

Name	Location	Date	Comment
DEBBIE4 KRACHT	Stanwood, WA	2015-11-11	I believe that local county owned property be used for the community good and that we should use our public property in the most sustainable way possible.
Karen Wiseman	Worcester, VT	2015-11-11	I'm signing because we need to protect our environment long term.
Mary Kay Voytilla	Seattle, WA	2015-11-11	I support local, organic farm production.
Libby Lynn	Freeland, WA	2015-11-11	Please keep our area as free from chemically treated GMO corn! These crops contaminate surrounding land for miles.
Jessi Byrd	Seattle, WA	2015-11-11	We better serve our community and provide more benefit to much larger group of folks if we develop this land for organic farming. We believe we should be encouraging and supporting the growth of healthier food source options.
Joyce Steingold	Kirkland, WA	2015-11-11	No GMO No Roundup we don't want this in our community!!!!
Chelsea Hayes	Seattle, WA	2015-11-11	Regardless of where you stand on the issue of GMOs, this is beautiful land that could be better used by the county. Also, COWS DONT EAT CORN!
David Tomasevich	Henderson, NV	2015-11-11	I'm am former King County resident who still has strong ties to the community.
J Lane Goetsch	Leander, TX	2015-11-11	Every acre saved from GMOS helps save the future for our children.
Ryan Masterson	Maple Valley, WA	2015-11-11	I don't like government hand outs to big business
Rachel Cardone	Seattle, WA	2015-11-11	I spend a lot of time in Carnation and deeply value the commitment to organic farming principles. I work on water and sanitation issues, and am deeply concerned about King County shifting from its stated policy to support sound agricultural soil and water conservation practices while strengthening the local food economy. Yours Sincerely, Rachel Cardone
cay murphy	sedro woolley, WA	2015-11-11	I lived in Snoqualmie Valley for many Years and to allow this would have long reaching effects from the contamination of two rivers that flow through this valley. Every year there is flooding of this valley which would disperse the contaminates of this farm not only into neighboring farms but down stream ending up spewing these contaminates for over twenty five miles. These rivers feed eagles and other wildlife and would contaminate not only neighboring dairy farms, but ground water and wells because these farms all border these rivers, along with several small towns such as Monroe, Duvall, Carnation, Fall City and Snoqualmie. This would be a mega disaster with years of consequences on the health of the soil, wildlife, wild places and aquatic life, such as Salmon, fresh water mussels and others that depend on a healthy river. The toll on the health of the humans exposed to the pesticides and GMOs would be devastating. Factory Farms do not belong in this fragile ecosystem because already these rivers are polluted to the point of even having dead zones from the flow of waste from these small family farms which used to drain the waste from their farms right into the rivers and many still have discharge pipes leading into the rivers. This is a horror that can bring National consequences because of the dairys that produce milk for this country and from the smallest organisms in the soil to the largest mammals.
Louise Freymann	Seattle, WA	2015-11-11	I support sustainable agricultural practices. Adhere to the parameters of the RFP and use this land responsibly.
Kim Strid	Kent, WA	2015-11-11	I'm signing because I want to protect my family from pesticide toxicity from GMO's. Any 3rd party study done finds GMO'S anything but good for people and the environment. Don't believe the studies paid for by those in partnership with Monsanto. Even 1 GMO farms in Washington is too many!!
Trista Flores	Waitsburg, WA	2015-11-11	i'm signing because I have the right to know what in my food! GMO corn isn't food! it's poison!

Name	Location	Date	Comment
cynthia ettinger	Moraga, CA	2015-11-11	I am seriously opposed to GMO roundup ready crops, opposed to any company or individual owning any rights to air, food, and water. We need to get back to nature and treat the planet without chemicals manufactured for an unhealthy outcome!
Adam Dysart	Seattle, WA	2015-11-11	The valley needs to stay free of industrial farming practices
Michele Wilson	Issaquah, WA	2015-11-11	Our farmland is a quickly diminishing commodity that should be preserved as an organic farm. Who wants pesticides and other waste flowing into our rivers and environment from non-organic, go farms? I do not.
Sofia Campos	Tacoma, WA	2015-11-11	I care about the environment!
Leslie CAsE	Woodinville, WA	2015-11-11	How dare you throw away the taxpayers' money on such a terrible thing. Sell the property for what it's worth to responsible, organic farmers. NO GMO corn or other poisonous crops should be allowed here!
Erin McGhehey	Lynnwood, WA	2015-11-11	NO GMOs
Nancy Archer	Seattle, WA	2015-11-11	I'm opposed to the use of GMOs and try to eat only GMO free foods. Thanks for fighting against this!
Travis Homestead	University Place, WA	2015-11-11	Anyone who supports gmo farmers is an idiot
Laura Newcomb	Seattle, WA	2015-11-11	I'm signing because tilts has a proven track record for spreading good farming tactics. If we taxpayers are going to lose money it might as well be to sustain farmland for people food.
Michael Mendoza	Issaquah, WA	2015-11-11	I'm signing because I am passionate about sustainable practices! As a resident of Carnation, I also do not want additional pesticides and chemicals in our community!
Gayle Janzen	Seattle, WA	2015-11-11	I am appalled that King County is selling the Tall Chief property to a dairy farm that will be growing GMO corn that requires the use of the carcinogenic roundup ready and synthetic fertilizers when it could have sold it to Seattle Tilth who wanted to use the land to produce organic crops. Come on King County, this is a horrible decision and goes against everything we stand for in Seattle. You are making a very regressive and anti-environmental decision selling this to Keller Dairy. You ignored all your own requirements and requirements in your RFP so one can only assume there is corruption going on.
dexter russaw	Tacoma, WA	2015-11-11	No GMOs
Laurel Hughes	Edmonds, WA	2015-11-11	Don't you DARE pass this license for poison and death!!!!
Maria Pelova	Yellowknife, Canada	2015-11-11	The toxicity in this planet is so high that anything added may tip over the ecological balance beyond repair. Please people, let's make mature decisions based on where we want to go in the future.
Kaylee Anderson	Sammamish, WA	2015-11-11	Protect the snoqualmie river. Do not sell this land!!
Marvin Meyers	Fall City, WA	2015-11-11	Dumping Manure in the proposed area will lead to contamination of the streams and wetlands.
Helen Gabel	Bothell, WA	2015-11-11	Public money bought this land, it should be used for the public good, not the profit of a private company.
David Edwards	Seattle, WA	2015-11-12	I support the county's objective of preserving this land and protecting it from development into a McMansion property, but why would the county pass over such an excellent partner as Seattle Tilth in favor of this very dirty dairy farm? I would ask the county to reconsider the proposal from Seattle Tilth and halt the sale to the dairy farm.

Name	Location	Date	Comment
maren Neldam	Seattle, WA	2015-11-12	I want to see expanded opportunities for organic agriculture in the Snoqualmie Valley. The local community and region will see far more benefit working with Seattle Tilth on a long term lease than by selling to a conventional dairy farmer... including more employment opportunities, greater access to fresh produce for King County residents, cleaner stormwater and protection of local waterways, and expanded environmental educational opportunities for people of all ages
Summer O'Brien	Santa Clarita, CA	2015-11-12	This is disgusting and must stop NOW
Gary Gauthier	Victoria, BC, Canada	2015-11-12	Pushing to save our children from toxic foods.
Tyler Gibson	Tacoma, WA	2015-11-12	because the food and drug administration are more interested in profit rather than quality.
Debora Petschek	Kenmore, WA	2015-11-12	Organic farming is crucial to maintain for the time when conventional and GMO agriculture prove unsustainable. Besides, \$4.5 million of our tax dollars should not be squandered on a \$700,000 resale.
William Mowat	Bellevue, WA	2015-11-12	I want more organic vegetable production in King County. Please do not sell the Tall Chief Property to Keller Dairy.
Alyson Greene	Tucson, AZ	2015-11-12	Seattle Tilth's proposal makes sense for the whole community, and the RFP she be redone. Thank you.
Sharon Pappas	Edmonds, WA	2015-11-12	If these will save one person from having the diagnosis of cancer from eating these contaminated foods how could you not sign??
brian pierce	monroe, WA	2015-11-12	I believe we have the right to clean food and ecosystem. It's shared by all of us
Evelyn Lewis	Seattle, WA	2015-11-12	I agree that it is important to prevent construction of 16 mini mansions on this valuable farmland; however, please consider selling to Seattle Tilth which will preserve the farmland and provide healthy local food. Something smells fishy about selling to a corporation at a \$3,700,000 loss, and corrupt.
Ginger Niva	Arlington, WA	2015-11-12	I believe we need to protect our farm land for future generations and for our food supply.
Carmen Michelson	Seattle, WA	2015-11-12	Enough is enough. We learn the dangers of DDT and we banned it. Now we're faced with the dangers of Roundup and we need to stand up against the increase of its usage. No more poisons!
Allison Lovell	Bellingham, WA	2015-11-12	Please protect this land from those who want to use GMO, roundup and synthetic fertilizers!!!
Debbi Bracelin	Issaquah, WA	2015-11-12	I completely believe in this!
Edmond Raker	Seattle, WA	2015-11-12	This is public land. We have entrusted you with the duty to preserve it as such. Thank you for opposing the minimansion developer. Now continue by opposing sale to one dairy owner. It must remain in the public domain. That is your duty as our representatives.
josef mcinturff	Del City, OK	2015-11-12	Round up and gmo are bad news as any farmer could tell you short term they are great long term they are just a bad idea. They were never intended to be used on a yearly basis. I am a fruit farmer myself and my life depends on bees. Help save the bees.
zarya Bintz	Seattle, WA	2015-11-12	I don't want GMO's on our planet, let alone in our state. As a celiac non-gmo corn is one of the few pleasures I have left in life. When I eat gmo corn it makes me sick and it feels like I've eaten ground up glass. Please don't compromise what little natural food we have left. Thank you!
Alana Lysen	Portland, OR	2015-11-12	Health of our country.
Carrie Dunn	Seattle, WA	2015-11-12	There is no reason to sell land in King County for a loss right now. I support the Seattle Tilth Proposal

Name	Location	Date	Comment
Heidi Dillow	Carnation, WA	2015-11-12	taking care of our land is important to me. I want my children and grandchildren to be able to eat food grown in the valley.
rebecca miller	ferndale, WA	2015-11-12	I'm signing because I'm appalled at the decision to sell this land to a confinement dairy with unsustainable farming practices. It's 2015, time to move forward in the way our food is produced. with cancer on the rise everywhere, why would you sell to a company that uses round-up? It is a known carcinogen! Please sell to Seattle Tilth and do something positive for the people of Seattle!
Lauri Kinnan	Sammamish, WA	2015-11-12	I feel that the approval of the deal made was not in the best interest of the valley. I also feel like the contract approved had some misleading info from the dairy farmers
Paul Cox	Seattle, WA	2015-11-12	The County is going to take a significant loss on this property either way- but I'd much rather see it become active, organic farmland growing food for people instead of being used for feed for dairy cows.
Karen King	Woodinville, WA	2015-11-12	We need our farms and dairies to move away from poisons and synthetics. Our future depends on it.
Karen Goheen	Kenmore, WA	2015-11-12	I don't want more GMO crops in this pristine valley and support a better proposal for locally grown organic produce and sustainable agriculture methods! Studies have shown that agriculture can be organic and sustainable...why go backward?
Bry Osmonson	Seattle, WA	2015-11-12	Washington needs more organic agriculture - agricultural cultivation for human consumption that doesn't involve pollution of our beautiful land and waterways!
Shelby Evans	Federal Way, WA	2015-11-12	Anyone doing a little research on the truth about GMO's will support this petition.
Anthony Ramos	Shoreline, WA	2015-11-12	This is bullshit that's why!
Vanina Fernandez	Renton, WA	2015-11-12	This is b.s.
Carlee Avery	Kirkland, WA	2015-11-12	The county can lease the land for \$50k+ per year vs. a onetime sale of significant loss. More importantly the lease could go to organic growers.
Jennifer Rapuzzi	Seattle, WA	2015-11-12	I enjoyed camping and swimming on this property with my children and my parents who belonged to American Adventure in the 1980's. Our family loves the whole area out there as food for our souls. Please keep it as conscientiously run farmland. We must fight to keep our rural areas safe and thereby save ourselves and our beloved mother nature. Thank you.
Moir MacLean	Renton, WA	2015-11-12	Roundup and GMOs? Not with my tax money.
Rachep Martin	Issaquah, WA	2015-11-12	As an environmental educator teaching children and adults about watershed health, I am deeply concerned about the impact that large scale agriculture will have on our watershed health. Our salmon, a keystone species at the center of many other life cycles, will be directly and adversely affected by this. The city, state, and non-profits work tirelessly to restore habitat along streams and educate the public about the negative affect of synthetic fertilizers in our very own water.
david ludden	seattle, WA	2015-11-12	We can't eat Condos. Also, we need to support every acre of organic farmland we can!
Elaine Thompson	Kenmore, WA	2015-11-12	I'm signing because I want my foods to be locally grown by local farmers who know the importance of sustainable farming.
Heidi Bohan	Carnation, WA	2015-11-12	This must go back for a review. It is clear that the Selection Committee did not meet the RFP's criteria for its members, and then did not accurately score these proposals based on the RFP's own description, and surely subject to ethical if not legal challenge.

Name	Location	Date	Comment
Laurel Baum	Woodinville, WA	2015-11-12	We need to preserve local, Organic farmland, for the resiliency or our communities.
Michele Milligan	Kenmore, WA	2015-11-12	Keeping the Valley clean of pesticides will lower the pollution that will ultimately end up in the water ways especially do to the close proximity of the river.
Birgit Grimlund	Seattle, WA	2015-11-12	I believe strongly in supporting organic farming.
Jennifer Peterson	Seattle, WA	2015-11-12	I support Seattle Tilth!
Russell Goedde	Seattle, WA	2015-11-12	I'm signing because I absolutely oppose corn monoculture, GMO- based agriculture. I'm horrified the County would even consider this as competent stewardship of public land.
Jennifer Miller	Buckley, WA	2015-11-12	To save and protect small organic farms from contamination
Katie McGee	Everett, WA	2015-11-12	I value pristine outdoor recreation in the Snoqualmie Valley.
John Weaver	Bothell, WA	2015-11-12	Promotion of small, organic farms.
Maddie Hunt	Kirkland, WA	2015-11-12	I love snoqualmie and local farming within Washington. We don't need any more big companies coming in and taking over there our food!
Kevin Milam	Seattle, WA	2015-11-12	opposed to growing GMO Roundup ready corn on this site.
Lorraine Brown	portland, OR	2015-11-12	Stop destroying Mother Earth!
Jonathan McPherson	Kirkland, WA	2015-11-12	If we want people to eat local, healthy foods, we've got to provide a place to grow them.
Shannon Williams-Flora	Seattle, WA	2015-11-12	Please look up any articles about the increase of birth defects in beautiful Kuaii and Maui in towns bordering GMO crops.
Gayle Nordholm	Woodinville, WA	2015-11-12	I am strongly opposed to GMOs and the possibility of contaminating organic practices or our valued water resources. For the better health of all...this needs to stop!
Jim Gale	DUVALL, WA	2015-11-12	My kids swim in the downstream of this. No further chemicals are acceptable. Applicants should find another approach.
Meghan O'Hanlin	Spokane, WA	2015-11-12	We need to keep our dirt.
Debra Nordgaard	Osseo, MN	2015-11-12	No more poison in our food, we must ban this chemical cocktail!
Monica Burnison	Seattle, WA	2015-11-12	As a King County farmer and as someone who is concerned about the health and sustainability of our local foodshed, I am deeply concerned about and opposed to the proposal to sell the former Tall Chief Golfcourse to an operation which demonstrates a significant risk to the health of the land in question as well as surrounding land and people. I do not believe this action is in the best interest of the people of this county, nor is it in line with the County's stated values around building a sustainable local food system.
Karin Hsiao	Woodinville, WA	2015-11-12	I believe Seattle Tilth's proposal is a better fit with the RFP, and for the Valley, and it seems as if the Keller proposal has misleading and indeed information that is not factual in it that may have tipped the scales in their favor. I have always thought positively of the King County Council and your support of local agriculture, and I hope you will reconsider this decision. Thank you.
Jeanne Sheldon	Woodinville, WA	2015-11-12	This use is not consistent with the County's stated goals and will not increase sustainable agriculture in the valley.
Katherine Smith	Redmond, WA	2015-11-12	I want high quality, organic, non-GMO food grown here. Not this other trash.
Red Cedar Schellenbach	Scottsdale, AZ	2015-11-12	I am planning to move to Washington in the future and want prime farmland to be preserved for everyone!
Ann Hart	Carnation, WA	2015-11-12	I love my valley

Name	Location	Date	Comment
Fancy Morales	Seattle, WA	2015-11-12	This is an outrage of a purchase using tax payer dollars. To sell this land at a huge loss and also to purpose it for a toxic hazard to the surrounding community. Redo the RFP and make a choice in favor of the community's health and longevity.
Chariti Saunders	Seattle, WA	2015-11-12	I say NO to GMOs and I support organic farming!
Laura Martin	Seattle, WA	2015-11-12	I want more organic farms and not fewer! No GMO's please. our future depends on clean, sustainable food growing near us.
Katrina Byars	Carbondale, CO	2015-11-12	It is incomprehensible to convert permanent public assets to private assets that threaten public health. Where is the EIS on this!
Marilyn Roy	Seattle, WA	2015-11-12	Support efforts to increase organic community sported agriculture
Betsy Bell	SEATTLE, WA	2015-11-12	Our region needs all the organic-production land farmers are willing and able to create. We must keep what is dedicated to organic, non-GMO crops.
Kimberley Russell	Lakewood, WA	2015-11-12	No GMO'S!!!
Lil Klein	Redmond, WA	2015-11-12	I am outraged that King county would consider selling farmland to anyone who will damage and poison the land and compromise neighboring farms and their crops!
Seth McKinney	Seattle, WA	2015-11-12	To put farmland in the best hands.
Sherrie Morts	Redmond, WA	2015-11-12	Education and Healthy Food: my 13 year old daughter is learning to farm at an organic farm in the valley called First Light Farm. She will carry this knowledge into the future. We treasure the integrity of the farmland in the valley and want it to be preserved. First Light Farm allows many people to eat organic food at reasonable prices. They also donate food to food banks throughout the area. We need more small organic farms in this valley. PLEASE do not sell the land to Keller Dairy.
Annika Fae	Shoreline, WA	2015-11-12	I'm signing because I care about this valley and because I think that the best bottom line is not always based on dollars that you can count. Please support healthy nature, small sustainable farms and the community.
Julie Hix	Federal Way, WA	2015-11-12	We need to carefully manage farmland like this in a 'future-responsible' manner.
Hugh Jennings	Bellevue, WA	2015-11-12	I am signing as I can't really believe that the Tall Chief property could be legally sold to Keller Dairies when it uses glyphosate and synthetic fertilizers that will pollute the land.
Marlene Meyer	Bellevue, WA	2015-11-12	I have read horror stories from glyphosate, especially to children. Please do not let this happen. health issues
Esther Krone berg	Olympia, WA	2015-11-12	How Terribly sad and short sighted to desecrate this rich prosperous land with poisons to grow unhealthy food. It is the exact opposite direction we should be taking. And to sell it at a loss is a shameful act against the people of your community.
Lori Taylor	Coupeville, WA	2015-11-12	Food quality and land stewardship matter
Mark Dworkin	clinton, WA	2015-11-12	I don't think this land should be used for industrial, non-organic agricultural purposes
Debbie Goodrich	Auburn, WA	2015-11-12	Keep it local. Not corporate farming. Keep small farms sustainable and looking for new ways to control pests from our traditional forms of control. It's time to say no to overstocking and overusing lands that are fertile and can be grown with long term sustainability

Name	Location	Date	Comment
Kate Nichols-	Bellingham, WA	2015-11-12	Because I believe that we need to use our potential farmland in the best way possible, and planting GMO corn, using synthetic fertilizers, is not the best possible use of the land. I'm disappointed that Seattle Tilth was not given the RFP. I live in Whatcom County and I know how important it is to encourage new farmers like Seattle Tilth would do. I hope you rescind your decision to sell 'Tall Chief' Farmland to confinement dairy. Sincerely, Kate Nichols
Sasha Stark	Kirkland, WA	2015-11-12	I am not a fan of toxic chemicals
betsey fausset	Seattle, WA	2015-11-12	I do not want this land and river to be ruined!
bob Campbell	Enumclaw, WA	2015-11-12	Don't want a good thing ruined.
Paula Waters	Woodinville, WA	2015-11-12	I support sustainable farming in the Snoqualmie valley, without synthetic fertilizers and use of dangerous herbicides, among many other reasons.
Teanna Kordel	Redmond, WA	2015-11-12	I want our Snoqualmie Valley to be pristine, productive and clean.
Linda Scott	Seattle, WA	2015-11-12	I am against any future GMO products being grown in agricultural concerns in King County.
Pamela Ronson	Seattle, WA	2015-11-12	This is bogus.
Donald Zimmerman	Reno, NV	2015-11-12	Unacceptable. This is the kind of thing that only happens when people don't pay attention....let's stop this in its tracks.
Susan Yates	Seattle, WA	2015-11-13	The tilth proposal clearly matches the selection criteria for this site. Please use our public dollars in a wise way which fits the RFP
Deborah Fly	Redmond, WA	2015-11-13	I want to protect our farmland for organic, natural produce and products!!!
Barbara Sly	Carnation, WA	2015-11-13	As a taxpayer, I am outraged that King Co. would spend over \$4 million on a property and then sell it to a single enterprise for more than \$3 million less...is there a kickback here? Beyond the fiscal irresponsibility issues, I am appalled that there was an obvious disregard for soliciting response from the farming community. On a personal level, for about 16 years I've boarded my 3 horses less than 1/8 mile from Tall Chief and would be interested to see if part of the property might be available for recreational trail use...but the other considerations take priority and making a gift of over \$3 million in tax paid value to one individual is the strongest argument for King Co. to reject this sale.
Casey Fortenberry	Seattle, WA	2015-11-13	I care!
Dorothy Simpson	Redmond, WA	2015-11-13	The Seattle Tilth proposal is much more in keeping with the sustainable farming policy than the mega corporation Keller Dairy. Selling to them is no better than the originally proposed mega-mansions.
Kristin Eis	Bothell, WA	2015-11-13	We need to start feeding our humans, animals and land real food
Janice Kobak	\Enumclaw, WA	2015-11-13	Protect small farms and farmlands. Don't let corporate farms contaminate this prime farm/ wildlife area.
wynnw weinreb	chelan, WA	2015-11-13	I am signing because i am horrified that king county would consider selling this prime farmland to a gmo conventional dairy farm. please reconsider thank you
Robyn Wall	Redmond, WA	2015-11-13	Wish the county would operate taxpayers money like it was their own money. \$3.7 million dollar loss is unacceptable.
Alayna Dewlen	Seattle, WA	2015-11-13	I support organic and sustainable farming practices
Juliane Gust	Seattle, WA	2015-11-13	I read the long version of the story and it guys far beyond the alarmist headline of the initiative. Farm land is being increasingly precious, and there is a huge need for space for Tilth operations to feed and educate the people of our country, and give children a place to learn about growing food.
Merrily Jones	Seattle, WA	2015-11-13	I am so against using GMOS and Roundup, etc.
