kate storms	Seattle, WA	2015-11-17	This sale is not in line with the values of the citizens of King County. GMO seed production can interfere with other organic farm operations.
John Birnel	Seattle, WA	2015-11-17	we need to support local resiliency in as sustainable a way as possible. Seattle Tilth's proposal fits that mold so much better.
Guidon Balangitao	Portland, OR	2015-11-17	Enough toxins in the soil now. We need to stop and reverse the trend of too much chemicals used in farming, which ultimately leads to the eventual dependency of those chemicals.
sarah Barnett	duvall, WA	2015-11-17	Because the Snoqualmie valley has such high long term value and this is such a short sighted plan.
Stephanie Bell	Everett, WA	2015-11-17	Dairy farms are cruel and toxic, this must be STOPPED.
sara breakfield	Seattle, WA	2015-11-17	Tilth would be a much better owner of this land. Please stop poisoning the Land we live on with chemicals and GMOs.
Mary Komarnitsky	Fall City, WA	2015-11-17	I've researched this issue extensively and I'm signing this Petition because the community value offered by Seattle Tilth far exceeds that of Keller Dairy and that's important since the land was purchased with my tax dollars. Also the proposals reviewed and County selection were not made according to terms laid out in the RFP. The County needs to change their decision on this land sale.
Sharon Dantzler	Bonney Lake, WA	2015-11-17	I support organic farming and having a GMO CORN FIELD next to organic farms would devastate then and shut them down! This is not in the highest good if all! I support peace and organic farming practices.
Elaine Ray	Enumclaw, WA	2015-11-17	I disagree with King County's decision to sell this land to a confinement dairy. This is not sustainable and hurts the environment, animals and local farmers!!!! Stop this now!!!
Jenny McCrary	sumner, WA	2015-11-17	If this proposal goes through, it will just be devastating to me and so many others who use organic produce. I am a cancer survivor and organic produce has helped me to stay alive and cut down on all the potential carcinogens by utilizing organic produce. GMO's are making people so sick, and the use of such in American food production is a disgrace, when other parts of the world seem to really care about their residents by disallowing such a travesty.
Ingrid Ougland Sellie	Sammamish, WA	2015-11-17	With everything we now know, how on earth could this be considered a good idea? Do you realize the backlash this will have?
Ivy Durslag	Seattle, WA	2015-11-17	Sustainable, non-toxic, food production is essential to the overall health of agriculture in King County.
Laura Vogel	Seattle, WA	2015-11-17	I support sustainable farming
Lynn Pratt	Buckley, WA	2015-11-17	Environment and health
Brigitte Ardea	Seattle, WA	2015-11-17	The valley is experiencing flooding in winter every year (this month already twice), so that the Snoqualmie River overflows its banks, covering the farm land and making the roads impassable. A farm using glyphosphate, which has been declared a carcinogen by the WHO, will have it's run-off cover organic farmer's properties. In essence endangering their livelihood as organic farmers. This in addition to selling Tall Chief at a \$ 3,780,000 loss to taxpayers' funds. Let's do the right thing!
Jessica DiStefano	Issaquah, WA	2015-11-17	I don't want my children exposed to chemicals that have been proven to cause cancer.
Teresa Eastwood	Bonney Lake, WA	2015-11-17	This will have a devastating effect on the farming community and the environment and goes against the County stated mission of using that land for the public good and to promote small farming

Name	Location	Date	Comment
Marla Lobrie	Buckley, WA	2015-11-17	I want our water to be safe, I do not want fish hurt, I believe all GMO foods should be banned for public safety and I believe family run organic farms are beneficial to the community and to our health
Maren Van Nostrand	Carnation, WA	2015-11-17	I want to help protect one of the last remaining pristine rivers in our country from negative and unnecessary development.
Kimberly Shelton	Seattle, WA	2015-11-17	I live and work in this Valley and I want it to be healthy and safe for the future generations
Shannon Schultz	Duvall, WA	2015-11-17	I'm signing because our valley should be as healthy and sustainable as possible for today, tomorrow and forever. We owe it to our kids and grandkids to start to make informed decisions about our food and health.
Kerri Foreman	Issaquah, WA	2015-11-17	I live in the Valley and would like this to be GMO free!!
Gloria Gee	Enumclaw, WA	2015-11-17	I want to keep GMO's out of state as much as possible and I also support small scale organic farming.
Vicki Holt	Seattle, WA	2015-11-18	I am very concerned about the sale of the Tall Chief property to a factory dairy farm that will degrade the nearby environment for farmers attempting to grow organic produce.
dreama blankenbeckler	Seattle, WA	2015-11-18	I am against this type of inhumane dairy farming and genetically modified products of any kind. RoundUp is poison. I am for organic practices.
Michelle Mears	Bellevue, WA	2015-11-18	The valley doesn't need any Monsanto product, chemicals or GMO's.
Sylvan Bonin	Seattle, WA	2015-11-18	I only recently moved out of King County. I've worked towards sustainable agriculture and local food systems in KC and Puget Sound for decades. I've worked with Conservation Districts, Seattle Tilth, small business owners, and many others. The Tilth incubator system is one of the most effective plans I've seen for meeting environmental, economic, social justice, food security, cultural, and diversity goals.
Martha Moritz	Seattle, WA	2015-11-18	I care about small farmers, clean water, and healthy food!
reid hale	renton, WA	2015-11-18	i like good food
Laurie Rose	Issaquah, WA	2015-11-18	I am disturbed that the Tall Chief golf course may have been offered to Keller without merit. It seems the guidelines were ignored and our valley deserves better. Please reconsider Tilth's proposal which although very extensive and detailed, follow the rules set by the valley and offer organic farming, training, sustainable options and opportunities for many.
Carolyn Cochran	Oak Harbor, WA	2015-11-18	Our precious farmland diminishes more every year. Please save this land for the small farmers who struggle to feed us here in the Salish Sea.
Kathleen O'Hanlon	Seattle, WA	2015-11-18	I am a King County resident & I STRONGLY oppose this sale to Keller Dairy.
mary duffy	seattle wash, WA	2015-11-18	It is a beautiful piece of the earth which we need to preserve and enjoy its beauty.
Damon Bishop	Issaquah, WA	2015-11-18	I live and work in the Snoqualmie Valley, and local, sustainably grown organics are important to me.
Brian Drake	Woodinville, WA	2015-11-18	King County taxpayers deserve a solid return on investment (\$4.5M) - disposing the property for a fraction of that amount for benefit of one private farm does not provide the value to our residents.
Nora Moore	Lower Lake, CA	2015-11-18	I too live in a rural area that does not want any HMO farms endangering their organic crops.
Alan Trimble	Ocean Park, WA	2015-11-18	I started the UW farm on campus and understand how politics and process can get in the way of good decisions. The county appears to have failed on process and therefore come to a bad decision.

Name	Location	Date	Comment
Kristina Vandersnick	Buckley, WA	2015-11-18	It is important to me that our government STOP making decisions like this and start caring for our future generations and our land. Big AG is dead to me. My money and my interest in in local, organic, and small. Other countries will not eat this food and neither should we! It is poison. US has the highest cancer rates in the world! Wake up king co. and work for us!
paul liebert	seattle, WA	2015-11-19	and will be much healthier for all sorts of animals and soil and everything else and less pollution and runoff if the land is sold to Seattle tilth.
Minda Tochiara	Shoreline, WA	2015-11-19	I want to keep the water and land clean. I support the Seattle Tilth proposal and oppose the land being used to raise crops that pollute our water.
Margaret Schwender	Kirkland, WA	2015-11-19	I want no part of GMO in the Snoqualmie area..support local agricultural farming
farah Joumaa	Seattle, WA	2015-11-19	Because we need to live in a healthy environment
judi Bruning	Marylhurst, OR	2015-11-19	GMOs are. Proven to effectually over time to poison us from inside. To out. Not the 90 day studies given by FDA. BUT over yrs. Montesano is about money not human consumption of foods. Stop this sale of prime farm land NOW . Milk is a staple for us all... Pasture given over to GMOs foods is greed when you have another. Buyer(s). Stop in the name of Love. Poisoning our waters, seeds scatter on to other properties who do not want to be infected. My family lives there.. Wants to buy properly grown foods.
Lorelette Knowles	Kirkland, WA	2015-11-19	I want to support our environmental and community health, and I am dismayed by this proposal to sell publicly owned prime farmland when we need clean, healthy, nutritious food. Please stop this sale and return the proposal for more consideration!
Jayne Boker	Redmond, WA	2015-11-19	I am against foods grown with GMO seed. This DOES NOT support the stated policy for King County --centered on returning this previous golf course into a sustainable farming operation using sound agricultural soil and water conservation practices while strengthening the local food economy and production.
Carri Dawn	Snohomish, WA	2015-11-20	NO MORE houses where farms should be, I am a farmer! Follow the RFP, and please do not kill the honey bee's with GMO or roundup ready crops! you purchased this with a promise to make it a positive addition to the community. I live near 4000 acres you promised the same....you have destroyed it for public use, even for the homeowner who owns 2 acres of it. You lie, it will never be better... only worse!
Karen Sanders	Seattle, WA	2015-11-20	I'm not knee-jerk anti any GMO's, but round-up ready makes no sense, especially in an area of importance to organic farmers. Don't do this.
AFRA PAYNE	Carnation, WA	2015-11-20	No GMO America and look after you people properly!!!
Franziska Edwards	Seattle, WA	2015-11-20	Dairy farms are bad for animals, people and the environment.
Carnele Cummins	Black Diamond, WA	2015-11-21	We NEED to preserve, promote & protect small & especially organic farming! GMO farming & big farm mentality with its poisonous runoff invades all the small natural farming & is killing us.
Mary Britton-Simmons	Duvall, WA	2015-11-21	I support the proposal by Seattle Tilth and organic farming.

Name	Location	Date	Comment
Amy Robison	Vashon, WA	2015-11-22	That is public land and should not be sold at a loss and should not be sold to a GMO farmer. If it is to be sold, sell it to an organic farmer or organic farm group. We do not need more GMO food, round-up or other fertilizers going into our land and water, or a confinement dairy farm. Think about the future for your children. Sell to Seattle Tilth and allow the land to be productive for many, not a profit center for a few.
Capri Figueroa	Long Island City, NY	2015-11-22	My food shouldn't be a science experiment.
Susan Nereim	Sammamish, WA	2015-11-22	I oppose GMO crops, and instead wish to see expansion of organic produce.
Pati An	Woodinville, WA	2015-11-22	The Snoqualmie Valley is a jewel in our survival kit.
Nichole Thomaselli	Seattle, WA	2015-11-23	I believe Keller Dairy is the wrong decision for Snoqualmie Valley.
Barbara Center	Fall City, WA	2015-11-23	Valley needs to be GMO free
tamera strandwold	Sammamish, WA	2015-11-23	This is not the kind of farming we need in our area.
Barb Levy	Seattle, WA	2015-11-23	This would be a blight on one of the most precious areas of farmland in our state.
Martha Mihara	Seattle, WA	2015-11-23	I am strongly opposed to GMOs (and the Round-up that goes along with it). I am also opposed to factory farming. Go organic. I want organic farms close to Seattle!!
Marta Sloan	Seattle, WA	2015-11-24	I don't want my tax dollars here in King County to be wasted in this way. Also I want there to be good agricultural use out of the land
Melinda Kurtz	Langley, WA	2015-11-24	Wake up and save organic farms, farmlands and rivers! Don't become California.
Carmen Almodovar	Bellevue, WA	2015-11-24	I'm appalled that King County has ignored the proposal from Seattle Tilth which would benefit the area in so many ways that are beneficial to local farming, the community, and the environment. Please reconsider!
nancy hulbert	lynnwood, WA	2015-11-24	I do not want to give up beautiful farm land in my state to that greedy uncaring Monsanto. We want wholesome natural organic. That GMO is toxic and they know it. I won't buy anything from Wa state if it happens, I'll grow my own and I buy only organic
Anita Hilyer	Lake Forest, CA	2015-11-24	To preserve this "Jewel" and stop the proliferation of chemical induced food and the takeover of small conscientious business by rich landowners whose concern is profit, not the health of the land and the community.
Sarah Venzon	Issaquah, WA	2015-11-24	I oppose round-up ready crops.
Pastor Skip Viau	Seattle, WA	2015-11-24	I'm a King County resident in favor of adding acreage for local, organic vegetable production within the county.
Erik Ryznar	Seattle, WA	2015-11-25	My friend is a prospective farmer in this area.
Rachel B	Bellevue, WA	2015-11-25	I don't want these things in our valley! I get food from there and I don't want those things in our environment.
Linda Murtfeldt	Seattle, WA	2015-11-26	I am horrified that King County would chose to sell prime farm land to a dairy that will pollute our land and water, and use horrific herbicides, instead of selling to Seattle Tilth. This action must be stopped. There are so many of us who would choose organic farming to milk that results from the poisoning of our land. Please stop this action!

Name	Location	Date	Comment
Dwight Rousu	Redmond, WA	2015-11-26	GMOs and roundup threaten to change and poison the biosphere in ways that have not been proven safe in long term controlled tests.
Todd Hymas	Seattle, WA	2015-11-26	This area is home and needs to be saved.
Kristin Meijer	Kirkland, WA	2015-11-27	I am for stopping changing this land because maybe this needs more thought because I have worked as a volunteer learning to garden for Seattle Tilth for four years. So can we rethink, what to do with this land and not sell to a larger land owner. Mrs Kristin Meijer
Keith Strandwold	Sammamish, WA	2015-11-27	I do not support the use of GMO corn, pesticides and synthetic fertilizers.
Amanda Hannah	Seattle, WA	2015-11-27	I am opposed to selling this land to the Keller Dairy or any other company that intends to use it for purposes not outlined in the RFP.
Sandy Smith	Kirkland, WA	2015-11-27	We want this prime growing area to be used as organic sustainable farmland, allowing Seattle Tilth or other vegetable growers to add to the quality of produce available in our area. If used as large operation dairy farming, it could even destroy other farms downstream with the typical pollution that accompanies large dairy farms
Christina Patti	Seattle, WA	2015-11-27	I'm against the business practice of confinement dairy, and against planting of GMO plants and use of glyphosphate and synthetic fertilizers, and use of such plants as feed for dairy cows. In particular I oppose this sale to Keller Dairy when a proposal from Seattle Tilth has been submitted to put the land to better use that would prove a better fit in the local community and support neighboring organic farms rather than hurting them, which the Keller Dairy operation would.
Jodi Whitson	Auburn, WA	2015-11-28	I don't believe in these practices just wrong
Christine Von Ditter	Port orchard, WA	2015-11-28	The health of our land and our bodies are important. Stop poisoning us.
Gail Richter-Nelson	Owings Mills, MD	2015-11-29	I support non-GMO small scale farming for producing non-toxic vegetables for local consumption. There are too many toxins in our food supply.
Murray Morris	Sammamish, WA	2015-11-30	I was a Toxicologist for over 20 years and know how important good, local food is. I agree with Seattle Tilth's proposal. We need more quality vegetable farms in the area, both for variety and to improve pricing locally.
Amoris Walker	Portland, OR	2015-11-30	I don't want a large dairy farm in the Snoqualmie valley.
lynn walker	corvallis, OR	2015-11-30	I care. . .
Katherine Anderson - Winkler	Silverdale, WA	2015-12-01	No gmo
Kadie Collom	Bothell, WA	2015-12-01	The use of land is unacceptable.
Yvette Downs	Federal Way, WA	2015-12-01	Confinement dairies are basically torturing cows and are horrible for the environment.
Kathleen bies-jaede	Saint Cloud, MN	2015-12-01	I believe in this cause
Ria Cherie	Bellevue, WA	2015-12-01	The LAST thing we need is more dairy cows, GMOs, and chemical laden property in WA state!!!! Nor do we need big business to get bigger!!!! Seattle Tilth would do an AMAZING job of fulfilling the purpose that your dept. is charged with protecting, supporting, and encouraging. Choose balance and health for the Snoqualmie Valley and STOP ordinance 0423!!
Betty O'Quinn-Truhler	Seattle, WA	2015-12-01	I am signing because I live on a Real planet which can grow real good food without destroying real people and everything else in its way.

Name	Location	Date	Comment
Mike Roberge	Seattle, WA	2015-12-01	We need to stop all efforts that promote genetic engineering and factory dairy farming. It's unhealthy, unsustainable, pollutes the environment & is inhumane in practice.
Dagmar Achtelik	Seattle, WA	2015-12-01	Factory dairy farms are extremely environmentally damaging. Please do not allow this to happen to the Snoqualmie Valley.
Maria Protis	Seattle, WA	2015-12-01	Stop brutality to animals. I am sick and tired to see helpless animals been slaughtered.
Ruth Broome	Jessup, MD	2015-12-01	I used to live in Seattle.
Roberta Briceno	Peterborough, Canada	2015-12-01	Stop poisoning us!
Elisa Short	Bothell, WA	2015-12-01	Unacceptable use of land for animal welfare, environment, and return on investment for taxpayers. I don't see who could possibly benefit besides the factory farm.
Jan McGruder	Kirkland, WA	2015-12-01	We need more farmland that grows food for people, and we need to protect those organic farmers who already grow our food. Please reconsider!
Jeanne Friedman	Olalla, WA	2015-12-02	No, please don't put a dairy farm on this tract of land.
Sandy Fox	Seattle, WA	2015-12-02	I love Mother Nature more than all of the man made things sucking the life out of her. Let's wake up before it's too late for our children.
Sarah Chiri	Olympia, WA	2015-12-02	I'm signing because this is BULLSPIT!
Matthew Woywod	Seattle, WA	2015-12-02	Signing because this kind of farm should not exist in the PNW.
Gail Goldman	Woodinville, WA	2015-12-02	I'm signing because I care about our planet and all of its inhabitants.
Erica Lamm	bellingham, WA	2015-12-02	Screw your drugs and blood money! We don't need more toxicity!
Tami Thomas	Bellevue, WA	2015-12-02	We don't want a dairy confinement here!!!!
Arlene Levy	Kirkland, WA	2015-12-02	Tilth is a fabulous organization & would bring wonderful community support to the area. I strongly request their proposal be reconsidered.
Jenn fowler	bellevue, WA	2015-12-02	There is no way to cloak wrong. Please vote no.
jennifer godfrey	seattle, FL	2015-12-02	Dairy confinement farms SUCK
Michael Mah	Pittsfield, MA	2015-12-02	A dairy operation with 2500 cows produces more untreated fecal and urine waste than a city of 411,000 people.
Michael Ciervo	Plattsburgh, NY	2015-12-02	CAFO's, GMO's , and synthetics are either cruel, dangerous or both.
Cheryllyn Philo	Seattle, WA	2015-12-02	I love the idea of keeping this land for farming. But the use of pesticides and fertilizers. That's crazy. What's even worse is gifting this farmer taxpayer money. If you want to keep it farming. Give him a 99 year lease for cheap. You've already paid 4+ million for it. Why take the loss. After all the county might want to use the property when those 99 years are up, maybe we will need a park, as at the rate we are going all of king county will be mcMansions. Then you'll be buying the property back again for 50 million.
Amber Wright	Spokane, WA	2015-12-02	Because GMO and Round Up products are harmful to the environment.
Shana Kelly	Seattle, WA	2015-12-02	Not only do we have our land to worry about, but all of the toxins run into the Puget Sound further destroying ecosystems.
John Flynn	Spokane, WA	2015-12-02	I do not buy any dairy products. I do not approve of dairy or beef farming methods.
