

Name	Location	Date	Comment
Chris Donka	North Bend, WA	2015-11-05	This is wrong on so many levels. We don't need more GMO's and poisons. And the county should not be mismanaging \$3,000,000 of tax payer funds!
Kathryn Enlow	Seattle, WA	2015-11-05	I'm opposed to GMO FOODS AND, MORE IMPORTANTLY, any thing that is or is related to Roundup Poison!!!
Shaun Pedersen	Greenacres, WA	2015-11-05	Save Tall Chief
Trevor Ose	Duvall, WA	2015-11-05	King County's Natural Resources and Parks Department decision to sell Tall Chief for a \$3,700,000 loss to one of the largest landowners in the Snoqualmie Valley, for dairy production using GMO's and the known carcinogen glyphosate, simply is not in line with the County's requirements under the RFP. I am sickened and saddened at the possibility. Is this just one more back door hand shake deal? Whose pockets and popularity are filling because of this? Or is this simply the decision of overworked County employees trying to be rid of an obligation with the least amount of current and long term effort on their parts? REJECT THIS PROPOSAL!! And consider the 75 acre ORGANIC alternative!!
Chris Donka	North Bend, WA	2015-11-05	Doesn't it seem like some sort of class action suit by taxpayers could be filed?
Liz Crain	riverside, WA	2015-11-05	I live in the Snoqualmie Valley and farm organic! Please don't taint our water with this!
Karin Czulik	North Bend, WA	2015-11-05	Because it's crazy to perpetuate the insanity of growing our food with toxic chemicals.
Heidi Cruz	Redmond, WA	2015-11-05	I believe the proposed use of this land is counter to sustainable environmental health of the region and the pro-environment culture of the local area.
Deborah Nimmons	Seattle, WA	2015-11-05	Dairy farming is not high yield, sustainable farming. Organic vegetables and fruits can feed a lot more people healthy meals. The impact of runoff from dairy farms, in addition to soil and air impacts do not fit with the King County plan; nor do they make fiscal sense. Selling the land at a loss to a farm that will add to clean up and remediation costs, is poor management of our tax dollars.
Cathleen Blackburn	Redmond, WA	2015-11-05	Our very survival depends on doing things in a more natural way. The topsoil is too depleted in most places already. Farms that are healthy must be saved!
Toni Miller	Bethel, DE	2015-11-05	This is got to be stopped
Jasmine Myers	North Bend, WA	2015-11-05	I live in the valley, I support small organic farms, and I am against any GMO farming!!
jonathan angevin	North Bend, WA	2015-11-05	The bees.
Anna Lasker	Duvall, WA	2015-11-05	Everything about this is wrong.
Alina Sherrett	Puyallup, WA	2015-11-05	This land could be used for purposes that would support local community health by increasing farming of produce to be used for human consumption. Growing GMO corn on this land is unacceptable.
Joanna Soren	North Bend, WA	2015-11-05	I prefer the land to be used as a local and organic food source. Seattle Tilth managing this land would benefit as us all.
Mary Beth Babcock	Carnation, WA	2015-11-05	I live in this Valley. I support sustainable Farming. There is a growth of small farmers working without GMO's and pesticides. This better supports the overall health of the Valley.
Debby Peterman	North Bend, WA	2015-11-05	I believe Seattle Tilth would be a better steward of the land and I'm against GMOs.
Holly Cowan	North Bend, WA	2015-11-05	I can not believe the 'politics' that are clearly influencing decisions in this proposal! Make a better decision King County Council members! We need healthy food, not 'souped up' dairy!

Name	Location	Date	Comment
Tami Walker	Bothell, WA	2015-11-05	Because I have a new son. The greatest things he will inherit from me are his health and this planet. I will fight to preserve both. This corporation clearly does not care about either!
Erin Zipfel	Redmond, WA	2015-11-05	Please give the land to Seattle Tilth
Denise Burbidge	Manchester, WA	2015-11-05	I'm tired of our food supply being poisoned with chemicals for profit.
Sean Cornell	pullman, WA	2015-11-05	I am against the use of GMO, Round-Up, as well as any synthetic fertilizer
Chris Ward	Boise, ID	2015-11-05	No more GMOs or dangerous pesticides.
Laurie escott	north bend, WA	2015-11-05	No GMO roundup and synthetic fertilizers
Neta Dazey	Kirkland, WA	2015-11-05	A confinement dairy and chem farm are not right for this river valley, all the downstream organic farming and fishing are threatened by the waste and chemicals. In addition, i have concerns about the small quiet farm roads no longer being available for recreation (cyclists and others) when large commercial operations predictably will require road expansion. Last, this property was purchased by the people through their government, and the Tilth proposal serves more people in more ways than the Dairy. Please reconsider.
Linda Grez	North Bend, WA	2015-11-05	We can't let this big mistake be made.
Bonnie Beck	North Bend, WA	2015-11-05	I'm signing because I want to preserve our natural environment for our future generations here in the Valley. No to GMOs!
Jenelle Johnson	Issaquah, WA	2015-11-05	I live near and work in the Snoqualmie Valley and cherish its beauty and community. The Seattle Tilth option is a sustainable and Eco-conscious choice with obvious benefits for all.
Graham Travis	Edmonds, WA	2015-11-05	NO GMOs!
Elizabeth Andersen	Sammamish, WA	2015-11-05	No more pesticides wanted!!!
Nina Delcavo	Brighton, CO	2015-11-05	No Monsanto for my family or this country
Daniel Corcoran	Duvall, WA	2015-11-05	We do NOT need more conventional dairy farms in the Snoqualmie Valley. We need more organic farms that will feed local people. And we sure as heck don't need to subsidize these large for profit companies.
Delya Bull	richmond, CA	2015-11-05	So tired of these people not caring one bit about our planet
Erin Chamberlain	Carnation, WA	2015-11-05	We need opportunities for small organic farmers and sustainable farming solutions that will enhance agriculture in the Valley.
Kate Henderson	Seattle, WA	2015-11-05	Don't make beautiful Snoqualmie into a diseased, polluted place.
Melissa Connolley	Seattle, WA	2015-11-05	Our farmland is a treasure to protect. As the western United States faces greater draught than we have known, our Evergreen State farmland is more precious, more in need of protection and care. It would be a crime to nature to pollute this valuable resource with carcinogens that kill life forms of all kinds. Please do what you can to keep our nature natural.
Glen Travis	Seattle, WA	2015-11-05	Once it's gone, it will not return! Save the valley.
Filip Tkaczyk	Monroe, WA	2015-11-05	I live here, my family lives here, my friends live here. This is our valley and our health. And this is not ok!
Jeanne Macauley	Issaquah, WA	2015-11-05	Tall Chief land should remain a complement to organic farms in the valley, NOT a contaminant. Title would be stewards of the land and create education for increased sustainable practices in the valley. A good for all usage, not a single family farm maintaining pesticides practices.
EagleSong --	Monroe, WA	2015-11-05	Land purchased with public funds should be used for public benefit
Sharon Wheeler	Port Orchard, WA	2015-11-05	GMO and roundup are bad for everything and Monsanto has way too much money and power.

Name	Location	Date	Comment
Deborah Poarch	Woodinville, WA	2015-11-05	We need to keep the valley free of chemicals and GMOs What was wrong with Tilth's offer?
Holly Torgerson	Snohomish, WA	2015-11-05	I implore you to act on behalf of those you represent and stop the sale that would not benefit the people you serve, but instead, another corporation intent on raping the land for profit. Please, vote with your conscience. Preserve this land and consider a proposal in keeping with your policies and the original intent when you spent our hard earned tax dollars on the land.
Maddie Lind	Kirkland, WA	2015-11-05	It is incredibly clear that the Keller Dairy proposal is not what is best for the community and that what Seattle Tilth has proposed has far more benefits for the community, both in the short and long term scheme of things.
Nicholas Sheldon	Oregon City, OR	2015-11-05	Because I was raised with good values
Pamela Centeno	Duvall, WA	2015-11-05	I live in this valley and want no part of GMO's, they will erode and poison the soil and if any of their frankincorn blows into a neighbors field they will sue them for possessing their proprietary seeds. Organic or poison and you pick poison? The same poison banned in most other countries. China wouldn't even allow cargo ships filled with GMO corn to dock in their country and India is suing Monsanto. This really makes Americans look stupid, keep Monsanto out of this valley before it kills it.
Stephanie Bettger	Redmond, WA	2015-11-05	I care about our valley land and agriculture. I strongly oppose polluting our land and water with GMO farming practices. Keep our soil and dairy milk free of poisonous glyphosphate.
Heidi Lee	Bellevue, WA	2015-11-05	Keep our land pristine!
Raleigh Wilson	Carnation, WA	2015-11-05	I want agricultural uses that are sustainable, low impact, and compatible with surrounding farms
Cynthia Golpe	Snoqualmie, WA	2015-11-05	I do not support GMO! Esp. Corn GMO! I don't care if initially the state will be at Loss... eventually with organic farming. .. health comes first! That's priceless! The state will save more money layer 8 when it would not have to pay \$\$\$ for the citizens hospitalization.
Gregg Miller	Cosmopolis, WA	2015-11-05	I love this planet and its inhabitants...
David Bach	Snoqualmie, WA	2015-11-05	We must move toward sustainable agriculture - natural and organic and humane. Keller isn't any of these!
Lucas whelan	Bellevue, WA	2015-11-05	this is bullshit and will kill organic
Kat Hale	Issaquah, WA	2015-11-05	I do not believe in chemical induced feed for any animals. Everything should be raised Organic!
James Wong	Issaquah, WA	2015-11-05	I don't like GMOs or roundup or the use of harsh chemicals!
Cristy Harper	Barrie, Canada	2015-11-05	I support Non GMO farming. Everyone deserves to eat clean, safe, non GMO food sources.
Clarise Mahler	Duvall, WA	2015-11-05	I support Snoqualmie valley farmers and introducing non organic, GMO will contaminate them
Lara Gale	Austin, TX	2015-11-05	I attended the RFP info sessions and explored submitting a proposal with dome partners. A search for partners to fulfill some of the most highly valued requirements, including community partnership and education/mentoring, yielded nothing but information that Seattle Tilth had preemptively secured commitments from most of the community players in the County. Seattle Tilth helped write the RFP, it turns out, so they got a bit of a head start. Given that difficulty, my partners and I chose not to submit a proposal. In the end, though, it seems King County was disingenuous about the entire process from the beginning. "Conservation" of this property has worked out to be a very blatant fraudulent use of taxpayer funds all around, people should definitely take note.

Name	Location	Date	Comment
Kathleen White	Carnation, WA	2015-11-05	I want to keep our Valley away from GMO Farming!
Denise Ellis	Tacoma, WA	2015-11-05	No to GMO!
Ryan Dudley	Issaquah, WA	2015-11-05	GMO farming is not something I want to leave for our future generations.
Tamera Klupar	Beaverton, OR	2015-11-05	I used to live right up the road, literally, from Tall Chief. I think Seattle Tilth's vision should be carried out.
Marni Good	Renton, WA	2015-11-05	Good health starts with caring for the health of our environment.
Elizabeth Lewis	Bellevue, WA	2015-11-05	I'm signing because I believe in sustainable, organic, community farming practices.
Caroline Kogan	Carnation, WA	2015-11-05	I live a few miles from here
JULIE MEADOR	Snoqualmie, WA	2015-11-05	No to GMOs, NO to ROUNd-up...don't contaminate our Valley.
Kari Canfield	Tucson, AZ	2015-11-05	I grew up in Seattle and have famy in that area. It's beautiful!
			Don't sell out!
			Don't betray it!
			Don't ruin it!
			Don't abuse cows!
			Don't poison us!!
coby eddy	duvall, WA	2015-11-05	We need to save the planet.
Delia White	Bellingham, WA	2015-11-05	I'm signing this Petition as this land should not be sold: (1) at a loss; (2) to a company like this; and (3) needs to remain open space for flooding.
Melissa Ross	seattle, WA	2015-11-05	I agree and live and buy in this area and do not want big business and GMO to be my neighbor.
Lisel Koepl	Seattle, WA	2015-11-05	I believe in preserving Tall Chief as agricultural farm land to support our local food economy.
Phyllis Benish	Nine Mile Falls, WA	2015-11-05	Opposed to gmo and manufactured fertilizers
Holly Tolen	Cle Elum, WA	2015-11-05	THINK OF THE FUTURE FOR OURSELVES OUR CHILDREN AND THEIR CHILDREN. STOP GMO FARMING AND GIVE US LOCAL, FRESH, SUSTAINABLE VEGETABLES
Rachel Tomczek	Duvall, WA	2015-11-05	I'm signing because I live in the valley and the idea of this beautiful land being polluted by confinement dairy and GMO crop production is devastating. I truly hope King County will listen to the voices of the people.
adam knudtsen	Issaquah, WA	2015-11-05	Down with gmo, stop poisoning the youth.
Chanda Zeigler	Carnation, WA	2015-11-05	I am a Snoqualmie valley native and believe in the benefits of supporting organic agriculture. I do not support Monsanto or the use of any pesticides.
Dawn Anson	Carnation, WA	2015-11-05	We need to stop these companies that pollute our earth and bodies and focus on companies that are about preserving the earth and our bodies!

Name	Location	Date	Comment
Kevin Smith	Duvall, WA	2015-11-05	<p>The proposed sale of this land to Keller Dairy meets none of the stated goals of the original RFP. It is being sold at a loss to an RFP respondent that clearly does not meet the goals of the RFP.</p> <p>Further, the use of GMO crops and Glyphosate, as well as the increased antibiotic use necessary when feeding livestock a diet of corn and the huge volume of water necessary to sustain a confinement dairy farm and the impacts to the river ecosystem from such are all reasons not to continue with the sale.</p>
eric slind	gig harbor, WA	2015-11-05	I want pure food
Marianne Leth	ISSAQUAH, WA	2015-11-05	High-density dairy farming and other livestock farming has been scientifically proven to be environmentally unsustainable. By using this land for organic farming and other low-impact uses, we are protecting the delicate eco system in Snoqualmie Valley from the negative impact of compact dairy farming.
Veronica Wilson	Carnation, WA	2015-11-05	I want sustainable farming.
Ellen Tiegs	Milton, WA	2015-11-05	I want a better world for my children.
Sara Hamilton	North Bend, WA	2015-11-05	I'm signing this because it is the right thing to do and greed must be stopped to save lives, our planet deserves to be treated with respect and cared for, not poisoned.
Jacquelyn Hansen	Seattle, WA	2015-11-05	I support sustainable agriculture and health for all.
Ellen Lelas	North Bend, WA	2015-11-05	I don't want these toxic chemicals in my ecosystem and in the food that I consume. Our valley is a beautiful place and should not be marred by farming practices that can cause harm to our environment and our inhabitants.
Jonathan Nelson	Snoqualmie, WA	2015-11-05	Long time valley native who wants to keep our land in the hands of those who respect nature and the people and animals who live here.
Darien Payne	Fall City, WA	2015-11-05	I'd like to see the Snoqualmie Valley become a model for sustainable and regenerative agriculture. Bringing Seattle Tilth's presence in the valley would further educate all King County residents in benefits and practices of sustainable agriculture.
Serina Patel	issaquah, WA	2015-11-05	In recent years King County has let enough good land (farms and forest) be destroyed!
Jesse Pettersen	Duvall, WA	2015-11-05	Do not want GMO crops and chemicals in the sno valley
Sara Froelich	Redmond, WA	2015-11-05	The dairy proposal could jeopardize thriving nearby downriver organic farms. Despite an excellent proposal "Seattle Tilth", the County's Natural Resources and Parks Department decided to sell Tall Chief for a \$3,700,000 loss to one of the largest landowners in the Snoqualmie Valley. Corruption.
Miriam Berger	Carnation, WA	2015-11-05	The Snoqualmie Valley needs to stay small farm agriculture and animals. It is important to preserve the areas left in this country that are mainly family farms. We cannot afford to make any more mistakes with land use, it is far too precious.
Susan Schuba	North Bend, WA	2015-11-05	I support Seattle Tilth
Cathy Westerlund	Snoqualmie, WA	2015-11-05	We need to have farm land to support small farmers growing organic food for the local area. It would decrease transportation of food from out of the area, provide good sustainable farm and land practices and would contribute to the well being of the snoqualmie valley. We do not need to have a farm that uses GMO seed and herbicides and pesticides that will damage the land and the people that live here.
mandy andrea	Redmond, WA	2015-11-05	Conventional farms are so last century. Let's move toward organic pasture farms. For our and the animal's sake.

Name	Location	Date	Comment
Megan Fletcher	Renton, WA	2015-11-05	I want to know what I'm eating, and not have track malls
Margaret Hindle	Carnation, WA	2015-11-05	I am a Market Gardener and sell at the Carnation Farmers Market, to a local Juicing Company and direct to individuals. I also am a seed saver and know of some organic seed saving going on in the valley. So much market potential for organic seed breeding. We can not save or develop organic seed corn seed here because of the GMO darn that is in fields, soooo not only is it bad for us but it is preventing an industry that is booming from really taking hold here.
Deb Radloff	duvall, WA	2015-11-05	Because we need more local grown food, and once we let development take over, it's gone forever. Just look at Redmond Ridge...Developers won that battle, Citizens lost!
Alan Potter	Issaquah, WA	2015-11-05	I believe in natural organic agriculture over what has become the conventional.
Sam Nickell	Issaquah, WA	2015-11-05	I believe in the power of the community and supporting the community (CSA) and in urban farming and having a wider array of local, fresh organic produce here in the valley.
Jeni Hogenson	Duvall, WA	2015-11-05	I'm signing because as someone with a challenging chronic disease, I have found great benefits from local, nutritionally dense foods. I believe that environmentally responsible food production is the most important use of the precious resource we have in Snoqualmie Valley. It is vitally important to our future health for humans, livestock, wildlife, and the land. We must make choices that support the health and welfare of our local people and economies that will outlast our lifetimes rather than short term, short sighted solutions that only continue the devastating effects we now are experiencing all over the world. Thank you for opening your heart to this issue.
Amanda Kain	Carnation, WA	2015-11-05	I'm signing because I believe a commercial crop using GMO's and harsh chemicals will create harmful runoff and cross pollenate with organic crops near by destroying their commitment to truly organic farming.
violet collens	seattle, WA	2015-11-05	This will poison our land and effect ground water and run off that will effect our wildlife and other organic farms this is not ok!
Kamal Patel	Seattle, WA	2015-11-05	Because du.
jordan Jolley	North Bend, WA	2015-11-05	Stewardship is more important than profit
Dylan corriveau	Bellevue, WA	2015-11-05	Not all GMO'S are bad, this however, no bueno.
Melissa Cannon	Port hadlock, WA	2015-11-05	I don't want gmos or round up sprayed anywhere near me! This shit is poisin, you know it. Stop killing us with this garbage please! Im tired of everyone getting cancer because you dicks are poisoning the air, water and land. You're killing the bees and everything else you grow that poison on and in then you spray with more poison. Just stop ruining everything please.
Morgan Henley	Bellevue, WA	2015-11-05	I don't want gmo destroying some of the last great farm land in our valley.
Nicole Turner	Seattle, WA	2015-11-05	We do not need more pollution or dairy in our community.
TOM NEIR	Kirkland, WA	2015-11-05	BELIEVE THE RFP INTENTIONS WERE COMPLETELY IGNORED BY THE COUNTY AND IF THEIR INTENTION WAS TO SELL THE PROPERTY THEY COULD HAVE GOTTEN A MUCH HIGER PRICE BY ADVERTISING IT THAT WAY. EVERYONE LOST...EXCEPT ON FARMER.
Sam Markert	Bainbridge Island, WA	2015-11-05	I prefer the land to be utilized in a way reflective of the original RFP
Frank Ware	Ashland, OR	2015-11-05	Supporting my great-niece Lisel in her efforts to make the world a better place.
Kimberlee Sherrill	Fall City, WA	2015-11-05	We need to protect our earth for the children and animals.
Susannah Pryal	Sammamish, WA	2015-11-05	I care about this land and would rather it be sustainably farmed.
Carmen Villanueva	Fall City, WA	2015-11-05	I live in this beautiful valley.

Name	Location	Date	Comment
Nancy Board	Woodinville, WA	2015-11-05	I among many who are tired of big companies that dont seem to care about their products - all that seems to matter is the bottom dollar.
Tracyjo Selene	Seattle, WA	2015-11-05	I don't agree with sending poison into our waterways!!
Kevin Nam	Bellevue, WA	2015-11-05	No more poison.
Amaris Dsign	Snoqualmie, WA	2015-11-05	I'm signing up because this is Unhealthy and it's within my Community. We don't want this garbage in our land, nor in our bodies!! Hail to the NO!
Teresa Appleseth	Fall City, WA	2015-11-05	this is wrong on several levels
Dawn Murin	Seattle, WA	2015-11-05	Factory farming is not sustainable. The Keller proposal is a confinement dairy farm that intends to grow Roundup-Ready GMO corn using glyphosate and synthetic fertilizers to provide feed for dairy cows. The Keller Dairy proposal will jeopardize organic farms located downstream from the Tall Chief land and would provide little net increase in local agricultural production. If the county is truly dedicated to sound agricultural soil and water conservation practices, protecting and restoring the soil, water, and forest resources on the site through stewardship, and retaining quality farm land for future generations, then the land should go to the Seattle Tilth.
Mallorie Krieger	Monroe, WA	2015-11-05	I'm signing because I do not support GMO's being used!
Christian Kuhtz	Roswell, GA	2015-11-05	I'm signing because the goals set out for this land purchases by the county are still true. And because it is an outrage for the county to go back on its own word. How can something meet criteria when it is a perversion of the original intent? Stop!
Suzanne Marshall	Port Orchard, WA	2015-11-05	We need to protect our natural resources from the industrial poisons presented by confinement farming. The synthetic fertilizers, GMO's etc that will be used in such a facility have far reaching consequences.
Jo Baker	North Bend, WA	2015-11-05	I believe in organic farm. Not the Dairy Farm with pesticides and containment
Rick Bastedo	Snoqualmie, WA	2015-11-05	A. my home is down river from the site B. my children and grand children live here
PattiAnn Eden	Snoqualmie, WA	2015-11-05	Read the 10 top reasons to redo the RFP. It should be done over. Don't let GMO grown corn in the valley. Corn, in general, should not be fed to cows. GMO corn should not be fed to any animal or human. Chemicals to kill the stocks for faster production should not be allowed. It gets into the food, hence, the food chain. There are many, many more reasons it should be done over.
Jennifer Walker	Rio Vista, CA	2015-11-05	GMO's are harmful! PERIOD!
Michael Brown	Bothell, WA	2015-11-05	Don't want GMOs
Johnny Perez	North Bend, WA	2015-11-05	I am not a fucking idiot.
Taylor Robbins	Carnation, WA	2015-11-05	Because I strongly believe that Tilth will make the best, most appropriate use of the land, with the best gain for everyone and the least harm to the current residents and farmers in the valley.
Shelley Rixon	North Bend, WA	2015-11-05	It shocks me to see that a GMO farm enterprise would be given preference over keeping this prime land in an organic, people-friendly, healthy, environmentally sound, pure (need I say more?) state of being which would benefit mankind into perpetuity.
Lisa Salton	Carnation, WA	2015-11-05	Because I live in the valley and care what happens to the property!!
Bonnie Erin Schulte	Snoqualmie, WA	2015-11-05	I believe in organic, sustainable farming. GMO are hazardous to our health and environment and should be illegal.
