 ((<del>In order t</del>))<u>T</u>o help mitigate global climate impacts resulting from human energy use, 1846 King County is planning its energy uses in ways that will improve energy efficiency;

increase production and use of renewable energy; reduce risk to public health, safety,
critical services, and the environment; and reduce the release of greenhouse gases and
emissions. This includes rigorous and transparent review and regulation of fossil fuel
facilities.

1852 ((The 2015 Strategic Climate Action Plan provides targets for reducing energy usage in 1853 operations and increasing the amount of renewable energy that the County produces or 1854 uses. These targets are measured for the County government as a whole; divisions are 1855 directed to make policies and plans consistent with the King County Strategic Climate Action Plan and implement those as practical, considering the Plan and their other 1856 service priorities. Some divisions may exceed the targets, while others may not meet 1857 1858 them in given years - but all divisions will use the Strategic Climate Action Plan as the 1859 basis for strategic energy planning and direction.

1860

1851

1861 King County divisions are taking steps to translate countywide energy targets into
 1862 agency specific plans and action. Agency specific plans are important steps that support
 1863 progress towards countywide targets.

1864

1865 The Strategic Climate Action Plan sets the County's long term goal of reducing its 1866 greenhouse gas emissions from government operations, compared to a 2007 baseline, 1867 by at least at least 80% by 2050. In order to accomplish this goal, the County is 1868 dedicated to reducing its energy use, which is the most cost-effective approach to 1869 reducing greenhouse gas emissions. Energy reduction goals are included in the Strategic Climate Action Plan. In its government operations, the County set buildings 1870 1871 and facilities normalized energy use reduction goals of five percent reduction by 2020 1872 and 10% by 2025, as measured against a 2014 baseline. In its vehicle operations, the 1873 County set a reduction goal of at least 10% of its normalized net energy use by 2020, 1874 again measured against a 2014 baseline.))

1875

1892

1876 Various local, state, and federal agencies regulate ((retail)) energy providers in King 1877 County. Gas and electric utility resource and conservation plans are approved by the 1878 utilities and other agencies through a public process. The Washington Utilities and 1879 Transportation Commission reviews and accepts plans of investor-owned electric and gas utilities, the Seattle City Council approves the plans of Seattle City Light, and 1880 1881 Snohomish Public Utility District is governed by a utility board. Electric and gas utilities 1882 operate in King County under franchises with the ((-)) county for use of the public right-1883 of-way. The Utilities and Transportation Commission also defines the costs that investor-1884 owned utilities can recover, approves rates, sets service standards, and resolves 1885 customer complaints.

((A. Energy)) 1886

# 1887 1. Consistency with Land Use Plans

1888 ((State law mandates that electric and gas public service companies provide the same
 1889 level of service on a uniform basis, regardless of location. (Revised Code of Washington
 1890 80.28.110). Policies in this chapter encourage the utilities to prioritize capital
 1891 improvements in a manner consistent with land use.

1893F-301)) F-499King County should work to ensure that ((E))energy providers'<br/>resource and facility plans ((should)) be consistent with the King County<br/>Comprehensive Plan and ((should)) provide for a reliable source of<br/>energy in the event of natural disaster or other potential threats of<br/>disruption to service.18931894

1899 ((Disruption of traffic due to public and private road projects frequently occurs in King
 1900 County. Policies in this chapter support existing programs to notify utilities of upcoming
 Services, Facilities, and Utilities - Page 9-36

projects to build, expand, or maintain county roads so utility and road construction can
 be coordinated. Distribution systems for gas, electric and telecommunications
 installation in new construction now have separate permits. Permit consolidation is
 desirable as a means to expedite review while protecting the environment.

# 1906F-302)) F-500King County should coordinate public road construction and<br/>maintenance projects with utility construction and maintenance.1907maintenance projects with utility construction and maintenance.1908

1905

1915

 ((Appropriate planning, such as increased housing density, transit-oriented development and walk-to-work housing can significantly reduce regional energy use over time. Similarly, land use regulation can support increased availability and use of renewable energy. For example, consideration of solar access in land use codes and building siting can increase the potential for solar energy use. Policies in this chapter encourage such energy-conscious development.

- 1916<br/>1917F-303)) F-501<br/>will improve energy efficiency, and<br/>will improve energy efficiency, and<br/>b) should support the expansion of<br/>renewable energy resources through development regulations((,<br/>prudent variances)) and active incentive programs when the benefits of<br/>doing so outweigh the costs.1921
- 1922<br/>1923F-502Results from an equity impact review shall be used as an important<br/>consideration to identify impacts and opportunities of new, modified,<br/>or expanded transmission and distribution lines, gas or hazardous1924<br/>1925or expanded transmission and distribution lines, gas or hazardous<br/>liquid transmission pipelines, fossil fuel facilities, hydroelectric<br/>generation facilities, and nonhydroelectric generation facilities. The<br/>County's equity and racial and social justice principles should be used<br/>to improve residents' access to the determinants of equity.
- 1929 2. Energy Efficiency, Conservation, and Alternative Energy1930 Sources

((King County Countywide Planning Policy CO-6 states that "aggressive conservation 1931 1932 efforts shall be implemented to address the need for adequate supply for electrical 1933 energy and water resources, protect natural resources, and achieve improved air 1934 quality.")) King County has a continued commitment to energy efficiency, conservation, use and production of renewable resources, and quality enforcement of the energy 1935 1936 code. ((Recent recognition of climate change and other negative impacts of energy 1937 infrastructure have brought the need to improve the county's energy use patterns and supplies into the forefront of policy discussions.)) King County's current energy use 1938 1939 patterns and energy supplies could be modified and improved to reduce air pollution 1940 (((including)) and greenhouse gas emissions(()), conserve non-renewable resources 1941 important to future generations, and ((help to)) limit the growth in energy costs. 1942

1943((F-304)) F-503All King County departments and divisions shall use the Strategic1944Climate Action Plan, or successor plans, as the basis for strategic1945energy planning and direction, including development and adoption of1946strategic energy management, efficiency, and conservation programs1947in their operations.1948

((The Strategic Climate Action Plan sets the county's long term goal of reducing its greenhouse gas emissions from government operations, compared to a 2007 baseline, by at least at least 80% by 2050. In order to accomplish this goal, the county is dedicated to reducing its energy use, which most heavily contributes to its greenhouse gas emissions. Included in the Strategic Climate Action Plan were short term goals for energy reduction. For 2015, in its government operations for buildings and facilities, the county set a reduction goal of 15% normalized net energy use as measured against

the 2015 baseline. In its vehicle operations, the county set a reduction goal of at least
 10% of its normalized net energy use, again measured against a 2007 baseline.

1958
1959 To measure its progress in reducing energy consumption, the county uses the process
of "normalizing" energy use, which provides a measure of the energy use per unit of
service value delivered (units of energy / units of service delivered). Application of this
methodology is typically adjusted for weather, with the Wastewater Treatment Division
making adjustments according to weather and wastewater flow. Normalization is
intended to reflect actual energy use reductions given varying weather conditions
compared to the baseline.

1967 Reaching the specified energy reduction targets directly reduces the county's
 1968 greenhouse gas emissions.

- 1970F-305)) F-504King County shall plan for further reduction in its energy use from1971government operations by setting near- and long-term energy use and1972fossil fuel use1973reduction targets, consistent with its long-term goals of1974working to continuously reduce operating costs and environmental1974impacts, maximizing energy efficiency and minimizing waste.
- 1976((F-306)) F-505King County shall maximize the ((production)) capture, use and<br/>marketing of renewable energy at its wastewater treatment plants and<br/>Cedar Hills Landfill, to the extent feasible and consistent with other<br/>County goals, and pursue other renewable energy generation projects<br/>where cost-effective.
- 1982((F-307)) F-506King County ((should)) shall provide leadership in, and foster the<br/>development and increased use of, clean, renewable, and alternative<br/>fuel and energy technologies, such as anaerobic digestion and co-<br/>digestion of organic material to create energy sources that result in the<br/>reduction of greenhouse gas emissions and fossil fuel use, with a<br/>particular emphasis on creating renewable natural gas.1988
  - ((F-308 King County shall:

2062 2063 2064 2065 2066 2067 2068	a coordinated, strategic approach to energy management and investment in energy efficiency is being implemented in the county.F-312King County shall develop and adopt strategic energy management, efficiency and conservation programs in its own operations, including: a. Consolidated energy accounting of county facilities to establish baseline energy performance for the county, benchmarking of

2072 b. Energy efficiency audits of all county facilities over 20,000 square 2073 feet and the creation of action plans for reducing energy use at 2074 such facilities; 2075 c. Energy management plans for energy-intensive or special-purpose 2076 county facilities such as wastewater treatment plants, correctional 2077 facilities and transit bases that focus on least-cost management and 2078 that include specific approaches for each facility's use, as well as 2079 the production and sale of energy where appropriate; 2080 d. Mandatory energy efficiency and resource use guidelines for 2081 operation and maintenance of all county-occupied facilities, while 2082 recognizing the unique operating requirements of specialty 2083 facilities: 2084 e. Programs to encourage employees to implement energy 2085 conserving measures at work; and 2086 f. Incentives, including retaining a portion of energy cost savings, to 2087 county agencies and departments for achieving energy efficiency. 2088 King County should benchmark all applicable ((c))County buildings 2089 <del>F-313</del>)) F-511 2090 as a basis for measuring energy efficiency improvements, using the 2091 Environmental Protection Agency Portfolio Manager Tool, where 2092 applicable. 2093 2094 ((<del>F-314</del>)) F-512 King County should purchase only certified energy-efficient appliances and office equipment (such as ENERGY-STAR labeled 2095 2096 equipment) when available for specific equipment and shall require 2097 consideration of energy efficiency and life-cycle costs in all 2098 procurement decisions as an element of determining the lowest 2099 responsive bids. 2100 2101 ((Meeting the County's energy goals will require a commitment to pursuing multiple funding strategies. Grants, loans, and utility rebates provide essential seed money for 2102 2103 up-front investments in energy efficiency projects, and the County should seek them 2104 aggressively. County departments should use the county's Fund to Reduce Energy 2105 Demand loan program to fund cost effective energy and water efficiency projects that 2106 cannot otherwise be funded. 2107 2108 <del>F-315</del>)) <u>F-513</u> King County shall use its Resource Life Cycle Cost Assessment 2109 calculator to evaluate ((energy projects)) all capital projects that involve 2110 equipment that use energy to determine if the operations and 2111 maintenance cost savings over the life of ((an energy)) the project's assets exceed the implementation costs, taking into account all 2112 2113 identified costs associated with energy efficiency and renewable 2114 energy ((projects)). 2115 2116 ((<del>F-316</del> Efficient energy consumption, conservation, the use of renewable 2117 technologies, and energy responsible land use decisions should be a 2118 priority in King County. King County promotes the maximum use of 2119 energy conservation and renewable energy resources now, while 2120 leaving options for increasing conservation and renewable 2121 technologies in the future.)) 2122 2123 District energy systems provide space and water heating and/or cooling to multiple 2124 buildings, through pipes originating from a central heating or cooling source - generally 2125 a central energy plant. ((King County government is unique in that it also has the ability 2126 to serve as a district heat supplier through the potential for buildings to utilize the 2127 energy value of the warmer-than-ambient water in the County's almost 400 miles of wastewater conveyance.)) Centralizing the generation of heat and/or cooling through a 2128 2129 district plant and/or delivering energy content to multiple facilities through a 2130 distribution network can eliminate the need for equipment in each individual building.

District heating and cooling plants can be constructed with energy efficiency in mind.
Central plants that provide combined heat and power can offer increases in energy
efficiency compared to on-site heat generation in individual buildings, by sharing
heating and cooling resources, and can be an effective method of cutting carbon
emissions.

2138 ((The t))<u>T</u>echnologies used to generate energy from wastewater are emerging, and offer
 2139 the potential to achieve environmental and economic benefits through the recovery of
 2140 resources from wastewater. <u>King County government is unique in that it also has the</u>
 2141 <u>ability to serve as a district heat supplier through the potential for buildings to utilize the</u>
 2142 <u>energy value of the warmer-than-ambient water in the County's almost 400 miles of</u>
 2143 <u>wastewater conveyance.</u>

- 2145((F-317)) F-514King County should pursue district energy opportunities, such as<br/>combined heat and power and wastewater heat extraction, to<br/>maximize resource recovery efforts, in ways that can offer economic<br/>and environmental benefits to the ((c))County and community at large.<br/>((This will be done by pursuing opportunities such as encouraging the<br/>use of wastewater for heat extraction and other forms of energy<br/>generation in the county's wastewater conveyance system.2152
- 2153F-318King County should pursue combined heat and power district energy<br/>opportunities in its own facilities, as well as in partnership with other<br/>public and private entities, that result in reduced energy consumption,<br/>greenhouse gas reductions and financial savings to the county.2157
- 2158F-319To implement the Countywide Planning Policy of aggressive2159conservation and promotion of regional air quality, King County2160should:
  - a. Effectively enforce the energy code as part of the general permit process;
  - <del>b. Provide density incentives through the zoning code for</del> <del>energy-efficient developments;</del>
    - c. Continue to improve the fuel efficiency and emissions of the county-owned fleet of motor vehicles;
    - d. Work with utilities to become a model of energy efficiency in facilities owned or operated by Metropolitan King County; and
    - e. Seek cost-effective ways to capture energy from county operations which other-wise would be lost, such as methane gas from landfills and sewage treatment.

2173 Methane generated from sewage treatment plants and landfills is a potential source of
2174 energy. In addition, methane is a potent greenhouse gas emissions. As a result,
2175 capturing methane from these facilities and putting it to a productive use provides a
2176 dual benefit.))

2177 2178 <u>F-515</u> King County should support new energy resources and technologies 2179 that reduce energy use, support a resilient electrical grid, decarbonize 2180 energy sources, and electrify energy use in the building and 2181 transportation sectors. In supporting these efforts, King County 2182 should: 2183 Allow for siting of green energy and distributed energy resources, a. 2184 while considering appropriate use of land and associated impacts, 2185 including protection of designated Natural Resource Lands and 2186 open spaces; 2187 b. Accommodate the use of green energy and distributed energy 2188 resources, such as microgrids, in new and redeveloped properties;

2189	c. Reduce barriers to new and upgraded substations, transmission
2190	facilities, and the distribution system, for infrastructure that is
2191	needed to achieve County greenhouse gas reductions targets;
2192	d. Encourage and support the integration of new technologies and
2193	fuel sources;
2194	e. Minimize negative impacts on and maximize benefits for frontline
2195	communities resulting from related projects;
2196	f. Support equitable engagement strategies during project planning
2197	to actively solicit public participation and input from impacted
2198	<u>frontline communities;</u>
2199	g. Support equitable opportunities for frontline communities to
2200	participate in distributed energy resources;
2201	<u>h. Focus especially on areas that are subject to frequent power</u>
2202	outages;
2203	i. Partner with first responders to ensure adequate safety measures
2204	are in place for people and the environment;
2205	j. Support efforts by utilities and other entities to advance these
2206	outcomes; and
2207	k. Review and update development regulations periodically to ensure
2208	<u>that they appropriately support new energy resources and</u>
2209	technologies and mitigate for associated impacts.
2210	
2211	The moderate climate of the Puget Sound region provides an opportunity for significant
2212	use of solar energy. Relatively low heating and cooling needs in much of the county
2213	allow for the potential for passive and active solar technologies to meet heating and
2214	cooling needs with proper building design. Similarly, the mild climate and available
2215	solar energy allows for growing (( <del>some</del> )) of food year((-))-round, potentially decreasing
2216	the use of fossil fuels for a portion of residents' food node. This opportunity for local

solar energy allows <u>for</u> growing ((<u>some</u>)) <u>of</u> food year((-))<u>-</u>round, potentially decreasing the use of fossil fuels for a portion of residents' food needs. This opportunity for local investments in passive and active solar design and ((<del>in</del>)) local food production can only be realized if building and neighborhood site design provides for solar orientation and through the development of regulations to protect solar access.

2221 ((Although permit staff attempt to accommodate solar design, c))<u>C</u>urrent regulations do 2222 not typically take into account solar orientation or solar access protection from 2223 development on neighboring properties. ((In addition, regulations, such as b))Building 2224 height and building setback allowances, road access requirements, and protections for 2225 critical areas, stormwater, and native vegetation, may limit suitable locations for 2226 providing solar access. Requirements to create and maintain view corridors may or may 2227 not provide solar gain. ((In order t))To protect solar access, landowners or developers 2228 enter into voluntary solar easements. As an alternative, some municipalities have 2229 incorporated measures to protect solar access in their comprehensive plans and 2230 development regulations. King County ((should study these measures and)) continues 2231 to evaluate and implement best practices in this area in support of the ((-))County's 2232 larger sustainability goals.

2233 2234 ((F-321)) F-516 King County should encourage((s)): 2235 a. ((the u))Use of solar energy; 2236 b. ((the s))Siting of roads, lots, landscaping and buildings for 2237 improved solar orientation; c. ((the u))Use of passive solar design and active solar technologies; 2238 2239 ((<del>and</del>)) 2240 d. ((the p))Protection of solar access; and 2241 e. Pursuit and allocation of outside funding to support access to solar 2242 energy for frontline communities. 2243 2244 ((<del>F-322</del>)) F-517 King County should consider passive and active solar energy 2245 collection systems in all new facility designs and major rehabilitations. 2246 Solar electric generation systems interconnected with local utilities 2247 should be employed where cost-benefit analysis shows net benefits,

2220

2248 2249

# considering emergency power potential and capitalizing on utility net((-))_metering and power production credit programs.

2250

((Gas and electric utilities offer low-income energy assistance programs. All feasible
 actions to increase the availability of conservation measures to low-income residents
 should be pursued, such as public-private cooperation and combining existing
 rehabilitation efforts with installation of energy efficiency measures.))

# 2255 3. Electric Utilities

2256 The four-state ((Seventh Northwest Electric Power and Conservation Plan (also called the 6th Power Plan) produced in 2016)) 2021 Northwest Power Plan by the Northwest Power 2257 2258 and Conservation Council provides a blueprint for the development of electricity 2259 resources in the region. Bonneville Power Administration and other federal agencies, 2260 the region's utilities, state and local government, private businesses, and the people of 2261 the Northwest all participate in implementing the council's goals. Electric utilities 2262 serving unincorporated King County include Bonneville Power Administration(<del>(, Seattle</del> 2263 City Light, Snohomish Public Utility District)) and Tanner Electric Cooperative. Puget 2264 Sound Energy provides both electricity and natural gas service. 2265

- A number of significant events in the past years have influenced the electric powerbusiness in King County's power markets. These include:
- 2268 1) Ongoing very large expenditures by hydropower utilities (notably Bonneville Power
   2269 Administration) to mitigate salmon habitat losses caused by dams;
- 2270 2) The recognition of human-caused climate change, driven mostly by carbon dioxide
   2271 release a significant portion of which can be attributed to electric power
   2272 generation; and
- 3) The passage of ((State Initiative 937 codified at)) the Energy Independence Act in Chapter 19.285 Revised Code of Washington ((chapter 19.285)), requiring utilities to acquire an increasing portion of their electric supplies from qualified renewable resources (a ((so-called)) renewable resource portfolio standard).

Hydropower is the largest single source of ((the)) existing electrical power, with the county's major electric resources located outside King County. These include the Grand Coulee, North Bonneville, and Ross Dams. No new large_dam sites are available in the region, making hydropower a very small part of ((projected)) any new regional powergenerating resources.

((Existing hydropower facilities in King County include Snoqualmie Falls, Cedar Falls,
 Twin Falls, Weeks Falls, and Black Creek. Proposed projects include new facilities at
 Hancock Creek and Calligan Creek (both are tributaries of the North Fork Snoqualmie),
 Martin Creek near Stevens Pass, and Black Canyon on the North Fork Snoqualmie. Few
 if any additional projects beyond these listed are expected to be built in King County,
 and some of those listed above, although licensed, may not be built.))

- The Federal Energy Regulatory Commission licenses such projects, but in doing so must consider existing plans and policies of public and private jurisdictions. While power generation benefits the public, care must be taken to ensure that small hydroelectric projects are constructed in an environmentally sound manner, directing new, small hydropower facilities, for example, to streams that do not have anadromous fish. Construction and operation must also be consistent with the intended functions and uses of forestlands, where most small hydroelectric projects are located.
- 2299The ((Northwest Power and Conservation Council's seventh plan))2021 Northwest2300Power Plan indicates no significant addition of hydropower resources is projected. The2301Northwest Power and Conservation Council plan also identifies Protected Areas ((to))

2302 that protect some streams and wildlife habitats from hydroelectric development where 2303 such development would have major negative impacts that could not be reversed. In 2304 these areas, the Northwest Power and Conservation Council finds that mitigation 2305 techniques cannot assure that all adverse impacts of hydroelectric development on 2306 these fish and wildlife populations will be mitigated; that even small hydroelectric 2307 projects may have unacceptable individual and cumulative impacts on these resources; 2308 and protecting these resources and habitats from hydroelectric development is 2309 consistent with an adequate, efficient, economical, and reliable power supply.

2310

Electrical utilities supplying King County are required by Washington State law to plan for their electric power resources in an integrated resource planning process very similar to the process ((that the Northwest Power and Conservation Council)) used for ((its 6th)) the 2021 Northwest Power Plan. ((County suppliers Puget Sound Energy, Seattle City Light and Snohomish County Public Utility District)) These are required by state law to regularly assess their power needs, supply strategies, and impacts using Integrated Resource Plans.

2358

2359

((The passage of the I-937 renewable resource portfolio standard has increased the
 demand (and attendant value of) qualified renewable resources. I-937, codified as the
 Energy Independence Act under 19.285 Revised Code of Washington, specifically
 excludes new freshwater hydroelectric projects from the definition of renewable for
 purposes of qualifying energy credits, with the exception of incremental efficiency
 improvements to certain existing facilities.

- 2326 F-324)) F-518 To address the cumulative effects of multiple energy facilities, King 2327 County should continue to participate in the state and federal 2328 processes for licensing, authorizing, or certifying, and any such 2329 renewals, of existing and proposed power generation projects within 2330 King County. King County's review of individual projects in the state 2331 and federal processes should consider consistency with designated 2332 land uses and environmental protection goals. Specifically, power 2333 generation projects should: 2334
  - a. Have climate change impacts considered and mitigated to the greatest extent practical;
    - b. Be consistent with, and preferably directly incorporated in, utility integrated Resource Plans;
    - c. Use renewable resources to the greatest extent practical;
    - d. Include public engagement;
    - e. Not significantly interfere with commercial forestry operations;
    - f. Be located and operated in a manner such that impacts to salmonid fish and wildlife are minimized;
      - g. Avoid unstable and erosion-prone areas;
      - h. Include performance bonding to fund erosion control;
        - i. Provide full mitigation for construction and operation impacts;
  - j. Avoid, to the extent ((practicable)) <u>feasible</u>, diminishing scenic values;
    - k. Incorporate adequate public safety measures; and
    - I. In the case of hydropower, not be located within a Protected Area as designated by the Northwest Power and Conservation Council.
- 2352((F-325)) F-519King County ((and the)) should work with utilities ((should)) to2353identify and preserve corridors, consistent with the Growth2354Management Act goal of focusing growth within the Urban Growth2355Area, to accommodate future electric power transmission and2356distribution lines. Corridor designation should include:2357a. Identification of appropriate shared uses and recognition of the
  - a. Identification of appropriate shared uses and recognition of the values provided by nonutility uses, such as recreation;
  - b. Recognition of county roads as utility corridors; and

2360 2361	<ul> <li>Evaluation of proposed facility plans on a system-wide basis, rather than project-by-project.</li> </ul>
2362	
2363	(( <del>F-325a Results from the King County Equity Impact Review Tool will be used as</del>
2364	an important consideration to identify and assess impacts and
2365	opportunities of adding, expanding or upgrading transmission and
2366	distribution lines and the county's Equity and Social Justice principles
2367	should be used to improve residents' access to the determinants of
2368	equity.
2369	
2370	<del>F-326</del> )) <u>F-520</u> When new, expanded <u>,</u> or upgraded transmission is required, use of
2371	existing corridors that have above-ground utilities should be evaluated
2372	first. King County should facilitate appropriate corridor sharing among
2373	different utility types and owners.
2374	
2375	(( <del>F-327</del> )) <u>F-521</u> New electrical distribution lines should be installed underground
2376	where reasonably feasible and not a health or safety concern. (( <del>The</del>
2377	county should encourage underground placement of existing
2378	distribution lines through such tools as local improvement districts.
2379	
2380	Public concern exists over the potential health effects of electrical power lines. The
2381	concern focuses on the effects of extremely low level electromagnetic fields.
2382	Seattle-King County Department of Public Health currently responds to inquiries from
2383	residents about extremely low level electromagnetic fields and keeps abreast of current
2384	research. The following policy recognizes the inconclusive nature of the data
2385	concerning extremely low level electromagnetic fields and the need to have an
2386	informed citizenry through public disclosure of available research about the potential
2387	health risks. Scientific evidence to-date does not support firm conclusions about the
2388	existence of adverse health effects related to extremely low level electromagnetic fields.
2389	
2390	F-328 King County will monitor scientific research on potential human health
2391	effects of extremely low frequency electric and magnetic fields. If
2392	federal or state agencies promulgate rules to reduce exposure to
2393	extremely low level electric and magnetic fields – through changes in
2394 2395	the use of appliances, construction practices, the location of electrical
2395 2396	<del>infrastructure or other activities – the county shall inform its residents,</del> <del>in adherence with the Executive Order and other applicable policies on</del>
2396 2397	written language and translation processes, and take appropriate
2397	actions.))
2370	

# 2399 4. Natural Gas

2400 ((Generally, the most thermally efficient use of natural gas is in "direct applications." The 2401 choice of fuel shall be based on market conditions and the prudently weighted greenhouse gas emissions impacts of using natural gas as compared with alternatives, 2402 2403 with the customer comparing various fuels.)) King County works to reduce fossil fuel 2404 natural gas use in the built environment through a combination of energy use reduction, 2405 the use of renewable natural gas, and conversion to high-efficiency heating systems 2406 (such as heat pumps) that use electricity. Many homes and businesses in King County 2407 do not have the choice of natural gas, ((however,)) even within the Urban Growth Area. 2408

King County has by far the largest resource of biologically produced methane in the region, from its wastewater treatment facilities and its solid waste landfills. King County should continue to develop and promote the development of biologically((=))_derived sources of fuel gas (((i.e.,)) renewable natural gas), research technologies and opportunities to utilize low methane concentration gas from closed landfills for beneficial uses, and support the efficient marketing and use of such gas. Any renewable energy production associated with methane or biologically derived materials should

2416 consider other potential uses of relevant resources, such as the use of edible food to
 2417 reduce hunger.

Because methane gas can serve as a greenhouse gas-reducing substitute for fossil fuel
 natural gas, and become a feedstock for aviation fuels, maritime fuels, the generation of
 green hydrogen and for other beneficial purposes to help de-carbonize various
 industries, several of the energy policies in this subsection relate to this energy source.

- 2424((F-329)) F-522King County should work to remove barriers to the availability and2425efficient use of renewable natural gas.
- 2427<br/>2428((F-330King County will provide leadership in and promotion of the use of<br/>renewable natural gas to minimize climate change impacts, including<br/>that from its own sources, as a substitute for fossil-sourced natural gas<br/>where practical.))
- 2431 5. Natural Gas Distribution Systems

Natural gas pipelines fall into two major categories: gas transmission lines that transport natural gas from production fields to ((<del>local</del>)) distribution companies, and distribution systems that deliver natural gas from transmission pipelines to retail customers. ((<del>The</del> <del>federal government may define certain parts of the natural gas distribution system that</del> <del>serve large volume gas users as part of the transmission system.</del>)) Distribution systems for transporting natural gas are fundamentally different from transmission gas pipelines((,)) and should be regulated based on their design, use, and location.

2440 Gas distribution systems ((are owned and operated by local distribution utilities. Such 2441 systems)) consist of the pipelines that deliver natural gas to end users together with 2442 intermediate supply lines. The distribution system is constructed incrementally, with the 2443 addition of new segments and the upgrading of existing lines occurring in numerous 2444 small projects. The distribution system is a network that is primarily located in road 2445 rights-of-way, where service is available. ((Local d))Distribution companies are subject 2446 to the comprehensive safety regulations administered by the Washington Utilities and 2447 Transportation Commission under state law and regulations and by the ((federal)) 2448 United States Department of Transportation's Office of Pipeline Safety under federal law 2449 and regulations. The rates and services of investor-owned utilities also are subject to 2450 comprehensive regulation by the Utilities and Transportation Commission under state 2451 law and regulations.

- ((<del>F-341</del>)) <u>F-523</u> King County ((<del>recognizes that the</del>)) <u>shall use the franchise</u> <u>agreements process to require</u> gas distribution ((<del>system is primarily located in road rights-of-way</del>)) <u>utilities comply with county, state, and</u> <u>federal safety and health regulations</u>.
- ((<del>F-342</del>)) <u>F-524</u> In the interest of safety and reliability of the natural gas distribution pipeline systems, the ((c))<u>C</u>ounty should take steps to protect and preserve the signs that mark pipelines.
- ((F-343)) F-525 Structures designed for human occupancy ((shall)) should not be located within gas distribution pipeline rights-of-way and should be set back from the pipeline to protect public health, safety, and property. No structures shall be located over the pipeline.
- 2467((F-344Permit requirements shall require excavators to ensure adequate2468protection of any facilities that are encountered during their work. This2469shall include but not be limited to adhering to the foreign facility2470owners requirements for separation and backfill, developing joint plans

2471	when drilling or boring parallel to foreign facilities, and potholing all
2472	facilities that will be crossed by drilling or boring.))
2473	

## 2474 6. Hazardous Liquid and Gas Transmission Pipelines

2485

2505

2475 Part of the fossil fuel system is the movement of hazardous liquid and gas by transmission pipelines. Hazardous liquid and gas transmission pipelines, as defined by 2476 2477 Revised Code of Washington 81.88.010 and Washington Administrative Code 480-93-005, respectively, provide a vital service of transporting hazardous materials from one 2478 2479 location to another. Long-distance transmission pipelines move a variety of hazardous 2480 materials, including crude oil, petroleum products, natural gas, and hazardous liquids((,)) such as anhydrous ammonia. Pipeline rupture or failure can result in release 2481 2482 of these materials, which are highly flammable, explosive, or toxic. The policies in this 2483 chapter identify public values and goals to ((assure)) ensure that the transmission of 2484 hazardous materials by pipeline address public health and safety.

2486 The Federal Energy Regulatory Commission regulates the location, construction, and operational conditions of interstate natural gas pipelines through its certification 2487 2488 process. The state and federal government regulate the location, construction, and 2489 operational conditions of hazardous liquid and intrastate gas pipelines through the 2490 Energy Facility Site Evaluation Council. In its review of pipeline applications, however, 2491 the Energy Facility Site Evaluation Council must determine whether the pipelines are 2492 consistent with ((c))County land use plans and zoning codes. Thus, King County's authority to regulate the location of pipelines is through the comprehensive plan and 2493 2494 development regulations. 2495

- 2496 ((F-331)) F-526 King County recognizes that federal and state regulatory programs 2497 govern the design, construction, and operation of hazardous liquid and 2498 gas transmission pipelines. King County's land use designations, 2499 zoning classifications, and development regulations should be focused 2500 on increasing safety and reducing environmental impacts of transmission pipelines regulated by the federal and state government. 2501 2502 King County shall actively engage in federal and state review processes to identify local impacts and risks and advocate for safety and 2503 2504 environmental protections.
- 2506 ((<del>F-332</del>)) <u>F-527</u> Any new, modified, or expanded hazardous liquid and gas 2507 transmission pipelines proposed for construction in King County shall 2508 meet the County's development regulations, including but not limited 2509 to, King County's zoning code, building code, grading code, and 2510 shoreline management code. Proposals for modifications, such as 2511 regular maintenance or changes required to address hazards or comply 2512 with federal or state safety requirements, shall be clearly distinguished 2513 from proposals to modify or expand facility capacity or uses. 2514

2515 King County anticipates that few new hazardous liquid or gas transmission pipelines will 2516 be constructed in the near future. However, as existing pipelines age and the relationship between resources, refineries, and markets changes over time, new 2517 2518 pipelines will need to be constructed. Hazardous liquid and gas transmission pipelines are best constructed away from locations where large numbers of people assemble. 2519 2520 King County recognizes ((however,)) that under some circumstances((-,)) new gas 2521 transmission pipelines may need to locate in densely populated areas as the only practical alternative to meet the demand for service. 2522 2523

2524((F-332aResults from the King County Equity Impact Review Tool will be used as2525an important consideration to identify impacts and opportunities of2526siting new gas or hazardous liquid transmission pipelines and the

2527 2528 2529

2536

2541

2547

2552

2557

county's Equity and Social Justice principles should be used to improve residents' access to the determinants of equity.

- 2530F-333)) F-528New hazardous liquid and gas transmission pipelines should be2531located away from high-density residential zones, ((Urban))2532unincorporated ((A))activity centers, neighborhood business centers,2533community ((and B))business ((C))centers, ((O))office ((P))parks, sports2534fields, schools and day care centers,2535numbers of people would assemble.
- 2537((F-334When new, expanded or upgraded hazardous liquid or gas2538transmission pipelines are required, use of existing corridors should be2539evaluated first. King County should facilitate appropriate corridor2540sharing among different utility types and owners.
- 2542<br/>2543F-335)) F-529<br/>I located in areas susceptible to soil disturbance or liquefaction or in<br/>aquifer recharge areas. When it is impractical to avoid such areas,<br/>special engineering precautions should be taken to protect public<br/>health, safety, and welfare.

((It is essential to map the location of existing hazardous liquid and gas transmission
 pipelines within King County so that developers know where they are and who to call for
 information before construction begins. Accurate maps will assist King County in
 reviewing land use applications for land uses located near pipelines.

# 2553F-336King County should map the location of existing and new hazardous2554liquid and gas transmission pipelines. Maps shall not substitute the<br/>one-call locating system and shall not be used for any construction or<br/>maintenance activity.

Risks to life and property can be minimized by keeping land uses a safe distance from hazardous liquid and gas transmission pipelines. Pipelines transport a variety of materials, some of which flow under the force of gravity. While standard setbacks do not assure protection from materials that have the ability to migrate, setbacks may protect life and property from hazardous materials that are highly flammable, explosive or toxic. Limiting the allowable uses within pipeline rights-of-way can further reduce risks to life and property.

- 2566 F-337)) F-530 Structures designed for human occupancy ((shall)) should not be 2567 located within hazardous liquid or gas transmission pipeline rights-of-2568 way and should be set back from the pipeline to protect public health, safety and property. No structures shall be located over the pipeline. 2569 Land uses shall be restricted within hazardous liquid and gas 2570 2571 transmission pipeline rights-of-way. Passive recreational uses, such as 2572 hiking trails, may be allowed if the risk to life and property is assessed 2573 and determined to be minimal. 2574
- 2575((F-338Land uses shall be restricted within hazardous liquid and gas2576transmission pipeline rights-of-way. Passive recreational uses, such as2577hiking trails, may be allowed if the risk to life and property is assessed2578and determined to be minimal.2579

Pipeline failure can result from damage caused by excavation near existing pipelines.
 Many existing pipelines initially were constructed in less-populated areas with little
 development. As demand for land grows, the risk of conflict between existing pipelines
 and land development increases.

- 2585F-339King County should promote the safety and reliability of the hazardous2586liquid and natural gas transmission pipeline systems by requiring2587developers, contractors, and excavators to notify the state, pipeline2588operators and utilities through the one-number locator service, before2589beginning excavation or construction.
- 2591F-340)) F-531In the interest of safety and reliability of the hazardous liquid and2592natural gas interstate transmission pipeline systems, the ((c))County2593should take steps to protect and preserve the signs that mark pipelines.

# 2594 7. Crude Oil Transport by Rail, Truck and Vessel

Part of the fossil fuel system is the transport of crude oil by rail, truck, and vessel. King
 County and local governments across the United States are facing rapid and significant
 increases in train traffic carrying crude oil. ((According to the Washington State
 Department of Ecology's 2014 Marine and Rail Oil Transportation Study, the volume of
 crude oil transported by rail across the US increased 42-fold from 2008 to 2013.

In Washington State, shipments increased from zero in 2011 to approximately 19 unit
 trains a week in 2014, each carrying as much as 3 million gallons of Bakken crude,
 mostly destined to refineries in Washington and California. If the proposed facilities and
 refinery expansions to accommodate rail imports are permitted and fully built over the
 next few years, the weekly unit train number could jump to 137 or more. Congress's
 repeal of the export ban on U.S.-produced oil in 2015 has the potential to further
 increase transportation of Bakken crude through our state.))

2609Oil trains travel through densely populated areas of King County and pass through a2610century-old tunnel under downtown Seattle. Many of the trains carry highly volatile2611Bakken (( $\bigcirc$ ))crude oil, creating risks for catastrophic explosions and loss of life and2612property in the event of a derailment. The passage of mile-long unit trains delay traffic2613and emergency vehicle access at numerous at-grade crossing.

2614

2590

2600

Oil train routes cross numerous rivers, streams, and aquifers and trace the Puget Sound shoreline, putting aquatic resources and Endangered Species Act-listed salmon at risk. Despite facing impacts and risks from oil transport by rail((;)) and burdens for emergency planning and response, local governments like King County have almost no authority to require disclosure of hazards, establish safety standards for trains passing through their jurisdiction, or require railroads and shipper to pay for mitigation of impacts.

King County Office of Emergency Management acts as a regional convener of public and private emergency management entities to plan for, mitigate, and respond to oil train spills and explosions. Additionally, King County convenes and leads a coalition of ((more than 160 elected)) Indian tribal, state, and local leaders known as the Safe Energy Leadership Alliance to advocate for assessment of the full costs and risks of oil and coal transport and coal export on our regional, local and <u>Indian</u> tribal economies, environment, health, and cultural resources.

2630

2631((F-344a)) F-532 King County ((Office of Emergency Management)) shall convene2632local emergency managers, first responders, railroads, and others to2633prepare for and mitigate the increasing risk of oil spills, fire, and2634explosions posed by oil transport by rail, truck, and vessel. This work2635should consider potential risks from related fossil fuel facilities.

2637	(( <del>F-344b</del> )) <u>F-533</u>	King County	should a	advoca	te for e	nviron	menta	al reviews	of
2638	proposed	oil terminals	and of	ther r	elated	fossil	fuel	facilities	in
2639	Washingto	n State to asse	ss and m	nitigate	e for are	ea-wide	e, cum	ulative ris	sks
2640	and impac	cts to public	safety,	infras	tructure	, traff	ic, he	alth, wa	ter
2641	supplies, a	and aquatic re	sources	from	increase	ed oil	transp	oort by r	ail,
2642	truck, and	vessel.					-	-	

- 2644 ((F-344c)) F-534 King County should collaborate with ((local and)) Indian tribal and 2645 local governments to jointly advocate for stronger federal and state 2646 disclosure requirements for hazardous materials being transported by 2647 rail, safety requirements and speed limits for tank cars, minimum 2648 liability coverage for railroads and oil shippers, and financial support 2649 for increased local emergency planning and response to oil spills, fires, 2650 and explosions.
- 2652 ((<del>F-344d</del>)) <u>F-535</u> King County land use policies, development regulations, and 2653 permitting and environmental review processes related to fossil fuel 2654 facilities shall be designed to: 2655
  - a. ((p))Protect public health, safety, and welfare;
  - b. ((m))Mitigate and prepare for disasters;

- 2661 King County shall thoroughly review the full scope of potential impacts ((F-344e 2662 of proposals for new, modified, or expanded fossil fuel facilities. Fossil 2663 fuel facilities include commercial facilities used primarily to receive, 2664 store, refine, process, transfer, wholesale trade, or transport fossil 2665 fuels, such as but not limited to bulk terminals, bulk storage facilities, 2666 bulk refining, and bulk handling facilities.
- 2668 F-344f)) F-536 When reviewing proposals for new, modified or expanded fossil 2669 fuel facilities, King County shall require comprehensive environmental 2670 assessment, and early and continuous public notice and comment 2671 opportunities. King County shall only approve proposals for new, 2672 modified, or expanded facilities when:
  - The proposed facility can confine or mitigate all operational a. impacts;
  - b. The facility can adequately mitigate conflicts with adjacent land uses;
  - c. The full scope of environmental impacts, including life cycle greenhouse gas emissions and public health, have been evaluated and appropriately conditioned or mitigated as necessary, consistent with the County's substantive State Environmental Policy Act authority;
    - d. The applicant ((must comply)) can comply with applicable federal and state regulations, including the Clean Water Act, Clean Air Act, and Endangered Species Act;
    - e. The applicant has demonstrated early, meaningful, and robust consultation with Indian tribes, the public, and surrounding property owners((, and with Indian tribes)) to assess impacts to Indian tribal treaty-protected cultural and fisheries resources; and
    - f. Risks to public health and public safety can be mitigated.

((2016)) 2024 King County Comprehensive Plan - ((updated December 6, 2022)) Adopted TBD Attachment A to Ordinance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555)) xxxxx (Proposed Ordinance 2023-0440)

- 2691((F-344gResults from the King County Equity Impact Review Tool shall be used2692as an important consideration to identify and mitigate impacts of new,2693modified, or expanded fossil fuel facilities. The Equity Impact Review2694should take into consideration the potential effects of a new, modified2695or expanded fossil fuel facility on the health of a population, and how2696those effects may be different within a population.
- 2698<br/>2699F-344hKing County shall establish a periodic review process for fossil fuel<br/>facilities. The periodic review shall be a part of King County's ongoing<br/>enforcement and inspections of fossil fuel facilities, and to assure<br/>compliance with applicable conditions, mitigations, and the most up-to-<br/>date safety and public health standards. The periodic review process<br/>should, subject to applicable law:
  - a. Provide opportunities for public review and comment;
  - b. Evaluate whether the facility is in compliance with current federal, state, and County regulations and implementation of industry-standard best management practices; and
    - c. Allow King County to modify, add or remove permit conditions to address new circumstances and/or unanticipated fossil fuel facility-generated impacts.
- 2712F-344i)) F-537King County shall require ((t))local distribution companies that<br/>convey fossil fuels in King County ((shall)) to prepare and submit a<br/>greenhouse gas impact analysis when applying for a new utility<br/>franchise agreement or an extension or renewal of an existing utility<br/>franchise agreement.2714greenhouse gas impact analysis when applying for a new utility<br/>franchise agreement or an extension or renewal of an existing utility<br/>franchise agreement.
- 2717 J. Telecommunications

### 2718 ((<del>1. Telecommunications</del>))

2697

2704 2705

2706

2707

2708

2709

2710

2711

Various companies provide telecommunications services throughout unincorporated
 King County, including voice, data, and video on various mediums such as wire, fiber
 optic, or radio wave. Effective telecommunications services promote and enhance
 individual information exchange, contribute to a robust regional economy, and afford
 numerous public services, including delivery of emergency services, education, and
 opportunities for community involvement.

- Telecommunication networks are privately owned, publicly regulated entities that are driven by market forces more than statutory requirements. The County has limited regulatory control of telecommunication service providers, except in rights-of-way and associated franchise agreements with those companies that help ensure technical quality, protect customer rights, and support public services.
- 2732 Telecommunications systems will need to grow to continue to support government, 2733 business, resident, education, health, service sector, and mobile communication needs, as well as to respond to new technologies. Telecommunication technologies ((are 2734 2735 changing)) change rapidly and will continue to change during the horizon of this plan. The future telecommunication system ((may make little distinction between cable, 2736 telephone and cellular)) will build off of the existing telecommunication infrastructure, 2737 2738 while utilizing an expanded range of radio frequencies transmitted through antennas to 2739 improve capacity and access. ((Telecommunication services include voice, data, video 2740 and other communication services on various mediums including, but not limited to, 2741 wire, fiber optic or radio wave. Effective telecommunications services are critical to 2742 residents in several ways. They promote and enhance individual information exchange, 2743 contribute to a robust regional economy, and afford numerous public services, 2744 including delivery of emergency services, education and opportunities for community 2745 involvement.))

Telecommunications services are regulated by several entities, including the Federal
Communications Commission and the Washington Utilities and Transportation
Commission. King County has some regulatory authority over telecommunications
services through franchises and the development approval process.

- 2752((F-345)) F-538 King County shall encourage ((T))telecommunication services ((are<br/>to be encouraged as a means)) to mitigate the transportation impact of<br/>development and growth, including ((G))greenhouse ((G))gas<br/>((E))emissions.2756
- 2757((F-346)) F-539King County should encourage((s the)) telecommunication service2758providers to engage in long-term planning for telecommunications2759construction, reconstruction, and facility upgrades, including provisions2760to ensure that the system's capacity, design, and equipment will allow2761users to take advantage of innovative uses, services, and technology.2762
- ((F-347)) F-540 Telecommunication companies and the ((c))County should
   coordinate activities when facilities are being installed or road
   construction projects are scheduled.
- 2767((F-348)) F-541((Long-term planning for telecommunications systems by the)) King2768County regulations should encourage telecommunication service2769providers ((should allow)) to plan and provide for uninterrupted service2770during natural disasters.
- 2772((F-349)) F-542 ((Co-location))Collocationof telecommunication facilities is2773encouraged to reduce the unnecessary proliferation of individual,2774single-user towers. ((Co-location))Collocation shall be required unless2775an applicant can demonstrate to the satisfaction of the ((c))County that2776collocation on an existing tower is not feasible and not consistent with2777service quality and access.
- 2779((F-350)) F-543Although visual impacts are always an important consideration in<br/>the decision to approve or deny a proposal, King County shall give<br/>greater weight to the visual impacts of telecommunication facilities<br/>proposed to be located on residentially((-))zoned lands or in the Rural<br/>Area or Natural Resource Lands. In addition, the visual impacts of<br/>proposals for an individual tower with a single user shall be given<br/>greater weight than proposals to collocate facilities.
- 2787((F-351)) F-544King County considers the placement of telecommunication2788facilities within street rights-of-way as the preferred alternative to the2789construction of facilities on private property. Regulatory standards2790shall require placement in street rights-of-way, especially within2791residential neighborhoods and the Rural Area((s)), unless such a2792location is not feasible or not consistent with service quality and access.

### 2793 ((<del>2.</del>)) <u>1.</u> Cable Services

2746

2751

2771

2794 ((King County Ordinance 10159 dictates current policy for cable services. It states in 2795 part: "it is the County's policy to promote the widespread availability of cable service and diverse information to County residents and to encourage the development of 2796 2797 cable systems and cable technology as a means of communication between and among members of the public and public institutions." The county's cable-related needs are 2798 2799 expressed in the following policies:)) King County regulates companies using County 2800 rights-of-way for providing cable television services to customers in unincorporated areas via franchise agreements. As of 2023, King County has franchise agreements with 2801 2802 two cable companies, Comcast and WAVE Broadband.

- 2803 2804 ((F-352 Long-term planning for cable systems should include service to all 2805 areas of the county which meet the minimum density established in the 2806 cable company's franchise agreement and the county's Cable 2807 **Television Ordinance.** 2808 F-353)) F-545 Cable companies should provide services that meet the cable-2809 2810 related needs and interests of all segments of the community, taking 2811 into account the cost of meeting such needs and interests. 2812
- 2813 ((<del>F-354</del>)) <u>F-546</u> <u>King County should encourage</u> ((€))<u>c</u>able companies ((<del>should</del>)) <u>to</u> 2814 take proactive steps to ensure that there is widespread availability of 2815 and equitable access to cable service. Cable companies should ensure 2816 information is culturally((-))_appropriate and made available to ((residents of the county, especially low-income and limited-English 2817 2818 proficient communities)) county residents, especially households at or 2819 below 80 percent of area median income and/or that speak languages 2820 other than English.
- 2822 ((<del>F-355</del>)) F-547 ((<del>The goal of I</del>))Long-term cable planning should ((be)) support: a. ((a))A high-capacity, state-of-the-art system((.)); 2823 b Installation and activation of ((Ŧ))two-way capacity ((should be 2824 2825 installed and activated.)) 2826 c. Interconnection of ((C))cable systems ((should be interconnected)) 2827 to other communications systems((. They should be designed to 2828 be)); and 2829 d. (("open"; that is, the systems should be)) Open systems, usable by 2830 many, for a variety of purposes. 2831
- ((F-356)) F-548 Public uses of the cable system should be expanded as the system
   is upgraded.
- 2834 ((<del>3.</del>)) <u>2.</u> Internet Access

2821

Increased high-speed (or broadband) internet access and ((R))rapidly changing 2835 2836 technologies ((are providing)) provide opportunities for alternative work environments 2837 and lifestyles ((as more people transmit and receive information through the internet)). 2838 ((Although there is a growing interest in the use of computer technologies, few new 2839 developments are including high-speed internet access lines or home cabling. King 2840 County encourages private partnering between developers, builders and 2841 communication providers to expand the opportunities for access to the internet.)) In 2842 King County and nationwide, people without broadband internet service are at a 2843 growing disadvantage when it comes to education, health care, access to government services, the job market, and civic and cultural engagement. Equal access to 2844 2845 technology can help improve the guality of everyone's life. 2846

- 2847 In 2020, the King County Broadband Access Study was completed, which evaluated the
   2848 availability and accessibility of broadband internet services for King County residents.
   2849 The study:
- 2850 1. <u>Assessed the broadband infrastructure and services available and accessible to the</u>
   2851 <u>community;</u>
- 2852 2. Identified unserved locations (a location that does not have a broadband 2853 connection available) and underserved populations (residents who have broadband 2854 service available to them, but they cannot afford to buy it, or they have some other 2855 barrier to using broadband, such as lack of digital literacy or lack of access to 2856 broadband-enabled devices); and

#### ((2016)) 2024 King County Comprehensive Plan - ((updated December 6, 2022)) Adopted TBD Attachment A to Ordinance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555)) xxxxx (Proposed Ordinance 2023-0440)

2857 3. <u>Included data collection, analysis, findings, and recommended solutions across</u>
 2858 <u>multiple demographics.</u>

2860 King County is exploring and implementing actions to enable expansion of internet and broadband access to more county residents. For example, King County's Institutional 2861 2862 Network (I-Net) provides broadband to eligible government agencies such as schools, libraries, courts, public safety groups, and public health facilities. King County's 2863 2864 Institutional Network (I-Net) has over 2,000 miles of fiber installed, connecting to 2865 approximately 300 public facilities. I-Net is expanding access to broadband to ensure all nonprofits, community, and educational organizations have the information 2866 2867 technology capacity needed to deliver government services to effectively serve all 2868 communities so they can have full participation in society, democracy, and the 2869 economy. Focusing on advancing Best Start for Kids and healthier communities, I-Net also continues working with nonprofits, government, and educational institutions to 2870 bring "last mile" connectivity, which typically refers to the final leg of infrastructure 2871 connecting the provider's network to a home or building and which continues to be a 2872 2873 barrier to broader broadband access.

2875 In addition, the County understands the importance of state and other local
 2876 organizations and their initiatives to expand broadband access within King County. The
 2877 County is creating partnerships with these entities to help make high-speed broadband
 2878 a reality for everyone in King County.

2879

2874

2859

- 2880 2881
- 2882
- 2883

2897

2906

2907

((<del>F-357 Developers should collaborate with major employers to create</del> <del>developments that facilitate and encourage telecommuting by</del> <del>installing high-speed internet lines during construction of the project.</del>

- 2884F-358Builders and architects should work with the telecommunication<br/>industry to design and retrofit state-of-the art cable-ready homes and<br/>offices and community centers, social service agencies, community<br/>health clinics, and other buildings that serve low-income residents.))288628872888
- 2889 <u>F-549</u> King County shall support opportunities to increase access to 2890 broadband internet services where needs are greatest, prioritizing 2891 areas where there are educational and economic needs. Examples of 2892 these opportunities may include expanding the I-Net network, 2893 pursuing grant funding to support infrastructure investments, partnering with service providers to expand coverage, considering 2894 2895 fiber optic cable installation in trail corridors, and marketing to 2896 underserved communities.

((Wireless internet connections, also referred to as "hotspots," first conceived in 1993, now number over 300,000 nationally. A hotspot is a location (park, coffee shop, airport, office building. etc.) that offers Wi-Fi access. Hotspots allow the public to use laptop computers, Wi-Fi phones or other suitable portable devices to access the Internet. Ninety percent of the hotspots in the nation are free. Of the estimated 150 million laptops and 14 million personal digital assistants sold annually, most include Wi-Fi capability.))

#### F-550 King County should increase wireless capabilities at County-owned facilities and sites, such as County parks, for public access.

29082909((F-359)) F-551King County should encourage((s)) public and private organizations2910to create wireless internet ((connections where)) access for the public2911((can access the Internet)), including in community centers, social2912service agencies, community health clinics, libraries, schools, and other2913buildings that serve ((low-income residents)) households at or below291480 percent of area median income.

# HAPTER 10 ECONOMIC

# DEVELOPMENT

6

The foundation for a vibrant and sustainable economy starts with providing livable communities and a high quality of life; these are among the that principles guide the Comprehensive Plan. Other elements of that foundation include, but are not limited to a favorable business climate with consistent and predictable regulations, an educated and trained adequate workforce, public infrastructure, land supply, research and advancing technology, affordable housing, available capital, recreational and cultural opportunities, a healthy natural environment and greater equity and opportunity for all

The policies in this chapter are designed to continue King County's long-term commitment to prosperous, diverse, and sustainable economy. They do so by promoting public programs and actions that support a successful economy, one in which the private, nonprofit, and public sectors can thrive and create jobs, is compatible with the environment, and contributes to a strong and stable tax base and a high quality of life for all residents. The policies also recognize businesses and the workforce as customers of an economic development system; and they support actions and programs that promote the strength and health of both groups.))

## 9 I. ((<del>Overview</del>)) Introduction

### 10 A. The State of the Economy

King County's <u>labor market and</u> economy ((<del>is</del>)) <u>are</u> the largest((;)) <u>and</u> most diverse((; and most significant economy)) in Washington State. <u>Sectors with the highest</u> employment in King County include agriculture; manufacturing; construction; retail; trade and transportation; utilities; professional and business services; information, education, and health services; and leisure and hospitality. ((<del>In 2014, King County's</del> economic base included:

- 17 1,285,000 nonagricultural jobs. This represents 67% of the Central Puget
   18 Sound Region's (King, Kitsap, Pierce, and Snohomish Counties) 1,923,000
   19 nonagricultural jobs and 42% of the state's 3,070,400 nonagricultural jobs;
- An \$87.4 billion payroll. This represents 74% of the region's \$118.5 billion
   payroll and 52% of the state's \$167.4 billion payroll; and
- 4. 19,500 business firms, excluding sole proprietorships. This represents 63% of the region's 125,000 firms and 36.4% of the state's 219,000 firms.
- 25 The last fifteen years have been characterized by two major recessions and three 26 periods of recovery and growth. Nonagricultural employment in King County peaked in 27 2000 at 1,187,000 jobs, but as the dot-com recession took hold, declined 7% to 28 1,109,000 jobs in 2003. Employment began to rise again in 2004, and by the job peak 29 in 2008, employment had exceeded 2000 levels, growing to a total of 1,216,000 jobs. 30 During the Great Recession, employment decreased by 7% again to 1,134,000 jobs in 31 2010, 4% below levels of a decade before. However, as the Great Recession ended 32 employment began to grow again reaching more than 1,285,000 in 2014, a 13% 33 increase over 2010 levels.
- 34

- 35 King County employment in 2014 was comprised of the following sectors:
- Trade, Transportation and Utilities was the largest sector, with 238,000
   employees primarily in retail trade, wholesale trade, and transportation
   services:
- Professional and Business Services was the second-largest sector with 211,000
   jobs. This sector includes legal services, engineering services, computer
   software design, company management and administration.
- 42 Two sectors each had about 166,000 employees: Government at all levels
   43 including public education, and Health Services/Private Educational Services.
   44 Another sector, Leisure and Hospitality, which includes hotels and restaurants,
   45 had 129,000 employees.
- Four other sectors are smaller but vital in terms of bolstering the county's economic base with substantial payroll. They include Manufacturing (108,000 jobs); Information (software publishing and tele-communications, 88,000 jobs); Financial Activities (banks, insurance, real estate, 71,000 jobs); and Construction with 62,000 jobs.
- 51 52 53
- Other Services had the remaining 47,000 jobs, in repair and maintenance, personal services, religious, professional and civic organizations.
- In 2014, unincorporated King County had 252,000 residents and about 38,000 jobs.))
   Within the unincorporated jurisdiction are ((two)) three broad ((geographic types))
   geographies, designated by King County under the Growth Management Act and the
   Comprehensive Plan:

- 59 Urban unincorporated ((King County, within the Urban Growth Area)) areas;
- 60 <u>The</u> Rural Area((<del>s</del>)); and
- Natural Resource Lands ((outside the Urban Growth Area)).
- 62

Covering only 45 square miles, urban unincorporated King County contains ((a number of residential communities and business centers with)) about half of the unincorporated population((, 127,000 people)) with a number of residential communities and a small number of business centers. ((Major c))Communities within ((this urban jurisdiction)) the urban unincorporated area include North Highline, Skyway-West Hill, Fairwood, East Renton, and Lakeland South/East Federal Way. ((The urban unincorporated about 17,600 jobs in 2014.))

70

The largest job sector within the urban unincorporated geography is services, ((with 71 72 about 6,000 jobs throughout urban unincorporated King County.)) followed by 73 ((E))education and government. ((is the second largest sector with 5,000 jobs.⁺)) Other 74 large job sectors include construction and resources, wholesale-transportation, retail. 75 ((In addition to its jobs - i.e., people working in urban and manufacturing. 76 unincorporated job centers -,)) While much of the urban unincorporated area is 77 residential, its residents and the people working in the urban unincorporated job 78 centers ((and includes)) make up a skilled labor force. ((About 70,000 urban 79 unincorporated residents are in King County's labor force, and approximately 63,000 80 were employed in 2014, contributing significantly to the county's economy.))

81

The Rural Area and Natural Resource Lands ((portions of the county's economic base plays)) play a significant role in helping the county maintain a diversity of economic sectors, thus contributing to the county's overall economic health. Evaluation and discussion of the rural economy includes the Rural Area, Natural Resource Lands, and the Cities in the Rural Area, which include Black Diamond, Carnation, Duvall, Enumclaw, North Bend, Snoqualmie, and Skykomish.

88

89 ((Information on the rural economy is as follows:

- In 2014, about 8.3% (168,000) of the county's total population of 2,017,300 lived in the Rural Area, Resource Lands, and Cities in the Rural Area.
- However, only 2.7% (34,200) of the total 1.2 million jobs in the county are located
   within the Rural Area, Resource Lands, and Cities in the Rural Area (2014 data).
- About sixty percent of the rural jobs (20,400) are located in the rural unincorporated area, with the remainder located in the Cities in the Rural Area, especially in Enumclaw, North Bend and Snoqualmie.
- 97 The Service Sector, which caters to both rural households and businesses,
   98 comprises 34% of rural employment.
- 99 The Construction and Resources sector, including agriculture, forestry, fishing, 100 hunting, and mining, accounts for 16% of rural jobs.

 Farming in King County is changing in response to increased demand by urban residents to purchase locally grown foods. Farms are becoming smaller with increased crop diversity. In 2012 there were 1,837 farms in the county, with an average farm size of 25 acres. According to the 2012 United States Agricultural

^{((&}lt;sup>+</sup>This 2014 data does not reflect that Klahanie was annexed to Sammamish in 2016. Updated figures are not currently available.))

- 105 Census, farm acreage decreased slightly from 49,000 acres in 2007 to 48,000 acres
   106 in 2012. Farm product sales totaled nearly \$120 million in 2012.
- Sales at county farmers markets in 2014 generated over \$35 million in direct sales for Washington farmers.
- The timber industry experienced wide fluctuations in timber harvest volumes between 2004 and 2014 in response to economic conditions. During that period King County saw an overall 23% decline in timber harvest volume on private and public lands from 138 million board feet to 106 million board feet, while the value of that timber rose 11% from \$34 million in 2004 to \$37.8 million in 2014, according to the Washington State Department of Revenue.
- The equestrian industry plays a role in the rural economy. In 2005, there were about 3,200 persons directly employed in the equestrian industry and 945 persons employed in jobs related to the industry countywide. Additionally, equestrian industry sales totaled \$227 million based on 2005 numbers, which included direct, indirect, and induced sales.))

### 120 B. General ((Economic Development)) Policies

King County provides infrastructure, business, and workforce development services as 121 122 part of its regional responsibilities. King County also partners with ((businesses,)) 123 business; economic development, workforce development, community-based, industry 124 trade, and labor organizations((;)); boards and commissions; and other jurisdictions ((in 125 efforts)) to support and grow the regional economy ((to ensure the elements for a 126 prosperous and successful economy are provided. The county also provides 127 infrastructure, business, and workforce development products and services as part of its 128 regional responsibilities; and it makes many other contributions to sustain the quality of 129 life that makes the region a desirable place to live and work. General King County 130 economic development policies include:)).

131

According to the United States Department of Labor, in 2021, women, on average, are paid 84 percent of what men are paid for working full-time, year-round. This wage gap persists across races and ethnicities. This gap is worsened when considering "job segregation," or overrepresentation or underrepresentation of women and people of color in certain occupations and sectors of the economy. The Department of Labor further reports that:

- Women must complete at least one additional educational degree to earn as much as men with less education;
- <u>The wage gap is larger for mothers and results in employment-related losses of</u> more than \$295,000 over a lifetime; and
- Discrimination remains a likely leading cause of the gender wage gap. The federal government has recovered over \$20 million in monetary relief for women who have experienced pay discrimination in the workplace just between 2022 and 2024.
- 147ED-101King County ((has a long-term commitment to))shall support148sustainable, inclusive, and equitable economic development149throughout the county.150
- ((ED-101a)) ED-102 King County ((is committed to promoting)) shall prioritize
   equity and racial and social justice ((and equality of opportunity)) in all
   economic development policies and programs((, and to integrating
   these as factors into decision and policy-making efforts)).

155156ED-103King County shall engage with the public to inform County economic157development plans, policies, and programs. This includes fostering158opportunities for the public, especially communities with limited access159to economic opportunity and those with the highest needs, to be160involved in associated decision-making.

161

171

180

208

- 162 ((<del>ED-102</del>)) ED-104 ((<del>The</del>)) King County shall focus ((<del>for</del>)) significant economic 163 growth ((will remain within)) in the Urban Growth Area, concentrated in cities and in a network of regionally designated growth centers, 164 ((while within the Rural Area and Natural Resource Lands, the focus 165 166 will)) and shall focus rural economic development ((be)) on sustaining 167 and enhancing prosperous and successful rural and resource-based 168 businesses, ((as well as)) and on encouraging innovation and new 169 businesses that support and are compatible with the rural economy((ic 170 clusters)), particularly in Rural Towns.
- 172 ((ED-103)) ED-105 King County policies, programs, and strategies shall recognize 173 the importance of((7)) and ((place special emphasis)) focus on((7)) 174 growing new businesses, such as start-up companies and small local 175 businesses, ((as well as retaining)) and expanding ((homegrown firms 176 in basic)) existing businesses in industries that ((bring income into the 177 county and increase the standard of living of the County's residents)) 178 create middle-wage jobs and share the County's values of racial equity, 179 environmental sustainability, and workers' rights.
- 181ED-106King County's plans, policies, programs, and strategies shall recognize182the role and importance of small businesses and locally owned183businesses in fostering community stability and creating opportunity in184historically underrepresented and underinvested communities.
- 185 186 ((ED-104)) ED-107 King County ((policies, programs, and strategies shall recognize 187 the importance of a)) shall take actions that support diversified 188 employment opportunities ((economic base to provide)) toward 189 providing a continuum of skills ((training opportunities to meet the skill 190 level needs of industry)) in support of middle-wage jobs. King County 191 shall direct resources to reduce inequities and build economic 192 resiliency for those communities most negatively impacted by asset 193 poverty, beyond income or wages. 194
- ((ED-105)) ED-108 King County ((recognizes)) shall protect the natural environment as a key economic ((value that must be protected)) asset and should support businesses that can be developed in environmentally sustainable and climate-resilient ways.
- 200((ED-106)) ED-109 King County shall protect and prevent displacement of cultural<br/>resources and promote expanded cultural opportunities for its<br/>residents and visitors ((in order)) to enhance the region's quality of life<br/>and economic vitality.201and economic vitality.

205 ((King County's role in economic development is implemented at several levels. At all
 206 levels, King County seeks to coordinate, partner, and engage with private and public
 207 organizations to pursue mutually beneficial outcomes.

209ED-110 ((At the multicounty level,)) King County should partner with other210counties, regional entities, and the state((, as appropriate,)) to devise211and implement economic development policies, programs, and

strategies to ((provide for)) achieve sustainable, inclusive, and 212 213 equitable growth throughout the Puget Sound region. 214 215 ((ED-108)) ED-111 ((At the countywide level,)) King County should partner with 216 other jurisdictions, economic development organizations, chambers of 217 commerce, the Port of Seattle, and others((<del>, as appropriate</del>)), to 218 develop and implement policies, programs, and strategies that set the 219 general framework for economic development within the county. 220 221 ((ED-109)) ED-112 Within the unincorporated areas, King County should partner 222 and engage with Indian tribes, ((local)) businesses, chambers, farms, 223 the Agriculture and Rural Forest Commissions, ((community service 224 areas, adjacent)) cities, ((other organizations)) and residents((, as 225 appropriate)), to develop and implement policies, programs, and 226 strategies that promote ((compatible)) sustainable, inclusive, and 227 equitable local economic development. 228 229 ED-113 King County shall explore programs to encourage tourism and 230 economic development associated with scenic, historic, and 231 recreational resources along the designated Washington Scenic and 232 **Recreational Highways.** 233 234 King County shall prioritize funding for community and economic ED-114 235 development projects that: 236 a. Benefit households at or below 80 percent area median income: 237 Create equitable opportunities for economic prosperity, good b. 238 health, safety, and connection to community; 239 Reflect an equitable countywide distribution of funding; and <u>d.</u> 240 Meet the needs of historically underinvested communities facing 241 economic pressures and disparate heath and economic outcomes.

²⁴² II. Business Development

((King County has long supported a growing and diversified economy, one that
 provides business development opportunities throughout the county.)) To support
 business development, King County's policies, plans, ((and)) programs, and strategies
 should support a ((positive and healthy)) business-friendly climate that ((enables all local
 firms to stay globally competitive, quality-oriented, technologically advanced, and able
 to pay good wages)) is conducive to the domestic and global competitive environment.

250 Homegrown businesses are those that started in the region. ((Local and national 251 research over the last 25 years has concluded that h))<u>H</u>omegrown, small to medium-size 252 businesses create the majority of new jobs in a local economy. ((Industries and firms)) 253 Businesses that export their products and services outside King County bring income 254 into the county ((and are considered basic, in economic terms. Jobs in basic industry)) 255 and generally pay better than ((non-basic)) jobs that are dependent on the local 256 economy. ((and)) These businesses can help support the ((non-basic or secondary part 257 of the)) county's local economy. ((As of 2012, 37% of the jobs in King County are basic 258 and support the 63% non-basic jobs, such as retail and personal services. Roughly one 259 of every four jobs in the Puget Sound region is dependent on international trade.))

261 The county's leading export sectors are:

260

Information ((<del>S</del>))<u>s</u>ervices, ((<del>with 16.4% of all export jobs. Software Publishing is the principal factor in this sector, accounting for over 50% of the sector's basic jobs and 9.3% of total basic employment) led by the software development
 Economic Development - Page 10-6
</del>

265 industry.

- Manufacturing, ((with 14% of all basic employment,)) led by the aerospace 266 267 industry ((, with 9% of total basic jobs)).
- 268 269
- Business ((<del>S</del>))services, such as banking, insurance, accounting, legal, architectural, engineering, research and development, and computer services industries((, with 13.8% of export jobs)).
- 270 271

272

King County has also identified the creative sector as a critical segment of the regional 273 economy that requires additional support and renewed focus. King County's creative 274 sector includes, but is not limited to, the film, music, arts and culture, festival, and 275 events, videogaming, and fashion industries. These industries are predominantly driven 276 by small businesses, entrepreneurs, and gig workers. Supporting creative sector 277 development that is compatible with surrounding land uses contributes to the region's 278 regional reputation, drives tourism, and creates a desirable environment for business

279 development of other sectors.

#### A. Working Collaboratively in the Region 280

281 King County partners with the Puget Sound Regional Council's Central Puget Sound 282 Economic Development District Board; (((serving King, Kitsap, Pierce, and Snohomish 283 Counties) adopted a "Regional Economic Strategy for the Central Puget Sound Region" 284 in 2005, updated it in 2012, and then adopted an updated version entitled "Amazing 285 Place: Growing Jobs and Opportunity in the Central Puget Sound Region" in 2017. 286 Amazing Place was developed by the Puget Sound Regional Council to sustain economic vitality and global competitiveness.)) Greater Seattle Partners; King County 287 288 Associate Development Organization: Workforce Development Council of Seattle-King 289 County; other economic development organizations and local jurisdictions in the 290 region, to grow and sustain regional economic vitality and global competitiveness.

291

292 ((In order to accomplish this, Amazing Place identifies 14 industrial clusters that, based 293 on regional economic analysis, offer the best opportunities for business growth and job 294 creation in the Central Puget Sound region for the next several years. 295

- 296 Clusters are concentrations of industries that export goods and services that drive job 297 creation and import wealth into the region. An industry cluster differs from the classic 298 definition of an industry sector because it represents the entire horizontal and vertical 299 value-added linkages from suppliers to end producers, including support services, 300 specialized infrastructure, regional universities' research and development, and other 301 resources. Clusters are supported by the economic foundations such as workforce 302 training, infrastructure, quality education, a stable and progressive business climate, and 303 more. The clusters are Aerospace, Architecture and Engineering, Business Services, 304 Clean Technology, Food and Beverage, Information and Communication Technology, 305 Life Sciences and Global Health, Maritime, Materials Manufacturing, Military and 306 Defense, Recreational Gear, Tourism, Transportation and Logistics, and Wood Products. 307 Amazing Place identifies specific strategies and actions to help support the growth of 308 each cluster.
- 309

310 The County is also working with several other regional business development efforts 311 such as the Trade Development Alliance, Workforce Councils, Chambers of Commerce, 312 and other partners to create opportunities for new business development, help retain 313 and expand existing companies, and recruit new firms into the county.))

314

#### 315 ED-201 King County shall partner with Indian tribes, federal, state, and ((local)) 316 city governments, economic development organizations, schools,

educational and research institutions ((<del>and</del>)), the private sector<u>, and</u> other organizations to foster ((<del>an</del>)) innovative and ((<del>entrepreneurial environment and support programs and strategies that promote</del>)) sustainable business development and job creation((<del>. Programs that provide technical and financial assistance to businesses include, but are not limited to:</del>

- a. Financial, marketing, expansion, and general operations assistance for small businesses to help them become competitive in the private sector;
- b. Technological, efficiency, and managerial assessments to help manufacturers reduce costs and use smaller footprints for existing or expanded production; and
- c. Assessment and/or remediation of contaminated property (Brownfields) in order to continue or expand operations to help individual small businesses or jurisdictions impacted by Brownfields)).
- 334 ED-202 King County shall ((emphasize continued)) prioritize support for the 335 aerospace, green economy, creative economy, and information 336 technology ((industrial)) clusters; agriculture and forestry clusters; ((as 337 well as industrial clusters offering)) and emerging sectors that offer the best opportunities for business development, job creation, and 338 339 economic growth ((<del>including those identified in the Puget Sound</del> 340 Regional Council's Regional Economic Strategy, the Local Food 341 Initiative and the King County Rural Economic Strategies Plan)). 342
- 343ED-203King County shall proactively support and participate in programs and<br/>strategies that help create, retain, expand, and attract businesses that<br/>export their products and services. ((Exports bring income into the<br/>county that increases the standard of living of residents.))
- 348ED-204King County shall encourage redevelopment of and reinvestment in<br/>industrial and manufacturing properties by collaborating with other<br/>jurisdictions and the private sector to remove, revise, or streamline<br/>regulatory or other redevelopment barriers without compromising<br/>environmental standards or quality. This includes assessment and/or<br/>remediation of contaminated properties.
- 355 ((ED-205 King County shall support programs and strategies to promote and 356 market Foreign Direct Investment opportunities in the county.
   357
- 358 ED-206)) ED-205 King County shall promote and help position small and mid-size
   359 businesses to gain greater participation in the supply chains of large
   360 ((companies)) businesses and the military located in the region.
   361
- 362 ((ED-207)) ED-206 King County shall provide opportunities for small businesses to 363 compete for and obtain contracts on ((c))County-funded construction, 364 consulting, and goods and services projects. King County shall also 365 collaborate with other jurisdictions to promote public-contracting opportunities for small businesses and to develop and maintain 366 367 common standards, a common application, and a common directory for 368 small contractors and suppliers seeking contracts on publicly-funded 369 projects.
- ((ED-208)) ED-207 King County shall assist businesses, property owners, and other
   jurisdictions in preserving and enhancing historic properties, including
   historic business districts, through incentives and economic
   development measures. County programs and incentives for land and

075		
375		resource preservation and economic development shall support and be
376		coordinated with preservation of historic properties.
377		
378	(( <del>ED-209</del> ))	ED-208 King County shall foster the development and use of
379		public/private partnerships to implement economic development
380		projects and programs. At a minimum, these projects (( <del>must</del> )) <u>shall</u>
381		demonstrate that they:
382		a. Cannot be accomplished solely by either sector <u>and would be</u>
383		greatly enhanced by working together;
384		b. Have an experienced and proven private partner(s);
385		c. Do not unduly enrich the private partner(s);
386		
387		and other revenue, construction and permanent jobs, livable wages
388		with benefits and a wage-progression strategy, and public
389		amenities; and
390		e. (( <del>Will use the King County Jobs Initiative, or other entities with</del>
391		similar programs, as their first source of referral for training and
392		<del>employing low-income, low-skill residents in entry-level and</del>
393		<del>semi-skilled jobs</del> )) <u>Share decision-making power with and spread</u>
394		benefits to community groups.
395		
396	(( <del>ED-210</del> ))	ED-209 King County should support programs and strategies to expand
397		international trade, including those that:
398		a. Promote, market, and position the county for increased export((,))
399		and import, and foreign investment opportunities;
400		b. Promote the health and viability of the region's export and import
401		gateways through active collaboration with the Northwest Seaport
402		Alliance and the Port of Seattle;
403		c. Provide technical assistance, training, and opportunities for local
404		firms wishing to export; and
405		d. Partner with regional trade groups to promote assistance,
405		opportunities and partnerships to connect current and potential
408		exporters with international markets.
407		exporters with international markets.
408	ED-210	King County shall seek to support business programs and strategies
407	<u>ED-210</u>	that contribute to a more circular economy to reduce demand for
410		
		<u>materials; keep materials in use as long as possible; regenerate natural</u>
412		systems by reusing waste products, materials, or byproducts of
413		manufacturing; promote recycling; or otherwise improve processes to
414		<u>be more efficient.</u>
415		
416	ED-211	King County should support programs and strategies to preserve and
417		plan for an adequate supply of industrial and commercial land <u>capacity</u> ,
418		including but not limited to:
419		a. (( <del>Complying with the State of Washington Buildable Lands</del>
420		<del>Program - RCW 36.70A.215 - and, in cooperation with the cities,</del>
421		inventorying and monitoring the use of industrial, commercial, and
422		<del>residential lands every five years;</del>
423		b. Partnering with other jurisdictions and the private sector, to
424		advocate for development and maintenance of a regional
425		Geographic Information System to track the supply of land))
426		Participating in the Puget Sound Regional Council's Industrial
427		Lands Analysis;
428		(( <del>c.</del> )) <u>b.</u> Actively applying for federal, state, and other resources to
429		help defray the costs of assessment, remediation, and
430		redevelopment of private and/or public (( <del>B</del> )) <u>b</u> rownfields;
431		(( <del>d. Selling county-owned surplus industrial and commercial lands for</del>
432		development by the private sector;
752		

433 434 435		e.)) <u>c.</u> Promoting the redevelopment and infill of industrial and commercial areas and exploring the feasibility of using incentives to achieve this goal; and
436 437		(( <del>f.</del> )) <u>d.</u> Preventing the encroachment of non((-))industrial uses on industrially((-))zoned land and the rezoning of industrial land to
437 438		other uses.
439		
440	ED-212	King County shall encourage and support community((–)) <u>-</u> based and
441		community((-))-led efforts to (( <del>support</del> )) <u>develop</u> and retain existing
442		small and local businesses. These efforts may include:
443		a. Implementing the Contracting Opportunities Program in
444		historically underinvested communities;
445		b. Ensuring public investment decisions protect culturally significant
446		economic assets and community anchors; and
447		c. Engaging communities directly affected by economic development
448 449		activities in planning, decision making, and implementation.
449 450	ED-213	King County should help stabilize and prevent the displacement of
451	<u>LD-215</u>	small or culturally or ethnically diverse businesses and business clusters
452		during periods of growth, contraction, and redevelopment.
453		
454	ED-214	King County shall perform outreach about the existing King County
455		priority hire program to increase residents' connections to economic
456		opportunities and to aid in anti-displacement efforts.
457		
458	(( <del>ED-213</del> ))	<u>ED-215</u> King County shall coordinate with a broad range of partners,
459		organizations, businesses, and public sector agencies to support the
460		development of business innovation districts and (( <del>related</del> )) <u>other</u>
461		<u>community stabilization</u> initiatives (( <del>in</del> )) <u>to help prevent the</u>
462		displacement of Black, Indigenous, and other People of Color;
463 464		immigrants; refugees; LGBTQIA+ people; and households at or below 80 percent of area median income (( <del>lower income communities, with an</del>
464 465		emphasis on food innovation districts, in particular)).
405		emphasis on rood minovation districts, in particular)).

# 466 III. Workforce Development

467 King County provides programs and participates in partnerships to address the new and 468 ongoing regional workforce opportunities and challenges ((of the Puget Sound region and within the county)). The current ((economic climate)) economy has created more 469 470 opportunity, and yet there is an ((ever greater)) increasing divide between those who 471 are benefitting from a strong economy and those who are not. For this reason, King 472 County has an even greater need to ensure ((access by)) all residents have access to 473 information about local workforce development programs and opportunities, especially 474 for those residents ((of the County)) who are not benefitting equitably from the strong 475 economy.

476

 ((While many low-income people in isolated communities may have difficulties gaining access to quality education, training, and support services to help them secure living wage jobs, many displaced workers also need access to re-training opportunities to obtain employment.)) Meeting these challenges successfully ((will)) requires the ((c))County to continue and to strengthen strategies and working relationships across sectors and ((between)) among business, government, labor, communities, advocacy organizations, education and training institutions, and human services providers.

484

485 ((Jobs that pay wages sufficient to support families are vital to the quality of life.
 486 However, training, education, skill levels, and abilities vary from person to person. As
 Economic Development - Page 10-10

487 such, it is important for King County to support job training and job opportunities for all
 488 residents at a range of entry levels so that all people have the opportunity to be
 489 self-reliant.))

491 King County's Green Jobs Strategy emphasizes connecting frontline communities to 492 middle-wage employment opportunities to build a skilled and diverse workforce across 493 the career spectrum. The County utilizes its resource network to promote and 494 meaningfully connect local workers to middle-wage jobs by developing high-guality 495 workforce partnerships to diversify and add climate-informed skills building into existing 496 sectors such as construction, transportation, manufacturing, professional services, and 497 technology, while preparing for the clean energy future. The Strategy emphasizes 498 integrating workforce development into County climate and clean energy initiatives, 499 while collaborating with regional partners to grow green jobs through sectors essential 500 to clean energy deployment. The Strategy outlines the recipe for high-road workforce 501 partnerships based on building trusted relationships with job seekers, connecting to 502 partners providing skills training and industry-recognized credentials, and clear 503 employment on-ramps developed with employers and labor partners. 504

- 505ED-301King County should support workforce development programs that are506integrated with the ((c))County's overall economic strategies, including507but not limited to:
  - Apprenticeship opportunities, such as priority hire, on ((c))County public works projects to ensure a continual pipeline of skilled, local construction trades workers and to encourage ((family)) middle-wage job opportunities((-)); and
  - b. ((<del>Development and growth of clean technology "green" jobs linked to the preservation and sustainability of the natural environment, including jobs in pollution prevention, Brownfields cleanup, energy efficiency, renewable energy industries, natural resource management, and other technologies that address climate change.)) Providing frontline communities accessible training and skill building for jobs that support a middle wage, particularly for green jobs and identified high growth sectors</del>
  - ((<del>c. Training in skills (job clusters) that apply to and are in demand</del> <del>across multiple industry clusters</del>)).
- ED-302 523 ((King County should support the Workforce Development Council of 524 Seattle-King County, authorized by the federal Workforce Innovation 525 and Opportunity Act of 2014, and composed of high-level 526 representatives from business, local government, labor, education and 527 training institutions, advocacy organizations, and human service 528 providers. The purpose of the Workforce Development Council is to 529 coordinate and improve employment, training, literacy, and vocational 530 rehabilitation programs to meet the needs of workers and employers.)) 531 King County ((<del>will work with the Workforce Development Council to</del>)) 532 shall emphasize the needs ((in and highlight)) and opportunities for 533 communities ((that have)) with the highest unemployment rates in the 534 region, including the potential for development of training 535 opportunities in these areas. <u>King County should support the</u> 536 Workforce Development Council of Seattle-King County to coordinate 537 and improve employment, training, literacy, and vocational 538 rehabilitation programs to meet the needs of workers and employers. 539
- 540ED-303King County policies, programs, strategies, and partnerships shall541recognize the importance of worker training and retraining, especially542for ((low-income and low-skilled residents,)) workers in low-wage and543low-barrier industries544low-barrier industries

544 unemployment rates, to provide the skilled workers needed by local 545 businesses and industry. King County shall support and partner with 546 other jurisdictions, educational institutions, and industry to promote 547 programs that align with community needs, such as: 548 a. Programs that retrain dislocated workers for jobs in growing 549 industries; 550 b. Training for jobs in growing industries that require post-technical 551 or post-secondary training and credentials and provide a career pathway to self-sufficiency; 552 Programs that facilitate employer involvement in hiring workers 553 c. 554 with limited experience and skills and provide successful strategies 555 for skills training, job placement, and worker retention; 556 d. Programs that reduce recidivism by helping residents exiting the 557 criminal ((justice)) legal system gain access to training and 558 employment services; 559 Alignment of ((homeless)) housing and employment systems to e. 560 ((assure)) ensure people who are experiencing homelessness have 561 access to both housing and employment opportunities; 562 f. Food-related, creative economy, and green technology workforce 563 development activities and opportunities; 564 q. School-to-work programs and effective alternatives for 565 out-of-school youth to provide a clear pathway to self-sufficiency 566 through career options and applied learning opportunities; 567 h. Summer youth employment programs for ((at-risk)) historically 568 underserved youth; 569 i. Access to alternative modes of transportation by providing 570 transportation information, ((financial assistance programs)) 571 income-based discount programs such as ORCA LIFT, and services 572 to jobseekers and workers; ((and)) 573 j. Access to childcare by increasing the availability and affordability 574 of quality childcare for low-income families; Initiatives aimed at facilitating skills training and on-ramps to 575 k. 576 middle-wage employment for frontline communities connected to 577 identified high growth industry sectors as outlined in King County's 578 Green Jobs Strategy; and 579 Connecting veterans with targeted programs and resources to 580 achieve and sustain their career goals or transition into the civilian 581 workforce. 582 583 ((ED-304 King County shall continue to increase equity in jobs and career 584 opportunities for youth through programs such as the Education 585 Engagement Strategy launched by Public Health in 2013, and others. 586 These efforts may include: 587 a. Partnering with private businesses, community organizations and 588 educational institutions to provide job shadowing, internship and 589 summer job opportunities for King County youth; and 590 b. Partnering with Maritime and Manufacturing industry businesses, 591 and other business sectors, to engage high school students in 592 vocational programs that offer training for living wage industry 593 jobs, and working with these businesses to engage schools in 594 promoting regional opportunities for apprenticeships and 595 internships for high school students. 596

- 597 ED-305)) ED-304 King County shall help promote and develop opportunities for
   598 ((limited English proficiency populations)) communities that speak
   599 languages other than English, including:
- 600 601

602

603

604

605

606

607 608

609

610

611

612

617

629

- a. Partnering and investing in community organizations that represent ((<del>limited English proficiency populations</del>)) <u>linguistically</u> diverse populations;
- b. Improving translation and interpretation services;
- c. Partnering with ((<del>private business</del>)) <u>employers</u> to promote the hiring of ((<del>limited English proficiency populations</del>)) <u>people that speak languages other than English</u>; and
- d. Partnering with regional educational institutions to develop methods for recertification for limited English proficiency professionals with credentials from other countries, and partnering with community organizations to promote and increase access to recertification programs.
- 613<br/>614((ED-306))ED-305<br/>ED-305<br/>organizations and regional educational institutions, especially<br/>community colleges, to promote greater alignment between<br/>educational programs and workforce needs.
- 618((H-159)) ED-306 King County should support programs and projects that provide619apprenticeship and employment training in the building trades through620affordable housing development. King County should explore ways to621partner with non((-))profit housing developers in offering622pre-apprenticeship, apprenticeship, and employment training623opportunities.
- ⁶²⁴ IV. Infrastructure Development

Adequate and well-maintained public infrastructure is crucial to a strong economy <u>and</u>
 <u>attracting new industry and economic development</u>. Basic public services that maintain
 a high quality of life in an area support employment growth and increased productivity,
 and influence business location decisions.

- 630 ED-401 ((King County recognizes that adequate infrastructure is essential to 631 support existing economic activity and to attract new industry and 632 development. The county therefore)) King County shall support((s)) 633 and partner((s)) on programs and strategies to maintain existing 634 infrastructure and construct new infrastructure and facilities (including, 635 but not limited to, transportation, utilities, schools, information, 636 communications, ((including)) and an adequate supply of housing), 637 prioritizing historically underinvested areas, and as necessary to 638 accommodate current and future economic demand, in locations and at 639 a size and scale that is consistent with other policies in the 640 **Comprehensive Plan.** 641
- 642ED-402King County ((will)) shall support programs, ((and)) partnerships, and<br/>electric vehicle infrastructure to facilitate the efficient movement of<br/>freight and to promote global competitiveness for business and<br/>industry.646645
- 647ED-403King County shall partner, where feasible, with Indian tribes, cities,<br/>((jurisdictions and other stakeholders)) and organizations to develop<br/>((subarea)) targeted economic development strategies to promote

650development and redevelopment in areas that can accommodate651growth.

# 652653ED-404((Through local subarea planning and partnerships with other agencies<br/>and organizations,)) King County should use planning initiatives,<br/>zoning, incentives, partnerships, or other measures to capitalize on the<br/>economic benefit of infrastructure projects in locations and at a size<br/>and scale that is consistent with other policies in the Comprehensive<br/>Plan.659

- 660ED-405King County should support programs and partnerships to facilitate the<br/>development of adequate technology infrastructure, to meet growing<br/>technological demand, and to ensure high-quality infrastructure for the<br/>regional economy.
- V. Sustainable <u>Economic</u> Development
   ((in the Private Sector))

666 ((It is the goal of)) King County ((to work toward becoming)) seeks to become a model 667 sustainable community ((where both the public and private sectors seek to)) that balances urban growth with natural resource protection while addressing climate 668 669 change. Sustainable economic development ((seeks)) aims to achieve this goal by 670 addressing the environmental impacts of the built environment in which people live and 671 work. Sustainable economic development is implemented through planning, design, 672 and construction methods, including green building and ((+))low ((+))impact 673  $((\overline{D}))$  development that promotes environmental quality, economic vitality, and healthy 674 communities. 675

676 ((King County also works to increase the sustainability awareness of its residents. The 677 county offers a Localize Sustainability tool, which help residents track and develop 678 strategies for increasing their own sustainability profile. Transportation is also key 679 element of sustainability. Public transportation will play an important role in protecting 680 the environment by reducing emissions and supporting more compact land use 681 patterns.)) King County seeks to foster innovative design and development techniques 682 in the private sector that reduce the negative impacts of site development and building 683 construction while maintaining ((affordability and economic development)) a favorable 684 business climate.

686 ED-501 King County should encourage, support, and promote the application 687 of sustainable economic development practices in all private sector 688 development within the county, through adopting development codes 689 that support green building and partnering with other cities and the 690 private sector to foster sustainable development. ((This may be 691 accomplished through working with residential and commercial 692 developers to use Low Impact Development principles and practices, including minimized impervious surface areas, protect ground and 693 694 surface water within a watershed, ensure that habitat protection needs 695 are incorporated into development proposals to the extent possible, 696 incorporate greater use of green building materials, eliminate, to the 697 extent possible, the use of materials that pose health hazards, and 698 utilize systems that conserve or reuse resources, including those that 699 use energy more efficiently. When King County provides technical 700 assistance and incentives for the use of sustainable development 701 practices, it shall be at no cost to any private sector development. King

702 703 704		County shall collaborate with the private sector on potential future regulatory tools.
704	<del>ED-501a</del>	King County shall strive to promote green building and smart building
706	•••••	practices throughout private, public and residential uses and support
707		programs that foster this type of development through collaboration
708		with jurisdictions and other sectors.
709		
710	<del>ED-503</del>	King County shall identify and evaluate potential changes to land use
711		development regulations and building codes to support and promote
712		<del>sustainable development.</del>
713		
714	<del>ED-504</del>	King County should participate in the development and use of national
715		standards for measuring sustainability at the community scale and the
716		breadth and effectiveness of county policies and practices that improve
717		<del>community-scale sustainability.</del> ))

718 VI. The Rural Economy

719 ((King County values its entire Rural Area and the Natural Resources Lands and 720 recognizes the traditional economic activities that support rural communities and a rural 721 lifestyle. A healthy and sustainable rural economy is necessary to ensure rural residents can continue to both live and work throughout the Rural Area and Natural Resource 722 723 Lands. The farm, livestock, and forestry operations, the many entrepreneurial home-based businesses, the Rural Towns, Rural Neighborhood Commercial Centers, 724 725 and the Cities in the Rural Area all provide rural residents with goods, services, and 726 employment.))

727

728 Within unincorporated rural King County, economic activities include, but are not 729 limited to, farming, livestock raising, equestrian uses, forestry, resource value-added 730 businesses, and home-based businesses. The Rural Neighborhood Commercial 731 Center((s are designed to)) land use designation provides for a limited array of goods 732 and services to local rural residents on a small scale. ((The)) Rural Towns provide a 733 wider range of goods, services, and jobs for rural residents, including retail, restaurants, 734 and services. ((The designated)) Natural Resource Lands support the long-term 735 commercial aspects of agriculture and forestry and potential resource value((d))-added 736 products. 737

738 The County also recognizes that the land areas, economies, and natural beauty of the 739 Rural Area and Natural Resource Lands ((designations)) benefit all county residents. The 740 agriculture sector provides a ((safe)) high-guality and reliable local food source((= 741 keeping costs low and quality high-)) to restaurants, ((and households, the majority of 742 which are in urban areas, and regionally to farmers markets and specialty stores)) 743 institutions, farmers markets, and individual consumers. The Rural ((King County)) Area 744 and Natural Resource Lands provide((s)) many diverse recreation and tourism 745 opportunities, including scenic vistas; trails for hiking, bicycling, off-road, and equestrian 746 use; ((harvest festivals;)) open space and wildlife habitat; and working farms and forest 747 lands, all within a short distance from ((the)) urban centers.

748

A vibrant and sustainable rural economy depends on several factors, including, but not limited to, preserving and enhancing the businesses within traditional rural economic ((clusters)) sectors, ensuring that new commercial enterprises are of a size and scale that is consistent with and retains the rural character of the surrounding area, and changes in regulations to reflect and respond to the differing needs and emerging trends of rural economic activity while protecting the natural environment. 756 ((<del>In 2004, the King County Comprehensive Plan was amended to include a policy that</del> 757 directed the county to develop and implement a rural economic development strategy. 758 To comply with this policy, the county developed an annual Rural Economic Strategies 759 Report in 2005 and began implementing the identified strategies and actions in 2006. 760 Annual reporting occurred through 2008. Ordinance 17485, which adopted the 2012 761 Comprehensive Plan, called for an update to the Rural Economic Strategies to build 762 upon the work done previously. In response to this, a Rural Economic Strategies Plan 763 was adopted in 2014 via Ordinance 17956.

764

755

765 The mission of the Rural Economic Strategies Plan is to advance the long-term economic 766 viability of the Rural Area and Natural Resource Lands, with an emphasis on farming, 767 forestry, and other rural businesses consistent with the unique character of rural King 768 County. The mission is accomplished by initiating and implementing specific strategies 769 and actions to support and enhance rural economic viability. Rural businesses generally 770 fall into six rural economic clusters and each cluster is supported by specific strategies 771 and actions to strengthen and/or enhance it. The clusters are: Agriculture, Forestry, 772 Equestrian, Home-Based Businesses (i.e., those home occupations that are allowed on 773 lands designated Agriculture, Forestry and Rural Area), Recreation and Tourism, 774 Commercial and Industrial Rural Neighborhood Commercial Centers, Rural Towns, and 775 Cities in the Rural Area. Consistent with CP-539, found in Chapter 11, Community 776 Service Area Subarea Planning, no expansion of industrial land use or zoning is allowed 777 within the Rural Town of Fall City.

778

The specific strategies and actions are intended to be flexible in order to respond to evolving rural business needs and changes within any of the economic clusters. Periodically, the county evaluates the actions accomplished to date, introduces new actions to be initiated, and discusses proposed actions for the following year. This ensures the process stays flexible and is current with evolving trends in the rural economy. It is anticipated that this procedure will become part of the Annual Work Plans developed for each of the Community Service Areas.

786

The rural economic policies are designed to establish and maintain a long-term
 commitment to a sustainable and vibrant rural economy. They support implementation
 of the Rural Economic Strategies Plan; continued evaluation of county codes to support
 the evolving agriculture, forestry, and other rural economic clusters; and support for
 programs and strategies that foster a diversified rural economy, compatible with
 existing rural character, while maintaining the natural environment.))

The ability to bring rural, agricultural, forestry, and value-added products into the urban
 area and the ability of urban residents to utilize the Rural Area((s)) and Natural Resource
 Lands for education, open space, scenic vistas, and a diversity of out((=))door recreation
 options encourage((s)) the urban/rural interdependence and linkage, thus enhancing
 the county's ((economic base)) economy.

800 ED-601 King County is committed to a sustainable and vibrant rural economy 801 that allows rural residents to live and work throughout the Rural Area 802 and Natural Resource Lands. County policy, regulations, and programs 803 should be reviewed and developed in partnership with cities, chambers 804 of commerce, rural businesses, the Agriculture and Rural Forest 805 Commissions, ((the Community Service Area)) community groups, and 806 others to support the preservation and enhancement of traditional rural 807 economic activities and lifestyles, while supporting evolving 808 compatible commercial uses and job opportunities. 809

810ED-602King County should identify and implement ((the Rural Economic<br/>Strategies Plan to guide future)) rural economic development ((and will<br/>modify and add)) strategies ((as needed to)) that reflect the evolving<br/>nature of the rural economy, while protecting the traditional rural<br/>economic clusters.

# CAFFE VINC

# CHAPTER 11 SUBAREA PLANNING

FRES

BAGEL

2

King County had a robust community planning program that occurred in two distinct periods-1973 through 1984 to implement the 1964 Comprehensive Plan, and 1985 through 1994 to implement the 1984 Comprehensive Plan. Since then, here have only been minor updates to community plans that were processed through updates to the Comprehensive Plan.

After nearly two decades of aging plans and significant growth King County leadership renewed its interest in more detailed longrange planning for unincorporated rural and urban communities in 2014 by providing funding to reinitiate a subarea planning program. The policies in this chapter are based on these historical adopted Community Plans and will be updated as part of the community planning process in coming years.

# A.)) <u>I. Subarea</u> Planning Framework ((and Geography))

### 11 A. Introduction

Figure: Community Service Areas Map))

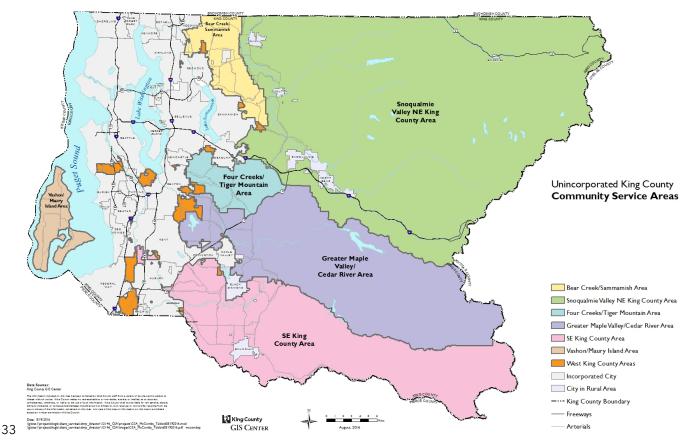

((Beginning with the 2016 Comprehensive Plan t))<u>The geographical boundaries of the</u> County's seven Community Service Areas ((will be)) is used as the framework for <u>creation and amendment of</u> subarea plans ((created and amended from that point forward)). Subarea plans will be developed for the six rural Community Service Areas, and for the five remaining large urban unincorporated ((<del>p</del>))<u>P</u>otential ((<del>a</del>))<u>A</u>nnexation ((<del>a</del>))<u>A</u>reas. The focus of subarea plans will be on locally((=))specific issues in these subarea geographies.

19

20 ((There are a number of key benefits to defining subarea planning boundaries to be 21 coterminous with the Community Service Area boundaries. This structure organizes the 22 County's unincorporated planning area into fewer and more manageable territories so 23 that updates of the plans can occur within a shorter time horizon. Using the Community 24 Service Area boundaries also aligns land use planning with other county services and 25 programs thereby increasing consistency between planning and public service delivery. Finally, since the last round of subarea planning in 1994 there have been numerous 26 27 major annexations and incorporations which mean some subareas are now largely 28 within the jurisdiction of cities and thus the County now has just a regional, rather than 29 local, planning role in those areas. 30

- 31
- 32

((2016)) 2024 King County Comprehensive Plan - ((updated December 6, 2022)) Adopted TBD Attachment A to Ordinance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555)) xxxxx (Proposed Ordinance 2023-0440)

34

35 While there are differences among the Community Service Areas in terms of their 36 boundaries, range of land uses, annexation issues, and more, using ((this accepted geography will)) these geographies ensures the entire unincorporated portion of the 37 38 County receives ((some level of)) locally focused planning on a regular cycle. This 39 includes development of each ((Community Service Area's)) subarea plan. Each plan 40 will establish ((goals,)) a community vision statement, guiding principles, and policies((-41 and)) focused on addressing each community's needs and priorities. The plans will be 42 developed using information such as population changes, employment targets, and 43 similar demographic and socioeconomic indicators. ((To address the unique issues in 44 each geography, Community Service Area subarea plans may also have more refined 45 focuses on rural town centers, urban neighborhoods, business districts, or corridor 46 approaches.)) Each plan will also establish performance measures to monitor the 47 implementation of the plan.

48

49 The high-level review along with more detailed land use planning will be guided by a 50 series of considerations such as community interest, ((social equity,)) funding, and new 51 development. Equity and racial and social justice principles will also play a particularly 52 key role during subarea plan development and public engagement activities. The 53 County will use the tools and resources developed by the Office of Equity and Racial 54 and Social Justice to develop the scope of work and the plans so that Black, Indigenous, 55 and other ((p))People of ((c))Color((r)); ((low-income residents)) households at or below 56 80 percent of area median income((,)); and ((populations with limited English 57 proficiency will be informed and)) people speaking languages other than English are offered equitable and culturally((=))appropriate opportunities to ((participate in its)) work
 with the County throughout the planning process.

60 61 ((To the extent practicable, s))Subarea plans ((in unincorporated King County should 62 be)) are developed in close coordination between the community and ((<del>c</del>))<u>C</u>ounty staff 63 ((that may have a lead or partial role in implementing the plans)) to ensure clearer 64 expectations on how and whether community recommendations in a subarea plan are 65 feasible for implementation and within what type of timeframe. This type of coordination, supported by the financial analysis noted in the following policy, is critical 66 to all subarea ((and functional)) plans ((in order)) to evaluate the resources required and 67 68 the time((-))frame necessary for full implementation. Plan alternatives and costs should 69 be clearly understood and plans should be financially achievable. 70

((RP-115)) <u>CP-100a</u> ((Subarea plans, including area zoning studies, provide detailed land use plans for local geographic areas.)) Subarea plans implement and shall be consistent with the Plan's policies, development regulations, and Land Use Map. 145	community needs list.

### 146 B. Planning Schedule

147 Below is the schedule for subarea planning using the Community Service Area 148 geography. ((Reviewing all six rural Community Service Area subareas and five large urban Potential Annexation Areas over the next decade at both the broad, policy level 149 and at the local, community level with detailed planning will facilitate a more equitable 150 planning process. The plan sequencing was determined by subarea plans already 151 underway, the ability to partner with other jurisdictions, anticipated community needs 152 153 within a Community Service Area, and striving for a countywide geographic balance in 154 alternating years.)) The anticipated duration of each subarea planning process will be 155 three years, which includes time for community engagement, plan development, and 156 Council review and adoption.

162

163 1. ((The Snoqualmie Valley/Northeast King County subarea planning process began later in 2021 than anticipated. Therefore, the schedule was adjusted to provide 164 165

necessary time for community engagement and plan development.

166 2.)) The Vashon-Maury Island, Skyway-West Hill, ((and)) North Highline, and Snoqualmie

Valley/Northeast King County subarea plans have been adopted and will be updated 167

168 following completion of the other ((Community Service Area)) Subarea Plans. The

((Community Service Area)) Subarea Planning - Page 11-6

- timelines for these updates will be determined in future updates to the King CountyComprehensive Plan.
- 171
- 172 ((For each of the Community Service Area subarea planning, the subarea plans and their
- 173 scope of work shall include:
- 174

Study in Motion 14351	
Legislative Direction	Community Service Area
Snoqualmie Pass Subarea Plan: Initiate a subarea plan for Snoqualmie Pass rural town and ski area. The subarea plan should be developed in collaboration with Kittitas County; evaluate and address the current and future housing and economic development needs of this growing community, and include outreach	Snoqualmie Valley/Northeast King County CSA
with the local community in its development: Cedar Hills/Maple Valley Subarea Plan: Initiate a subarea plan for the "Cedar Hills/Maple Valley" area. Review land use designations and implementing zoning on parcels 2823067009, 2923067019, 2923069080, 2923069082, 2923069083, 2923069084, 3223069001, 3223069003, 3223069068, 3323069027, 3323069030, and 3323069042 and the surrounding area, which has long-standing industrial and resource material processing uses. Study and make recommendations on the potential long-term land uses for this area, including coordination with the County's planning on future closure of the adjacent Cedar Hills landfill. Include evaluation of options for land uses other than mining, including residential uses, non- residential uses; whether a four-to-one proposal is appropriate for this area; and outreach with the local community in its development. [†]	Four Creeks/Tiger Mountain CSA
Snoqualmie Interchange: Initiate a land use and zoning study for the Snoqualmie Interchange, and area north of I-90 impacted by the new Interstate 90/Highway 18 interchange. The study should include, at a minimum, review and recommendation of the appropriate zoning for properties abutting the urban growth area boundary. The study should include the properties west of Snoqualmie Way along SE 99th that could have access to urban services, should recognize and protect the forested visual character of the Mountains to	Snoqualmie Valley/Northeast King County CSA))

^{((&}lt;sup>+</sup> Motion 14351))

Study in Motion 14351 Legislative Direction	Community Service Area
Sound National Scenic byway on Interstate 90 as well as provide appropriate conservation mitigation for any newly allowed development: The area land use and zoning study, subarea plan and land use designations and zoning classifications should focus on solutions for the northwest corner while planning a vision for the properties on the northeast portions abutting the urban growth area. The plan should also ensure potential trail connections for regional trails and adhere to current King County policies. The Executive should collaborate with the City of Snoqualmie, affected Tribes, Washington state DOT, DNR, property owners, Mountains to Sound Greenway Trust, regional partners and the community.	

### 175

176 The schedule above ensures that subarea plan goals and objectives are up-to-date and 177 relevant based on current and future needs. Within this larger structure, if a property 178 owner has an interest in a land use change outside of this planning cycle, they are able 179 to use the existing land use processes. Property owners can submit for a Site Specific 180 Land Use Amendment or Zone Reclassification, per King County Code 20.18.050 and 181 <u>Chapter</u> 20.20, respectively. ((<del>If a significant land use issue arises in a Community</del> 182 <del>Service Area outside of the planning cycle, the cycle may be adjusted.</del>

183

In consideration of the restructure of the subarea planning program adopted in 2018 184 185 and 2020, the County will evaluate initiating a performance audit of the program once 186 the restructure has been implemented, by adding a requirement to the King County 187 Auditor's work plan during the 2023-2024 biennium. Additionally, f)) Eollowing the 188 completion of the first subarea planning cycle, the subarea planning schedule for 189 developing and adopting updates to the subarea plans moving forward will be 190 reviewed as part of the ((2032 eight)) next midpoint or 10-year Comprehensive Plan 191 update. This review will include evaluation of whether the subarea plan update schedule and process can be condensed from its current planning cycle. 192

### 193 C. ((Background)) Subarea Planning History

194 Between 1973 and 1994 King County prepared community plans for 12 ((subareas)) areas of unincorporated King County. The first generation of community plans, 195 196 ((substantially completed by)) from 1973 to 1984, were used to implement the 197  $((\tau))$ <u>C</u>ounty's 1964 Comprehensive Plan, and consisted of detailed land use policies, 198 area zoning, and lists of capital projects (primarily roads and parks) for each planning 199 area. The second generation of community plans, from 1985 to 1994, implemented 200 many concepts of the 1985 King County Comprehensive Plan (for example low-density 201 zoning for the Rural Area((s)), Natural Resource Lands and ((environmentally sensitive)) 202 areas with critical areas, higher urban residential densities, and development guidelines 203 for major urban activity centers such as Kenmore) that were carried over to the 1994 204 King County Comprehensive Plan.

205

206 Under King County's pre-Growth Management Act planning system, if a community 207 plan conflicted with the comprehensive plan, the community plan governed. Under the 208 Growth Management Act, ((the comprehensive plan prevails over "))subarea((")) plans 209 (Revised Code of Washington 36.70A.080(((22)))) are required to be consistent with the comprehensive plan. The 1994 King County Comprehensive Plan spelled out the 210 211 relationship between the comprehensive plan and community plans and directed the  $((\mathbf{c}))$ <u>C</u>ounty to review community plans and repeal or revise them to eliminate conflicts. 212 213 The ((-))<u>C</u>ounty ((has)) reviewed the community plans adopted between 1973 and 1994 214 and determined that, while most community plans' policies are redundant (or, in a few 215 cases, in conflict with the 1994 Comprehensive Plan), some are area-specific or issue 216 specific and should be readopted as part of the  $((\frac{1}{p}))$  Comprehensive  $(\frac{1}{p})$  Plan.

217

218 The following table illustrates how the Community Service Area geography aligns with 219 the former Community Planning Area geography; this is provided to identify how the

220 existing policies are re-assigned into the current geographic structure.

Community Service Area	Includes parts of the following former Community Planning Areas
Bear Creek / Sammamish Area	Bear Creek, Northshore, East Sammamish
Four Creeks / Tiger Mountain Area	Tahoma Raven Heights, Snoqualmie
Greater Maple Valley / Cedar River Area	Tahoma Raven Heights, Soos Creek, East King County, Snoqualmie
Southeast King County Area	Enumclaw, Tahoma Raven Heights, East King County, Soos Creek
Snoqualmie Valley / NE King County Area	Snoqualmie, East King County, East Sammamish
Vashon - Maury Island	Vashon
West King County Areas (unincorp. urban)	Portions of 10 Community Planning Areas

221

Although ((the majority)) <u>none</u> of the community plans are ((<del>no longer</del>)) <u>still</u> in effect ((<del>as</del> separately adopted plans</del>)), in many cases the published plan documents contain valuable historical information about King County's communities and other information that provides background for the policies listed below and for the portions of the local pre-Growth Management Act area zoning that remain in effect. ((<del>The only separately adopted community plan from these previous planning efforts currently in effect is the Fall City Subarea Plan.</del>))

229

The following sections of this chapter will be updated((<del>, as appropriate,</del>)) to reflect the ((new Community Service Area</del>)) subarea plans as they are adopted. The subarea plans that have been adopted under the new subarea planning framework include: the Vashon-Maury Island Community Service Area Subarea Plan, the Skyway-West Hill Community Service Area Subarea Plan, ((<del>and</del>)) the North Highline Community Service Area Subarea Plan, and the Snogualmie Valley/Northeast King County Subarea Plan.

### II. Bear Creek / Sammamish ((Area))

237 The Bear Creek/Sammamish Community Service Area consists of portions of the 238 following former Community Planning Areas: Bear Creek, Northshore and East 239 Sammamish. Large sections of this area have been annexed into the cities of Bothell and Redmond and have incorporated into the cities of Kenmore, Sammamish and 240 241 Woodinville. The Urban Planned Developments east of the City of Redmond were 242 controlled through development agreements; however, those agreements were 243 expiring and, in 2020, King County established land use and zoning for these areas. 244 King County will not permit additional similar urban-scale development outside the 245 Urban Growth Area. The policies listed below pertain to areas within the Community 246 Service Area that are still within unincorporated King County.

247

In 2014, the estimated population in the Bear Creek/Sammamish CSA was 44,000. Of
this total, 9,000 people were estimated to live in the Redmond Ridge Urban Planned
Development and 34,900 people were estimated to live in the CSA rural portion. In
2010, there were a total of 15,850 housing units in the CSA. Of this total, 3,540 were in
the Redmond Ridge Urban Planned Development and 12,300 were in the CSA rural
portion.

### 254 <u>A.</u> Background

255 Bear Creek. The Bear Creek Community Plan became effective in February 1989, and 256 directed most forecast growth into a concentrated area near the City of Redmond Watershed, first referred to as the "Novelty Hill Master Planned Developments." The 257 258 rest of the Bear Creek Plateau was designated for a mixture of suburban and rural 259 residential development. The 1994 King County Comprehensive Plan redesignated 260 most of the planning area as Rural Area. In 1995, some of the Bear Creek Community 261 Plan's policies relating to the Novelty Hill Master Planned Developments (MPDs) were 262 amended by Ordinance 11954. Also, the 1994 Comprehensive Plan refers to MPDs as 263 Urban Planned Developments.

264

271

After the 1994 Comprehensive Plan's urban designation of the Urban Planned Developments sites was appealed and remanded to the county, the sites in question were redesignated for Fully Contained Communities as defined in the Growth Management Act, as well as Urban Planned Developments ((<del>See policy U-178</del>))). The readopted policies for the most part address Novelty Hill and some area-specific transportation and trail issues.

272 East Sammamish. The East Sammamish Community Plan was adopted in December 273 1992. The East Sammamish Community Plan Update became effective in June 1993. 274 Most of the planning area was designated for urban development, but important Rural 275 Areas included Happy Valley, Grand Ridge and the eastern edge of the Sammamish 276 Plateau. For the most part, the 1994 King County Comprehensive Plan reaffirmed the 277 land use designations of the East Sammamish Community Plan Update. The major 278 changes from the community plan occasioned by the 1994 Comprehensive Plan were 279 replacement of the "urban reserve" approach to growth phasing with the service and finance strategy outlined in the 1994 Comprehensive Plan and the designation of a 280 281 portion of Grand Ridge for urban growth.

282

 283 Northshore. The first "Northshore Communities Development Plan" began in 1972 284 1973 and was adopted in August 1977. Almost immediately the Northshore ((Community Service Area)) Subarea Planning - Page 11-10 285 Community Plan Revision Committee was established, and the "Revised Northshore286 Community Plan" was adopted in 1981.

337

The latest Northshore Community Plan Update began in July 1988 and was adopted in February 1993. During 1993, the newly incorporated City of Woodinville assumed jurisdiction within its territory. Portions of the planning area have been annexed by Bothell, Kirkland and Redmond. Kenmore, a significant unincorporated activity center, became a city in August 1998.

### ²⁹³ <u>B.</u> Bear Creek Policies

- 294<br/>295CP-101<br/>share of growth in Bear Creek, the Novelty Hill subarea should be<br/>designated an urban planned development (UPD) and fully contained<br/>community (FCC). This designation will be implemented by urban<br/>planned development. (BC-3)
- 300CP-102Urban planned development will be permitted in the Novelty Hill301subarea only when the following planning policies are met:
  - a. To protect existing wetlands, streams and wildlife habitat, urban planned development shall be consistent with the intent of King County ordinances, King County Comprehensive Plan policies, and sensitive areas regulations. The design of the proposed development shall protect and preserve existing wetlands, streams and wildlife habitat by several methods including (but not limited to) minimizing alterations to the natural drainage features, maintaining water quality, preserving storage capacity, providing undisturbed unique/outstanding wetlands and undisturbed or enhanced buffers, restricting the number of stream crossings, and minimizing erosion and sedimentation. To achieve the intent of this policy it may be necessary to exceed the requirements of the King County wetland guidelines.

b. A master drainage plan for the Novelty Hill subarea shall be approved by King County.

- c. New development adjacent to a unique/outstanding or significant wetland should preserve or enhance the wetland and provide an undisturbed buffer around the wetland adequate to protect its natural functions. Encroachments into significant wetlands may be allowed when no feasible alternative exists and enhancements are provided to replace the lost wetland functions; and
  - Groundwater recharge areas should be identified and protected to ensure that groundwater resources are protected from potential pollution.
  - e. To ensure that the existing road system in both King County and Redmond is not adversely affected, on-site and off-site traffic impacts shall be mitigated consistent with the Integrated Transportation Program (K.C.C. chapter 14.65).
- f. A project environmental impact statement (EIS) shall be required for all property proposed for urban planned development within the Urban Planned Development area. The project EIS shall address the full range of public services necessary to serve urban development on Novelty Hill. The EIS shall include the cost of these services, the financial responsibility of the development to affected jurisdictions, and the method of phasing development to coincide with availability of these public services.

((Community Service Area)) Subarea Planning - Page 11-11

g. Since the remainder of residential land in Bear Creek will either be 338 339 recognized as existing one-acre neighborhoods or designated as 340 Rural Areas, all improvements to public facilities, including but not 341 limited to road construction and sewers, shall be financed by the 342 Urban Planned Development developers provided the impacts are 343 the result of UPD developments or according to a fair-share formula 344 agreed to by affected parties. 345 h. A full range of housing densities, types and prices including 346 housing for low-, moderate-, and medium-income groups shall be included in the Urban Planned Development. The mix of single-347 348 family and multifamily housing in the Urban Planned 349 Developments shall approximate the existing county housing stock 350 mix. 351 Urban planned development shall maintain and keep open for i. 352 public use identified major equestrian and hiking trails. 353 Urban planned development shall provide active recreation j. 354 facilities that adequately serve the needs of future residents and 355 employees. 356 k. Urban planned development shall provide a minimum of 25% open 357 space in addition to the preservation of all surveyed wetlands. I. 358 The Novelty Hill urban planned development area shall contain an 359 urban activity center, which includes a commercial center to 360 provide for the everyday shopping needs of the planned Urban 361 Planned Development population. m. The activity center shall also contain a business park of sufficient 362 363 size to provide a diversity of employment opportunities and a 364 balance of jobs and households for the Urban Planned 365 Development area. 366 n. In order to preserve opportunities for a variety of employment 367 types in the business park areas, retail development in 368 freestanding buildings should be excluded. Up to 10% of gross 369 floor area in business park buildings may be planned for retail uses, 370 such as restaurants and business services, to serve business park 371 employees. 372 о. Development conditions for the shopping and business park areas 373 should encourage high quality development and site design. 374 375 The area will revert to rural if UPD development is denied or not 376 pursued. If the UPD area reverts to rural, the zoning shall be RA-5. 377 (BC-4) 378 379 CP-103 Sewer facilities necessary to serve urban planned development on 380 Novelty Hill are planned, designed and constructed to serve only such 381 development and are prohibited from serving nearby surrounding low-382 density urban and Rural Areas. Proposals to extend sewer service or 383 expand urban development outside the Novelty Hill subarea are not 384 appropriate and are inconsistent with the purpose of the King County 385 Comprehensive Plan. (BC-5) 386 CP-104 The Novelty Hill urban planned development or fully contained 387 388 community shall contain a commercial area of sufficient size to serve 389 the future residents and employees. (BC-17) 390 391 CP-105 The natural drainage systems of Bear, Evans, and Patterson Creeks 392 should be restored, maintained, and enhanced to protect water quality, 393 preserve existing aquatic habitat, reduce public costs, and prevent

394environmental degradation.Public improvements and private395developments should not alter natural drainage systems without396mitigating measures which eliminate increased risk of flooding and397erosion, negative impacts on water quality, and loss on aquatic or398riparian habitat. (BC-32)399399

400CP-106An undisturbed corridor wide enough to maintain the natural biological<br/>and hydrological functions of streams should be preserved in all new<br/>development in the Bear Creek Planning Area. (BC-34)

403

409

417

433

434

435

436

437

438 439

440

441

442

443

- 404CP-107Bear, Evans, and Patterson Creeks and their tributaries should be405protected from grazing animal access in order to: 1) reduce water406quality degradation from animal wastes, 2) reduce bank collapse due to407trampling, and 3) allow shading vegetation to reestablish along stream408banks. (BC-35)
- 410CP-108Streams channeled in the Bear, Evans, and Patterson Creek drainages411should not be placed in culverts unless absolutely necessary for412property access. To reduce disruption to streams and their banks,413bridges should be used for stream crossings, and crossings should414serve several properties. When culverts are required, oversized415culverts with gravel bottoms that maintain the channels' width and416grade should be used. (BC-38)
- 418<br/>419CP-109New development should rehabilitate degraded stream channels and<br/>banks in the Bear, Evans, and Patterson Creek drainages to prevent<br/>further erosion and water quality problems. Where conditions permit,<br/>the banks and channels should be restored to a natural state. (BC-39)422
- 423<br/>424CP-110Unique or significant wildlife should be identified and preserved.<br/>Development plans should identify significant wildlife habitat and<br/>should locate buildings, roads, and other features on less sensitive<br/>portions of the site. These considerations may result in a reduction in<br/>density from that otherwise allowed by zoning. (BC-40)423<br/>428
- 429CP-111The Bear and Evans Creeks' watersheds have been designated as<br/>critical areas for protection of the aquatic resources and human health.430The following surface water management activities should be<br/>promoted.
  - a. Appropriate and reasoned changes in land use policies and regulations may be evaluated during the preparation of the Bear/Evans Creeks Basin Plan.
    - b. Ensure adequate field inspection of land development activities.
    - c. Implement a public information program to promote water resources and stream channel protection.
  - d. The Bear and Evans Creeks Basin Plan shall develop recommendations for water quality monitoring and recommended methods for citizen input and evaluation to assess the success of the county's policies and regulations pertaining to this planning area. (BC-41)

445 **CP-112** Mitigation of traffic impacts to the City of Redmond arterial system will 446 be accomplished through the interlocal agreement process. The 447 Avondale arterial corridor study recommendations shall be used as a 448 basis for traffic mitigation requirements for both city and county 449 development affecting the corridor.

450

451

452

453

454

461

464

474

482

489

- Mitigation shall preserve the operational integrity of the corridor a. and maintain existing local access. The primary arterial corridor between the Novelty Hill urban area and SR-520 should be located and designed to encourage transit and ride-sharing alternatives to single-occupant vehicle travel.
- 455 b. Transportation planning of new facilities and management of the transportation system should be coordinated with current and 456 457 forecast needs of the East Sammamish and Northshore planning 458 areas, adjacent areas of Snohomish County, and with the cities of 459 Redmond and Kirkland, and should be a cooperative effort of the 460 affected jurisdictions. Phasing of Bear Creek and Redmond development should be strongly linked to the provision of 462 adequate transportation facilities and travel demand management 463 programs. (BC-45A)
- 465 **CP-113** Establishment of new rights-of-way and acquisition of additional right-466 of-way in existing corridors should emphasize protection of natural 467 systems and adequate buffering of existing and potential residential 468 development. (BC-47) 469
- 470 CP-114 Road improvements in Cottage Lake, Ring Hill, Ames Lake, Union Hill, 471 and the Rural Areas should incorporate design features such as grass 472 lined swales to minimize surface water disruption and to protect and 473 enhance water quality. (BC-49)
- 475 CP-115 196th Avenue Northeast ("Red Brick Road") between Union Hill Road 476 and Redmond-Fall City Road (SR-202) is a historic road and should be 477 preserved by restoring its brick surface, limiting vehicular loads and 478 speeds, and prohibiting access to commercially-zoned properties to the 479 west. Access to these properties should be provided by other existing 480 roads and by a new north-south road connecting Union Hill Road and 481 185th/187th Avenues Northeast. (BC-50)
- 483 CP-116 Park-and-ride and park-and-pool lots should be developed in 484 Redmond, Cottage Lake, Ring Hill, Ames Lake, and Union Hill to 485 provide focal points for transit and ride sharing. Park-and-pool lots 486 should be located in Rural Areas along major commuting corridors such 487 as SR-202, Redmond-Fall City Road, Novelty Hill Road, and Woodinville 488 Duvall Road. (BC-52)
- 490 CP-117 The Northwest Gas Pipeline and Puget Sound Power Line should be 491 established as regional trails in Bear Creek to tie in with other planning 492 areas and to connect with the King County Tolt Pipeline Trail and the 493 Snoqualmie Valley Trail. (BC-61)
- 495 CP-118 When the development of property occurs in Bear Creek, adequate 496 rights-of-way should be provided for trail use. Trails should connect to 497 existing and proposed schools, parks, riding stables, and recreation 498 areas. (BC-62) 499

### 500 <u>C.</u> East Sammamish Policies

506

511

523

528

532

- 501CP-119For all new development, increased standards for retention/detention,502water quality facilities, and monitoring shall be considered, adopted503and implemented as appropriate within the areas identified in surface504water management basin planning and reconnaissance study areas.505(NE-1)
- 507CP-120As new roads are built and existing roads widened, special<br/>consideration shall be taken to create or retain the aesthetic character<br/>of the area through the use of vegetated buffers that utilize native<br/>vegetation. (NE-3)
- 512 CP-121 Control mechanisms equal to or more effective than those adopted by 513 Ordinance 9365 limiting or removing phosphorus and other non-point 514 source pollutants from water bodies should be established and 515 implemented as special requirements in area-specific basins plans to 516 provide added protection to streams, lakes, wetlands. The Lake 517 Sammamish Water Quality Management Project Report and, upon their 518 adoption, the Issaquah Creek and East Lake Sammamish Basin and 519 Non-point Source Control Plan, the Pine Lake Management Plan and 520 the Beaver Lake Management Plan recommendations should be 521 implemented to protect water bodies from non-point source pollution. 522 (NE-7)
- 524CP-122Development shall protect wildlife through site design and525landscaping. New development within or adjacent to the wildlife526habitat network should incorporate design techniques that protect and527enhance wildlife habitat values. (NE-10)
- 529CP-123All golf course proposals shall be carefully evaluated for their impacts530on surface and groundwater quality, sensitive areas, and fish and531wildlife resources and habitat. (NE-11)
- 533CP-124Water used for irrigating golf courses should come from nonpotable534water sources wherever possible. Use of natural surface water sources,535such as streams, should be avoided due to impacts on fish and other536wildlife habitat. A water conservation plan shall be submitted with golf537course applications which should address measures such as the use of538drought-tolerant plant species. (NE-12)
- 540CP-125The Patterson Creek Basin currently provides highly-productive aquatic<br/>habitat. Urban development within this basin should be conditioned to<br/>protect this resource by minimizing site disturbance, impervious<br/>surfaces and disturbances of wetlands and streams. (No Community<br/>Plan Policy Number)543944545945

- 546 **CP-126** The Northwest Pipeline office and maintenance shop is an existing use 547 and is recognized by this plan as providing a needed service to the 548 area. This 6.5 acre site may redevelop for pipeline utility and/or school 549 bus base uses exclusive of major maintenance functions that are 550 compatible with the surrounding rural development and agricultural 551 uses. Redesignation of additional properties in the immediate vicinity 552 of Northwest Pipeline for manufacturing park uses or other urban uses 553 shall not be permitted. (CI-13)
- 555CP-127New developments should be designed and constructed with an<br/>internal road system which includes a Neighborhood Collector linking<br/>with existing or planned adjacent developments, creating a complete<br/>Neighborhood Collector circulation system and such linkage should be<br/>designed to ensure safety of local streets. Through traffic on local<br/>access streets should be discouraged. (T-9)

554

561

571

582

587

- 562 **CP-128** Metropolitan King County Government should establish park-and-ride 563 facilities in the East Sammamish Community Planning area. Park-and-564 ride facilities should be built along 228th Avenue and/or adjacent to I-565 90 and SR-202. The park-and-ride lots should be sited adjacent to and 566 connect with existing or proposed community or neighborhood centers 567 or within the employment center located around the intersection of E. 568 Lake Sammamish Parkway and SE 56th Street. Establishment of a site 569 near, but to the north of, I-90 should be high priority response to 570 current and anticipated I-90 access problems. (T-13)
- 572 CP-129 Consistent with the King County Open Space Plan, the county shall 573 encourage establishment of an open space system in East Sammamish 574 and give priority to protecting recreational, cultural and natural and 575 sensitive areas such as shorelines, aquifer recharge areas, wildlife 576 habitat, historic properties, archaeological sites, scenic vistas and 577 community separators or greenbelts. The county may require lot 578 clustering within or adjacent to open space areas; linkages between 579 open spaces and may provide density bonuses or incentives to 580 developers who preserve significant open space or establish trails 581 beyond usually applied mitigation. (P-11)
- 583CP-130Urban separators should be established to provide visual relief from<br/>continuous development, provide important linkages for wildlife<br/>habitat, and maintain a visual separation between distinct<br/>communities. (P-17)
- 588CP-131There are areas within the urban separators that are especially suitable589for trail connections for recreational use by present and anticipated590population. King County should develop a trail and/or parks system591utilizing the preserved open space within the urban separators. (P-18)
- 593 CP-132 When the development of properties occurs in the East Sammamish 594 planning area, public access or easements should be required to 595 complete the development of a local trail system for those areas where 596 existing trails have historically been used by the public, or where the 597 King County Open Space Plan identifies proposed trail alignment for 598 regional and local trails. The Parks Division shall review the application 599 during the development review process. (P-23) 600

608

614

621

628

635

640

641

642

643

644

645

646

647

648

- 602CP-133The north and east slopes of Norway Hill have an established603neighborhood character and limited future development potential.604They are, therefore, designated low density urban, 1 home per acre.605King County recognizes that extensive steep slopes and erosive soils at606the top of Norway Hill (above the 300-foot elevation mark) warrant607lower residential densities. (E-10)
- 609CP-134The undeveloped area to the south of Metro's Brickyard Park and Ride610lot should retain its office-only designation in recognition of its611proximity to a major transportation corridor and the need for increased612employment opportunity in proximity to planned high-density613residential areas. (E-13)
- 615CP-135King County, Snohomish County, the City of Bothell, and the City of616Woodinville should work on specific areas of mutual concern, such as617the Swamp Creek and Daniels Creek drainage basins, the SR-527618transportation corridor, the proposed regional facilities of the619University of Washington, and the future expansion of the City of620Bothell. (E-25)
- 622<br/>623CP-136Significant vegetation is a diminishing resource in the Northshore<br/>community. Significant vegetation contributes significantly to<br/>environmental quality, neighborhood character, and the quality of life<br/>in Northshore. All new residential development shall retain significant<br/>existing vegetation. Native vegetation should be utilized wherever<br/>possible. (R-17)
- 629<br/>630CP-137New development must provide pedestrian connections to off-site<br/>facilities such as existing trails, walkways, community facilities and<br/>services, transit, schools and surrounding residential neighborhoods.631<br/>632Pedestrian links should be provided internally in all new residential<br/>development. Bicycle and equestrian links should be provided where<br/>possible. (R-19)
- 636CP-138King County recognizes the importance of existing mobile home parks637in providing affordable housing options. Mobile home parks outside of638the Woodinville and Kenmore commercial core areas are designated639for mobile home park uses, and shall be zoned appropriately.
  - a. King County shall continue to examine the feasibility of funding and developing a replacement mobile home park in north King County for displaced mobile homes on county-owned or privately owned sites.
  - b. King County should develop interlocal agreements with the cities of Bothell, Redmond, Kirkland, Woodinville and Kenmore for joint development of replacement parks to accommodate mobile home owners if they are displaced from mobile home parks within cities. (R-21)
- 650CP-139Roadway improvements addressing the transportation needs in the<br/>Sammamish Valley from the South Woodinville bypass to Northeast<br/>124th Street should carefully preserve the rural character of the valley<br/>as indicated by this and other adopted land use plans. Incorporating<br/>roadway design characteristics, such as tree windbreaks and shoulders

655instead of curb and gutter, will enhance this rural atmosphere. Access656from adjacent properties to the proposed Willows Road extension shall657be discouraged. Where access is necessary from adjacent properties,658access shall be consolidated. (T-11)

659

668

673

680

686

- 660 CP-140 Transportation projects in Northshore should incorporate bicycle 661 friendly design, utilizing a variety of design techniques appropriate to 662 the particular project and right-of-way characteristics, including, but 663 not limited to, bicycle lanes, wide outside travel lanes, paved 664 shoulders, bicycle sensitive signal detectors, and appropriate signing. 665 Existing bicycle facilities should be preserved or enhanced when general road improvements are made. Secure parking for bicycles 666 should be provided at activity centers throughout Northshore. (T-33) 667
- 669CP-141Pedestrian and bicycle linkages are encouraged and should be<br/>planned. There should also be a link for equestrian uses from<br/>Hollywood Hill and NE 171st Street to the Sammamish River trail in the<br/>vicinity of the South Woodinville CBD bypass. (W-14)
- 674<br/>675CP-142Protection of natural vegetation coverage at levels sufficient to<br/>moderate surface water runoff and erosion and to protect the integrity<br/>of stream channels should be required through special zoning<br/>requirements, critical drainage basin requirements, or countywide<br/>ordinance. When revegetation is required, appropriate native<br/>vegetation should be used. (NR-4)
- 681<br/>682CP-143Unique geologic conditions in Northshore have resulted in hillsides that<br/>have a high risk of large scale erosion. Increased on-site<br/>retention/detention requirements in areas drainage over steep and<br/>erosive slopes should be adopted and implemented as special zoning<br/>requirements. (NR-9)
- 687CP-144A community-wide trail system for pedestrians, equestrians, and688bicyclists should be developed. This trail system should connect689regional trails with local trails and walkways. (P-6)
- 691 CP-145 When the development of properties occurs in the Northshore Planning 692 Area, public access or easements should be required to complete the 693 development of a local trail system. Adequate right-of-way should be 694 provided for trail use. To ensure that the provision of trail corridor 695 right-of-way does not result in a reduction in the number of permitted building lots, the area within the trail right-of-way, not otherwise 696 697 credited as part of a road right-of-way dedication, should also be 698 credited toward the lot area of any proposed development. Trails 699 should connect to existing and proposed schools, parks, riding stables, 700 recreation areas and neighborhoods. (P9) 701
- 702CP146King County should work closely with other jurisdictions and public703agencies to seek appropriate trail links between elements of the open704space system including, but not limited to the Burke-Gilman trail,705Sammamish River trail, and the Tolt Pipeline Trail. (P10)706

## 707CP-147Existing public access points to the Sammamish River should be<br/>maintained and additional access points acquired and developed to<br/>ensure the use of this river as trail corridor and fishing area. (P-11)

## ⁷¹⁰ II<u>I</u>. Four Creeks / Tiger Mountain ((<del>Area</del>))

### 711 <u>A.</u> Background

The Four Creeks/Tiger Mountain Community Service Area consists of portions of the
following former Community Planning Areas: Newcastle, Tahoma Raven Heights, East
Sammamish and Snoqualmie. A large portion of the area incorporated as the City of
Newcastle and annexed in to the City of Issaquah. The Klahanie Annexation expanded
the City of Sammamish in 2016.

In 2014, the estimated population in the Four Creeks/Tiger Mountain CSA was
 approximately 13,000. In 2010, there were 4,870 housing units in the CSA.

720

721 The Newcastle Community Plan commenced in 1978 and was adopted in May 1983. 722 The final adopted plan designated three sites for Master Planned Developments 723 (MPDs), but stipulated that only two MPDs could occur without an update of the 724 community plan. One MPD was approved by the county in the late 1980s. Bellevue 725 annexed Factoria and Newport Hills in 1993 and the City of Newcastle was incorporated 726 in 1994, so the noncity portion of the planning area's population fell 13 percent between 1990 and 1994 even though the whole planning area was forecasted to grow 727 almost 18 percent between 1994 and 2010. The planning area also included some 728 729 areas designated Rural Area by either the 1985 or 1994 King County Comprehensive 730 Plans.

731

### 732 <u>B.</u> Newcastle Policies

733 CP-201 King County supports the nomination of the Odd Fellows Cemetery and counterbalance right-of-way to the National and State Registers of Historic Places. (N-33)
 736

737CP-202Limit grazing animal access to May Creek and its tributaries in order to<br/>1) reduce water quality degradation from animal wastes, 2) reduce<br/>bank collapse due to animals' hooves, and 3) allow shading vegetation<br/>to reestablish along stream banks. (N-41)

742	CP-203	May Creek is acknowledged as a regional asset and should be
743		protected. Thus, King County shall not increase zoning density on
744		lands that drain into May Creek (i.e. the May Valley Basin) without first
745		determining and implementing stormwater runoff mitigation necessary
746		to control flooding and siltation in May Creek.

## ((+++-)) <u>IV.</u> Greater Maple Valley / Cedar River ((Area))

- The Greater Maple Valley/Cedar River Community Service Area encompasses portions
  of the following former Community Planning Areas: Soos Creek, Tahoma Raven
  Heights, Snoqualmie and East King County.
- 752

In 2014, the estimated population in the Greater Maple Valley/Cedar River CSA was
 approximately 17,000. In 2010, there were 6,700 housing units in the CSA.

## 755 <u>A. Background</u>

756 The first Soos Creek Plateau Communities Plan (SCCP) commenced during the fall of 757 1975, and was adopted in November 1979. The process was controversial, partly 758 because Soos Creek served as a laboratory for several emerging planning concepts, 759 including a Rural Area land use designation implemented with zoning limiting 760 residential density to one home per five acres.

761

762 The Soos Creek Community Plan Update commenced in March 1988 and was adopted 763 in December 1991. In 1995 the City of Kent initiated annexation of a very large area 764 between it and Lake Meridian, intended to encompass most of its Potential Annexation 765 Area (PAA) within the planning area. The cities of Maple Valley and Covington have 766 commenced operating and assumed jurisdiction within their territories. The Panther 767 Lake annexation to the City of Kent occurred in 2010. 768

The Tahoma/Raven Heights Communities Plan (T/RH) commenced in August 1979 and was adopted in October 1984. T/RH continued to apply the Growth Reserve and Rural Area designations and zoning that emerged during the Soos Creek planning process. The planning area is mostly unincorporated Rural Area or Forest Production District. In the years prior to the Growth Management Act (GMA) the City of Black Diamond completed one large annexation. A final Urban Growth Area for Black Diamond was adopted as part of amendments following the 1994 King County Comprehensive Plan.

The planning area was affected by the incorporation of the City of Maple Valley in 1997.The city includes most of the Urban Growth Area in the planning area.

In response to data and recommendations emerging while the Soos Creek Basin Plan
was being prepared, interim five acre zoning was applied to portions of the Jenkins and
Covington Creek watersheds in July 1989. An update to the plan covering about onefifth of the planning area was initiated in March 1991, and adopted in December 1991.
The area zoning was changed in some cases, but this action was based on the 1985
King County Comprehensive Plan and applicable basin plan policies, and did not result
in any changes to the 1984 plan's policies.

#### 787 <u>B.</u> Soos Creek Policies

797

813

835

- 788 CP-301 The continued viability and health of the Soos Creek planning area's 789 stream systems and the fisheries resources dependent upon them 790 should be assured through zoning, special zoning conditions and 791 development regulations. The intent of this policy is to control 792 densities along stream corridors identified by the Soos Creek Basin 793 Plan. This policy will be implemented through the Area Zoning by 794 placing rural and urban densities within 1/4-mile of significant stream 795 systems identified as Types 1, 2, and 3 waters according to the 796 Sensitive Areas Ordinance. (NR-1)
- 798<br/>799CP-302<br/>corridors in urban designated areas of the Soos Creek basin and<br/>classified R-1, urban stream protection special district overlay. Total<br/>impervious surface should not exceed 8%, and total clearing of<br/>forested vegetation should not exceed 30%. Reforestation to achieve<br/>sites that are 70% forested should be required. (NR-1A)
- 805 CP-303 New development should rehabilitate degraded wetlands and stream 806 channels and banks in the Soos Creek planning area's drainage's to 807 prevent further erosion and water quality problems. These areas 808 include, but are not limited to, May Creek, Garrison Creek, Molasses 809 Creek and Olsen Creek. Where conditions permit, the banks and 810 channels should be restored to a natural state. Where it has been 811 determined that additional standards may be appropriate to control 812 volume, these should be required for new development. (NR-3)
- 814 **CP-304** Within the Soos Creek basin, bare ground associated with clearing, 815 grading, utility installation, building construction, and other 816 development activity should be covered or revegetated between October 1 and March 31 each year. Earth-moving and land-clearing 817 818 activity should not occur during this period within the Soos Creek basin 819 except for regular maintenance of public facilities and public agency 820 response to emergencies that threaten the public health, safety and 821 welfare. Landscaping of single-family residences, existing permitted 822 commercial forestry and mining activities and development sites with 823 approved and constructed drainage facilities that infiltrate 100 percent 824 of stormwater runoff should be exempt from these restrictions. (NR-8)
- 825826CP-305For new subdivisions in the Soos Creek basin Rural Area, a minimum of<br/>20% of the property should be retained as a separate tract of<br/>undisturbed indigenous vegetation. (NR-9)829
- 830CP-306All development within 660 feet of the top of the Cedar River Valley<br/>and the Green River Valley walls, particularly along the bluffs south and<br/>west of the Lea Hill plateau and within the Lake Heights area, should be<br/>conditioned to avoid adverse impacts on the environment and risks to<br/>life and property. (NR-14)
- 836CP-307The Soos Creek Community Plan recognizes the importance of existing<br/>mobile home parks in providing affordable housing options. Mobile<br/>home parks in the urban areas of Soos Creek are designated for mobile<br/>home park uses, and should be zoned appropriately. King County<br/>should continue to examine the feasibility of funding and developing a<br/>replacement mobile home park in south King County for displaced

((Community Service Area)) Subarea Planning - Page 11-21

842mobile homes on county-owned or privately-owned sites. King County843should develop intergovernmental agreements with the cities of844Renton, Kent and Auburn for joint development of replacement parks845to accommodate mobile home owners if they are displaced from846mobile home parks within cities. (R-23)

847

854

857

863

866

870

- 848<br/>849CP-308Significant vegetation is a diminishing resource in the Soos Creek<br/>community. Significant vegetation contributes significantly to<br/>environmental quality, neighborhood character, and the quality of life<br/>in Soos Creek. All new residential development shall retain significant<br/>existing vegetation. Native vegetation should be utilized wherever<br/>possible. (R-33)
- 855CP-309Multifamily zoned land should not be converted to institutional and<br/>commercial/office uses within the Soos Creek Planning Area. (C-5)
- 858<br/>859CP-310Equestrian crossings of arterials should be permitted only where they<br/>do not greatly disrupt traffic. Where possible, these crossings should<br/>be combined with pedestrian and bicycle crossings. There should be<br/>no at grade equestrian crossings of SR-516, except at Lake Meridian.<br/>(T-29)
- 864CP-311Crest Airpark is an important local facility and should continue865operation at current levels of use. (F-15)
- 867CP-312Because of noise and public safety concerns, low-density, single-family868development should be the primary land use allowed within Crest869Airpark's north flight path within 1/2-mile of the airport runway. (F-16)
- 871<br/>872CP-313<br/>covenant.All new subdivisions within 1/4-mile of Crest Airpark should include a<br/>covenant. The covenant should state that the property owner and/or<br/>resident recognize the existence of Crest Airpark, its value to the<br/>community, and the noise and public safety aspects of living in<br/>proximity to the airpark. (F-17)
- 877CP-314The operation of Pacific Raceway is expected to continue indefinitely.878The area authorized for racetrack use shall be confined to maximize879protection of Soosette Creek and its riparian area. Any future880consideration of permits for its operation should be consistent with the881spirit and intent of the 1991 rules and conditions which regulate882operation of the facility. (F-18)
- 884CP-315King County should give high priority to expanding the Big Soos Creek885trail by linking the City of Covington to the south and Fairwood Center886to the north to the existing trail system. (P-15)887
- 888 CP-316 King County should give high priority to linking the Green River and
   889 Cedar River corridors. (P-16)
   890

891CP-317King County should coordinate with the City of Seattle, WSDOT, and<br/>other jurisdictions to link major elements of the open space system893including the Cedar River, Lake Desire, Big Soos Creek, SR-18 and the<br/>Green River trail systems. (P-18a)

### 895 <u>C.</u> Tahoma/Raven Heights Policies

- 896CP-318Resource activities should be encouraged in areas where such activities<br/>are not inconsistent with a rural atmosphere. In order to ensure<br/>continued development of natural resources prior to the development<br/>of the land for other purposes, extractive industries should be allowed<br/>to locate in areas known to have deposits of minerals. Premature<br/>urban/ suburban development should not be approved which<br/>forecloses the opportunity to use the resources. (T/RH-28)
- 904CP-319The demand from surrounding land uses and densities should not<br/>exceed the capacity of the area's groundwater resources nor otherwise<br/>cause deterioration of its quality. (T/RH-45)907
- 908 **CP-320** Existing businesses which qualify as legal uses located at Highway 169 and Cedar Grove Road should be given the same land use map 909 910 designation as surrounding Rural Area or Natural Resource Land 911 properties, but recognized as Rural Businesses with neighborhood-912 scale business zoning. Any such development should not be expanded 913 beyond the limits of the existing zoning of the specific parcel on which 914 it is currently located, and if the use is abandoned the zoning should be 915 redesignated to a Rural Area zone consistent with that applied to 916 surrounding properties.
- 918CP-321King County supports annexation of the lands within the City of Black919Diamond's Urban Growth Area subject to the requirements of the Black920Diamond Urban Growth Area Agreement as adopted by Ordinance92112534. If the agreement is terminated, the affected lands under King922County jurisdiction shall be treated as follows:
  - a. Land within the designated Urban Growth Area shall be redesignated to Rural and reclassified to the rural zoning in place prior to the effective date of Ordinance 12534. This zoning shall continue for a period of at least five years from the date of reclassification.
  - b. The areas identified in the agreement as county open space shall be maintained at the rural zoning in place prior to the effective date of Ordinance 12534. This zoning shall continue for a period of at least five years after the date of termination of the agreement.
- 933CP-322King County supports expansion of the network of regional trails and<br/>conservation of natural resource lands and environmentally sensitive<br/>areas through community efforts such as the Rock Creek Valley<br/>Conservation Plan and the Friends of Rock Creek.

938CP-323King County supports efforts to protect and enhance open space and<br/>ensure long-term habitat health and passive recreation opportunities in<br/>the Middle Green River through community efforts such as the Middle<br/>Green River Coalition.

## 942 ((†))V. Southeast King County ((<del>Area</del>))

### 943 <u>A.</u> Background

The ((SE)) Southeast King County Community Service Area consists of the former
Enumclaw Community Planning Area and portions of the former Tahoma Raven
Heights, East King County and Soos Creek Community Planning Areas. The City of
Enumclaw is located within this CSA and the City of Black Diamond is surrounded by it
on three sides. The majority of this CSA is Rural Area and forested resource lands.

In 2014, the estimated population in the SE King County CSA was approximately
29.000. Of this total, 300 people were estimated to live in the Lower Green River area
and 28,000 people were estimated to live in the main CSA area. In 2010, there were a
total of 11,020 housing units in the CSA. Of this total, 102 were in the Lower Green
River area and 10,918 were in the main CSA area.

955

966

978

983

984

949

The Enumclaw Community Plan and Area Zoning were commenced in 1986-87 and
adopted in June 1990. The community plan refined boundaries between the Enumclaw
Plateau's Agricultural Production District and abutting Rural Areas and Forest
Production District, and designated the Urban Growth Area agreed to by King County
and the City of Enumclaw. The 1994 King County Comprehensive Plan reaffirmed the
Enumclaw Community Plan's land use designations.

### 962 <u>B.</u> Enumclaw Policies

963CP-401All development within 660 feet of the top of the Green River valley964walls should be conditioned to avoid adverse impacts on the965environment and risks to life and property. (EN-12)

967CP-402King County should work with landowners on either side of SR-410968east of the City of Enumclaw to protect the scenic qualities of this969highway corridor. (EN-22)970

971CP-403King County should work with Washington State Parks and Recreation972Commission and landowners on either side of the Green River Gorge to<br/>protect the scenic qualities of the Green River Gorge conservation area.974(EN-23)975975

976 Enumclaw's expansion area, like that of other Cities in the Rural Area, is shown on the
977 ((King County Comprehensive Plan)) Land Use Map.

- 979CP-404King County should work with the City of Enumclaw to establish an<br/>agreement guiding future annexations, including but not limited to the<br/>following elements:<br/>a. Commitment from the city to extend and maintain public services
  - a. Commitment from the city to extend and maintain public services to the area, including police, fire, transportation, sewer, water, storm water management and general government services.

((Community Service Area)) Subarea Planning - Page 11-24

b. Commitment from the city to provide a variety of residential 985 986 development at an overall density for unconstrained land of at least 987 four to eight units per acre. 988 c. Commitment from the city that the extension of public services to 989 meet the needs of future residents will maintain service levels to 990 existing city residents. 991 d. Commitment that the city will continue environmental protection 992 for sensitive areas, (including but not limited to flood plains, steep 993 slopes, wetlands, seismic and landslide hazard areas) at or above 994 King County standards. 995 Commitment from the city to use measures to buffer or protect e. 996 abutting forest or agriculture resource lands. 997 Commitment that the city will provide protection of historic sites f. 998 and areas equal to the county's Historic Preservation Ordinance. 999 g. Commitment by King County to consult with the city on public 1000 improvement standards, such as local road standards, drainage 1001 control requirements and transportation standards that will apply 1002 to development in expansion areas. 1003 h. Commitment by King County to notify the city of development 1004 proposals in the expansion area and to consult with the city to 1005 condition development approvals to mitigate adverse impacts on 1006 city services and to implement city plans, policies and standards. 1007 i. Commitment by King County to notify the city of development 1008 proposals in an impact area, which includes all lands within a one-1009 mile radius of the expansion area, and to consult with the city 1010 where applicable to condition development approvals to mitigate 1011 adverse impacts on city services. 1012 Agreement on which jurisdiction will have responsibility for parks, j. 1013 roads, storm water or other public facilities after annexation. 1014 (EN-40) 1015 1016 CP-405 Access to state park lands should be designed to minimize adverse 1017 traffic impacts on the Southeast Green Valley Road. (EN-56) 1018 **CP-406** 1019 Any expansion of aircraft runway or hangar capacity in the Enumclaw 1020 planning area should be concentrated on or near the existing 1021 Enumclaw airport. Existing legally approved landing strips associated 1022 with low-density residential developments, such as Evergreen Sky 1023 Ranch, shall not be expanded. (EN-60) 1024 1025 CP-407 Redevelopment of the Enumclaw landfill site should be subject to 1026 studies to assure public health and safety. If these studies determine 1027 that there is no threat to public health and safety the site's Rural Area 1028 designation may be changed to accommodate a public use such as a 1029 park or other facility without an amendment to the King County 1030 Comprehensive Plan. (EN-71) VI. Snoqualmie Valley((-/--))/Northeast 1031

## 1032 King County <u>((Area</u>))

1033 ((The Snoqualmie Valley/NE King County Community Service Area includes the
 1034 Snoqualmie Community Planning Area as well as portions of the East Sammamish,
 1035 Tahoma Raven Heights and East King County Community Planning Areas. It surrounds

((Community Service Area)) Subarea Planning - Page 11-25

the Cities of Snoqualmie, North Bend, Carnation, Duvall and Skykomish and their
 Potential Annexation Areas. These cities are within Urban Growth Boundaries while the
 wast majority of the CSA is Rural Area, Natural Resource Lands and unincorporated

1039 areas. Fall City is a Rural Town within this CSA.

1040

1041 In 2014, the estimated population in the Snoqualmie Valley/NE King County CSA was

- 1042 approximately 26,000. In 2010, there were 11,050 housing units in the CSA. East
- 1043 Sammamish policies are included in Section I. Bear Creek/Sammamish Area in this
- 1044 <del>chapter.</del>

#### 1045 Background

1046 The Snoqualmie Valley Community Plan was initiated in April 1984, and adopted in 1047 August 1989. The process resulted in designation of the Snoqualmie Ridge Urban 1048 Growth Area for the City of Snoqualmie. The area was annexed by the City of 1049 Snoqualmie, and development is proceeding under an interlocal agreement as directed 1050 by the community plan. The 1994 King County Comprehensive Plan largely reaffirmed 1051 the Rural Area and Natural Resource Lands land use map designations of the 1052 community plan. Additionally, in this area, the Fall City Town Plan was updated in 2012 1053 through a planning process that involved members of the Fall City community.

#### 1054 Snoqualmie Policies

1055	<del>CP-501</del>	King County, in cooperation with the Valley cities, and state and federal
1056		agencies, should conduct a study of baseline conditions and cumulative
1057		impacts of development on the Snoqualmie River's water quality, and
1058		identify methods of equitably controlling these impacts. (SQP-1
1059		through SQP-6)
1060		-
1061	<del>CP-502</del>	Wildlife populations in the Snoqualmie Valley planning area are
1062		recognized as a regionally important resource and an important
1063		characteristic of the area's rural character. Special studies should be
1064		undertaken, in cooperation with the Washington State Department of
1065		Wildlife, to identify wildlife populations at risk due to the land uses
1066		allowed by the King County Comprehensive Plan and to develop
1067		mitigation measures to protect the continued viability of the area's
1068		wildlife populations. Should these studies indicate unmitigatable
1069		impact affecting wildlife populations due to the land uses allowed by
1070		the plan, a comprehensive plan amendment study will be undertaken
1071		to provide for the continued existence of this valuable resource.
1072		<del>(SQP-17)</del>
1073		
1074	<del>CP-503</del>	Properties in erosion-prone drainage basins are subject to special
1075		development conditions applied to protect the safety and property of
1076		county residents through reducing or eliminating the occurrence of
1077		gully formation and sever erosion. These conditions may include:
1078		<ul> <li>A drainage control plan;</li> </ul>
1079		•b. Installation of drainage control features prior to any land
1080		clearing, vegetation removal, site grading, road construction, or
1081		utility installation; and
1082		<ul> <li>Runoff control requirements. (SQP-21)</li> </ul>
1083		
1084	<del>CP-504</del>	King County will oppose annexations to Snoqualmie Valley cities that
1085		currently contain designated floodplain lands until interlocal
		(( <del>Community Service Area</del> )) <u>Subarea</u> Planning - Page 11-26

1086		agreements have been enacted to advance the policies and standards
1087		<del>set forth in the comprehensive plan. (SQP-27)</del>
1088		
1089	<del>CP-505</del>	The Shoreline Environment designations of the King County Shoreline
1090		Management Program should be consistent with comprehensive plan
1091		land use map designations and zoning. King County should initiate the
1092		shoreline redesignation process consistent with K.C.C. 25.32.130.
1093		<del>(SQP-32)</del>
1094	65 F6/	
1095	<del>CP-506</del>	Until expansion areas are annexed, zoning for the expansion areas shall
1096 1097		be urban reserve at five acre densities with the exception of the
1097		<del>existing commercial/industrial area in the SE North Bend Way</del> <del>expansion area, and the existing industrial area in the Snoqualmie</del>
1078		expansion area, and the existing industrial area in the shoquainile expansion area. (SQP-57)
1100		
1100	Community	y plan policies SQP 58 to 61 referred to "expansion areas one and two,"
1101		the Snoqualmie Community Plan's attempt to phase growth of the valley
1102		se phasing approaches were embodied in the interlocal agreement the
1103		ned with the City of Snoqualmie; they may be reflected in the cities'
1104		nsive plans. The King County Comprehensive Plan simplifies the designations
1105		pansion area for each city.
1108	mo one ex	parsion area for each city.
1107	CD 507	King County will support development within the Snoqualmie Valley
1108	<del>CP-507</del>	cities of Duvall, Carnation, Snoqualmie and North Bend and annexation
1110		and development of lands within their expansion areas, when each city
1111		demonstrates that its wastewater and storm water treatment systems
1112		for the existing and proposed city jurisdiction will not degrade the
1113		water quality of the Snoqualmie River and its tributaries. (SQP-58)
1114		
1115	CP-508	King County will not support Snoqualmie Valley cities' annexations into
1116		expansion areas until each city has adopted mechanisms to reduce
1117		flood and channel migration hazards within its jurisdiction. (SQP-59)
1118		
1119	CP-509	King County shall initiate an amendment to the King County
1120		Comprehensive Plan if the cumulative impact of development of the
1121		cities' expansion areas will reduce the quality of the Snoqualmie River
1122		and its tributaries below the current "A and AA" standards. (SQP-61)
1123		
1124	<del>CP-510</del>	King County shall support annexation of the expansion area only when
1125		Carnation implements a long-term, nonstructural program to reduce
1126		flood damages on floodplains land within its jurisdiction. (SQP-68)
1127		
1128	<del>CP-511</del>	Achieving a long-term solution to flood damages within the City of
1129		Snoqualmie is one of King County's highest priorities for this planning
1130		<del>area. (SQP-70)</del>
1131	6D 546	
1132	<del>CP-512</del>	King County intends to assist the City of Snoqualmie to develop a
1133 1134		long-term solution and an implementation program which will reduce the risk from flooding and channel migration in the city. (SQP-73)
1134		the risk non-nooung and channer migration in the city. (301-73)
1135	<del>CP-513</del>	If the long-term solution to reducing the risk from flooding in the City
1130	-J -J 13	of Snoqualmie is determined to have basin-wide impacts, these impacts
1137		shall be reviewed by the King County River and Floodplain
1139		Management Program or its equivalent to identify any additional
1140		mitigations that may be required. If the long-term solution to reducing
-		

1141 the risk from flooding is demonstrated to not have basin-wide impacts, 1142 it should be implemented as soon as possible and would not require a 1143 second, basin-wide, review of impacts and mitigations. (SQP-74) 1144 1145 King County urges a public/private resource commitment to implement CP-514 1146 a long-term solution to flooding in the City of Snogualmie. (SQP-75) 1147 1148 Policies SQP 76 through 78 have been and continue to be implemented through an 1149 interlocal agreement. Most of the annexations referenced have taken place and are reflected in the expansion area boundaries for the City of Snoqualmie adopted in the 1150 King County Comprehensive Plan's Land Use Map. 1151 1152 1153 Until a long-term solution to preventing flood damages in the City of CP-515 1154 Snoqualmie is agreed to by King County and the City of Snoqualmie, 1155 King County will support annexations in expansion areas when 1156 consistent with all appropriate policies herein and when higher 1157 residential densities can be achieved, municipal services can be 1158 provided, and river water quality will not be degraded. (SQP-77) 1159 1160 Annexations of lands within the Phase 1 and Phase 2 additions to the CP-516 1161 City of Snoqualmie's Urban Growth Area shall not occur until 1162 completion of detailed planning, preparation and review of 1163 project-level Environmental Impact Statement(s), and a determination 1164 of required mitigations and amenities. The range of land uses to be 1165 allowed and the mitigations and amenities to be required shall be 1166 embodied in a binding Development Agreement between the City of 1167 Snoqualmie and the owners of proposed annexation lands. 1168 CP-517 1169 The project-level Environmental Impact Statement(s) for lands within 1170 the Phase 1 and Phase 2 additions to the City of Snoqualmie's Urban 1171 Growth Area shall address aguifer recharge issues, and potential 1172 impacts to the water quality and quantity of Lake Alice, private wells in 1173 the Lake Alice and Snoqualmie Hills neighborhoods, and all streams 1174 that flow off-site. 1175 1176 CP-518 Based on the findings of the Environmental Impact Statement(s), the 1177 Development Agreement between the City of Snoqualmie and the 1178 owners of proposed annexation lands in the Phase 1 and Phase 2 1179 additions to the City of Snoqualmie's Urban Growth Area shall establish 1180 a program for long-term monitoring of the water quality and quantity 1181 of Lake Alice and the private wells in the Lake Alice and Snoqualmie 1182 Hills neighborhoods, and of all streams flowing off-site. 1183 1184 CP-519 The Development Agreement shall also outline the remedies necessary 1185 if the monitoring program leads to findings that development activities 1186 on the annexation lands are the cause for adverse impacts to the water 1187 quality and/or quantity of Lake Alice and the private wells in the Lake 1188 Alice and Snoqualmie Hills neighborhoods, and of streams flowing 1189 off-site. The owners of the annexation lands shall be responsible for 1190 the monitoring program and correction of any impacts determined to have been caused by their development activities. Remedies may 1191 1192 include connection to the public water system, or construction of 1193 alternative wells. 1194

1195	<del>CP-520</del>	The project-level Environmental Impact Statement(s) for lands within
1196		the Phase 1 and Phase 2 additions to the City of Snoqualmie's Urban
1197		Growth Area shall address traffic safety issues, with a focus on safety
1198		concerns for rural homeowners dependent upon the southern stretch of
1199		<del>the Snoqualmie Parkway for access to their homes. A range of</del>
1200		alternatives to improve safety at the intersection of the Snoqualmie
1201		Parkway and SE 96th Street, including signalization, road widening and
1202		turn lanes shall be explored.
1203		
1204	CP-521	Annexations of lands within the Phase 1 and Phase 2 additions to the
1205		City of Snoqualmie's Urban Growth Area shall be subject to updated
1206		Comprehensive Water and Sanitary Sewer Plans to determine the full
1207		range of improvements landowners within the annexation will be
1208		required to provide.
1209		· · · · · · · · · · · · · · · · · · ·
1210	<del>CP-522</del>	A Drainage Master Plan shall be required for any new development of
1210		lands within the Phase 1 and Phase 2 additions to the City of
1212		Snoqualmie's Urban Growth Area. Stormwater facility design shall
1212		adhere to the standards in the most recent update of the King County
1213		Design Manual, or of the Snoqualmie Storm Drainage Plan, whichever
1214		is the most stringent.
1215		is the most stringent.
1216 1217	<del>CP-523</del>	There shall be no road connections between the Phase 1 addition to the
1217	CF-525	
-		City of Snoqualmie's Urban Growth Area and 356th SE in the
1219		Snoqualmie Hills Planning Area, unless future analysis determines a
1220		restricted emergency access is necessary for safety purposes.
1221		
1222	<del>CP-524</del>	There shall be no road connections between the Phase 2 addition to the
1223		City of Snoqualmie's Urban Growth Area and Lake Alice Road, unless
1224		future analysis determines a restricted emergency access for Lake Alice
1225		residents is necessary for safety purposes.
1226		
1227	<del>CP-525</del>	To protect the rural character of the neighborhoods surrounding the
1228		Phase 1 and Phase 2 additions to the City of Snoqualmie's Urban
1229		Growth Area, the Phase 1 and Phase 2 areas shall include buffers to all
1230		rural lands along their perimeter. The size and structure of each buffer
1231		area shall be determined based on the characteristics of the land and
1232		existing vegetation, and its ability to perform the following functions:
1233		visual screening; noise reduction; and minimization of blow down.
1234		Buffers may include constructed berms and new plantings if deemed
1235		necessary and appropriate to perform the required functions.
1236		
1237	<del>CP-526</del>	King County supports the continued industrial use of Weyerhaeuser's
1238		Snoqualmie Mill site and its annexation to the City of Snoqualmie.
1239		<del>(SQP-79)</del>
1240		
1241	<del>CP-527</del>	King County will support annexations of land in North Bend's
1242		expansion area when higher residential densities can be achieved,
1243		municipal services can be provided, and river water quality will not be
1244		degraded. (SQP-81)
1245		
1246	CP-528	Commercial and light industrial land uses are appropriate along SE
1240		North Bend Way subject to special development conditions to mitigate
1248		impacts. (SQP-82)
1240		·····p································
1 <b>2</b> f /		

A map is included in Appendix A to Ordinance 12824 (p-suffix conversion ordinance) 1250 1251 showing the application of p-suffix conditions to commercial and industrial properties 1252 on SE North Bend Way.

- 1254 CP-529 Commercial and industrial zoned land (including potential-commercial 1255 or potential-industrial zoned land) within the City of North Bend's 1256 Urban Growth Area (UGA) are planned for nonretail, resource-based 1257 and highway-oriented uses. These uses shall be served by public 1258 sewers.
- 1260 CP-530 The area between Tanner and the Edgewick Interchange, south of SE 1261 140th and north of I-90, is appropriate for nonretail commercial and 1262 light industrial land uses. Commercial and light industrial uses shall be 1263 limited to uses that do not impact ground water and are related to 1264 resource-based shipping, distributing and trucking-related industrial 1265 development. (SQP-84) 1266
- 1267 CP-531 Land uses adjacent to the Edgewick Interchange shall be limited to 1268 highway-oriented commercial uses that do not impact ground water, and serve the traveling public. (SQP-85) 1269 1270
- 1271 CP-532 The area north of the Edgewick Interchange is appropriate for 1272 resource-based, shipping, distributing and trucking related industrial 1273 uses that do not impact ground water. (SQP-86) 1274
- The Fall City policies in this section were revised through a subarea planning process 1275 involving members of the Fall City community in 1998 and 1999. Through this planning 1276 1277 process, the Citizens Advisory Committee identified the following elements that local 1278 residents value about their town:
- 1279 —It is surrounded by agricultural and forest lands that are entirely rural;
- 1280 It has a pattern of development that has evolved over more than a century, 1281 which includes historic buildings and landmarks, an open spacing of streets and 1282 buildings, and locally owned businesses in a small-scale downtown;
- 1283 It is located in a unique geographic area formed by the confluence of two 1284 important salmon-bearing rivers, the Raging River and the Snoqualmie River, in an agricultural valley containing a number of other salmonid streams that are 1285 1286 also important to the ecology of King County;
- 1287 <u>–It includes compatible home occupations and small-scale animal husbandry in</u> harmony with residential neighborhoods; 1288
- 1289 It provides rural-level street improvement (e.g., no traffic lights, no sidewalks) 1290 outside the business district, and no street lights except as needed for public 1291 safety);
- 1292 It offers scenic vistas, open space, and rural and resource uses surrounding Fall City; and 1293
- 1294 It has a small rural town identity. 1295

1253

- 1296 CP-533 Fall City is an unincorporated rural town which shall have overall 1297 residential densities of one to four dwelling units per acre.
- 1298 1299 CP-534 All property within the downtown Fall City business district is zoned 1300 Community Business (CB) and is included within a designated Special 1301 District Overlay (SDO). Development within the SDO is permitted 1302 using an on-site septic system approved by the Seattle-King County Health Department. Development is also permitted using either an 1303
  - ((Community Service Area)) Subarea Planning Page 11-30

1304		alternative wastewater disposal system approved by the Seattle-King
1305		County Health Department (such as a community drainfield) or a
1306		self-contained sewage conveyance and treatment system approved by
1307		the Department of Ecology, provided that:
1308		a. The selected system shall be designed and constructed to serve
1309		only properties located within the designated SDO;
1310		b. The business and commercial property owners in the SDO are
1310		
		responsible for the operation and maintenance of the selected system;
1312		c. The County's role should be to provide technical assistance in the
1313		development and implementation of the selected system;
1314		d. If the selected system fails, and to prevent a potential health
1315		hazard, requires connection to the King County regional wastewater
1316		system, any such sewer conveyance shall be tight-lined and shall under
1317		no circumstance be used to provide sewage disposal service to
1318		residential properties in Fall City, except as provided by policy R-508;
1319		and
1320		e. No costs to implement the selected system or to connect to the
1321		County's regional wastewater system shall be borne by properties
1322		outside the SDO. Funding from grants, loans and other outside sources
1323		may be used to help fund the system, and the County may assist in the
1324		pursuit of this additional funding.
1325		
1326	<del>CP-535</del>	The zoning for Fall City adopted in the 1999 Fall City Subarea Plan
1327		reflects the community's strong commitment to its rural character,
1328		recognizes existing uses, provides for limited future commercial
1329		development, and respects natural features. Additionally, it recognizes
1330		the current and long-term foreseeable rural level of utilities and other
1331		public services for the area. The land use implications of a major
1332		change in the water supply or a public health requirement for
1333		community-wide wastewater collection and treatment may be
1333		evaluated in a new community-based planning process; however this
1334		does not mean that zoning will change to allow more intense
1336		development beyond that adopted in the 1999 Fall City Subarea Plan.
1337		The rural character of Fall City should be preserved.
1338	6D 50/	
1339	<del>CP-536</del>	Within the residential area of Fall City, compatible home occupations
1340		and small-scale agricultural pursuits or similar rural land uses can
1341		<del>continue.</del>
1342		
1343	<del>CP-537</del>	King County should work with the State of Washington and the Fall City
1344		community to continue to make transportation improvements in Fall
1345		City that will favor safe and pleasant pedestrian and other
1346		nonmotorized links between downtown businesses, the residential
1347		<del>areas, and nearby King County Parks, and safe walkways to schools,</del>
1348		rather than rapid through traffic.
1349		

1350	CP-538	King County should expand the soft surface pedestrian, equestrian and
1351		bicycle trail opportunities serving the Fall City area. Trail route options
1352		serving the community shall be reviewed to include a route along the
1353		left bank levee easement directly adjacent to the Raging River,
		historically used by the multiple and predestries, sourcestries and historic
1354		historically used by the public as a pedestrian, equestrian and bicycle
1355		trail. This historically used trail generally follows the "wildlife corridor"
1356		along the bank of the Raging River from 328th Way SE approximately
1357		NE to the Preston Fall City Road. The selected trail system for the Fall
1358		City area shall be identified in the King County Parks and Recreation
1359		trail system plan.
1360		
	CD 530	Zaning for the existing industrial and office energy adapted in the 1000
1361	<del>CP-539</del>	Zoning for the existing industrial and office areas adopted in the 1999
1362		Fall City Subarea Plan should be maintained but not expanded.
1363		
1364	<del>CP-540</del>	Land uses at freeway interchanges without existing commercial or
1365		industrial development, and outside rural neighborhoods and Cities in
1366		the Rural Area, are designated rural residential to support development
1367		in rural neighborhoods and Cities in the Rural Area, and to preserve the
1368		scenic nature of the corridor. (SQP-98)
		scenic nature of the control. (SQF-96)
1369		
1370	<del>CP-541</del>	New development at the Exit 22 Interchange shall not expand beyond
1371		<del>the area designated in this plan and shall not adversely impact</del>
1372		surrounding rural residential areas. All uses should be planned and
1373		sited to use long-term onsite waste disposal systems. (SQP-99)
1374		······································
1375	<del>CP-542</del>	The existing two acres of land currently zoned for commercial use at
1376	CF-J42	Preston (Exit 22) is recognized, but no additional land for commercial
1377		<del>uses is designated. (SQP-100)</del>
1378		
1379	<del>CP-543</del>	The presence of the Snoqualmie Tribe in the planning area has
1380		important historic and cultural significance for the Puget Sound region.
1381		The following places, recognized by the tribe as historically, culturally
1382		and archeologically important, should be considered for inclusion in
1383		the King County historic sites survey, and designation to local and/or
1384		national register of historic places. The tribe recognizes the following
1385		
		areas as culturally significant:
1386		<del>a. Snoqualmie Falls;</del>
1387		b. The banks of the Snoqualmie River between the falls and the three
1388		forks confluence area;
1389		<del>c. Fall City Indian Cemetery;</del>
1390		d. Banks at the confluence of Snoqualmie and Raging Rivers;
1391		e. Banks at the confluence of Snoqualmie and Tolt Rivers;
1392		f. Fall City Park (site of John Sanawa's Council House and the first
1392		white school);
1394		<del>g. Mt. Si; and</del>
1395		h. Granite outcropping used as a quarry between North Bend and the
1396		City of Snoqualmie on SR-202. (SQP-122)
1397		
1398	<del>CP-544</del>	King County recognizes the spiritual, historic, cultural and recreational
1399		value of the Snoqualmie Falls. Any development adjacent to
1400		Snoqualmie Falls shall be designed and sited to protect these values.
1401		<del>(SQP-123)</del>

1473		will reduce the risk from flooding and channel migration in the city.))

## 1474 <u>A. Plan History</u>

1475 The history of prior plans for Snoqualmie Valley/Northeast King County is as follows:

- 1476 1477 Snoqualmie Valley Community Plan (1989). The Snoqualmie Valley Community • 1478 Plan, initiated in April 1984 and adopted in August 1989, was developed with the 1479 assistance of an advisory committee composed of local residents and property 1480 owners, in addition to representatives of the cities of Duvall, Carnation, Snoqualmie, and North Bend.² The Snoqualmie Valley planning area covered 400 square miles 1481 (south of Snohomish County, east of Bear Creek and East Sammamish areas, north 1482 of Tiger Mountain and Rattlesnake Ridge, and west of the Cascade Mountains). The 1483 plan was rescinded almost a decade later, in 1998, due to the passage of the 1484 1485 Washington State Growth Management Act in the early 1990s.³ At that time, some 1486 key policies from the 1989 plan that were consistent with the Growth Management Act were incorporated into the King County Comprehensive Plan. These policies 1487 1488 remained in this chapter of the Comprehensive Plan through 2024 but, with the adoption of the Snogualmie Valley/Northeast King County Subarea Plan, they have 1489 1490 since been removed from the chapter. 1491
- Fall City Subarea Plan (1999). From August of 1998 through March of 1999, an eleven-member advisory committee of community members helped develop recommendations for the Fall City Subarea Plan, which was adopted by the County in 1999.⁴ The Fall City Subarea Plan revisited land use designations, town boundaries, and Comprehensive Plan policies regarding Fall City that grew out of the 1989 Snoqualmie Valley Community Plan, which included Fall City.
- Amendments to the Fall City Subarea Plan (2012). The 1999 Fall City Subarea
   Plan was updated in 2012⁵ through a planning process that involved members of
   the Fall City community. The Fall City Subarea Plan was repealed in 2024 and
   replaced by the Snoqualmie Valley/Northeast King County Subarea Plan, which
   includes the Fall City community.
  - ² Ordinance 9118
  - ³ Ordinance 13273
  - ⁴ Ordinance 13875

⁵ Ordinance 17485

1504

In December 2024, the County adopted the Snoqualmie Valley/Northeast King County 1505 Subarea Plan, which replaces the policies in the 1999 Fall City Subarea Plan. The 2024

1506

1507 subarea plan (bound as a separate document) is adopted as an element of the King 1508 County Comprehensive Plan.

#### **B.** Vision & Guiding Principles 1509

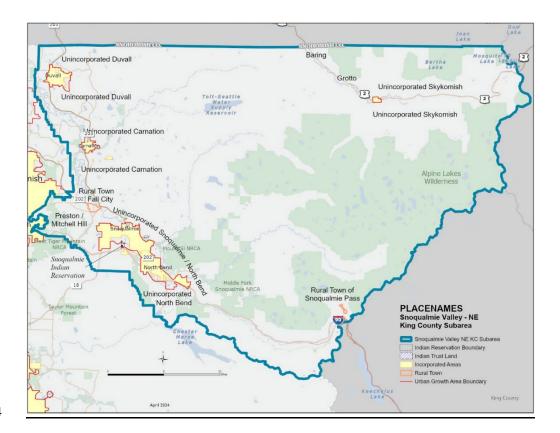

1510 Community Vision Statement

1511 Snoqualmie Valley/Northeast King County are characterized by strong rural communities with distinct cultures and histories, where people and businesses are 1512 thriving, the natural environment and agricultural lands are conserved and protected, 1513 farms are preserved, the community is resilient to climate change, and services and 1514 1515 programs are accessible to residents in a way that preserves each community's unique 1516 rural character.

**Guiding Principles** 1517

1518	The following guiding principles support the community vision and were used by the
1519	County to inform and direct the development of the Subarea Plan. These guiding
1520	principles express the community's sentiments around a range of community issues
1521	discussed during the planning process.
1522	a. Conserve and protect forests, rivers, lakes, and open spaces.
1523	b. Conserve and protect the subarea's working farmlands by protecting
1524	agricultural lands and supporting local farmers, farmworkers ranchers, and
1525	growers.
1526	c. Encourage and protect a range of housing choices for all.
1527	d. Promote economically and environmentally sustainable local businesses
1528	and organizations across the subarea and support the business districts of
1529	the Fall City and Snoqualmie Pass Rural Towns.
1530	e. Preserve cultural and historic resources and landmarks.
1531	<ol> <li>Enhance the relationship between King County and the Tribes by centering</li> </ol>
1532	Tribal needs, land stewardship, and treaty rights.
1533	g. Preserve the unique rural character across the subarea in commercial areas
1534	and residential communities in a manner that increases quality of life for
1535	<u>residents</u>
1536	h. Support transit and transportation options, including active transportation
1537	and recreation, consistent with rural levels of service.
1538	i. Support programs, organizations, and services for youths, people aged 62
1539	years and older, veterans, and others to build community connections.
1540	j. Promote communities that are resilient to natural hazards and climate
1541	change, and support communities affected by related disasters.
1542	
1543	

((2016)) 2024 King County Comprehensive Plan - ((updated December 6, 2022)) Adopted TBD Attachment A to Ordinance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555)) xxxxx (Proposed Ordinance 2023-0440)

1544

1551

## ¹⁵⁴⁵ VI<u>I</u>. Vashon-Maury Island ((Community Service Area))

### 1547 <u>A. Plan History</u>

In 2016, the Vashon-Maury Island Community Service Area Subarea Plan was initiated as
King County's first plan developed under its reconfigured subarea planning program.
The recent history of prior Vashon-Maury Island community plans is as follows:

**1986 Vashon Community Plan.** This Island-wide plan was adopted in 1986,⁶ but 1552 1553 was then rescinded over a decade later, in 1998,⁷ due to the passage of the 1554 Washington State Growth Management Act in the early 1990s. At that time, some key policies from the 1986 plan that were consistent with the Growth Management 1555 Act were incorporated into the King County Comprehensive Plan. These policies 1556 remained in this chapter of the Comprehensive Plan through 2016 but, with the 1557 1558 adoption of the 2017 Vashon-Maury Island Community Service Area Subarea Plan, 1559 they have since been removed from the chapter. 1560

⁶ Ordinance 7837

⁷ Ordinance 13273

- 1996 Vashon Town Plan.⁸ This plan focused on a smaller geography, the Rural Town, and was developed consistent with the Growth Management Act. The 1996 Town Plan remained active through 2017 but, with the adoption of the 2017 subarea plan, it has since been repealed.
- 1565

1584

The Island-wide 2017 Vashon-Maury Island Community Service Area Subarea Plan updates these prior policies and consolidates them into a single document that aims to retain community priorities while eliminating outdated and/or accomplished items. Policies and actions that are carried forward are re-assessed and re-prioritized for implementation. The 2017 subarea plan (bound as a separate document) is adopted as an element of the King County Comprehensive Plan.

## 1572 <u>B.</u> Vision & Guiding Principles

1573 Vashon-Maury Island Vision

The Vashon-Maury Island Community Service Area Subarea Plan envisions a healthy,
rural environment and reflects the following values identified by the community during
plan development:

- 1577 Independence and self-sufficiency
  1578 Natural environment
- 1579 Equity and diversity
- 1580 Island history
- Creativity and self-expression
- Sustainable local employment
- Community collaboration

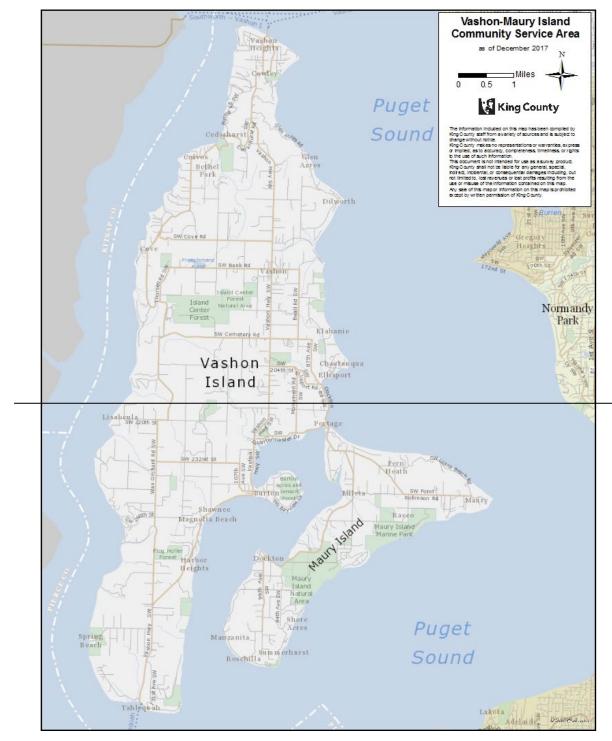

1585 These values are exhibited and sustained through ten guiding principles:

- 1586 Maintain the rural character of Vashon-Maury Island
- Encourage and protect the diversity of neighborhoods and affordable housing choices for all
- Guide limited growth on Vashon-Maury Island and ensure development does not over-extend basic services, public safety, and infrastructure
- Plan the Rural Town of Vashon as the mixed-use and vibrant center of the community
- Preserve and protect native habitats, groundwater, shorelines, open space and sensitive areas for present and future generations
- Protect agricultural lands and support Island farmers and growers
- Provide a balanced and integrated multimodal transportation system that reflects environmental, economic, and social considerations
- 1598 Preserve historic, archeological, and cultural resources

⁸ Ordinance 12395

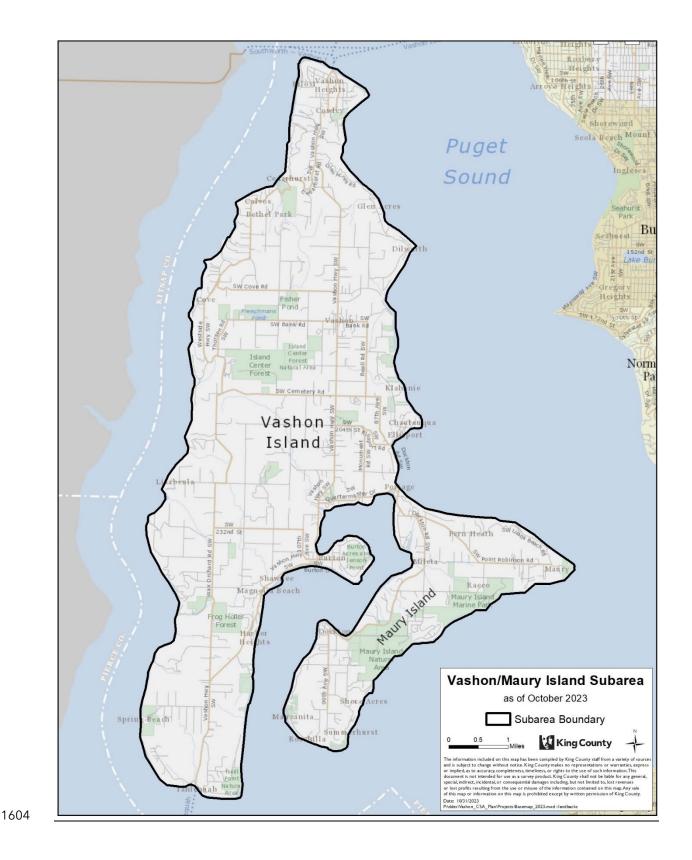

((2016)) 2024 King County Comprehensive Plan - ((updated December 6, 2022)) Adopted TBD Attachment A to Ordinance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555)) xxxxx (Proposed Ordinance 2023-0440)

- Promote an environment where all people can be physically active, eat nutritious food, and live in safe and healthy places
- 1599 1600
- 1601
- 1602 1603
- Support and foster a diverse, dynamic, and sustainable rural economy

((Community Service Area)) Subarea Planning - Page 11-38

((2016)) 2024 King County Comprehensive Plan - ((updated December 6, 2022)) Adopted TBD Attachment A to Ordinance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555)) xxxxx (Proposed Ordinance 2023-0440)

## ¹⁶⁰⁵ VII<u>I</u>. West King County Area

### 1606 <u>A. Background</u>

As noted on the Community Service Areas map at the beginning of this chapter, the West King County Area is comprised of approximately five separate major unincorporated areas within the Urban Growth <u>Area</u> ((<del>B</del>))boundary; these are all Potential Annexation Areas for several cities, including Federal Way, Seattle, and Renton. In addition, there are over *one hundred* other smaller areas that are affiliated with or adjacent to Kent, Auburn, Issaquah, Sammamish, Redmond, Kenmore, and others.

1614

1615 King County's approach is that all of these areas annex into the affiliated cities or, for 1616 those areas not affiliated, the most logical adjacent city. As subarea planning occurs, 1617 adjacent cities will be encouraged to participate. Policies guiding these areas are found 1618 both in Chapter 2((+)), Urban Communities (in the Potential Annexation Area section), as 1619 well as in other annexation policies found in chapters throughout the Comprehensive 1620 Plan. For the areas at the edge of the  $((\underline{u}))\underline{U}$ rban  $((\underline{v}))\underline{G}$ rowth  $((\underline{boundary}))\underline{Areas}$ , policies 1621 in other parts of this chapter may be relevant since the historical Community Plans often included these edge communities. This is further described below. 1622

### 1623 ((Background))

1624 The estimated population in this CSA in 2014 was approximately 113,000. The West 1625 King County CSA consists of separate unincorporated areas that were once part of 1626 larger areas with their own community plans. Today's fragmented pattern of 1627 unincorporated urban areas is the result of incorporations and piecemeal annexations 1628 since the community planning process began in the mid-1980s.

## 1629 ((A.)) <u>IX.</u> East Federal Way Potential 1630 Annexation Area

1631 Work on the Federal Way Community Plan and/or amendments occurred from 1972 to 1632 1975, 1977 to 1980, and 1984 to 1986. Federal Way was part of the first generation of 1633 community plans in the county that were adopted separately from their implementing 1634 area zoning. After these experiences, the county decided to adopt both together to 1635 avoid going through essentially the same decisions twice for each community. The City 1636 of Federal Way incorporated in 1990, removing most of the planning area from the 1637 county's jurisdiction. None of the Federal Way Community Plan or its amendments are 1638 readopted.

## ((B.)) X. Fairwood and East Renton Potential Annexation Areas

Fairwood and East Renton are adjacent to the City of Renton and are within the city's potential annexation area. Over the past decade, small portions (typically at the subdivision scale) have annexed to the city in a piecemeal fashion. The Fairwood area has approximately 23,000 residents. The Fairwood area was completely within the

((Community Service Area)) Subarea Planning - Page 11-40

historical Soos Creek Planning Area, which is now part of both the Greater Maple
Valley/Cedar River and the West King County Community Service Areas. This means
that the general annexation policies in the comprehensive plan, as well as the Greater
Maple Valley/Cedar River area policies are relevant to this area.

1649

1650 The East Renton area has approximately 6,500 residents. The East Renton area was 1651 completely part of the historical Newcastle Planning Area, which is now part of both the 1652 Four Creeks/Tiger Mountain and West King County Community Service areas. This 1653 means that the general annexation policies in the comprehensive plan, as well as the 1654 Four Creeks/Tiger Mountain area policies are relevant to this area.

## 1655 ((<del>C.</del>)) <u>XI.</u> North Highline Potential Annexation Area((<del>s</del>))

#### 1657 <u>A. Plan History</u>

1658 The history of prior plans for the North Highline subarea is as follows:

- 1659 1976 SeaTac Communities Plan. The adoption of the SeaTac Communities Plan pre-dated adoption of the Growth Management Act.
- 1977 Highline Community Plan and 1981 Area Zoning. In 1977, King County adopted the Highline Community Plan,⁹ which covered a large area of then-unincorporated King County that today includes the Cities of Burien, Des Moines, Normandy Park, and SeaTac in addition to the currently unincorporated North Highline neighborhoods of White Center and Glendale. The plan was supplemented in 1981 by an Area Zoning Plan,¹⁰ which implemented zoning consistent with the land use policies of the Highline Community Plan.
- 1668 1994 White Center Community Action Plan and Area Zoning. In 1994, King 1669 County augmented the Highline Community Plan with the adoption of the White 1670 Center Community Action Plan and Area Zoning (Action Plan),¹¹ a community planning document that implemented new zoning for White Center, in addition to 1671 establishing goals in the areas of health and human services, economic and 1672 1673 community development, and environmental protection. The Action Plan was 1674 designed as a six- to ten-year plan for the area and incorporated as part of the 1994 King County Comprehensive Plan.¹² 1675 1676
- 1677 In December 2022, the County adopted the North Highline Community Service Area
  1678 Subarea Plan, which replaces the policies in the 1994 White Center Community Action
  1679 Plan. The 2022 subarea plan (bound as a separate document) is adopted as an element
  1680 of the King County Comprehensive Plan.

⁹ Ordinance 3530

¹⁰ Ordinance 5453

¹¹ Ordinance 11568

¹² Ordinance 13273 removed references to community plans, including the Highline Community Plan, which in effect repealed the Community Plan; however, the Action Plan remained active.

## 1681 <u>B.</u> Vision and Guiding Principles

#### 1682 North Highline Vision

1683 Residing on the traditional land of the Duwamish people, North Highline celebrates its ethnic diversity, intergenerational roots, and our ongoing inclusivity of diverse families 1684 1685 and individuals, especially those most isolated and vulnerable. We call out race and place-based inequities and are committed to dismantling systems of power, privilege, 1686 and racial injustice. With mutual support and respect, we value and live out our 1687 1688 brilliance and power through community-led initiatives, creating thoughtful 1689 development without displacing longtime residents and small business owners, forming and owning the policies that impact us, and building our individual and collective 1690 1691 wealth, health, and ((well-being)) wellbeing.

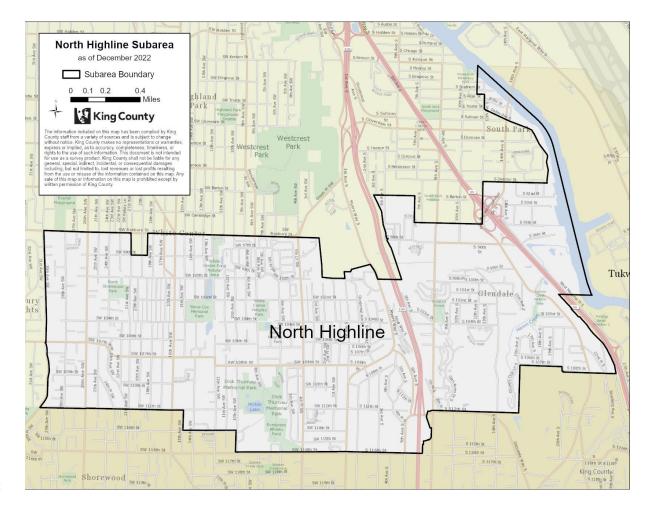

1692

#### 1693 Guiding Principles

1694 The following guiding principles support the community vision and were used by the 1695 County to inform and direct the development of the Subarea Plan. The guiding 1696 principles were developed based on several years of dialogue and work with the 1697 community on the Subarea Plan, drawing from other community-led or focused efforts 1698 in North Highline. They express the community's sentiments around a range of 1699 community issues discussed during the planning process.

- a. We are proud of our community and continue to share our collective history with
  others and to invest in this place, our home for current residents and their future
  generations.
- b. We support community investments and programs that reduce the risks andmitigate the impacts, of residential, economic, and cultural displacement.
- 1705 c. We live in thoughtfully designed housing and commercial spaces where inter1706 generational households and legacy businesses can stay and where affordability
  1707 and ownership are realized.
- d. We support a thriving and equitable economy, with racially and ethnically diverse,community-minded small business owners, entrepreneurs, and employers.
- e. We support residents, especially children, youths, and young adults, with servicesand resources they and their families need to succeed.
- 1712 f. We promote the development of community-desired amenities to improve aesthetics, enrich the community's diverse physical and cultural assets, and support gathering together as a community.
- g. We support regulations and investments that result in a safe, secure, and healthycommunity and compatible development.
- 1717 h. We support residents growing their work interests, skills, and wages.
- i. We enjoy neighborhoods with accessible and safe streets, roads, and alleyways,with well-connected hiking and biking trails.
- i. We can access jobs and amenities in the region and in our community withoutrelying on automobiles.

((2016)) 2024 King County Comprehensive Plan - ((updated December 6, 2022)) Adopted TBD Attachment A to Ordinance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555)) xxxxx (Proposed Ordinance 2023-0440)

1722

## 1723 ((<del>D.</del>)) <u>XII.</u> Skyway-West Hill Potential 1724 Annexation Area

- 1725 <u>A. Plan History</u>
- 1726 The history of prior plans for the subarea is as follows:
- 1727 1994 West Hill Community Plan. The West Hill Community Plan was adopted by 1728 King County in 1993. While prepared in conformance with the Growth 1729 Management Act it predated the adoption of the 1994 King County Comprehensive 1730 Plan.
- Community-led Skyway-West Hill Action Plan. In 2014 and 2015, the County 1731 1732 provided technical assistance to a community-led effort to update some elements of the Community Plan. This community-led effort resulted in the development of the 1733 1734 Skyway-West Hill Action Plan, or SWAP. The SWAP was proposed as an addendum 1735 to the existing Community Plan as part of the 2016 Comprehensive Plan update, but 1736 the County ultimately did not adopt the SWAP. Instead, the County, reinitiated its 1737 Subarea Planning Program, and committed to work with the community to 1738 complete a ((Community Service Area)) Subarea Plan.

((Community Service Area)) Subarea Planning - Page 11-43

Skyway-West Hill Land Use Strategy, Phase 1 of the Skyway West Hill Subarea
 Plan. As part of the 2020 Comprehensive Plan update, the County adopted a Land
 Use Strategy, Phase 1 of the Skyway-West Hill Subarea Plan, that outlined the
 potential policy and implementation steps for land use development in Skyway West Hill. The Land Use Strategy called for the County to continue working with the
 community to develop the Skyway-West Hill Community Service Area Subarea Plan.

1745

In December 2022, the County adopted the Skyway-West Hill Community Service Area
Subarea Plan, which replaces the West Hill Community Plan and the Land Use Strategy.
The 2022 subarea plan (bound as a separate document) is adopted as an element of the
King County Comprehensive Plan.

## 1750 <u>B.</u> Vision & Guiding Principles

1751 Skyway-West Hill Vision

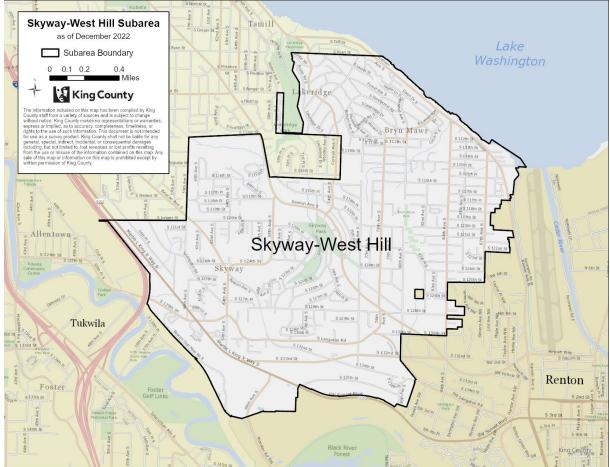

Skyway-West Hill will grow into a vibrant, walkable neighborhood where housing is
affordable and local, community-based businesses are thriving. Skyway-West Hill will be
an ethnically diverse and civically engaged community where the collective voice,
wisdom, and expertise of its residents and business owners are vital in ongoing civic
decision-making.

1758 Guiding Principles

The following guiding principles support the community vision and were used by the County to inform and direct the development of the Subarea Plan. The guiding principles were developed based on several years of dialogue and work with the community on the Subarea Plan, drawing from prior community planning efforts, such as the Skyway-West Hill Action Plan, and other community conversations. They express the community's sentiments around a range of community issues discussed during the planning process.

- a. Support community health by providing opportunities to access fresh foods, as wellas routes and trails for walking and bicycling.
- 1768 b. Create healthy connected neighborhoods where residents have safe and adequate
  1769 means to connect with their neighbors, schools, community services and programs,
  1770 and local businesses.
- 1771 c. Encourage equitable development by promoting access to a variety of housing
  1772 choices, incentivizing the creation of public amenities, addressing displacement,
  1773 encouraging economic opportunity, and cultivating neighborhood character.
- 1774 d. Create sustainable, vibrant, and walkable business districts that provide1775 opportunities for local businesses to succeed and jobs for area residents.
- Protect existing and create new affordable housing that focuses on preventing
  displacement and providing options and opportunities for Skyway-West Hill
  residents to remain in their community.
- 1779 f. Ensure the community grows in a well-planned and sustainable way and that it has
  1780 the resources necessary for all its residents to thrive and enjoy a high quality of life.
- 1781 g. Ensure Skyway-West Hill's youth are thriving and engaged in local decision-making
  1782 so they can advocate for and receive the services and resources they and their
  1783 families need to succeed.

- h. Promote the development of community-desired amenities and enrich thecommunity's diverse physical and cultural assets.
- 1786 i. Inform all policies, regulations, and County actions affecting Skyway-West Hill with1787 the principles of equity and social justice.
- 1788 j. Protect and enhance the existing character of the community's residential
  1789 neighborhoods and enhance connections between these areas and business
  1790 districts.

# CHAPTER 12

## IMPLEMENTATION,

# AMENDMENTS, &

## **EVALUATION**

((2016)) 2024 King County Comprehensive Plan - ((updated December 6, 2022)) Adopted TBD Attachment A to Ordinance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555)) xxxxx (Proposed Ordinance 2023-0440)

1

2 3

> The Comprehensive Plan policies, development regulations and countywide policy framework have been adopted to achieve the County and region's growth management objectives. This chapter describes the tools, processes and procedures used to implement, review and amend the Comprehensive Plan.

4

The chapter explains the relationship between planning and zoning, lists the incentives programs, identifies actions that will be undertaken between eight-year updates to implement or refine provisions within the Comprehensive Plan, and outlines and distinguishes between annual updates, midpoint updates, and eight -year updates. ((2016)) 2024 King County Comprehensive Plan - ((updated December 6, 2022)) Adopted TBD Attachment A to Ordinance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555)) xxxxx (Proposed Ordinance 2023-0440)

## 6 I. Regulations

The Comprehensive Plan guides land use over the long term by applying specific land
 use designations throughout the unincorporated portion of King County and by
 providing guidelines for implementing regulations used to evaluate specific
 development proposals. To ensure that these implementing regulations are effective
 and warrant a high degree of public trust and confidence, the regulations must be
 equitable, reasonable, and responsibly administered.

13

21

Siting public and private uses in communities can at times lead to concerns and objections from neighbors resulting from the real or perceived impacts of proposed uses. These is also a risk that objections to these "locally unwanted land uses" (LULUs) can lead to some uses becoming overly-concentrated in some communities, particularly in historically disadvantaged areas. In response, governments should evaluate the potential equity and social justice implications, including the beneficial and/or adverse impacts, of policies and regulations involving such uses.

22 King County wishes to create an equitable relationship with all its residents who own or 23 control potential development or redevelopment of property with critical or significant 24 resource areas. King County provides options that offer property-specific technical 25 assistance and tailored applications of critical areas regulations through Rural Stewardship, Forest Stewardship, and Farm Management Plans. By participating in 26 27 these programs, property owners may qualify for state tax programs that will reduce the 28 assessed value of their property. However, it is the property owner's choice to 29 participate in these programs.

39 40 I-102 King County property owners are entitled to have their property assessed at the true and fair value of real property for taxation purposes so that those portions of the property that are not developed or redeveloped due to physical or environmental constraints shall be assessed to reflect the presence of such constraints. Property appraisals shall be consistent with the King County Comprehensive Plan, development regulations, zoning, and any other governmental policies or practices in effect at the time of appraisal that affect the use of property, as well as physical and environmental influences as required by RCW 84.40.030.))

41 ((<del>11.</del>))<u>I.</u> Comprehensive Plan 42 Amendments

43 ((In the process of implementing the Comprehensive Plan, there may be a need for 44 amendments to address emerging land use and regulatory issues. The County has established the Comprehensive Plan update process to enable individual residents, 45 46 businesses, community groups, cities, county departments and others to propose 47 changes to existing Comprehensive Plan policies and development regulations. This 48 process provides for continuous and systematic review of Comprehensive Plan policies 49 and development regulations in response to changing conditions and circumstances 50 that could affect growth and development throughout King County.))

51

52 The Comprehensive Plan update process includes ((the annual update, the midpoint update, and the eight-year update)) annual, midpoint, and 10-year updates. The annual update generally is limited to those amendments that propose technical changes and adoption of ((CSA)) subarea plans. The ((eight)) <u>10</u>-year update is designed to address amendments that propose substantive changes. The midpoint update is an optional

57 process that allows for consideration of a smaller range of substantive changes, ((but 58 only)) if initiated by motion. This update schedule provides the measure of certainty 59 and predictability necessary to allow for new land use initiatives to work. By allowing 60 annual and midpoint updates, the process provides sufficient flexibility to account for 61 technical adjustments or changed circumstances. The process requires early and 62 continuous public involvement and necessitates meaningful public ((dialogue)) 63 engagement.

65 King County has established a docket process to facilitate public involvement and 66 participation in the Comprehensive Plan update process in accordance with Revised 67 Code of Washington 36.70A.470. Parties interested in proposing changes to ((existing)) 68 Comprehensive Plan policies, development regulations, land use designations, zoning, 69 or other components of the Comprehensive Plan can ((obtain and complete)) submit a 70 docket ((form)) request outlining the proposed amendment. ((Docket forms are 71 available via the King County website. 72

64

73

74

75

97

100

101

113

- The update process shall provide continuing review and evaluation of I-201 **Comprehensive Plan policies and development regulations.**
- 76 Through the update process, ((King County)) Comprehensive Plan <del>l-202</del>)) <u>l-101</u> 77 policies and ((supporting)) implementing development regulations 78 shall be subject to continuing review, evaluation, and amendment 79 according to the annual, midpoint, and ((eight)) 10-year update 80 schedule in accordance with Revised Code of Washington 36.70A.130 81 (((1) and (2))) and the King County Code. 82
- 83 <u>l-102</u> Except as provided in I-103, ((P))proposed amendments to the King 84 County Comprehensive Plan, including the Land Use Map, shall be 85 considered by the King County Council only once each calendar year in 86 accordance with the State Growth Management Act and so that the 87 cumulative effect of the proposals can be determined.
- 88 89 I-103 After appropriate public participation, amendments may be considered 90 more than once each calendar year as follows: 91 a. For initial adoption of a subarea plan; 92
  - b. Adoption or amendment of a shoreline master program;
- 93 c. Amendment of the capital facilities element of a comprehensive 94 plan that is part of the adoption or amendment of the County 95 budget; 96 To resolve an appeal of a comprehensive plan filed with the d. Growth Management Hearings Board or with the court; or 98 e. If, after public notice is provided and the amendment follows the 99
  - emergency ordinance provisions of Section 230.30 of the King County Charter.
- 102 ((<del>I-203</del>)) I-104 Except as otherwise provided in this policy, the annual update shall 103 not consider proposed amendments to the ((King County)) Comprehensive Plan that require substantive changes to 104 105 Comprehensive Plan policies ((and development regulations)) or that 106 alter the Urban Growth Area ((<del>B</del>))boundary. Substantive amendments 107 may be considered in the annual update only to consider the following: 108 a. Changes required by existing Comprehensive Plan policies; 109 b. Changes to technical appendices and any amendments required 110 thereby; 111 c. Adoption of subarea plans; 112
  - d. Comprehensive updates of subarea plans initiated by motion:
  - e. Changes required by amendments to the Countywide Planning Policies or state or federal law;

f. Amendments resulting from the comprehensive plan 115 116 implementation progress report required by Revised Code of 117 Washington 36.70A.130; g. Land Use Map or shoreline master program map amendments 118 119 resulting from a site-specific application or an area zoning and land 120 use zoning study, provided that the amendments do not require 121 substantive change to policy language or alter the Urban Growth 122 Area boundary, except to correct mapping errors; 123 Amendments to add or remove lands from the Agricultural h. 124 Production District under policy R-761 and/or R-762 for King 125 County safety, preservation, and/or fish passage road projects that 126 are in the adopted six-year Capital Improvement Program; i. ((A)) Four-to-One proposals ((that changes the Urban Growth Area 127 128 Boundary)); 129 ((b. An amendment regarding the provision of wastewater services to a 130 Rural Town. Such amendments shall be limited to policy 131 amendments and adjustments to the boundaries of the Rural Town 132 as needed to implement a preferred option identified in a Rural 133 Town wastewater treatment study; Amendments necessary for the conservation, protection, and 134 <del>c.</del>)) <u>i.</u> 135 recovery of threatened and endangered species; 136 ((d. Adoption of Community Service Area subarea plans; 137 e.)) k. Amendments to the Comprehensive Plan ((w))Work ((p))Plan to 138 change deadlines((; or 139 I. Amendments related to the next long-term solid waste disposal 140 option; or 141 m. Amendments to update critical area policies. 142 ((f. Amendments to update the Comprehensive Plan schedule to 143 respond to adopted ordinances to improve alignment with the 144 Growth Management Act, multicounty and countywide planning 145 activities.)) 146 147 ((1-204)) 1-105 The ((eight)) 10-year update shall make changes required as part of 148 the Growth Management Act statutory update, consider proposed 149 amendments that could be considered in the annual update ((and also 150 those outside the scope of the annual update)), proposed amendments 151 relating to substantive changes to Comprehensive Plan policies ((and 152 development regulations,)) and proposals to alter the Urban Growth 153 Area ((B))boundary in accordance with applicable provisions of 154 **Countywide Planning Policies.** 155 156 ((1-204a)) 1-106 The midpoint update is an optional process that allows for 157 consideration of a smaller range of substantive policy changes and 158 amendments to the Urban Growth Area boundary at the ((four)) five-159 year point of the ((eight)) 10-year update schedule. Midpoint updates 160 are only authorized by a motion that establishes the scope of work. ((A 161 smaller-range of substantive changes to policies and amendments to 162 the Urban Growth Area boundary may be considered as part of the 163 midpoint update.)) Work_((p))Plan action items may be added or 164 amended if related to a topic identified in the scope of work. 165

166 ((I-205)) I-107 ((In accordance with RCW 36.70A.140 and the State Environmental 167 Policy Act, as applicable,)) King County shall use equitable engagement 168 strategies to ensure public participation in the update process for 169 Comprehensive Plan policies and development regulations, particularly 170 from populations historically underrepresented or excluded from 171 planning processes. King County shall disseminate information regarding public involvement in the Comprehensive Plan update 172 173 process, including, but not limited to, the following: description of 174 procedures and schedules for proposing amendments to 175 Comprehensive Plan policies and development regulations; guidelines 176 for participating in the docket process; public meetings to obtain 177 comments from the public or other agencies; provision of public review 178 documents; and dissemination of information relating to the 179 Comprehensive Plan update process on the Internet or through other 180 methods. 181

229 230

- 3. If the change is programmatic or a capital project, whether it needs additional resources to implement the proposed change; and
- <u>4. If the change is programmatic or a capital project, the anticipated timing for implementation.</u>
- ((1-208)) 1-109 Proposed amendments to the Comprehensive Plan policies
   ((should)) shall be accompanied by any changes to development
   regulations, ((as well as modifications to capital improvement
   programs, subarea, neighborhood, and functional plans required for
   implementation so that regulations will be consistent with the
   Comprehensive Plan)) when necessary to implement the policy change.
- 239I-110Adopted Comprehensive Plan policy changes shall be integrated into240future regularly scheduled updates to the Capital Improvement241Program, subarea plans, and functional plans, when necessary to242implement the change.
- 243 ((<del>111.</del>)) <u>II.</u> Review and Evaluation

King County uses performance measurement to evaluate Comprehensive Plan
 implementation to ensure Growth Management Act and County goals are being met,
 improve transparency and accountability with the public, increase use of data to support
 decision-making, and identify where improvements can be made.

248 249 Long-term indicators provide insight into whether the goals of the Comprehensive Plan 250 are being achieved or if revisions are needed. The framework is structured around how 251 well the County is meeting the aspirations of the Guiding Principles policies in the Plan, 252 as consistent with the planning goals of the Growth Management Act. The performance 253 measures are primarily analyzed at a countywide scale, with additional geographic 254 detail for relevant Growth Management Act geographies (incorporated cities, 255 unincorporated urban area, the Rural Area, and Natural Resource Lands), as appropriate 256 and feasible given the dataset used. Wherever possible, disparate impacts are also 257 analyzed. Many of the Comprehensive Plan performance measures overlap with the 258 Determinants of Equity indicators used for internal equity performance monitoring. 259 Performance measure reports are issued in advance of 10-year Comprehensive Plan 260 updates to inform the scope of work for the update. 261

Revised Code of Washington 36.70A.130 also requires King County to provide the state
 a report detailing the progress achieved in implementing the Comprehensive Plan
 ("implementation progress report") five years after adoption of a 10-year update. The
 report must include information about:

- Implementation of previously adopted changes to the housing element of the Plan, and any effect those changes have had on housing affordability and availability within the jurisdiction;
- 269 <u>Permit processing timelines;</u>
- Progress toward implementing any actions required to achieve reductions to meet greenhouse gas and vehicle miles traveled requirements in the Growth Management Act; and
- Identification of any outstanding actions needed to implement the previous 10-year
   update, such as specifically identified regulations, zoning, and/or land use changes
   or other legislative or administrative actions. In such cases, the County must adopt
   a work plan to take any necessary implementing actions identified in the report and

- 277 <u>complete all work necessary for implementation within two years of submission of</u>
   278 <u>the report.</u>
- 279

280 Additionally, ((†))in accordance with the Growth Management Act, King County and ((its)) 281 cities ((will)) work together to employ an established review and evaluation program, as 282 provided by the King County Countywide Planning Policies. The purpose of the 283 program ((will be)) is to determine whether the (( $\frac{1}{2}$ ))County and (( $\frac{1}{1}$ )) cities (1) have 284 sufficient capacity for targeted growth and housing needs and (2) are achieving urban 285 densities within urban growth areas by comparing growth and development assumptions, targets, housing needs, and objectives contained in the Countywide 286 287 Planning Policies and the ((c)) ounty and city comprehensive plans with actual ((c))288 and)) patterns of development in the county and cities.

289

Additional monitoring, review, and reporting occurs under Policy H-100 to (1) ensure
 alignment with Countywide Planning Policies Housing Chapter goals and policies and
 (2) progress towards meeting countywide and jurisdictional housing growth targets,
 housing needs, and eliminating disparities in access to housing and neighborhood
 choice.

295 ((Buildable Lands Program

296 Section)) Revised Code of Washington 36.70A.215 ((of the Growth Management Act, 297 commonly called Buildable Lands,)) requires six western Washington counties 298 (including King County) and ((their)) the cities in those counties to evaluate their 299 capacity to accommodate forecasted growth of housing units and jobs within the 300 current Urban Growth Area. ((The purpose of the program is to determine whether the 301 county and its cities are achieving urban densities within urban growth areas by 302 comparing growth and development assumptions, targets, and objectives contained in 303 the Countywide Planning Policies and the county and city comprehensive plans with 304 actual growth and development in the county and cities.)) Objectives relating to this 305 review and evaluation include:

- Determining whether a county and ((its)) the cities in that county are achieving urban densities within urban growth areas by comparing growth and development assumptions, targets, and objectives contained in the Countywide Planning Policies and the county and city comprehensive plans with actual growth and development in the county and cities;
- Determining whether there is sufficient suitable land to accommodate
   applicable countywide population projections, including evaluation of impacts
   of approved actions to amend the Urban Growth Area;
- Determining the actual density of housing constructed within the Urban Growth
   Area since the adoption of, or since the most recent evaluation of, the
   Comprehensive Plan;
- Determining the actual amount of land developed for commercial and industrial uses within the Urban Growth Area since the adoption of, or since the most recent evaluation of, the Comprehensive Plan;
- Reviewing commercial, industrial, and housing needs by type and density range to determine the amount of land needed for commercial, industrial, and housing for the remaining portion of the 20-year planning period used in the ((<del>2012 adopted</del>)) Comprehensive Plan; and
- ((Adopting and implementing)) Identifying measures intended to promote consistency between estimates of available land capacity, measures of actual development by type, and goals and objectives of city and county comprehensive plan policies, development regulations, and Countywide Planning Policies. Such measures include, but are not limited to, possible amendments to Countywide Planning Policies as determined necessary by the county and the cities.

332 ((In collaboration with its cities, King County prepared Buildable Lands Reports in 2002, 333

2007 and 2014, to implement this portion of the Growth Management Act.

#### Conclusions of 2014 King County Buildable Lands Report 334

335 The King County Buildable Lands Report - 2014 reported on development densities and 336 capacity as required by the Growth Management Act. The report concluded that King 337 County does have sufficient capacity to accommodate forecasted housing-unit and job 338 growth through 2031 and beyond. Under existing Comprehensive Plans and zoning, the 339 county's Urban Growth Area has a generous surplus of planned capacity: more than 340 double the housing target through 2031 and 160% of the jobs target. Almost all of this 341 development capacity is contained within the county's 39 cities. Unincorporated King 342 County within the Urban Growth Area has sufficient capacity for its residential target, but 343 technically has a slight shortfall of capacity for job growth.

344

345 Under the Growth Management Act, VISION 2040 and the Countywide Planning 346 Policies, cities are designated and intended to accommodate almost all employment growth. Prior to planning under the Growth Management Act, unincorporated King 347 348 County absorbed a large share of the county's residential and job growth. Since 349 beginning to plan under the Growth Management Act, the county's growth has shifted 350 almost entirely into the cities. However, a commensurate share of urban unincorporated 351 growth targets did not shift into cities. Annexations transferred more capacity than 352 target into the annexing cities, leaving residual unincorporated targets that are out of 353 balance with actual capacity. Bearing in mind that the Urban Growth Area as a whole 354 does have sufficient capacity for commercial and industrial growth, the small shortfall in 355 urban unincorporated King County is a technical issue that will be addressed as further 356 annexations occur. No action need be taken now, as urban unincorporated areas 357 undergo transition into cities.

358

366

372

385

359 In partnership with the King County Growth Report, the King County Buildable Lands 360 Report and supplementary monitoring of the)) To develop the Urban Growth Capacity 361 Report and King County Comprehensive Plan Performance Measures, the County and 362 ((its)) the cities ((will)) partner to review information relating to and including, but not 363 limited to, the following:

- 364 Urban densities; •
- 365 Remaining land capacity;
  - Growth and development assumptions, targets, and objectives;
- 367 Residential, commercial, and industrial development;
- 368 Transportation;
- 369 Affordable housing need and supply; 370
  - Economic development; and
- 371 Environmental quality.

#### 373 ((I-301)) I-201 King County shall:

- 374 Monitor ((and benchmark)), measure, assess, and report on the а. 375 progress of the ((Countywide Planning Policies and King County)) 376 Comprehensive Plan toward achieving ((their)) its objectives, 377 inclusive of those relating to growth targets, the environment, 378 development patterns, housing needs, the economy, 379 transportation, ((and)) the provision of public services, and health 380 and social equity outcomes of residents((.)); 381
- b. Use results of such monitoring, measurement, assessment, and 382 reporting to ((encourage)) identify implementation actions and 383 inform policy revisions, as appropriate, to achieve the planning 384 objectives found within the Growth Management Act, Countywide Planning Policies, and ((King County)) Comprehensive Plan((-)); and

406

407 ((The Zoning Code (Title 21A) establishes precise rules for each zoning classification
 408 such as permitted residential densities and activities or allowed commercial and
 409 industrial development activities, and striving for separation between incompatible

- 410 uses. This code includes standards relative to bulk (i.e. lot size and coverage, building
- 411 heights and setbacks, landscape standards).

# 412 V. Other)) <u>IV.</u> Implementing King 413 County Codes

The Comprehensive Plan guides land use over the long term by applying specific land use designations throughout the unincorporated portion of King County and by providing guidelines for implementing regulations used to evaluate specific development proposals. To ensure that these implementing regulations are effective and warrant a high degree of public trust and confidence, the regulations must be equitable, reasonable, and responsibly administered.

421 ((In addition to the Zoning Code,)) King County regulates land development and
 422 construction based on the Comprehensive Plan through a variety of technical code
 423 standards resulting in permits and approvals for specific projects. This includes, but is
 424 not limited to, elements of the King County Code that control development or land use
 425 activities, such as the zoning code, shoreline master program, subdivision ordinances,
 426 surface water management, and construction codes.

428 ((In terms of land use regulation, the most important of these other implementing codes
 429 are Land Segregation (K.C.C. Title 19A) and Shoreline Management (K.C.C. Title 25).
 430 The Land Segregation code regulates division of a parcel of land into smaller lots for
 431 transfer of ownership. The Shoreline Management code regulates the issuance of
 432 substantial development permits for lands abutting waters governed by the Washington
 433 State Shoreline Management Act.

456

457

458

459

460

461

462

427

Other development approvals include commercial or industrial construction permits.
 Review of land segregation, substantial development permits and other development
 proposals are key parts of the development process for making sure facilities and
 services to support potential development are adequate and for evaluating
 environmental impacts.

#### 441 I-101)) I-301 King County's regulation of land use should:

- a. Protect public health, safety and general welfare, and property rights;
- b. Protect consumers from fraudulent practices in land use, land sales, and development;
- c. Implement and be consistent with the Comprehensive Plan and other adopted land use goals, policies, and plans;
  - d. Be expeditious, predictable, clear, straightforward, and internally consistent;
  - e. Provide clear direction for resolution of regulatory conflict;
- f. Be enforceable, efficiently administered, and provide appropriate incentives and penalties;
- g. Be consistently and effectively enforced;
- h. ((Create public and private benefits worth their cost;
- i.)) Be coordinated with timely provision of necessary public facilities and services;
  - ((<del>j.</del>)) <u>i.</u> Encourage creativity and diversity in meeting ((<del>c</del>))<u>C</u>ounty goals and policies;
  - ((<del>k.</del>)) <u>j.</u> Be coordinated with cities, special purpose districts<u>,</u> and other public agencies to promote compatible development standards throughout King County;
- ((<del>I.</del>)) <u>k.</u> Be responsive, understandable<u>,</u> and accessible to the public;
- 463((m-)) I. Provide effective public notice and reasonable opportunities464for the public (((;)), especially those directly affected((;)), to be465heard and to influence decisions;

466	(( <del>n.</del> )) <u>m.</u> Avoid intruding on activities involving constitutionally
467	protected freedoms of speech, petition, expression, assembly,
468	association, and economic competition, except when essential to
469	protect public health, safety and welfare (( <del>(</del> )) <u>,</u> and then the

474	(( <del>S</del> )) <u>s</u> ocial (( <del>J</del> ))justice goals;
475	(( <del>p.</del> )) <u>o.</u> Make development requirements readily accessible to the
476	public through up-to-date codes, technical assistance materials <u>.</u>
477	and other relevant documents; and
478	(( <del>q.</del> )) <u>p.</u> Provide for relief from existing regulations when they would
479	deprive a property of uses allowed to similar properties with the
480	same zoning or environmental or other constraints, and when such
481	relief would neither endanger public health and safety nor conflict
482	with adopted use policies. This policy is not intended for relief
483	from rules governing the subdividing of land.
484	
485	(( <del>I-401</del> )) <u>I-302</u> The King County (( <del>Zoning</del> )) Code's (( <del>zone</del> )) <u>zoning</u> classifications and
486	development standards (( <del>and the official zoning maps</del> )) shall be
487	consistent with the Comprehensive Plan ((and functional plans)).
488	• • • •
489	(( <del>I-501</del> )) <u>I-303</u> When needed infrastructure and facilities are not available in a timely
490	manner, development approvals shall (( <del>either</del> )):
491	<u>a. ((<del>b</del>))B</u> e denied (( <del>or</del> ));
492	<u>b. ((d))D</u> ivided into phases(( <del>, or the project proponents should</del> )) <u>; or</u>
493	<u>c. ((p))P</u> rovide the needed facilities and infrastructure to address
494	impacts directly attributable to their project(( <del>, or as may be</del>
495	provided by the proponent on a voluntary basis)).
496	
497	(( <del>I-502</del> )) <u>I-304</u> King County's permitting systems should provide for expeditious
498	review of projects consistent with zoning and adopted policies.
499	
500	(( <del>I-503</del> )) <u>I-305</u> Subdivision, short subdivision <u>,</u> and other development approvals,
501	including those requiring detailed environmental review under the
502	State Environmental Policy Act, shall be reviewed for consistency with
503	the Comprehensive Plan, zoning, community, subarea plans, functional
504	plans, and capital improvement programs.
505	to the term of the term of the term
506	(( <del>I-504</del> )) <u>I-306</u> King County shall enforce its (( <del>land use and environmental</del> ))
507	development regulations by pursuing code enforcement complaints
508	and by providing (( <del>oversight</del> )) inspection services during the process of
509	site development on all sites for which it issues permits.
510	•
511	(( <del>I-505 King County shall develop, as a part of the buildable lands analysis, a</del>
512	zoning yield and housing production monitoring program to determine
513	whether housing capacity is being lost in the context of compliance
514	with the Endangered Species Act, and shall propose revisions to the
515	Countywide Planning Policies to implement such a program.))
516	
517	Siting public and private uses in communities can at times lead to concerns and
518	objections from neighbors resulting from the real or perceived impacts of proposed
519	uses. The <u>re((se))</u> is also a risk that objections to these "locally unwanted land uses"
520	(( <del>LULUs)</del> )) can lead to some uses becoming overly-concentrated in some communities,
520	particularly in ((historically disadvantaged areas)) those communities with higher
522	populations of Black, Indigenous, and other People of Color; people with low-incomes;
523	immigrants; and refugees. In response, governments should evaluate the potential

524 equity <u>and racial</u> and social justice implications, including the beneficial and((<del>/or</del>)) 525 adverse impacts, of policies and regulations involving such uses.

526

- 528
- 529 530 531

532

((I-101a)) I-307 Equity and racial and social justice principles ((will)) shall be used by King County as an important consideration in developing zoning and development regulations governing public and private uses, in siting public facilities, and in evaluating land use decisions. Results from ((the E))equity ((I))impact ((R))reviews ((Tool will)) shall be used where appropriate.

# 533 ((<del>VI.2016</del>))<u>V.</u> Comprehensive Plan 534 ((<del>Workplan</del>)) <u>Work Plan</u>

535 ((<del>A new feature of the 2016 Comprehensive Plan is this Workplan section. While</del> 536 Workplan tasks have accompanied the Comprehensive Plan as part of the adoption process by the County Council, these tasks were historically included with the 537 538 Ordinance rather than inside of the Comprehensive Plan. In the 2016 Comprehensive 539 Plan, these tasks will be included in the body of the document.)) The Comprehensive 540 Plan ((Workplan tasks)) Work Plan identifies additional actions the County will take after 541 adoption of the 2024 Comprehensive Plan to: (1) further implement and refine the plan, 542 and/or (2) continue work on issues that arose during plan development but there was 543 not sufficient time or resources to complete the work prior to adoption. The action 544 items work in conjunction with the other implementation tools discussed in this chapter, 545 such as regulations, incentive programs, and other core regional planning and 546 implementation activities. Each ((Workplan)) Work Plan action item includes a summary 547 description, general timeline, and anticipated outcomes. ((In the 2018 update to the 548 2016 King County Comprehensive Plan, as part of the restructure adopted in Ordinance 549 18810 and Motion 15142, the County modified the structure of the King County 550 Comprehensive Plan update process to include a comprehensive update every eight years, as well as potential annual and midpoint updates. As part of this review, 551 552 Workplan items were amended to reflect this restructure, and to add direction for future 553 updates to the Comprehensive Plan, including a 2020 update. Consistent with policies 554 I-203 and I-204a, modifications and additions to the Workplan were included in the 555 2020 Comprehensive Plan update.)) Completion of Work Plan actions are dependent 556 on future grant awards and/or budget decisions. Should funding be unavailable to 557 complete the work, the timelines and/or deliverables may need to be reassessed. 558

559 When transmitting to the Council the required report, study, ordinance, and/or motion 560 in any of the ((items)) <u>Work Plan deliverables</u> outlined below, the transmittal shall be ((in 561 the form of a paper original and an electronic copy)) <u>electronically</u> filed with the clerk of 562 the Council, who shall retain the original and provide an electronic copy to all 563 Councilmembers, the Council chief of staff, ((the policy staff director)) and the lead staff 564 for the ((planning, rural service and environment committee, or its successor)) 565 committee charged with oversight of the Comprehensive Plan.

566

567 ((Action 1: Implementation of the Community Service Area Subarea Planning
 568 Program. Under the direction of the Department of Local Services - Permitting Division,
 569 King County has launched a new regular subarea planning program. While this is

- described in greater detail in Chapter 11: Community Service Area Subarea Planning,
   launching and implementing this effort will be a major activity following the adoption of
   the Comprehensive Plan. For each plan, the County shall comply with Policy CP-100 and
   K.C.C. 2.16.055.
- 574 *Timeline:* Ongoing; the Executive will propose a subarea plan for each area
   575 based on planning schedule in Chapter 11.

- Outcomes: A proposed subarea plan for each Community Service Area for Council consideration and possible adoption. Each subarea plan shall be transmitted by the Executive to the Council in the form of an ordinance that adopts the subarea plan, at a time consistent with King County Code Chapter
   20.18. A Public Review Draft of each subarea plan shall be made available to the public and the Council for comment prior to finalizing the plan for transmittal.
- *Lead*: Department of Local Services Permitting Division, in coordination and collaboration with the Office of Performance Strategy and Budget. Executive staff, including the Department of Local Services - Permitting Division, the Office of Performance, Strategy and Budget, or other appropriate agencies, shall update and coordinate with the Councilmember office(s) representing the applicable study area throughout the community planning process.

#### 590 Action 2: Develop a Performance Measures Program for the Comprehensive Plan.

591 The purpose of the program is to develop longer-term indicators to provide insight into 592 whether the goals of the Comprehensive Plan are being achieved or if revisions are 593 needed. Given the longer-term nature of the issues addressed in the Comprehensive 594 Plan, this program will be implemented on an eight-year update schedule. Reports are 595 to be released in the year prior to the initiation of the eight-year update in order to 596 guide the scoping process for the update. Additionally, to the extent practicable for 597 each dataset, indicators will be reported at the level most consistent with the major 598 geographies in the Growth Management Act and Comprehensive Plan - incorporated 599 cities, unincorporated urban areas, Rural Areas, and Natural Resource Lands.

- *Timeline:* The motion adopting the program framework shall be transmitted by June 1, 2017. A 2022 Comprehensive Plan Performance Measures Report released by March 1, 2022, will inform the 2022 Scope of Work for the 2024 Comprehensive Plan update.
- 604 -Outcomes: The 2017 framework for the program shall be transmitted by the 605 Executive to the Council by June 1, 2017, in the form of a motion that adopts 606 the framework. The 2022 Comprehensive Plan Performance Measures Report 607 shall be completed as directed by the 2017 framework motion adopted by the 608 Council. The Executive shall file with the Council the 2022 Comprehensive Plan 609 Performance Measures Report. The 2022 Scope of Work for the 2024 610 Comprehensive Plan update shall be informed by the 2022 Performance 611 Measures Report. The Executive's transmitted 2024 Comprehensive Plan shall 612 include updated references to the new Performance Measures Program.
- *Lead:* Office of Performance Strategy and Budget. Executive staff shall work
   with the Council's Comprehensive Plan lead staff in development of the 2017
   framework for the program.

616

589

Action 3: Implement a Transfer of Development Rights Unincorporated Urban 617 Receiving Area Amenity Funding Pilot Project. The County's Transfer of 618 619 Development Rights Program has been very effective in implementing Growth 620 Management Act goals to reduce sprawl and permanently protect open space. This 621 Workplan item is to conduct a pilot project to determine the process for providing 622 amenities to unincorporated urban Transfer of Development Rights receiving area 623 communities. The focus of the pilot project will be the East Renton Plateau - an area of 624 urban unincorporated King County that has received a substantial number of Transferrable of Development Rights. The East Renton Plateau Transfer of Development 625 626 Rights Receiving Area Pilot Project will: develop a process for engaging the community 627 to determine the type of amenities the community desires; assess the type and amounts 628 of funding available for providing amenities; and establish an amount of amenity 629 funding to be provided for each Transferrable of Development Rights (both past and 630 future Transferrable of Development Rights).

#### 631 • Timeline: 2017-2018; (18-month process). The Transfer of Development Rights Implementation, Amendments and Evaluation - Page 12-15

# ((<del>2016</del>)) <u>2024 King County</u> Comprehensive Plan - ((<del>updated December 6, 2022</del>)) <u>Adopted TBD</u> <u>Attachment A to</u>Ordinance ((<del>18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555</del>)) <u>xxxxx (Proposed Ordinance 2023-0440)</u>

632 Amenity Funding Pilot Project Report on the results of the pilot project shall be transmitted to the Council by June 1, 2018, so as to inform the King County 633 634 2019-2020 Biennial Budget. 635 -Outcomes: The Executive shall file with the Council the Transfer of 636 Development Rights Amenity Funding Pilot Project Report recommending 637 process and funding levels relative to Transferrable of Development Rights used in development projects. The report shall include identification of any 638 639 necessary recommended amendments to the Comprehensive Plan and King 640 County Code. The Executive shall transmit to the Council any recommended 641 amendments to the Comprehensive Plan and King County Code as part of the 642 2020 Comprehensive Plan update. 643 Leads: Department of Natural Resources and Parks. Executive staff shall update 644 and coordinate with the Councilmember office(s) representing the pilot project 645 community throughout the process. 646 Action 4: Transfer of Development Rights Program Review. The County's Transfer of 647 648 Development Rights Program has been very successful in protecting Rural Area and 649 Natural Resource Lands by transferring development potential into cities and 650 unincorporated urban areas. Typically the Transfer of Development Rights Program 651 advances two primary policy objectives: conserving Rural Area and Natural Resource 652 Lands, as well as focusing new growth in urban areas. 653 654 This Workplan item will do the following: 655 A.—Prepare a Transfer of Development Rights Program Review Study that addresses: 1)-Tax revenue impacts of the Transfer of Development Rights Program for both 656 657 sending and receiving sites. 658 2)—Analysis of potential Transfer of Development Rights Program changes that 659 build on existing program objectives while considering other policy objectives, such as making investments in economically disadvantaged areas, promoting 660 661 housing affordability, incentivizing green building, and providing for Transit 662 Oriented Development. The analysis should take into consideration the 663 economic feasibility of and market interest in these other policy objectives, as 664 well as opportunities for providing amenities to communities that receive 665 Transfer of Development Rights. This analysis will be achieved through 666 implementation of a pilot project that utilizes such incentives and provides 667 amenities to the community receiving increased density associated with the 668 Transfer of Development Rights. If possible, the pilot project should be undertaken in Skyway-West Hill and help implement the Skyway-West Hill 669 670 Action Plan. 671 3)—Consider possible performance criteria. 672 B:-Produce an annual report to the Council on the Transfer of Development Rights 673 Program and associated bank activity. 674 675 Timeline: The annual report to the Council shall commence with a report due 676 on December 1, 2017. The Transfer of Development Rights Program Review 677 Study, and an ordinance making Comprehensive Plan and/or King County 678 Code changes if applicable, shall be filed with the Council by September 30, 679 2019 as part of the 2020 Comprehensive Plan update. 680 -Outcomes: The Executive shall file with the Council the Transfer of 681 Development Rights Program Review Study and the annual report. The Study 682 shall outline policy and implementation options, if applicable. <del>- If</del> 683 Comprehensive Plan and/or King County Code changes are recommended, an 684 ordinance implementing those changes shall also be transmitted to the Council 685 with the Study.

686 687 688  Leads: Department of Natural Resources and Parks, Office of Performance Strategy and Budget. Executive staff shall update and coordinate with the Councilmember office(s) representing the pilot project community throughout the process.

689 690 691

Action 5: Review 2016 King County Comprehensive Plan Implementation Needs.
 The 2016 Comprehensive Plan includes new policy direction that may need updates in

- the King County Code in order to be implemented before the 2024 Comprehensive Plan update. The County will utilize an interbranch team to review the 2016 Comprehensive Plan and any necessary code updates. This analysis will result in a report that identifies the areas of the code in need of updating and subsequent legislation to address the areas of inconsistencies. The legislation will also include code changes to K.C.C. 16.82.150 and 16.82.152, and associated references, to reflect court rulings and current case law.
- *Timeline:* An Implementation Report shall be filed with the Council by July 31, 2017. The Report will inform a code update ordinance(s), which shall be transmitted to the Council no later than December 31, 2021.
- Outcomes: The interbranch team shall prepare, and the Executive shall file with
   the Council, the 2016 Comprehensive Plan Implementation Report and the
   code update ordinance(s).
- *Leads:* Interbranch team comprised of staff from at least the: King County
   Council, Office of Performance Strategy and Budget, Department of Local
   Services Permitting Division, and Prosecuting Attorney's Office.
- 710 Action 6: Alternative Housing Demonstration Project. There is considerable interest 711 to explore temporary and permanent alternative housing models to address the issues of homelessness and affordable housing in the Puget Sound region. King County is 712 currently exploring microhousing pilot projects across the region that can inform a 713 714 larger demonstration project under King County Code on alternative housing models in 715 unincorporated King County. Based on what the County learns from the experience of 716 pilots across the region, the County should pursue a larger demonstration project that 717 looks at a broader range of temporary and permanent alternative housing models 718 under its land use authority.
- 719

709

720 This work plan item will utilize an interbranch team to analyze the potential for a 721 demonstration project under K.C.C. chapter 21A.55 for one or more temporary or 722 permanent alternative housing projects, such as single and/or multi-family 723 microhousing (i.e., very small units clustered around a shared kitchen and other similar 724 models) or tiny houses, modular construction, live/work units, and co-housing projects. 725 A demonstration project will allow the County to test development regulations and 726 other regulatory barriers related to alternative housing models before adopting or 727 amending permanent regulations. Such regulations could include amendments to or 728 establishment of regulations related to permitted uses or temporary uses, building and 729 fire codes, water and sewer supply requirements, setbacks, landscaping screening, 730 location requirements, light and glare requirements, public notice, and mitigation of 731 impacts to the surrounding area. This work plan item should also analyze potential 732 funding sources and funding barriers for projects that may or may not require public 733 funding, including funds managed by the King County Housing and Community 734 Development Division of the Department of Community and Human Services.

*Timeline:* Two phases. Phase One - Issuance of a request for proposals to identify a project or projects in unincorporated King County that will participate in an Alternative Housing Demonstration Project. While a project or projects are being chosen, a Demonstration Project ordinance package that pilots necessary regulatory flexibilities will be developed for approval by the Council. Such a Demonstration Project shall be transmitted to Council by December 31, 2019. Phase II - An Alternative Housing Demonstration Project Report, including

- proposed regulations and/or amendments to implement the recommendations
   of the report shall be transmitted to the Council for consideration within two
   years from the final certificate of occupancy for buildings developed under the
   Demonstration Project Ordinance.
- Outcomes: The interbranch team shall prepare, and the Executive shall file with the Council, the Alternative Housing Demonstration Project Report, which shall include analysis of the issues learned in the Demonstration Project(s), and identification of recommended amendments to the Comprehensive Plan and King County Code. The Executive shall also file with the Council an ordinance adopting updates to the Comprehensive Plan and/or King County Code as recommended in the Report.
- *Leads*: The King Council will convene an interbranch team comprised of staff from at least: King Council, Department of Community and Human Services, Department of Local Services - Permitting Division, Public Health, and Office of Performance Strategy and Budget.
- 758 Action 7: Agricultural Related Uses Zoning Code Updates. As part of the transmitted 759 2016 Comprehensive Plan, the Executive included recommended code changes related 760 to agricultural uses in unincorporated King County. In order to give the Council 761 additional time to consider these proposed changes and to address the identified 762 policy issues, the transmitted code changes will not be adopted in 2016. Instead, the 763 code changes will be further developed through this work plan item. 764
- 765 The Council identified several policy issues through review of the code changes as part 766 of the 2016 Comprehensive Plan update. Through use of an interbranch team, this work plan item aims to resolve these policy issues, draft a new ordinance, and complete 767 768 outreach to affected stakeholders such as the King County Agriculture Commission, ag-769 related business owners, and/or Community Service Areas. If the results of the winery 770 study, currently being reviewed by the Executive, are not complete in time to 771 incorporate into the 2016 Comprehensive Plan, then this work plan item should also 772 address the recommendations of that study.
- *Timeline:* Six to nine month process. An Agricultural Related Uses Zoning Code
   Updates Report and proposed regulations to implement the recommendations
   in report shall be transmitted to the Council for consideration by September 30,
   2017.
- Outcomes: The interbranch team shall prepare, and the Executive shall file with the Council, the Agricultural Related Uses Zoning Code Updates Report, which shall include identification of recommended amendments to the King County Code. The Executive shall also file with the Council an ordinance adopting updates to the King County Code as recommended in the Report.
- *Leads*: The King Council will convene an interbranch team comprised of at least King Council staff, the Department of Permitting and Environmental Review, the Department of Natural Resources and Parks, and the Office of Performance Strategy and Budget.
- 786

757

787 Action 8: Cottage Housing Regulations Review. Cottage housing is a method of 788 development that allows for multiple detached single-family dwelling units to be 789 located on a commonly owned parcel. In unincorporated King County, cottage housing 790 is currently only permitted in the R-4 through R-8 urban residential zones, subject to 791 certain conditions in the King County Code, such as in K.C.C. 21A.08.030 and 792 21A.12.030, which includes being only allowed on lots one acre in size or smaller. This 793 work plan item will review Comprehensive Plan policies and development code 794 regulations for the potential for expanded allowances for cottage housing in 795 unincorporated King County, including in Rural Areas, and recommend policy and code changes as appropriate. The review will include evaluation of encouraging: close 796 797 proximity of garages to the associated housing unit; and development of units with a

- 798 wide variety of square footages, so as to address various needs and a diversity of 799 residents.
- Timeline: A Cottage Housing Regulations Report shall be transmitted to the Council by December 31, 2018. Any proposed policy or code changes to implement the recommendations in the report shall be transmitted to the Council for consideration by September 30, 2019 as part of the 2020 Comprehensive Plan update.
- Outcomes: The Executive shall file with the Council the Cottage Housing
   Regulations Report, which shall include identification of any recommended
   amendments to the King County Code and/or Comprehensive Plan. The
   Executive shall also file with the Council an ordinance adopting updates to the
   King County Code and/or the Comprehensive Plan, if recommended in the
   Report.
- 811 812 813

—Leads: The Department of Local Services - Permitting Division and the Office of Performance Strategy and Budget.

814 Action 9: Carbon Neutral King County Plan. The 2016 Comprehensive Plan includes 815 a new policy F-215b which directs the County to "strive to provide services and build 816 and operate public buildings and infrastructure that are carbon neutral." To support 817 implementation of this policy, this work plan item directs the Executive to develop an 818 Implementation Plan for making King County government carbon neutral. The 819 Implementation Plan shall address existing and new County buildings, as well as all 820 County operations and services, and shall identify the actions, costs and schedule for 821 achieving carbon neutral status. This Implementation Plan will help inform the 2020 822 update of the Strategic Climate Action Plan, through which existing county targets for 823 carbon neutrality and greenhouse gas emissions reduction will be updated consistent 824 with the F-215b and the Implementation Plan.

- Timeline: A Carbon Neutral King County Implementation Plan and a motion adopting the Implementation Plan shall be transmitted to the Council for consideration by February 28, 2019. A Progress Report on development of the Implementation Plan shall be transmitted to the Council by December 31, 2017.
- Outcomes: The Executive shall file with the Council for review and potential approval the Carbon Neutral King County Implementation Plan and a motion adopting the Implementation Plan.
- 832 833

Leads: Department of Natural Resources and Parks.

834 Action 10: Green Building Handbook Review. The 2016 Comprehensive Plan 835 includes policy direction in Policies U-133, R-336a, F-215a, and ED-501a that 836 encourages green building practices in private development. To support these 837 implementation of these policies, and consistent with direction in the 2015 Strategic 838 Climate Action Plan, the County will soon be in the process of reviewing potential green 839 building code requirements and/or encouraged standards for private development for 840 possible adoption. In the meantime, the County intends to continue to use the 841 Department of Permitting and Environmental Review's existing "Green Building 842 Handbook" to help encourage private green building development, which is referenced 843 in the 2016 Comprehensive Plan. This work plan item directs the Executive to transmit 844 to the Council the Green Building Handbook for review and potential approval.

- Timeline: The Green Building Handbook and a motion approving the Handbook shall be transmitted to the Council for consideration by March 1, 2017.
   Outcomes: The Executive shall file with the Council for review and potential approval the Green Building Handbook and a motion adopting the Handbook.
- 850 *Leads: The Department of Permitting and Environmental Review.*
- 851

852 Action 11: Bicycle Network Planning Report. The Puget Sound Regional Council has 853 identified a regional bicycle network, for both the existing network and the associated 854 gaps and needs, in its Active Transportation Plan, which is an element of Transportation 855 2040. King County also identifies local bicycle network needs throughout its planning, 856 such as in the Transportation Needs Report and the Regional Trail Needs Report. 857 858 This Workplan item directs the King County Department of Transportation, in 859 coordination with the Department of Natural Resources and Parks and the Department 860 of Permitting and Environmental Review, to evaluate and report on how to enhance the bicycle network within unincorporated King County and address identified regional and 861 862 local bicycle infrastructure needs (such as standards for bicycle lanes, tracks and trails; 863 plans and financing for capital improvements; bicycle racks and parking; air filling 864 stations; etc). This report will include: 865 a.-Evaluation of existing King County planning efforts and possible areas for 866 improvement, such as addressing bicycle facility provisions in: o roadway designs and standards, including lighting standards, 867 868 e-plat approvals, 869 commercial developments, 870 → parks & trails planning, and 871 → transit planning and access to transit. b.-Evaluation of bicycle and/or active transportation plan elements of other 872 873 jurisdictions, including the City of Seattle, for opportunities to connect to King 874 County planning and active transportation facilities. 875 c.-Working with stakeholders for identification of needs and areas for possible 876 improvements. 877 Timeline: The Bicycle Network Planning Report and a motion approving the 878 report shall be transmitted to the Council for consideration by December 31, 879  $\frac{2017}{2017}$ 880 Outcomes: The Executive shall file with the Council for review and potential 881 approval the Bicycle Network Planning Report and a motion adopting the 882 Report. 883 Lead: Department of Transportation. 884 885 Action 12: Update Plat Ingress/Egress Requirements. State law gives King County 886 the responsibility to adopt regulations and procedures for approval of subdivisions and 887 plats. The Department of Local Services - Permitting Division reviews ingress and egress 888 to subdivisions and plats during the preliminary subdivision approval process using the 889 Department of Local Services - Road Services Division's "King County Road Design and 890 Construction Standards - 2007" (Roads Standards). In recent years, subdivision layouts 891 have included one entry/exit (or ingress/egress) point and a looped road network within 892 the subdivision. 893 894 Utilizing one entry/exit point can cause access issues if the roadway were to be 895 physically impeded (such as due to: a fire, debris, flooding, ice, snow, etc.). This 896 configuration may also cause traffic backups while waiting for the ability to turn in to or 897 out of the development. Sometimes, this one access point may also be located too close 898 to other intersecting roadways to the roadway that the development intersects; this can contribute to traffic back-ups. 899 900 901 This Workplan item directs the Executive to transmit legislation to update the code, 902 (such as K.C.C. Title 21A), and the King County Department of Local Services - Road 903 Services Division's Road Standards to address these access issues. This code update will 904 include requiring two entry/exit points for plats and subdivisions over a certain size;

requiring sufficient distance between the two entry/exit points so as to not impact traffic

906 flows; addressing access for emergency vehicles, including requiring adequate roadway 907 width to accommodate emergency vehicles; and increasing the distance between 908 adjacent intersecting streets. The transmittal letter for the ordinance(s) shall indicate the 909 rational for the chosen size threshold for when the County will require two entry/exit 910 points.

- 911 *Timeline:* The proposed amendments to the King County Code and the King
   912 County Roads Standards shall be transmitted to the Council for consideration
   913 by June 30, 2020.
- 914 Outcomes: The Executive shall file with the Council an ordinance(s) adopting
   915 updates to the King County Code and the King County Roads Standards.
- 916 *Lead*: Department of Local Services.
  917

918 Action 13: Water Availability and Permitting Study. The recent Washington State 919 Supreme Court decision in Whatcom County v. Western Washington Growth 920 Management Hearings Board (aka, Hirst) held that counties have a responsibility under 921 the Growth Management Act to make determinations of water availability through the Comprehensive Plan and facilitate establishing water adequacy by permit applicants 922 923 before issuance of development permits. *Hirst* also ruled that counties cannot defer to 924 the State to make these determinations. This case overruled a court of appeals decision 925 which supported deference to the State. The Supreme Court ruling will require the 926 County to develop a system for review of water availability in King County, with a 927 particular focus on future development that would use permit exempt wells as their 928 source of potable water. This system will be implemented through amendments to the 929 King County Comprehensive Plan and development regulations. The County will 930 engage in a Water Availability and Permitting Study to address these and related issues. 931 This study will analyze methods to accommodate current zoning given possible water 932 availability issues and will look at innovative ways to accommodate future development 933 in any areas with insufficient water by using mitigation measures (e.g. water banks). This 934 study will not include analysis of current water availability.

935

949

- *Timeline:* Eighteen month process. Initial report will be transmitted to the
   Council by December 1, 2017; final report, with necessary amendments, will be
   transmitted to the Council by December 31, 2018. This report may inform the
   scope of work for the 2020 Comprehensive Plan update.
- Outcomes: Modifications, as needed, to the Comprehensive Plan, King County
   Code and County practices related to ensuring availability of water within the
   Comprehensive Plan and determining the adequacy of water during the
   development permit process.
- *Leads:* Performance, Strategy and Budget. Work with the Department of Local Services - Permitting Division, Department of Natural Resources and Parks, Department of Public Health, Prosecuting Attorney's Office, and King County Council. Involvement of state agencies, public, local watershed improvement districts, and non-governmental organizations.

950 Action 14: 2020 Comprehensive Plan Update. In 2018, the County restructured its 951 comprehensive planning program and associated Comprehensive Plan update process. 952 This restructure includes moving to an eight-year update schedule. As part of the 953 transition to this new update schedule and given that the next eight-year plan update 954 will not be completed until 2024, there is a need to make substantive changes in the 955 interim. The scope of the update proposed by the Executive in the motion shall include any changes as called for by applicable Workplan Action items, any policy changes or 956 957 land use proposals that should be considered prior to the 2024 update, review and 958 inclusion of changes related to docket proposals that were recommended to be 959 reviewed as part of the next eight-year update, aligning the language in the Comprehensive Plan and Title 20 regarding what is allowed during annual, midpoint 960

- and eight-year updates, and reviewing and updating the terminology to consistently
   describe the various updates.
- *Timeline:* A motion authorizing the 2020 Comprehensive Plan update shall be transmitted to the Council for consideration by January 2, 2019. The Council shall have until February 28, 2019 to adopt the motion. The 2020 Comprehensive Plan update shall be transmitted to the Council for consideration by September 30, 2019. The Council shall have until June 30, 2020 to adopt the 2020 Comprehensive Plan update.
- 969 -Outcomes: The Executive shall file with the Council a motion authorizing the 970 2020 Comprehensive Plan update. The Council shall have until February 28, 971 2019 to adopt the motion, either as transmitted or amended. In the absence of 972 Council approval by February 28, 2019, the Executive shall proceed to 973 implement the scope as proposed. If the motion is approved by February 28, 974 2019, the scope shall proceed as established by the approved motion. The 975 Executive shall then file with the Council the proposed 2020 Comprehensive Plan update by September 30, 2019. The Council shall have until June 30, 2020 976 977 to adopt the 2020 Comprehensive Plan update.
- 4. *Leads:* Office of Performance, Strategy and Budget, in coordination and collaboration with the Department of Local Services - Permitting Division.

980

996

981 Action 15. Annual DLS Briefing at Local Services Committee. In order to better serve 982 the residents of unincorporated King County, the Council adopted Ordinance 18791 to 983 establish a new Department of Local Services effective January 1, 2019, following 984 quidance for the creation of the Department adopted in Motion 15125. The 985 Department will be evaluating processes, procedures, and policies to identify areas of 986 improvement in the delivery of unincorporated services. In addition to this evaluation, 987 the Department will report at least annually to the Local Services Committee or its 988 successor on key issues related to unincorporated areas.

- 989  *Timeline:* The Department will report to the Local Services Committee or its
   990 successor at least annually.
- Outcomes: The Department of Local Services shall coordinate with the Regional
   Planning Unit and other departments to inform the 2020 Comprehensive Plan
   update, and will brief the Local Services Committee at least annually.
- 4 *Leads:* Department of Local Services, in coordination with the Regional
   995 Planning Unit of Office of Performance, Strategy and Budget.

997 Action 16: Streamlining the Comprehensive Plan. Public participation, as expressed 998 in Policy RP-103, is to be actively sought out throughout the development, amendment, 999 and implementation of the Comprehensive Plan. The Plan, and various iterations before 1000 final adoption, are posted online in order to be accessible to the public, and active 1001 outreach efforts during plan updates seek to reach a wide range of County residents. 1002 However, such a lengthy document with many complex regulatory requirements can be 1003 difficult to navigate and understand. To make the Comprehensive Plan and relevant 1004 sections in King County Code Title 20 more reader-friendly and accessible to a wider audience, redundancies and excess detail should be minimized. This workplan item will 1005 1006 initiate the process of streamlining the 2016 Comprehensive Plan and portions of King 1007 County Code Title 20 over the next several years, with the goal of becoming shorter, 1008 easier to understand, and more accessible to the general public. This review will 1009 consider: removal of text or policies that are redundant and/or repetitive within the 1010 plan; removal of text or policies that are redundant to other existing plans and policy 1011 documents; removal of outdated text or policies; removal of text or policies that are at a 1012 level of detail that is more appropriate for functional plans, implementation plans, 1013 development regulations, etc.; increasing readability and conciseness; clarifying the process for amending the plan; and making the document and sections of the Code 1014 more streamlined, user friendly, and accessible for the public. 1015

- 1016 *Timeline:* A streamlined version of the Comprehensive Plan and relevant sections of King County Code Title 20, including but not limited to KCC 20.08, 20.12, and 20.18 shall be transmitted to the Council for consideration by June 30, 2023.
- Outcomes: The Executive shall file with the Council an ordinance adopting a
   streamlined version of the Comprehensive Plan and associated code changes
   as part of the Executive's proposed 2024 eight-year Comprehensive Plan
   update.
- *Leads:* Office of Performance, Strategy and Budget, in coordination and collaboration with the Council's Comprehensive Planning lead staff and the Department of Local Services - Permitting Division.

1027

1028 Action 17: Update the Residential Density Incentive Code. As part of the 2020 1029 Comprehensive Plan update, the King County Executive included a code study 1030 regarding the County's Residential Density Incentive (RDI) regulations in K.C.C. Chapter 1031 21A.34. This code study included recommendations for updating the RDI regulations, 1032 but ultimately the 2020 Comprehensive Plan update did not include any updates with 1033 the 2020 Comprehensive Plan update. The code study states that the "key factors 1034 identified and recommendations should be considered as the Affordable Housing 1035 Committee seeks to develop model ordinances or provide technical assistance to other 1036 jurisdictions interested in implementing inclusionary housing policies." As part of this 1037 Work plan Action, the King County Executive will update the County's RDI regulations. This work can be coordinated with the Affordable Housing Committee of the Growth 1038 1039 Management Planning Council, which has been established to implement the Regional 1040 Affordable Housing Task Force Five Year Action Plan and will recommend action and 1041 assess progress toward implementing the Plan.

- 1042 *Timeline:* A proposed ordinance modifying the Residential Density Incentive
   1043 Code shall be transmitted to the Council by June 30, 2023.
- 1044 Outcomes: The Executive shall file with the Council a proposed ordinance as 1045 part of the Executive's proposed 2024 eight-year Comprehensive Plan update.
- 1046
   Lead: Department of Local Services Permitting Division, in coordination with 1047
   1048
   1048
   1049

1050 Action 18: Greenhouse Gas Mitigation. As part of the 2020 update to the 2016 1051 Comprehensive Plan, policies and regulations related to some aspects of climate change and greenhouse gas emissions were adopted. More work is needed to address 1052 resiliency for the natural and built environment, and to mitigate impacts from climate 1053 1054 change, including avoiding or sequestrating greenhouse gas emissions. The loss of 1055 carbon sequestration capacity resulting from the conversion of forestland to non-forest 1056 uses is one area where the County can make a difference in addressing these impacts. 1057 In order to implement the policy direction in the 2020 update related to sea level rise, 1058 climate change, greenhouse gas emissions, and fossil fuel facility impacts, this Workplan 1059 item directs:

- A.—Preparation of a Forest Conversion Review Study that includes and evaluates the
   following information:
- 1062 1.—The current process and standards for reviewing and approving Class-IV
   1063 General Forest Practices relating to forest conversion, and for reviewing and
   1064 approving Conversion Option Harvest Plans.
- 1065 2:—The number of forest conversions permitted in unincorporated King County
   1066 since August 10, 1999, regardless of whether a separate Class-IV General
   1067 Forest Practice permit was issued, and the average and total acreage of forest
   1068 removed.

1069 3:-The number of Conversion Option Harvest Plans approved since August 10; 1070 1999, and the number of participating properties that were not subsequently 1071 replanted. 1072 4.—An estimate of sequestered carbon lost and reduced future carbon 1073 sequestration potential due to clearing under Class-IV General Forest Practice 1074 permits and Conversion Option Harvest Plans. 1075 5.-Potential pathways to achieving zero net loss carbon sequestration capacity 1076 from future forest conversions, including, but not limited to, off-site replanting, 1077 payment into a mitigation bank, and purchase of carbon credits. This should 1078 include both standard forest conversions and properties with Conversion 1079 Option Harvest Plans that are subsequently converted to non-forest uses. 1080 B.—Drafting and transmittal of a proposed ordinance that establishes or modifies regulations, and if necessary, Comprehensive Plan policies, that will result in zero 1081 1082 net loss of carbon sequestration capacity from future forest conversions, based on 1083 the recommended strategies in the Forest Conversion Review Study. 1084 Timeline: The Forest Conversion Review Study report and a proposed 1085 ordinance making Comprehensive Plan and/or King County Code changes shall be transmitted to the Council for consideration by June 30, 2022. 1086 1087 - Outcomes: The Executive shall file with the Council the Forest Conversion 1088 Review Study report and a proposed ordinance with recommended code 1089 and/or policy updates. 1090 -Leads: Department of Natural Resources and Parks and Department of Local 1091 Services - Permitting Division. 1092 1093 Action 19: Skyway-West Hill and North Highline Anti-Displacement Strategies. 1094 King County will complete an Anti-Displacement Strategy for Skyway-West Hill and 1095 North Highline. In the context of Motion 15539, the work done by the County's 1096 Regional Affordable Housing Task Force and the ongoing work by the Affordable 1097 Housing Committee of the Growth Management Planning Council, this strategy will 1098 evaluate tools, programs, and regulations to retain and create affordable housing and prevent residential displacement. The strategy, at minimum, shall consider the 1099 1100 following: mandatory inclusionary zoning; preservation for manufactured housing and 1101 manufactured housing communities; residential community benefit agreements; 1102 relocation assistance; redevelopment assistance; right to return programs; community 1103 preference programs; and other tools, programs, and regulations identified in Motion 1104 15539. The report will be informed by best practices, research, other ongoing efforts in 1105 King County, and a robust community engagement process. -Timeline: A Skyway-West Hill and North Highline Anti-Displacement Strategies 1106 1107 Report and proposed legislation to implement the recommendations in the 1108 report shall be transmitted to the Council for consideration by September 30, 1109 2021. This deadline supersedes the deadlines adopted in Motion 15539. 1110 Outcomes: The Executive shall file with the Council the Skyway-West Hill and North Highline Anti-Displacement Strategies Report, which shall include 1111 recommended strategies and tools and identification of recommended 1112 legislation, if appropriate. The Executive shall also file with the Council 1113 1114 legislation as recommended in the Report. These outcomes supersede the 1115 deliverables adopted in Motion 15539. Leads: Department of Community and Human Services, Department of Local 1116 Services, the Office of Equity and Social Justice, and the Office of Performance 1117 Strategy and Budget. Executive staff shall update and coordinate with the 1118 1119 Councilmember offices representing the area on at least a quarterly basis 1120 throughout the planning process. 1121

Action 20: Fossil Fuel Facilities Risk Bonds. As part of the 2020 Comprehensive Plan
 update, policies and regulations related to fossil fuel facilities were adopted. More work
 is needed to address the potential impacts of fossil fuels and fossil fuel facilities and
 related uses on the environment and human health. To accomplish this, this Workplan
 Action item directs:

1127 A.—Preparation of a Fossil Fuel Risk Bond evaluation, that will include, at a minimum:

- 11281:—An economic risk assessment of fossil fuel facilities and related uses, and1129climate change. The assessment shall include recommended policy language1130or development regulations that directs an update to this evaluation on a1131periodic basis when significant new information is available, and shall quantify1132the expected annualized costs to County finances, the County's economy, and1133County households over the next fifty years associated with several categories1134of risks:
- 1135a:—For fossil fuel facilities and related uses, the assessment shall address risks1136associated with catastrophic explosions of storage and transfer facilities,1137refineries, oil and gas train derailments, gas pipeline ruptures and1138explosions, fuel tanker spills and explosions, pollution of air and water,1139brownfields, and abandoned infrastructure.
- 1140b:--For climate change, the assessment shall address economic risks1141associated with changes in the frequency and severity of wildfires, floods,1142storms, drought, infestations of exotic diseases and pests, and other natural1143hazards. The assessment shall also address costs associated with the1144implementation of climate action policies and plans, as well as investing in1145adaptation measures.
- 1146 2.—An evaluation of the adequacy of existing financial assurance mechanisms in 1147 reducing the County's economic and financial risks associated with fossil fuel 1148 facilities and related uses, and climate change. Title 27A of the King County 1149 Code, "Financial Guarantees" already contains mechanisms for obtaining 1150 financial assurances before attempting potentially dangerous development 1151 activity. However, there is currently no language in Title 27A that requires 1152 financial assurances specifically for fossil fuel facilities and related uses. Such 1153 measures could include surety and performance bonds, letters of credit, third 1154 party trust funds, insurance, corporate guarantees, and others. The evaluation 1155 shall compare risk exposure for the County, with the maximum likely coverage 1156 of that risk by these mechanisms, and shall include recommendations for 1157 additional financial assurances or other measures that need to be adopted to 1158 minimize risks.
- B.—Drafting and transmittal of any necessary legislation that establishes or modifies
   Comprehensive Plan policies and development regulations, that will implement the
   recommendations of the Fossil Fuel Risk Bond evaluation.
- *Timeline:* The Fossil Fuel Risk Bond evaluation and any necessary legislation making Comprehensive Plan and/or King County Code changes shall be transmitted to the Council for consideration by June 30, 2022.
- Outcomes: The Executive shall file with the Council the Fossil Fuel Risk Bond
   evaluation and, if warranted, a proposed ordinance(s) with recommended code
   and/or policy updates.
- *Leads:* Office of Performance, Strategy and Budget, Department of Natural
   Resources and Parks, and Department of Local Services Permitting Division.
- Action 21: Greenhouse Gas Mitigation. As part of the 2020 Comprehensive Plan
   update, policies and regulations related to fossil fuel facilities and resident and business
   resiliency to climate change impacts were adopted. However, further work is necessary
   to reduce climate impacts, by mitigating the greenhouse gas emissions that drive those

1175 impacts. Policy E-215 of the Comprehensive Plan requires all projects being evaluated 1176 under the State Environmental Policy Act (SEPA) to be evaluated for greenhouse gas 1177 emissions, and also allows the County to exercise its substantive authority to mitigate for 1178 these emissions, but only after mitigation standards have been adopted by ordinance. 1179 In order to establish standards to begin mitigating emissions from development, this

1180 Workplan Action item directs:

- 1181 A.-Updating the county's greenhouse gas emissions worksheet to include best available emissions factors and other data, and to be able to evaluate emissions 1182 1183 from a wide range of project types. The worksheet shall, at a minimum, be capable 1184 of evaluating induced demand and all scope one and scope two emissions from the 1185 construction and use, as well as embodied scope three emissions from construction 1186 materials such as cement, asphalt, and steel.
- B.-Completion of a study evaluating options for implementing greenhouse gas 1187 1188 mitigation from all development projects requiring SEPA review, as allowed in 1189 Comprehensive Plan Policy E-215.
- 1190 C.-If warranted, drafting and transmittal of a proposed ordinance(s) that adopts the 1191 updated greenhouse gas worksheet and establishes or modifies Comprehensive 1192 Plan policies and development regulations to implement standards for greenhouse 1193 gas mitigation in accordance with Policy E-215.
- 1194 Timeline: The updated greenhouse gas emissions worksheet and the 1195 greenhouse gas mitigation study, and a proposed ordinance(s) making 1196 Comprehensive Plan and/or King County Code changes shall be transmitted to 1197 the Council for consideration by June 30, 2022.
- 1198 Outcomes: The Executive shall file with the Council the updated greenhouse 1199 gas worksheet, greenhouse gas mitigation study and, if warranted, a proposed 1200 ordinance(s) with recommended code and/or policy updates.
- 1201 Leads: Department of Natural Resources and Parks, and Department of Local Services - Permitting Division. 1202 1203

## 1204

Actions Related to the Growth Management Planning Council

The Growth Management Planning Council (GMPC) is a separate formal body consisting 1205 1206 of elected officials from King County, Seattle, Bellevue, other cities and towns in King County, special purpose districts, and the Port of Seattle. The GMPC developed the 1207 1208 Countywide Planning Policies, providing a countywide vision and serving as a 1209 framework for each jurisdiction to develop its own comprehensive plan, which must be 1210 consistent with the overall vision for the future of King County. The GMPC is chaired by 1211 the King County Executive; five King County Councilmembers serve as members. 1212 Recommendations from the GMPC are transmitted to the full King County Council for 1213 review and consideration. 1214

1215 The GMPC develops its own independent work program every year; this section of the 2016 Comprehensive Plan Workplan identifies issues the County will bring forward to 1216 1217 the GMPC for review, consideration and recommendations. King County will submit 1218 these Workplan items to the GMPC for consideration at its first meeting of 2017, with a goal of completing the GMPC review and recommendations by December 31, 2018. 1219 1220 The Executive will work with the Council to determine whether the amendments are 1221 appropriate for inclusion in the annual or midpoint Comprehensive Plan update prior to 1222 the next eight-year update.

1223

1224 Action GMPC-1 (Was Action 17): Develop a Countywide Plan to Move Remaining Unincorporated Urban Potential Annexation Areas Toward Annexation. The GMPC

1225 1226 has authority to propose amendments to the Countywide Planning Policies, and a 1227 unique defined role related to recommending approval or denial of Urban Growth Area 1228 expansions. In order to move remaining unincorporated areas, which vary in size and 1229 complexity, towards annexation, the GMPC would reconsider the Potential Annexation

1230 Areas map and the "Joint Planning and Annexation" section of the Countywide Planning 1231 Policies. This effort would include an evaluation of how to address Potential Annexation Areas that have been previously unsuccessful in annexation and/or where annexation 1232 1233 does not appear feasible in the near future. The report shall include review of tax 1234 revenue impacts to the County resulting from annexations, evaluation of requirements 1235 regarding annexation of roadways within Potential Annexation Areas, and identification 1236 of current orphaned roads and potential methods to transfer ownership to cities. 1237 Deadline: December 31, 2019.

1238

1239 Action GMPC-2 (Was Action 18): Review the Four-to-One Program. The County's 1240 Four-to-One Program has been very effective in implementing Growth Management Act 1241 goals to reduce sprawl and encourage retention of open space. This is done through 1242 discretionary actions by the Councy Council, following a proposal being submitted by a 1243 landowner(s) to the County. Over time, there have been proposals that vary from the 1244 existing parameters of the program; these have included possible conversion of urban 1245 zoning for lands not contiguous to the original 1994 Urban Growth Area, allowing the 1246 open space to be non-contiguous to the urban extension, use of transfer of 1247 development rights, providing increased open space credit for preserved lands with 1248 high ecological value (such as lands that could provide for high value floodplain 1249 restoration, riparian habitat, or working resource lands), and consideration of smaller 1250 parcels or parcels with multiple ownerships. Allowing these changes have the potential 1251 for increasing the use of the tool, with attendant risks and benefits. The Growth 1252 Management Planning Council would review the Four-to-One program and determine 1253 whether changes to the existing program should be implemented that will strengthen 1254 the program and improve implementation of the Comprehensive Plan, including 1255 evaluation of the proposals listed above.

1257 Action GMPC-3 (Was Action 19): As required by the Growth Management Act, King 1258 County and the 39 cities participate in the Buildable Lands Program to evaluate their 1259 capacity to accommodate forecasted growth of housing units and jobs. The program, 1260 administered by the Washington State Department of Commerce, requires certain counties to determine whether the county and its cities are achieving urban densities 1261 1262 within urban growth areas by comparing assumptions and targets regarding growth 1263 and development with actual growth and development in the county and cities. Since 1264 issuance of the first Buildable Lands Report in 2002, jurisdictions and stakeholders have 1265 expressed the potential for possible refinements of the methodology used by King 1266 County and the cities. The Growth Management Planning Council would work with 1267 stakeholders to review the methodology, including testing the accuracy of the Buildable 1268 Lands Report model and results, for potential refinements.))

1269

1256

## 1270 Action 1: Comprehensive Plan Performance Measures Framework Update

In 2017, Motion 15014 established a Performance Measures Program for the
 Comprehensive Plan. The Program is intended to monitor Comprehensive Plan
 implementation and to help inform whether plan amendments are needed to better
 achieve the plan's goals, as reflected in the Comprehensive Plan Guiding Principles. As
 established in the reporting timelines in King County Code Chapter 20.18, Program
 reporting occurs in advance of, and with the intent of informing, establishing the scope
 of work for 10-year Comprehensive Plan updates.

1279The Executive issued the first Performance Measures Report under the new program in12802022 via Report 2022-RPT0045. In developing the report, department staff indicated1281that the measures could be further refined to show a more accurate picture of plan1282performance. The approved framework also does not align with the current1283Comprehensive Plan update cycle. As required by Motion 15014, any changes to the1284performance measures framework must be approved via a motion that is passed by the1285Council.

	required by the Growth Management Act, and 3) more rigorous reporting for g element is needed. This Action will include updates to the Perform res Program:
<u>a.</u>	Address department staff-identified refinements;
<u>b.</u>	Align the reporting with the requirements in RCW 36.70A.130 for the Hore element of the Comprehensive Plan and the monitoring requirements of Countywide Planning Policies for housing data and implementation strate and
<u>C.</u>	More frequent official reporting transmitted to Council, to be not less every five years; and annual reporting on the County's website.
	erformance Measures report will also be completed in consultation oration with the Council.
<u>•</u>	<i>Deliverables:</i> The Executive should file with the Council a motion updatin Performance Measures Program Framework.
<u>•</u>	<i>Timeline:</i> The Performance Measures Program Framework Motion shoul filed with the Council by TBD. Council review, refinement, and pose approval of the Motion should be completed by TBD, to allow for complete the next Performance Measures Report that is due by TBD, to inform score for the TBD Comprehensive Plan update.
<u>•</u>	Lead Agency: Office of Performance, Strategy, and Budget.
<u>•</u>	Support Agency: Comprehensive Planning Interdepartmental Team.
<u>Plan po</u> in code Compr current	nd development regulations are guided by state law, adopted Comprehe plicies, and King County Code Chapter 20.18. The majority of the requirer a have not been amended since they were first adopted in 1998. The ehensive Plan made some code changes to align with current state law, re- practice, and provide clarity. However, additional work is needed to ensure effects and supports equitable engagement goals and outcomes.
	ble engagement process improvements were integrated into the ehensive Plan update process.
the cod there a equitat and so establis engage 20.18 commu success Work F	2024 engagement efforts were not inconsistent with the current code; how de could be strengthened to further support this work in the future. Addition are more opportunities to improve the engagement process to make it oble and more accessible to all people consistent with County's equity and cial justice values and goals, to include trusted messengers in the process, a sh performance measures to ensure accountability in achieving equi- ement. Given this, additional updates to the public participation code in Ch work are warranted. This work would be disingenuous without thougunity engagement on the changes, especially with the Equity Work Grou sor group, and communities that have been historically underrepresented. Plan action directs that work to occur outside of a major Comprehensive to allow for focused engagement on these important issues.
	to allow for focused engagement on these important issues. anges proposed are expected to lead to community engagement at a leve

1340 1341 1342	engagement requirements to be in place prior to the start of development of the 2029 midpoint update, if it is authorized.
1343 1344 1345	<u>The current docket process is unclear. This Work Plan action will include updates to the</u> <u>docket process to make it more accessible to the general public, and to make it clear</u> <u>what will happen with docketed items during midpoint and 10-year updates.</u>
1346 1347	<ul> <li><u>Deliverables: The Executive should file with the Council an ordinance updating</u> the public participation elements of King County Code Chapter 20.18.</li> </ul>
1348 1349 1350	<ul> <li><u>Timeline:</u> The ordinance should be transmitted to the Council by TBD. If there is a Comprehensive Plan midpoint update authorized at that time, the code changes should be part of the midpoint transmittal package.</li> </ul>
1351	<ul> <li>Lead Agency: Office of Performance, Strategy, and Budget.</li> </ul>
1352 1353 1354	<ul> <li><u>Support Agencies</u>: Office of Equity and Racial and Social Justice, and Department of Local Services.</li> </ul>
1355 1356 1357 1358 1359 1360 1361 1362 1363	Action 3: Mandatory Inclusionary Housing and Community Preference Review In 2022, the County adopted inclusionary housing regulations for Skyway-West Hill and North Highline, which included: (1) mandatory inclusionary housing in the commercial cores of both communities, (2) voluntary inclusionary housing in the remaining areas of those communities, and (3) a requirement for a community preference program for any inclusionary housing development. The 2024 Comprehensive Plan expanded the voluntary inclusionary housing provisions to other geographies (all of urban unincorporated King County and the Rural Towns of Vashon and Snoqualmie Pass).
1363 1364 1365 1366 1367 1368 1369 1370 1371	The 2024 Comprehensive Plan Equity Work Group, as well as other public input received during development of the 2024 plan, expressed support for also expanding the mandatory inclusionary housing and community preference provisions to some or all of the new geographies that the voluntary provisions in the 2024 changes would apply to. Additional time and resources are needed to review how or if these elements could successfully be implemented in additional communities without unintended consequences.
1372 1373 1374 1375 1376	Given this, this Work Plan action directs evaluation of whether it would be appropriate to potentially expand mandatory inclusionary housing and/or community preference regulations to the other geographies that currently have voluntary inclusionary housing, including consideration of displacement risk, market conditions, and public engagement with potentially affected communities.
1377 1378 1379	<ul> <li><u>Deliverables:</u> The Executive should file with the Council a Mandatory Inclusionary Housing and Community Preference Review report and a proposed ordinance implementing the recommendations in the report.</li> </ul>
1380 1381 1382	• <u>Timeline:</u> The Mandatory Inclusionary Housing and Community Preference Review report and ordinance, if recommended, should be filed with the Council by TBD.
1383	<ul> <li>Lead Agency: Department of Community and Human Services.</li> </ul>
1384	<u>Support Agency: Department of Local Services.</u>
1385 1386 1387 1388 1389 1390 1391	Action 4: Old Growth Corridors Strategies Mature forests with broad range of native tree species and age classes - key characteristics of what are commonly referred to as "old growth" forests - provide a wealth of ecological and social benefits including, but not limited to: healthy habitat; clean and cool water; water storage to mitigate downstream flooding, providing summer flows to rivers and streams, and supplying drinking water; wildfire resilience;
1392	diversity of flora, fauna, fungal, and microbial communities; and recreation. Old growth Implementation, Amendments and Evaluation - Page 12-29

1393 forests in western Washington are also of enormous cultural importance to sovereign 1394 Indian tribes. In addition to providing ecological, social, and cultural benefits, mature 1395 forests in the Pacific Northwest also sequester carbon and are more resilient to the 1396 effects of climate change than younger or less diverse forests. 1397 1398 The 2024 Comprehensive Plan includes policies directing King County to identify and 1399 implement strategies to protect forests in ways that build resilience and maximize social 1400 and ecological values while carefully considering any effects of changes to forestland 1401 management on the timber resource economy. The Plan directs King County to identify 1402 opportunities to establish and maintain large blocks of forest, particularly in upper 1403 watershed areas and along major river corridors given the importance of contiguous 1404 forest cover in these areas for preventing flooding, improving water quality, and 1405 protecting salmon and other wildlife habitat. 1406 1407 This work plan action directs review of scientific literature and recommendation of 1408 potential strategies and tactics to accelerate establishment of "old growth corridors" in 1409 upper watersheds and along major river corridors, especially in areas with a 1410 predominance of existing public ownership, in support of habitat for salmon and other 1411 wildlife. 1412 1413 This work should include identifying and analyzing: appropriate geographies; feasible 1414 programmatic and project actions King County has control to implement such as 1415 acquisitions, incentive programs, and regulatory changes; potential partnerships with 1416 Indian tribes as sovereign governments, public and private landowners, and land 1417 managers; carbon sequestration value; revenue impacts from changing forestry practices; and existing and potential funding sources. The work should also build on 1418 1419 and align with the Mature Forests Report being developed in accordance with Motion 1420 16437. 1421 1422 The approaches should promote establishment of a broad mix of native tree species 1423 and age classes, including eventual establishment of forests with old growth 1424 characteristics in areas prioritized as having high conservation value, and should 1425 consider the effect of conservation acquisitions on the viability of the timber resource 1426 economy in King County. 1427 Deliverables: The Executive should file with the Council an Old Growth <u>•</u> Corridors Strategies report outlining scientific findings, geographies of 1428 1429 relevance, and potential strategies for establishing old growth corridors, and 1430 the other information outlined above. 1431 • Timeline: The Old Growth Corridors Strategies report should be transmitted to 1432 the Council by TBD. 1433 Lead Agency: Department of Natural Resources and Parks. • 1434 1435 Action 5: Vashon-Maury Island Coastal Hazard Vulnerability Assessment and 1436 **Response Plan** 1437 Properties and infrastructure along the Vashon-Maury Island shoreline are potentially at risk to damage from coastal flooding, tsunamis, landslides, and sea level rise. The 1438 1439 extent to which these hazards affect specific locations will vary depending on site-1440 specific factors, including topography, the proximity of infrastructure to the shoreline, 1441 and the ability to implement adaptive measures in any given location. Existing studies 1442 have not gotten to this level of specificity for these hazards, however. This makes it 1443 difficult to determine where and what specific hazard mitigation approaches may be 1444 needed and how to sequence that work. 1445 1446 King County will conduct a detailed assessment of the Vashon-Maury Island shoreline

inclusive of public and private infrastructure and natural systems to better understand

1448 1449 1450 1451 1452 1453 1454 1455	which locations face a higher risk from coastal flooding, tsunamis, landslides, and sea level rise due to site constraints or other factors. Results from the study will inform long- range planning for these hazards and the development of additional actions, policies, development regulations, and/or zoning changes, as needed, to address these risks. These changes would be included in future updates of the Comprehensive Plan and/or King County Code.
1456 1457 1458	model for the King County shoreline being developed by the U.S. Geological Survey (due summer 2024). The County intends to apply for grant funding to complete this work.
1459	<ul> <li><u>Deliverables:</u> The Executive should file with the Council the Vashon-Maury</li></ul>
1460	Island Coastal Hazard Vulnerability Assessment and Response Plan. If policy
1461	and/or code changes are recommended by the Assessment, they should be
1462	transmitted to the Council in the next appropriate update to the
1463	Comprehensive Plan and/or the King County Code.
1464	• <u>Timeline:</u> The Vashon-Maury Island Coastal Hazard Vulnerability Assessment
1465	and Response Plan should be transmitted to the Council by TBD.
1466	<ul> <li><u>Lead Agency</u>: Department of Natural Resources and Parks.</li> </ul>
1467 1468 1469	<ul> <li><u>Support Agencies</u>: Department of Local Services, Public Health - Seattle &amp; King County, and Executive Climate Office.</li> </ul>
1470	Action 6: Wildfire Risk Assessment
1471	Large wildfires across the Pacific Northwest over the last decade, combined with recent
1472	local fires in King County and increasing concern about the impacts of climate change
1473	on wildfire potential, have contributed to a growing awareness of the need to prepare
1474	for an increased risk of wildfire in or adjacent to the wildland-urban interface (WUI).
1475 1476 1477 1478 1479 1480 1481 1482 1483 1484	The King County Executive issued the county's first Wildfire Risk Reduction Strategy in 2022 and has since been working to develop and implement the identified actions. This includes adopting a wildfire risk policy and code changes in the 2024 Comprehensive Plan. However, additional information is needed to better understand wildfire risks in unincorporated King County and whether additional regulatory measures are needed to further reduce wildfire risk. Additionally, King County partners with cities on coordinated emergency response. Where the WUI is adjacent to or crosses a border between unincorporated King County and a city, the risk is shared by both jurisdictions.
1485	This work plan action will include completing a wildfire risk assessment for
1486	unincorporated King County to better understand where and how communities and
1487	critical infrastructure are vulnerable to wildfire; the degree to which current codes and
1488	policies address the risk; and what additional actions, policy, development regulation,
1489	or zoning changes, if any, may be needed to reduce wildfire risk. Where the WUI is
1490	adjacent to or crosses a border between unincorporated King County and a city, King
1491	County should partner with the city to share approaches, incorporate local concerns,
1492	and support consistency in wildfire risk reduction. Potential additional external partners
1493	for the study include King County fire districts, the Washington State Department of
1494	Natural Resources, and utilities. The results of this work will inform future updates of the
1495	Comprehensive Plan and/or King County Code. The County intends apply for grant
1496	funding to complete this work.
1497	<ul> <li><u>Deliverable:</u> The Executive should file with the Council the Wildfire Risk</li></ul>
1498	Assessment report. If policy and/or code changes are recommended by the
1499	report, they should be transmitted to the Council in the next appropriate
1500	update to the Comprehensive Plan and/or the King County Code.

1501 Timeline: The Wildfire Risk Assessment report should be transmitted to the ٠ 1502 Council by TBD. Lead Agency: Executive Climate Office 1503 • 1504 Support Agencies: Department of Natural Resources and Parks; King County ٠ 1505 Office of Emergency Management; Department of Local Services - Permitting 1506 Division. 1507 **Action 7: Rural Economic Strategies Update** 1508 The County adopted the Rural Economic Strategies in Ordinance 17956 in 2014. 1509 1510 Ordinance 17956 built on work that had been done in 2008 and 2012. This Work Plan 1511 action directs an update to this work, to reflect that changes in the rural economy that 1512 have occurred in the last decade, including those due to COVID-19, technological 1513 changes, creation of the Department of Local Services, and more. 1514 This action will include: 1515 a. Evaluation and description of implementation of the strategies adopted in 1516 Ordinance 17956; b. Review of how the rural economy has changed since 2014, and is anticipated to 1517 1518 change in the next two decades; 1519 c. Policy changes made with the 2024 Comprehensive Plan; 1520 d. Evaluation of the existing strategies at creating a sustainable and vibrant rural 1521 economy; 1522 e. Recommendation of any changes to strategies, policies, or Code; 1523 f. Potential partners for the action include cities that serve the Rural Area, chambers of 1524 commerce, community groups, the Agriculture and Rural Forest Commissions, and 1525 the community. Community engagement, at a level of "County and Community work together," will be done as part of this action. 1526 • Deliverable: The Executive should file with the Council the Rural Economic 1527 1528 Strategies report. If policy and/or code changes are recommended by the 1529 report, they should be transmitted to the Council in the next appropriate 1530 update to the Comprehensive Plan and/or the King County Code. 1531 • Timeline: The Rural Economic Strategies report should be transmitted to the 1532 Council by TBD. 1533 Lead Agency: Department of Local Services. • 1534 Support Agency: Department of Natural Resources and Parks. • 1535 1536 **Action 8: Communication Facilities Code Update** 1537 The County regulates cellular towers and similar facilities as "minor communication facilities" under K.C.C. Title 21A. The majority of the code relating to communication 1538 1539 facilities was written more than two decades ago, with the last substantive updates 1540 occurring in 2014. In the intervening years, technology, as well as the federal regulatory landscape, have changed. Work is therefore needed to modernize the County's 1541 1542 communication facility regulations. This work should include: 1543 Review of how federal regulations, case law, and technologies for communication a. 1544 facilities have changed since the communication facility standards were initially 1545 adopted in 1998, and whether additional changes are expected in the coming two 1546 decades: 1547 b. Review of how jurisdictions within and adjacent to King County regulate

1548

communication facilities; and

1549 c. Recommendation of any changes to the County code to align the code with federal 1550 law and with best practices. 1551 1552 Deliverables: The Executive should file with the Council a Communication • 1553 Facilities Code update report containing the information described above, and, 1554 if recommended by the report, an ordinance implementing the 1555 recommendations of the report. 1556 *Timeline:* The Communication Facilities Code update report should be • 1557 transmitted to the Council by TBD. 1558 • Lead Agency: Department of Local Services. 1559 1560 **Action 9: Surface Water Management Code Update** 1561 The King County Surface Water Design Manual is adopted by public rule every five years, most recently in 2021. The 2021 update did not include updates to the County's 1562 1563 surface water management code in K.C.C. Title 9. Prior to adoption of the 2026 Surface 1564 Water Design Manual, it is necessary to update K.C.C. Title 9 to ensure consistency 1565 between the County's regulations and the Surface Water Design Manual. 1566 1567 The work should include a full review of K.C.C. Title 9 to ensure that the code reflects current requirements and terminology, and that any changes necessary to align with the 1568 1569 2026 Surface Water Design Manual update are incorporated into the code. The work 1570 should also include a review of the surface water design manual and associated code 1571 provisions in K.C.C. Title 9 for opportunities to streamline regulations to reduce 1572 unnecessary regulatory barriers and process. 1573 Deliverables: The Executive should file with the Council a proposed ordinance • 1574 updating K.C.C. Title 9 and a report detailing how the surface water design 1575 manual and code provisions were evaluated and streamlined. 1576 Timeline: The proposed ordinance and report should be transmitted to the • 1577 Council by TBD. 1578 Lead Agency: Department of Natural Resources and Parks. • 1579 1580 **Action 10: Fish Passage Restoration** 1581 In March 2024, the King County Auditor's Office released an audit of King County's Fish 1582 Passage Restoration program. The audit found that the program's sequencing of low-1583 impact projects before high-impact projects was not in alignment with the County goal 1584 of opening the best habitat as quickly as possible, and puts more impactful projects at 1585 risk if there are funding or staffing shortages later. The audit also found that the 1586 program does not consider the impact of non-county-owned barriers to fish passage 1587 when reporting the number of miles of restored habitat, thereby overstating the 1588 reported impact of the program. Work is needed to address the issues raised by the 1589 Auditor's Office. 1590 1591 This work should include: 1592 a. Development of a strategic plan clarifying the goals and objectives of the Fish 1593 Passage Restoration program, in conjunction with staff working on the Clean Water 1594 Healthy Habitat initiative, and including a plan to ensure completion of habitat-1595 focused projects if delays occur, costs increased, or funding becomes otherwise 1596 constrained and performance measures that accurately reflect program outputs and 1597 outcomes for restoring fish passage, including the impact of non-County-owned 1598 barriers on program outcomes; b. A review and update to the Fish Passage Restoration Program's ten-year work plan 1599 1600 to ensure it is aligned with County goals and with the goals of the strategic plan

1601 <u>developed in accordance with subsection a.;</u>

1602 c. An update to the program's public-facing materials to ensure that they accurately
 1603 reflect the decision-making considerations and tradeoffs involved in its workplan
 1604 development and the resulting schedule of projects.

- Deliverables: The Executive should file with the Council the strategic plan, the ten-year work plan, and a summary of the changes made to public-facing materials, along with a motion accepting the plans. If policy and/or code changes are recommended by the report, they should be transmitted to the Council in the next appropriate update to the Comprehensive Plan and/or the King County Code.
- 1611 <u>• Timeline: The deliverables should be transmitted to the Council by TBD.</u>
- 1612 <u>Lead Agency: Department of Natural Resources and Parks.</u>
- 1613 <u>• Support Agency: Department of Local Services.</u> 1614

## 1615 Action 11: Remove Barriers to Affordable Housing

1616 The policies in Chapter 4, Housing and Human Services, support investment, 1617 collaboration, and a variety of tools to address the housing needs of King County's 1618 residents. However, nearly one-third of households in King County are currently cost-1619 burdened, meaning that they pay over 30 percent of their income on housing costs. 1620 1621 Recent changes in state law have authorized the use of the Multifamily Housing Tax 1622 Exemption program in unincorporated areas. These programs allow local governments to waive property taxes for new construction, conversion, and rehabilitation of 1623 1624 multifamily residential buildings with at least four units. Changes to the State 1625 Environmental Policy Act also allowed for additional categorical exemptions for residential infill development. In addition to these opportunities, the Housing Needs 1626 1627 Assessment in Appendix B also identifies several key barriers to housing development, 1628 including:

- 1629 <u>a.</u> Increased time and risk from applying for a Conditional Use Permit,
- 1630 b. Delays and increased costs to comply with requirements related to the State
   1631 Environmental Policy Act, and
- 1632 <u>c.</u> <u>Permitting timelines and staffing challenges.</u> 1633
- 1634 <u>This Work Plan Action directs the evaluation of additional tools and strategies for</u>
   1635 <u>expediting affordable housing development in unincorporated King County, including:</u>
- 1636 <u>a.</u> <u>Allowing Multifamily Housing Tax Exemption program in unincorporated King</u>
   1637 <u>County, including an analysis of:</u>
- 1638 <u>i.</u> <u>Potential program design that would incentivize affordable units;</u>
- 1639ii.Impacts of a tax exemption, and whether that financial impact is1640sustainable;
- 1641iii.Potential program administrative needs, including monitoring, oversight,1642and reporting;
- 1643iv.Ongoing program updates to ensure sufficient incentive to maximize public1644benefits; and
- 1645 <u>v.</u> <u>Public input received during engagement on this action item.</u>
- 1646b.Reducing permitting timelines for affordable housing development, including1647consideration of:
- 1648 <u>i.</u> <u>Prioritizing affordable housing projects in permit review;</u>

1649 1650	ii. Providing dedicated permit review resources for County-funded affordable housing development applications;
1651	iii. Updating the permit application screening process;
1652 1653	iv. Making code updates to reduce barriers to affordable housing development;
1654	v. Implementing new electronic review management software;
1655	vi. Seeking additional staffing; and
1656	vii. Seeking grant funding to provide technical assistance to applicants.
1657	c. Reducing or waiving permit application and inspection fees for affordable housing;
1658	d. Developing pre-approved plans for accessory dwelling units;
1659 1660	e. Aligning the King County Code with recent changes to the State Environmental Policy Act, including the categorical exemption for housing development; and
1661 1662 1663	f. Encouraging owners of derelict and unoccupied buildings and vacant land to redevelop their property so that it does not become a health or safety concern for the neighborhood, including consideration of:
1664	i. Registering vacant foreclosure properties and commercial spaces;
1665	ii. Developing a vacant building monitoring program; and
1666 1667	<u>iii.</u> Establishing a temporary caretaker program so that buildings remain occupied until redevelopment.
1668 1669 1670	<ul> <li><u>Deliverables</u>: The Executive should file with the Council an Expediting Affordable Housing report and, if recommended, proposed ordinance(s) implementing the recommendations in the report.</li> </ul>
1671 1672	<ul> <li><u>Timeline: The Expediting Affordable Housing report and any implementing</u> ordinances should be transmitted to the Council by TBD.</li> </ul>
1673	<ul> <li><u>Lead Agency</u>: Office of Performance, Strategy, and Budget.</li> </ul>
1674 1675	<ul> <li><u>Support Agencies</u>: Department of Local Services, Department of Community and Human Services.</li> </ul>
1676 1677 1678 1679 1680 1681 1682 1683 1684 1685 1686 1687 1688	Action 12: Short-term Rental Regulations Short-term rentals are regulated by Chapter 64.37 RCW and are defined as a lodging use that is not a hotel or motel or bed and breakfast, in which a dwelling unit, or portion thereof, is offered or provided to a guest by a short-term rental operator for a fee for fewer than thirty consecutive nights. Short-term rental operators may need a business license through the Department of Revenue and are required to pay retail sales tax and B&O tax on rental charges, as well as lodging and convention and trade center taxes, as applicable. Additionally, state law outlines various consumer safety provisions, requires short-term rental platforms to be registered with the state, and requires liability insurance of at least \$1 million to be held either by the operator or the rental platform.
1689 1690 1691	regulations identified in state law. This Work Plan Action directs King County to explore whether to adopt regulations
1692 1693	beyond state law regulating the short-term lodging tax industry. The report should include:
1694 1695	a. An analysis of how other jurisdictions in the state are regulating the short-term lodging industry;

1696 1697 1698	re	recommended regulatory framework, including any additional licensing equirements, unit count restrictions, owner occupation requirements, or any other ecommended provisions;
1699 1700		otential program administrative needs, including monitoring, oversight, and eporting;
1701 1702		n estimate on the impacts of the proposed regulations on the County's short-term odging tax collection; and
1703	<u>e.</u> P	ublic input received during engagement on this action item.
1704 1705 1706	<u>•</u>	<u>Deliverables: The Executive should file with the Council a Short-term Rental</u> Regulations report and a proposed ordinance implementing the recommendations in the report.
1707 1708	<u>•</u>	<i>Timeline</i> : The Short-term Rental Regulations report and ordinance, if recommended, should be filed with the Council by TBD.
1709	<u>•</u>	Lead Agency: Department of Local Services.
1710	<u>•</u>	Support Agency: Office of Performance, Strategy, and Budget.
1711 1712 1713	<u>Actio</u>	n 13: Vashon-Maury Island Groundwater Protection Special District Overlay
1713 1714 1715 1716 1717 1718 1719 1720 1721 1722 1723 1724 1725 1726 1727 1728 1729 1730 1731 1732 1733 1734	SO-14 have increat groun creati which conta analys incon review restric No ch 2024 incluc	<ul> <li>Vashon-Maury Island Groundwater Protection Special District Overlay, known as 40 and codified in K.C.C. 21A.38.150, was adopted in 1997 to limit land uses that the potential to severely contaminate groundwater supplies and to provide ased areas of permeable surface to allow for infiltration of surface water into ad resources, in light of Vashon-Maury Island's sensitive aquifer. Since the overlay's on, King County adopted the critical aquifer recharge area (CARA) code in 2005, includes regulations for areas that have a high susceptibility to ground water mination. The entirety of the island is governed by this code. A comparative sis of the overlay with K.C.C. Title 21A found several overlapping regulations and sistencies in the mapping of risk levels to groundwater resources. Furthermore, a v of Best Management Practices found limited risk potential in many of the uses ted by the overlay.</li> </ul>
1735 1736 1737	<u>•</u>	<u>Timeline: Vashon-Maury Island Groundwater Protection Special District Overlay</u> report and ordinance, if recommended, should be filed with the Council by <u>TBD.</u>

1739	<u>•</u>	Support Agency: Department of Natural Resources and Parks.
1740 1741 1742 1743 1744 1745	<u>Grour</u> <u>Vashc</u> repler	<b>n 14: Vashon-Maury Island Water Systems Comprehensive Analysis Report</b> adwater quality and supply is one of the most important factors in planning for on-Maury Island. With a sole source aquifer that relies exclusively on rainwater to hish reserves, and provides nearly all drinking water for the island, Vashon-Maury I is one of four areas in unincorporated King County declared a Critical Water

1746 1747 1748 1749 1750 1751	Supply Area, a designation that triggers additional review and regulation by both King County and the Washington State Department of Ecology. The island is served by 23 Group A water purveyors, as well as over 130 smaller, privately managed Group B systems and over 1,000 private, exempt wells. King County Water District 19 is the largest purveyor on the island and encompasses the Vashon Rural Town.
1752 1753 1754 1755 1756	To better plan for the long-term resiliency of Vashon-Maury Island's water resources and ensure equitable access to water resources, the County should undertake a comprehensive analysis of water systems on Vashon-Maury Island, in partnership with the Island's water districts and groundwater protection committee. The study should include, but not be limited to:
1757 1758 1759 1760	a. Analysis of the anticipated impacts of climate change on Vashon-Maury Island's water supply, and actions that can be taken in the short- and long-term to increase the resilience of water systems to anticipated impacts and to mitigate associated risks to public health and safety;
1761 1762	b. Actions that can be taken to further encourage the use of greywater systems on the island and remove barriers to installation of such systems;
1763 1764	c. Analysis, using the best available scientific techniques, of whether there is sufficient groundwater capacity to support creation of additional water shares; and
1765 1766 1767	d. Methods to prioritize any additional water shares for culturally welcoming affordable housing.
1768 1769 1770	<ul> <li><u>Deliverables: The Executive should file with the Council a Vashon-Maury Island</u> Water Systems Comprehensive Analysis report and any recommended policy and code changes.</li> </ul>
1771 1772 1773	• <u>Timeline: Vashon-Maury Island Vashon-Maury Island Water Systems</u> <u>Comprehensive Analysis report and ordinance, if recommended, should be</u> <u>filed with the Council by TBD.</u>

1776	

# 1777 ((<del>∀II.</del>))<u>VI.</u> Incentives

1778 To ensure that the vision, goals, objectives, and policies of ((this)) the Comprehensive 1779 Plan become a reality, it will require adjusting policy and budget priorities by King 1780 County government. It will require individuals to reconsider their daily decisions and 1781 choices relating to the management or development of their lands. The decisions and 1782 choices of large scale public/private partnerships during the development of major projects will be critical factors contributing to the effective implementation of ((this)) the 1783 Comprehensive Plan. Incentives, ((like)) such as the Transfer of Development Rights 1784 1785 Program, must encourage the types of growth and development patterns desired by 1786 King County and its residents.

1788	(( <del>I-601</del> )) <u>I-401</u> King County should develop incentives for the Urban Growth Area
1789	that encourage the development industry to provide a broad range of
1790	housing <u>affordable to all income levels</u> and (( <del>business</del> )) <u>commercial</u>
1791	space, including areas of the county with the most disparate outcomes
1792	in health, economic prosperity, and housing conditions, where
1793	residents may be at high risk of displacement. Incentives could
1794	include:
1795	a. (( <del>Identification of geographic areas with infill opportunities,</del>
1796	granting budget priority status and allowing more flexible
1797	development standards;
1798	b. Density bonuses for site designs which provide public benefits (for
1799	example, grid roads that connect with other developments and
1800	limit impacts on arterials);
1801	<ul> <li>Incentives which lower financial development risk;</li> </ul>
1802	<del>d.</del> )) <u>Density bonuses and/or other regulatory flexibilities for</u>
1803	inclusionary housing;
1804	<u>b.</u> Joint development opportunities at (( <del>c</del> )) <u>C</u> ounty-owned or operated
1805	facilities, utilization of air rights on (( <del>c</del> )) <u>C</u> ounty-owned or operated
1806	facilities, and the establishment of transit-supportive design
1807	guidelines <u>and regulations</u> ; and
1808	(( <del>e</del> .)) <u>c.</u> County (( <del>capital improvement</del> )) funding for public urban amenities <u>,</u>
1809	including transportation, parks, open space, cultural <u>,</u> and other
1810	facilities, for cities participating in the King County Transfer of
1811	Development Rights Program.

#### Α 9

#### 10 Active Recreation ((Site))

Active recreation ((sites recognize a higher level of public use and will require 11 12 developed areas for organized or intense recreation. An active recreation site includes 13 both the active recreation uses and all necessary support services and facilities.)) refers 14 to sites characterized by organized, scheduled activities, and/or a variety of recreation 15 uses, such as highly developed athletic field complexes with lights and extensive 16 support facilities. 17 18 **Active Transportation** 19 Active transportation means pedestrian, bicycle, and equestrian travel and also includes, but is not limited to, the use of wheelchairs and personal assistive mobility 20 21 devices powered by electricity that are used by persons with physical impairments, 22 skateboards and scooters, and micromobility devices such as motorized foot scooters and electric assisted bicycles. Any moped, motorcycle, or, except as otherwise 23 24 provided for in this definition, personal assistive mobility device, are considered 25 motorized transportation.

26

#### 27 **Adaptive management**

28 Adaptive management ((<del>is a systematic approach for continually improving</del> 29 management policies and practices by learning from the outcomes of operational 30 programs)) means modifying management actions based on ongoing monitoring and 31 data analysis.

32

#### 33 **Agricultural activities**

34 ((Agricultural activities means agricultural uses and practices including, but not limited 35 to: producing, breeding, or increasing agricultural products; rotating and changing 36 agricultural crops; allowing land used for agricultural activities to lie fallow in which it is 37 plowed and tilled but left unseeded; allowing land used for agricultural activities to lie 38 dormant as a result of adverse agricultural market conditions; allowing land used for 39 agricultural activities to lie dormant because the land is enrolled in a local, state, or 40 federal conservation program, or the land is subject to a conservation easement; 41 conducting agricultural operations; maintaining, repairing, and replacing agricultural 42 equipment; maintaining, repairing, and replacing agricultural facilities, provided that 43 the replacement facility is no closer to the shoreline than the original facility; and 44 maintaining agricultural lands under production or cultivation.)) Except for the purposes of Chapter 6, Shorelines, agricultural activities means those agricultural uses and 45 practices that pertain directly to the commercial production of agricultural products, 46 47 including, but not limited to:

- 48 a. Tilling, discing, planting, seeding, fertilization, composting, and other soil 49 amendments and harvesting; 50 b. Grazing, animal mortality management, and on-site animal waste storage, 51 disposal, and processing; 52 c. Soil conservation practices including dust control, rotating and changing 53 agricultural crops, and allowing agricultural lands to lie fallow under local, 54 state or federal conservation programs; 55 d. Maintenance of farm and stock ponds, agricultural drainage, irrigation systems canals and flood control facilities; 56 e. Normal maintenance, operation and repair of existing serviceable 57 58 equipment, structures, facilities or improved areas, including, but not 59 limited to, fencing, farm access roads and parking; and 60 Processing, promotion, sale, storage, packaging and distribution.
- 61 (See Chapter 6, Shorelines, for agricultural activities in the shoreline jurisdiction.)
- 62 63

#### Agricultural Production Districts ((<del>(APD)</del>))

64 The Growth Management Act requires cities and counties to designate, where 65 appropriate, agricultural lands that are not characterized by urban growth and that have long-term significance for the commercial production of food or other agricultural 66 products. The comprehensive plan designates Agricultural Production Districts ((where 67 68 the principal land use should be agriculture)) in accordance with this requirement. 69 ((Lands within Agricultural Production Districts should remain in parcels large enough 70 for commercial agriculture.)) (See Chapter 3((:)), Rural Area((:)) and Natural Resource 71 Lands.)

72

### 73 Agricultural products

74 Agricultural products include, but are not limited to: horticultural, viticultural, 75 floricultural, ((<del>vegetable, fruit, berry, grain, hops, hay, straw, turf, sod, seed,</del>)) and apiary 76 products; livestock, livestock products, and other animal products including, but not 77 limited to, upland finfish, dairy products, meat, poultry, and eggs; feed or forage for 78 livestock; Christmas trees; and hybrid cottonwood and similar hardwood trees grown as 79 crops and harvested within ((twenty)) 20 years of planting; ((and livestock, including 80 both the animals themselves and animal products including, but not limited to, meat, 81 upland finfish, poultry and poultry products, and dairy products.)) 82

#### 83 Annexation

84 Annexation is the process of adding or incorporating an area into a city's jurisdiction. 85

#### Applicant

An applicant is a property owner, a public agency or a public or private utility that owns a right-of-way or other easement or has been adjudicated the right to such an easement under Revised Code of Washington 8.08.040, or any person or entity designated or named in writing by the property or easement owner to be the applicant, in an application for a development proposal, permit, or approval.

92 93

86

#### Area Median Income

Area median income is the midpoint income for King County, where half of the
 households earn more than the median, and half of the households earn less, as
 established by the United States Department of Housing and Urban Development
 adjusted for household size.

98

#### 99 Area Zoning and Land Use Study

An area zoning and land use study is a study that reviews the land use designations and zoning classifications for a specified set of properties. Area zoning and land use studies are <u>typically</u> focused on a ((broader set of policies than a subarea study)) <u>specific set of</u> <u>possible land use and zoning changes</u>, and do not look at the larger range of issues that

a subarea plan would include. Area zoning and land use studies consider specific potential changes to land use or zoning, or both, and analyze such requests based on surrounding land use and zoning, current infrastructure and potential future needs, and consistency with the King County Comprehensive Plan, ((c))<u>C</u>ountywide ((p))<u>P</u>lanning ((p))<u>P</u>olicies, and the ((q))<u>G</u>rowth ((m))<u>M</u>anagement ((a))<u>A</u>ct.

#### 110 Arterial Functional Classification

111 Arterial functional classification is the ((division of a road system into a number of 112 categories according to the function of each road)) categorization of roadways based on 113 their function. The degree to which ((the)) a road serves movement of traffic or access 114 to adjacent properties is the basis for its classification. Principal arterials provide for 115 movement across large areas, serving predominantly "through traffic." Minor arterials 116 generally serve smaller areas than principal arterials and provide ((movement)) greater 117 access to abutting properties ((and to arterials within large areas bound by principal 118 arterials)). Collector arterials serve smaller areas by "collecting" traffic ((to or)) from local 119 roads and abutting properties and funneling it to ((and from)) the ((transportation 120 system)) arterial network.

#### 122 Asset Poverty

Asset poverty is a socioeconomic condition that describes a person or household's lack of wealth-building property, possessions, or financial holdings. It is a broader concept than poverty, which is traditionally defined based on income or wages, and can measure

- 126 or describe stability or precarity amid unexpected life events.
- 127

121

109

### 128 **B**

#### 129 Biodiversity

Biodiversity, or biological diversity, is the variety of living organisms considered at all
levels, from genetic diversity through species, to higher taxonomic levels, and includes
the variety of habitats, ecosystems, and landscapes in which the species are found.

# 133134 Brownfields

Brownfields are defined as vacant or underdeveloped industrial/commercial sites withreal or perceived contamination.

#### 138 Buffer

A buffer<u>, when referring to critical areas</u>, is a designated area <u>adjacent and</u> contiguous to a ((steep slope or landslide hazard area intended to protect slope stability, attenuation of surface water flows and landslide hazards, or a designated area contiguous to and)) <u>critical area that is</u> intended to protect ((and be an integral part of an aquatic area or wetland)) the functions and values of the critical area and reduce impacts from adjacent land uses.

145

137

146 **C** 

#### 147 Capital Improvement Program ((<del>(CIP)</del>))

The ((A))adopted Capital Improvement Program budget allocates funds from various revenue sources to improve cultural and recreational opportunities for King County residents, build needed transportation facilities, protect the County's investment in existing buildings, protect the health of residents, enhance the management of natural resources, and provide necessary capital resources for the law, safety, and ((justice)) criminal legal system.

154

#### 155 ((Channel migration hazard area, moderate

Glossary- Page G-2

- 156 A portion of the channel migration zone, as shown on King County's Channel Migration
- 157 Zone maps, which lies between the severe channel migration hazard area and the outer
   158 boundaries of the channel migration zone.
- 159

#### 160 Channel migration hazard area, severe

A portion of the channel migration zone, as shown on King County's Channel Migration
 Zone maps, which includes the present channel. The total width of the severe channel
 migration hazard area equals one hundred years times the average annual channel
 migration rate, plus the present channel width. The average annual channel migration
 rate as determined in the technical report is the basis for each Channel Migration Zone
 map.))

167

#### 168 Channel Migration Zone

169 Channel migration zones are those areas along a river channel within which the 170 channel(((s))) can be reasonably predicted, based on best available science, to migrate 171 over time as a result of natural and normally occurring hydrological and related 172 processes when considered with the characteristics of the river and its surroundings. In 173 areas located in King County's shoreline jurisdiction, the channel migration zone 174 includes areas shown on King County's Channel Migration zone maps, including both 175 the severe channel migration hazard area and the moderate channel migration hazard 176 area, and areas not shown on King County's Channel Migration Zone maps but located 177 within the floodplain. 178

#### 179 Circular Economy

<u>Circular economy means a system that keeps products and materials in a cycle of use for</u>
 <u>as long as possible, thereby lessening the need to extract virgin materials, like trees,</u>
 <u>metals, and oil, from the earth.</u> Actions that promote a circular economy include
 <u>recycling, reusing, repairing, and reducing.</u>

184

### 185 <u>Cities</u>

186 For the purposes of the Comprehensive Plan, the term "cities" includes incorporated
 187 towns.

188

#### 189 Cities in the Rural Area

((King County's)) Cities in the Rural Area are incorporated areas ((within)) substantively
 surrounded by the Rural Area, and whose local governments are involved in the
 region's planning processes on an equal legal basis with ((the suburban cities)) Seattle,
 Bellevue, and the other King County cities ((Seattle)). The ((incorporated)) Cities in the
 Rural Area are Black Diamond, Carnation, Duvall, Enumclaw, North Bend, Skykomish,
 and Snoqualmie. (See Chapter 3((:)), Rural Area((:)) and Natural Resource Lands)

#### 197 Clearing

198 Clearing includes cutting, killing, grubbing, or removing vegetation or other organic 199 plant material by physical, mechanical, chemical, or any other similar means. For the 200 purpose of this definition ((<del>of clearing</del>)), cutting means the severing of the main trunk or 201 stem of woody vegetation at any point. 202

#### 203 Clustering

Clustering means ((developing)) development of a subdivision at the existing zoned density that reduces the size of individual lots ((areas to)) and creates permanent open space for the preservation of critical areas or ((a reserve for future development while it maintains the zoned residential density)) resource land for forestry or agriculture.

#### 209 Community Business Centers

- 210 These are primarily retail developments designed to serve a nearby market area of
- 211 15,000 to 40,000 people. (See Chapter 2((:)), Urban Communities.)
- 212

#### 213 **Community-Driven Development**

214	<u>Community-driven development includes equitable development actions that advance</u>
215	the following principles:
216	a. advances economic mobility and opportunity for residents;
217	b. prevents displacement;

- 218
  - builds upon and protects local cultural assets that anchor communities;
- 219 d. supports organizational capacity building; 220
  - e. promotes transportation mobility and connectivity; and
- 221 f. enables equitable access for all communities.

#### 222 223 Community Service Areas (((CSA)))

224 Community Services Areas refers to the geographic framework that organizes the unincorporated areas of King County into seven territories for the purposes of the 225 226 Community Service Area Program. (See Chapter 11, Community Service Area Subarea 227 Planning.)

228

#### 229 **Community Service Areas Program**

230 The ((<del>CSA</del>)) Community Service Areas Program is housed in the Department of ((<del>Natural</del> 231 Resources and Parks)) Local Services. This program promotes robust public engagement that informs, involves, and empowers people and communities in 232 233 unincorporated ((urban areas and in the Rural Area and Natural Resource Lands of)) 234 King County to take an active role in County decision-making related to programs, 235 services, and capital projects within each Community Service Area. 236

#### 237 ((Community Service Area Subarea Plan

238 With King County's initiation of the subarea planning program, the new plans will be called Community Service Area Subarea Plans. These will apply the countywide goals of 239 240 the Comprehensive Plan to smaller geographic areas. Each one of King County's six 241 rural CSAs and each of the five large Potential Annexation Areas has or is scheduled to 242 have its own CSA Subarea Plan. CSA Subarea Plans focus on land use issues in the 243 smaller geographies, as well as community identified implementation activities while 244 recognizing the parameters of County funding and revenue sources. These plans 245 implement and are consistent with the Comprehensive Plan's policies and development 246 regulations.))

#### 248 **Comprehensive Plan**

249 The ((state of Washington's)) Growth Management Act requires certain cities and 250 counties of the state to adopt comprehensive land use plans. A comprehensive plan is 251 a generalized, coordinated land use policy statement of the governing body of a county 252 or city that is adopted pursuant to the Growth Management Act. A comprehensive plan 253 consists of a map or maps; descriptive text covering objectives, principles, and 254 standards used to develop the comprehensive plan; and a plan, scheme, or design for 255 land use, housing, capital facilities, utilities, the rural area((s)), natural resource lands, 256 and transportation. Optional components include elements relating to conservation, 257 solar energy, recreation, and subarea plans.

258

247

#### 259 ((Concurrency Management System

260 The Growth Management Act requires jurisdictions to adopt and enforce ordinances 261 that prohibit development approval if the development causes the level of service on a 262 transportation facility to decline below the standards adopted in the comprehensive 263 plan, unless transportation improvements or strategies to accommodate the impacts of 264 development are made "concurrent" with the development. Concurrent with 265 development means that transportation improvements or strategies are in place at the time of development or that financial commitment is made to complete the 266 267 improvements or strategies within six years. The Concurrency Management System of 268 King County establishes a process to manage new development based on

269 transportation impacts on levels of service and the concurrency of needed 270 improvements or actions. (See Chapter 8: Transportation).))

# 271272 Congestion Pricing

273 Congestion pricing is a strategy to manage traffic congestion by charging drivers a fee
 274 for using designated lanes or roadways during congested periods. Congestion pricing
 275 encourages drivers to use other modes of transportation, other routes, or other travel
 276 times. By removing a fraction of vehicles from the roadway during peak travel times, the
 277 transportation system operates more efficiently.

#### 279 Coordinated Water System Plans

Four Critical Water Supply Service Areas have been designated in King County in accordance with the Public Water System Coordinated Act of 1977 (((t))Chapter ((70.116)) 70A.100 Revised Code of Washington): East King County, Skyway, South King County, and Vashon Island. The Coordinated Water System Plan for each area provides an assessment of water supply and a program to meet future demand. Planning areas, within which a water purveyor is obligated to provide service consistent with ((t))County land use plans and regulations, were assigned for major purveyors.

287

278

#### 288 Countywide Planning Policies (((CPP)))

289 ((The Growth Management Act requires that counties, as regional governments within 290 their boundaries, prepare countywide planning policies which establish a countywide 291 framework from which county and city comprehensive plans are to be developed and 292 adopted. This framework is to ensure that city and county comprehensive plans are 293 consistent. The King County Countywide Planning Policies were developed and 294 recommended by the Growth Management Planning Council and are to serve as a 295 blueprint for how King County and its cities should grow over the next 20 years. The 296 Metropolitan King County Council adopted these policies in 1992. Since this time, amendments called "Phase II Countywide Planning Policies" have been made to the 297 298 sections pertaining to affordable housing, economic development and rural character. The County Council has adopted these Phase II amendments.)) The Countywide 299 300 Planning Policies create a shared and consistent framework for growth management 301 planning for all jurisdictions in King County in accordance with RCW 36.70A.210, which 302 requires the legislative authority of a county to adopt a countywide planning policy in 303 cooperation with cities located in the county. The comprehensive plan for King County 304 and the comprehensive plans for cities and towns in King County are developed from 305 the framework that the Countywide Planning Policies establish. The Growth Management Planning Council is the formal body charged with developing the 306 307 Countywide Planning Policies. (See Chapter 1((-)), Regional Growth Management 308 Planning.)

#### 310 Creative Economy

# 311 <u>Creative economy means industries, artists, educators, entrepreneurs, vendors,</u> 312 <u>policymakers, and funders that produce and distribute creativity- and artistic-based</u> 313 <u>goods and services.</u>

314

309

#### 315 Critical Areas

316 ((The Growth Management Act requires cities and counties to designate, where 317 appropriate, critical areas which include: 1) wetlands, 2) areas with a critical recharging 318 effect on aquifers used for potable water, 3) fish and wildlife habitat conservation areas, 319 4) frequently flooded areas, and 5) geologically hazardous areas.)) Any area that is 320 subject to natural hazards or a land feature that supports unique, fragile, or valuable natural resources including fish, wildlife, or other organisms or their habitats or such 321 322 resources that carry, hold, or purify water in their natural state. "Critical area" includes 323 the following areas: 324 a. Critical aquifer recharge areas;

325 <u>b. Frequently flooded areas, regulated as Flood Hazard Areas;</u>

326	<u>1. Floodplain;</u>
327	2. Special flood hazard area, as shown on the Flood Insurance Rate Maps;
328	<u>3. Zero-rise flood fringe;</u>
329	<u>4. Zero-rise floodway;</u>
330	5. FEMA floodway; and
331	<u>6. Channel migration zones;</u>
332	c. Fish and wildlife habitat conversation areas:
333	<u>1. Aquatic areas;</u>
334	<u>2. Riparian areas;</u>
335	3. Wildlife habitat conservation areas; and
336	<ol> <li>Wildlife habitat networks;</li> </ol>
337	d. Geologically hazardous areas:
338	<u>1. Alluvial fan hazard areas;</u>
339	2. Channel migration zones;
340	<u>3. Coal mine hazard areas;</u>
341	<u>4. Erosion hazard areas;</u>
342	5. Landslide hazard areas;
343	<u>6. Seismic hazard areas;</u>
344	7. Steep slope hazard areas;
345	8. Tsunami hazard area; and
346	9. Volcanic hazard areas; and
347	<u>e. Wetlands.</u>
348	
349	Critical Habitat

350 Critical habitat includes specific areas that possess physical or biological features, which 351 are essential to the conservation of a listed species.

#### Cultural Resources

Cultural resources include performing and visual arts events, programs, and facilities; public art; heritage events, programs, and facilities; <u>Indian tribal celebrations and</u> cultural events; and historic properties.

#### 358 Cumulative ((i))Impacts

Cumulative impacts, for the purposes of Chapter 6, Shorelines, are the sum total of the current, plus any reasonably foreseeable future, disturbances to ecological functions, which can be impacted by both development subject to shoreline permits and by development that is not subject to permits.

363

352

353

357

364

#### 365 ((<del>Deficiency</del>

D

366 Deficiency in a comprehensive plan or development regulation refers to the absence of
 367 required or potentially desirable contents of a comprehensive plan or development
 368 regulation.))

#### 370 Debris Flow

371 Debris flow means a moving mass of rock fragments, soil, and mud, with more than half
 372 of the particles being larger than sand size.

### 373374 Density

375 Density is the quantity of structures or buildings per unit area. Density is typically 376 expressed as housing units per acre or square mile.

377

369

#### 378 **Density Incentives/Bonuses**

Density incentives, or density bonuses, are programs that allow more dwelling units than the number permitted on a site by zoning (sometimes referred to as "base density") in exchange for public benefits provided by the developer. ((<del>King County has</del> <del>incorporated use of density incentives with standard urban subdivision, mobile home</del> <del>park, and multifamily development projects. (King County Code, Title 21A)</del>))

384

#### 385 Development

For purposes of the shoreline master program, development means a use consisting of the construction or exterior alteration of structures; dredging; drilling; dumping; filling; removing sand, gravel, or minerals; bulkheading; driving of piling; placing of obstructions; or any project of a permanent or temporary nature which interferes with the normal public use of the surface of the waters overlying lands subject to any state of water level.

392

#### 393 **Development regulations**

Development regulations means the controls placed on development or land uses by a county or city, including, but not limited to: zoning ordinances, critical areas ordinances, all portions of a shoreline master program other than goals and policies approved or adopted under ((<del>c</del>))<u>C</u>hapter 90.58 <u>Revised</u> <u>Code of</u> <u>Washington</u>, planned unit development ordinances, subdivision ordinances, and binding site plan ordinances together with any amendments thereto.

400

#### 401 Displacement

Displacement means the involuntary relocation of current residents or businesses from 402 403 their current or previous home, neighborhood, or community. This is a different phenomenon than when property owners voluntarily sell their interests to capture an 404 increase in value. Physical displacement is the result of eviction, acquisition, 405 rehabilitation, or demolition of property, or the expiration of covenants on rent- or 406 407 income-restricted housing. Economic displacement occurs when residents and 408 businesses can no longer afford escalating costs. Cultural or ethnic displacement occurs 409 when people choose to move because their neighbors and culturally related businesses 410 have left the area. 411

#### 412 **Docket**

A list of suggested changes to a comprehensive plan or development regulations
maintained by the department.

#### 416 Docket Process, The

417 The docket process specifies that dockets are not just to note deficiencies, but also to 418 suggest changes and make written comments. These suggested changes are reviewed 419 by the ((c))C ounty and made available for review by the public. Information provided to 420 the public ((will)) includes the ((c))C ounty's response. ((An Internet docket process is 421 available and can be found at:

- 422 http://www.kingcounty.gov/depts/executive/performance-strategy-budget/regional-
- 423 planning/king-county-comprehensive-plan/amend/docket.aspx.
- 424
- 425 Docketing

426 Docketing means compiling and maintaining a list of suggested changes to the
 427 comprehensive plan or development regulations in a manner that will ensure such
 428 suggested changes will be considered by the county and will be available for review by
 429 the public.))

# 430431 Drainage Basin

A drainage basin, like a watershed, is an area that drains to a common outlet or an identifiable water body such as a river, stream, lake, or wetland. In King County, 72 drainage basins are contained within six major watersheds. These drainage basins in turn contain numerous individual water bodies with small drainages.

Glossary- Page G-7

### 436

#### 437 ((<del>Dredging</del>

438 Dredging is the removal, displacement, or disposal of unconsolidated earth material
 439 such as sand, silt, gravel, or other submerged materials, from the bottom of water
 440 bodies, ditches, or natural wetlands. Maintenance dredging and/or support activities
 441 are included in this definition.))

# 442443 **Dwelling unit**

A dwelling unit consists of one or more rooms designed for occupancy by a person or household for living and sleeping purposes, containing kitchen facilities and rooms with internal accessibility, for use solely by the dwelling's occupants. Dwelling units include ((but are not limited to efficiency and)) studio apartments, factory-built housing, and manufactured and mobile homes.

450 **E** 

#### 451 **Ecological Function**

An ecological function refers to physical, chemical, and biological processes or
attributes at some level of biological organization. For example, the ecological
functions of wetlands include food chain support, water quality maintenance, flood
storage, and wildlife habitat.

#### 457 Ecoregions

458 Ecoregions are land areas that contain a geographically unique set of species, 459 communities, and environmental conditions.

#### 461 Ecosystem

460

464

462 Ecosystem means the complex of a community of organisms and its environment 463 functioning as an ecological unit.

#### 465 Ecosystem-wide processes

Ecosystem-wide processes means the suite of naturally occurring physical and geologic
processes of erosion, transport, and deposition; and specific chemical processes that
shape landforms within a specific shoreline ecosystem and determine both the types of
habitat and the associated ecological functions.

#### 470 471 ((<del>Emissions Trading</del>

472 Emissions trading means the transfer in ownership of emission reductions. Emission
473 trading occurs when a source of air pollution reduces its emissions and then transfers
474 ownership of the emission reduction to another party. Markets for emission reductions
475 can be created by regulation (the market for sulfur dioxide allowances for example) or
476 voluntarily (the current market for greenhouse gases).))

477

#### 478 Endangered Species

479 Endangered species means any species which is in danger of extinction throughout all
480 or a significant portion of its range and which has been designated as such in
481 regulations issued by the U.S. Fish and Wildlife Service or the state of Washington
482 Department of Fish and Wildlife.

483

#### 484 Endangered Species Act ((<del>(ESA)</del>))

The Endangered Species Act is an act that was adopted by the U.S. Congress in 1973 to provide a means to conserve ecosystems upon which endangered and threatened species depend and to provide a program for the conservation for such endangered and threatened species.

489

#### 490 ((Endemic Species

491 Endemic species (or habitats or ecosystems) are those that are native to, and occur only
 492 in, a particular area or locale. Endemic species generally have very specific adaptive
 493 requirements that are linked to particular habitat or ecosystems that are rare (e.g.,
 494 Townsend's big-eared bats and caves). Even small changes in the ecosystem are likely
 495 to cause localized extinctions of these species.))

#### 497 Enhancement

498 <u>For the purposes of critical area regulations, ((<del>E</del>))<u>e</u>nhance<u>ment</u> means ((<del>to increase or</del>))
 499 <u>an action that</u> improve<u>s</u> ((<del>one or more of the functions, attributes, or values that an ecosystem or environmental feature possesses</del>)) the processes, structures, and functions
 501 <u>of ecosystems and habitats associated with critical areas or their buffers</u>. (See Chapter 502 50(<del>;</del>)), Environment).
</u>

503 504

496

#### ((Environmentally Sensitive Areas

505 Environmentally sensitive areas include: coal mines; areas that are prone to erosion, 506 floods, landslides, or seismic activity; steep slopes; volcanic hazard areas; and streams, 507 wetlands and protection buffers.))

508

#### 509 Equitable Development

510 Equitable development refers to public and private investments, programs, and policies 511 in communities characterized by high levels of chronic and recent displacement, a 512 history of racially driven underinvestment, and populations impacted by structural 513 racism and discrimination. This work is conducted in partnership with community 514 members to meet the needs of the community and reduce disparities, taking into account history and current conditions, so that quality-of-life outcomes such as access to 515 guality education, living-wage employment, healthy environment, affordable housing, 516 517 and transportation are equitably distributed for the people currently living and working 518 there, as well as for new people moving into the community. 519

#### 520 Equitable Neighborhood

521 An equitable neighborhood is a neighborhood where people are healthy, safe, 522 culturally connected, and can access resources to meet their needs. All members of the 523 community, regardless of background, race, ethnicity, socioeconomic status, gender, or 524 abilities, can thrive in equitable neighborhoods, engage with local decisionmakers to 525 inform how their community is served, and access opportunities such as affordable 526 housing or homeownership, healthcare, education, and employment. 527

#### Equity Impact Review

529 <u>An equity impact review is a process to identify, evaluate, and communicate the</u> 530 <u>potential impact - both positive and negative - of a policy or program on equity using</u> 531 tools from the King County Office of Equity and Racial and Social Justice.

532

528

533 **F** 

#### 534 ((Fair Housing Ordinance

535 King County's Fair Housing Ordinance prohibits housing discrimination on the basis of
 536 race, color, religion, national origin, age, sex, marital status, parental status, use of
 537 Section 8 subsidy, sexual orientation, disability or the use of a trained guide dog.
 538

#### 539 Family-Wage Jobs

Family-wage jobs are jobs that pay more than the average annual wage for King County
 in a given year and therefore enable a worker to support a family.)

542 543 **Feasible** 

544 Feasible means, for the purpose of ((this)) the Shoreline Master ((p))Program, that an 545 action, such as a development project, mitigation, or preservation requirement, meets 546 all of the following conditions:

- 547(((a))) a. The action can be accomplished with technologies and methods that548have been used in the past in similar circumstances, or studies or tests have549demonstrated in similar circumstances that such approaches are currently550available and likely to achieve the intended results;
- 551 ((<del>(b)</del>)) <u>b.</u> The action provides a reasonable likelihood of achieving its intended 552 purpose; and
- 553 (((<del>(c)</del>)) <u>c.</u> The action does not physically preclude achieving the project's 554 primary intended legal use.

In cases where these guidelines require certain actions unless they are infeasible, the burden of proving infeasibility is on the applicant. In determining an action's infeasibility, the reviewing agency may weigh the action's relative public costs and public benefits, considered in the short- and long-term ((time frames)) timeframes.

#### 560 **FEMA floodway**

561 A FEMA (Federal Emergency Management Agency) floodway is the channel of the 562 stream ((and that portion of the adjoining floodplain that is necessary to contain and 563 discharge the 100-year flood flow without increasing the base flood elevation more than 564 one foot)) or other watercourse and the adjacent land areas that must be reserved to 565 discharge the base flood without cumulatively increasing the water surface elevation more than a designated height at any point. The FEMA floodway is delineated on the 566 567 Flood Insurance Rate Map, as well as on, but not limited to, King County Surface Water Design Manual major floodplain or floodway studies. 568

#### 570 **Fill**

559

569

580

583

#### 571 <u>For the purposes of the Chapter 6, Shorelines</u>, Fill means the addition of soil, sand, rock, 572 gravel, sediment, earth retaining structure, or other material to an area waterward of the 573 ordinary high water mark (OHWM), in wetlands, or on shorelands in a manner that raises 574 the elevation or creates dry land. 575

#### 576 ((Flood Hazard Management Plan

577 The King County Flood Hazard Management Plan contains policies and program and
 578 project recommendations that guide floodplain use and development throughout King
 579 County.))

#### 581 Floodplain

582 Floodplain is the total area subject to inundation by the 100-year flood.

#### 584 ((Floodway, zero-rise

585 Floodway zero-rise is the channel of a stream and that portion of the adjoining 586 floodplain that is necessary to contain and discharge the base flood flow without any 587 measurable increase in base flood elevation.

- A. For the purpose of this definition, measurable increase in base flood elevation means a calculated upward rise in the base flood elevation, equal to or greater than
   0.01 foot, resulting from a comparison of existing conditions and changed conditions directly attributable to alterations of the topography or any other flow
   obstructions in the floodplain. Zero-rise floodway is broader than that of the FEMA floodway but always includes the FEMA floodway.
- 594 B. Zero-rise floodway includes the entire floodplain unless a critical areas report
   595 demonstrates otherwise.
- 596
- 597 Food Innovation District

598 A district of food-related activities supportive of healthy, affordable local food. Food

599 innovation districts may encompass food retail, anchor food businesses, small food 600 business incubation, food industry education and training, markets and food hubs, 601 urban agriculture, food programs and partnerships with urban and rural food growers 602 or descentions and food agriculture agriculture and food agriculture agric

602 and cooperatives, and food aggregation and processing.))

603

#### 604 Forest practice

605 Forest practice is any forest practice as defined in R<u>evised Code of Washington</u> 606 76.09.020.

607

#### 608 Forest Production Districts (((FPD)))

The Growth Management Act requires cities and counties to designate, where appropriate, forest lands that are not characterized by urban growth and that have long-term significance for the commercial production of timber. The Comprehensive Plan designates Forest Production Districts where the primary use should be commercial forestry. Lands within the Forest Production District ((<del>shall</del>)) remain in large parcels and in ownership conducive to forestry. (See Chapter 3((:)), Rural Area and Natural Resource Lands).

616

#### 617 Frontline Communities

618 Frontline communities are those that are disproportionately impacted by climate 619 change due to existing and historical racial, social, environmental, and economic 620 inequities, and who have limited resources and/or capacity to adapt. These populations 621 often experience the earliest and most acute impacts of climate change, but whose experiences afford unique strengths and insights into climate resilience strategies and 622 practices. Frontline communities include Black, Indigenous, and other People of Color 623 624 communities; immigrants; refugees; households at or below 80 percent of area median 625 income; communities experiencing disproportionate pollution exposure; women and gender non-conforming people; LGBTQIA+ people; people who live and/or work 626 627 outside: those with existing health issues; people speaking languages other than 628 English; and other climate-vulnerable groups. 629

#### 630 Fully Contained Community (((FCC)))

A fully contained community is a site-specific development project consisting of
 conceptual site plan(s), development standards, processing and other elements. ((It is
 also consistent with the criteria provided in RCW 36.70A.350 which states that Fully
 Contained Communities should be located outside of the initially designated Urban
 Growth Area.))

- 636
- 637 Functional Classification
- 638 See "Arterial Functional Classification"

# 639640 Functional Planning

Functional plans are detailed <u>King County</u> plans for facilities and services and action
plans and programs for other governmental activities. Some functional plans are
operational or programmatic, which means they guide daily management decisions.
Others include specific details of facility design and location and must be consistent
with the Comprehensive Plan and development regulations. ((Functional plans are
prepared by King County, independent special purpose districts or other public and
private agencies. (See Chapter 12: Implementation, Amendments and Evaluation)))

- 648
- 649 650
- 651
- 652

### 653 **G**

#### 654 Geotechnical report or geotechnical analysis

Geotechnical report or geotechnical analysis means a scientific study or evaluation 655 656 conducted by a gualified expert that includes: a description of the ground and surface 657 hydrology and geology; the affected land form and its susceptibility to mass wasting, erosion, and other geologic hazards or processes; conclusions and recommendations 658 659 regarding the effect of the proposed development on geologic conditions; the 660 adequacy of the site to be developed; the impacts of the proposed development; 661 alternative approaches to the proposed development; and measures to mitigate 662 potential site-specific and cumulative geological and hydrological impacts of the proposed development, including the potential adverse impacts to adjacent and 663 664 down-current properties. Geotechnical reports shall conform to accepted technical 665 standards and must be prepared by qualified professional engineers or geologists who have professional expertise about the regional and local shoreline geology and 666 667 processes. 668

#### 669 ((Global Warming

670 Global warming is an increase in worldwide atmospheric temperature and resulting 671 alterations in climate.))

672

676

#### 673 Grading

674 Grading is any excavation, filling, or removal of the duff layer or any combination 675 thereof.

#### 677 Green Jobs

Living wage positions providing environmental benefits (such as clean energy
 deployment) in high-demand industry sectors such as construction, manufacturing,
 transportation, and professional services.

#### 682 Groundwater Management Plans

King County has five Groundwater Management Areas ((<del>(GWMA)</del>)) for which residents 683 684 and technical experts are addressing groundwater issues. For each ((GWMA)) 685 Groundwater Management Area, a Groundwater Management Plan (((GWMP))) has been developed per ((c))Chapter 173-100 Washington Administrative Code 686 (((<del>c</del>))<u>C</u>hapter 90.44 Revised Code of Washington). Each ((<del>GWMP</del>)) <u>Groundwater</u> 687 688 Management Plan describes the area's groundwater resource, contains a detailed 689 exploration of groundwater protection issues, and proposes solutions to perceived 690 threats. These plans identify Sensitive Aquifer Areas to receive a special level of 691 protection.

#### 692 693 Growth Management Act ((<del>(GMA)</del>))

In 1990 and 1991, the Washington State Legislature passed the Growth Management Act. The Growth Management Act calls for urban counties and cities in the state to develop comprehensive plans to guide growth management decisions. Amendments to the Act in 1991 require that counties, working with the cities within their boundaries, develop Countywide Planning Policies to provide a common vision of the future to serve as the framework for all comprehensive plans throughout the county. (See Chapter 1((:)), Regional Growth Management Planning)

701

#### 702 Growth Management Planning Council (((GMPC)))

The Growth Management Planning Council, which was established by an interlocal agreement, is a council of elected officials from Seattle, Bellevue, ((suburban)) other
 <u>King County</u> cities, special purpose districts, the Port of Seattle, and King County. The
 Growth Management Planning Council is responsible for the preparation and

- recommendation of the Countywide Planning Policies to the Metropolitan King County
- Council, which then adopts the policies and sends them to the cities for ratification.
- 709

#### 710 ((Urban)) Growth Target

The Growth Management Act and the Countywide Planning Policies require King County and ((<del>its</del>)) <u>the</u> cities <u>in the county</u> to plan for a 20-year population and employment growth target for <u>urban areas in</u> each jurisdiction, based on designation of the Urban Growth Area, Urban Centers, and the criteria of the Countywide Planning Policies. (See Chapter 2((<del>;</del>)), Urban Communities)

- 715 716
- /10
- 717

#### 718 Habitat

Habitat is the area where wildlife normally lives and grows. Habitat components includefood, water, cover (security, breeding, thermal) and space.

721

#### 722 Habitat Network

Habitat network is a system of fish and wildlife habitat ((where connections between))
 that link large habitat blocks and open spaces with critical areas and their buffers,
 priority habitats, trails, parks, and other areas that ((are necessary for the support of))
 provide for fish and wildlife through their life cycles and alleviate habitat fragmentation.

# 727728 Healthy Community

729 Healthy community (communities) means a community that makes it ((easier)) easy for 730 people to live healthy lives by((:)) encouraging ((mixed)) a land use ((and greater land 731 density)) pattern to shorten distances between housing, workplaces, schools, and recreation so people can walk or bike more easily to them; incorporating ((good)) 732 733 complete pedestrian and bicycle infrastructure, including sidewalks and bike paths that 734 are safely removed from ((automobile)) vehicle traffic; providing opportunities for 735 people to be physically active and socially engaged as part of their daily routine; 736 including access to open space and parks; allowing people, if they choose, to age in 737 place and remain in their community as their lifestyle changes or they face changing 738 physical capabilities; and ensuring access to affordable and healthy food, especially 739 fruits and vegetables.

740

746

### 741 Healthy Housing

Healthy housing means housing that <u>is sustainable and</u> protects all residents from
exposure to harmful substances and environments, reduces the risk of injury, provides
opportunities for safe and convenient daily physical activity, and ((assures)) ensures
access to healthy food and social connectivity.

#### 747 ((High Capacity Transit Facilities

748 These include all of the elements of a system, including the rails, stations, vehicle 749 infrastructure and associated supportive facilities.))

#### 750 751 **Historic Properties**

Historic properties include historic buildings, sites, objects, districts, and landscapes,
 prehistoric and historic archaeological resources, and traditional cultural places.

754 755 **Historic Property, Significant** 

Significant historic properties are those properties that meet the criteria for designationas County landmarks and/or listing in the National Register of Historic Places.

- 758
- 759 Historically Underrepresented

Historically underrepresented groups or populations are communities of people whose
 experiences, opinions, and life outcomes have intentionally or indirectly not been
 sought out or reflected in planning processes. Historically underrepresented groups
 often include Black, Indigenous, and other People of Color communities; immigrants;
 refugees; households at or below 80 percent of area median income; people speaking
 languages other than English; women and gender nonconforming individuals;
 LGBTQIA+ people, and people with special housing needs.

767

#### 768 Historically Underinvested

Historically underinvested groups or populations are communities that have experienced a long-term pattern of lacking investment in public services and amenities relative to neighboring communities or an expected standard. Historically underinvested groups often include Black, Indigenous, and other People of Color communities; immigrants; refugees; households at or below 80 percent of area median income; people speaking languages other than English; women and gender nonconforming individuals; LGBTQIA+ people; and people with special housing needs.

776 777 Ho

### 777 Housing Needs

Housing needs refers to the number of housing units needed in unincorporated King
 County by the end of the planning period to ensure sufficient and attainable housing for
 all households.

781

782

#### 783 Impervious surface

784 ((<del>An i</del>))<u>Impervious surface ((is)) means</u> a <u>nonvertical</u> surface <u>artificially covered or</u> 785 hardened ((that)) so as to prevent((s, retards, or otherwise alters)) or impede the ((entry)) 786 percolation of water into the soil mantle ((<del>as compared to</del>)) at natural ((<del>conditions prior</del> 787 to development; and/or a hard surface area that causes water to run off the surface in 788 greater quantities or at an increased rate of flow from the flow present under natural 789 conditions prior to development). Common impervious surfaces include)) infiltration 790 rates including, but are not limited to, roofs ((tops)), swimming pools and areas that are 791 paved, graveled, or made of packed or oiled earthen materials such as roads, walkways, 792 ((patios, driveways,)) or parking ((lots and gravel roads)) areas. "Impervious surface" 793 does not include landscaping and surface water flow control and water guality 794 treatment facilities.

795

#### 796 Income, Extremely Low-

797 <u>Extremely low-income means households earning less than or equal to 30 percent of</u>
 798 <u>area median income for their household size.</u>
 799

#### 800 Income, Low-

801 Low-income means households earning greater than 50 percent to less than or equal to
 802 80 percent of area median income for their household size.

# 803804 Income, Moderate-

805 <u>Moderate-income means households earning greater than 80 percent to less than or</u> 806 <u>equal to 120 percent of area median income for their household size.</u>

#### 808 Income, Very Low-

- 809 <u>Very low-income means households earning greater than 30 percent to less than or</u> 810 equal to 50 percent of area median income for their household size.
- 810 equal to 50 percent of area median income for their nousehold s 811
- 811

807

813

#### 814 Incorporated Areas

815 Incorporated areas are those areas within a city or a city's jurisdiction. King County
 816 contains the entirety of ((<del>39</del>)) <u>35</u> incorporated cities and parts of ((<del>two</del>)) <u>four</u> others.

#### 817 818 **Infill**

819 Infill means development or redevelopment on small properties or groups of properties820 within existing built -up areas.

#### 822 ((Initial Project Needs

823 Initial project needs are road improvement projects needed to address the impacts of a
 824 specific development. The projects must be concurrent with the development.))

825

821

- 826 J
- 827

```
027
```

828 **K** 

#### 829 ((Keystone Species

- Keystone species are those that exert a significant effect on the structure of the
   biological community of which they are a part. These species often prevent dominance
   by a single species and thereby maintain diversity in the community.))
- 834

837

#### 835 Landfill

836 Landfill is a disposal site or part of a site at which refuse is deposited.

#### 838 Landslide Hazard Areas

- 839 An area subject to severe risk of landslide, such as: 840 ((A.)) a. An area with a combination of: 841 1. Slopes steeper than fifteen percent of inclination; 2. Impermeable soils, such as silt and clay, frequently interbedded with 842 843 granular soils, such as sand and gravel; and 844 3. Springs or ground water seepage; 845 ((B.)) b. An area that has shown movement during the Holocene epoch, which is from ten thousand years ago to the present, or that is underlain by mass 846 847 wastage debris from that epoch; 848 ((<del>C.</del>)) <u>c.</u> Any area potentially unstable as a result of rapid stream incision, stream bank erosion or undercutting by wave action; 849 850 ((<del>D.</del>)) <u>d.</u> An area that shows evidence of or is at risk from snow avalanches; or
- 851 ((E.)) e. An area located on an alluvial fan, presently or potentially subject to
   852 inundation by debris flows or deposition of stream-transported sediments.
   853

#### 854 Land Use Map

The land use map adopted as part of the Comprehensive Plan designates the general location and extent of the uses of land for agriculture, timber production, housing, commerce, industry, recreation, open spaces, public utilities, public facilities, and other land uses as required by the Growth Management Act. A representation of the Land Use Map is included at the end of Chapter 1((+)), Regional Growth Management Planning.

- 861
- 862

#### 863 Level of Service - Transportation ((<del>(LOS)</del>))

864 Transportation ((<del>LOS</del>)) <u>level of service</u> is a qualitative measure describing the 865 operational conditions of the transportation system as experienced by travelers.

#### 867 **LGBTQIA+**

LGBTQIA+ means people that are Lesbian, Gay, Transgender, Bisexual, Queer, Intersex,
 Asexual, Plus. As an evolving acronym, the plus symbol includes all other identities on
 the gender and sexuality spectrum not included already.

871

866

#### 872 ((Locally Significant Resource Areas (LSRAs)

873 LSRAs Locally Significant Resource Areas contribute to the aquatic resources within a
 874 specific basin, when compared to aquatic and terrestrial systems of similar size and
 875 structure elsewhere in the basin. They also provide wetland and stream habitat that is
 876 important for wildlife and salmonid diversity and abundance within the basin. (See
 877 Chapter 5: Environment)))

878

#### 879 Long-term commercial significance

880 Long-term commercial significance is defined in Washington Administrative Code 881 365-190-030(((11))) to include the growing capacity, productivity, and soil composition 882 of the land for long-term commercial production, in consideration with the land's 883 proximity to population areas, and the possibility of more intense uses of land. 884 Long-term commercial significance means the land is capable of producing the 885 specified natural resources at commercially sustainable levels for at least a twenty-year planning period, if adequately conserved. Designated mineral resource lands of 886 887 long-term commercial significance may have alternative post-mining land uses, as provided by the Surface Mining Reclamation Act, comprehensive plan and 888 889 development regulations, or other laws.

890 891

#### Low Impact Development ((<del>(LID)</del>))

892 ((HD)) Low impact development is an approach to land development that works to
 893 match a site's natural hydrologic function by protecting native vegetation and soils,
 894 reducing impervious surface and managing stormwater at the source.
 895

896 **M** 

#### 897 ((Master Planned Resorts

898 RCW 36.70A.360 defines a Master Planned Resort as a self-contained and fully 899 integrated planned unit development, in a setting of significant natural amenities, with 900 primary focus on destination resort facilities consisting of short-term visitor 901 accommodations associated with a range of developed on-site indoor or outdoor 902 recreation facilities. A master planned resort may include other residential uses within its 903 boundaries, but only if the residential uses are integrated into and support the on-site 904 recreational nature of the resort.))

906 May

907 ((See definition for "shall")) To guide King County, the use of the terms "shall," "should,"
 908 and "may" in policies determine the level of discretion the County can exercise in
 909 making future and specific land use, budget, development regulation, and other
 910 decisions. "May" in a policy means that the action is allowed and/or it is in the County's
 911 interest to carry out the policy, but the County has total discretion in making decisions.
 912

#### 913 ((Median Household Income

914 The median household income is the income level at which half of all households has

915 higher income and the other half has lower income.))

916

#### 917 Middle Housing

918 Middle housing includes moderately scaled multiunit attached or detached housing 919 types that are compatible in residential areas developed with predominantly single 920 detached residences. Middle housing typically includes more housing units than single 921 detached developments, but less than large apartment buildings. These housing types 922 typically include, but are not limited to, duplexes, houseplexes, townhouses, courtyard 923 buildings, cottage houses, and live-work buildings.

924

#### 925 Middle-Wage Jobs

926 Jobs that can support a household or family without significant educational 927 requirements. Given the barriers in access throughout the educational, banking, and 928 other institutional systems, these middle-wage jobs provide key avenues for financial 929 self-sufficiency and wealth building and play a unique role in advancing equity. Jobs in 930 this range predominate in more locally owned, smaller- and medium-sized businesses 931 and manufacturers, such as accountants, machinists, or technicians.

932

#### 933 Mineral Resource Sites

The Growth Management Act requires cities and counties to designate, where appropriate, mineral resource lands that are not already characterized by urban growth and that have long-term significance for the extraction of minerals. The comprehensive plan designates as Mineral Resource Sites existing, approved mineral extraction sites, and also designates as Potential Surface Mineral Resource Sites properties on which King County expects some future mines may be located. (See Chapter 3((:)), Rural Area and Natural Resource Lands)

941

946

#### 942 ((Mitigation Bank

A mitigation bank is a property approved by the appropriate county, state and federal
 agencies for restoration, creation, or enhancement to compensate for adverse impacts
 to wetlands caused by the development of public agency facilities and utility facilities.

#### 947 Mitigation Payment System

This impact fee system establishes a requirement that new growth and development
 pay a proportionate share of the cost of needed transportation improvements. The
 mitigation payment system is authorized by state growth management legislation. (See
 Chapter 8: Transportation)))

953 Mixed-Use

954 Mixed_use refers to a development with combined commercial and residential uses.

#### 956 ((Mode Split

957 Mode split is the percentage of a specific mode's use from among all modes of travel.
958 For example, if 25 trips out of 100 total trips are made by bus, the bus mode split is 25
959 percent. Modes of travel include single-occupant vehicles, transit, carpooling, bicycling,
960 walking, and other modes.

961

955

#### 962 Multifamily)) Multiunit Housing

963 ((Multifamily)) <u>Multiunit</u> housing structures are those with more than one unit.
 964 ((Multifamily)) <u>Multiunit</u> housing includes ((duplexes)) <u>middle housing</u>, townhouses,
 965 apartments, and condominiums.

- 967 Must
- 968 See definition for "shall"
- 969 970

966

971

### 972 **N**

#### 973 Natural Area

974 Natural areas are ((those)) properties <u>or tracts</u> ((in the county's natural lands inventory)) 975 whose primary purpose is to conserve and restore ecological value. They may not be 976 completely natural and undisturbed but may be important in preserving rare or 977 vanishing flora, fauna, geological sites, or features of scientific, traditional, cultural, or 978 educational value. These sites may allow public use <u>in was</u> that ((<del>does not</del>)) <u>avoid and</u> 979 <u>minimize</u> harm to the ecological resources of the site to the maximum extent feasible. 980 ((Also referred to as Ecological Lands or Ecological sites.))

981

997

1002

1006

#### 982 Natural Resource Lands((, designated))

983 Natural Resource Lands means lands designated under  $((\bar{\tau}))$  the Growth Management 984 Act ((requires cities and counties to designate natural resource lands which include the 985 following:)) as 1) agricultural lands that have long-term significance for the commercial 986 production of food or other agricultural products; 2) forest lands that have long-term 987 significance for the commercial production of timber; ((and)) or 3) mineral resource 988 lands that have long-term significance for the extraction of minerals. ((<del>The</del> 989 Comprehensive Plan designates)) This designation includes Agricultural Production 990 Districts, Forest Production Districts, and Mineral Resource Sites. (See Chapter 3((:)), 991 Rural Area((s)) and Natural Resource Lands) 992

#### 993 Neighborhood Business Centers

Neighborhood Business Centers are shopping areas that offer convenience goods and
 services to local residents. They primarily contain retail stores and offices. (See Chapter
 2((:)), Urban Communities)

#### 998 ((<del>New Growth</del>

# 999 New growth is growth that occurs subsequent to pipeline development for which no 1000 application is currently pending review/approval in the King County permitting process, 1001 but which is forecasted to occur over the next 20 years in this comprehensive plan.

#### 1003 Nondegradation

1004 Nondegradation means to prevent the decline to a lower state, to keep from reducing
 1005 the complexity, functions, or integrity of ecological processes or values.

#### 1007 Nonmotorized Transportation

 Nonmotorized transportation refers to pedestrian, bicycle, and equestrian travel, and the facilities needed to support such travel. For purposes of this Comprehensive Plan, wheelchairs, personal assistive mobility devices or scooters powered by electricity and used by physically impaired persons shall be considered nonmotorized transportation.
 Any motorized foot scooter, motor-driven cycle, moped, motor-powered bicycle, a motorcycle or, except as provided above, personal assistive mobility device shall be considered motorized transportation.))

#### 1016 Non((=))point <u>Source</u> Pollution

1017 Non((-))point <u>source</u> pollution is pollution that enters any waters of the state from any
1018 dispersed land-based or water-based activities, including but not limited to atmosphere
1019 disposition, surface water runoff from agricultural lands, urban areas, or forest lands,
1020 subsurface or underground sources, or discharges from boats or marine vessels.

- 1021
- 1022
- 1023
- 1024

### 1025

Ο

#### 1026 **Open Space System, King County**

1027 King County's Open Space System ((is a regional system of county-owned parks, trails, 1028 natural areas, working agricultural and forest resource lands, and flood hazard 1029 management lands. This regional network of open spaces)) includes regional parks and recreation amenities, natural areas, forests, regional and backcountry trails, and local 1030 parks in unincorporated areas. The system provides benefits to county residents 1031 1032 including recreation, conservation of natural and working lands, flood hazard 1033 management, wildlife habitat, and connection of critical areas. (See Chapter 7((:)), Parks, 1034 Open Space, and Cultural Resources) 1035

#### 1036 Opportunity Area

1037 <u>An opportunity area is a location with high-quality schools, jobs, transit, access to parks,</u>
 1038 <u>open space, clean air, water, and soil, and other key determinants of social, economic,</u>
 1039 <u>and physical wellbeing.</u>

#### 1041 ((Opportunity Mapping

Opportunity mapping assesses the conditions present in neighborhoods across a 1042 1043 region by examining indicators of opportunity in areas such as education, economy, 1044 transportation, housing, environment, and health. Opportunity mapping provides a 1045 comprehensive analytical framework to measure opportunity in the region and to 1046 determine who has access to opportunity-rich areas. Analysis of opportunity mapping 1047 can provide valuable information about where more affordable housing needs to be 1048 located, and what needs to be remedied in areas where these types of opportunities are 1049 currently very limited.))

#### 1050

1040

1051

1056 1057

1063

#### 1052 Particulate Matter

Ρ

Particulate matter is solid or aerosol particles dispersed in the air including dust, soot,
and oil. The major sources are industrial activities, fugitive road dust, motor vehicle
emissions, and wood smoke.

#### Passive Recreation ((Site))

 Passive recreation ((sites require a lower level of development and provide areas for informal, self-directed activities for individuals and groups)) is characterized by lowimpact, individually oriented activities such as informal play, hiking, walking, jogging, horseback riding, and biking. Capital improvements are generally minimal, such as picnic tables, park furniture, signage, grass fields or meadows, or backcountry trails.

#### 1064 ((Pervious surface

A pervious surface is an area that allows the entry of water into the soil mantle, as under
 natural conditions prior to development.

#### 1067 1068 Pipeline Development

Pipeline Development is comprised of land use development applications, whether
 vested or unvested, that were submitted prior to adoption of the King County
 Comprehensive Plan and are pending review/approval in the permitting process.

#### 1073 **Pipeline transportation needs**

- 1074 Pipeline transportation needs are associated with growth that is pending through the 1075 county's development review process.
- 1076

1072

#### 1077 **Point Pollution**

- Point pollution is pollution that enters any waters of the state from an identifiable source
   such as a pipe.))
- 1080

#### 1081 Potential Annexation Area (((PAA)))

1082 A Potential Annexation Area is an area in unincorporated King County adjacent to a city 1083 that is expected to annex to the city and to which that city will be expected to provide 1084 services and utilities within the next two decades. (See Chapter 2((-)), Urban 1085 Communities)

1086

1094

#### 1087 **Precautionary Action**

Precautionary action, also referred to as the "no risk approach," means in such instances where an absence of valid scientific information or incomplete scientific information relating to the county's critical areas, leading to uncertainty about whether development and land uses could lead to harm of critical areas or uncertainty about the risk to critical area function, such development and land use activities are strictly limited until the uncertainty is sufficiently resolved.

#### 1095 Preserve/Preservation

1096 Preserve/preservation, as used in Chapter 2((+)), Urban Communities, and Chapter ((+)) 1097 Services, Facilities and Utilities)) 4. Housing and Human Services, regarding affordable 1098 housing, means the process of protecting the availability of affordable housing, especially publicly assisted affordable housing, for ((low and moderate income)) 1099 households at or below 120 percent of area median income when transitions from 1100 current assistance programs or affordable housing uses are planned. Preservation may 1101 1102 occur through acquisition of the housing by a non((-))profit or public agency or through 1103 funding mechanisms that include a covenant or similar legal agreement requiring that 1104 the units in the property remain affordable to a designated household income level for 1105 an extended period of time, such as 15 years, 30 years, or 50 years. (See "Rehabilitate") 1106

#### 1107 **Priority habitat**

1108 Priority habitat means a habitat type with unique or significant value to one or more 1109 species. An area classified and mapped as priority habitat must have one or more of the 1110 following attributes:

- Comparatively high fish or wildlife density;
- Comparatively high fish or wildlife species diversity;
- 1113 Fish spawning habitat;
- 1114 Important wildlife habitat;
- Important fish or wildlife seasonal range;
- Important fish or wildlife movement corridor;
- Rearing and foraging habitat;
- 1118 Important marine mammal haul-out;
- Refugia habitat;
- Limited availability;
- High vulnerability to habitat alteration;
- Unique or dependent species; or
- Shellfish bed.
- 1124
- 1125 A priority habitat may be described by a unique vegetation type or by a dominant plant 1126 species that is of primary importance to fish and wildlife (such as oak woodlands or

eelgrass meadows). A priority habitat may also be described by a successional stage
(such as old growth and mature forests). Alternatively, a priority habitat may consist of a
specific habitat element (such as a consolidated marine/estuarine shoreline, talus
slopes, caves, snags) of key value to fish and wildlife. A priority habitat may contain
priority and/or nonpriority fish and wildlife. [Washington Administrative Code
173-26-020 (((24))]

#### 1134 **Priority Species**

1133

Priority species means species requiring protective measures and/or management guidelines to ensure their persistence at genetically viable population levels. Priority species are those that meet any of the criteria listed below.

- 1138 ((<del>(a)</del>))<u>a.</u> Criterion 1. State-listed or state-proposed species. State-listed 1139 species are those native fish and wildlife species legally designated as 1140 endangered (Washington Administrative Code ((232-12-014)) 220-610-010), threatened (Washington Administrative Code ((232-12-011)) 220-200-1141 1142 100), or sensitive (Washington Administrative Code ((232-12-011)) 220-200-100). State-proposed species are those fish and wildlife species that will be 1143 1144 reviewed by the  $((\frac{d}{d}))$  Department of  $((\frac{f}{d}))$  Fish and  $((\frac{d}{d}))$  Wildlife 1145 (((POL-M-6001))) for possible listing as endangered, threatened, or sensitive according to the process and criteria defined in Washington 1146 1147 Administrative Code ((232-12-297)) 220-610-110.
- 1148(((b))) b. Criterion 2. Vulnerable aggregations. Vulnerable aggregations1149include those species or groups of animals susceptible to significant1150population declines, within a specific area or statewide, by virtue of their1151inclination to congregate. Examples include heron colonies, seabird1152concentrations, and marine mammal congregations.
- 1153(((c))) c. Criterion 3. Species of recreational, commercial, and/or Indian tribal1154importance. Native and nonnative fish, shellfish, and wildlife species of1155recreational or commercial importance and recognized species used for1156tribal ceremonial and subsistence purposes that are vulnerable to habitat1157loss or degradation.
- 1158(((d))) d. Criterion 4. Species listed under the federal Endangered Species Act1159as either proposed, threatened, or endangered.

#### 1161 ((Protect

- Protect means to keep from harm, attack, injury, or destruction; to maintain the integrity
   of, especially through environmental care.))
- 1164

1160

#### 1165 Public Benefit Rating System ((<del>(PBRS)</del>))

1166 The Public Benefit Rating System (((PBRS))) is a current use taxation program whereby 1167 property taxes are reduced by an amount determined by a scoring system related to the 1168 numbers and quality of open space resources located on all or portions of the property.

1169 1170 Public Review Draft

1171 A Public Review Draft is a draft of Executive proposed Comprehensive Plan updates, 1172 including proposed ((Community Service Area)) subarea plans, made available to the 1173 public for review and comment. A Public Review Draft((s)) is published prior to 1174 transmittal of proposed Comprehensive Plan updates to the Council ((so as)) to provide 1175 the public an opportunity to record comments before the Executive finalizes the 1176 recommended updates.

1177 1178 **Puget Sound** 

1179 Puget Sound is an estuary–a semi((=))enclosed, glacial fjord where salt water from the 1180 ocean is mixed with fresh water. Puget Sound is bordered by about 1,300 miles of 1181 shoreline with a mix of beaches, bluffs, deltas, mudflats, kelp forests and eelgrass

1182 meadows. Approximately 100 miles of this saltwater shoreline lie within King County. 1183 King County's immediate responsibilities include those portions of Puget Sound which 1184 lie within the county, roughly between Point Wells to the north and Dumas Bay to the 1185 south. King County shares responsibility for the health of the main basin of Puget 1186 Sound with its neighbors–Pierce County, Kitsap County, and Snohomish County.

#### 1188 Puget Sound Regional Council (((PSRC)))

1189 The ((PSRC)) Puget Sound Regional Council is the designated metropolitan planning 1190 organization for the four-county region that includes King, Pierce, Snohomish and Kitsap 1191 counties, and is responsible for regional growth management and transportation 1192 planning. The ((PSRC's)) Puget Sound Regional Council's General Assembly includes 1193 mayors, county executives, and council commission members from the four counties, as 1194 well as representatives from local Indian tribes, ports, transit agencies, the State 1195 Department of Transportation, and Transportation Commission. The ((PSRC)) Puget Sound Regional Council prepared Multi((=))county Planning Policies for the four -county 1196 1197 region. 1198

Q

1199

1187

- 1200
- 1201 **R**

#### 1202 Rare Ecosystems, Habitats, and Species

1203 Rare ecosystems, habitats, and species((, habitats, and ecosystems)) are those that are 1204 few in number or are poorly represented in an area. Rare species often lack the 1205 capability to resist changes in environmental conditions or lack the resilience to recover 1206 after a change. Species, habitats, and ecosystems may be rare because of the following 1207 reasons: changing natural conditions have reduced their range, abundance, or 1208 distribution; they depend on specific environmental conditions that are not commonly 1209 represented in this area (species or habitats at the edge of their range or occurring as 1210 relicts); and anthropogenic (human-related) actions have caused habitat loss or severe decreases in range or abundance. 1211

1212

#### 1213 Recycled Water (also, referred to as Reclaimed Water)

1214 Recycled water means effluent from a wastewater treatment system that has been 1215 adequately and reliably treated, so that as a result of that treatment it is suitable for a 1216 beneficial use or a controlled use that would not otherwise occur, and is no longer 1217 considered wastewater. Recycled is also referred to as Reclaimed Water under 1218 Washington State law. Recycled water may be used for beneficial purposes such as 1219 landscape and agricultural irrigation, heating and cooling, industrial processing, and 1220 environmental enhancement or restoration of streams, wetlands, and aquifers.

- 1221
- 1222 ((Regionally Significant Resource Area (RSRA)

1223 RSRAs are those portions of watersheds that contribute to the resource base of the 1224 entire Puget Sound region by virtue of exceptional species and habitat diversity and 1225 abundance when compared to aquatic and terrestrial systems of similar size and 1226 structure elsewhere in the region. may also support rare, threatened or endangered 1227 species or communities. (See Chapter 5: Environment)))

1228

#### 1229 Regional Wastewater Services Plan (((RWSP)))

1230 King County adopted the Regional Wastewater Service Plan ((<del>(RWSP)</del>)) in 1999. The 1231 ((<del>RWSP</del>)) <u>Regional Wastewater Services Plan</u> outlines a number of important projects, 1232 programs, and policies for King County to implement through 2030 to continue to 1233 protect public health and water quality and ensure sufficient wastewater capacity to meet future growth needs. ((<del>RWSP</del>)) <u>Regional Wastewater Services Plan</u> policies guide
 the phasing and size of treatment facilities and improvements to the conveyance
 system, as well as improvements to control combined sewer overflows. The ((<del>RWSP</del>))
 <u>Regional Wastewater Services Plan</u> also includes policies that guide the production and
 use of biosolids and recycled water.

#### 1240 Rehabilitate/Rehabilitation

1239

1251

1261 1262

1241 Rehabilitate or rehabilitation, as used in ((Chapter 2: Urban Communities, and Chapter 1242 9: Services, Facilities and Utilities)) Chapter 4, Housing and Human Services, regarding 1243 affordable housing, means as repairs, improvements, replacements, alterations, and 1244 additions to existing properties that bring them into full compliance with existing 1245 building and health codes. Rehabilitation may be minor, moderate, or substantial; or it 1246 may involve adaptive reuse from nonresidential to residential uses. Rehabilitation of 1247 housing is undertaken to improve and revitalize housing stock that is aging or in poor 1248 condition. ((When public funding is used for rehabilitation it is usual to require a 1249 covenant or other legal mechanism to preserve the affordability of the rehabilitated 1250 property.)) (See "Preserve")

#### 1252 ((Resource Lands, designated

1253 The Growth Management Act requires cities and counties to designate natural resource 1254 lands which include the following: 1) agricultural lands that have long-term significance 1255 for the commercial production of food or other agricultural products; 2) forest lands that 1256 have long-term significance for the commercial production of timber; and 3) mineral 1257 resource lands that have long-term significance for the extraction of minerals. The 1258 Comprehensive Plan designates Agricultural Production Districts, Forest Production 1259 Districts, and Mineral Resource Sites. (See Chapter 3: Rural Areas and Natural Resource 1260 Lands)))

#### Restore

Restore, for the purposes of Chapter 5, Environment, means to return land and water resources from a disturbed or altered condition to an approximation of their condition prior to disturbance or alteration. Restoration projects are conducted by public agencies through capital improvement projects and by developers as a means to mitigate adverse impacts of their proposals. (Restoration of land is not required of developers when they protect land and water resources according to King County regulation.) (((See Chapter 5: Environment)))

#### 1271 **Rezone((s))**

Rezoning is the term that refers to the process of individual requests and applications tochange the zoning classification of land.

#### 1275 Riparian Area

1276 ((Pertains to the banks of rivers and streams, and also sometimes wetlands, tidewater
1277 and lakes:)) <u>A designated area contiguous to an aquatic area such as a stream, lake,</u>
1278 estuary, or marine waters, that provides fish and wildlife habitat, protects adjacent
1279 aquatic fish and wildlife species and habitat, and protects water quality. Riparian areas
1280 reduce impacts from adjacent land uses through various physical, chemical, or
1281 biological processes.

1282

1274

#### 1283 Rural Area ((g))Geography (See also Rural Area Zoning)

 1284 ((The Growth Management Act requires that counties designate a Rural Area in order to 285 conserve the rural character and quality of the existing rural lands in Washington. King 286 County's)) The Rural Area refers collectively to the geography that primarily contains the following land use categories: ((=)) Rural Towns, Rural Neighborhood Commercial 288 Centers, and Rural Area (((RA-2.5, RA-5, RA-10 and RA-20))) in unincorporated King 289 County. The Rural Area geography also includes a limited amount of acreage with the 290 Industrial land use ((categories such as Industrial, Commercial Outside of Center, etc)) designation. The Rural Area geography does not include designated Natural Resource Lands, although resource activities occur ((on them)) <u>in it</u>. The Rural Area contains very low-density residential development, commercial and industrial development, farms, forests, watersheds crucial for both fisheries and flood hazard management, mining areas and towns, historic sites and buildings, archaeological sites, and regionally important recreation areas. (See Chapter 3((;)), Rural Area((;)) and Natural Resource Lands)

#### 1299 Rural Area ((z))Zoning

1298

1300 ((The)) Rural Area ((zone)) (RA) zoning or zones refers to the Rural Area((-))-2.5, Rural 1301 Area((-))_5, Rural Area((-))_10, and Rural Area((-))_20 zoning ((categories)) classifications. This zoning is meant to provide an area-wide, long-term((-,)) rural character and to 1302 1303 minimize land use conflicts with nearby agricultural, forest or mineral extraction 1304 production districts. These purposes are accomplished by: 1) limiting residential 1305 densities and permitted uses to those that are compatible with rural character and 1306 nearby resource production districts and are able to be adequately supported by rural 1307 service levels; 2) allowing small-scale farming and forestry activities and tourism and 1308 recreation uses which can be supported by rural service levels and which are 1309 compatible with rural character; and 3) increasing required setbacks to minimize 1310 conflicts with adjacent agriculture, forest, or mineral zones. 1311

#### 1312 Rural Character

1313 Rural character refers to the pattern of land use and development established by a 1314 county in the rural element of its comprehensive plan:

- 1315(((<del>(a)</del>)) <u>a.</u> In which open space, the natural landscape, and vegetation1316predominate over the built environment;
- 1317(((b))) b. That foster traditional rural lifestyles, rural-based economies, and<br/>opportunities to both live and work in the Rural Area((s));
- 1319 (((<del>c)</del>)) <u>c</u>. That provide visual landscapes that are traditionally found in <u>the</u> Rural
   1320 Area((<del>s</del>)) and communities;
- 1321(((<del>(d)</del>)) <u>d.</u> That are compatible with the use of the land by wildlife and for fish1322and wildlife habitat;
- 1323(((e))) e.That reduce the inappropriate conversion of undeveloped land into1324sprawling, low-density development;
- 1325(((<del>(f)</del>)) <u>f.</u> That generally do not require the extension of urban governmental1326services; and
- 1327(((<del>(g)</del>)) g. That are consistent with the protection of natural surface water flows1328and groundwater and surface water recharge and discharge areas.

#### 1330 **Rural Forest Focus Areas**

Rural Forest Focus Areas are designated geographic areas with Rural Area zoning that
 contain large contiguous blocks of rural forest. Funding, economic incentives,
 regulatory actions, and other strategies are enacted to maintain forest cover and the
 practice of sustainable forestry.

#### 1335 1336 ((<del>Rural Growth</del>

1329

Rural Growth refers to residential, commercial, and industrial growth that is scaled to be
 compatible with, and maintains the traditional character of the Rural Area. Rural growth
 typically does not require urban governmental services except in the case of some Rural
 Towns to protect the environment as provided in this Comprehensive Plan. The basic
 elements of "Rural Character," as defined by the King County Countywide Planning
 Policies, are natural features, resource-based industries, rural towns, rural

- 1343 neighborhoods, rural infrastructure and services, open space system, rural housing,
   1344 rural economy, and Cities in the Rural Area.))
- 1345

#### 1346 Rural Neighborhood Commercial Centers

1347 Rural Neighborhood Commercial Center((s (a specific land use category within the 1348 larger geography of Rural Areas) are)) is a land use designation used to recognize 1349 existing small pockets of commercial development((s)), or in some cases, historic 1350 ((towns)) communities or buildings, that are too small to provide more than convenience 1351 shopping and services to surrounding residents. They generally do not have services 1352 such as water supply or sewage disposal systems any different from those serving 1353 surrounding rural residential development. (See Chapter 3((+)), Rural Area and Natural 1354 Resource Lands) 1355

#### 1356 Rural Towns

1357 Rural towns (a specific land use category within the larger geography of Rural Area((s))) 1358 are unincorporated towns governed directly by King County. ((They provide a focal 1359 point for community groups such as chambers of commerce or community councils to participate in public affairs.)) The purposes of Rural Town designations within the 1360 1361 Comprehensive Plan are to recognize existing concentrations of higher density and 1362 economic activity in the Rural Area((s)) and to allow modest growth of residential and 1363 economic uses to keep them economically viable into the future. (See Chapter  $3((\cdot))$ , 1364 Rural Area((s)) and Natural Resource Lands)

1365

### 1366 **S**

#### 1367 Salmonid

A member of the fish family Salmonidae. In King County, salmonid species include, but
are not limited to, Chinook, Coho, chum, sockeye, and pink salmon; cutthroat,
<u>steelhead, and</u> rainbow((, and brown)) trout ((and steelhead)); Dolly Varden <u>char</u>,
((brook)) trout, which is a type of char; ((, char,)) kokanee;((, and)) pygmy whitefish; and
<u>mountain whitefish</u>.

1373

### 1374 Satellite ((System)) Management Agency

((When large water utilities oversee the operations of smaller water systems, not connected to their own system, it is called satellite system management. The satellite system manager is)) A satellite management agency is a large water utility hired by ((the)) smaller system managers to operate and maintain the system in accordance with local, state, and federal health regulations.

#### 1381 Sediment Transport

Sediment transport is the process of taking soil from one place and depositing it in another via the flow of water. Deposition of the soil occurs when sediment in the water flow is more than the flow can transport.

1385

#### 1386 ((Sensitive Areas Map Folio

The folio displays the location of environmentally sensitive areas in unincorporated King
 County. It identifies sensitive areas for wetlands, streams, flood hazards, erosion
 hazards, landslide hazards, seismic hazards, and coal mine hazards.))

1390

#### 1391 Sensitive Species

Sensitive species means any species that is likely to become an endangered species
within the foreseeable future throughout all or significant portion of its range and which
has been designated as such in regulations issued by the U.S. Fish and Wildlife Service
or the Washington State Department of Fish and Wildlife.

1396

#### 1397 Sewer Availability

1398 Sewer availability means the presence of sewers now or within six years through 1399 extensions included in adopted sewer comprehensive plans. ((In the case of Urban 1400 Planned Development, 1) the capacity to intercept and treat waste water as evidenced 1401 by a King County approved sewer system plan or a Metro utility plans, 2) a firm 1402 commitment to serve an area with sewer as evidenced by either a sewer availability 1403 certificate, utility extension agreement, or an approved sewer system plan and 3) a firm 1404 financial commitment to provide sewer, as evidenced by either a capital improvement 1405 program or utility extension agreement.

#### 1407 Sewer Tightline

1408 Tightlining of sewers means that a sewer line is designed and sized to only serve a 1409 particular structure.))

#### 1411 Shall

1406

1410

1412 To guide King County, the use of the terms "shall," (("will,")) "should," and "may" in 1413 policies determine the level of discretion the ((-)) county can exercise in making future 1414 and specific land use, budget, development regulation, and other decisions. "Shall" 1415  $((\frac{\text{and "will"}}{\text{output}}))$  in a policy means that it is mandatory for the  $((\frac{-1)C}{\text{output}})$  to carry out the 1416 policy, even if a timeframe is not included. "Shall" ((and "will" are)) is imperative and 1417 nondiscretionary--the ((c))County must make decisions based on what the policy says to 1418 do. (("May" in a policy means that it is in the county's interest to carry out the policy, but 1419 the county has total discretion in making decisions. "Must" in a policy means a 1420 mandate; the action is required. "Should" in a policy means: noncompulsory guidance, 1421 in which cost, availability of funding, and public benefit associated with the policy's 1422 purpose are considered as part of the implementation decision; establishes that the 1423 county has discretion in making decisions.)) (See definitions for "should" and "may.") 1424

#### 1425 Shoreline Environment

Shoreline environment ((or master program environment)) means the categories of shorelines of the state established by the King County shoreline management master program to differentiate between areas whose features imply differing objectives regarding their use and future development.

#### 1431 Shoreline Master Program

1432 The Shoreline Master Program is the comprehensive use plan for a described area, and 1433 the use regulations together with maps, diagrams, charts, or other descriptive material 1434 and text, a statement of desired goals, and standards developed in accordance with the 1435 policies enunciated in R<u>evised Code of Washington</u> 90.58.020.

#### 1437 **Should**

1438 ((See definition for "shall":)) To guide King County, the use of the terms "shall," "should," 1439 and "may" in policies determine the level of discretion the County can exercise in 1440 making future and specific land use, budget, development regulation, and other 1441 decisions. "Should" in a policy means noncompulsory guidance, in which cost, 1442 availability of funding, and public benefit associated with the policy's purpose are 1443 considered as part of the implementation decision; it establishes that the County has 1444 discretion in making decisions.

1445

1430

1436

#### 1446 Significant Adverse Environmental Impact

1447 Significant as used in State Environmental Policy Act means a reasonable likelihood of 1448 more than a moderate adverse impact on the environment. Significance involves 1449 context and intensity and does not lend itself to a formula or quantifiable text. The 1450 context may vary with the physical setting. Intensity depends on the magnitude and 1451 duration of an impact. The severity of an impact should be weighed along with the 1452 likelihood of its occurrence. An impact may be significant if its chance of occurrence is 1453 not great, but the resulting environmental impact would be severe if it occurred. 1454

#### 1455 Significant vegetation removal

Significant vegetation removal means the removal or alteration of trees, shrubs, and/or ground cover by clearing, grading, cutting, burning, chemical means, or other activity that causes significant ecological impacts to functions provided by such vegetation. The removal of invasive or noxious weeds does not constitute significant vegetation removal. Tree pruning, not including tree topping, where it does not affect ecological functions, does not constitute significant vegetation removal.

1462

#### 1463 Single((-Family Housing)) Detached Residences

Single((-family housing units)) detached residences are individual structures, including
 conventional houses and ((mobile)) manufactured homes, containing one primary
 dwelling unit. Attached accessory dwelling units may also be included in a single
 detached residence.

1468

#### 1469 Special Housing Needs

Housing arrangements for populations with special physical or other needs. These
 populations may include people aged 62 years and older; people with behavioral,
 physical, cognitive, or developmental disabilities; and homeless individuals and
 families.

1474

### 1475Species of Local Importance

1476 Species of local importance include priority species as identified by the state of 1477 Washington Department of Fish and Wildlife; bird species whose populations in King 1478 County are known to have declined significantly over the past 150 years; anadromous 1479 salmonids; and aquatic species whose populations are particularly vulnerable to 1480 changes in water quality and water quantity. 1481

#### 1482 Subarea Plans

1483 A subarea plan is a detailed local land use plan that implements, is consistent with, and 1484 is an element of the Comprehensive Plan containing specific policies, guidelines and criteria adopted by the council to quide development and capital improvement 1485 1486 decisions within specific subareas of the county. ((Subareas are)) Subarea plans are 1487 used for distinct communities, specific geographic areas, or other types of districts 1488 having unified interests or similar characteristics within the county. ((Subarea plans may 1489 include: community plans, community service area subarea plans, neighborhood plans, 1490 basin plans, and plans addressing multiple areas having common interests. The relationship between the 1994 King County Comprehensive Plan and subarea plans is 1491 1492 established by K.C.C. 20.12.015. 1493

#### 1494 Subarea Study

1495 A subarea study is a study that is required by a policy in the Comprehensive Plan to 1496 evaluate a proposed land use change, such as the establishment of new community 1497 business centers, adjusting Rural Town boundaries, or assessing the feasibility of zoning 1498 reclassifications in urban unincorporated areas. Subarea studies are focused on specific 1499 areas of the County, but do not look at the larger range of issues that a subarea plan 1500 would include. Subarea studies are separate from area zoning and land use studies 1501 defined in K.C.C 20.08.030. The Comprehensive Plan policies and accompanying text 1502 shall guide the scope and content of the subarea study.)) 1503

#### Subdivision

1505 ((A subdivision is land that has been divided into legal lots, or is the process of dividing
 1506 land into lots.)) A division or redivision of land into lots, tracts, parcels, or sites for the
 1507 purpose of the sale, lease, or transfer of ownership.

1508

1504

1509 1510

#### 1511 Sustainable economic development

1512 Sustainable economic development means economic development that does not
1513 exceed the ability of the natural or built environments to remain healthy while sustaining
1514 growth over the long term.

#### **Sustainable Housing**

Sustainable housing includes but is not limited to housing that uses sustainable building
 materials and construction practices to increase energy efficiency, reduce greenhouse
 gas emissions, and support transit-oriented development, as well as housing that is
 located or built in ways that reduce climate change impacts on residents and structures.

#### 1522 Substantially degrade

1523 Substantially degrade means to cause significant ecological impact. 1524

1525

Т

1515 1516

1521

#### 1526 ((<del>Sewer</del>)) Tightline

1527 Tightlining of sewers means that a sewer line is designed and sized to only serve a 1528 particular structure.

1529

#### 1530 **Totalizing source meter**

1531 A totalizing source meter is a device that will measure the volume of water withdrawn 1532 from a well over time and provide a sum total of the water extracted. This type of meter 1533 is different than a meter that would measure just the instantaneous volume of water 1534 being withdrawn.

1535

#### 1536 Traditional Rural Development

1537 In King County, traditional rural land uses could include, but are not limited to: low 1538 density residential uses; small scale farming, forestry and mineral extraction; small, 1539 neighborhood ((churches)) religious facilities; feed and grain stores; the keeping of 1540 horses and livestock; cottage industries, crafts and trades that support the residents of 1541 the Rural Area and Natural Resource Lands and/or the needs of natural resource 1542 production; and public and private facilities necessary to serve rural homes such as 1543 utility installations or public schools. In general, the rural development pattern in King 1544 County has historically been comprised of houses, barns, fences, and cultivated fields, 1545 but natural features and open spaces are the predominant visual image.

1546

1554

#### 1547 Transfer of Development Rights (((TDR)))

Transfer of development rights means the ability to transfer allowable density, in the form of permitted building lots or structures, from one property (the "sending site") to another (the "receiving site") in conjunction with conservation of all or part of the sending site as open space or working farm or forest. ((<del>King County allows transfers of development rights as part of standard subdivision, mobile home park and multifamily project review processes through its TDR Program. (King County Code, Title 21A)))</del>

1555 Transit-Oriented Development (((TOD)))

1556 ((A private or public/private real estate development project that creates, expands, 1557 maintains or preserves a mixed-use community or neighborhood within walking 1558 distance of a transit center, or stop, that is designed to encourage transit use and 1559 pedestrian activity. Transit Oriented Development projects support transit by increasing the density of residents, shoppers, visitors or employees per acre. New Transit Oriented 1560 1561 Development projects are often coupled with an increase in transit service to the area.)) 1562 Transit-oriented development refers to a style of development that often includes a mix 1563 of housing, commercial space, services, and job opportunities near public 1564 transportation. These developments encourage transit use and reduce automobile

1565 <u>dependence through thoughtful design that is sufficiently dense, prioritizes pedestrians,</u>
 1566 often reduces parking, and enhances access and mobility between residences, jobs,
 1567 and services.

1568

#### 1569 Transportation Concurrency Management ((System))

1570 ((The Growth Management Act requires jurisdictions to adopt and enforce ordinances)) 1571 Transportation Concurrency Management means regulations that prohibit development 1572 approval if the development causes the level of service on a transportation facility to 1573 decline below the standards adopted in the  $((\tau))$  Comprehensive  $((\tau))$  Plan, unless transportation improvements or strategies to accommodate the impacts of 1574 1575 development are made "concurrent" with the development. Concurrent with 1576 development means that transportation improvements or strategies are in place at the 1577 time of development or that financial commitment is made to complete the 1578 improvements or strategies within six years. (((The Concurrency Management System of King County)) King County's Transportation Concurrency Management program 1579 1580 establishes a process to manage new development in unincorporated King County 1581 based on transportation impacts on levels of service and the concurrency of needed 1582 improvements or actions. (See Chapter 8((:)), Transportation)((:))

1583

#### 1584 ((Transportation Demand Management (TDM)

Transportation Demand Management is a strategy to reduce the number of automobile
 trips, particularly trips taken in single-occupant vehicles. Transportation Demand
 Management encourages public transportation over automobile use and specifically
 refers to policies, programs and actions implemented to increase the use of
 high-occupancy vehicles (public transit, car-pooling and van-pooling and spread travel
 to less congested time periods through alternative work hour programs (See Chapter 8:
 Transportation):))

1592 1593

#### Transportation Facilities and Services

Transportation facilities and services are ((the physical assets)) elements of the transportation system that are used to provide mobility. They include roads, sidewalks, bike lanes and other facilities supporting ((nonmotorized travel)) active transportation, transit, bridges, traffic signals, ramps, buses, bus garages, park ((and)) ride lots, and passenger shelters.

#### 1600 ((Transportation needs for new growth

Transportation needs for new growth are associated with growth that has been planned
 for 2012 in this comprehensive plan.))

1603

1599

#### 1604 Transportation Needs Report (((TNR)))

The ((TNR)) <u>Transportation Needs Report</u> is a comprehensive list of ((recommended c))<u>C</u>ounty transportation needs ((through the year 2022 needed)) to implement the land use element <u>of the Comprehensive Plan</u>. It includes transportation needs for <u>the</u> unincorporated King County <u>road network((, and some city, state, and adjacent county</u> projects)). It does not include transit service or capital needs. (See Chapter 8((:)).
Transportation, <u>and Appendix C1, Transportation Needs Report</u>)

- 1611
- 1612 **U**

#### 1613 Unemployment Rate

1614 The unemployment rate is the percentage of the civilian labor force that is unemployed

- 1615 and actively seeking work.
- 1616
- 1617

#### 1619 Unincorporated Activity Centers

Unincorporated Activity Centers are the primary locations for commercial and industrial
 development in urban unincorporated King County. ((Currently, White Center is the
 only designated Unincorporated Activity Center, as other such centers are now parts of
 cities.)) (See Chapter 2((:)), Urban Communities)

#### 1625 Unincorporated Areas

1626 Unincorporated areas are those areas outside any city and under King County's 1627 jurisdiction.

#### 1629 ((Unique Wetland

1624

1628

1632

1638

1646

1655

1630 The term unique wetland refers to bogs and fens, which have unusual and sensitive 1631 water chemistries.))

#### 1633 Universal Design

1634 Universal design ((<del>as used in Chapter 2: Urban Communities,</del>)) means the design of 1635 products, buildings, and public spaces ((<del>environments</del>)) to be usable by all people((<del>, to</del> 1636 the greatest extent possible,)) with or without disabilities and which allows people to 1637 age in place in their home without the need for adaptation or specialized design.

#### 1639 ((Urban Centers

1640 Urban Centers are centers of concentrated employment and housing located within the
 1641 Urban Growth Area designated by the Phase II Countywide Planning Policies. Urban
 1642 Centers are to be serviced directly by high-capacity transit and are to contain a wide
 1643 variety of land uses, including retail, recreational, cultural and public facilities, parks and
 1644 open spaces. Unincorporated Urban Centers are represented on Urban Centers Map
 1645 included at the end of Chapter 2:Urban Communities.))

#### 1647 Urban Growth

1648 Urban growth refers to residential, commercial, and industrial growth that makes 1649 intensive use of land for the location of buildings, structures and impermeable surfaces 1650 to such a degree as to be incompatible with the primary use of such land for the 1651 production of food, other agricultural products, or fiber, or the extraction of mineral 1652 resources. Urban growth typically requires urban governmental services. 1653 "Characterized by urban growth" refers to land having urban growth located on it, or to 1654 land located in relationship to an area with urban growth.

#### 1656 Urban Growth Area

1657 The Growth Management Act requires King County's Comprehensive Plan to designate 1658 an Urban Growth Area, where most future urban growth and development is to occur to 1659 limit urban sprawl, enhance open space, protect the Rural Area((s)) and Natural 1660 Resource Lands, and more efficiently use human services, transportation, and utilities. 1661 The Comprehensive Plan designates an Urban Growth Area which includes areas and 1662 densities sufficient to permit the urban growth that is projected to occur in the county 1663 for the succeeding 20-year period. (See Chapter 1((+)), Regional Growth Management 1664 Planning, and Chapter 2((:)), Urban Communities)

1665

#### 1666 ((Urban Growth Target

The Growth Management Act and the Countywide Planning Policies require King
 County and its cities to plan for a 20-year population and employment growth target for
 each jurisdiction, based on designation of the Urban Growth Area, Urban Centers and
 the criteria of the Countywide Planning Policies. (See Chapter 2: Urban Communities)))

1671

#### 1672 Urban Planned Developments (((UPD)))

- 1673 Urban Plan Developments are site specific projects consisting of conceptual site plans,
- 1674 development stands, processing, and other elements.
- 1675

#### 1676 Urban Separator

1677 Urban separators are corridors of land that define community or municipal identities 1678 and boundaries, provide visual breaks in the urban landscape, and link parks and open 1679 space within and outside the Urban Growth Area. Urban separators are ((areas)) 1680 planned for permanent low-residential density within the Urban Growth Area. Urban 1681 separators protect adjacent resource land, ((environmentally sensitive)) critical areas, or 1682 Rural Area((s)) and create open space corridors within and between urban areas which 1683 provide environmental, visual, recreations, and wildlife benefits.

1684

#### 1685 Utilities Technical Review Committee (((UTRC)))

1686 The Utilities Technical Review Committee (((UTRC))) is an interdepartmental committee 1687 with responsibility for ensuring that water and sewer plans comply with county and state 1688 health requirements and county land use policies. The committee reviews the plans of 1689 all water and sewer utilities that operate in unincorporated King County and then 1690 recommends the plans to King County Executive and the Metropolitan King County 1691 Council for approval.

Variable tolling or pricing is any form of collecting a direct user fee on a roadway.))

- 1693
- 1070

#### 1694 ((<del>Variable Tolling</del>

V

- 1695 1696
- 1697 **W**

#### 1698 Water Availability

1699 Water availability means the presence of a water source of sufficient quantity and quality 1700 with applicable water rights that can serve the projected demand for the planning 1701 horizon, as shown in water comprehensive plans approved by King County. ((In the 1702 case of Urban Planned Developments, water availability is defined as: 1) presence of a 1703 water source with water rights that can serve the projected average daily demand; 2) a 1704 firm commitment to serve an area with water, as evidenced by either a water availability 1705 certificate, utility extension agreement or a King County approved water system plan; 1706 and 3) a firm financial commitment to provide water, as evidenced by either a capital improvement plan or utility extension agreement.)) 1707 1708

#### 1709 Water Quality

Water quality, in the context of the shoreline jurisdiction, means the physical 1710 characteristics of water within shoreline jurisdiction, including water quantity, 1711 hydrological, physical, chemical, aesthetic, recreation-related, and biological 1712 characteristics. Where used in this plan, the term water quantity refers only to 1713 1714 development and uses regulated under this plan and affecting water quantity, such as 1715 pollution generating surfaces and ((storm water)) stormwater handling practices. Water 1716 quantity, for purposes of this comprehensive plan, does not mean the withdrawal of 1717 ground water or diversion of surface water pursuant to Revised Code of Washington 1718 90.03.250 through 90.03.340.

1719

#### 1720 ((Water Reuse

Water reuse refers to the use of recycled water or the reuse of other non-potable water,
 such as greywater, stormwater, or collected rainwater, as allowed under relevant state or
 local standards.

- 1724
- 1725
- 1726 1727

#### 1728 Water Supply Availability

Water supply availability is the presence of a water source of sufficient quantity and
 quality with applicable water rights that can serve the projected demand through the
 planning horizon shown in adopted water comprehensive plans.

#### 1733 Water System Classifications

Water System Classifications define the level of service for different water systems. A
public water system is defined as any system that has more than one connection. A well
serving one house is a private system. Group A water systems have fifteen or more
service connections. Group B water systems have two through fourteen service
connections.)

#### 1740 Water System Plan

1732

1739

1750

1757

1763

1741 Water system plans are planning documents that include water system plans as referred 1742 to in Chapter 43.20 Revised Code of Washington, comprehensive plans of water supply systems (including combined water and sewer plans) as referred to in Revised Code of 1743 1744 Washington 57.16.010, water system plans and coordinated water system plans as 1745 referred to in Revised Code of Washington ((70.116.050)) 70A.100.050, and all other 1746 water system plans, comprehensive plans and plan elements that may be required 1747 under King County Code Chapter 13.24 and ((this King County)) the Comprehensive 1748 Plan for any special district or any other public or private entities that distribute or obtain 1749 water in unincorporated King County.

#### 1751 Watershed

A watershed, like a drainage basin, is an area that drains to a common outlet or an identifiable water body such as a river, stream, lake, or wetland. The six major watersheds in King County are Cedar River, Green River, Skykomish River, Snoqualmie River ((and)), White River, and the Puget Sound. These watersheds contain a total of 72 individual drainage basins. (See Chapter 5((:)), Environment)

#### 1758 ((Well Head)) Wellhead Protection

((Well Head)) Wellhead protection is a((nother)) way that King County can protect its
groundwater resource. This program directs purveyors to identify ((1)) one, ((5)) five,
and 10-year time of travel to their well(s) to identify contamination sources, and to
propose methods to reduce or eliminate contamination sources.

#### 1764 Wetland

1765 The term wetland means those areas that are inundated or saturated by surface or 1766 ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in 1767 1768 saturated soil conditions. Wetlands generally include swamps, marshes, bogs, and 1769 similar areas. Wetlands do not include those artificial wetlands intentionally created 1770 from nonwetland sites, including, but not limited to, irrigation and drainage ditches, 1771 grass-lined swales, canals, detention facilities, wastewater treatment facilities, farm 1772 ponds, landscape amenities, or those wetlands created after July 1, 1990 that were 1773 unintentionally created as a result of the construction of a road, street, or highway. 1774 Wetlands shall include those artificial wetlands intentionally created from nonwetland 1775 areas to mitigate conversion of wetlands.

#### 1776

1781

#### 1777 ((Wetland Banking

Wetland banking is a process that allows certain wetlands to be developed if the
 development is accompanied by the restoration or creation of wetlands in other areas.
 (See Chapter 5: Environment)))

#### 1782 Wetland Functions

((Functions refer to the ecological (physical, chemical and biological) workings or
 attributes of a wetland regardless of their importance to society. Food chain support or

1785 the transport and transformation of chemicals in ecosystems are examples of wetland 1786 functions. Water quality maintenance, flood storage, and wildlife habitat are examples 1787 of ecological functions to which society attributes a value.)) The physical, biological, 1788 chemical, and geologic interactions among different components of the environment that occur within a wetland. Wetlands perform functions that are grouped into three 1789 1790 categories: functions that improve water quality, functions that change the water regime 1791 in a watershed such as flood storage, and functions that provide habitat for plants and 1792 animals. (See Chapter 5((:)), Environment) 1793 1794 Wetland Values 1795 Values are estimates, usually subjective, of the worth, merit, quality, or importance of 1796 wetland attributes that are valuable and beneficial to society. Values vary by watershed 1797 or human community. Education, research, aesthetics, and recreation are examples of 1798 other wetland attributes that may be considered values in that they are beneficial to 1799 society. 1800 1801 Wildland-Urban Interface The wildland-urban interface is the geographic area where structures and other human 1802 1803 development meets or intermingles with wildland vegetative fuels. 1804 1805 ((<del>Will</del> 1806 See definition for "shall".)) 1807 Х 1808 1809 Υ 1810 1811 Ζ 1812 1813 ((Frequently Used Acronyms 1814 1815 APD Agricultural Production District 1816 CIP Capital Improvement Program 1817 CPP Countywide Planning Policy 1818 <del>CSA</del> Community Service Area 1819 ESA Endangered Species Act 1820 FCC Fully Contained Community 1821 FPD Forest Production District GMA 1822 Growth Management Act 1823 **GMPC** Growth Management Planning Council 1824 HOT High Occupancy Toll 1825 HOV High Occupancy Vehicle ITS 1826 Intelligent Transportation Systems 1827 KCCF King County Comprehensive Plan **KCSP** 1828 King County Strategic Plan 1829 HD-Low Impact Development 1830 LOS Level of Service 1831 **LSRA** Locally Significant Resource Area
