

Name	Location	Date	Comment
Maureen McGregor	Seattle, WA	2015-11-06	I don't think GMOs are good for our environment.
Rich Whitehill	Kirkland, WA	2015-11-06	A lease with learning will be the best steward of the land.
Michael Smith	Issaquah, WA	2015-11-06	Public funds should go back to the public, not one family. Love the heritage in dairy farming with Keller's but this property needs to have a bigger impact.
Katherine Heuser	Redmond, WA	2015-11-06	I think it's wrong and irresponsible
Lisa Vorwerk	Bothell, WA	2015-11-06	King County needs to have more integrity than letting our land be soaked with fertilizers that will then affect the connected watershed. Gross!
Katie Vincent	Seattle, WA	2015-11-06	It's time to show the future of farming rooted in stewardship, not acquiesce to outdated practices that are not helping anyone. Plus, this would help to incubate and train a new crop of organic farmers that could go forth and spread their best, least-toxic practices and have the support they need to succeed in the process.
Kelly Lyon-King	Kirkland, WA	2015-11-06	We do CSA in the valley that is completely organic, no gmo's and no pesticides. I don't want that horrible for you stuff in our local valley
tonja gabryshak	Fall City, WA	2015-11-06	I'm against GMO'S and anything that does not honor and preserve life anywhere on this planet I call home, especially this area where I once lived and fondly return to for rejuvenation ☐
Joshua Alexander	Snoqualmie, WA	2015-11-06	no to Round Up Ready Crops in King County!
Barbara Fletcher	Woodinville, WA	2015-11-06	we need to preserve our farmlands, our environment our salmon and our heritage.
Nic Bitting	Madison, WI	2015-11-06	As a tax payer who helped fund the purchase of the Tall Chief property I see significantly greater community and county benefit in the Seattle Tilth proposal. The Tilth proposal clearly addressed and demonstrated an understanding of the RFP criteria; furthermore their legacy in our county proves that they are up to the task of delivering the outcomes the county requested. This decision should be reversed. Anything else is unconscionable.
antonio ramirez	carnation, WA	2015-11-06	This has been my home since I was a child and I believe that we do not need to destroy this natural land any more than we already have.
Jerod Jensen	Olympia, WA	2015-11-06	GMO'S are terrible!
George Myers	Carnation, WA	2015-11-06	We need to protect our valley with sustainable natural farming practices.
Alexis Kaplan	North Bend, WA	2015-11-06	Glyphosphate exposure is particularly worrisome to those who live and work close to where it is disseminated. It can radically alter the friendly gut flora of all who come in contact and subsequently have wide ranging deleterious health effects. It has been associated with diabetes and kidney failure and until proper testing occurs, should not be used. Levels of glyphosphate necessary for growth of roundup ready crops far exceed those used previously and larger amounts linger in the soil as a result.
Michelle Diane Lorentson	Carnation, WA	2015-11-06	I want our home to get away from pesticides, GMO, and cruel methods of animal farming, not add to it and embrace it!
Rich Gieseke	Redmond, WA	2015-11-06	I'm signing this because GMO and heavy dairy use upstream from large Organic CSA Farms makes no sense, additionally people can't eat feed corn, but can eat the produce grown from local organic farms. We must teach farming to have farmers.....
Fran Post	Port Townsend, WA	2015-11-06	Please reconsider and sell this property to Seattle Tilth. Cows fed on GMO feed will also be given antibiotics. In the 21st century many of us do NOT want this stuff in our bodies.
Deborah Marion	North Bend, WA	2015-11-06	NO GMO's, NO Roundup!

Name	Location	Date	Comment
Robert Friedman	Carnation, WA	2015-11-06	I'm signing this petition because I want to keep this valley I live in free of the GMO poison and roundup poison.
Helen Papke	Carnation, WA	2015-11-06	I am against farming other than organic. GMO farming is against my principles.
Dan Altman	Ashland, OR	2015-11-06	I used to live in that area and want to see the land preserved for organic farming. thanks, Dan
Pamela Johnson	North Bend, WA	2015-11-06	I'm signing because I get sick when I eat GMO's. I don't know if it's the product or the pesticides that make me ill . Since all GMO's & anything related to it is proprietary & unlabeled, I have no way figure out what makes me sick. I don't want that stuff blowing in the wind in my backyard.
Lotte Torgersen	Issaquah, WA	2015-11-06	Snoqualmie valley is a unique place in the greater Seattle region, and factory farming will bring the very positive development here to a screeching halt. Besides, big dairy is hardly a longterm profitable business the way the numbers go for consumption.
Deborah Poarch	Woodinville, WA	2015-11-06	Supporting the Tilth proposal has many benefits for the community. It's a wonderful opportunity to support locally grown food and inspire a return to an agricultural culture.
Sally Jennings	Siletz, OR	2015-11-06	It is long past time to stop poisoning our food, the land, the air, the water. We need to wake up and tradition to organic farming practices..
Robert Coats	Snoqualmie, WA	2015-11-06	Buying the land with tax payer money for \$4,500,000 and then selling it for \$720,000 is a bad deal and a waste of tax payer money.
Correine Magee	Issaquah, WA	2015-11-06	I do not support use of the land for GMO crops or the use of roundup/glysohate. The land should be used for organic farming practices .
Cassidy McDowell	Issaquah, WA	2015-11-06	I have been a valley resident my entire life and I don't plan on leaving this place until I'm horizontal in the ground, which I will do everything in my power to keep from being tainted with harmful chemicals just to make some dudes wallet bigger
Andrew Tuck	Fall City, WA	2015-11-06	Because I believe that the organic farming benefits are best for my community.
Shelley Lincoln	Gold Bar, WA	2015-11-06	I live here and I want a clean environment with clean food and water for my kids. I will accept nothing less! You people need to support organic farming in this area. Get with the right program politicians!
Karen grady	Redmond, WA	2015-11-06	I don't chemicals put into water supply and River around snoqualime salmon.
Jason Gram	North Bend, WA	2015-11-06	We need less GMO food and more organic options. Please reconsider this decision. Thank you.
Amanda Rutledge	Bellingham, WA	2015-11-06	The Snoqualmie Valley is a special place full of local farmers of all sorts. Monopolizing the valley by one heartless dairy farmer who will ultimately devastate the local's livelihood and spirit would be just tragic.
Alex Wood	Duvall, WA	2015-11-06	That valley is my hometown and I can't stand to think of that land being poisoned. Let's use it to farm organic items.
Mary Nickerson	Woodinville, WA	2015-11-06	I hate GMOs and am completely freaked out that king county is even considering poisoning our beautiful farmland in this way. The confinement dairy described represents EVERYTHING bad about conventional farming practices. PLEASE consider a more sustainable, clean, environmentally friendly proposal, like the one put forth by Seattle Tilth. Our area can continue to be a leader in the future of sustainable farming.
Lori Cobb	Redmond, WA	2015-11-06	To protect our Valley
Joan Melgaard	Renton, WA	2015-11-06	To preserve this unique property

Name	Location	Date	Comment
Britnae Kokesh	Palatine, IL	2015-11-06	This is my home state and I'm from that very valley that this would ruin. Please understand the locals and people this would affect.
Anne Melgaard	North Bend, WA	2015-11-06	Organic farming is threatened by GMO crops. We have certified organic farms throughout our valley. Protect our health and the health of our farmland.
cryatal johnson	Snoqualmie, WA	2015-11-06	I used to work at this golf course and LOVE this area. It has a National Audubon Society wildlife refuge accross the street. This is an important fact that needs to be recognized.
deanna wessman	Yucaipa, CA	2015-11-06	This is wrong on so many levels!
Joshua Hopkins	Seattle, WA	2015-11-06	Conventional farming practices such as confining cattle, using GMOs, and herbicides and pesticides is inhumane and detrimental to the health of the environment and humans.
Erika Trott	Seattle, WA	2015-11-06	I strongly believe in supporting local agriculture.
Angie Beaulac	Redmond, WA	2015-11-06	As a cancer survivor, I am an advocate for clean eating. It's time to eliminate harmful chemicals from our food supply.
cristie coffing	snoqualmie, WA	2015-11-06	I care
Nicki Walters	Mountlake Terrace, WA	2015-11-06	I want safer food! My husband is battling Stage 4 Cancer, I have witnessed first hand what these chemicals can do to a body.
Sonya Montenegro	Portland, OR	2015-11-06	NO farms using GMOS, Roundup or fertilizers!!!
lynn lawe	Carnation, WA	2015-11-06	The county should not be selling this prime farmland to the largest and not necessarily the best, land owner in the valley.
Lauren Wallenfang	Yelm, WA	2015-11-06	Harsh chemicals don't belong anywhere near our food.
Michael Middleton	Tucson, AZ	2015-11-06	No way. Y'all bought it for 4.5 million with our money and paid for an RFP to protect we the people's interest. Now follow that... and I'd like to know if Keller Dairy donated to your individual campaigns or what? This is wrong. I think you know it, too.
Wesley Fruge	Seattle, WA	2015-11-06	Keep toxic chemicals off of our public lands and away from our rivers!
Michael Lawson	Snohomish, WA	2015-11-06	I believe in clean, unpolluted streams for healthy fish and humans.
wendy kain	Carnation, WA	2015-11-06	I live here and don't want gmo in my backyard!
Polly Dalgarn	Fall City, WA	2015-11-06	I think a massive dairy farm with enslaved cows plus gmo use is a GIANT step BACKWARDS in the evolution of the valley. A sustainable farm would be a better choice in my opinion!
Martina Collom	Bellevue, WA	2015-11-06	This is where I live and I do not want this in my backyard. Awful, just awful.
Maureen Irey	Snoqualmie, WA	2015-11-06	Please let this be a organic farm. It can be a commercial farm, but no gmo's and chemical fertilizers. This type of farming needs to be banned in this area.
Nicholas Tomczek	Duvall, WA	2015-11-06	The Snoqualmie River doesn't need more pollutants added to it.
Dana Illo	Vashon, WA	2015-11-06	I'm signing because I believe in the earth and her natural systems. This is unnatural.
Madison Dalgarn	Fall City, WA	2015-11-06	It's an outrage to think that people might be accepting this with open arms. Please don't!!
Susan Gerde	Carnation, WA	2015-11-06	I truly believe we need responsible farming. Please support the farms that are working to provide healthy food to our community and respect our lands.
Jennifer Myrick	Los Angeles, CA	2015-11-06	I want to protect our environment and keep poison out of our agricultural.

Name	Location	Date	Comment
Kirsten Täuber	Woodinville, WA	2015-11-06	Because I believe that the opinions of citizens should be heard and taken into account before changes are made that effect people and environment so drastically. Enough land has been changed on this planet and has driven wildlife, people and plants away from their natural homes - we need long term solutions to keep the biological diversity of this planet, not the opposite.
Yvonne Seidl	Snoqualmie, WA	2015-11-06	I am signing this as both a former and future resident of the Lower Snoqualmie Valley. There is a need in the area to maintain and grow sustainable organic farming that has been lost to the region over the years. I would like to see this property go to an organic farm or coop not a factory farmed dairy operation. I am all for the need for dairies but this property is much more capable to provide much needed food. In practises of the Keller Dairy, it risks the organic farming in the area. I would like to see the farm be an option to allow small farmers to build and bring more food and produce to the people of the Seattle area.
Jeanne Lamon	Bothell, WA	2015-11-06	Do not send me emails
Joanna Ristow	Seattle, WA	2015-11-06	I believe in local organic farming!
Deborah Oaks	Duvall, WA	2015-11-06	I was part of the movement to see this place preserved for the local farm community. NOT a single conventional farmer who could care less about ecologic integrity. HOURS of my life spent having King County blow smoke at us about preserving the land for community use that was both ecologically and local economically sensitive.
Xu Zhou	Issaquah, WA	2015-11-06	Save the farms from GMO agricultural, environmental, wild life habitat impact.
Laura Gunion	Monroe, WA	2015-11-06	I don't want GMO corn in the valley. I do want cutting edge environmentally responsible land management
Lindsey Smith	Stilwell, KS	2015-11-06	The Snoqualmie Valley and its community would be enriched by more organic farming and conservation, but not by genetically modified farming. I care about this place and how the community is trying to care for it.
Cliff Alameda	Bothell, WA	2015-11-06	We gotta keep the valley clean and free of GMO's
Bailey Roth	Kirkland, WA	2015-11-06	As a descendant of a farming family on the Skykomish River, I don't want to stand by and watch, as irresponsibility opens the door for worse things to come. Public benefit outweighs personal profits.
Wendy Whitehill	Kirkland, WA	2015-11-06	While I applaud the county's decision not to sell to a developer, I think their choice of Keller Dairy is a bad one if they want a "sustainable farming operation that will use sound agricultural soil and water conservation practices while strengthening the local food economy and production."
Dawn Estepa	Carnation, WA	2015-11-06	Seattle Tilth would be a more responsible neighbor to the organic farms downriver. We need to get rid of chemicals and GMO's, not allow more. This is just wrong for the Snoqualmie Valley.
Deborah Schneider	North Bend, WA	2015-11-06	I believe we need more organic farms in the valley.
Amy Stauch	Redmond, WA	2015-11-06	We are killing our earth with the kind of farming that it's planning on using.
Teresa Conley	North Bend, WA	2015-11-06	I used to live down the street from here. It was my favorite place I've ever lived, and I would hate for the beauty and health of the land be ruined for unsustainable farming.
Jo Meyer	Issaquah, WA	2015-11-06	Because this is a really bad idea!
Greg Marsh	Sammamish, WA	2015-11-06	I'm signing because preserving organic farm lands is important to the environment and the Mountains to Sound Greenway.
RANDY BECK	antioch, CA	2015-11-06	The valley must be saved
Yongshao Ruan	Bellevue, WA	2015-11-06	I want to support local organic farms.

Name	Location	Date	Comment
Danielle Harper	Freeland, WA	2015-11-06	It is important!
Destiny Williams	Seattle, WA	2015-11-06	A much better outcome is not only possible, it's right in front of your eyes. The current plan would be harmful, where the alternative could be so positive!!
colin groark	Arusha, Tanzania, United Republic of	2015-11-07	Without a revision of decision, the opportunity for organic food grown by the community, for the community will be lost; and the threat to the site's environmental health will increase dramatically.
Kelsey Walker	North Bend, WA	2015-11-07	I love the valley and that piece of land and want to see it best serve the local community
Judy Potter	Carnation, WA	2015-11-07	No GMO... NO more poison...no more land or water pollution
Denice Carnahan	Renton, WA	2015-11-07	The people of King County deserve organic....
Martha Groom	Seattle, WA	2015-11-07	I'm signing because I care that we preserve sustainable farmlands in King County. This does not qualify. This will impact multiple sustainable farms in the region. We should not sell such land (and at a loss) in this way.
Sarah Blue	Carnation, WA	2015-11-07	I love earth
Lauren Beckner	Duvall, WA	2015-11-07	It's wrong.
lauren shimokawa	santa cruz, CA	2015-11-07	I'm signing because I strongly oppose the development of our beautiful valley, especially for GM crops.
Amy Hammingh	Issaquah, WA	2015-11-07	I'm signing because I love to eat whole, natural food from local farmers in the valley!
Rachael Scott	Edmonds, WA	2015-11-07	I live here and believe nature's natural processes are smarter and more beautiful than we can imagine.
Rose Morgan	Cheney, WA	2015-11-07	I believe
Bria Woodworker	Beaverton, OR	2015-11-07	I care and want to preserve rural lands. I also don't appreciate factory farming.
Rich Smith	Issaquah, WA	2015-11-07	I'm signing because I love riding past Tall Chief on my bike and I love Seattle Tilth.
Kieran Irish	North Bend, WA	2015-11-07	I do not believe or condone confinement dairy's
Lisa Beeks	Issaquah, WA	2015-11-07	Please do not allow this to happen our Valley . With 26 food allergies , cutting gmo out of our area is a prime concern for me and my family. Let alone the already existing CSA farms that very possibly will be ruined by this. This area floods once the round up washes over those trying to do the best practices of farming it will ruin those small farmers that have worked so hard for so many years to Keep it Local! Love our state love our area DO The Right THING !!! Money is not as important as our Health!
Julene Weaver	Seattle, WA	2015-11-07	I want Snoqualmie Valley to be free of GMOs.
Curtis von Trapp	North Bend, WA	2015-11-07	I believe organic farming and the proposal from Seattle Tilth are far more beneficial to the long term health and welfare of the Snoqualmie Valley.
Anna Yost	North Bend, WA	2015-11-07	A dairy farm, as described in the supporting documents, would irrevocably damage the floodplain with harmful pollutants and impact existing organic farmland. It is a disgrace that a better offer and proposal for the land was rejected - it is more in keeping with the character and needs of the valley for Seattle Tilth to coordinate high quality local produce for our communities.
Deepa Ravisanker	Issaquah, WA	2015-11-07	I'm signing this because, we need real food and not something like food. GMO food has a serious impact on health leading to many issues from new borns to adults. It's just not enough to fill our stomachs , we have to live a healthy life after eating food which is not possible with GMOs.
Shellee Strand	Moses Lake, WA	2015-11-07	I am signing this to keep the valley free from this.

Name	Location	Date	Comment
Nan McCutchan	Snoqualmie, WA	2015-11-07	I want to see this beautiful land preserved!
Jessica Wanamaker	Issaquah, WA	2015-11-07	I'm signing because someone needs to put an end to corporate greed
Craig Johnson	Duvall, WA	2015-11-07	We need to protect our lands from further contamination.
Elaine Olofsson	Issaquah, WA	2015-11-07	I believe whole, unprocessed foods are of the utmost importance to my children's generation.
Kathleen Bills	Logan, UT	2015-11-07	I'm from Washington state and the beauty should be preserved, not squandered!
Trevor Browne	Duvall, WA	2015-11-07	Keep our valley healthy. Support vegetable farming and healthy local food.
A Karanasos	South Hadley, MA	2015-11-07	<p>It is important to me and to our community to keep land and water clean, keep out farming practices that include growing Roundup-Ready GMO corn using glyphosate and synthetic fertilizers to provide feed for dairy cows. Seattle Tilth's comprehensive plan will contribute to the community in a far more charitable and sustaining way than practically giving the land away to a private business that does not seem to have a desire to keep land and water clean. There is not one mention of organic farming practices in the Keller's proposal.</p> <p>I move to Rescind the County's Preliminary Decision to Sell Snoqualmie Valley 'Tall Chief' Farmland to a Confinement Dairy Company Keller Dairy that Uses GMOs, Roundup, and Synthetic Fertilizers.</p> <p>Sincerely,</p> <p>Anthea Hubanks North Bend, Washington</p>
Elizabeth Goertzel	Bellevue, WA	2015-11-07	This is wrong on so many levels. The property is worth more, the use of gmos, and the maintainability and health of water table in this important farm area.
Bobby DiTrani	North Bend, WA	2015-11-07	
			We must protect our valley from all forms of industry.
Kristen Parsons	Seattle, WA	2015-11-07	We need less pollution - not more!
Jill West	Seattle, WA	2015-11-07	I want to support small, organic farmers and believe that Seattle Tilth is the right choice to protect the land.
Kristen Freund	Fall City, WA	2015-11-07	The Tilth offer preserves the land for organic farming and is in keeping with the county's purchase of Tall Chief. The Keller proposal is not s d contained falsifications.
Tracy Thompson	Bellevue, WA	2015-11-07	I would like to see greater variety in how the land in the Snoqualamie River Valley is being used. I am especially in favor of using my tax dollars to create public benefit by encouraging the development of more farmers and more organic farming practices on the land. I am opposed to my tax dollars being used to support a single, dominant landowner who will not be using organic practices.
Adam Cornille	Seattle, WA	2015-11-07	I support the Tilth proposal for public good.
Allyson Schrier	Issaquah, WA	2015-11-07	I'm appalled by the decision to turn the Tall Chief land into a dairy farm when the intended use is so far from the criteria outlined in the RFP!

Name	Location	Date	Comment
Alexandra Clark	North Bend, WA	2015-11-07	The Tilth proposal is a better match for the requirements of the RFP and more beneficial to the residents of the Snoqualmie Valley.
Maureen McGrath	Seattle, WA	2015-11-07	GMO's do NOT belong near organic farms! Plus, this land was originally purchased by the state with public funds for the public, so choose the Tilth proposal which does just that! Provide public farm land for the tax paying public!!
Samantha Van Handel	North Bend, WA	2015-11-07	Natural, organic farming & livestock are vital for ourand our offspring's survival in Earth
Cait Platz	Seattle, WA	2015-11-07	The proposed use of Tall Chief will impact many businesses (farmers) in the region who are actively supplying viable produce and meat to hundreds of families throughout Western Washington with CSA membership.
hillary jensen	woodland, WA	2015-11-07	I'm signing because this area is of particular importance and value to me, having friends and loved ones who farm in the area. It is also very important that we move forward with agricultural options that give back to the earth and the soil that we all too often greedily abuse for our own means without a forethought as to what will happen years from now. If we don't start paying more attention to the way we're treating the earth and those who don't have a voice, the consequences will be severe.
Jennifer Schwegler	Snohomish, WA	2015-11-07	I'm signing because this prime farmland with fertile soil could be put to such better use supplying produce to the metro area than expanding a CAFO dairy which pollutes the water and soil with pesticides, fertilizers and concentrated animal waste. Please do not sell the property to Keller dairy.
pamela hathaway	north bend, WA	2015-11-07	This is profoundly important to me, and (I believe) our magnificent valley. We need to move forward wisely and make healthy environmentally sound decisions for our land legacy. GMO's and factory farms are not that healthy, wise choice.
Fay Payton	Carnation, WA	2015-11-07	i am appalled that the preliminary decision is so opposite of the intended use of the Tall Chief property. The Tilth proposal would benefit so many more local people, and impact the area in very positive ways. This preliminary choice does none of that and will cause serious difficulties to the entire area. Also, why were the local organic/sustainable farms named by the Kerry Dairy as supports? That is simply a lie. Who permitted that to stand? This is a terrible misplaced set of priorities. Please reconsider this decision and increase the input from the organic farmers in the area instead of just accepting the dairy's assertions.
Ruth Pickering	Fall City, WA	2015-11-07	I did not realize that the Keller purchase would have such negative effects, or that Seattle Tilth had made a strong alternative proposal.
Angela Carlson	North Bend, WA	2015-11-07	I care about the valley I grew up in and where I raise my children.
Michele Collins	Seattle, WA	2015-11-07	It seems that the language in the RFP does not match the County's decision on using this coveted property for GMO crops and dairy. There needs to be accountability.
Julie Kettman	Seattle, WA	2015-11-07	I support sustainable agricultural practices.
Judy Feldman	Freeland, WA	2015-11-07	I'm signing because I work for an organization that trains new farmers. I know the importance of truly sustainable farming practices. Confinement, GMO's, glyphosate, and synthetic fertilizers are the opposite. Please, don't put other sustainable farms at risk by making room for Keller Dairy behavior. Look at your own RFP. "Sound agricultural soil and water conservation practices" are not embodied by Keller.
