Proposed No.: 2020-0288

1 **AMENDMENT TO PROPOSED MOTION 2020-0288, VERSION 2**

2 On page 6, on line 116, after "F." insert "The council requests that, as part of the next
3 biennial progress report required in K.C.C. 18.50.010, the executive include an analysis
4 of the effectiveness of the county's strategies and actions in reducing greenhouse gas
5 emissions and proposals to continually improve the program to most effectively and
6 quickly achieve the goals of the SCAP, including maximum greenhouse gas emissions
7 reductions. The analysis and proposals should include, but not be limited to:

8 1. Identifying the actions that have reduced greenhouse gas ("GHG") emissions
9 by one percent or greater compared to the 2007 baseline for countywide emissions and
10 for county operations and quantifying the GHG reductions from those actions;

11 2. Identifying the performance measures in the 2020 SCAP that have not
12 achieved the planned targets, including the reasons for the outcomes and what
13 adjustments could be made to make the actions meet targets or, if the actions seem
14 unlikely to meet targets, what alternative actions should be pursued to make the SCAP
15 more effective; and

16 3. A proposal of specific outcomes for 2020 to 2025 for measuring and
17 reporting progress in each of the nine pathways identified in the 2020 SCAP for
18 achieving countywide GHG reduction goals and each of the seven pathways identified in

19 the 2020 SCAP for achieving operational GHG reduction goals. For each outcome, the
20 proposal should include:

21 a. a date for achievement;

22 b. a description of the specific actions that need to be completed to achieve the
23 outcome by that date;

24 c. for outcomes to be achieved in 2021 or 2022, the status of progress toward
25 the outcome, a description of the reasons for the status, the amount and type of financial
26 and other investments needed to achieve the outcome, if any, and a proposal for
27 alternative actions or changed emphasis on actions already planned in order to be most
28 effective in meeting future objectives for the pathway.

29 G."

30 **EFFECT prepared by *Jenny Giambattista: Requests the executive include an analysis***
31 ***of the effectiveness of the County's strategies and actions in reducing GHG emissions***
32 ***as part of the 2023 SCAP Biennial Progress Report, and propose outcomes for***
33 ***measuring progress on the County's proposed emissions reduction pathways.***
